

*Type of Request:* Intent to seek approval to renew an information collection.

#### Abstract

*Proposed Project:* On September 11, 1993, President Clinton issued Executive Order 12862, "Setting Customer Service Standards," which calls for Federal agencies to provide service that matches or exceeds the best service available in the private sector. Section 1(b) of that order requires agencies to "survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services." The National Science Foundation (NSF) has an ongoing need to collect information from its customer community (primarily individuals and organizations engaged in science and engineering research and education) about the quality and kind of services it provides and use that information to help improve agency operations and services.

*Estimate of Burden:* The burden on the public will change according to the needs of each individual customer satisfaction survey; however, each survey is estimated to take approximately 30 minutes per response.

*Respondents:* Will vary among individuals or households; business or other for-profit; not-for-profit institutions; farms; Federal Government; State, local or tribal governments.

*Estimated Number of Responses per Survey:* This will vary by survey.

*Comments:* Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

## PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

### Northwest Power and Conservation Planning Council Subbasin Plan Draft Amendments

**AGENCY:** Pacific Northwest Electric Power and Conservation Planning Council (Northwest Power and Conservation Council; Council).

**ACTION:** Notice of availability and opportunity to comment on subbasin plan draft amendments to the Council's Columbia River Basin Fish and Wildlife Program (program).

**SUMMARY:** Following the mandate set out in the Pacific Northwest Electric Power Planning and Conservation Act of 1980 (16 U.S.C. 839 *et seq.*) (the Act), in November 1982 the Council adopted a regional program, the Columbia River Basin Fish and Wildlife Program. The Act requires the program be designed to protect, mitigate and enhance fish and wildlife of the Columbia River Basin affected by hydropower dams, while also assuring the region of an adequate, efficient, economical and reliable power supply.

**SUPPLEMENTARY INFORMATION:** In 2000, the Council began a comprehensive revision of the program. First, the Council amended the program by adopting a framework of vision, objectives and strategies at different geographic scales (basinwide, ecological province, subbasin), tied together with a consistent scientific foundation. The Council also adopted basinwide provisions and described how it proposed to add more specific objectives and measures to the program through integrated subbasin plans for the tributary subbasins of the Columbia and for specific mainstem reaches. The draft amendments now proposed for adoption will add subbasin plans to the general, basinwide provisions of the program as the next step in the comprehensive revision.

On August 12, 2002, the Council solicited recommendations for amendments to the program at the subbasin level from the region's state and federal fish and wildlife agencies, Indian tribes, and others, as required by the Act. At the same time, the Council worked with a broad range of interests in the region and developed a "Technical Guide for Subbasin Planners" to help ensure that plans had a consistent format and content. The Council also worked with the Bonneville Power Administration to secure funding support for planning groups, the first time that funding has

been made available to help develop fish and wildlife program amendment recommendations. Subbasin planners were asked to develop subbasin plans that incorporate a technical assessment, an inventory of past and present activities, and a management plan consisting of a vision, biological objectives and implementation strategies for the subbasin.

On May 28, 2004, the Council received 59 recommendations for subbasin plans in 58 subbasins from various planning entities. The Council made those recommendations available for public review and comment, including review by a team of independent scientists. The public comment period on the recommendations ended on August 12, 2004. The Council received an extensive set of comments. The Council staff and Council also reviewed the plans during the comment period for consistency with standards in the Act for program amendments and with the provisions in the 2000 Program.

After its review of the recommendations and the comments on recommendations, the Council divided the recommended subbasin plans into three groups for consideration as amendments to the Council's fish and wildlife program. From October to December 2004, the Council engaged in public review of the first set of draft subbasin plans, deciding in December 2004 to adopt plan for 23 subbasin plans into the program.

At same time, as its December 2004 meeting the Council decided to release a second set of 29 subbasin plan recommendations for public review as draft amendments to the program. The Council proposes to adopt the management plan portions of these subbasin plans as parts of the program. The underlying technical assessments and inventories will be placed in an appendix to the program. The Columbia subbasins for which draft subbasin plans are now proposed for adoption into the program are: Boise, Burnt, Clearwater, Columbia Estuary, Cowlitz, Deschutes Elochoman, Entiat, Grays, Imnaha, Kalama, Klickitat, Lewis, Little White Salmon, Lower Columbia, Lower Mid-Columbia, Lower Mid-Snake, Methow, Okanogan, Payette, Powder, Snake Hells Canyon, Upper Mid-Snake, Walla Walla, Washougal, Weiser, Wenatchee, Wind, Yakima.

### Public Comments and Hearings

The Council has scheduled public hearings in the following locations to accept oral and written comments on the 29 draft subbasin plan program amendments:
