#### SUPPLEMENTARY INFORMATION:

##### Species Covered in This Notice

The following listed species (evolutionarily significant unit) is covered in this notice:

Chinook salmon (*Oncorhynchus tshawytscha*): threatened upper Willamette River (UWR).

#### Authority

Scientific research permits are issued in accordance with section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et seq.*) and regulations governing listed fish and wildlife permits (50 CFR 222-226). NMFS issues permits based on findings that such permits: (1) are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage of the listed species that are the subject of the permit; and (3) are consistent with the purposes and policy of section 2 of the ESA. The authority to take listed species is subject to conditions set forth in the permits.

Anyone requesting a hearing on the application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA.

#### Application Received

##### Permit 1515

Water Works Consulting (WWC) is requesting a 2-year research permit to annually capture, handle, and release juvenile UWR chinook salmon. The research would take place in an artificial side-channel to the Willamette River, Oregon. The purposes of the research are to determine how such side-channels function compared to natural, river-created ones and whether the side-channel provides habitat for native fishes. The WWC intends to determine juvenile fish presence and abundance in the spring and late summer of 2005 and 2006. The research would benefit listed chinook by determining how effectively such side-channels help restore salmon habitat. The WWC proposes to capture the fish using seines and boat electrofishing equipment. Captured fish would be identified, counted, checked for tags and marks, and released. The WWC does not intend to kill any of the fish being captured, but a small number may die as an unintended result of the activities.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the application, associated documents, and comments submitted to determine whether the application meets the requirements of section 10(a) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day comment period. NMFS will publish notice of its final action in the **Federal Register**.

Dated: January 7, 2005.
