Federal Register

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.archives.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** *www.gpoaccess.gov/nara,* available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via e-mail at *gpoaccess@gpo.gov.* The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 70 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington DC 20402, along with the entire mailing label from the last issue received.

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. 04–130–1]

Asian Longhorned Beetle; Addition to Quarantined Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: We are amending the Asian longhorned beetle regulations by adding portions of Middlesex and Union Counties, NJ, to the list of quarantined areas and restricting the interstate movement of regulated articles from those areas. This action is necessary to prevent the artificial spread of the Asian longhorned beetle into noninfested areas of the United States.

DATES: This interim rule was effective January 24, 2005. We will consider all comments that we receive on or before March 29, 2005.

ADDRESSES: You may submit comments by any of the following methods:

- *EDOCKET:* Go to *http://www.epa.gov/feddocket* to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once you have entered EDOCKET, click on the ''View Open APHIS Dockets'' link to locate this document.
- *Postal Mail/Commercial Delivery:* Please send four copies of your comment (an original and three copies) to Docket No. 04–130–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 04–130–1.
- *E-mail:* Address your comment to *regulations@aphis.usda.gov.* Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and ''Docket No. 04–130–1'' on the subject line.
- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the instructions for locating this docket and submitting comments.

Reading Room: You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

Other Information: You may view APHIS documents published in the **Federal Register** and related information, including the names of groups and individuals who have commented on APHIS dockets, on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html.*

FOR FURTHER INFORMATION CONTACT: Mr. Michael B. Stefan, Director of Emergency Programs, Pest Detection and Management Programs, PPQ, APHIS, 4700 River Road Unit 134, Riverdale, MD 20737–1236; (301) 734–7338.

SUPPLEMENTARY INFORMATION:

Background

The Asian longhorned beetle (ALB, *Anoplophora glabripennis*), an insect native to China, Japan, Korea, and the Isle of Hainan, is a destructive pest of hardwood trees. It attacks many healthy hardwood trees, including maple, horse chestnut, birch, poplar, willow, and elm. In addition, nursery stock, logs, green lumber, firewood, stumps, roots, branches, and wood debris of half an inch or more in diameter are subject to infestation. The beetle bores into the heartwood of a host tree, eventually killing the tree. Immature beetles bore into tree trunks and branches, causing heavy sap flow from wounds and sawdust accumulation at tree bases. They feed on, and over-winter in, the interiors of trees. Adult beetles emerge in the spring and summer months from round holes approximately three-eighths of an inch in diameter (about the size of a dime) that they bore through branches and trunks of trees. After emerging, adult beetles feed for 2 to 3 days and then mate. Adult females then lay eggs in oviposition sites that they make on the branches of trees.

A new generation of ALB is produced each year. If this pest moves into the hardwood forests of the United States, the nursery, maple syrup, and forest product industries could experience severe economic losses. In addition, urban and forest ALB infestations will result in environmental damage, aesthetic deterioration, and a reduction in public enjoyment of recreational spaces.

Addition to Quarantined Area

The ALB regulations in 7 CFR 301.51–1 through 301.51–9 (referred to below as the regulations) restrict the interstate movement of regulated articles from quarantined areas to prevent the artificial spread of ALB to noninfested areas of the United States. Portions of the State of Illinois, a portion of Hudson County in the State of New Jersey, and portions of New York City and Nassau and Suffolk Counties in the State of New York are already designated as quarantined areas.

On August 4, 2004, an ALB infestation was discovered in the Borough of Carteret in Middlesex County, NJ. Another ALB infestation was discovered in the City of Rahway, in Union County, NJ, on August 17, 2004. An additional ALB infestation was discovered in this area in late November 2004. Officials of the U.S. Department of Agriculture and officials of State, county, and city agencies in New Jersey are conducting intensive survey and eradication programs in the infested area, which includes sections of the City of Rahway and adjacent sections of the City of Linden in Union County and the Township of Woodbridge in Middlesex County. The State of New Jersey has quarantined the infested area and is restricting the intrastate movement of regulated articles from the quarantined area to prevent the further spread of ALB within that State. Federal regulations are necessary to restrict the interstate movement of regulated articles from the quarantined area to prevent the interstate spread of ALB.

The regulations in § 301.51–3(a) provide that the Administrator of the

Animal and Plant Health Inspection Service (APHIS) will list as a quarantined area each State, or each portion of a State, where ALB has been found by an inspector, where the Administrator has reason to believe that ALB is present, or where the Administrator considers regulation necessary because of its inseparability for quarantine purposes from localities where ALB has been found.

Less than an entire State will be quarantined only if (1) the Administrator determines that the State has adopted and is enforcing restrictions on the intrastate movement of regulated articles that are equivalent to those imposed by the regulations on the interstate movement of regulated articles and (2) the designation of less than an entire State as a quarantined area will be adequate to prevent the artificial spread of ALB.

In accordance with these criteria and the recent ALB findings described above, we are amending the list of quarantined areas in § 301.51–3(c) to include additional areas in Middlesex and Union Counties, NJ. The quarantined area is described in the rule portion of this document.

Emergency Action

This rulemaking is necessary on an emergency basis to help prevent the artificial spread of ALB to noninfested areas of the United States. Under these circumstances, the Administrator has determined that prior notice and opportunity for public comment are contrary to the public interest and that there is good cause under 5 U.S.C. 553 for making this rule effective less than 30 days after publication in the **Federal Register**.

We will consider comments we receive during the comment period for this interim rule (*see* **DATES** above). After the comment period closes, we will publish another document in the **Federal Register**. The document will include a discussion of any comments we receive and any amendments we are making to the rule.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review under Executive Order 12866.

We are amending the regulations by adding portions of Middlesex and Union Counties, NJ, to the list of areas regulated for ALB and restricting the interstate movement of regulated articles from those areas. This action is necessary to prevent the artificial spread of ALB into noninfested areas of the United States.

The Regulatory Flexibility Act (RFA) requires that agencies consider the economic impact of their rules on small entities, *i.e.,* small businesses, organizations, and governmental jurisdictions. This interim rule modifies the area in New Jersey that is regulated for ALB by adding an area that encompasses parts of Middlesex and Union Counties. The businesses potentially affected by modifications to the ALB quarantined area are nurseries, arborists, tree removal services, firewood dealers, garden centers, landscapers, recyclers of waste material, and lumber and building material outlets.

The newly quarantined area covers 12.1 square miles. Within that 12.1 square mile area, there are 10 firewood dealers, 50 landscapers and tree care companies, 3 private waste management companies, 3 developers/excavators, 1 wood recycler, and 1 garden center. While the size of those businesses is unknown, it is reasonable to assume that most would be classified as small entities, based on the U.S. Small Business Administration's size standards. There are also six governmental entities—two counties and four townships—within the 12.1 square mile area. Under the RFA, the term ''small governmental jurisdiction'' generally means cities, counties, townships, etc., with a population of less than 50,000. It is possible that some or all of the six governmental entities would qualify as small governmental jurisdictions.

Entities, large or small, could be affected by the regulations in two ways. First, if an entity wishes to move regulated articles interstate from a quarantined area, that entity must either: (1) Enter into a compliance agreement with APHIS for the inspection and certification of regulated articles to be moved interstate from the quarantined area; or (2) present its regulated articles for inspection by an inspector and obtain a certificate or a limited permit, issued by the inspector, for the interstate movement of regulated articles. The inspections may be inconvenient, but they should not be costly in most cases, even for entities operating under a compliance agreement that would perform the inspections themselves. For those entities that elect not to enter into a compliance agreement, APHIS would provide the services of the inspector without cost. There is also no cost for the compliance agreement, certificate, or limited permit for the interstate movement of regulated articles.

Second, there is a possibility that, upon inspection, a regulated article could be determined by the inspector to be potentially infested by ALB and, as a result, the inspector would not be able to issue a certificate. In this case, the entity's ability to move regulated articles interstate would be restricted. However, the affected entity could conceivably obtain a limited permit under the conditions of § 301.51–5(b). Whether an affected entity would be denied certificates as a result of inspections of regulated articles is unknown. However, because the newly regulated area is primarily urban, the entities located in that area are more likely to be receiving regulated articles from outside the quarantined area than they are to be shipping regulated articles interstate to nonquarantined areas. It is unlikely, therefore, that most entities located in the newly regulated area would be moving regulated articles that would require inspection in the first place.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (*See* 7 CFR part 3015, subpart V.)

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

■ Accordingly, we are amending 7 CFR part 301 as follows:

PART 301—DOMESTIC QUARANTINE NOTICES

■ 1. The authority citation for part 301 continues to read as follows:

Authority: 7 U.S.C. 7701–7772; 7 CFR 2.22, 2.80, and 371.3.

Section 301.75–15 also issued under Sec. 204, Title II, Pub. L. 106–113, 113 Stat. 1501A–293; sections 301.75–15 and 301.75–16 also issued under Sec. 203, Title II, Pub. L. 106–224, 114 Stat. 400 (7 U.S.C. 1421 note).

■ 2. In § 301.51–3, paragraph (c) is amended by adding, in alphabetical order under the heading New Jersey, an entry for Middlesex and Union Counties to read as follows:

§ 301.51–3 Quarantined areas.

* * * * *

(c) * * *

New Jersey

* * * * *

Middlesex and Union Counties. That portion of the counties bounded by a line drawn as follows: Beginning at the intersection of St. Georges Avenue and Stiles Street; then east along Stiles Street to Elizabeth Avenue; then north on Elizabeth Avenue to Wood Avenue; then east on Wood Avenue to the east side of the New Jersey Turnpike right-of-way; then south along the east side of the New Jersey Turnpike right-of-way to Marshes Creek; then southeast along Marshes Creek to the Rahway River; then west along the south side of the Rahway River to Cross Creek; then south along Cross Creek through the wetlands to Peter J. Sica Industrial Drive; then east and south on Peter J. Sica Industrial Drive to Roosevelt Avenue (State Route 602); then west on Roosevelt Avenue to Port Reading Avenue (State Route 604); then west southwest on Port Reading Avenue to the Conrail railroad; then north and west along the Conrail railroad right-of-way to the NJ Transit railroad right-of-way; then north and northwest along the NJ Transit railroad right-of-way to the south branch of the Rahway River; then west along the south branch of the Rahway River to St. Georges Avenue; then north on St. Georges Avenue to the point of beginning.

BILLING CODE 3410–34–P

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 708a

Conversion of Insured Credit Unions to Mutual Savings Banks

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: NCUA is updating its rule regarding conversion of insured credit unions to mutual savings banks (MSBs). The amendments require a converting credit union to provide its members with additional disclosures about the conversion before conducting a member vote. The amendments also require the vote to be by secret ballot and conducted by an independent entity. Finally, the amendments require a federally-insured State credit union to provide NCUA with conversion related information about the law of the State where the credit union is chartered.

DATES: This final rule is effective January 28, 2005.

FOR FURTHER INFORMATION CONTACT: Frank S. Kressman, Staff Attorney, at (703) 518–6540.

SUPPLEMENTARY INFORMATION:

A. Background

The Credit Union Membership Access Act (CUMAA) was enacted into law on August 7, 1998. Public Law 105–21. Section 202 of CUMAA amended the provisions of the Federal Credit Union Act concerning conversion of insured credit unions to MSBs. 12 U.S.C. 1785(b). CUMAA required NCUA to promulgate final rules regarding charter conversions that were: (1) Consistent with CUMAA; (2) consistent with the charter conversion rules promulgated by other financial regulators; and (3) no more or less restrictive than rules applicable to charter conversions of other financial institutions. NCUA issued rules in compliance with this mandate. 63 FR 65532 (November 27, 1998); 64 FR 28733 (May 27, 1999).

Since the enactment of CUMAA, NCUA has become concerned that many credit union members do not appreciate the effect a conversion may have on their ownership interests in the credit union and voting power in the MSB. In February 2004, NCUA amended part 708a to require a converting credit union to disclose additional information to its members to better educate them regarding the conversion. 69 FR 8548 (February 25, 2004). NCUA solicited public comment as part of that rulemaking. Some commenters suggested that, among other things, NCUA should have imposed more disclosures and requirements on converting credit unions. Many offered specific suggestions. NCUA noted at that time that many of those suggestions deserved further consideration but were beyond the scope of that rulemaking and would have to be considered in a future rulemaking. In July 2004, NCUA issued a proposed rule with request for comments to address some of those suggestions and other ongoing concerns NCUA has in connection with protecting members' interests in the conversion process. 69 FR 46111 (August 2, 2004).

B. Discussion

CUMAA provides that an insured credit union may convert to an MSB without the prior approval of NCUA, but it also requires NCUA to administer the member vote on conversion and review the methods and procedures by which the vote is taken. This is reflected in NCUA's conversion rule. The rule requires a converting credit union to provide its members with written notice of its intent to convert. 12 CFR 708a.4. It also specifies that the member notice must adequately describe the purpose and subject matter of the vote on conversion. *Id.* In addition, a converting credit union must notify NCUA of its intent to convert. 12 CFR 708a.5. The credit union must provide NCUA a copy of its member notice, ballot, and all other written materials it has provided or intends to provide to its members in connection with the conversion. *Id.*

A converting credit union has the option of submitting these materials to NCUA before it distributes them to its members. *Id.* This enables the credit union to obtain NCUA's preliminary determination on the methods and procedures of the member vote based on NCUA's review of the written materials. NCUA believes its review of these materials is a practical and unintrusive way of fulfilling, at least part of, its congressionally mandated responsibility to review the methods and procedures of the vote.

If NCUA disapproves of the methods and procedures of the member vote after the vote is conducted, then NCUA is authorized to direct a new vote be taken. 12 CFR 708a.7. NCUA interprets its responsibility to review the methods and procedures of the member vote to include determining that the member notice and other materials sent to the members are accurate and not misleading, all required notices are timely, and the membership vote is conducted in a fair and legal manner.

A charter conversion has consequences that may not surface for a

number of years and are often not apparent at the time of conversion to even the most astute members. As a result, members cannot make an informed decision about how the conversion will affect them unless their credit union provides them with this information.

NCUA is aware that credit unions are not providing some important conversion related information effectively to their members. This limits members' ability to make informed decisions about a conversion. NCUA also has become aware that many credit unions may not be equipped to conduct a proper member vote on conversion. Accordingly, NCUA is amending the conversion rule to require a converting credit union to provide additional disclosures to its members. Also, NCUA is providing guidelines to help converting credit unions better understand how they can satisfy the regulatory standard that the member vote be conducted in a fair and legal manner. In addition to the guidelines, NCUA is amending the rule to require the vote be conducted using secret ballots and an independent teller to ensure the integrity of the voting process and the privacy of each member's vote. Finally, NCUA is amending the conversion rule to require a federally-insured State credit union to provide NCUA with information about how the law of the State under which it is chartered relates to NCUA's conversion rule so that NCUA's review of the methods and procedures of the vote includes ensuring compliance with applicable State law.

C. Disclosures

A converting credit union can provide information to its members regarding any aspect of the conversion in any format it wishes, provided all communications are accurate and not misleading. NCUA only requires certain, minimal information be provided in the notice to members. Most converting credit unions choose to provide a great deal more information and, while NCUA recognizes this is a way to educate members, NCUA is concerned that members may be overwhelmed by the great volume of information. NCUA does not, however, wish to dissuade converting credit unions from communicating with their members or limit those communications.

To balance these competing interests, NCUA will continue to allow a converting credit union to communicate with its members as it sees fit, but will require that members receive a short, simple disclosure prepared by NCUA. This disclosure addresses: (1) Ownership and control of the credit union; (2) operating expenses and their effect on rates and services; (3) the effect of a subsequent conversion to a stock institution; and (4) the costs of conversion. NCUA believes members need to be particularly aware of these topics. NCUA recognizes these topics might be discussed elsewhere in a credit union's communications with its members, but NCUA is concerned that this information may get buried in the great volume of information being provided. Accordingly, a converting credit union must include this disclosure in a prominent place with each written communication it sends to its members regarding the conversion and must take specific steps to ensure that the disclosure is conspicuous to the member. To promote flexibility, a converting credit union may modify the disclosure with the prior consent of the Regional Director and, in the case of a State credit union, the appropriate State supervisory authority (SSA).

Officials of many converting credit unions indicate in their conversion materials that they are unable to raise capital quickly enough to operate their credit unions as they see fit, which often includes a desire to pursue rapid growth. These credit unions encourage their members to support the conversion to an MSB as a way to overcome this capital restraint. They do not, however, inform their members that the conversion process can be expensive and further deplete a credit union's capital. NCUA believes members deserve to know how much of their money will be spent on the conversion effort. Accordingly, NCUA is amending the conversion rule to require converting credit unions to disclose the costs of conversion as part of the above disclosure requirements. An accurate cost estimate must take into account conversion related expenses including printing fees, postage fees, advertising, consulting and professional fees, legal fees, staff time, the cost of holding a special meeting, conducting the vote, and other related expenses.

D. Guidelines for Conducting a Member Vote

A converting credit union must conduct its member vote on conversion in a fair and legal manner. A vote that does not satisfy this standard denies members their democratic right to decide the fate of their credit union and could result in a charter change without the true support of the members. The final rule includes guidelines to avoid these kinds of undesirable results. The guidelines address topics such as: (1) Understanding the relationship between Federal and State law; (2) determining voter eligibility; (3) holding a special meeting.

NCUA does not purport these guidelines are an exhaustive checklist that guarantees a fair and legal vote. Rather, the guidelines are suggestions that provide a framework that, if followed, will help a credit union fulfill its regulatory obligations. A converting credit union should use these guidelines in conjunction with its own independent analysis and planning to tailor the member vote to its particular circumstances.

E. Relationship Between State and Federal Law

Although NCUA's conversion rule applies to all conversions of federally-insured credit unions, federally-insured state credit unions may also be subject to State law on conversions. As stated in previous rulemakings, NCUA's position is that a State legislature or SSA may impose conversion requirements more stringent or restrictive than NCUA's. This position is included in the final rule. In fact, NCUA understands over half the States do not specifically permit conversions of credit unions to MSBs. Reflecting NCUA's support of the dual chartering system, NCUA will defer to a State regulator when appropriate on questions involving interpretation of State law.

When State law applies to a conversion, it can change the procedural and substantive requirements a converting credit union must satisfy. NCUA needs to understand how State law affects those requirements to fulfill its responsibility to review the methods and procedures of the member vote. Accordingly, NCUA requires a federally-insured state credit union to notify NCUA if the State law under which it is chartered permits it to convert to an MSB. The credit union also must inform NCUA if it relies for its authority to convert on a State law parity provision, a provision permitting a state credit union to operate with the same or similar authority as a federal credit union (FCU), and if its State regulatory authority agrees that it may rely on the parity provision for that purpose. Finally, if a federally-insured state credit union relies on a state parity provision for authority to convert, it is required to indicate its State regulatory authority's position as to whether Federal law or State law will control internal governance issues in the conversion such as the requisite membership vote for conversion and the determination of a member's eligibility to vote.

F. Secret Ballots and Third Party Tellers

NCUA understands that members, including those that are employees of the credit union, may be uncomfortable with a voting process that does not protect the privacy of their votes. NCUA is concerned this may lead some members to choose not to vote or to vote in a manner inconsistent with their true wishes. Accordingly, the final rule protects members' privacy by requiring a converting credit union to use a secret ballot and an independent entity to conduct the vote. NCUA requires that a converting credit union use a third party teller to conduct the vote meaning that a third party teller will be responsible for sending ballots, receiving and safe keeping ballots, verifying ballots, and tabulating the vote. Use of a third party teller enhances the integrity of the voting process and provides confidence that members, including employees, will have their votes remain confidential.

G. Written Materials

Since CUMAA, the conversion rule has required a converting credit union to provide NCUA with copies of all written materials it sends or intends to send to its members in connection with the conversion proposal. NCUA is not changing that requirement but is clarifying that it applies to all written materials, including electronic communications posted on Web sites.

H. Summary of Comments

NCUA received 42 comments regarding the proposed rule. Thirty commenters supported the proposal. One so strongly that it stated it was ''criminal'' for credit unions to convert and strip out of the credit union the reserves accumulated over time by many members and put them ''into the pockets of a very few individuals.'' All of the nine commenters who are members of a credit union whose recent conversion campaign failed supported the proposal and many of them indicated that, if the terms of the proposal were in place when their credit union was considering converting, they would have been better informed or the process would have been fairer to members.

Many of the proposal's supporters offered suggestions to improve the rule. For example, ten commenters offered various suggestions to revise the proposed disclosures. Six commenters suggested there should be more required disclosures beyond those proposed.

One of those commenters suggested that paid consultants and service providers be identified to the members and be required to disclose if they have opened an account at the credit union as a result of their involvement in the conversion. One of the conversion consultants stated that, if the costs of the conversion are to be disclosed, then the credit union should identify the name of the recipients of expenditures. NCUA believes the portion of the proposal that requires a converting credit union to disclose an itemized estimate of the costs of the conversion to its members helps to provide members with necessary information to understand and cast an informed vote on the conversion. NCUA also believes the suggestion that NCUA require a converting credit union to identify by name the recipients of expenditures as part of a detailed itemization of costs is worthy of further consideration. That requirement, however, as well as disclosure of the accountholder status of paid consultants and service providers, are beyond the scope of the proposal and are not adopted in this final rule.

One commenter suggested NCUA provide more voting guidelines than proposed. Another asked NCUA to clarify ''the extent to which the guidelines would be enforced.'' NCUA reiterates the voting guidelines are not regulatory requirements subject to enforcement. Rather, they are suggestions intended to help converting credit unions fulfill their regulatory obligation of conducting its member vote in a fair and legal manner.

Nine commenters stated that the proposed disclosure, which states ''Credit union directors and committee members serve on a volunteer basis,'' is not completely accurate because a number of States allow credit unions to compensate their board members while others are silent on the issue. NCUA is amending the disclosure to reflect these comments.

Seven commenters stated a converting credit union should not be legally required to use Robert's Rules of Order to conduct its special meeting on conversion or suggested there be flexibility to use other parliamentary procedures. One of these commenters also suggested NCUA require a converting credit union to hire an independent parliamentarian to run the meeting. Another commenter did not mention Robert's Rules of Order, but recommended the use of a certified parliamentarian. NCUA discusses the use of Robert's Rules of Order in the voting guidelines section of the proposal. As noted above, the guidelines are not regulatory requirements, and, therefore, a converting credit union is not legally required to follow them including using Robert's Rules of Order in conducting its special meeting relating to the member vote. NCUA recommends, however, that a converting credit union use appropriate parliamentary procedures to conduct its vote, and should enlist the services of an individual knowledgeable and skilled in those procedures. NCUA is revising the voting guidelines to clarify that Robert's Rules of Order are not the only parliamentary procedures a credit union should consider using for its member vote.

Twelve commenters, including the conversion consultants, banking trade organizations, and a bank that was formerly an FCU that had converted to an MSB and subsequently converted to a stock bank, opposed the proposal in general, stating it is inconsistent with CUMAA or obstructs credit unions' right to convert. NCUA fully supports a credit union's right to convert its charter but notes this right belongs to the members of the credit union. Members can only exercise that right in a meaningful way if their credit union provides them with information that is accurate and not misleading. NCUA is aware of the limitations CUMAA places on its authority to approve a conversion but is mindful of its responsibility to oversee the methods and procedures applicable to the member vote on conversion and protect the interests of credit union members.

Some of the commenters who opposed the proposal:

- Believe the disclosure regarding voting rights is inaccurate because an MSB could choose a ''one vote per member'' policy instead of allotting votes based on account balances,
- Highlighted that an MSB to stock conversion requires a number of steps scrutinized by other regulators and stated the disclosure regarding subsequent conversion to a stock institution is misleading and intended to discourage credit union members from voting for the conversion to an MSB,
- Believe NCUA acknowledges the proposal is intended to discourage conversions because NCUA reduced the estimated number of conversions per year in a Paperwork Reduction Act (PRA) filing associated with the proposed rulemaking, and
- Suggested the proposed requirement on state credit unions to provide NCUA with information about State laws affecting the conversion is burdensome or indicated NCUA does not have confidence in SSAs to perform their functions.

The fact that MSBs could choose a ''one vote per member'' policy instead

of allotting votes based on account balances is not what MSBs, in fact, usually choose to do. The disclosure regarding voting rights states that, in an MSB, account holders with larger balances ''usually'' have more votes and, thus, greater control. NCUA believes this is an accurate statement. Also, NCUA recognizes that additional steps and member votes are required to approve an MSB to stock institution conversion. This does not lessen NCUA's concern about protecting credit union members' interest in their credit union. Those additional steps and member votes, although possibly scrutinized by other regulators, occur only after the credit union has converted to an MSB and is on its way to converting to the stock form of ownership. Obviously, at that point, the credit union does not exist and the additional requirements can do nothing to enable a credit union member to make an informed decision on the initial conversion from a credit union to an MSB.

The disclosure regarding subsequent conversion to a stock institution is not misleading and not intended to discourage credit union members from voting for the conversion to an MSB. It states that, in a typical conversion to the stock form of ownership, the executives of the institution profit by obtaining stock far in excess of that available to the institution's members. This accurately reflects an executive's ability to obtain stock options, restricted stock or other forms of stock related compensation not available to members not employed by the credit union.

In the normal course of the rulemaking process, NCUA submitted a required PRA filing. In that filing, NCUA reduced the estimated number of conversions per year from a previous submission based on its experience with conversions over the past several years. NCUA would have made the same reduction in the PRA filing based on historical data even if this rule were not being considered.

The requirement on state credit unions to provide NCUA with information about State laws affecting the conversion is not burdensome and does not indicate any lack of confidence in SSAs to perform their functions. NCUA fully acknowledges that a State legislature or SSA may impose conversion requirements more stringent or restrictive than NCUA's. As noted above, when State law applies to a conversion, it can change drastically the procedural and substantive requirements a converting credit union must satisfy. It is essential for a converting credit union to understand both Federal and State requirements for compliance purposes and for NCUA to do the same to fulfill its responsibility to review the methods and procedures of the member vote as affected by State law. NCUA does not believe it is burdensome for a converting credit union to inform NCUA of State law that the credit union must obtain in any event to assure compliance with all applicable laws. NCUA works closely and cooperatively with SSAs in processing conversions and defers to SSAs in making determinations regarding State law. NCUA believes the subject requirement helps to promote cooperation among the regulators and a more informed converting credit union.

Three commenters disagreed with NCUA's statement that no conversion vote can be fair and legal if some members are improperly excluded. These commenters stated there is no statutory requirement for perfection and that a certain percentage of member exclusions should be tolerated if not the result of wrongful intent on the part of the converting credit union. Since CUMAA, NCUA has disapproved a converting credit union's methods and procedures applicable to the member vote on only one occasion. In that situation, voter disenfranchisement was widespread. NCUA will continue to take a pragmatic approach in reviewing member votes on conversion.

One commenter suggested a converting credit union should be required to prepare a comprehensive three-year business plan for the converted institution similar to the plan required by 12 CFR part 563b for MSBs proposing to convert to stock form. This commenter also stated the plan should be required to be sent to the credit union's members with the notice of intent to convert or the notice should explain how a member can obtain a free copy of the plan. This suggestion is beyond the scope of the proposal, but NCUA will consider it for future inclusion in the conversion rule.

Finally, commenters to previous amendments to the conversion rule have recommended NCUA require converting credit unions to provide members a meaningful way to share their opinions on the conversion and to disclose the views and concerns of the credit union's directors and officers who oppose the conversion. Four commenters to this rulemaking suggested there should be some mechanism in place for members to share their opinions on the conversion with each other and the credit union during the process. NCUA will continue to consider if this is practical and valuable and if it could be accomplished with minimal regulatory burden.

I. Effective Date of Final Rule

Generally, a final rule promulgated by NCUA is effective 30 days following its publication in the **Federal Register**. This final rule, however, is effective immediately upon publication because there is a strong public interest in having this consumer protection rule in place. First, this is necessary to ensure crucial disclosure information is provided to credit union members whose credit union has initiated or is about to initiate the conversion process, so the members may cast an informed and educated vote on the future existence of their credit union and their stake in it. Second, this will provide regulatory certainty to credit unions that are considering converting or beginning the conversion process within the next thirty days and enable them to better understand the regulatory requirements they must follow throughout the entirety of the process.

A converting credit union is required by statute and regulation to provide notice of its intent to convert to its members 90 days, 60 days, and 30 days before the member vote on conversion. 12 U.S.C. 205(b)(2)(C); 12 CFR 708a.4(b). It would be confusing for a converting credit union and its members if this rule became effective during that 90-day period as that would alter the regulatory requirements of the conversion in mid-process. That confusion about which regulatory requirements must be followed at a given point in the conversion process is eliminated for any recently initiated, soon to be initiated, and future conversions by making this rule immediately effective. Accordingly, for good cause, NCUA finds that, pursuant to 5 U.S.C. 553(d)(3), it would be impracticable and contrary to the public interest to delay the effective date of this rule for 30 days following publication. Therefore, this rule is effective immediately upon publication.

Regulatory Procedures

Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis to describe any significant economic impact a rule may have on a substantial number of small credit unions, defined as those under ten million dollars in assets. This final rule amends the procedures an insured credit union must follow to convert to an MSB. Slightly over twenty credit unions have converted since 1995. NCUA anticipates no more than five credit unions per year will convert in the future and it is

unlikely that any will have less than ten million dollars in assets. Accordingly, the amendments would not have a significant economic impact on a substantial number of small credit unions, and, therefore, a regulatory flexibility analysis is not required.

Paperwork Reduction Act

Part 708a contains information collection requirements. As required by the PRA, 44 U.S.C. 3507(d), NCUA previously submitted a copy of this regulation in proposed form as part of an information collection package to the Office of Management and Budget (OMB) for its review and approval of a revision to Collection of Information, Conversion of Insured Credit Unions to Mutual Savings Banks, Control Number 3133–0153.

NCUA estimated the average annual burden per converting credit union to be between 20 and 23 hours and that no more than five credit unions will convert per year. As a result, NCUA estimated the total annual collection burden to be no more than 115 hours. NCUA did not receive any comments addressing the accuracy or methodology for computing the burden. OMB approved the revision.

Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their actions on State and local interests. In adherence to fundamental federalism principles, NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies with the executive order. The final rule would not have substantial direct effects on the States, on the connection between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. NCUA has determined that this final rule does not constitute a policy that has federalism implications for purposes of the executive order.

The Treasury and General Government Appropriations Act, 1999—Assessment of Federal Regulations and Policies on Families

The NCUA has determined that this final rule would not affect family well-being within the meaning of section 654 of the Treasury and General Government Appropriations Act, 1999, Public Law 105–277, 112 Stat. 2681 (1998).

Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121) provides generally for congressional review of agency rules. A reporting requirement is triggered in instances where NCUA issues a final rule as defined by section 551 of the Administrative Procedure Act. 5 U.S.C. 551. The Office of Management and Budget has determined that this rule is not a major rule for purposes of the Small Business Regulatory Enforcement Fairness Act of 1996.

List of Subjects in 12 CFR Part 708a

Charter conversions, Credit unions.

By the National Credit Union Administration Board on January 13, 2005.

Mary F. Rupp,

Secretary of the Board.

■ For the reasons stated above, NCUA amends 12 CFR part 708a as follows:

PART 708a—CONVERSION OF INSURED CREDIT UNIONS TO MUTUAL SAVINGS BANKS

■ 1. The authority citation for part 708a continues to read as follows:

Authority: 12 U.S.C. 1766, 12 U.S.C. 1785(b).

■ 2. Section 708a.4 is amended by adding three sentences at the end of paragraph (a) and adding paragraph (e) to read as follows:

§ 708a.4 Voting procedures.

(a) * * * The vote on the conversion proposal must be by secret ballot and conducted by an independent entity. The independent entity must be a company with experience in conducting corporate elections. No official or senior manager of the credit union, or the immediate family members of any official or senior manager, may have any ownership interest in, or be employed by, the entity.

* * * * *

(e) A converting credit union must include the following disclosures with each written communication it sends to its members regarding the conversion. The disclosures must be offset from the other text by use of a border and at least one font size larger than any other text (exclusive of headings) used in the communication. Certain portions of the disclosures must be capitalized and bolded. A converting credit union may modify the disclosure with the prior consent of the Regional Director and, in the case of a state credit union, the appropriate state regulatory agency. The unmodified form of disclosure reads as follows:

The National Credit Union Administration, the federal government agency that supervises credit unions, requires [insert name of credit union] to provide the following disclosures.

1. **OWNERSHIP AND CONTROL.** In a credit union, every member has an equal vote in the election of directors and other matters concerning ownership and control. In a mutual savings bank, **ACCOUNT HOLDERS WITH LARGER BALANCES USUALLY HAVE MORE VOTES AND, THUS, GREATER CONTROL.**
2. **EXPENSES AND THEIR EFFECT ON RATES AND SERVICES.** Most credit union directors and committee members serve on a volunteer basis. Directors of a mutual savings bank are compensated. Credit unions are exempt from federal tax and most state taxes. Mutual savings banks pay taxes, including federal income tax. If [insert name of credit union] converts to a mutual savings bank, these **ADDITIONAL EXPENSES MAY CONTRIBUTE TO LOWER SAVINGS RATES, HIGHER LOAN RATES, OR ADDITIONAL FEES FOR SERVICES.**
3. **SUBSEQUENT CONVERSION TO STOCK INSTITUTION.** Conversion to a mutual savings bank is often the first step in a two-step process to convert to a stock-issuing bank or holding company. In a typical conversion to the stock form of ownership, the **EXECUTIVES OF THE INSTITUTION PROFIT BY OBTAINING STOCK FAR IN EXCESS OF THAT AVAILABLE TO THE INSTITUTION'S MEMBERS.**
4. **COSTS OF CONVERSION.** The costs of converting a credit union to a mutual savings bank are paid from the credit union's current and accumulated earnings. Because accumulated earnings are capital and represent members' ownership interests in a credit union, the conversion costs reduce members' ownership interests. As of [insert date], [insert name of credit union] estimates **THE CONVERSION WILL COST [INSERT DOLLAR AMOUNT] IN TOTAL.** That total amount is further broken down as follows: [itemize the costs of all expenses related to the conversion including printing fees, postage fees, advertising, consulting and professional fees, legal fees, staff time, the cost of holding a special meeting, conducting the vote, and any other expenses incurred].

■ 3. Section 708a.5 is amended by redesignating paragraph (b) as paragraph (b)(1), adding a sentence at the end of paragraph (b)(1), and adding paragraph (b)(2) to read as follows:

§ 708a.5 Notice to NCUA.

* * * * *

(b)(1) * * * The term ''written materials'' includes written documentation or information of any sort, including electronic communications posted on a Web site.

(b)(2) A federally-insured State chartered credit union must include in its notice to NCUA a statement as to whether the State law under which it is chartered permits it to convert to a mutual savings bank and include a legal citation to the State law providing this authority. A federally-insured State chartered credit union will remain subject to any State law requirements for conversion that are more stringent than those this chapter imposes, including any internal governance requirements, such as the requisite membership vote for conversion and the determination of a member's eligibility to vote. If a federally-insured State chartered credit union relies for its authority to convert to a mutual savings bank on a State law parity provision, meaning a provision in State law permitting a State chartered credit union to operate with the same or similar authority as a federal credit union, it must include in its notice a statement that its State regulatory authority agrees that it may rely on the State law parity provision as authority to convert. If a federally-insured state chartered credit union relies on a State law parity provision for authority to convert, it must indicate its State regulatory authority's position as to whether Federal law and regulations or State law will control internal governance issues in the conversion such as the requisite membership vote for conversion and the determination of a member's eligibility to vote.

* * * * *

■ 4. Add section 708a.11 to read as follows:

§ 708a.11 Voting guidelines.

(a) A converting credit union must conduct its member vote on conversion in a fair and legal manner. These guidelines are not an exhaustive checklist that guarantees a fair and legal vote but are suggestions that provide a framework to help a credit union fulfill its regulatory obligations.

(b) While NCUA's conversion rule applies to all conversions of federally insured credit unions, federally-insured State chartered credit unions (FISCUs) are also subject to State law on conversions. NCUA's position is that a State legislature or State supervisory authority may impose conversion requirements more stringent or restrictive than NCUA's. States that permit this kind of conversion could have substantive and procedural requirements that vary from Federal law. For example, there could be different voting standards for approving a vote. While NCUA's rule requires a simple majority of those who vote to approve a conversion, some States have higher voting standards requiring two-thirds or more of those who vote. A FISCU should be careful to understand both Federal and State law to navigate the conversion process and conduct a proper vote.

(c)(1) Determining who is eligible to cast a ballot is fundamental to any vote. No conversion vote can be fair and legal if some members are improperly excluded. A converting credit union should be cautious to identify all eligible members and make certain they are included on its voting list. NCUA recommends that a converting credit union establish internal procedures to manage this task.

(2) A converting credit union should be careful to make certain its member list is accurate and complete. For example, when a credit union converts from paper record keeping to computer record keeping, some members' names may not transfer unless the credit union is careful in this regard. This same problem can arise when a credit union converts from one computer system to another where the software is not completely compatible.

(3) Problems with keeping track of who is eligible to vote can also arise when a credit union converts from a federal charter to a State charter or vice versa. NCUA is aware of an instance where a federal credit union used membership materials that allowed two or more individuals to open a joint account and also allowed each to become a member. The federal credit union later converted to a State chartered credit union that, like most other State chartered credit unions in its State, used membership materials that allowed two or more individuals to open a joint account but only allowed the first person listed on the account to become a member. The other individuals did not become members as a result of their joint account. To become members, those individuals were required to open another account where they were the first or only person listed on the account. Over time, some individuals who became members of the federal credit union as the second person listed on a joint account were treated like those individuals who were listed as the second person on a joint account opened directly with the State chartered credit union. Specifically, both of those groups were treated as non-members not entitled to vote. This example makes the point that a credit union must be diligent in maintaining a reliable membership list.

(d) NCUA's conversion rule requires a converting credit union to permit members to vote by written mail ballot or in person at a special meeting held for the purpose of voting on the conversion. Although most members may choose to vote by mail, a significant number may choose to vote in person. As a result, a converting credit union should be careful to conduct its special meeting in a manner conducive to accommodating all members that wish to attend. That includes selecting a meeting location that can accommodate the anticipated number of attendees and is conveniently located. The meeting should also be held on a day and time suitable to most members' schedules. A credit union should conduct its meeting in accordance with applicable federal and State law, its bylaws, Robert's Rules of Order or other appropriate parliamentary procedures, and determine before the meeting the nature and scope of any discussion to be permitted.

BILLING CODE 7535–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 30435 ; Amdt. No. 3114]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective January 28, 2005. The compliance date for each

SIAP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 28, 2005.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;

2. The FAA Regional Office of the region in which the affected airport is located;

3. The Flight Inspection Area Office which originated the SIAP; or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

For Purchase—Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Donald P. Pate, Flight Procedure Standards Branch (AMCAFS–420), Flight Technologies and Programs Division, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd. Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082 Oklahoma City, OK 73125) telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (NFDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are impracticable and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, and Navigation (air).

Issued in Washington, DC on January 14, 2005.

James J. Ballough,

Director, Flight Standards Service.

Adoption of the Amendment

■ Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

[TD 9171]

RIN 1545–AY87; 1545–BC03

New Markets Tax Credit; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Correcting amendment.

SUMMARY: This document contains corrections to final regulations (TD 9171), that were published in the **Federal Register** on Tuesday, December 28, 2004 (69 FR 77625) relating to the new markets tax credit under section 45D.

DATES: This correction is effective December 28, 2004.

FOR FURTHER INFORMATION CONTACT: Paul F. Handleman or Lauren R. Taylor, (202) 622–3040 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulations (TD 9171) that are the subject of these corrections are under section 45D of the Internal Revenue Code.

Need for Correction

As published, TD 9171 contains errors that may prove to be misleading and are in need of clarification.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Correction of Publication

■ Accordingly, 26 CFR part 1 is corrected by making the following correcting amendments:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

§ 1.45D–1 [Corrected]

■ **Par. 2.** Section 1.45D–1(a), under the ''Table of contents'', the entry for paragraph (h)(2) ''(2) Exception for certain provisions'' is removed and the language ''(2) Exception'' is added in its place.

■ **Par. 3.** Section 1.45D–1(d)(4)(i)(E), second sentence, the language, ''For purposes the preceding'' is removed and the language ''For purposes of the preceding'' is added in its place.

■ **Par. 4.** Section 1.45D–1(d)(5)(ii) and (h)(2) are revised to read as follows:

§ 1.45D–1 New markets tax credit.

* * * * *

(d) * * *

(5) * * *

(ii) *Rental of real property.* The rental to others of real property located in any low-income community (as defined in section 45D(e)) is a qualified business if and only if the property is not residential rental property (as defined in section 168(e)(2)(A)) and there are substantial improvements located on the real property. However, a CDE's investment in or loan to a business engaged in the rental of real property is not a qualified low-income community investment under paragraph (d)(1)(i) of this section to the extent a lessee of the real property is described in paragraph (d)(5)(iii)(B) of this section.

(h) * * *

(2) *Exception.* Paragraph (d)(5)(ii) of this section as it relates to the restriction on lessees described in paragraph (d)(5)(iii)(B) of this section applies to qualified low-income community investments made on or after June 22, 2005.

* * * * *

■ **Par. 5.** Section 1.45D–1(d)(8)(ii), *Example* (ii), first sentence, the language, ''On November 1, 2004, W makes a'' is removed and the language ''On November 1, 2004, W makes an'' is added in its place.

Cynthia E. Grigsby,

Acting Chief, Publications and Regulations Branch, Legal Processing Division, Associate Chief Counsel, (Procedures and Administration).

Coast Guard

33 CFR Part 117

[CGD08–05–009]

Drawbridge Operation Regulations; Corpus Christi—Port Aransas Channel—Tule Lake, Corpus Christi, TX

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, Eighth Coast Guard District, has issued a temporary deviation from the regulation governing the operation of the Tule Lake Vertical Lift Span Highway and Railroad Bridge across the Corpus Christi—Port Aransas Channel, mile 14.0, at Corpus Christi, Nueces County, TX. This deviation allows the bridge to remain closed to navigation for four hours on two consecutive days. This temporary deviation is necessary for the maintenance of the rope sheaves and for the cleaning and lubrication of the haul and counterweight ropes of the drawbridge.

DATES: This deviation is effective from 7 a.m. on Thursday, February 10, 2005 through 11 a.m. on Friday, February 11, 2005.

ADDRESSES: Materials referred to in this document are available for inspection or copying at the office of the Eighth Coast Guard District, Bridge Administration Branch, Hale Boggs Federal Building, room 1313, 501 Magazine Street, New Orleans, Louisiana 70130–3396 between 7 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (504) 589–2965. The Bridge Administration Branch of the Eighth Coast Guard District maintains the public docket for this temporary deviation.

FOR FURTHER INFORMATION CONTACT: David Frank, Bridge Administration Branch, telephone (504) 589–2965.

SUPPLEMENTARY INFORMATION: The Port of Corpus Christi Authority has requested a temporary deviation in order to perform required maintenance on the rope sheaves and for the cleaning and lubrication of the haul and counterweight ropes of the Tule Lake vertical lift span bridge across Corpus Christi—Port Aransas Channel, mile 14.0 at Corpus Christi, Nueces County, Texas. This temporary deviation will allow the bridge to remain in the closed-to-navigation position from 7 a.m. to 11 a.m. on Thursday, February 10, 2005 and from 7 a.m. to 11 a.m. on Friday, February 11, 2005.

The vertical lift span bridge has a vertical clearance of 9.0 feet above mean high water, elevation 1.0 feet Mean Sea Level and 11.0 feet above mean low water, elevation −1.0 Mean Sea Level in the closed-to-navigation position. Navigation at the site of the bridge consists mainly of oil tankers and tows with barges. There is no recreational pleasure craft usage at the bridge site. Due to prior experience, as well as coordination with waterway users, it has been determined that this two-day partial closure will not have a significant effect on these vessels. The bridge normally opens to pass navigation an average of 850 times per month. The bridge opens on signal as required by 33 CFR 117.5. The bridge will not be able to open for emergencies during the closure period. Alternate routes are not available.

In accordance with 33 CFR 117.35(c), this work will be performed with all due speed in order to return the bridge to normal operation as soon as possible. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: January 18, 2005.

Marcus Redford,

Bridge Administrator.

[FR Doc. 05–1559 Filed 1–27–05; 8:45 am]

BILLING CODE 4910–15–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[CGD08–05–007]

Drawbridge Operation Regulations; Gulf Intracoastal Waterway—Bayou Boeuf, Amelia, LA

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, Eighth Coast Guard District, has issued a temporary deviation from the regulation governing the operation of the BNSF RR Swing Bridge across Bayou Boeuf, mile 10.2, at Amelia, St. Mary Parish, LA. This deviation allows the bridge to remain closed to navigation for eight hours on February 14, 2005, ten hours on February 15, 2005, and eight hours on February 16, 2005. The deviation is necessary to remove and replace the motor and transmission of the bridge.

DATES: This deviation is effective from 8 a.m. on Monday, February 14, 2005

until 4 p.m. on Wednesday, February 16, 2005.

ADDRESSES: Materials referred to in this document are available for inspection or copying at the office of the Eighth Coast Guard District, Bridge Administration Branch, Hale Boggs Federal Building, room 1313, 500 Poydras Street, New Orleans, Louisiana 70130–3310 between 7 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (504) 589–2965. The Bridge Administration Branch of the Eighth Coast Guard District maintains the public docket for this temporary deviation.

FOR FURTHER INFORMATION CONTACT: David Frank, Bridge Administration Branch, telephone (504) 589–2965.

SUPPLEMENTARY INFORMATION: The BNSF RR has requested a temporary deviation in order to remove and replace the motor and transmission of the Bayou Boeuf Swing Bridge across Bayou Boeuf, mile 10.2, at Amelia, St. Mary Parish, LA. The repairs are necessary to ensure the proper operation of the bridge. This temporary deviation will allow the bridge to remain in the closed-to-navigation position from 8 a.m. until 4 p.m. on Monday, February 14, 2005, from 7 a.m. until 5 p.m. on Tuesday, February 15, 2005, and from 8 a.m. until 4 p.m. on Wednesday, February 16, 2005.

As the bridge has no vertical clearance in the closed-to-navigation position, vessels will not be able to transit through the bridge site when the bridge is closed. Navigation at the site of the bridge consists mainly of tows with barges and some recreational pleasure craft. Due to prior experience, as well as coordination with waterway users, it has been determined that this closure will not have a significant effect on these vessels. An alternate route is available by using the GIWW, Morgan City to Port Allen Alternate Route.

In accordance with 33 CFR 117.35(c), this work will be performed with all due speed in order to return the bridge to normal operation as soon as possible. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: January 13, 2005.

Marcus Redford,

Bridge Administrator.

[FR Doc. 05–1560 Filed 1–27–05; 8:45 am]

BILLING CODE 4910–15–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[CGD01–04–157]

Drawbridge Operation Regulations: Newtown Creek, Dutch Kills, English Kills, and Their Tributaries, NY

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, First Coast Guard District, has issued a temporary deviation from the drawbridge operation regulations for the Metropolitan Avenue Bridge, mile 3.4, across English Kills at New York City, New York. Under this temporary deviation the bridge may remain closed from 6 a.m. to midnight on the following days: January 19 through January 21; January 26 through January 28; and January 31 through February 5, 2005. This temporary deviation is necessary to facilitate bridge maintenance.

DATES: This deviation is effective from January 19, 2005 through February 5, 2005.

FOR FURTHER INFORMATION CONTACT: Judy Leung-Yee, Project Officer, First Coast Guard District, at (212) 668–7195.

SUPPLEMENTARY INFORMATION: The Metropolitan Avenue Bridge has a vertical clearance in the closed position of 10 feet at mean high water and 15 feet at mean low water. The existing drawbridge operation regulations are listed at 33 CFR 117.801(e).

The owner of the bridge, New York City Department of Transportation (NYCDOT), requested a temporary deviation from the drawbridge operation regulations to facilitate rehabilitation repairs at the bridge. The bridge must remain in the closed position to perform these repairs.

Under this temporary deviation the NYCDOT Metropolitan Avenue Bridge may remain in the closed position from 6 a.m. through midnight on the following days: January 19 through January 21; January 26 through January 28; and from January 31 through February 5, 2005.

This deviation from the operating regulations is authorized under 33 CFR 117.35, and will be performed with all due speed in order to return the bridge to normal operation as soon as possible.

Dated: January 12, 2005.

Gary Kassof,

Bridge Program Manager, First Coast Guard District.

[CGD05–04–168]

RIN 1625–AA09

Drawbridge Operation Regulations; Christina River, Wilmington, DE

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is changing the regulations that govern the operation of the Norfolk Southern (NS) Railroad Bridge across Christina River, at mile 1.4, in Wilmington, DE. The bridge will remain open for vessel traffic, closing only for train crossings and periodic maintenance by an operator at a remote location. The final rule will maintain the bridge's current level of operational capabilities and continue to provide for the reasonable needs of rail transportation and vessel navigation.

DATES: This rule is effective February 28, 2005.

ADDRESSES: Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, are part of docket CGD05–04–168 and are available for inspection or copying at Commander (obr), Fifth Coast Guard District, Federal Building, 1st Floor, 431 Crawford Street, Portsmouth, VA 23704–5004 between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays. The Fifth Coast Guard District maintains the public docket for this rulemaking.

FOR FURTHER INFORMATION CONTACT: Anton Allen, Bridge Management Specialist, Fifth Coast Guard District, at (757) 398–6227.

SUPPLEMENTARY INFORMATION:

Regulatory History

On October 12, 2004, we published a notice of proposed rulemaking (NPRM) entitled ''Drawbridge Operation Regulations; Christina River, Wilmington, DE'' in the **Federal Register** (69 FR 60597). We received five letters commenting on the proposed rule. No public meeting was requested, and none was held.

Background and Purpose

Norfolk Southern Corporation (NSC), who owns and operates this swing-type bridge at mile 1.4 across the Christina River, in Wilmington, DE, requested a change to the current operating procedures set out in 33 CFR part 117.237(a)(2) which requires the draw to open on signal, except that the draw of a railroad bridge need not be opened when a train is in the bridge block, approaching the bridge, or within 5 minutes of the passage of a passenger train; but in no event shall the opening of the draw be delayed more than 10 minutes.

Under this rule, the NS Railroad Bridge will remain open to vessel traffic, closing only for train crossings and periodic maintenance. This rule would also allow the NS Railroad Bridge to be operated from a remote location at the Harrisburg, PA Dispatcher's Office.

NS has installed closed circuit cameras in the area of the bridge and directly beneath the bridge, mounted on the center pier fender systems on both sides. Infrared sensors have also been installed to cover the swing radius of the bridge. This equipment provides the controller the ability to monitor vessel traffic from the remote location. The controller will also monitor marine channel 13.

This change is being made to make the operation of the NS Railroad Bridge more efficient. It will save operational costs by eliminating the continuous presence of bridge tenders, and is expected to decrease maintenance costs. In addition, the draw being left in the open position most of the time will provide for greater flow of vessel traffic than the current regulation.

Discussion of Comments and Changes

The Coast Guard received five comments on the NPRM. Vane Line Bunkering and the U.S. Army Corps of Engineers both commented that they were concerned about marine radio traffic disruption from NS announcements on marine channel 13. The disruption was caused by excessive power for the transmitter and broadcasting horn blasts over the marine radio. NS has fixed all discrepancies. Announcements for bridge operations will only be broadcast over loudspeakers on the bridge, not over marine channel 13. Power to the marine radio transmitter has been reduced to an acceptable level.

The Coast Guard received a comment from the Delaware State Historical Preservation Office who indicated that they have no objection to this rule.

The remaining comments, from NSC, requested changes to their original submittal. NSC requested slight revisions to the language to be used in this rule. The Coast Guard has incorporated the following changes to this rule: In paragraph (b)(3), replaced ''less than ¾ of a mile'' with ''inhibited.'' Bends in the river near this bridge allow approximately ¼ of a mile visibility. Added the words ''Attention, Attention'' to the announcement in paragraph (b)(5). In paragraph (b)(6), removed the word ''automatically.'' The operation of this bridge is not intended to be automatic. Also in paragraph (b)(6), added the following statement: ''Vessels shall stay clear of both channels as to not interfere with the infrared detectors, until green lights are displayed on the swing span.''

The Coast Guard considers these changes necessary for safe navigation and the final rule was changed to reflect these proposals.

Regulatory Evaluation

This rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not ''significant'' under the regulatory policies and procedures of the Department of Homeland Security (DHS).

We expect the economic impact of this rule to be so minimal that a full Regulatory Evaluation under the regulatory policies and procedures of DHS is unnecessary. We reached this conclusion based on the fact that the changes have only a minimal impact on maritime traffic transiting the bridge. Although the NS Railroad Bridge will be untended and operated from a remote location, mariners can continue their transits because the bridge will remain open to mariners, only to be closed for train crossings or periodic maintenance.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this rule so that they can better evaluate its effects on them and participate in the rulemaking process. No assistance was requested from any small entity.

Collection of Information

This rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520.).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule would not affect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Commandant Instruction M16475.lD, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2–1, paragraph (32)(e) of the Instruction, from further environmental documentation because it has been determined that the promulgation of operating regulations for drawbridges are categorically excluded.

List of Subjects in 33 CFR Part 117

Bridges.

Regulations

■ For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; Department of Homeland Security Delegation No. 0170.1; 33 CFR 1.05–1(g); section 117.255 also issued under the authority of Pub. L. 102–587, 106 Stat. 5039.

■ 2. In § 117.237 redesignate paragraphs (b) through (d) as paragraphs (c) through (e), add a new paragraph (b), and revise newly redesignated paragraph (d) to read as follows:

§ 117.237 Christina River.

* * * * *

(b) The draw of the Norfolk Southern Railroad Bridge, mile 1.4 at Wilmington, shall operate as follows:

(1) The draw shall remain in the open position for navigation. The draw shall only be closed for train crossings or periodic maintenance authorized in accordance with subpart A of this part.

(2) The bridge shall be operated by the controller at the Harrisburg, PA Dispatcher's Office. The controller shall monitor vessel traffic with closed circuit cameras and infrared sensors covering the swing radius. Operational information will be provided 24 hours a day on marine channel 13 and via telephone (717) 541–2140.

(3) The bridge shall not be operated from the remote location in the following events: Failure or obstruction of the infrared sensors, closed-circuit cameras or marine-radio communications, or anytime controller's visibility is inhibited. In these situations, a bridge tender with Norfolk Southern must be called and on-site within 30 minutes.

(4) Before the bridge closes for any reason, the remote operator will monitor waterway traffic in the area. The bridge shall only be closed if the off-site remote operator's visual inspection shows that the channel is clear and there are no vessels transiting in the area. While the bridge is moving, the operator shall maintain constant surveillance of the navigation channel.

(5) Before closing the draw, the channel traffic lights would change from flashing green to flashing red, the horn will sound five short blasts, and an audio voice warning stating, ''Attention, Attention. Norfolk Southern Railroad Bridge over Christina River at milepost 1.4 will be closing to river traffic.'' Five short blasts of the horn will continue until the bridge is seated and locked down to vessels. The channel traffic lights will continue to flash red.

(6) When the rail traffic has cleared, the horn will sound one prolonged blast followed by one short blast to indicate the draw is opening to vessel traffic. During the opening swing movement, the channel traffic lights would flash red until the bridge returns to the fully open position. In the full open position to vessels, the bridge channel lights will flash green followed by an announcement stating, ''Security, security, security. Norfolk Southern Railroad Bridge over Christina River at mile 1.4 is open for river traffic.'' Vessels shall stay clear of both channels as to not interfere with infrared detectors, until green lights are displayed on the swing span.

(c) * * *

(d) The draws of the Norfolk Southern Railroad bridges, at miles 4.1 and 4.2, both at Wilmington, shall open on signal from 6 a.m. to 8 p.m. if at least 24 hours notice is given. From 8 p.m. to 6 a.m., the draws need not be opened for the passage of vessels.

* * * * *

Dated: January 20, 2005.

RIN 1625–AA09

Drawbridge Operation Regulations; Biscayne Bay, Atlantic Intracoastal Waterway, Miami River, and Miami Beach Channel, Miami-Dade County, FL

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is temporarily changing the regulations governing the operation of the east and

west spans of the Venetian Causeway bridges across the Miami Beach Channel on the Atlantic Intracoastal Waterway, the Miami Avenue bridge and the Brickell Avenue bridge across the Miami River, Miami-Dade County. This temporary rule allows these bridges to remain in the closed position during the running of the Miami Tropical Marathon on January 30, 2005.

DATES: This temporary rule is effective from 6:05 a.m. until 12:05 p.m. on January 30, 2005.

ADDRESSES: Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, are part of docket [CGD07–04–108] and are available for inspection or copying at Commander (obr), Seventh Coast Guard District, 909 SE 1st Avenue, Miami, Florida 33131–3050, between 7:30 a.m. and 4 p.m., Monday through Friday, except Federal holidays. Bridge Branch (obr), Seventh Coast Guard District, maintains the public docket for this rulemaking.

FOR FURTHER INFORMATION CONTACT: Mr. Gwin Tate, Project Manager, Seventh Coast Guard District, Bridge Branch, (305) 415–6747.

SUPPLEMENTARY INFORMATION:

Regulatory Information

On November 30, 2004, we published a notice of proposed rulemaking (NPRM) entitled Drawbridge Operation Regulations; Biscayne Bay, Atlantic Intracoastal Waterway, Miami River, and Miami Beach Channel, Miami-Dade County, FL in the **Federal Register** (69 FR 69561). We received no comments on this proposed rule. No public hearing was requested, and none was held.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register.** No changes were made to the proposed regulatory text. The event for which the rule is necessary is scheduled to occur less than 30 days from the date of publication. Therefore, waiting an addtional 30 days from the date of publication to make this rule effective is both unnecessary and impracticable.

Background and Purpose

The Miami Marathon Director requested that the Coast Guard temporarily change the existing regulations governing the operation of the east and west spans of the Venetian Causeway bridges, the Brickell Avenue bridge and the Miami Avenue bridge to allow them to remain in the closed position during the running of the Miami Tropical Marathon on Sunday, January 30, 2005. The closure times range from 6:05 a.m. through 12:05 p.m. The marathon route will pass over these four bridges and any bridge opening would disrupt the race. Based on the limited amount of time the bridges will be closed, the proposed rule will still provide for the reasonable needs of navigation on the day of the event.

The east and west spans of the Venetian Causeway bridges are located between Miami and Miami Beach. The current regulation governing the operation of the east span of the Venetian Causeway bridge is published in 33 CFR 117.269 and requires the bridge to open on signal; except that, from November 1 through April 30 from 7:15 a.m. to 8:45 a.m. and from 4:45 p.m. to 6:15 p.m. Monday through Friday, the draw need not open. However, the draw opens at 7:45 a.m., 8:15 a.m., 5:15 p.m., and 5:45 p.m., if any vessels are waiting to pass. The draw opens on signal on Thanksgiving Day, Charistmas Day, New Year's Day and Washington's Birthday. The draw opens at anytime for public vessels of the United States, tugs with tows, regularly scheduled cruise vessels, and vessels in distress.

The regulation governing the west span of the Venetian Causeway bridge is published in 33 CFR 117.261(j)(4)(nn) and requires the bridge to open on signal; except that, from November 1 through April 30, Monday through Friday except Federal holidays, from 7 a.m. to 9 a.m. and 4:30 p.m. to 6:30 p.m., that the draw need open only on the hour and the half-hour.

The regulation governing the Miami Avenue bridge, mile 0.3, at Miami, is published at 33 CFR 117.305(c) and requires that the bridge open on signal; except that, from 7:35 a.m. to 8:59 a.m., 12:05 p.m. to 12:59 p.m. and 4:35 p.m. to 5:59 p.m., Monday through Friday, except Federal holidays, the draw need not open for the passage of vessels.

The regulation governing the draw of the Brickell Avenue bridge, mile 0.1. at Miami, is published in 33 CFR 117.305(d) and requires that the bridge open on signal; except that, from 7 a.m. to 7 p.m., Monday through Friday, except Federal holidays, the draw need open only on the hour and half-hour. From 7:35 a.m. to 8:59 a.m., 12:05 p.m. to 12:59 p.m. and 4:35 p.m. to 5:59 p.m., Monday through Friday except Federal holidays, the draw need not open for the passage of vessels.

This temporary rule will not advesely affect the reasonable needs of navigation due to the short duration that the bridges will be in the closed position.

Discussion of Comments and Changes

No comments were received in response to the notice of proposed rulemaking and there were no changes made to the proposed regulatory text.

Regulatory Evaluation

This rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assesssment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not ''significant'' under the regulatory policies and procedures of the Department of Homeland Security (DHS).

We expect the economic impact of this temporary rule to be so minimal that a full Regulatory Evaluation is unnecessary. The short duration of time during the morning of January 30, 2005, that the bridges will remain in the closed position to facilitate the running of the marathon will have little, if any, economic impact. This rule was preceded by a notice of proposed rulemaking and no comments were received.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule will affect the owners or operators of vessels that will require passage through these bridges during the morning hours of January 30, 2005. These vessels will not be able to pass through these bridges during the effective times of this rule. A notice of proposed rulemaking was published for this rule. No comments were received and no changes were made to the proposed regulatory test. Due to the limited effective times of this rule and the nominal amount of marine traffic expected during the early and late morning hours on a Sunday at this time of year, this rule would not have a significant economic impact on a substantial number of small entities.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we offered to assist small entities in understanding the rule so that they could better evaluate its effects on them and participate in the rulemaking. The Coast Guard offered small businesses, organizations, or governmental jurisdictions that believed the rule would affect them, or that had questions concerning its provisions or options for compliance, to contact the person listed in **FOR FURTHER INFORMATION CONTACT**.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, Call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in the preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from environmental Health Risks and Safety Risks. This rule is not an economically significant rule and will not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory affairs has not designated it as a significant energy action. Therefore, it does not require a statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.*, specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Commandant Instruction M16475.1D, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.b.2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2–1, paragraph (32)(e) of the Instruction, from further environmental documentation. This rule fits within paragraph (32)(e) because it pertains to operation regulations for drawbridges. Under figure 2–1, paragraph (32)(e), of the Instruction, an ''Environmental Analysis Check List'' and a ''Categorical Exclusion Determination'' are not required for this rule.

List of Subjects in 33 CFR Part 117

Bridges.

Regulations

■ For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; Department of Homeland Security Delegation No. 0170.1; section 117.255 also issued under authority of Pub. L. 102–587, 106 Stat. 5039.

■ 2. From 6:15 a.m. until 9:20 a.m. on January 30, 2005, in § 117.261, paragraph (nn) is suspended and a new paragraph (tt) is added to read as follows:

§ 117.261 Atlantic Intracoastal Waterway from St. Marys River to Key Largo.

* * * * *

(tt) *West Span of the Venetian Causeway, mile 1088.6 at Miami.* The draw need not open from 6:15 a.m. until 9:20 a.m. on January 30, 2005. Public vessels of the United States and vessels in distress shall be passed at any time.

■ 3. From 6:05 a.m. until 8:40 a.m. on January 30, 2005, in § 117.269, temporarily designate the existing regulatory text as paragraph (a); suspend paragraph (a); and add a new paragraph (b) to read as follows:

§ 117.269 Biscayne Bay.

* * * * *

(b) The draw of the east span of the Venetian Causeway bridge across Miami Beach Channel need not open from 6:05

a.m. to 8:40 a.m. on January 30, 2005. Public vessesl of the United States and vessels in distress shall be passed at any time.

■ 4. From 6:25 a.m. until 10 a.m. on Sunday, January 30, 2005, in § 117.305, paragraphs (c) and (d) are suspended and new paragraphs (e) and (f) are added to read as follows:

§ 117.305 Miami River.

* * * * *

(e) The draw of each bridge from the mouth of the Miami River, to and including the NW. 27th Avenue bridge, mile 3.7 at Miami, except the Miami Avenue and Brickell Avenue bridges, shall open on signal.

(f) The Miami Avenue bridge, across the Miami River, need not open from 6:25 a.m. to 10 a.m. on Sunday, January 30, 2005, and the Brickell Avenue bridge, across the Miami River, need not open 7:10 a.m. to 12:05 p.m. on Sunday, January 30, 2005. Public vessels of the United States and vessels in an emergency involving danger to life or property shall be passed at any time.

Dated: January 11, 2005.

D. Brian Peterman,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District

[FR Doc. 05–1659 Filed 1–27–05; 8:45 am]

BILLING CODE 4910–15–M

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[CGD01–05–004]

Drawbridge Operation Regulations: Newtown Creek, Dutch Kills, English Kills, and Their Tributaries, NY

AGENCY: Coast Guard, DHS.

ACTION: Notice of temporary deviation from regulations.

SUMMARY: The Commander, First Coast Guard District, has issued a temporary deviation from the drawbridge operation regulations for the Metropolitan Avenue Bridge, mile 3.4, across English Kills at New York City, New York. Under this temporary deviation the bridge may remain closed on the following days: February 14 through February 15; February 24 through February 25; March 3 through March 4; March 10 through March 11; March 17 through March 18; and March 24 through March 25, 2005. This temporary deviation is necessary to facilitate bridge maintenance.

DATES: This deviation is effective from February 14, 2005, through March 25, 2005.

FOR FURTHER INFORMATION CONTACT: Judy Leung-Yee, Project Officer, First Coast Guard District, at (212) 668–7195.

SUPPLEMENTARY INFORMATION: The Metropolitan Avenue Bridge has a vertical clearance in the closed position of 10 feet at mean high water and 15 feet at mean low water. The existing drawbridge operation regulations are listed at 33 CFR 117.801(e).

The owner of the bridge, New York City Department of Transportation (NYCDOT), requested a temporary deviation from the drawbridge operation regulations to facilitate rehabilitation repairs at the bridge. The bridge must remain in the closed position to perform these repairs.

Under this temporary deviation the NYCDOT Metropolitan Avenue Bridge may remain in the closed position on the following days: February 14 through February 15; February 24 through February 25; March 3 through March 4; March 10 through March 11; March 17 through March 18; and March 24 through March 25, 2005.

This deviation from the operating regulations is authorized under 33 CFR 117.35, and will be performed with all due speed in order to return the bridge to normal operation as soon as possible.

Dated: January 21, 2005.

Gary Kassof,

Bridge Program Manager, First Coast Guard District.

[FR Doc. 05–1658 Filed 1–27–05; 8:45 am]

BILLING CODE 4910–15–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[R05–OAR–2004–MI–0003; FRL–7865–2]

Approval and Promulgation of Maintenance Plan Revisions; Michigan

AGENCY: Environmental Protection Agency.

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a December 19, 2003 request from Michigan for a State Implementation Plan (SIP) revision of the Southeast Michigan carbon monoxide (CO) maintenance plan. The CO maintenance plan revision establishes a new on-road emissions inventory for the years 1996 and 2010. The revision also establishes a new transportation conformity motor vehicle emissions budget (MVEB) for the year 2010. The emission inventory and MVEB updates are designed to maintain the National Ambient Air Quality Standards (NAAQS) for CO as required by the Clean Air Act (CAA).

DATES: This rule is effective on March 29, 2005, unless EPA receives adverse written comments by February 28, 2005. If EPA receives adverse comments, EPA will publish a timely withdrawal of the rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: Submit comments, identified by Regional Material in EDocket (RME) ID No. R05–OAR–2004–MI–0003, by one of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the on-line instructions for submitting comments.

Agency Web site: http://docket.epa.gov/rmepub/. Regional RME, EPA's electronic public docket and comments system, is EPA's preferred method for receiving comments. Once in the system, select ''quick search,'' then key in the appropriate RME Docket identification number. Follow the on-line instructions for submitting comments.

E-mail: mooney.john@epa.gov.

Fax: (312)886–5824.

Mail: You may send written comments to: John M. Mooney, Chief, Criteria Pollutant Section, (AR–18J), U.S. Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604.

Hand delivery: Deliver your comments to: John M. Mooney, Chief, Criteria Pollutant Section, (AR–18J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, 18th floor, Chicago, Illinois 60604. Such deliveries are only accepted during the Regional Office's normal hours of operation. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m. excluding Federal holidays.

Instructions: Direct your comments to RME ID No. R05–OAR–2004–MI–0003. EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through RME, regulations.gov, or e-mail. The EPA RME Web site and the federal regulations.gov Web site are ''anonymous access'' systems, which means EPA will not know your identity

or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through RME or *regulations.gov,* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional instructions on submitting comments, see ''How and to whom do I submit comments?'' of the **SUPPLEMENTARY INFORMATION** section of this rule.

Docket: All documents in the electronic docket are listed in the RME index at *http://docket.epa.gov/rmepub/*. Although listed in the index, some information is not publicly available, *i.e.*, CBI or other information whose disclosure is restricted by statute. Publicly available docket materials are available either electronically in RME or in hard copy at Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This Facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. Please contact Anthony Maietta at (312) 353–8777 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Anthony J. Maietta, Life Scientist, Criteria Pollutant Section, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 353–8777, *maietta.anthony@epa.gov*.

SUPPLEMENTARY INFORMATION: This **SUPPLEMENTARY INFORMATION** section is arranged as follows:

I. General Information

A. Does This Action Apply to Me?

Approval of the requested revision will mainly affect the entities responsible for transportation planning in the Southeast Michigan CO maintenance area. Those entities include, but are not limited to, the Southeast Michigan Council of Governments (SEMCOG), and the Michigan Department of Transportation. This action is approving non-regulatory changes to the state's CO maintenance plan.

B. How Can I Get Copies of This Document and Other Related Information?

The Regional Office has established an electronic public rulemaking file available for inspection at RME under RME ID No. R05–OAR–2004–MI–0003, and a hard copy file which is available for inspection at the Regional Office. The official public file consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public rulemaking file does not include CBI or other information whose disclosure is restricted by statute. The official public rulemaking file is the collection of materials that is available for public viewing at the Air Programs Branch, Air and Radiation Division, EPA Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604. EPA requests that, if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m. excluding Federal holidays.

Electronic Access. You may access this **Federal Register** document electronically through the regulations.gov Web site located at *http://www.regulations.gov* where you can find, review, and submit comments on Federal rules that have been published in the **Federal Register**, the Government's legal newspaper, and that are open for comment.

For public commenters, it is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at the EPA Regional Office, as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in the official public rulemaking file. The entire printed comment, including the copyrighted material, will be available at the Regional Office for public inspection.

C. How and to Whom Do I Submit Comments?

You may submit comments electronically, by mail, or through hand delivery/courier. To ensure proper receipt by EPA, identify the appropriate rulemaking identification number by including the text ''Public comment on proposed rulemaking Region 5 Air Docket R05–OAR–2004–MI–0003'' in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

For detailed instructions on submitting public comments and on what to consider as you prepare your comments see the **ADDRESSES** section and the section I(B) of the **SUPPLEMENTARY INFORMATION** section of the related proposed rule which is published in the Proposed Rules section of this **Federal Register**.

II. What Action Is EPA Taking Today?

EPA is approving a December 19, 2003 request from the State of Michigan to revise the Southeast Michigan CO maintenance plan. The Southeast Michigan CO maintenance area consists of portions of Oakland, Macomb, and Wayne Counties. EPA designated Southeast Michigan as attainment in a June 30, 1999 **Federal Register** notice (64 FR 35017). At that time, an on-road CO emissions inventory was created for Southeast Michigan for the years 1996 and 2010. A 2010 MVEB was also created at that time. As a result of today's action, the 1996 base year on-road emissions inventory, forecast year, 2010, emissions inventory, and the 2010 MVEB will be updated to meet EPA's requirement to use the Mobile6 emissions factor model to determine mobile source emissions and conformity to the CO maintenance SIP. EPA required use of the Mobile6 model as of January 29, 2004. By approving the revision, EPA ensures that future emission forecasts for conformity

analyses in the Southeast Michigan CO maintenance area will be compared to budgets that are based on similar inputs and the same version of the Mobile model.

EPA is publishing this action without prior proposal because we view this as a noncontroversial SIP revision and anticipate no adverse comments. However, in the proposed rules of this **Federal Register** publication, we are publishing a separate document that will serve as the proposal to approve the state plan revision if we receive relevant adverse comments and, therefore, withdraw this direct final rule. This rule will be effective March 29, 2005 without further notice unless we receive relevant adverse comments by February 28, 2005. If we receive such comments, we will withdraw this action before the effective date by publishing a document withdrawing the direct final approval action. EPA will not provide a second comment period on this action. Any person interested in commenting on this action should do so at this time.

III. Did the State Properly Approve the Underlying State Rule?

On December 19, 2003, Michigan submitted to EPA for approval, a SIP revision for the Southeast Michigan CO maintenance area. The Michigan Department of Environmental Quality (MDEQ) held a public hearing on the matter on September 9, 2003. Four people attended the hearing. MDEQ did not receive any comments on the proposed revision.

In the submittal, the State requests that the 1996 base year on-road CO emissions inventory be changed to 3,866.2 tons/day, and that the 2010 MVEB be changed to 3,842.7 tons/day. The State also added the forecast year 2010 emissions inventory of 1,942.5 tons/day. The MVEB, which is partly determined by using the base year on-road emissions inventory, is used for purposes of transportation conformity.

IV. What Is Transportation Conformity?

Transportation conformity is a mechanism for determining the amount of emissions created by a transportation project, plan, or program in a nonattainment or maintenance area, making sure that such emissions do not cause or contribute to violations of the NAAQS, or impede the rate of progress toward attaining or maintaining the NAAQS. Because the SIP contains measures that will help an area attain or maintain the NAAQS, transportation activities must ''conform'' to the goals outlined in the SIP. On November 24, 1993, EPA published a final rule establishing criteria and procedures for determining whether transportation plans, programs and projects funded or approved under Title 23 of the United States Code or the Federal Transit Act conform to the SIPs.

The transportation conformity rules require a CO maintenance area, like Southeast Michigan, to compare the actual projected emissions from cars, trucks and buses on the highway network, to the MVEB established by a maintenance plan. The Southeast Michigan area has an approved CO maintenance plan (see 64 FR 35017). Our approval of the original maintenance plan established the Southeast Michigan MVEB for transportation conformity purposes. At the time of approval, Mobile5 was the required computer model for estimating the amount of on-road emissions in an area. As of January 29, 2004, Mobile6 is the required model for estimating on-road emissions. By taking into account revised techniques for estimating motor vehicle emissions, Mobile6 provides a more accurate estimate of emissions than Mobile5.

V. What Is an On-Road Emissions Inventory?

General SIP provisions for nonattainment areas call for an inventory of all known emissions sources in that area to determine where emissions come from, and to provide a tool for evaluating potential emission control strategies. In a maintenance area, the emissions inventory shows the amount of a pollutant, in this case, CO, that an area can emit while still maintaining the CO air quality standards. Emissions from point, area, and mobile sources are estimated as part of this process. Forecasts of emissions in future years can then be calculated. These forecasts take into account emissions reductions from federal and state measures, as well as growth in emissions resulting from population growth and economic development. For purposes of transportation conformity, the emissions inventory and emissions forecast are used to determine the amount of on-road mobile source emissions an area can emit while still maintaining the NAAQS for that pollutant.

In the original CO maintenance plan, an emissions inventory was calculated for the base year 1986 and a forecast year of 1996. Point, area, off-road, and on-road sources were estimated. The on-road portions of the original inventory and forecast were created using the Mobile5 model. Michigan updated the on-road emissions inventory and forecast year inventory in June 1999. In the current submittal, Mobile6 is used to determine the on-road portions of the inventory and forecast. EPA policy requires this switch as of January 29, 2004 because EPA believes that the Mobile6 model more accurately predicts emissions levels. The State's action is simply an update of its original estimates of the on-road portion of the 1996 base year emissions inventory, using the newer model. The following Table shows the revised CO emissions inventory and forecast for Southeast Michigan.

TABLE 1.—SOUTHEAST MICHIGAN CO EMISSIONS INVENTORY

[Tons/day]

Source type	1996	2010	1996–2010 change	Percent change 1996–2010
Point	128.7	140.0	11.3	8.8
Area	129.7	137.6	7.9	6.0
Off-road Mobile	233.0	237.1	4.1	1.8
On-road Mobile	3,866.2	1942.5	−1923.7	−49.8
Total	4,357.6	2457.2	−1900.4	−43.6

VI. What Is an Emissions Budget?

A motor vehicle emissions budget (also known as a conformity budget) is the projected level of controlled emissions from the transportation sector (on-road mobile sources) that is estimated in the SIP. The SIP includes emissions control programs at the state and federal level, examples include requirements on motor vehicle fuels and exhaust standards for cars and trucks. The emissions budget concept is further explained in the preamble to the November 24, 1993, transportation conformity rule (58 FR 62188). The preamble also describes how to establish the MVEB in the SIP and how to revise the emissions budget. The transportation conformity rule provides for updates to the MVEB, and the revised MVEB is acceptable so long as the level of projected emissions from all sources (point, mobile, and area) remains at or below the level necessary to attain the NAAQS. Because that level of projected emissions will change as a result of today's actions, a new MVEB must be created. The following Table contains the new MVEB for Southeast Michigan.

TABLE 2.—2010 CO MOTOR VEHICLE EMISSIONS BUDGET (MVEB) FOR SOUTHEAST MICHIGAN

[Tons/day]

Total reductions from 1996 to 2010	1,900.4
2010 On-road Mobile Source Emissions	1,942.5
Total	3,842.9

VII. How Does This Action Change the Southeast Michigan CO Maintenance Plan?

When the budget was reassessed using Mobile6, the on-road CO estimates increased from earlier estimates. However, it is important to note that there is no actual increase of CO emissions in Southeast Michigan. The perceived increase is caused by changes in the estimation techniques, not by relaxation of control requirements.

VIII. Why Is This Request Approvable?

As noted above, the State's submittal is consistent with EPA policies and requirements, and is therefore approvable. EPA believes the revised emissions inventory and MVEB budgets are adequate for conformity purposes and are approvable as part of the maintenance plan.

IX. Statutory and Executive Order Reviews

Executive Order 12866; Regulatory Planning and Review

Under Executive Order 12866 (*58 FR 51735,* October 4, 1993), this action is not a ''significant regulatory action'' and therefore is not subject to review by the Office of Management and Budget.

Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

Because it is not a ''significant regulatory action'' under Executive Order 12866 or a ''significant energy action,'' this action is also not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (*66 FR 28355,* May 22, 2001).

Regulatory Flexibility Act

This action merely approves state regulations as meeting Federal requirements and imposes no additional requirements beyond those imposed by state regulations. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Unfunded Mandates Reform Act

Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

Executive Order 13175 Consultation and Coordination With Indian Tribal Governments

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (*59 FR 22951,* November 9, 2000).

Executive Order 13132 Federalism

This action also does not have Federalism implications because it does not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (*64 FR 43255,* August 10, 1999). This action merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act.

Executive Order 13045 Protection of Children From Environmental Health and Safety Risks

This rule also is not subject to Executive Order 13045 ''Protection of Children from Environmental Health Risks and Safety Risks'' (*62 FR 19885,* April 23, 1997), because it is not economically significant.

National Technology Transfer Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTA), 15 U.S.C. 272, requires federal agencies to use technical standards that are developed or adopted by voluntary consensus to carry out policy objectives, so long as such standards are not inconsistent with applicable law or otherwise impracticable. In reviewing program submissions, EPA's role is to approve State choices, provided that they meet the criteria of the Act. Absent a prior existing requirement for the state to use voluntary consensus standards, EPA has no authority to disapprove a program submission for failure to use such standards, and it would thus be inconsistent with applicable law for EPA to use voluntary consensus standards in place of a program submission that otherwise satisfies the provisions of the Act. Therefore, the requirements of section 12(d) of the NTTA do not apply.

Civil Justice Reform

As required by section 3 of Executive Order 12988 (*61 FR 4729*, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct.

Governmental Interference With Constitutionally Protected Property Rights

EPA has complied with Executive Order 12630 (*53 FR 8859,* March 15, 1988) by examining the takings implications of the rule in accordance with the ''Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings'' issued under the executive order, and has determined

that the rule's requirements do not constitute a taking.

Paperwork Reduction Act

This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 804 exempts from section 801 the following types of rules: (1) Rules of particular applicability; (2) rules relating to agency management or personnel; and (3) rules of agency organization, procedure, or practice that do not substantially affect the rights or obligations of non-agency parties. 5 U.S.C. 804(3). EPA is not required to submit a rule report regarding this action under section 801 because this is a rule of particular applicability. Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 15, 2004. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Intergovernmental relations.

Dated: January 14, 2005.

Norman Neidergang,

Acting Regional Administrator, Region 5.

■ Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart X—Michigan

■ 2. Section 52.1179 is revised to read as follows:

§ 52.1179 Control strategy: Carbon monoxide.

(a) Approval—On March 18, 1999, the Michigan Department of Environmental Quality submitted a request to redesignate the Detroit CO nonattainment area (consisting of portions of Wayne, Oakland and Macomb Counties) to attainment for CO. As part of the redesignation request, the State submitted a maintenance plan as required by 175A of the Clean Air Act, as amended in 1990. Elements of the section 175A maintenance plan include a base year (1996 attainment year) emission inventory for CO, a demonstration of maintenance of the ozone NAAQS with projected emission inventories to the year 2010, a plan to verify continued attainment, a contingency plan, and an obligation to submit a subsequent maintenance plan revision in 8 years as required by the Clean Air Act. If the area records a violation of the CO NAAQS (which must be confirmed by the State), Michigan will implement one or more appropriate contingency measure(s) which are contained in the contingency plan. The menu of contingency measures includes enforceable emission limitations for stationary sources, transportation control measures, or a vehicle inspection and maintenance program. The redesignation request and maintenance plan meet the redesignation requirements in sections 107(d)(3)(E) and 175A of the Act as amended in 1990.

(b) Approval—On December 19, 2003, Michigan submitted a request to revise its plan for the Southeast Michigan CO maintenance area (consisting of portions of Wayne, Oakland and Macomb Counties). The submittal contains updated emission inventories for 1996 and 2010, and an update to the 2010 motor vehicle emissions budget (MVEB). The 2010 MVEB is 3,842.9 tons of CO per day.

[FR Doc. 05–1633 Filed 1–27–05; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 81

[OH 159–2; FRL–7862–8]

Approval and Promulgation of Implementation Plans; Ohio

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: On September 27, 2003, Ohio requested revisions to the State Implementation Plan (SIP) for sulfur dioxide (SO_2) for several counties in Ohio, along with a request for redesignation of Cuyahoga County to attainment for SO_2. On July 8, 2004, at 69 FR 41344, EPA proposed to approve the requested revisions and to redesignate Cuyahoga County as requested. EPA also published a corresponding direct final rule on the same date, at 69 FR 41336, but EPA withdrew this direct final rule because it received an adverse comment. A citizen from New Jersey expressed concern about air pollution coming east from Ohio and urged EPA to require Ohio power plants to upgrade their pollution controls. EPA is satisfied that the SO_2 emission limits submitted by Ohio suffice to assure attainment of the SO_2 air quality standard. EPA notes further that a separate action proposed on January 30, 2004, at 69 FR 4566, known as the Clean Air Interstate Rule, would require significant reduction in the emissions of SO_2 and nitrogen oxides (NO_X) of power plants in Ohio and elsewhere for purposes of reducing their long-range transported contributions to fine particulate matter and ozone exposures. EPA also received a comment from an affected company clarifying the operational status of boilers affected by the relevant rule. EPA affirms this clarification. Thus, as proposed, EPA is approving the SO_2 rules Ohio submitted, removing the Federal Implementation Plan rules that these State rules supersede, and redesignating Cuyahoga County to attainment for SO_2.

DATES: This final rule is effective on February 28, 2005.

ADDRESSES: Copies of the Ohio's submittals and other information are available for inspection during normal business hours at the following address: (We recommend that you telephone John Summerhays at (312) 886–6067, before visiting the Region 5 Office.)

United States Environmental Protection Agency, Region 5, Air Programs Branch (AR–18J), Criteria Pollutant Section, 77 West Jackson Boulevard, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: John Summerhays at (312) 886–6067.

SUPPLEMENTARY INFORMATION: This supplemental information section is organized as follows:

I. Synopsis of Ohio's Submittal

On September 27, 2003, Ohio requested numerous revisions to its

State Implementation Plan (SIP) for sulfur dioxide (SO_2). These revisions principally relate to the nature of the federally enforceable emission limits for SO_2 in several Ohio counties. For most of the sources affected by this request, the current limits are the federally promulgated Federal Implementation Plan (FIP) limits that EPA promulgated in 1976 (with selected subsequent amendments). Ohio requested that EPA approve numerous State-adopted emission limits as federally enforceable, which would allow EPA to delete the corresponding FIP limits.

Ohio's submittal addresses SO_2 limits for the following counties: Adams, Allen, Clermont, Cuyahoga, Lake, Lawrence, Mahoning, Monroe, Montgomery, Muskingum, Pike, Ross, Washington, and Wood Counties. For Cuyahoga, Mahoning, Monroe, and Washington Counties, the submitted limits differ from the current federally enforceable limits. Ohio provided evidence from modeling that the submitted limits would provide for attainment of the SO_2 standards. For the other counties, the submitted limits are largely equivalent to current federally enforceable limits. Finally, Ohio submitted selected revisions to generic rules with statewide applicability.

The second Ohio request is for EPA to redesignate the Cleveland area (Cuyahoga County) from a nonattainment area to an attainment area for SO_2. Among the prerequisites to redesignation is that EPA has approved State adopted rules sufficient to provide for attainment and to satisfy other planning requirements. Ohio's submittal and EPA's approval of State limits for Cuyahoga County for replacing FIP limits addresses this prerequisite. A related, third Ohio request is that EPA approve Ohio's plan for continuing to attain the SO_2 air quality standard in Cuyahoga County.

EPA published a direct final rule approving Ohio's requests and redesignating Cuyahoga County to attainment for SO_2 on July 8, 2004, at 69 FR 41336. EPA subsequently withdrew this action due to receipt of a relevant adverse comment. Nevertheless, readers seeking a more thorough description of Ohio's submittal, EPA's criteria for reviewing this submittal, and EPA's review of the submittal, may consult this notice of direct final rulemaking.

II. Review of Comments

In conjunction with its direct final rule, EPA simultaneously published a proposed rule proposing the same actions, published at 69 FR 41344. EPA received two comment letters in response to this proposed rule.

Comment: A citizen from New Jersey commented: ''This agency must examine this with a view to any Ohio poisonous air that comes east, impacting New Jersey, New York, and Connecticut. EPA has a duty and responsibility to guarantee clean air to those east of Ohio, as well as Ohio residents. We need the highest standards for Ohio.

Power plants have had at least fifty years to upgrade their plants. There is absolutely no reason if they have failed to upgrade, other than a desire to pollute. It is time to clean up our air.''

Response: In this action, EPA is evaluating the adequacy of Ohio's limits for assuring attainment of the SO_2 air quality standards. In general, the highest concentrations of SO_2 arise within a few kilometers of a source or sources that emit SO_2; nevertheless, EPA has examined evidence related to the longer range impacts and believes that Ohio sources are not causing violations of the SO_2 standards or interfering with attainment of the SO_2 standards in the cited eastern states. At the same time, EPA is taking separate actions to address the impacts of SO_2 emitted from power plants in Ohio and elsewhere on concentrations of other air pollutants. In particular, in order to address long-range impacts of power plant emissions on concentrations of fine particulate matter and ozone, EPA has proposed to require significant reductions of emissions of SO_2 and NO_X from power plants throughout the Eastern United States, including Ohio. This proposal was published on January 30, 2004, at 69 FR 4566, and EPA intends to publish final action on this proposal later this year.

Comment: MW Custom Papers commented to clarify the operational status of the boilers at a mill, formerly known as a Mead Corporation facility, which it operates in Ross County, Ohio. The commenter highlighted a statement in the preamble section of the direct final rulemaking discussing Ross County rules, stating ''The FIP limit for boilers at this source is 0.00#/MMBTU, based on anticipation that these boilers would be shut down; however, these boilers did not in fact shut down.'' The commenter explains that four boilers, corresponding to stacks 1, 2, 3, and 4, were in fact shut down as anticipated, but three other boilers (boilers 5, 7 and 8) were not shut down and were never intended to be shut down. Indeed, the commenter notes, while the FIP expressly requires zero emissions from stacks 1 through 4, the attainment analysis assumes nonzero emissions for the other three boilers. The commenter requests that EPA provide this explanation in its final rulemaking.

Response: The preamble to the direct final rulemaking reflected a confusion between boilers slated for shutdown and boilers (not mentioned in the FIP regulations but given explicit limits in Ohio's rules) that were slated for continued operation. EPA acknowledges its error and appreciates the clarification. Thus, Ohio's rules reflect the same operations as the FIP, *i.e.,* boilers for stacks 1 through 4 shut down and boilers 5, 7, and 8 operating with nonzero limits, and the company in fact shut down the boilers it intended to shut down. This explanation provides a clarified basis for approving Ohio's Ross County limits.

III. EPA Action

This rulemaking approves numerous SO_2 limits adopted and submitted by Ohio, many of which replace limits that EPA promulgated as part of a FIP. EPA is approving rules for Adams County (limits for Dayton Power & Light-Stuart Station), Allen County (limits for the Marsulex facility), Clermont County (limits for Cincinnati Gas & Electric-Beckjord Station), Cuyahoga County (full rule), Lake County (full rule), Lawrence County (limits for the Allied Chemical facility), Mahoning County (full rule), Monroe County (full rule), Montgomery County (limits for the Glatfelter and Miami Paper facilities), Muskingum County (Armco Steel), Pike County (limits for the Portsmouth Diffusion Plant), Ross County (limits for the MW Custom Papers facility), Washington County (full rule), and Wood County (Libby-Owens-Ford Plants 4 & 8 and Plant 6).

In those cases where the affected plants are subject to FIP limits, the approved State rules supersede the FIP limits. In today's action, EPA is removing the FIP rules that have thus been superseded.

EPA is redesignating Cuyahoga County to attainment for SO_2. EPA is also approving Ohio's plan for maintenance of the SO_2 air quality standard in Cuyahoga County.

IV. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a ''significant regulatory action'' and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional

requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely approves state rules implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by March 29, 2005. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

List of Subjects

40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur dioxide.

40 CFR Part 81

Air pollution control, National parks, Wilderness areas.

Dated: January 13, 2005.

Michael O. Leavitt,

Administrator.

■ For the reasons stated in the preamble, part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart KK—Ohio

■ 2. Section 52.1870 is amended by adding paragraph (c)(129) to read as follows:

§ 52.1870 Identification of plan.

* * * * *

(c) * * *

(129) On September 27, 2003, the Ohio Environmental Protection Agency submitted revised rules for sulfur dioxide. The submittal includes revised provisions in Rules 3745–18–01, 3745–18–04, and 3745–18–06, relating to natural gas use, as well as special provisions in Rule 3745–18–04 for compliance testing for Lubrizol in Lake County. The submittal includes recently revised Ohio limits in Cuyahoga, Lake, Mahoning, Monroe, and Washington Counties, as well as previously adopted source-specific limits in Adams, Allen, Clermont, Lawrence, Montgomery, Muskingum, Pike, Ross, and Wood Counties that had not previously been subject to EPA rulemaking.

(i) *Incorporation by reference.*

(A) Rules OAC 3745–18–01; OAC 3745–18–04(F); OAC 3745–18–04(J); OAC 3745–18–06; OAC 3745–18–24; OAC 3745–18–49; OAC 3745–18–56; OAC 3745–18–62; and OAC 3745–18–90. Adopted August 19, 2003, effective September 1, 2003.

(B) Rules OAC 3745–18–07(B); OAC 3745–18–08(H); OAC 3745–18–19(B); OAC 3745–18–66(C); OAC 3745–18–72(B);, effective May 11, 1987.

(C) OAC 3745–18–50(C); OAC 3745–18–77(B); effective December 28, 1979.

(D) OAC 3745–18–63(K) and (L); and OAC 3745–18–93(B) and (C); effective December 1, 1984.

(ii) *Additional material*—Letter from Robert Hodanbosi, Chief of the Division of Air Pollution Control of the Ohio EPA, to Thomas Skinner, Regional Administrator for Region 5 of USEPA, dated September 27, 2003.

* * * * *

■ 3. Section 52.1881 is amended as follows:

■ a. By revising paragraphs (a)(4) and (a)(8) and adding paragraph (a)(15).

■ b. By removing paragraphs (b)(7) through (b)(15), redesignating paragraph (b)(16) as (b)(7), removing paragraphs (b)(17) through (b)(25), redesignating paragraphs (b)(26), (b)(27) and (b)(28) as (b)(8), (b)(9), and (b)(10), respectively, and removing paragraphs (b)(29) and (b)(30).

§ 52.1881 Control strategy: Sulfur Oxides (sulfur dioxide).

(a) * * *

(4) Approval—EPA approves the sulfur dioxide emission limits for the following counties: Adams County, Allen County, Ashland County, Ashtabula County, Athens County, Auglaize County, Belmont County, Brown County, Butler County, Carroll County, Champaign County, Clark County, Clermont County, Clinton County, Columbiana County, Coshocton County, Crawford County, Cuyahoga County, Darke County, Defiance County, Delaware County, Erie County, Fairfield County, Fayette County, Fulton County, Gallia County, Geauga County, Greene County, Guernsey County, Hamilton County, Hancock County, Hardin County, Harrison County, Henry County, Highland County, Hocking County, Holmes County, Huron County, Jackson County, Jefferson County, Knox County, Lake County, Lawrence County, Licking County, Logan County, Lorain County, Lucas County, Madison County, Mahoning County, Marion County, Medina County, Meigs County, Mercer County, Miami County, Monroe County, Montgomery County, Morgan County, Morrow County, Muskingum County,

Noble County, Ottawa County, Paulding County, Perry County, Pickaway County, Pike County, Portage County, Preble County, Putnam County, Richland County, Ross County, Sandusky County (except Martin Marietta Chemicals), Scioto County, Seneca County, Shelby County, Trumbull County, Tuscarawas County, Union County, Van Wert County, Vinton County, Warren County, Washington County, Wayne County, Williams County, Wood County, and Wyandot County.

* * * * *

(8) No Action—EPA is neither approving nor disapproving the emission limitations for the following counties/sources pending further review: Franklin County, Sandusky County (Martin Marietta Chemicals), and Stark County.

* * * * *

(15) On September 27, 2003, Ohio submitted maintenance plans for sulfur dioxide in Cuyahoga County and Lucas County.

* * * * *

PART 81—[AMENDED]

■ 1. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. In § 81.336 the Ohio-SO_2 table is amended by revising the entry for Cuyahoga County to read as follows:

§ 81.336 Ohio.

OHIO-SO_2

Designated area	Does not meet primary standards	Does not meet secondary standards	Cannot be classified	Better than national standards
* * * * *	*	*	*	*
Cuyahoga County				X

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP–2005–0009; FRL–7695–3]

Quinoxyfen; Pesticide Tolerances for Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes time-limited tolerances for residues of quinoxyfen in or on vegetable, cucurbit, subgroup 9A; pumpkin; and squash, winter. This action is in response to EPA's granting of an emergency exemption under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) authorizing use of the pesticide on melons, winter squash, and pumpkins. This regulation establishes a maximum permissible level for residues of quinoxyfen in these food commodities. These tolerances will expire and are revoked on December 31, 2007.

DATES: This regulation is effective January 28, 2005. Objections and requests for hearings must be received on or before March 29, 2005.

ADDRESSES: To submit a written objection or hearing request follow the detailed instructions as provided in Unit VII. of the **SUPPLEMENTARY INFORMATION.** EPA has established a docket for this action under Docket identification (ID) number OPP–2005–0009. All documents in the docket are listed in the EDOCKET index at *http://www.epa.gov/edocket.* Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in EDOCKET or in hard copy at the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1801 S. Bell St., Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT: Barbara Madden, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 305–6463; e-mail address: *madden.barbara@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS 111)
- Animal production (NAICS 112)
- Food manufacturing (NAICS 311)
- Pesticide manufacturing (NAICS 32532)

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Access Electronic Copies of this Document and Other Related Information?

In addition to using EDOCKET *(http://www.epa.gov/edocket/)*, you may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr/*. A frequently updated electronic version of 40 CFR part 180 is available at E-CFR Beta Site Two at *http://www.gpoaccess.gov/ecfr/*.

II. Background and Statutory Findings

EPA, on its own initiative, in accordance with sections 408(e) and 408 (l)(6) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a,

is establishing tolerances for residues of the fungicide quinoxyfen, 5,7-dichloro-4-(4-fluorophenoxy)quinoline, in or on vegetable, cucurbit, subgroup 9A; pumpkin; and squash, winter at 0.30 parts per million (ppm). These tolerances will expire and are revoked on December 31, 2007. EPA will publish a document in the **Federal Register** to remove the revoked tolerance from the Code of Federal Regulations.

Section 408(l)(6) of the FFDCA requires EPA to establish a time-limited tolerance or exemption from the requirement for a tolerance for pesticide chemical residues in food that will result from the use of a pesticide under an emergency exemption granted by EPA under section 18 of FIFRA. Such tolerances can be established without providing notice or period for public comment. EPA does not intend for its actions on section 18 related tolerances to set binding precedents for the application of section 408 of the FFDCA and the new safety standard to other tolerances and exemptions. Section 408(e) of the FFDCA allows EPA to establish a tolerance or an exemption from the requirement of a tolerance on its own initiative, i.e., without having received any petition from an outside party.

Section 408(b)(2)(A)(i) of the FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is ''safe.'' Section 408(b)(2)(A)(ii) of the FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of the FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .''

Section 18 of the FIFRA authorizes EPA to exempt any Federal or State agency from any provision of FIFRA, if EPA determines that ''emergency conditions exist which require such exemption.'' This provision was not amended by the Food Quality Protection Act of 1996 (FQPA). EPA has established regulations governing such emergency exemptions in 40 CFR part 166.

III. Emergency Exemption for Quinoxyfen on Melons, Winter Squash, and Pumpkins and FFDCA Tolerances

There are protectant fungicides registered that are effective in controlling powdery mildew on the upper leaf surfaces of melons, winter squash and pumpkins when the fungicide is in direct contact with the pathogen. However, these fungicides do not provide protection against the pathogen growing on the undersides of the leaves. During the 2003 growing season, resistance of powdery mildew control from the systemic registered alternatives (strobilurins and myclobutanil) was confirmed. The registered strobilurins and myclobutanil proved to be ineffective in controlling powdery mildew in melons, winter squash and pumpkins. The Agency believes that under high disease pressure and disease favorable weather conditions 20–30 percent yield losses are likely without the use of quinoxyfen. EPA has authorized under FIFRA section 18 the use of quinoxyfen on melons, winter squash, and pumpkins for control of powdery mildew in New York. After having reviewed the submission, EPA concurs that emergency conditions exist for this State.

As part of its assessment of this emergency exemption, EPA assessed the potential risks presented by residues of quinoxyfen in or on cantaloupe, muskmelon, watermelon, watermelon juice, winter squash, pumpkin and pumpkin seed. In doing so, EPA considered the safety standard in section 408(b)(2) of the FFDCA, and EPA decided that the necessary tolerance under section 408(l)(6) of the FFDCA would be consistent with the safety standard and with FIFRA section 18. Consistent with the need to move quickly on the emergency exemption in order to address an urgent non-routine situation and to ensure that the resulting food is safe and lawful, EPA is issuing this tolerance without notice and opportunity for public comment as provided in section 408(l)(6) of the FFDCA. Although this tolerance will expire and is revoked on December 31, 2007, under section 408(l)(5) of the FFDCA, residues of the pesticide not in excess of the amounts specified in the tolerance remaining in or on melon subgroup 9A, pumpkin and winter squash after that date will not be unlawful, provided the pesticide is applied in a manner that was lawful under FIFRA, and the residues do not exceed a level that was authorized by this tolerance at the time of that application. EPA will take action to revoke this tolerance earlier if any experience with, scientific data on, or other relevant information on this pesticide indicate that the residues are not safe.

Because this tolerance is being approved under emergency conditions, EPA has not made any decisions about whether quinoxyfen meets EPA's registration requirements for use on melons, winter squash, and pumpkins or whether a permanent tolerance for these uses would be appropriate. Under these circumstances, EPA does not believe that these tolerances serve as a basis for registration of quinoxyfen by a State for special local needs under FIFRA section 24(c). Nor do these tolerances serve as the basis for any State other than New York to use this pesticide on these crops under section 18 of FIFRA without following all provisions of EPA's regulations implementing FIFRA section 18 as identified in 40 CFR part 166. For additional information regarding the emergency exemption for quinoxyfen, contact the Agency's Registration Division at the address provided under **FOR FURTHER INFORMATION CONTACT**.

IV. Aggregate Risk Assessment and Determination of Safety

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. For further discussion of the regulatory requirements of section 408 of the FFDCA and a complete description of the risk assessment process, see the final rule on Bifenthrin Pesticide Tolerances (62 FR 62961, November 26, 1997) (FRL–5754–7).

Consistent with section 408(b)(2)(D) of the FFDCA, EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of quinoxyfen and to make a determination on aggregate exposure, consistent with section 408(b)(2) of the FFDCA, for a time-limited tolerance for residues of quinoxyfen in or on vegetable, cucurbit, subgroup 9A; pumpkin; and squash, winter at 0.30 ppm. EPA's assessment of the dietary exposures and risks associated with establishing the tolerance follows.

A. Toxicological Endpoints

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. The toxicology database for quinoxyfen is complete. EPA has considered available information concerning the variability of the sensitivities of major identifiable

subgroups of consumers, including infants and children. The nature of the toxic effects caused by quinoxyfen are fully discussed in a **Federal Register** Notice published on September 29, 2003 (68 FR 55849) that established tolerances for residues of quinoxyfen on cherries, grapes and hops. Please refer to that document for a complete discussion of the no observed adverse effect level (NOAEL) and the lowest observed adverse effect level (LOAEL) from the toxicity studies reviewed.

The dose, typically the NOAEL, from the toxicology study identified as appropriate for use in risk assessment is used to estimate the toxicological endpoint. However, the lowest dose at which adverse effects of concern are identified the LOAEL is sometimes used for risk assessment if no NOAEL was achieved in the toxicology study selected. An uncertainty factor (UF) is applied to reflect uncertainties inherent in the extrapolation from laboratory animal data to humans and in the variations in sensitivity among members of the human population as well as other unknowns. An UF of 100 is routinely used, 10X to account for interspecies differences and 10X for intraspecies differences.

For dietary risk assessment (other than cancer) the Agency uses the UF to calculate an acute or chronic reference dose (acute RfD or chronic RfD) where the RfD is equal to the NOAEL divided by the appropriate UF (RfD = NOAEL/UF). Where an additional safety factor (SF) is retained due to concerns unique to the FQPA, this additional factor is applied to the RfD by dividing the RfD by such additional factor. The acute or chronic Population Adjusted Dose (aPAD or cPAD) is a modification of the RfD to accommodate this type of FQPA SF.

For non-dietary risk assessments (other than cancer) the UF is used to determine the level of concern (LOC). For example, when 100 is the appropriate UF (10X to account for interspecies differences and 10X for intraspecies differences) the LOC is 100. To estimate risk, a ratio of the NOAEL to exposures (margin of exposure (MOE) = NOAEL/exposure) is calculated and compared to the LOC.

The linear default risk methodology (Q*) is the primary method currently used by the Agency to quantify carcinogenic risk. The Q* approach assumes that any amount of exposure will lead to some degree of cancer risk. A Q* is calculated and used to estimate risk which represents a probability of occurrence of additional cancer cases (e.g., risk is expressed as 1 x10^{-6} or one in a million). Under certain specific circumstances, MOE calculations will be used for the carcinogenic risk assessment. In thisnon-linear approach, a ''point of departure'' is identified below which carcinogenic effects are not expected. The point of departure is typically a NOAEL based on an endpoint related to cancer effects though it may be a different value derived from the dose response curve. To estimate risk, a ratio of the point of departure to exposure (MOE_{cancer} = point of departure/exposures) is calculated. A summary of the toxicological endpoints for Quinoxyfen used for human risk assessment is shown in the following Table 1:

TABLE 1.—SUMMARY OF TOXICOLOGICAL DOSE AND ENDPOINTS FOR QUINOXYFEN FOR USE IN HUMAN RISK ASSESSMENT

Exposure Scenario	Dose Used in Risk Assessment, UF	FQPA SF* and Level of Concern for Risk Assessment	Study and Toxicological Effects
Acute dietary (females 13-50 years of age) and Acute dietary (general population including infants and children)	Not applicable	Not applicable	There were no toxic effects attributable to a single dose.Therefore, an endpoint of concern was not identified to quantitateacute-dietary risk to the general population or to the subpopulationfemales 13-50 years old
Chronic Dietary (All populations)	NOAEL = 20 milligram/kilogram/day (mg/kg/day)UF = 100 Chronic RfD = 0.20 mg/kg/day	FQPA SF = 1cPAD = chronic RfD/FQPA SF = 0.20 mg/kg/day	Combined chronic toxicity/carcinogenicity study in rat LOAEL = 80 mg/kg/day, based upon increases in severity ofchronic progressive glomerulonephropathy in the males and minimal decreasesin body weight and body weightgain in both sexes
Cancer (oral, dermal, inhalation)	classified as not likely to be carcinogenic to humans	Not applicable	No evidence of carcinogenicity in rats and mice

*The reference to the FQPA SF refers to any additional SF retained due to concerns unique to the FQPA.

B. Exposure Assessment

1. *Dietary exposure from food and feed uses.* Tolerances have been established (40 CFR 180.588) for the residues of quinoxyfen, in or on a variety of raw agricultural commodities including sweet and tart cherries, hops and grapes. Risk assessments were conducted by EPA to assess dietary exposures from quinoxyfen in food as follows:

i. *Acute exposure*. Quantitative Acute dietary risk assessments are performed for a food-use pesticide if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a one day or single exposure. There were no toxic effects attributable to a single dose. Therefore, an endpoint of concern was not identified to quantitate acute-dietary risk to the general population or to the subpopulation females 13–50 years old. As a result, no acute risk is expected from exposure to quinoxyfen and hence no quantitative acute dietary risk assessment was performed.

ii. *Chronic exposure*. In conducting this chronic dietary risk assessment EPA used the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM-FCID™) which incorporates food consumption data as reported by respondents in the USDA 1994–1996

and 1998 nationwide Continuing Surveys of Food Intake by Individuals (CSFII) and accumulated exposure to the chemical for each commodity. The following assumptions were made: An unrefined, Tier 1 chronic-dietary exposure assessment using tolerance-level residues and assuming 100% CT for all proposed commodities, and default DEEM Version 7.76 processing factors for all commodities.

iii. *Cancer*. Quinoxyfen has been classified as not likely to be carcinogenic to humans. Therefore, a quantitative exposure assessment was not conducted to assess cancer risk.

2. *Dietary exposure from drinking water*. The Agency lacks sufficient monitoring exposure data to complete a comprehensive dietary exposure analysis and risk assessment for quinoxyfen in drinking water. Because the Agency does not have comprehensive monitoring data, drinking water concentration estimates are made by reliance on simulation or modeling taking into account data on the physical characteristics of quinoxyfen.

The Agency uses the First Index Reservoir Screening Tool (FIRST) or the Pesticide Root Zone/Exposure Analysis Modeling System (PRZM/EXAMS) to produce estimates of pesticide concentrations in an index reservoir. The Screening Concentrations in Groundwater (SCI-GROW) model is used to predict pesticide concentrations in shallow ground water. For a screening-level assessment for surface water EPA will generally use FIRST (a Tier 1 model) before using PRZM/EXAMS (a Tier 2 model). The FIRST model is a subset of the PRZM/EXAMS model that uses a specific high-end runoff scenario for pesticides. While both FIRST and PRZM/EXAMS incorporate an index reservoir environment, the PRZM/EXAMS model includes a percent crop area factor as an adjustment to account for the maximum percent crop coverage within a watershed or drainage basin.

None of these models include consideration of the impact processing (mixing, dilution, or treatment) of raw water for distribution as drinking water would likely have on the removal of pesticides from the source water. The primary use of these models by the Agency at this stage is to provide a coarse screen for sorting out pesticides for which it is highly unlikely that drinking water concentrations would ever exceed human health levels of concern.

Since the models used are considered to be screening tools in the risk assessment process, the Agency does not use estimated environmental concentrations (EECs) from these models to quantify drinking water exposure and risk as a %RfD or %PAD. Instead drinking water levels of comparison (DWLOCs) are calculated and used as a point of comparison against the model estimates of a pesticide's concentration in water. DWLOCs are theoretical upper limits on a pesticide's concentration in drinking water in light of total aggregate exposure to a pesticide in food, and from residential uses. Since DWLOCs address total aggregate exposure to quinoxyfen they are further discussed in the aggregate risk sections below.

Based on the FIRST and SCI-GROW models the EECs of quinoxyfen for chronic exposures are estimated to be 0.8 parts per billion (ppb) for surface water and 0.006 ppb for ground water.

3. *From non-dietary exposure*. The term ''residential exposure'' is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets). Quinoxyfen is not registered for use on any sites that would result in residential exposure.

4. *Cumulative exposure to substances with a common mechanism oftoxicity*. Section 408(b)(2)(D)(v) of the FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider ''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.''

EPA does not have, at this time, available data to determine whether quinoxyfen has a common mechanism of toxicity with other substances or how to include this pesticide in a cumulative risk assessment. Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, quinoxyfen does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has not assumed that quinoxyfen has a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see the final rule for Bifenthrin Pesticide Tolerances (62 FR 62961, November 26, 1997).

C. Safety Factor for Infants and Children

1. *In general*. Section 408 of the FFDCA provides that EPA shall apply an additional tenfold margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the data base on toxicity and exposure unless EPA determines that a different margin of safety will be safe for infants and children. Margins of safety are incorporated into EPA risk assessments either directly through use of a MOE analysis or through using uncertainty (safety) factors in calculating a dose level that poses no appreciable risk to humans.

2. *Developmental toxicity studies*. In a prenatal developmental study in rats the Maternal and Developmental NOAELs were 1,000 mg/kg/day and no LOAELs were identified. In a prenatal developmental study in rabbits the Maternal NOAEL was 80 mg/kg/day and the LOAEL was 200 mg/kg/day based on inanition, clinical signs, decreased body weights, body weight gains, and food consumption and on increased incidences of abortion. The Developmental NOAEL is 80 mg/kg/day and the LOAEL is 200 mg/kg/day based on increased incidences of abortion.

3. *Reproductive toxicity study*. In a reproduction toxicity study in rats the Parental/Systemic NOAEL was 100 mg/kg/day and no LOAEL was identified. The Reproductive NOAEL was 100 mg/kg/day and no LOAEL was identified. The Offspring NOAEL was 20 mg/kg/day and the LOAEL was 100 mg/kg/day based on a minimal decrease in F_{1a} pup weights.

4. *Prenatal and postnatal sensitivity.* There is no quantitative or qualitative evidence of increased susceptibility of rat and rabbit fetuses to *in utero* exposure in developmental studies. There is evidence of increased quantitative susceptibility (minimal decrease in F_{1a} pup weights) in the rat multi-generation reproduction study, but the concern is low since: (1) The effects in pups are well-characterized with a clear NOAEL; (2) the pup effects are minimal at the LOAEL and only noted in the first-generation offspring; and, (3) the doses and endpoints selected for regulatory purposes would address the concerns of the pup effects noted in the rat reproduction study. Therefore, there are no residual uncertainties for prenatal/postnatal toxicity in this study.

5. *Conclusion*. There is a complete toxicity data base for quinoxyfen and exposure data are complete or are estimated based on data that reasonably

accounts for potential exposures. There are no residual uncertainties for prenatal/postnatal toxicity. No additional safety factor is needed for database uncertainties. No clinical sign of neurotoxicity or neuropathology was seen in the data base. A developmental neurotoxicity study is not required. Therefore, EPA determined that the 10X SF to protect infants and children should be reduced to 1X.

D. Aggregate Risks and Determination of Safety

To estimate total aggregate exposure to a pesticide from food, drinking water, and residential uses, the Agency calculates DWLOCs which are used as a point of comparison against the model estimates of a pesticide's concentration in water (EECs). DWLOC values are not regulatory standards for drinking water. DWLOCs are theoretical upper limits on a pesticide's concentration in drinking water in light of total aggregate exposure to a pesticide in food and residential uses. In calculating a DWLOC, the Agency determines how much of the acceptable exposure (i.e., the PAD) is available for exposure through drinking water e.g., allowable chronic water exposure (mg/kg/day) = cPAD - (average food + chronic non-dietary, non-occupational exposure). This allowable exposure through drinking water is used to calculate a DWLOC.

A DWLOC will vary depending on the toxic endpoint, drinking water consumption, and body weights. Default body weights and consumption values as used by the USEPA Office of Water are used to calculate DWLOCs: 2 liter (L)/70 kg (adult male), 2L/60 kg (adult female), and 1L/10 kg (child). Default body weights and drinking water consumption values vary on an individual basis. This variation will be taken into account in more refined screening-level and quantitative drinking water exposure assessments. Different populations will have different DWLOCs. Generally, a DWLOC is calculated for each type of risk assessment used: Acute, short-term, intermediate-term, chronic, and cancer.

When EECs for surface water and groundwater are less than the calculated DWLOCs, OPP concludes with reasonable certainty that exposures to quinoxyfen in drinking water (when considered along with other sources of exposure for which OPP has reliable data) would not result in unacceptable levels of aggregate human health risk at this time. Because OPP considers the aggregate risk resulting from multiple exposure pathways associated with a pesticide's uses, levels of comparison in drinking water may vary as those uses change. If new uses are added in the future, OPP will reassess the potential impacts of quinoxyfen on drinking water as a part of the aggregate risk assessment process.

1. *Acute risk*. An endpoint of concern was not identified to quantitate acute-dietary risk to the general population or to the subpopulation females 13–50 years old. As a result, no acute risk is expected from exposure to quinoxyfen.

2. *Chronic risk*. Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that exposure to quinoxyfen from food will utilize less than 1% of the cPAD for the U.S. population, 1% of the cPAD for all infants (<1 year old) and 2% of the cPAD for children (1–2 years old), the children subpopulation at greatest exposure. There are no residential uses for quinoxyfen that result in chronic residential exposure to quinoxyfen. In addition, there is potential for chronic dietary exposure to quinoxyfen in drinking water. After calculating DWLOCs and comparing them to the EECs for surface and ground water, EPA does not expect the aggregate exposure to exceed 100% of the cPAD, as shown in Table 2 of this unit:

TABLE 2.—AGGREGATE RISK ASSESSMENT FOR CHRONIC (NON-CANCER) EXPOSURE TO QUINOXYFEN

Population Subgroup	cPAD mg/kg/day	% cPAD	(Food) Surface Water EEC (ppb)	Ground Water EEC (ppb)	Chronic DWLOC (ppb)
U.S. population	0.20	<1%	0.8	0.006	7000
All Infants (<1 year old)	0.20	1%	0.8	0.006	2000
Children (1-2 years old)	0.20	2%	0.8	0.006	2000

3. *Short-term and Intermediate-term risks*. Short- and intermediate-term aggregate exposure take into account non-dietary, non-occupational plus chronic exposure to food and water (considered to be a background exposure level). Quinoxyfen is not registered for use on any sites that would result in residential exposure. Therefore, the aggregate risk is the sum of the risk from food and water, which were previously addressed.

4. *Aggregate cancer risk for U.S. population*. Quinoxyfen has been classified as not likely to be carcinogenic to humans. Therefore, quinoxyfen is expected to pose at most a negligible cancer risk.

5. *Determination of safety*. Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, and to infants and children from aggregate exposure to quinoxyfen residues.

V. Other Considerations

A. Analytical Enforcement Methodology

IR-4 has proposed a gas chromatography (GC) method with mass-selective detection (MSD) entitled Determination of DE-795 Residues in Grape Wine, Must, and Pomace ERC95.26 (and its supplement S1) for the enforcement of proposed tolerances for residues of quinoxyfen in/on grapes, cherries and hops. Method ERC 95.26 is classified as acceptable and conforms with the criteria of OPPTS GL 860.1340. The petitioner has submitted a study which investigated the behavior of quinoxyfen through MRMs outlined in FDA's Pesticide Analytical Manual (PAM), Volume I, Appendix II. The study summary reported that depending on spike levels, certain MRM Protocols (D, E, and F) yielded partial (incomplete) to complete recoveries of quinoxyfen in grapes (non-fatty matrix) and ground beef (fatty matrix).

The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755–5350; telephone number: (410) 305–2905; e-mail address: *residuemethods@epa.gov*..

B. International Residue Limits

There are no Mexican, Canadian or Codex Maximum Residue Limits (MRLs) established for quinoxyfen on sweet and tart cherries, grapes, or hops. Therefore, no compatibility problems exist for these tolerances.

VI. Conclusion

Therefore, tolerances are established for quinoxyfen, 5,7-dichloro-4-(4-fluorophenoxy)quinoline in or on vegetable, cucurbit, subgroup 9A; pumpkin; and squash, winter at 0.30 ppm.

VII. Objections and Hearing Requests

Under section 408(g) of the FFDCA, as amended by the FQPA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. The EPA procedural regulations which govern the submission of objections and requests for hearings appear in 40 CFR part 178. Although the procedures in those regulations require some modification to reflect the amendments made to the FFDCA by the FQPA, EPA will continue to use those procedures, with appropriate adjustments, until the necessary modifications can be made. The new section 408(g) of the FFDCA provides essentially the same process for persons to ''object'' to a regulation for an exemption from the requirement of a tolerance issued by EPA under new section 408(d) of the FFDCA, as was provided in the old sections 408 and 409 of the FFDCA. However, the period for filing objections is now 60 days, rather than 30 days.

A. What Do I Need to Do to File an Objection or Request a Hearing?

You must file your objection or request a hearing on this regulation in accordance with the instructions provided in this unit and in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number OPP–2005–0009 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk on or before March 29, 2005.

1. *Filing the request.* Your objection must specify the specific provisions in the regulation that you object to, and the grounds for the objections (40 CFR 178.25). If a hearing is requested, the objections must include a statement of the factual issues(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). Information submitted in connection with an objection or hearing request may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the information that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice.

Mail your written request to: Office of the Hearing Clerk (1900L), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001. You may also deliver your request to the Office of the Hearing Clerk in Suite 350, 1099 14th St., NW., Washington, DC 20005. The Office of the Hearing Clerk is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Office of the Hearing Clerk is (202) 564–6255.

2. *Copies for the Docket.* In addition to filing an objection or hearing request with the Hearing Clerk as described in Unit VII..A., you should also send a copy of your request to the PIRIB for its inclusion in the official record that is described in **ADDRESSES**. Mail your copies, identified by the docket ID number OPP–2005–0009, to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001. In person or by courier, bring a copy to the location of the PIRIB described in **ADDRESSES**. You may also send an electronic copy of your request via e-mail to: *opp-docket@epa.gov*. Please use an ASCII file format and avoid the use of special characters and any form of encryption. Copies of electronic objections and hearing requests will also be accepted on disks in WordPerfect 6.1/8.0 or ASCII file format. Do not include any CBI in your electronic copy. You may also submit an electronic copy of your request at many Federal Depository Libraries.

B. When Will the Agency Grant a Request for a Hearing?

A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issues(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

VIII. Statutory and Executive Order Reviews

This final rule establishes time-limited tolerances under section 408 of the FFDCA. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). Nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or OMB review or any Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note). Since tolerances and exemptions that are established on the basis of a FIFRA section 18 exemption under section 408 of the FFDCA, such as the tolerances in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply. In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive order to include regulations that have ''substantial direct effects on the States,

on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' This final rule directly regulates growers, food processors, food handlers, and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of the FFDCA. For these same reasons, the Agency has determined that this rule does not have any ''tribal implications'' as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure ''meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.'' ''Policies that have tribal implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.'' This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

IX. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: January 14, 2005.

Betty Shackleford,

Acting Director, Registration Division, Office of Pesticide Programs.

■ Therefore, 40 CFR chapter I is amended as follows:

PART 180—AMENDED

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Section 180.588 is amended by adding text to paragraph (b) to read as follows:

§ 180.588 Quinoxyfen; tolerances for residues.

* * * * *

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for residues of the fungicide quinoxyfen, 5,7-dichloro-4-(4-fluorophenoxy)quinoline in connection with use of the pesticide under section 18 emergency exemptions granted by EPA. The time-limited tolerances will expire and are revoked on the date specified in the following table:

Commodity	Parts per million	Expiration/ revocation date
Pumpkin	0.30	12/31/07
Squash, winter ..	0.30	12/31/07
Vegetable, cucurbit, subgroup 9A	0.30	12/31/07

* * * * *

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP–2005–0012; FRL–7696–2]

Bifenazate; Pesticide Tolerances for Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes time-limited tolerances for the combined residues of bifenazate in or on timothy hay and timothy forage. This action is in response to EPA's granting of an emergency exemption under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) authorizing use of the pesticide on timothy. This regulation establishes a maximum permissible level for residues of bifenazate in these feed commodities. These tolerances will expire and are revoked on December 31, 2007.

DATES: This regulation is effective January 28, 2005. Objections and requests for hearings must be received on or before March 29, 2005.

ADDRESSES: To submit a written objection or hearing request follow the detailed instructions as provided in Unit VII. of the **SUPPLEMENTARY INFORMATION.** EPA has established a docket for this action under docket identification (ID) number OPP–2005–0012. All documents in the docket are listed in the EDOCKET index at *http://www.epa.gov/edocket.* Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in EDOCKET or in hard copy at the Public Information and Records Integrity Branch (PIRIB), Rm. 119, Crystal Mall #2, 1801 S. Bell St., Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT: Barbara Madden, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 305–6463; e-mail address: *Madden.Barbara@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS code 111)
- Animal production (NAICS code 112)
- Food manufacturing (NAICS code 311)
- Pesticide manufacturing (NAICS code 32532)

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also

be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. To determine whether you or your business may be affected by this action, you should carefully examine the applicability provisions in the section above. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Access Electronic Copies of this Document and Other Related Information?

In addition to using EDOCKET *(http://www.epa.gov/edocket/)*, you may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr/*. A frequently updated electronic version of 40 CFR part 180 is available at E-CFR Beta Site Two at *http://www.gpoaccess.gov/ecfr/*.

II. Background and Statutory Findings

EPA, on its own initiative, in accordance with sections 408(e) and 408(l)(6) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, is establishing tolerances for the combined residues of the insecticide bifenazate, (1-methylethyl 2-(4-methoxy[1,1'-biphenyl]-3-yl)hydrazinecarboxylate) and diazinecarboxylic acid, 2-(4-methoxy-[1,1'-biphenyl]-3-yl, 1-methylethyl ester, in or on timothy, hay at 150 parts per million (ppm) and timothy, forage at 50 ppm. These tolerances will expire and are revoked on December 31, 2007. EPA will publish a document in the **Federal Register** to remove the revoked tolerances from the Code of Federal Regulations.

Section 408(l)(6) of the FFDCA requires EPA to establish a time-limited tolerance or exemption from the requirement for a tolerance for pesticide chemical residues in food that will result from the use of a pesticide under an emergency exemption granted by EPA under section 18 of FIFRA. Such tolerances can be established without providing notice or period for public comment. EPA does not intend for its actions on section 18 related tolerances to set binding precedents for the application of section 408 of the FFDCA and the new safety standard to other tolerances and exemptions. Section 408(e) of the FFDCA allows EPA to establish a tolerance or an exemption from the requirement of a tolerance on its own initiative, i.e., without having received any petition from an outside party.

Section 408(b)(2)(A)(i) of the FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is ''safe.'' Section 408(b)(2)(A)(ii) of the FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of the FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .''

Section 18 of the FIFRA authorizes EPA to exempt any Federal or State agency from any provision of FIFRA, if EPA determines that ''emergency conditions exist which require such exemption.'' This provision was not amended by the Food Quality Protection Act of 1996 (FQPA). EPA has established regulations governing such emergency exemptions in 40 CFR part 166.

EPA has received objections to a tolerance it established for bifenazate on a different food commodity. The objections were filed by the Natural Resources Defense Council (NRDC) and raised several issues regarding aggregate exposure estimates and the additional safety factor for the protection of infants and children. Although these objections concern separate rulemaking proceedings under the FFDCA, EPA has considered whether it is appropriate to establish this emergency exemption tolerance for bifenazate while the objections are still pending.

Factors taken into account by EPA included how close the Agency is to concluding the proceedings on the objections, the nature of the current action, whether NRDC's objections raised frivolous issues, and extent to which the issues raised by NRDC had already been considered by EPA. Although NRDC's objections are not frivolous, the other factors all support establishing this tolerance at this time. First, the objections proceeding is unlikely to conclude prior to when action is necessary on this petition. NRDC's objections raise complex legal, scientific, policy, and factual matters. EPA has published a notice describing the nature of the NRDC's objections in more detail. This notice offered an opportunity for the public to comment on this matter and published in the **Federal Register** of June 19, 2002 (67 FR 41628) (FRL–7167–7). EPA is now examining the extensive comments received. Second, the nature of the current action is extremely time-sensitive and addresses an emergency situation. Third, the issues raised by NRDC are not new matters but questions that have been the subject of considerable study by EPA and comment by stakeholders. Accordingly, EPA is proceeding with establishing the tolerance for bifenazate.

III. Emergency Exemption for Bifenazate on Timothy and FFDCA Tolerances

The banks grass mite became a pest of economic significance for timothy growers beginning in 2002 when it was recognized that the pest had developed resistance to the registered alternatives. Based on information submitted by the State, without the use of bifenazate to control banks grass mites, many timothy growers will experience significant economic losses. Dietary risk will be minimal because the bulk of the treated hay will be used as horse feed. EPA has authorized under FIFRA section 18 the use of bifenazate on timothy, hay and timothy, forage for control of banks grass mites in Nevada. After having reviewed the submission, EPA concurs that emergency conditions exist for this State.

As part of its assessment of this emergency exemption, EPA assessed the potential risks presented by residues of bifenazate in or on timothy. In doing so, EPA considered the safety standard in section 408(b)(2) of the FFDCA, and EPA decided that the necessary tolerance under section 408(l)(6) of the FFDCA would be consistent with the safety standard and with FIFRA section 18. Consistent with the need to move quickly on the emergency exemption in order to address an urgent non-routine situation and to ensure that the resulting food is safe and lawful, EPA is issuing this tolerance without notice and opportunity for public comment as provided in section 408(l)(6) of the FFDCA. Although these tolerances will expire and are revoked on December 31, 2007, under section 408(l)(5) of the FFDCA, residues of the pesticide not in excess of the amounts specified in the tolerance remaining in or on timothy, hay and timothy, forage after that date will not be unlawful, provided the pesticide is applied in a manner that was lawful under FIFRA, and the

residues do not exceed a level that was authorized by these tolerances at the time of that application. EPA will take action to revoke these tolerances earlier if any experience with, scientific data on, or other relevant information on this pesticide indicate that the residues are not safe.

Because these tolerances are being approved under emergency conditions, EPA has not made any decisions about whether bifenazate meets EPA's registration requirements for use on timothy or whether a permanent tolerance for this use would be appropriate. Under these circumstances, EPA does not believe that these tolerances serve as a basis for registration of bifenazate by a State for special local needs under FIFRA section 24(c). Nor do these tolerances serve as the basis for any State other than Nevada to use this pesticide on this crop under section 18 of FIFRA without following all provisions of EPA's regulations implementing FIFRA section 18 as identified in 40 CFR part 166. For additional information regarding the emergency exemption for bifenazate, contact the Agency's Registration Division at the address provided under **FOR FURTHER INFORMATION CONTACT**.

IV. Aggregate Risk Assessment and Determination of Safety

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. For further discussion of the regulatory requirements of section 408 of the FFDCA and a complete description of the risk assessment process, see the final rule on Bifenthrin Pesticide Tolerances (62 FR 62961, November 26, 1997) (FRL–5754–7).

Consistent with section 408(b)(2)(D) of the FFDCA, EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of bifenazate and to make a determination on aggregate exposure, consistent with section 408(b)(2) of the FFDCA, for time-limited tolerances for the combined residues of bifenazate, (1-methylethyl 2-(4-methoxy[1,1'-biphenyl]-3-yl)hydrazinecarboxylate) and diazinecarboxylic acid, 2-(4-methoxy-[1,1'-biphenyl]-3-yl, 1-methylethyl ester, in or on timothy, hay at 150 ppm and timothy, forage at 50 ppm.

Timothy is a member of the grass, forage, fodder, and hay crop group. No timothy residue data were submitted for this specific emergency exemption request. The proposed use rate of bifenazate for timothy is similar to rates for registered uses. Based on data contained in the Food and Feed Crops of the United States (second edition; forage grass monograph), approximately 3,700 pounds of hay may be produced per acre. Based on the application rate of 0.50 lbs per acre and the expected hay production, a theoretical bifenazate residue of 135 ppm was calculated. Assuming 25% dry matter content for forage and a 80% dry matter content for hay, a theoretical residue of 42 ppm was calculated for timothy, forage. To ensure that the tolerance levels are adequate, the Agency is establishing levels slightly higher than estimated (150 ppm for timothy, hay and 50 ppm for timothy, forage).

Under the emergency exemption, timothy is being grown as a premium feed for race horses. However, it is possible that a fraction of the treated crop may be diverted to cattle (timothy is not a poultry feed crop). Timothy is not consumed by humans, any inadvertent exposure to residues of bifenazate from this emergency exemption will result from the consumption of meat or milk. Currently there are bifenazate tolerances established for residues of bifenazate in or on ruminant meat, meat byproducts, milk and fat. These tolerances are based on conservative assumptions that the entire livestock diet contains tolerance level residues of bifenazate. Therefore, the Agency has concluded that the established ruminant tolerances are sufficient to cover any dietary exposure to bifenazate resulting from the requested timothy use.

Residues of bifenazate in or on timothy are not expected to increase dietary exposure. The use of bifenazate on timothy is not expected to result in exceedances of the tolerances that already exist for meat and milk. Therefore, establishing the timothy tolerances will not increase the most recent estimated aggregate risks resulting from use of bifenazate, as discussed in the February 4, 2004 **Federal Register** (69 FR 5289, FRL–7335–6) Final Rule establishing tolerances for combined residues of bifenazate, (hydrazine carboxylic acid, 2-(4-methoxy-[1,1'-biphenyl]-3-yl-, 1-methylethyl ester) and diazenecarboxylic acid, 2-(4-methoxy-[1,1'-biphenyl]-3-yl-, 1-methylethyl ester in or on potatoes, because in that prior action, risk was estimated assuming all meat and milk products contained tolerance level residues. Refer to the February 4, 2004 **Federal Register** document for a detailed discussion of the aggregate risk assessments and determination of safety. EPA relies upon that risk assessment and the findings made in the **Federal Register** document in support of this action. Below is a brief summary of the aggregate risk assessment.

An endpoint for acute dietary exposure was not identified since no effects were observed that could be attributable to a single dose in oral toxicity studies, including developmental and maternal toxicity in the developmental toxicity studies. Therefore, an acute dietary risk assessment was not conducted.

Using the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM-FCID™) an analysis evaluated the individual food consumption as reported by respondents in the United States Department of Agriculture 1994–1996 and 1998 nationwide Continuing Surveys of Food Intake by Individuals (CSFII) and accumulated exposure to bifenazate for each commodity. The chronic dietary exposure analysis assumed tolerance level residues and 100% crop treated for all registered and proposed crops excluding tomato where average field trial residues were used. DEEM™ (ver 7.73) default processing factors were assumed for all commodities excluding apple juice, grape juice, wine/sherry, tomato paste, and tomato puree. The processing factors for these commodities were reduced to 0.23, 0.17, 0.17, 5.0, and 5.0, respectively, based on data from processing studies.

Using the exposure assumptions described, EPA concluded that exposure to bifenazate from food will utilize 25% of the cPAD for the U.S. population, 60% of the cPAD for all infants <1 year old, 86% of the cPAD for children 1–2 years old (the most highly exposed population subgroup), and 17% of the cPAD for females 13–49 years old. Based on the use pattern, chronic residential exposure to residues of bifenazate is not expected. However, there is potential for chronic dietary exposure to bifenazate in drinking water. After calculating DWLOCs and comparing them to the EECs for surface water and ground water, EPA does not expect the aggregate exposure to exceed 100% of the cPAD, as shown in Table 1:

TABLE 1.—AGGREGATE RISK ASSESSMENT FOR CHRONIC (NON-CANCER) EXPOSURE TO BIFENAZATE

Population Subgroup	cPAD mg/kg/day	%cPAD (Food)	Surface Water EEC (ppb)	Ground Water EEC (ppb)	Chronic DWLOC (ppb)
U.S. population	0.01	25	6.4	<0.001	260
All Infants (<1 year old)	0.01	60	6.4	<0.001	75
Children (1–2 years old)	0.01	86	6.4	<0.001	14
Females (13–49 years old)	0.01	17	6.4	<0.001	290

Short-term and intermediate-term aggregate exposure takes into account residential exposure plus chronic exposure to food and water (considered to be a background exposure level).

Bifenazate is currently registered for use on the following residential non-dietary sites: Commercial application to ornamental plants (including bedding plants, flowering plants, foliage plants, bulb crops, perennials, trees and shrubs; not turf) and all fruit trees which will not bear fruit for a minimum of 12 months as well as application by residents/homeowners. EPA anticipates only short-term dermal and short-term inhalation exposure from the residential uses. The Agency assumed that residential applications will be made via pump up sprayers, garden hose-end sprayers or similar ''homeowner'' pesticide devices. Exposure from a hose-end sprayer was assessed rather than that of a compressed air sprayer. For the treatment of shrubs and ornamentals, EPA assumed 100 gallons of finish spray are applied per day. The unit exposure value for a residential handler using open pour mixing/loading for a garden hose-end sprayer is 11 milligrams/pound (mg/lb) handled (dermal) and 0.013 mg/lb handled. Exposures were calculated using the Agency's draft Residential Standard Operating Procedures.

Using the exposure assumptions described for short-term exposures, EPA concluded that food and residential exposures aggregated result in aggregate MOEs of 2,000 for the U.S. population, 2,100 for youth 13–19 years old, 2,400 for adults 20–49 years old, 2,200 for females 13–49 years old, and 2,300 for adults 50+ years old. These aggregate MOEs do not exceed the Agency's level of concern for aggregate exposure to food and residential uses. In addition, short-term DWLOCs were calculated and compared to the EECs for chronic exposure of bifenazate in ground water and surface water. After calculating DWLOCs and comparing them to the EECs for surface water and ground water, EPA does not expect short-term aggregate exposure to exceed the Agency's level of concern, as shown in Table 2:

TABLE 2.—AGGREGATE RISK ASSESSMENT FOR SHORT-TERMEXPOSURE TO BIFENAZATE

Population Subgroup	Aggregate MOE (Food + Residential)	Aggregate Level of Concern (LOC)	Surface Water EEC (ppb)	Ground Water EEC (ppb)	Short-Term DWLOC (ppb)
U.S. population	2,000	100	6.4	<0.001	3,500
Youth, (13–19 years old)	2,100	100	6.4	<0.001	3,000
Adults, (20–49 years old)	2,400	100	6.4	<0.001	3,500
Females, (13–49 year old)	2,200	100	6.4	<0.001	3,000
Adults (50+ years old)	2,300	100	6.4	<0.001	3,500

Intermediate-term aggregate exposure takes into account non-dietary, non-occupational exposure plus chronic exposure to food and water (considered to be a background exposure level). Residential intermediate-term aggregate exposure (30 days to 6 months) is not expected from use of this chemical. Thus, the intermediate-term risk for the public consists of food and water exposures which were previously addressed.

EPA has classified bifenazate as ''not likely'' to be a human carcinogen. Therefore, a cancer dietary exposure and risk assessment was not performed.

Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, and to infants and children from aggregate exposure to bifenazate residues.

V. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodology (example—gas chromatography) is available to enforce the tolerance expression. The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755–5350; telephone number: (410) 305–2905; e-mail address: *residuemethods@epa.gov*.

B. International Residue Limits

Canada, Codex, and Mexico do not have maximum residue limits for residues of bifenazate in/on the proposed crop. Therefore, harmonization is not an issue.

VI. Conclusion

Therefore, tolerances are established for the combined residues of bifenazate, (1-methylethyl 2-(4-methoxy[1,1'-biphenyl]-3-yl)hydrazinecarboxylate) and diazinecarboxylic acid, 2-(4-methoxy-[1,1'-biphenyl]3-yl, 1-methylethyl ester, in or on timothy, hay at 150 ppm and timothy, forage at 50 ppm.

VII. Objections and Hearing Requests

Under section 408(g) of the FFDCA, as amended by the FQPA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. The EPA procedural regulations which govern the submission of objections and requests for hearings appear in 40 CFR part 178. Although the procedures in those regulations require some modification to reflect the amendments made to the FFDCA by the FQPA, EPA will continue to use those procedures, with appropriate adjustments, until the necessary modifications can be made. The new section 408(g) of the FFDCA provides essentially the same process for persons to ''object'' to a regulation for an exemption from the requirement of a tolerance issued by EPA under new section 408(d) of the FFDCA, as was provided in the old sections 408 and 409 of the FFDCA. However, the period for filing objections is now 60 days, rather than 30 days.

A. What Do I Need to Do to File an Objection or Request a Hearing?

You must file your objection or request a hearing on this regulation in accordance with the instructions provided in this unit and in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number OPP–2005–0012 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk on or before March 29, 2005.

1. *Filing the request.* Your objection must specify the specific provisions in the regulation that you object to, and the grounds for the objections (40 CFR 178.25). If a hearing is requested, the objections must include a statement of the factual issues(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). Information submitted in connection with an objection or hearing request may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the information that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice.

Mail your written request to: Office of the Hearing Clerk (1900L), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001. You may also deliver your request to the Office of the Hearing Clerk in Suite 350, 1099 14th St., NW., Washington, DC 20005. The Office of the Hearing Clerk is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Office of the Hearing Clerk is (202) 564–6255.

2. *Copies for the Docket.* In addition to filing an objection or hearing request with the Hearing Clerk as described in Unit VII.A., you should also send a copy of your request to the PIRIB for its inclusion in the official record that is described in **ADDRESSES**. Mail your copies, identified by the docket ID number OPP–2005–0012, to: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001. In person or by courier, bring a copy to the location of the PIRIB described in **ADDRESSES**. You may also send an electronic copy of your request via e-mail to: *opp-docket@epa.gov*. Please use an ASCII file format and avoid the use of special characters and any form of encryption. Copies of electronic objections and hearing requests will also be accepted on disks in WordPerfect 6.1/8.0 or ASCII file format. Do not include any CBI in your electronic copy. You may also submit an electronic copy of your request at many Federal Depository Libraries.

B. When Will the Agency Grant a Request for a Hearing?

A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issues(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

VIII. Statutory and Executive Order Reviews

This final rule establishes time-limited tolerances under section 408 of the FFDCA. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). Nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or OMB review or any Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note). Since tolerances and exemptions that are established on the basis of a FIFRA section 18 exemption under section 408 of the FFDCA, such as the tolerances in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply. In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' This final rule directly regulates growers, food processors, food handlers, and food retailers, not States. This action does not

alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of the FFDCA. For these same reasons, the Agency has determined that this rule does not have any ''tribal implications'' as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure ''meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.'' ''Policies that have tribal implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.'' This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

IX. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: January 14, 2005.

Betty Shackleford,

Acting Director, Registration Division, Office of Pesticide Programs.

■ Therefore, 40 CFR chapter I is amended as follows:

PART 180—AMENDED

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Section 180.572 is amended by alphabetically adding commodities to the table in paragraph (b) to read as follows:

§ 180.572 Bifenazate; tolerances for residues.

* * * * *

(b) * * *

Commodity	Parts per million	Expiration/ Revocation Date
* *	* *	*
Timothy, forage	50	12/31/07
Timothy, hay	150	12/31/07
* *	* *	*

[DA 05–36; MB Docket No. 03–181, RM–10758, and RM–11123]

Radio Broadcasting Services; Blanchard, Elmore City, Weatherford and Wynnewood, OK

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Audio Division, at the request of Wright Broadcasting Systems, Inc., licensee of FM Station KWEY, Channel 247C1, Weatherford, Oklahoma, deletes Channel 247C1 at Weatherford, Oklahoma, from the FM Table of Allotments, allots Channel 247A at Blanchard, Oklahoma, as the community's first local FM service, and modifies the license of FM Station KWEY to specify operation on Channel 247A at Blanchard. Channel 247A can be allotted to Blanchard, Oklahoma, in compliance with the Commission's minimum distance separation requirements with a site restriction of 2.1 km (1.3 miles) southwest of Blanchard. The coordinates for Channel 247A at Blanchard, Oklahoma, are 35–07–21 North Latitude and 97–40–18 West Longitude.

DATES: Effective February 25, 2005.

FOR FURTHER INFORMATION CONTACT: Deborah Dupont, Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Report and Order*, MB Docket No. 03–181, adopted January 5, 2005, and released January 10, 2005. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Information Center, Portals II, 445 12th Street, SW., Room CY–A257, Washington, DC 20554. The complete text of this decision also may be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., 445 12th Street, SW., Room CY–B402, Washington, DC 20554, (800) 378–3160, or via the company's Web site, *http://www.bcpiweb.com*. The Commission will send a copy of this *Report and Order* in a report to be sent to Congress and the General Accountability Office pursuant to the Congressional Review Act, *see* U.S.C. 801(a)(1)(A).

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 05–44 MB Docket No. 03–231, RM–10818]

Radio Broadcasting Services; Centre Hall, Huntingdon, Mount Union, PA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Audio Division, at the request of Megahertz Licenses, LLC, licensee of FM Stations WXMJ, Channel 258A, Mount Union, Pennsylvania, and WLLY, Channel 292A, Huntingdon, Pennsylvania, deletes Channel 292A at Huntingdon, Pennsylvania, and Channel 258A at Mount Union, Pennsylvania, from the FM Table of Allotments, allots Channel 258A at Centre Hall, Pennsylvania, as the community's first local FM service, allots Channel 292A at Mount Union, Pennsylvania, modifies the license of FM Stations WXMJ to specify operation on Channel 258A at Centre Hall, Pennsylvania, and modifies the License of FM Station WLLY to specify operation Channel 292A at Mount Union. Channel 258A can be allotted to Centre Hall, Pennsylvania, in compliance with the Commission's minimum distance separation requirements without site restriction at center city reference coordinates. The coordinates for Channel 258A at Centre Hall, Pennsylvania, are 40–50–50 North Latitude and 77–51–41 West Longitude. Channel 292A can be allotted to Mount Union, Pennsylvania with a site restriction of 14.5 km (9.0 miles) south of Mount Union. The coordinates for Channel 292A at Mount Union, Pennsylvania, are 40–15–18 North Latitude and 77–51–41 West Longitude. Centre Hall, Mount Union, and Huntingdon, Pennsylvania, all are located within 320 kilometers (199 miles) of the Canadian border, and therefore Canadian concurrence in the allotment changes will be required. Although concurrence has been requested for these allotment changes, notification has not been received. If a construction permit is granted for Centre Hall or Mount Union prior to the receipt of formal concurrence in the corresponding channel allotment by the Canadian government, the construction permit will include the following condition. ''Operation with the facilities specified for [Centre Hall or Mount Union] herein is subject to modification, suspension, or termination without right to hearing, if found by the Commission to be necessary in order to conform to the USA-Canada FM Broadcast Agreement.''

DATES: Effective February 25, 2005.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 001005281–0369–02; I.D. 012105A]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; Trip Limit Increase

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Inseason action; trip limit increase.

SUMMARY: NMFS increases the trip limit in the commercial hook-and-line fishery for king mackerel in the Florida east coast subzone from 50 to 75 fish per day in or from the exclusive economic zone (EEZ). This trip limit increase is necessary to maximize the socioeconomic benefits of the quota.

DATES: This rule is effective 12:01 a.m., local time, February 1, 2005, through March 31, 2005.

FOR FURTHER INFORMATION CONTACT: Steve Branstetter, telephone: 727–570–5305, fax: 727–570–5583, e-mail: *Steve.Branstetter@noaa.gov*.

SUPPLEMENTARY INFORMATION: The fishery for coastal migratory pelagic fish (king mackerel, Spanish mackerel, cero, cobia, little tunny, and, in the Gulf of Mexico only, dolphin and bluefish) is managed under the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic (FMP). The FMP was prepared by the Gulf of Mexico and South Atlantic Fishery Management Councils (Councils) and is implemented under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

Based on the Councils' recommended total allowable catch and the allocation ratios in the FMP, on April 30, 2001 (66 FR 17368, March 30, 2001) NMFS implemented a commercial quota of 2.25 million lb (1.02 million kg) for the eastern zone (Florida) of the Gulf migratory group of king mackerel. That quota is further divided into separate quotas for the Florida east coast subzone and the northern and southern Florida west coast subzones. The quota implemented for the Florida east coast subzone is 1,040,625 lb (472,020 kg) (50 CFR 622.42(c)(1)(i)(A)(*1*)).

In accordance with 50 CFR 622.44(a)(2)(i), beginning on February 1, if less than 75 percent of the Florida east coast subzone's quota has been harvested by that date, king mackerel in or from that subzone's EEZ may be possessed on board or landed from a permitted vessel in amounts not exceeding 75 fish per day. The 75–fish daily trip limit will continue until a closure of the subzone's fishery has been affected or the fishing year ends on March 31, 2005.

NMFS has determined that 75 percent of the quota for Gulf group king mackerel for vessels using hook-and-line gear in the Florida east coast subzone was not reached before February 1, 2005. Accordingly, a 75–fish trip limit applies to vessels in the commercial hook-and-line fishery for king mackerel in or from the EEZ in the Florida east coast subzone effective 12:01 a.m., local time, February 1, 2005. The 75–fish trip limit will remain in effect until the fishery closes or until the end of the current fishing season (March 31, 2005) for this subzone. From November 1 through March 31, the Florida east coast subzone of the Gulf group king mackerel is that part of the eastern zone north of 25°20.4′ N. lat. (a line directly east from the Miami-Dade County, FL, boundary).

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, (AA) finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth in 5 U.S.C. 553(b)(B), as such prior notice and opportunity for public comment is unnecessary and contrary to the public interest. Such procedures are unnecessary because the rule itself already has been subject to notice and comment, and all that remains is to notify the public of the trip limit increase. Allowing prior notice and opportunity for public comment is contrary to the public interest because it requires time, thus delaying fishermen's ability to catch more king mackerel than the present trip limit allows and preventing fishermen from reaping the socioeconomic benefits derived from this increase in daily catch.

As this actions allows fishermen to increase their harvest of king mackerel from 50 fish to 75 fish per day in or from the EEZ of the Florida east coast subzone, the AA finds it relieves a restriction and may go into effect on its effective date pursuant to 5 U.S.C. 553(d)(1). This action is taken under 50 CFR 622.43(a) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 24, 2005.

Alan D. Risenhoover,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 05–1610 Filed 1–25–05; 3:08 pm]

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 041202339–4339–01; I.D. 012405C]

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Vessels Catching Pacific Cod for Processing by the Inshore Component in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific cod by vessels catching Pacific cod for processing by the inshore component in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the 2005 interim total allowable catch (TAC) of Pacific cod apportioned to vessels catching Pacific cod for processing by the inshore component of the Central Regulatory Area of the GOA.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), January 26, 2005, until superseded by the notice of 2005 and 2006 final harvest specifications of groundfish of the GOA, which will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone

according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2005 interim TAC of Pacific cod apportioned to vessels catching Pacific cod for processing by the inshore component of the Central Regulatory Area of the GOA is 13,733 metric tons (mt), as established by the 2005 interim harvest specifications for groundfish of the GOA (69 FR 74455, December 14, 2004).

In accordance with § 679.20(d)(1)(i), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2005 interim TAC of Pacific cod apportioned to vessels catching Pacific cod for processing by the inshore component of the Central Regulatory Area of the GOA will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 12,733 mt, and is setting aside the remaining 1,000 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for Pacific cod by vessels catching Pacific cod for processing by the inshore component in the Central Regulatory Area of the GOA.

After the effective date of this closure the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the closure of Pacific cod apportioned to vessels catching Pacific cod for processing by the inshore component of the Central Regulatory Area of the GOA.

The AA also finds good cause to waive the 30 day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 25, 2005.

Alan D. Risenhoover,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 05–1611 Filed 1–25–05; 3:08 pm]

BILLING CODE 3510–22–S

Proposed Rules

Federal Register
Vol. 70, No. 18
Friday, January 28, 2005

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 916 and 917

[Docket No. AO–90–A7; FV05–916–1]

Nectarines and Peaches Grown in California; Hearing on Proposed Amendment of Marketing Agreement Nos. 124 and 85 and Order Nos. 916 and 917

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of hearing on proposed rulemaking.

SUMMARY: Notice is hereby given of a public hearing to receive evidence on proposed amendments to Marketing Agreement Nos. 124 and 85 and Orders Nos. 916 and 917, which regulate the handling of nectarines and peaches grown in California. The amendments are jointly proposed by the Nectarine Administrative Committee (NAC), the Peach Commodity Committee, and the Control Committee (part of M.O. No. 917) (committees), which are responsible for local administration of orders 916 and 917. The proposed amendments to order 917 only apply to peaches. The pear provisions of the order have been suspended since 1994. Because the Pear Commodity Committee and the pear provisions are suspended, the Pear Commodity Committee did not participate in any amendment discussions. The amendments would: update definitions and districts in both orders; increase committee membership of the NAC from eight to thirteen members and modify sections of the order to conform to the increased membership; eliminate the Shippers Advisory Committee (M.O. No. 916); allow the Control Committee under M.O. No. 917 to be suspended if the provisions of one commodity are suspended and transfer applicable duties and responsibilities to the remaining commodity committee; authorize interest and late payment charges on assessments paid late; add authority to recommend different quality and size regulations for different market destinations; and other related amendments. All of the proposals are intended to streamline industry organization and improve the administration, operation, and functioning of the programs.

DATES: The hearing will be held on February 15, 2005, in Fresno, California, beginning at 8:30 a.m. and ending at 4:30 p.m. The hearing will continue, if necessary, on February 16, 2005, commencing at 8:30 a.m.

ADDRESSES: The hearing location is: Fresno Metropolitan Flood Control District, 5469 East Olive Avenue, Fresno, CA 93727, telephone: (559) 456–3292.

FOR FURTHER INFORMATION CONTACT: Melissa Schmaedick, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, P.O. Box 1035, Moab, Utah; telephone: (435) 259–7988, Fax: (435) 259–4945; or Kathleen M. Finn, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue SW., Stop 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, fax (202) 720–8938.

Small businesses may request information on this proceeding by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue SW., Stop 0237, Washington, DC 20250–0237; telephone: (202) 720–2491, fax: (202) 720–8938.

SUPPLEMENTARY INFORMATION: This administrative action is instituted pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the ''Act.'' This action is governed by the provisions of sections 556 and 557 of title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12866.

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) seeks to ensure that within the statutory authority of a program, the regulatory and informational requirements are tailored to the size and nature of small businesses. Interested persons are invited to present evidence at the hearing on the possible regulatory and informational impacts of the proposals on small businesses.

The amendments proposed herein have been reviewed under Executive Order 12988, Civil Justice Reform. They are not intended to have retroactive effect. If adopted, the proposed amendments would not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with the proposals.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

The hearing is called pursuant to the provisions of the Act and the applicable rules of practice and procedure governing the formulation of marketing agreements and orders (7 CFR part 900).

The proposed recommendations are the result of a task force appointed by the committees to conduct a review of the orders. The task force met several times in 2003 and drafted proposed amendments to the orders and presented the recommendations at industry meetings. The recommendations were then forwarded to the commodity committees and the Control Committee, each of which unanimously approved the proposed amendments. The amendments are intended to streamline organization and administration of the committees.

The Committees' request for a hearing was submitted to USDA on January 5, 2004. The hearing is called pursuant to the provisions of the Act and the applicable rules of practice and procedure governing the formulation of marketing agreements and orders (7 CFR part 900).

The Committees' proposed amendments to Marketing Orders Nos. 916 and 917 (orders) are summarized

below. Modifications from what was proposed by the committees on marketing order No. 917 have been made to some of the proposals. These modifications were made to provide clarity that no amendments are being proposed to the suspended pear provisions.

1a. Amend the order to allow hybrid fruit that exhibits the characteristics of nectarines and is subject to cultural practices common to nectarines be subject to marketing order regulations. This proposal would amend § 916.5.

1b. Amend the order to allow hybrid fruit that exhibits the characteristics of peaches and is subject to cultural practices common to peaches to be subject to marketing order regulations. This proposal would amend § 917.4.

2a. Amend the order by specifying that the act of packing nectarines is considered a handling function and clarifying that the word ''packer'' is synonymous with ''handler'' and ''shipper.'' This proposal would amend §§ 916.10, 916.11.

2b. Amend the order by specifying that the act of packing peaches is considered a handling function and clarifying that, for peaches, the word ''packer'' is synonymous with ''handler'' and ''shipper.'' This proposal would amend §§ 917.6 and 917.7.

3. Amend the nectarine order by changing the marketing season from May 1 through November 30 to April 1 through November 30. This proposal would amend § 916.15.

4. Amend the provisions relating to the Control Committee under marketing order No. 917 by allowing the duties and responsibilities of the Control Committee to be transferred to one commodity committee if the provisions of the other commodity committee are suspended. This proposal would amend § 917.18.

5a. Amend the nectarine order by increasing membership from eight members to thirteen members and revising the procedures that constitute quorum and voting requirements to conform to the increased committee. The proposal would also add that the committee may vote by facsimile and would specify that voting requirements for video conferencing would be the same as those for assembled meetings. This proposal would amend §§ 916.20 and 916.32.

5b. Amend the peach order by adding that the Peach Commodity Committee may vote by facsimile or video teleconference. This proposal would amend § 917.29(d).

6. Amend the nectarine order by eliminating the Shippers' Advisory Committee. This proposal would remove § 916.37.

7a. Amend the nectarine order by modifying the definition of grower to clarify that officers of corporations are considered growers for purposes of eligibility for membership on the committee. This proposal would amend § 916.9.

7b. Amend the order by modifying the definition of grower to clarify that, for peaches, officers of corporations are considered growers for purposes of eligibility for membership on the committees. This proposal would amend § 917.5.

8a. Amend the order by adding a definition of ''pure producer'' and ''pure grower'' for purposes of eligibility for membership on the committee. This proposal would add a new § 916.16.

8b. Amend the order by adding a definition for peaches of ''pure producer'' and ''pure grower'' for purposes of eligibility for membership on the committee. This proposal would add a new § 917.5a.

8c. Amend the nectarine order by allowing alternative methods to conduct nominations, changing the date that the nomination procedure should be held from February 15 to January 31, requiring at least 50 percent of the positions be pure producers and adding tenure requirements for committee members. This proposal would amend §§ 916.20 and 916.22.

8d. Amend the peach provisions of the order by allowing alternative methods to conduct nominations, changing the date that the nomination procedure should be held from February 15 to January 31, requiring at least 50 percent of the positions be pure producers, and adding tenure requirements for committee members. This proposal would amend § 917.24.

9a. Amend the order by authorizing the nominees to state their willingness to serve on the committee prior to the selection. This proposal would amend § 916.25.

9b. Amend the order by authorizing the peach nominees to state their willingness to serve on the committees prior to the selection. This proposal would amend § 917.25.

10a. Amend the order by changing the district boundaries under the nectarine order. This proposal would amend § 916.12.

10b. Amend the order by redefining the peach growing Fresno and Tulare districts under the order. This proposal would amend § 917.14.

11. Amend the order by changing the names and the composition of the districts of the Peach Commodity Committee. This proposal would amend § 917.22.

12a. Amend the order to allow for interest and/or late payments for assessments not paid timely. This proposal would amend § 916.41.

12b. Amend the order to allow for interest and/or late payments for peach assessments not paid timely and to authorize the committee to borrow money for administration of peach provisions of the order. This proposal would amend § 917.37.

13a. Amend the order to provide authority to recommend different regulations for different market destinations of the product. This proposal would amend § 916.52.

13b. Amend the order to provide authority to recommend different regulations for different market destinations of peaches. This proposal would amend § 917.41.

14. Amend the order to clarify that subcommittees may be established by the Peach Commodity Committee. This proposal would amend § 917.35.

15. Make such changes as may be necessary to the order to conform with any amendment thereto that may result from the hearing.

The committees work with USDA in administering the orders. These proposals have not received the approval of the Department. The Nectarine Administrative Committee, the Peach Commodity Committee, and the Control Committee believe that the proposed changes would improve the administration, operation, and functioning of the programs in effect for nectarines and peaches grown in California.

AMS also proposes to allow such changes to the order as may be necessary to conform to any amendment that may result from the hearing.

The public hearing is held for the purpose of: (i) Receiving evidence about the economic and marketing conditions which relate to the proposed amendments of the order; (ii) determining whether there is a need for the proposed amendments to the order; and (iii) determining whether the proposed amendments or appropriate modifications thereof will tend to effectuate the declared policy of the Act.

Testimony is invited at the hearing on all the proposals and recommendations contained in this notice, as well as any appropriate modifications or alternatives.

All persons wishing to submit written material as evidence at the hearing should be prepared to submit four copies of such material at the hearing and should have prepared testimony available for presentation at the hearing.

From the time the notice of hearing is issued and until the issuance of a final decision in this proceeding, USDA employees involved in the decisional process are prohibited from discussing the merits of the hearing issues on an *ex parte* basis with any person having an interest in the proceeding. The prohibition applies to employees in the following organizational units: Office of the Secretary of Agriculture; Office of the Administrator, AMS; Office of the General Counsel, except any designated employee of the General Counsel assigned to represent the Committee in this proceeding; and the Fruit and Vegetable Programs, AMS.

Procedural matters are not subject to the above prohibition and may be discussed at any time.

7 CFR Part 917

Marketing Agreements, Peaches, Pears, Reporting and recordkeeping requirements.

PART 916—NECTARINES GROWN IN CALIFORNIA

PART 917—FRESH PEARS AND PEACHES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR parts 916 and 917 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Testimony is invited on the following proposals or appropriate alternatives or modifications to such proposals.

Proposals submitted by the Nectarine Administrative Committee, the Peach Commodity Committee, and the Control Committee are as follows:

Proposal Number 1a

3. Revise § 916.5 to read as follows:

§ 916.5 Nectarines.

Nectarines means:

(a) All varieties of nectarines grown in the production area; and

(b) Hybrids grown in the production area that exhibit the characteristics of a nectarine and are subject to cultural practices common to nectarines, as recommended by the committee and approved by the Secretary.

Proposal Number 1b

4. Revise § 917.4 to read as follows:

§ 917.4 Fruit.

Fruit means the edible product of the following kinds of trees:

(a) All varieties of peaches grown in the production area;

(b) All hybrids grown in the production area exhibiting the characteristics of a peach and subject to cultural practices common to peaches as recommended by the committee and approved by the Secretary; and

(c) All varieties of pears except Beurre Hardy, Beurre D'Anjou, Bosc, Winter Nelis, Doyenne du Comice, Beurre Easter, and Beurre Clairgeau.

Proposal Number 2a

5. Revise § 916.10 to read as follows:

§ 916.10 Handler.

Handler, shipper and *packer* are synonymous and mean any person (except a common or contract carrier transporting nectarines owned by another person) who handles nectarines.

6. Revise § 916.11 to read as follows:

§ 916.11 Handle.

Handle, ship and *pack* are synonymous and mean to place nectarines into containers, sell, consign, deliver, or transport nectarines, or to cause nectarines to be placed into containers, sold, consigned, delivered, or transported, between the production area and any point outside thereof, or within the production area: *Provided,* That the term *handle* shall not include the sale of nectarines on the tree, the transportation within the production area of nectarines from the orchard where grown to a packing facility located within such area for preparation for market, or the delivery of such nectarines to such packing facility for such preparation.

Proposal Number 2b

7. Revise § 917.6 to read as follows:

§ 917.6 Handle.

Handle and *ship* are synonymous and mean to place fruit into containers, sell, consign, deliver or transport fruit or to cause fruit to be placed into containers, sold, consigned, delivered or transported between the production area and any point outside thereof, or within the production area: *Provided,* That the term *handle* shall not include the sale of fruit on the tree, the transportation within the production area of fruit from the orchard where grown to a packing facility located within such area for preparation for market, or the delivery of such fruit to such packing facility for such preparation. For peaches, the term ''pack'' is also synonymous with ''handle'' and ''ship.''

8. Revise § 917.7 to read as follows:

§ 917.7 Handler.

Handler and *shipper* are synonymous and mean any person (except a common or contract carrier transporting fruit owned by another person) who handles fruit. For peaches, the term ''packer'' is also synonymous with the terms ''handler'' and ''shipper.''

Proposal Number 3

9. Revise § 916.15 to read as follows:

§ 916.15 Marketing season.

Marketing season means the period beginning on April 1 and ending on November 30 of any year.

Proposal Number 4

10. Revise § 917.18 to read as follows:

§ 917.18 Nomination of commodity committee members of the Control Committee.

Nominations for the 13 members of the Control Committee to represent the commodity committees shall be made in the following manner:

(a) A nomination for one member shall be made by each commodity committee selected pursuant to § 917.25. Nominations for the remaining members shall be made by the respective commodity committees as provided in this section. The number of remaining members which each respective commodity shall be entitled to nominate shall be based upon the proportion that the previous three fiscal periods' shipments of the respective fruit is of the total shipments of all fruit to which this part is applicable during such periods. In the event provisions of this part are terminated as to any fruit, the members of the commodity committee of the remaining fruit shall have all of the powers, duties, and functions given to the Control Committee under this part and sections of this part pertaining to the designation of the Control Committee shall be terminated. In the event provisions of this part are suspended as to any fruit, the members of the commodity committee of the remaining fruit shall have all the powers, duties, and functions given to the Control Committee under this part and sections of this part pertaining to the designation of the Control Committee shall be suspended.

(b) A person nominated by any commodity committee for membership on the Control Committee shall be an individual person who is a member or alternate member of the commodity committee which nominates him/her. Each member of each commodity committee shall have only one vote in

the selection of nominees for membership on the Control Committee.

Proposal Number 5a

11. Revise § 916.20 to read as follows:

§ 916.20 Establishment and membership.

There is hereby established a Nectarine Administrative Committee consisting of thirteen members, each of whom shall have an alternate who shall have the same qualifications as the member for whom he/she is an alternate. The members and their alternates shall be growers or authorized employees of growers. Six of the members and their respective alternates shall be producers of nectarines in District 1. Four members and their respective alternates shall be producers of nectarines in District 2; two of the members and their respective alternates shall be producers of nectarines in District 3; and one member and his/her alternate shall be producers of nectarines in District 4.

12. Revise § 916.32 to read as follows:

§ 916.32 Procedure.

(a) Nine members of the committee, or alternates acting for members, shall constitute a quorum and any action of the committee shall require the concurring vote of the majority of those present: *Provided, That* actions of the committee with respect to expenses and assessments, or recommendations for regulations pursuant to §§ 916.50 to 916.55, shall require at least nine concurring votes.

(b) The committee may vote by telephone, telegraph, or other means of communication, such as facsimile, and any votes so cast shall be confirmed promptly in writing: *Provided, That* if an assembled meeting is held, all votes shall be cast in person. A videoconference shall be considered an assembled meeting and all votes shall be considered as cast in person.

Proposal Number 5b

13. Revise paragraph (d) of § 917.29 to read as follows:

§ 917.29 Organization of Committees.

* * *

(d) The Control Committee or any commodity committee may, upon due notice to all of the members of the respective committee, vote by letter, telegraph or telephone: *Provided,* That any member voting by telephone shall promptly thereafter confirm in writing his/her vote so cast. The Peach Commodity Committee may, upon due notice to all of the members of the respective committee, vote by letter, telegraph, telephone, facsimile, or video teleconference; *Provided,* That any member voting by telephone shall promptly thereafter confirm in writing his/her vote so cast.

Proposal Number 6

14. Remove § 916.37.

§ 916.37 Shippers' Advisory Committee.

(a) A Shippers' Advisory Committee, consisting of five members and their respective alternates who shall be handlers, or employees of handlers, selected by the handlers in accordance with the provisions of this section, is hereby established. The members and their respective alternates shall be selected biennially for a term ending on the last day of February of odd numbered years. An alternate member shall, in the event of the member's absence from a meeting of the committee, act in the place and stead of such member, and, in the event of a vacancy in the office of such member, shall act in the place and stead of such member until a successor for the unexpired term of such member has been selected.

(b) The members and alternate members of the Shippers' Advisory Committee shall be elected by handlers at a general meeting of all handlers and shall serve in such capacities during the marketing seasons subsequent to such election. Such meeting shall be supervised by the Nectarine Administrative Committee which may prescribe such rules and procedures as may be necessary to assure a membership representative of all shippers.

(c) The Shippers' Advisory Committee may attend each meeting of the Nectarine Administrative Committee held to consider recommendations with respect to regulations of shipments pursuant to the provisions of this subpart. The Shippers' Advisory Committee may advise the committee on matters relating to such recommendations, but shall have no vote with such committee in any matter. Members of the Shippers' Advisory Committee shall serve without compensation but may be reimbursed for expenses necessarily incurred in attendance of meetings of the Nectarine Administrative Committee.

Proposal Number 7a

15. Revise § 916.9 to read as follows:

§ 916.9 Grower.

Grower is synonymous with *producer* and means any person who produces nectarines for the fresh market and who has a proprietary interest therein. Officers of corporations actively engaged in growing nectarines are considered to be growers.

Proposal Number 7b

16. Revise § 917.5 to read as follows:

§ 917.5 Grower.

Grower is synonymous with *producer* and means any person who produces fruit for market in fresh form, and who has a proprietary interest therein. Officers of corporations actively engaged in growing peaches are considered to be growers.

Proposal Number 8a

17. Revise § 916.16 to read as follows:

§ 916.16 Pure Grower or Pure Producer.

Pure grower means the grower is not an employee or officer of a packing business; or if he/she is an officer or employee of a packing business, that specific packing business packs 75% or more of its nectarines from said grower. A *pure producer* is synonymous with *pure grower.*

Proposal Number 8b

18. Add a new § 917.5a to read as follows:

§ 917.5a Pure Grower or Pure Producer.

For peaches, *pure grower* means the grower is not an employee or officer of a packing business; or if he/she is an officer or employee of a packing business, that specific packing business packs 75% or more of its fruit from said grower. A *pure producer* is synonymous with *pure grower.*

Proposal Number 8c

19. Remove the period after the phrase ''District 4'' in the proposed amendment of § 916.20 (Proposal Number 5), add a colon and the following:

§ 916.20 Establishment and membership.

* * * *Provided, That* at least 50% of the nominees from each presentation area shall be pure producers. Furthermore, no person shall serve more than three consecutive two-year terms of office or a total of six consecutive years; *Provided, That* an appointment to fill less than a two year term of office, or serving one term as an alternate, shall not be included in determining the three consecutive terms of office.

20. Revise paragraph (b) of § 916.22 to read as follows:

§ 916.22 Nominations.

* * *

(b) *Successor members.* (1) The committee shall appoint a nominating committee, which will hold or cause to be held, not later than January 31 of

each odd numbered year, a nomination procedure or a meeting or meetings of growers in each district for the purpose of designating nominees for successor members and alternate members of the committee. Meetings may be supervised by the nominating committee that shall prescribe such procedure as shall be reasonable and fair to all persons concerned. After the nomination procedure or meetings have concluded, the nominating committee by February 15 will verify consent to place the nominee's name on the ballot and will cause a ballot listing all of the nominees for a given district to be mailed to all growers within the district. Members and then alternates will be chosen based on a descending ranking of votes received. Once ballots have been tabulated, the Nectarine Administrative Committee will announce to the growers the nominees that have been selected and recommended to the Secretary.

(2) Nominations may only be by growers, or by duly authorized employees. At meetings only growers, who are present at such nomination meetings may participate in the nomination of nominees for members and their alternates. All known growers will then receive a ballot for the nominees in the district in which they produce and are entitled to vote accordingly. A grower who produces in multiple districts is allowed to vote only in one district, and may exchange his/her ballot for the nominees in another district provided the grower is producing in the district for which he/she wants to participate. Employees of such grower shall be eligible for membership as principal or alternate to fill only one position on the committee.

(3) A particular grower, including authorized employees of such grower, shall be eligible for membership as principal or alternate to fill only one position on the committee.

Proposal Number 8d

21. Revise § 917.24 to read as follows:

§ 917.24 Procedure for nominating members of various commodity committees.

(a) The Control Committee shall hold or cause to be held not later than January 31 for peaches and not later than February 15 for pears of each odd numbered year a nomination procedure or a meeting or meetings of the growers of the fruits in each representation area set forth in §§ 917.21 and 917.22 for purposes of designating nominees for successor members and alternate members of the commodity committees. These meetings shall be supervised by the Control Committee, which shall prescribe such procedure as shall be reasonable and fair to all persons concerned.

(b) With respect to each commodity committee only growers of the particular fruit who are present at such nomination meetings or represented at such meetings by duly authorized employees may participate in the nomination and election of nominees for commodity committee members and alternates. For peaches, those who may receive nomination forms if the nominations are conducted via a mail process may also participate in the nomination and election of nominees for Peach Commodity Committee members and alternates. All peach growers, or authorized employees, will receive a ballot for the nominees in the district in which they produce and are entitled to vote accordingly. A peach grower who produces in multiple districts is allowed to vote only in one district, and may exchange his/her ballot for the nominees in another district provided the grower is producing in the district for which he/she wants to participate. For both commodity committees, each such grower, including employees of such grower, shall be entitled to cast but one vote for each position to be filled for the representation area in which he/she produces such fruit.

(c) A particular grower, including employees of such growers, shall be eligible for membership as principle or alternate to fill only one position on a commodity committee. A grower nominated for membership on the Pear Commodity Committee must have produced at least 51 percent of the pears shipped by him/her during the previous fiscal period, or he/she must represent an organization that produced at least 51 percent of the pears shipped by it during such period. The members and alternates of the Peach Commodity Committee shall be growers, or shall be authorized employees of such growers and at least 50% of the nominees from each representation area shall be pure producers.

(d) For peaches, no person shall serve more than three (3) consecutive two-year terms of office or a total of six (6) consecutive years; *Provided, That* an appointment to fill less than a two year term of office, or serving one (1) term as an alternate, shall not be included in determining the three (3) consecutive terms of office. The members shall serve until their respective successors are selected and have qualified.

Proposal Number 9a

22. Revise § 916.25 to read as follows:

§ 916.25 Acceptance.

Each person to be selected by the Secretary as a member or as an alternate member of the committee shall, prior to such selection, qualify by advising the Secretary that he/she agrees to serve in the position for which nominated for selection.

Proposal Number 9b

23. Revise § 917.25 to read as follows:

§ 917.25 Acceptance.

(a) The Secretary shall select the members of each commodity committee, except for the Peach Commodity Committee, from nominations made by growers, as provided in §§ 917.21 through 917.24, or from among other eligible persons. Any person selected as a member of the Pear Commodity Committee shall qualify by filing with the Secretary a written acceptance of the appointment.

(b) For the Peach Commodity Committee, each person to be selected by the Secretary as a member or as an alternate member of the committee shall, prior to such selection, qualify by advising the Secretary that he/she agrees to serve in the position for which nominated for selection.

Proposal Number 10a

24. Revise paragraphs (a) and (b) of § 916.12 to read as follows:

§ 916.12 District.

* * *

(a) *District 1* shall include the counties of Madera and Fresno.

(b) *District 2* shall include the counties of Kings and Tulare.

* * * * *

Proposal Number 10b

25. Revise paragraphs (n) and (o) of § 917.14 to read as follows:

§ 917.14 District.

* * *

(n) *Fresno District* includes and consists of Madera County, Fresno County, and Mono County.

(o) *Tulare District* includes and consists of Tulare County and Kings County.

* * * * *

Proposal Number 11

26. Revise § 917.22 to read as follows:

§ 917.22 Nomination of Peach Commodity Committee members.

Nominations for membership on the Peach Commodity Committee shall be made by growers of peaches in the respective representation areas, as follows:

(a) *District 1* composed of the Fresno District: seven nominees.

(b) *District 2* composed of the Tulare District: three nominees.

(c) *District 3* composed of the Tehachapi District and Kern District: one nominee.

(d) *District 4* composed of the Stanislaus District, Stockton District and all of the production area not included in paragraphs (a) through (d) of this section: one nominee.

(e) *District 5* composed of the South Coast District and Southern California District: one nominee.

Proposal Number 12a

27. Revise § 916.41 to read as follows:

§ 916.41 Assessments.

(a) As his/her pro rata share of the expenses which the Secretary finds are reasonable and likely to be incurred by the committee during a fiscal period, each person who first handles nectarines during such period shall pay to the committee, upon demand, assessments on all nectarines so handled. The payment of assessments for the maintenance and functioning of the committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

(b) The Secretary shall fix the rate of assessment to be paid by each such person during a fiscal period in an amount designed to secure sufficient funds to cover the expenses which may be incurred during such period and to accumulate and maintain a reserve fund equal to approximately one fiscal period's expenses. At any time during or after the fiscal period, the Secretary may increase the rate of assessment in order to secure sufficient funds to cover any later finding by the Secretary relative to the expenses that may be incurred. Such increase shall be applied to all nectarines handled during the applicable fiscal period. In order to provide funds for the administration of the provisions of this part during the first part of a fiscal period before sufficient operating income is available from assessments on the current year's shipments, the committee may accept the payment of assessments in advance, and may also borrow money for such purposes. Furthermore, any assessment not paid by a handler within a period of time prescribed by the committee may be subject to an interest or late payment charge, or both. The period of time, rate of interest and late payment charge shall be as recommended by the committee and approved by the Secretary. Subsequent to such approval, all assessments not paid within the prescribed period of time shall be subject to an interest or late payment charge or both.

Proposal Number 12b

28. Revise § 917.37 to read as follows:

§ 917.37 Assessments.

(a) As his/her pro rata share of the expenses which the Secretary finds are reasonable and are likely to be incurred by the commodity committees during a fiscal period, each handler shall pay to the Control Committee, upon demand, assessments on all fruit handled by him/her. The payment of assessments for the maintenance and functioning of the committees may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

(b) The Secretary shall fix the respective rate of assessment which handlers shall pay with respect to each fruit during each fiscal period in an amount designed to secure sufficient funds to cover the respective expenses which may be incurred during such period. At any time during or after the fiscal period, the Secretary may increase the rates of assessment in order to secure funds to cover any later findings by the Secretary relative to such expenses, and such increase shall apply to all fruit shipped during the fiscal period. Furthermore, any assessment not paid by a peach handler within a period of time prescribed by the Control Committee may be subject to an interest or late payment charge, or both. The period of time, rate of interest and late payment charge shall be as recommended by the committee and approved by the Secretary. Subsequent to such approval, all assessments for peaches not paid within the prescribed period of time shall be subject to an interest or late payment charge or both.

(c) In order to provide funds to carry out the functions of the commodity committee prior to commencement of shipments in any season, shippers may make advance payments of assessments, which advance payments shall be credited to such shippers and the assessments of such shippers shall be adjusted so that such assessments are based upon the quantity of fruit shipped by such shippers during such season. Any shipper who ships fruit for the account of a grower may deduct, from the account of sale covering such shipment or shipments, the amount of assessments levied on said fruit shipped for the account of such grower. The Control Committee may also borrow money for such purposes for peaches.

Proposal Number 13a

29. Revise § 916.52 to read as follows:

§ 916.52 Issuance of regulations.

(a) The Secretary shall regulate, in the manner specified in this section, the handling of nectarines whenever he/she finds, from the recommendations and information submitted by the committee, or from other available information, that such regulations will tend to effectuate the declared policy of the act. Such regulations may:

(1) Limit, during any period or periods and/or by specific market destination, the shipment of any particular grade, size, quality, maturity, or pack, or any combination thereof, of any variety or varieties of nectarines grown in the production area;

(2) Limit the shipment of nectarines by establishing, in terms of grades, sizes, or both, minimum standards of quality and maturity during any period when season average prices are expected to exceed the parity level;

(3) Fix the size, capacity, weight, dimensions, markings, or pack of the container, or containers, which may be used in the packaging or handling of nectarines.

(b) The committee shall be informed immediately of any such regulation issued by the Secretary and the committee shall promptly give notice thereof to handlers.

Proposal Number 13b

30. Revise § 917.41 to read as follows:

§ 917.41 Issuance of regulations.

(a) The Secretary shall regulate, in the manner specified in this section, the handling of any variety or varieties of fruit whenever he/she finds, from the recommendations and information submitted by the commodity committee, or from other available information, that such regulations will tend to effectuate the declared policy of the act. Such regulations may:

(1) Limit, during any period or periods and/or for peaches only, by specific market destination, the total quantity of any grade, size, quality, maturity, or pack, or any combination thereof, of any variety or varieties of fruit;

(2) Limit the shipment of any variety or varieties of fruit by establishing, in terms of grades, sizes, or both, minimum standards of quality and maturity during any period when season average prices are expected to exceed the parity level;

(3) Fix the size, capacity, weight, dimensions, markings, or pack of the container, or containers, which may be used in the packaging or handling of any fruit.

(b) The commodity committee shall be informed immediately of any such regulation issued by the Secretary, and the commodity committee shall promptly give notice thereof to handlers.

Proposal Number 14

31. Add a sentence at the end of paragraph (d) of § 917.35 to read as follows:

§ 917.35 Powers and duties of each commodity committee.

* * * * *

(d) * * * To establish subcommittees to aid the Peach Commodity Committee in the performance of its duties under this part as may be deemed advisable.

* * * * *

Proposal Number 15

Make such changes as may be necessary to the order to conform with any amendment thereto that may result from the hearing.

Dated: January 25, 2005.

Kenneth Clayton,

Acting Administrator, Agricultural Marketing Service.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Ch. III

[Docket No. 04–040N]

Regulatory Flexibility Act; Amended Plan for Reviewing Regulations Under Section 610 Requirements

AGENCY: Food Safety and Inspection Service (FSIS), USDA.

ACTION: Schedule of regulations to be reviewed under section 610 requirements of the Regulatory Flexibility Act; amended.

SUMMARY: The Food Safety and Inspection Service (FSIS) is publishing an amended scheduling plan for reviewing regulations under Section 610 of the Regulatory Flexibility Act, as amended. These provisions require that all Federal agencies review existing regulations that have a significant economic impact on a substantial number of small entities to determine whether the associated impact can be minimized.

FOR FURTHER INFORMATION CONTACT: For further information contact Dr. Quita Bowman Blackwell, Director, Directives and Economic Analysis Staff, FSIS, U.S. Department of Agriculture, 300 12th Street, SW, Room 112, Washington, DC 20250–3700, (202) 720–5627.

SUPPLEMENTARY INFORMATION:

Background

Section 610 of the Regulatory Flexibility Act (RFA), as amended (5 U.S.C. 601–612), requires that all Federal agencies review any regulations that have been identified as having a significant economic impact upon a substantial number of small entities as a means to determine whether the associated impact can be minimized by considering the following factors: (1) The continued need for the rule; (2) the nature of the complaints or comments received concerning the rule from the public; (3) the complexity of the rule; (4) the extent to which the rule overlaps, duplicates, or conflicts with other Federal rules; and (5) the length of time since the rule has been initially evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the rule.

On April 2, 2002, FSIS published in the **Federal Register** (67 FR 15501) a scheduling plan for reviewing regulations under the 610 provisions. At that point, the Agency had determined to review all rules deemed economically significant, regardless of whether the Agency had stated that the rule would impose a significant economic impact on a substantial number of small entities or not. After further consideration, FSIS now believes that it would be more effective and beneficial if the Agency concentrated its reviews under Section 610 of the RFA on those final and interim final rules that the Agency has identified as having a significant economic impact on a substantial number of small entities.

Accordingly, FSIS has amended its plan for reviewing the Agency rules that it has identified as having a significant economic impact on a substantial number of small entities.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to ensure that the public and in particular minorities, women, and persons with disabilities, are aware of this notice, FSIS will announce it on-line through the FSIS Web page located at *http://www.fsis.usda.gov.*

FSIS also will make copies of this **Federal Register** publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, recalls, and other types of information that could affect or would be of interest to our constituents and stakeholders. The update is communicated via Listserv, a free e-mail subscription service consisting of industry, trade, and farm groups, consumer interest groups, allied health

professionals, scientific professionals, and other individuals who have requested to be included.

The update also is available on the FSIS web page. Through Listserv and the web page, FSIS is able to provide information to a much broader, more diverse audience.

Done at Washington, DC, on January 24, 2005.

Barbara J. Masters,

Acting Administrator.

BILLING CODE 3410–DM–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2005–20136; Directorate Identifier 2004–NM–185–AD]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 747–200B, –200C, –200F, and –400F Series Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Boeing Model 747 series airplanes. This proposed AD would require repetitive detailed inspections for cracks in the crease beam and adjacent structure of the fuselage, and related investigative and corrective actions if necessary. This proposed AD is prompted by fatigue cracks found in the crease beam during a follow-on inspection of a previously installed modification. We are proposing this AD to find and fix fatigue cracking of the fuselage frame, which could result in reduced structural integrity of the frame and consequent rapid decompression of the airplane.

DATES: We must receive comments on this proposed AD by March 14, 2005.

ADDRESSES: Use one of the following addresses to submit comments on this proposed AD.

- *DOT Docket Web site*: Go to *http://dms.dot.gov* and follow the instructions for sending your comments electronically.
- *Government-wide rulemaking Web site*: Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, room PL–401, Washington, DC 20590.
- *By fax:* (202) 493–2251.
- *Hand Delivery:* Room PL–401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124–2207.

FOR FURTHER INFORMATION CONTACT: *Technical Information*: Nick Kusz, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 917–6432; fax (425) 917–6590.

SUPPLEMENTARY INFORMATION:

Docket Management System (DMS)

The FAA has implemented new procedures for maintaining AD dockets electronically. As of May 17, 2004, new AD actions are posted on DMS and assigned a docket number. We track each action and assign a corresponding directorate identifier. The DMS AD docket number is in the form ''Docket No. FAA–2005–99999.'' The Transport Airplane Directorate identifier is in the form ''Directorate Identifier 2005–NM–999–AD.'' Each DMS AD docket also lists the directorate identifier (''Old Docket Number'') as a cross-reference for searching purposes.

Comments Invited

We invite you to submit any relevant written data, views, or arguments regarding this proposed AD. Send your comments to an address listed under **ADDRESSES.** Include ''Docket No. FAA–2005–20136; Directorate Identifier 2004–NM–185–AD'' in the subject line of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of the proposed AD. We will consider all comments submitted by the closing date and may amend the proposed AD in light of those comments.

We will post all comments we receive, without change, to *http://dms.dot.gov*, including any personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this proposed AD. Using the search function of that Web site, anyone can find and read the comments in any of our dockets, including the name of the individual who sent the comment (or signed the comment on behalf of an association, business, labor union, etc.). You can review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78), or you can visit *http://dms.dot.gov*.

We are reviewing the writing style we currently use in regulatory documents. We are interested in your comments on whether the style of this document is clear, and your suggestions to improve the clarity of our communications that affect you. You can get more information about plain language at *http://www.faa.gov/language* and *http://www.plainlanguage.gov*.

Examining the Docket

You can examine the AD docket on the Internet at *http://dms.dot.gov*, or in person at the Docket Management Facility office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Management Facility office (telephone (800) 647–5227) is located on the plaza level of the Nassif Building at the DOT street address stated in the **ADDRESSES** section. Comments will be available in the AD docket shortly after the DMS receives them.

Discussion

We have received a report indicating that cracking was found on a 747–200 series airplane during a follow-on inspection of a previously installed modification of the crease beam of the fuselage. The cracking is attributed to fatigue due to cabin pressurization cyclic loading. This condition, if not corrected, could result in reduced structural integrity of the fuselage frame and consequent rapid decompression of the airplane.

The crease beam of the fuselage on certain Model 747–200B, –200C, –200F, and –400F series airplanes is identical to that on the affected Model 747–200 series airplane. Therefore, all of these models may be subject to the same unsafe condition.

Other Related Rulemaking

On October 26, 1989, we issued AD 89–08–03 R1, amendment 39–6389 (54 FR 46367, November 3, 1989), applicable to certain Boeing Model 747 series airplanes, (line numbers 66 through 603 inclusive). That AD requires inspections for cracks of the fuselage between body station (BS) 940 and BS 1000, the body crown crease beam, and the intercostal structure; and repair if necessary. The newly reported fatigue cracking of the crease beam and adjacent structure of the fuselage that prompted this new proposed AD occurred at approximately 10,000 flight

cycles after the airplane had been modified per the repair procedures specified in Boeing Service Bulletin 747–53–2297, Revision 1, dated January 26, 1989 (referenced in AD 89–08–03 R1 for accomplishing the specified actions).

Although AD 89–08–03 R1 contains adequate post-modification/repair inspections, there are no such inspections required for airplanes with line numbers 604 and subsequent. This proposed AD would require inspections for airplanes that are not included in the applicability specified in AD 89–08–03 R1.

Relevant Service Information

We have reviewed Boeing Alert Service Bulletin 747–53A2504, dated August 19, 2004. The service bulletin describes procedures for repetitive detailed inspections for cracks in the crease beam and adjacent structure of the fuselage, and related investigative and corrective actions if necessary. The related investigative action is a high frequency eddy current inspection for additional cracking in adjacent skin panel fastener locations. The corrective action involves repairing any cracks found during any inspection. Accomplishing the actions specified in the service information is intended to adequately address the unsafe condition.

FAA's Determination and Requirements of the Proposed AD

We have evaluated all pertinent information and identified an unsafe condition that is likely to exist or develop on other airplanes of this same type design. Therefore, we are proposing this AD, which would require accomplishing the actions specified in the service information described previously, except as discussed under ''Differences Between Proposed AD and Service Bulletin.''

Differences Between Proposed AD and Service Bulletin

For certain airplanes, the service bulletin recommends reporting any discrepancies to the manufacturer; however, this proposed AD does not include that requirement.

Although the service bulletin specifies that operators may contact the manufacturer for disposition of certain repair conditions, this proposed AD would require operators to repair those conditions using a method that we approve or using data that meet the certification basis of the airplane, and that have been approved by an Authorized Representative for the Boeing Delegation Option Authorization (DOA) Organization whom we have authorized to make those findings.

Costs of Compliance

There are about 163 airplanes of the affected design in the worldwide fleet. This proposed AD would affect about 30 airplanes of U.S. registry. The proposed inspection would take about 8 work hours per airplane, at an average labor rate of $65 per work hour. Based on these figures, the estimated cost of the proposed inspection for U.S. operators is $15,600, or $520 per airplane, per inspection cycle.

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this proposed AD.

Regulatory Findings

We have determined that this proposed AD will not have federalism implications under Executive Order 13132. This proposed AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Boeing: Docket No. FAA–2005–20136; Directorate Identifier 200—NM–185–AD.

Comments Due Date

(a) The Federal Aviation Administration (FAA) must receive comments on this AD action by March 14, 2005.

Affected ADs

(b) None.

Applicability

(c) This AD applies to Boeing Model 747–200B, –200C, –200F, and –400F series airplanes, line numbers 604 and subsequent, certificated in any category; as listed in Boeing Alert Service Bulletin 747–53A2504, dated August 19, 2004.

Unsafe Condition

(d) This AD was prompted by fatigue cracks found in the crease beam during a follow-on inspection of a previously installed modification. We are issuing this AD to find and fix fatigue cracking of the fuselage frame, which could result in reduced structural integrity of the frame and consequent rapid decompression of the airplane.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Repetitive Inspections

(f) Accomplish a detailed inspection for cracks in the crease beam and adjacent structure of the fuselage by doing all the applicable actions in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 747–53A2504, dated August 19, 2004; at the applicable time specified in paragraph (f)(1) or (f)(2) of this AD. Repeat the inspection thereafter at intervals not to exceed 6,000 flight cycles.

(1) For Groups 1 and 2 airplanes as identified in the service bulletin: Before the accumulation of 10,000 total flight cycles, or within 1,500 flight cycles after the effective date of this AD, whichever is later.

(2) For Groups 3 and 4 airplanes as identified in the service bulletin: Before the

accumulation of 14,000 total flight cycles, or within 1,500 flight cycles after the effective date of this AD, whichever is later.

Related Investigative and Corrective Actions

(g) If any crack is found during any inspection required by paragraph (f) of this AD: Before further flight, repair the cracking in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 747–53A2504, dated August 19, 2004. If cracking of the crease beam or outer tee chord attachment is found: Before further flight, do a high frequency eddy current inspection for additional cracking, and repair any cracking found, in accordance with the service bulletin. Where the service bulletin specifies contacting the manufacturer for disposition of certain repair conditions, repair before further flight in accordance with a method approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA; or by an Authorized Representative for the Boeing Delegation Option Authorization (DOA) Organization, who has been authorized by the Manager, Seattle ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

No Reporting Required

(h) For certain airplanes, the service bulletin referenced in this AD recommends reporting any discrepancies to the manufacturer, but this AD does not include that requirement.

Alternative Methods of Compliance (AMOCs)

(i)(1) The Manager, Seattle ACO, has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

(2) An AMOC that provides an acceptable level of safety may be used for a repair required by this AD, if it is approved by an Authorized Representative for the Boeing DOA Organization who has been authorized by the Manager, Seattle ACO, to make such findings.

Issued in Renton, Washington, on January 18, 2005.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2005–20138; Directorate Identifier 2004–NM–167–AD]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 757–200, –200PF, and –200CB Series Airplanes Equipped With Pratt & Whitney or Rolls Royce Engines

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Boeing Model 757–200, –200PF, and –200CB series airplanes. This proposed AD would require inspecting to determine the part number of the upper link forward fuse pins of the engine struts; and replacing the fuse pins as necessary. This proposed AD is prompted by a report indicating that, due to an incorrect listing in the illustrated parts catalog, persons performing maintenance on the engine strut(s) could have installed an incorrect upper link forward fuse pin. We are proposing this AD to prevent a ruptured wing box, due to the engine not separating safely during certain emergency landing conditions, which could lead to a fuel spill and consequent fire.

DATES: We must receive comments on this proposed AD by March 14, 2005.

ADDRESSES: Use one of the following addresses to submit comments on this proposed AD.

- *DOT Docket Web site:* Go to *http://dms.dot.gov* and follow the instructions for sending your comments electronically.
- *Government-wide rulemaking Web site:* Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street SW, Nassif Building, room PL–401, Washington, DC 20590.
- *By fax:* (202) 493–2251.
- *Hand Delivery:* Room PL–401 on the plaza level of the Nassif Building, 400 Seventh Street SW, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124–2207.

You can examine the contents of this AD docket on the Internet at *http://dms.dot.gov,* or in person at the Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street SW., room PL–401, on the plaza level of the Nassif Building, Washington, DC. This docket number is FAA–2005–20138; the directorate identifier for this docket is 2004–NM–167–AD.

FOR FURTHER INFORMATION CONTACT: Dennis Stremick, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 917–6450; fax (425) 917–6590.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to submit any relevant written data, views, or arguments regarding this proposed AD. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2005–20138; Directorate Identifier 2004–NM–167–AD'' in the subject line of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of the proposed AD. We will consider all comments submitted by the closing date and may amend the proposed AD in light of those comments.

We will post all comments we receive, without change, to *http://dms.dot.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this proposed AD. Using the search function of that website, anyone can find and read the comments in any of our dockets, including the name of the individual who sent the comment (or signed the comment on behalf of an association, business, labor union, etc.). You can review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78), or you can visit *http://dms.dot.gov.*

Examining the Docket

You can examine the AD docket on the Internet at *http://dms.dot.gov,* or in person at the Docket Management Facility office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Management Facility office (telephone (800) 647–5227) is located on the plaza level of the Nassif Building at the DOT street address stated in the **ADDRESSES** section. Comments will be available in the AD docket shortly after the DMS receives them.

Discussion

We have received a report indicating that, due to an incorrect listing in the illustrated parts catalog, an operator performing maintenance on the engine strut(s) could have installed, as a replacement for an upper link forward fuse pin having part number (P/N) 311N5501–1, an incorrect fuse pin having P/N 311N5501–2. An incorrect fuse pin could prevent the engine from separating safely from the airplane upon abrupt contact with the ground or a massive ground object during an uncontrolled or wheels up emergency landing. This condition, if not corrected, could cause a ruptured wing box, due to the engine not separating safely during certain emergency landing conditions, which could lead to a fuel spill and consequent fire.

Relevant Service Information

We have reviewed Boeing Special Attention Service Bulletin 757–54–0048, dated May 13, 2004. The service bulletin describes procedures for inspecting to determine the part number of the upper link forward fuse pins of the engine struts and replacing the fuse pins with fuse pins having P/N 311N5501–1, if necessary. Accomplishing the actions specified in the service information is intended to adequately address the unsafe condition.

FAA's Determination and Requirements of the Proposed AD

We have evaluated all pertinent information and identified an unsafe condition that is likely to exist or develop on other airplanes of this same type design. Therefore, we are proposing this AD, which would require accomplishing the actions specified in the service information described previously, except as discussed under ''Differences Between the Proposed AD and Service Information.''

Differences Between the Proposed AD and Service Information

Boeing Special Attention Service Bulletin 757–54–0048 specifies to inspect the upper link forward fuse pin to determine the P/N; however, we have examined a fuse pin returned from service and found the P/N to be unreadable. Therefore, we are proposing one alternate method of identifying the fuse pin by measuring the inside diameter of the fuse pin bore. We have coordinated the alternate method with the manufacturer and included appropriate procedures in this proposed AD.

Boeing Special Attention Service Bulletin 757–54–0048 permits the use of an ''approved equivalent procedure'' for inspection and necessary replacement of the fuse pin(s); however, this proposed AD would require that inspection and replacement be done in accordance with the instructions of the aircraft maintenance manual (AMM) as specified in the service bulletin.

Clarification of Applicability

Boeing Special Attention Service Bulletin 757–54–0048 specifies that it is applicable to airplanes having line numbers 1 through 735 inclusive; however, airplanes having line numbers 1 through 618 inclusive were originally manufactured with upper link forward fuse pins P/N 311N5060–1. P/N 311N5060–1 fuse pins are replaced with P/N 311N5501–1 fuse pins when the strut improvement modification required by AD 2004–12–07, amendment 39–13666, (69 FR 33561, dated June 16, 2004); or AD 2003–18–05, amendment 39–13296, (68 FR 53496, dated September 11, 2003); as applicable, is incorporated on the airplane.

Clarification of Inspection Terminology

In this proposed AD, the ''detailed visual inspection'' specified in the Boeing service bulletin is referred to as a ''detailed inspection.'' We have included the definition for a detailed inspection in Note 1 of the proposed AD.

Costs of Compliance

There are about 735 airplanes of the affected design in the worldwide fleet. This proposed AD would affect about 478 airplanes of U.S. registry. The proposed inspection would take about 1 work hour per fuse pin (2 fuse pins per airplane), at an average labor rate of $65 per work hour. Based on these figures, the estimated cost of the proposed AD for U.S. operators is $62,140, or $130 per airplane.

Replacement of any upper link forward fuse pin, if required, would take about 26 work hours, at an average labor rate of $65 per work hour. Required parts would cost about $431. Based on these figures, the estimated cost of a proposed replacement is $2,121 per fuse pin.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Boeing: Docket No. FAA–2005–20138; Directorate Identifier 2004–NM–167–AD.

Comments Due Date

(a) The Federal Aviation Administration (FAA) must receive comments on this AD action by March 14, 2005.

Affected ADs

(b) None.

Applicability

(c) This AD applies to Boeing Model 757–200, –200PF, and –300 series airplanes, line numbers 1 through 735 inclusive, certificated in any category; equipped with Pratt & Whitney or Rolls Royce engines.

Unsafe Condition

(d) This AD was prompted by a report indicating that, due to an incorrect listing in the illustrated parts catalog, persons performing maintenance on the engine strut(s) could have installed an incorrect upper link forward fuse pin having part number (P/N) 311N5501–2. We are issuing this AD to prevent a ruptured wing box, due to the engine not separating safely during certain emergency landing conditions, which could lead to a fuel spill and consequent fire.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Inspection of Fuse Pin

(f) Within 24 months after the effective date of this AD, perform a detailed inspection to determine the P/N of the upper link forward fuse pins of the engine struts, in accordance with the Accomplishment Instructions of Boeing Special Attention Service Bulletin 757–54–0048, dated May 13, 2004, except as provided in paragraph (g) of this AD.

Note 1: For the purposes of this AD, a detailed inspection is: ''An intensive examination of a specific item, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at an intensity deemed appropriate. Inspection aids such as mirror, magnifying lenses, etc., may be necessary. Surface cleaning and elaborate procedures may be required.''

(1) If the fuse pin is P/N 311N5501–1 or P/N 311N5060–1, no further action is required for that fuse pin.

(2) If the fuse pin is P/N 311N5501–2, prior to further flight, replace the fuse pin with a new or serviceable fuse pin, P/N 311N5501–1, in accordance with the Accomplishment Instructions of the service bulletin.

(3) If the P/N of the fuse pin cannot be determined by inspection, use a tool such as an inside reading micrometer to determine the inside diameter (ID) of the fuse pin bore.

(i) If the ID of the fuse pin bore is greater than or equal to 0.850 inch, no further action is required for that fuse pin.

(ii) If the ID of the fuse pin bore is less than 0.850 inch, prior to further flight, replace the fuse pin as specified in paragraph (f)(2) of this AD.

(g) Where Boeing Special Attention Service Bulletin 757–54–0048 permits the use of an ''approved equivalent procedure'' for access and replacement of the fuse pin(s), this AD requires that access and replacement be done in accordance with the instructions of the aircraft maintenance manual (AMM) as specified in the service bulletin.

Parts Installation

(h) As of the effective date of this AD, no person may install a fuse pin, P/N 311N5501–2, on any airplane identified in the applicability of this AD.

Alternative Methods of Compliance (AMOCs)

(i)(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

(2) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD, if it is approved by a Boeing Company Designated Engineering Representative who has been authorized by the Manager, Seattle ACO, to make those findings. For a repair method to be approved, the approval must specifically refer to this AD.

Issued in Renton, Washington, on January 18, 2005.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 05–1586 Filed 1–27–05; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2005–20137; Directorate Identifier 2004–NM–96–AD]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 757–200, –200PF, and –300 Series Airplanes, Powered by Pratt & Whitney PW2000 Series Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Boeing Model 757 series airplanes. This proposed AD would require repetitive inspections for loose or damaged components of the support brackets and associated fasteners for the hydraulic lines located in the nacelle struts, and any related investigative and corrective actions. This proposed AD is prompted by reports of damage and subsequent failure of the support brackets and associated fasteners for the hydraulic lines located internal to the upper fairing cavity of the nacelle struts. We are proposing this AD to prevent flammable fluids from leaking into the interior compartment of the nacelle struts where ignition sources exist, which could result in the ignition of flammable fluids and an uncontained fire.

DATES: We must receive comments on this proposed AD by March 14, 2005.

ADDRESSES: Use one of the following addresses to submit comments on this proposed AD.

- DOT Docket Web site: Go to *http://dms.dot.gov* and follow the instructions for sending your comments electronically.
- *Government-wide rulemaking Web site*: Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- Mail: Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street SW., Nassif Building, room PL–401, Washington, DC 20590.
- *By fax:* (202) 493–2251.
- *Hand Delivery:* Room PL–401 on the plaza level of the Nassif Building, 400 Seventh Street SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124–2207.

You can examine the contents of this AD docket on the Internet at *http://dms.dot.gov,* or in person at the Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street SW., room PL–401, on the plaza level of the Nassif Building, Washington, DC.

FOR FURTHER INFORMATION CONTACT: *Technical information*: Tom Thorson, Aerospace Engineer, Propulsion Branch, ANM–140S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 917–6508; fax (425) 917–6590.

Plain language information: Marcia Walters, *marcia.walters@faa.gov.*

SUPPLEMENTARY INFORMATION:

Docket Management System (DMS)

The FAA has implemented new procedures for maintaining AD dockets electronically. As of May 17, 2004, new AD actions are posted on DMS and assigned a docket number. We track each action and assign a corresponding directorate identifier. The DMS AD docket number is in the form ''Docket No. FAA–2004–99999.'' The Transport Airplane Directorate identifier is in the form ''Directorate Identifier 2004–NM–999–AD.'' Each DMS AD docket also lists the directorate identifier (''Old

Docket Number'') as a cross-reference for searching purposes.

Comments Invited

We invite you to submit any relevant written data, views, or arguments regarding this proposed AD. Send your comments to an address listed under **ADDRESSES.** Include ''Docket No. FAA–2005–20137; Directorate Identifier 2004–NM–96–AD'' in the subject line of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of the proposed AD. We will consider all comments submitted by the closing date and may amend the proposed AD in light of those comments.

We will post all comments we receive, without change, to *http://dms.dot.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this proposed AD. Using the search function of that website, anyone can find and read the comments in any of our dockets, including the name of the individual who sent the comment (or signed the comment on behalf of an association, business, labor union, etc.). You can review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78), or you can visit *http://dms.dot.gov.*

We are reviewing the writing style we currently use in regulatory documents. We are interested in your comments on whether the style of this document is clear, and your suggestions to improve the clarity of our communications that affect you. You can get more information about plain language at *http://www.faa.gov/language* and *http://www.plainlanguage.gov.*

Examining the Docket

You can examine the AD docket on the Internet at *http://dms.dot.gov*, or in person at the Docket Management Facility office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Management Facility office (telephone (800) 647–5227) is located on the plaza level of the Nassif Building at the DOT street address stated in the **ADDRESSES** section. Comments will be available in the AD docket shortly after the DMS receives them.

Discussion

We have received reports of damage and subsequent failure of the support brackets and associated fasteners for the hydraulic lines located internal to the upper fairing cavity of the nacelle struts. These failures occurred on certain Model 757 series airplanes powered by Pratt & Whitney PW2000 series engines. These failures resulted in damage to the adjacent fuel lines and fuel leaks in the engine strut due to a fastener migrating through a support bracket and retainer channel, allowing the fastener to wear through the fuel supply tube. The hydraulic lines supply pressure from the hydraulic pumps to the airframe and are subject to high frequency pressure oscillations/vibrations. Investigation by the manufacturer revealed that the operating pressure and surge loads from the hydraulic pumps are higher than originally expected and exceed the capability of the design for the support bracket structure.

The hydraulic lines are located in the upper fairing compartment of the nacelle struts. The upper fairing compartment is a flammable leakage zone and is isolated from other strut compartments by a protective vapor barrier. The vapor barrier acts as a seal to keep flammable fluids and vapors from hydraulic and fuel line leaks out of the interior portion of the strut where pneumatic bleed air ducts are located. The surface temperature of the bleed air ducts is hot enough to be an ignition source. The reported condition of sheared or loose fasteners, or damage to the strut webs adjacent to the support brackets and associated fasteners, compromises the vapor barrier, which in turn could allow flammable fluids to leak into the interior compartments of the nacelle struts. Such a condition, if not corrected, could result in ignition of flammable fluids and an uncontained fire.

Relevant Service Information

We have reviewed Boeing Service Bulletins 757–29–0064 (for Model 757–200 and –200PF series airplanes) and 757–29–0065 (for Model 757–300 series airplanes), both dated February 29, 2004. The service bulletins describe procedures for repetitive detailed inspections for loose or damaged components of the support brackets and associated fasteners for the hydraulic lines located in the nacelle struts, and related investigative and corrective actions. Evidence of damage includes excessive wear, fatigue cracks, or elongated fastener holes in the strut webs. If no damaged or loose parts are found, the service bulletins specify repeating the inspection of the support brackets and associated fasteners for the hydraulic lines at the intervals specified.

The procedures for the related investigative and corrective actions include:

- Inspecting the fuel and hydraulic lines and strut webs for evidence of damage (*e.g.*, chafing or holes) caused by a loose support bracket or line.
- Replacing or repairing damaged fuel lines.
- Replacing damaged hydraulic lines with new lines.
- Repairing damaged areas of the strut webs.
- Contacting the manufacturer for damage that is beyond the repair limitations specified in the service bulletin.
- Replacing damaged components with new, improved nickel alloy components.

The service bulletin also includes procedures for a functional test of the hydraulic and fuel systems.

Service Bulletin 757–29–0064 recommends prior or concurrent accomplishment of Boeing Service Bulletin 757–29–0043, dated June 21, 1990. Service Bulletin 757–29–0043 describes procedures for replacing aluminum brackets, retainer channels, and attachment hardware for the hydraulic lines located in the nacelle struts. Service Bulletin 757–29–0043 also describes procedures for replacing certain fuel and hydraulic lines with new lines if necessary.

Accomplishing the actions specified in the service information is intended to adequately address the identified unsafe condition.

FAA's Determination and Requirements of the Proposed AD

We have evaluated all pertinent information and identified an unsafe condition that is likely to exist or develop on other airplanes of this same type design. Therefore, we are proposing this AD, which would require accomplishing the actions specified in the service information described previously, except as discussed under ''Difference Between the Service Bulletins and Proposed AD.''

Difference Between the Service Bulletins and Proposed AD

Although the service bulletins specify that operators may contact the manufacturer for disposition of certain repair conditions, this proposed AD would require operators to repair those conditions per a method approved by the FAA.

Costs of Compliance

This proposed AD would affect about 432 airplanes worldwide and 377 airplanes of U.S. registry. The proposed

inspection/test would take about 35 work hours per airplane (including access and close-up), at an average labor rate of $65 per work hour. Based on these figures, the estimated cost of the proposed AD for U.S. operators is $857,675, or $2,275 per airplane, per inspection/test cycle.

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, the FAA is charged with promoting safety flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this proposed AD.

Regulatory Findings

We have determined that this proposed AD will not have federalism implications under Executive Order 13132. This proposed AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Boeing: Docket No. FAA–2005–20137; Directorate Identifier 2004–NM–96–AD.

Comments Due Date

(a) The Federal Aviation Administration (FAA) must receive comments on this AD action by March 14, 2005.

Affected ADs

(b) None.

Applicability

(c) This AD applies to Boeing Model 757–200, –200PF, and –300 series airplanes; powered by Pratt & Whitney PW2000 series engines; certificated in any category.

Unsafe Condition

(d) This AD was prompted by reports of damage and subsequent failure of the support brackets and associated fasteners for the hydraulic lines located internal to the upper fairing cavity of the nacelle struts. We are issuing this AD to prevent flammable fluids from leaking into the interior compartment of the nacelle struts where ignition sources exist, which could result in the ignition of flammable fluids and an uncontained fire.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Repetitive Inspections

(f) Within 6,000 flight hours or 18 months after the effective date of this AD, whichever is first: Do a detailed inspection for loose or damaged components of the support brackets and associated fasteners for the hydraulic lines located in the nacelle struts by accomplishing all of the actions specified in Part 1, Part 2, and Part 3 of the Accomplishment Instructions of Boeing Service Bulletin 757–29–0064 (for Model 757–200 and –200PF series airplanes) or Boeing Service Bulletin 757–29–0065 (for Model 757–300 series airplanes), both dated February 29, 2004; as applicable. Repeat the inspection thereafter at intervals not to exceed 6,000 flight hours or 18 months, whichever is first.

Note 1: For the purposes of this AD, a detailed inspection is defined as: ''An intensive visual examination of a specific structural area, system, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at intensity deemed appropriate by the inspector. Inspection aids such as mirror, magnifying lenses, etc., may be used. Surface cleaning and elaborate access procedures may be required.''

Concurrent Service Bulletin

(g) Prior to or concurrently with the accomplishment of paragraph (f) of this AD: Accomplish all of the actions specified in the Accomplishment Instructions of Boeing Service Bulletin 757–29–0043, dated June 21, 1990.

Related Investigative and Corrective Actions

(h) Except as required by paragraph (i) of this AD: If any loose or damaged parts are found during any inspection required by paragraph (f) of this AD, before further flight, do all of the related investigative and corrective actions specified in Part 1 and Part 2 of the Accomplishment Instructions of Boeing Service Bulletin 757–29–0064, or Boeing Service Bulletin 757–29–0065, both dated February 29, 2004; as applicable.

Repair Information

(i) If any damage is found during any inspection required by this AD, and the service bulletin specifies contacting Boeing for appropriate action: Before further flight, repair per a method approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA. For a repair method to be approved, the approval letter must specifically refer to this AD.

Note 2: There is no terminating action currently available for the repetitive inspections required by paragraph (f) of this AD.

Alternative Methods of Compliance (AMOCs)

(j) The Manager, Seattle ACO, has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

Issued in Renton, Washington, on January 18, 2005.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 05–1587 Filed 1–27–05; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2005–20135; Directorate Identifier 2003–NM–231–AD]

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Model DC–8–33 and –43 Airplanes; Model DC–8F–54 and DC–8F–55 Airplanes; and Model DC–8–50, –60, –60F, –70, and –70F Series Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede an existing airworthiness directive (AD) for certain McDonnell Douglas series airplanes. That AD currently requires repetitive inspections of the electrical connectors of the explosive cartridge wiring of the engine fire extinguisher containers to verify if the identification number labels are installed and legible; repetitive electrical tests of all explosive cartridge wiring of the engine fire extinguisher containers to verify proper installation and function; and corrective actions if necessary. This proposed AD would also require an inspection of the emergency shut off wire assembly; installation of lanyards on the electrical connectors for the engine fire extinguishing agent containers and for the auxiliary power unit fire extinguishing agent containers if applicable; and related investigative/corrective actions, as applicable. This proposed AD is prompted by reports of cross-wired electrical connectors of the engine fire extinguishing agent containers. We are proposing this AD to detect and correct cross-wired electrical connectors of the fire extinguishing system, which could release fire extinguishing agent into the incorrect engine nacelle in the event of an engine fire.

DATES: We must receive comments on this proposed AD by March 14, 2005.

ADDRESSES: Use one of the following addresses to submit comments on this proposed AD.

- *DOT Docket Web site:* Go to *http://dms.dot.gov* and follow the instructions for sending your comments electronically.
- *Government-wide rulemaking Web site:* Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 400 Seventh Street SW., Nassif Building, room PL–401, Washington, DC 20590.
- *Fax:* (202) 493–2251.
- *Hand Delivery:* Room PL–401 on the plaza level of the Nassif Building, 400 Seventh Street SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Boeing Commercial Airplanes, Long Beach Division, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Data and Service Management, Dept. C1–L5A (D800–0024).

You can examine the contents of this AD docket on the Internet at *http://dms.dot.gov*, or in person at the Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street SW., room PL–401, on the plaza level of the Nassif Building, Washington, DC. This docket number is FAA–2005–20135; the directorate identifier for this docket is 2003–NM–231–AD.

FOR FURTHER INFORMATION CONTACT: William S. Bond, Aerospace Engineer, Propulsion Branch, ANM–140L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712–4137; telephone (562) 627–5253; fax (562) 627–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to submit any relevant written data, views, or arguments regarding this proposed AD. Send your comments to an address listed under **ADDRESSES.** Include ''Docket No. FAA–2005–20135; Directorate Identifier 2003-NM–231-AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of the proposed AD. We will consider all comments received by the closing date and may amend the proposed AD in light of those comments.

We will post all comments we receive, without change, to *http://dms.dot.gov*, including any personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this proposed AD. Using the search function of our docket Web site, anyone can find and read the comments in any of our dockets, including the name of the individual who sent the comment (or signed the comment on behalf of an association, business, labor union, etc.). You may review the DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78), or you may visit *http://dms.dot.gov*.

Examining the Docket

You can examine the AD docket on the Internet at *http://dms.dot.gov*, or in person at the Docket Management Facility office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Management Facility office (telephone (800) 647–5227) is located on the plaza level of the Nassif Building at the DOT street address stated in the **ADDRESSES** section. Comments will be available in the AD docket shortly after the DMS receives them.

Discussion

On November 29, 2001, we issued AD 2001–25–01, amendment 39–12553 (66 FR 63157, December 5, 2001), for certain McDonnell Douglas Model DC–8–33, –43, –51, –52, –53, and –55 series airplanes; Model DC–8F–54 and –55 series airplanes; and Model DC–8–61, –61F, –62, –62F, –63, –63F, –71, –71F, –72, –72F, –73, and –73F series airplanes airplanes. That AD requires repetitive inspections of the electrical connectors of the explosive cartridge wiring of the engine fire extinguisher containers to verify if the identification number labels are installed and legible; repetitive electrical tests of all explosive cartridge wiring of the engine fire extinguisher containers to verify proper installation and function; and corrective actions if necessary. That AD was prompted by reports of electrical connectors of the engine fire extinguishing agent containers being cross–wired on certain McDonnell Douglas DC–8 series airplanes. We issued that AD to detect and correct cross–wired electrical connectors of the fire extinguishing system, which could release fire extinguishing agent into the incorrect engine nacelle in the event of an engine fire.

Actions Since Existing AD Was Issued

The preamble to AD 2001–25–01 explains that we consider the requirements ''interim action'' and were considering further rulemaking. We now have determined that further rulemaking is indeed necessary, and this proposed AD follows from that determination.

Relevant Service Information

We have reviewed Boeing Service Bulletin DC8–26–047, Revision 1, dated

September 4, 2003. The service bulletin describes the following procedures:

1. Doing a general visual inspection of the emergency shut off wire assembly to determine if the length of wire harness AAG at P1–510 can be connected to R5–74 and to determine if the length of wire harness ABG at P1–511 can be connected to R5–73; and corrective action. The corrective action includes shortening wire harness AAG at P1–510, if cross connection is possible.

2. Installing lanyards on the electrical connectors for the engine fire extinguishing agent containers in the left and right wing front spar; and related investigative/corrective actions. The related investigative actions include inspecting the explosive cartridge electrical connectors for the engine fire extinguisher containers to determine if the identification number labels are installed and legible; and testing the installation of the engine fire extinguisher containers. The corrective actions include installing any missing label or replacing any illegible label with a new label, as applicable; and troubleshooting and repairing the wiring of the fire extinguishing (''firex'') discharge system if any cockpit warning lamp fails to light during any test of the engine fire extinguisher containers.

3. For airplanes equipped with an auxiliary power unit (APU) installation in the forward cargo compartment at station Y=640.000, installing lanyards on the electrical connectors for the APU fire extinguishing agent containers and related investigative/corrective actions. The related investigative action includes inspecting the explosive cartridge electrical connectors for the APU fire extinguisher containers to determine if the identification number labels are installed and legible. The corrective action includes installing any missing or replacing any illegible identification label with a new label, as applicable, on the explosive cartridge electrical connectors for the APU fire extinguisher containers. We have determined that accomplishment of the actions specified in the service information will adequately address the unsafe condition.

FAA's Determination and Requirements of the Proposed AD

We have evaluated all pertinent information and identified an unsafe condition that is likely to exist or develop on other products of this same type design. Therefore, we are proposing this AD, which would supersede AD 2001–25–01. This proposed AD would continue to require repetitive inspections of the electrical connectors of the explosive cartridge wiring of the engine fire extinguisher containers to verify if the identification number labels are installed and legible; repetitive electrical tests of all explosive cartridge wiring of the engine fire extinguisher containers to verify proper installation and function; and corrective actions if necessary. This proposed AD would also require an inspection of the emergency shut off wire assembly; installation of lanyards on the electrical connectors for the engine fire extinguishing agent containers and for the APU fire extinguishing agent containers if applicable; and related investigative/corrective actions, as applicable. Accomplishment of these new actions would terminate the requirement for repetitive inspections and electrical tests. This proposed AD would require you to use the service information described previously to perform these actions, except as discussed under ''Difference Between the Proposed AD and Service Bulletin.''

Difference Between the Proposed AD and Service Bulletin

Operators should note that, although the service bulletin recommends accomplishing the service bulletin ''at a scheduled maintenance period when manpower, materials, and facilities are available,'' we have determined that such an imprecise compliance time would not address the identified unsafe condition in a timely manner. In developing an appropriate compliance time for this proposed AD, we considered the degree of urgency associated with the subject unsafe condition, the average utilization of the affected fleet, and the time necessary to perform the modification (between 5 to 6 hours). In light of all of these factors, we find that an 18–month compliance time represents an appropriate interval of time for affected airplanes to continue to operate without compromising safety. We have coordinated this finding with the manufacturer and they concur.

Clarification Between the Proposed AD and Service Bulletin

Operators should note that, although the effectivity of the service bulletin includes McDonnell Douglas Model DC–8–54 airplanes, we have not included it in the applicability of the proposed AD because it is not listed on Type Certificate Data Sheet (TCDS) No. 4A25, Revision 37, or any other TCDS. In addition, the manufacturer has confirmed that its listing in the effectivity of the service bulletin is a typographical error. The manufacturer also indicated that Model DC–8F–54 and Model DC–8F–55 airplanes were misidentified in the effectivity of the service bulletin as Model DC–8–54F and Model DC–8–55F, respectively. The applicability of this AD references the correct model designations for these airplanes.

Change to Existing AD

This proposed AD would retain all requirements of AD 2001–25–01. Since AD 2001–25–01 was issued, the AD format has been revised, and certain paragraphs have been rearranged. As a result, the corresponding paragraph identifiers have changed in this proposed AD, as listed in the following table:

REVISED PARAGRAPH IDENTIFIERS

Requirement in AD 2001–25–01	Corresponding requirement in this proposed AD
paragraph (a)	paragraph (f).

Costs of Compliance

This proposed AD would affect about 233 worldwide airplanes. The following table provides the estimated costs, using an average labor rate of $65 per hour, for U.S. operators to comply with this proposed AD.

ESTIMATED COSTS

Action	Work hours	Parts	Cost per airplane	Number of U.S.-registered airplanes	Fleet cost
Inspection of the electrical connectors of the explosive cartridge wiring and electrical test of all explosive cartridge wiring (required by AD 2001–25–01).	3	$0	$195, per inspection/testing cycle.	177	$34,515

ESTIMATED COSTS—Continued

Action	Work hours	Parts	Cost per airplane	Number of U.S.-registered airplanes	Fleet cost
General visual inspection of the emergency shut off wire assembly (new proposed action).	1	0	65, per inspection cycle ..	177	11,505
Installation of lanyards on electrical connectors for engine fire extinguishing agent containers (new proposed action).	4	58 (For engine firex)	318	177	56,268
Installation of lanyards on electrical connectors for APU fire extinguishing agent containers if applicable (new proposed action).	1	52 (For APU firex)	117	177	20,709

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this AD.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by removing amendment 39–12553 (66 FR 63157, December 5, 2001) and adding the following new airworthiness directive (AD):

McDonnell Douglas: Docket No. FAA–2005–20135; Directorate Identifier 2003–NM–231–AD.

Comments Due Date

(a) The Federal Aviation Administration must receive comments on this airworthiness directive (AD) action by March 14, 2005.

Affected ADs

(b) This AD supersedes AD 2001–25–01, amendment 39–12553. Accomplishment of paragraph (g) and (h) of this AD terminates certain requirements of AD 2001–25–01, amendment 39–12553.

Applicability

(c) This AD applies to McDonnell Douglas Model DC–8–33, DC–8–43, DC–8–51, DC–8–52, DC–8–53, DC–8F–54, DC–8–55, DC–8F–55, DC–8–61, DC–8–61F, DC–8–62, DC–8–62F, DC–8–63, DC–8–63F, DC–8–71, DC–8–71F, DC–8–72, DC–8–72F, DC–8–73, and DC–8–73F airplanes, certificated in any category; as listed in Boeing Service Bulletin DC8–26–047, Revision 1, dated September 4, 2003.

Unsafe Condition

(d) This AD was prompted by reports of cross-wired electrical connectors of the engine fire extinguishing agent containers. We are issuing this AD to detect and correct cross-wired electrical connectors of the fire extinguishing system, which could release fire extinguishing agent into the incorrect engine nacelle in the event of an engine fire.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Requirements of AD 2001–25–01, Amendment 39–12553

Repetitive Inspections and Tests, and Corrective Action(s), If Necessary

(f) Within 30 days after December 20, 2001 (the effective date of AD 2001–25–01, amendment 39–12553), do the action(s) specified in paragraphs (f)(1) and (f)(2) of this AD, in accordance with Boeing Alert Service Bulletin DC8–26A046, dated November 7, 2001.

(1) Do an inspection of the electrical connectors of the explosive cartridge wiring of the engine fire extinguisher containers to verify if the identification number labels are installed and legible. If any identification number label is missing or is not legible, before further flight, install a label or replace the label with a new label, as applicable. Repeat the inspection after each maintenance action for the Firex Discharge system.

(2) Do an electrical test of all explosive cartridge wiring of the engine fire extinguisher containers to verify proper installation and function, using the cockpit warning lamps. If the lamp fails to illuminate, before further flight, troubleshoot and repair the wiring of the Firex Discharge system. Repeat the test after each maintenance action for the Firex Discharge system.

Note 1: Inspections, tests, and corrective actions, if necessary, done per Boeing BOECOM M–7200–01–02632, dated November 5, 2001, before December 20, 2001 (the effective date of AD 2001–25–01, amendment 39–12553), are considered acceptable for compliance with the requirements of paragraph (f) of this AD.

New Requirements of This AD

Inspection and Installation

(g) Within 18 months of the effective date of this AD, do a general visual inspection of the emergency shut off wire assembly to determine if the length of wire harness AAG at P1–510 can be connected to R5–74 and to determine if the length of wire harness ABG

at P1–511 can be connected to R5–73; and, before further flight, do the corrective action, as applicable; by accomplishing all of the actions specified in paragraph B.1.b. of the Accomplishment Instructions of Boeing Service Bulletin DC8–26–047, Revision 1, dated September 4, 2003.

Note 2: For the purposes of this AD, a general visual inspection is defined as: ''A visual examination of an interior or exterior area, installation, or assembly to detect obvious damage, failure, or irregularity. This level of inspection is made from within touching distance unless otherwise specified. A mirror may be necessary to enhance visual access to all exposed surfaces in the inspection area. This level of inspection is made under normally available lighting conditions such as daylight, hangar lighting, flashlight, or droplight and may require removal or opening of access panels or doors. Stands, ladders, or platforms may be required to gain proximity to the area being checked.''

(h) Within 18 months of the effective date of this AD, install lanyards on the electrical connectors for the engine fire extinguishing agent containers in the left and right wing front spar; and, before further flight, do all the related investigative/corrective actions, as applicable; by accomplishing all of the actions specified in paragraph B.1.c. of the Accomplishment Instructions of Boeing Service Bulletin DC8–26–047, Revision 1, dated September 4, 2003.

Installation If Applicable

(i) For airplanes equipped with an auxiliary power unit (APU) installation in the forward cargo compartment at station Y=640.000: Within 18 months of the effective date of this AD, install lanyards on the electrical connectors for the APU fire extinguishing agent containers; and, before further flight, do all the related investigative/corrective actions, as applicable; by accomplishing all of the actions specified in paragraph B.2. of the Accomplishment Instructions of Boeing Service Bulletin DC8–26–047, Revision 1, dated September 4, 2003.

Terminating Action

(j) Accomplishment of the actions specified in paragraphs (g) and (h) of this AD terminates the repetitive inspections and electrical tests required by paragraph (f) of this AD.

Credit for Previous Service Bulletin

(k) Actions done before the effective date of this AD in accordance with Boeing Service Bulletin DC8–26–047, dated April 2, 2003, is acceptable for compliance with the corresponding requirements in paragraphs (g), (h), and (i) of this AD.

Alternative Methods of Compliance (AMOCs)

(l) The Manager, Los Angeles Aircraft Certification Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19.

Issued in Renton, Washington, on January 18, 2005.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

14 CFR Part 382

[Docket No. OST–2004–19482]

RIN 2105–AC97

Nondiscrimination on the Basis of Disability in Air Travel

AGENCY: Office of the Secretary (OST), U.S. Department of Transportation (DOT).

ACTION: Extension of comment period on proposed rule.

SUMMARY: The Department is extending through March 4, 2005, the period for interested persons to submit comments to its proposed rule to amend regulations implementing the Air Carrier Access Act.

DATES: Comments must be received by March 4, 2005. Comments received after this date will be considered to the extent practicable.

ADDRESSES: Please include the docket number of this document in all comments submitted to the docket. Written comments should be sent to Docket Clerk, Department of Transportation, 400 7th Street, SW., Room PL–401, Washington, DC 20590. For confirmation of the receipt of written comments, commenters may include a stamped, self-addressed postcard. The Docket Clerk will date-stamp the postcard and mail it back to the commenter. Comments will be available for inspection at this address from 10 a.m. to 5:30 p.m., Monday through Friday. Comments can also be reviewed through the Dockets Management System (DMS) pages of the Department's Web site (*http://dms.dot.gov*). Commenters may also submit comments electronically. Instructions appear on the DMS Web site.

FOR FURTHER INFORMATION CONTACT: Robert C. Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, 400 7th Street, SW., Room 10424, Washington DC., 20590. Phone 202–366–9310; TTY: 202–755–7687; Fax: 202–366–9313. E-mail: *bob.ashby@ost.dot.gov*.

SUPPLEMENTARY INFORMATION: On November 4, 2004, the Department of Transportation issued a notice of proposed rulemaking (NPRM) that would amend 49 CFR Part 382, the Department's regulation implementing the Air Carrier Access Act (69 FR 64364). The NPRM would apply the requirements of Part 382 to foreign air carriers, require air carrier web sites to be accessible to persons with impaired vision, and generally update and improve the organization of the existing regulation. The original comment closing date was February 2, 2005.

The Air Transport Association (ATA) requested an extension of the comment period, in order to permit them to gather additional information from their members and present better-informed comments to the Department. They requested a 30-day extension of the comment period. This request was supported by comments from the International Air Transport Association, Regional Airline Association, and Air Carrier Association of America.

The Department is granting the requested extension, which we hope will result in more thorough comments to the docket than might otherwise be possible, not only from ATA. We also urge, given the additional time provided by this extension, that commenters make every effort to provide detailed data concerning the issues they raise.

Therefore, the Department of Transportation will extend the comment period 30 days, ending March 4, 2005. We do not anticipate the need for any further extensions.

Issued this 19th day of January, 2005, at Washington, DC.

Jeffrey A. Rosen,

General Counsel.

BILLING CODE 4910–62–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–152914–04]

RIN 1545–BD97

Revised Regulations Concerning Disclosure of Relative Values of Optional Forms of Benefit

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations that would revise final regulations that were issued on

December 17, 2003, under section 417(a)(3) of the Internal Revenue Code concerning content requirements applicable to explanations of qualified joint and survivor annuities and qualified preretirement survivor annuities payable under certain retirement plans. These regulations affect plan sponsors and administrators, and participants in and beneficiaries of, certain retirement plans.

DATES: Written and electronic comments and requests for a public hearing must be received by April 28, 2005.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–152914–04), room 5203, Internal Revenue Service, PO Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to: CC:PA:LPD:PR (REG–152914–04), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC, or sent electronically, via the IRS Internet site at *http://www.irs.gov/regs* or via the Federal eRulemaking Portal at *http://www.regulations.gov* (indicate IRS and REG–152914–04).

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Bruce Perlin at (202) 622–6090 (not a toll-free number); concerning submissions or hearing requests, Lanita Van Dyke, (202) 622–7180 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collections of information contained in this notice of proposed rulemaking have been previously reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) under control number 1545–0928.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

Section 417(a) provides rules under which a participant (with spousal consent) may waive payment of the participant's benefit in the form of qualified joint and survivor annuity (QJSA). Specifically, section 417(a)(3) provides that a plan must provide to each participant, within a reasonable period before the annuity starting date, a written explanation that includes the following information: (1) The terms and conditions of the QJSA; (2) the participant's right to make an election to waive the QJSA form of benefit; (3) the effect of such an election; (4) the rights of the participant's spouse; and (5) the right to revoke an election to waive the QJSA form of benefit.

Section 205 of the Employee Retirement Income Security Act of 1974 (ERISA), Public Law 93–406 (88 Stat. 829) as subsequently amended, provides rules that are parallel to the rules of sections 401(a)(11) and 417 of the Internal Revenue Code. In particular, section 205(c)(3) of ERISA provides a rule parallel to the rule of section 417(a)(3) of the Code.

Section 1.401(a)–20, which provides rules governing the requirements for a waiver of the QJSA, was published in the **Federal Register** on August 19, 1988 (TD 8219) (53 FR 31837). Section 1.401(a)–20, Q & A–36, as published in 1988, set forth requirements for the explanation that must be provided under section 417(a)(3) as a prerequisite to waiver of a QJSA. Under those requirements, such a written explanation must contain a general description of the eligibility conditions and other material features of the optional forms of benefit and sufficient additional information to explain the relative values of the optional forms of benefit available under the plan (*e.g.*, the extent to which optional forms are subsidized relative to the normal form of benefit or the interest rates used to calculate the optional forms). In addition, § 1.401(a)–20, Q & A–36, as published in 1988, provided that the written explanation must comply with the requirements set forth in § 1.401(a)–11(c)(3). Section 1.401(a)–11(c)(3) was issued prior to the enactment of section 417, and provides rules relating to written explanations that were required prior to a participant's election of a preretirement survivor annuity or election to waive a joint and survivor annuity. Section 1.401(a)–11(c)(3)(i)(C) provides that such a written explanation must contain a general explanation of the relative financial effect of these elections on a participant's annuity.

For a married participant, the QJSA must be at least as valuable as any other optional form of benefit payable under the plan at the same time. *See* § 1.401(a)–20, Q & A–16. Further, the anti-forfeiture rules of section 411(a) prohibit a participant's benefit under a defined benefit plan from being satisfied through payment of a form of benefit that is actuarially less valuable than the value of the participant's accrued benefit expressed in the form of an annual benefit commencing at normal retirement age. These determinations must be made using reasonable actuarial assumptions. However, see section 417(e)(3) and § 1.417(e)–1(d) for actuarial assumptions required for use in certain present value calculations.

Final regulations under section 417(a)(3) regarding disclosure of the relative value and financial effect of optional forms of benefit as part of QJSA explanations provided to participants receiving qualified retirement plan distributions were published in the **Federal Register** on December 17, 2003. *See* § 1.417(a)(3)–1 (68 FR 70141). The 2003 regulations are generally effective for QJSA explanations provided with respect to annuity starting dates beginning on or after October 1, 2004.

The 2003 regulations were issued in response to concerns that, in certain cases, the information provided to participants under section 417(a)(3) regarding available distribution forms pursuant to § 1.401(a)–20, Q & A–36, does not adequately enable them to compare those distribution forms without professional advice. In particular, participants who are eligible for early retirement benefits in the form of both subsidized annuity distributions and unsubsidized single-sum distributions may be receiving explanations that do not adequately disclose the value of the subsidy that is foregone if the single-sum distribution is elected. In such a case, merely disclosing the amount of the single-sum distribution and the amount of the annuity payments would not adequately enable a participant to make an informed comparison of the relative values of those distribution forms. The 2003 regulations address this problem, as well as the problem of disclosure in other cases where there are significant differences in value among optional forms, and also clarify the rules regarding the disclosure of the financial effect of benefit payments.

A number of commentators requested that the effective date of the 2003 regulations be postponed. Among the reasons cited is the need in some plans for sponsors to complete an extensive review and analysis of optional forms of benefit in order to prepare proper comparisons of the relative values of those optional forms to the QJSA. They noted that recently proposed regulations under section 411(d)(6) would permit elimination of certain optional forms of benefit and that many plan sponsors can be expected to engage in a thorough

review of all of the optional forms of benefit under their plans following publication of the those regulations in final form. *See* § 1.411(d)–3, 69 FR 13769 (March 24, 2004). These commentators argued that it would be inefficient for plans to be required to incur the costs of two such extensive analyses in succession, rather than a single analysis of optional forms that might serve to some extent for purposes of both the relative value regulations and the section 411(d)(6) regulations. After consideration of these comments, Treasury and the IRS issued Announcement 2004–58 (2004–29 I.R.B. 66), which postponed the effective date of the 2003 regulations under § 1.417(a)(3)–1 for certain QJSA explanations.

Under section 101 of Reorganization Plan No. 4 of 1978 (43 FR 47713), the Secretary of the Treasury has interpretive jurisdiction over ERISA provisions that are parallel to the Code provisions addressed in these regulations. Therefore, these proposed regulations would apply for purposes of the parallel rules in section 205(c)(3) of ERISA, as well as for section 417(a)(3) of the Code.

Explanation of Provisions

Consistent with Announcement 2004–58, these proposed regulations would modify the 2003 regulations to provide that the 2003 regulations are generally effective for QJSA explanations provided with respect to annuity starting dates beginning on or after February 1, 2006. In the interim, plans that do not comply with § 1.417(a)(3)–1 would be required to comply with the 1988 regulations regarding disclosure of relative value and financial effect.

However, the existing effective date under § 1.417(a)(3)–1 of the 2003 regulations is retained for explanations with respect to any optional form of benefit that is subject to the requirements of section 417(e)(3) (*e.g.*, single sums, social security level income options, distributions in the form of partial single sums in combination with annuities, or installment payment options) if the actuarial present value of that optional form is less than the actuarial present value (as determined under section 417(e)(3)) of the QJSA. Thus, for example, a QJSA explanation provided with respect to an annuity starting date beginning on or after October 1, 2004, must comply with § 1.417(a)(3)–1 to the extent that the plan provides for payment to that participant in the form of a single sum that does not reflect an early retirement subsidy available under the QJSA. Where the existing effective date is retained, the plan must disclose the relative value of the QJSA for the participant even if the plan provides a disclosure of relative values that is not tailored to the participant's marital status. Accordingly, if a plan provides a relative value disclosure based on the single life annuity (the QJSA for a single participant) to a married participant, the plan must also include a comparison of the value of the QJSA to the value of the single life annuity.

The proposed regulations include a special rule that would enable a plan to use the delayed effective date rule even if there are minor differences between the value of an optional form and the value of the QJSA for a married participant that are caused by the calculation of the amount of the optional form of benefit based on the life annuity rather than on the QJSA. Under this special rule, solely for purposes of the effective date provisions, the actuarial present value of an optional form is treated as not being less than the actuarial present value of the QJSA if the following two conditions are met. First, using the applicable interest rate and applicable mortality table under §§ 1.417(e)–1(d)(2) and (3), the actuarial present value of that optional form is not less than the actuarial present value of the QJSA for an unmarried participant. Second, using reasonable actuarial assumptions, the actuarial present value of the QJSA for an unmarried participant is not less than the actuarial present value of the QJSA for a married participant.

These proposed regulations would also modify the 2003 regulations in several other respects. First, for purposes of disclosing the normal form of benefit as part of a disclosure made in the form of generally applicable information, reasonable estimates of the type permitted to be used to disclose participant-specific information may be used to determine the normal form of benefit, but only if the plan follows the requirements applicable to reasonable estimates used in disclosing participant-specific information (such as offering a more precise calculation upon request and revising previously offered information consistent with the more precise information). Second, a QJSA explanation does not fail to satisfy the requirements for QJSA explanations made in the form of disclosures of generally applicable information merely because the QJSA explanation contains an item of participant-specific information in place of the corresponding generally applicable information.

In addition, the proposed regulations would modify § 1.401(a)–20, Q&A–16, to clarify the interaction of the rule prohibiting a plan from providing an option to a married individual that is worth more than the QJSA with the requirement that certain optional forms of benefit be calculated using specified actuarial assumptions. Under that clarification, a plan would not fail to satisfy the requirements of § 1.401(a)–20, Q&A–16, merely because the amount payable under an optional form of benefit that is subject to the minimum present value requirement of section 417(e)(3) is calculated using the applicable interest rate (and, for periods when required, the applicable mortality table) under section 417(e)(3).

Dates of Applicability

The changes to § 1.401(a)–20, A–36, and § 1.417(a)(3)–1 are proposed to apply as if they had been included in TD 9099 (68 FR 70141). The change to § 1.401(a)–20, Q&A–16, is proposed to apply as if it had been included in TD 8219 (53 FR 31837). Taxpayers may rely on these proposed regulations for guidance pending the issuance of final regulations.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the regulation does not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any electronic or written comments (preferably a signed original and eight (8) copies) that are submitted timely to the IRS. In addition to the other requests for comments set forth in this document, the IRS and Treasury also request comments on the clarity of the proposed rule and how it may be made easier to understand. All comments will be available for public inspection and copying. A public hearing will be scheduled if one is requested.

Drafting Information

The principal authors of these regulations are Bruce Perlin and Linda S.F. Marshall of the Office of the Division Counsel/Associate Chief Counsel (Tax Exempt and Government Entities). However, other personnel from the IRS and Treasury participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1986

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.401(a)–20 is amended by:

1. Adding a sentence to the end of Q&A–16.

2. Adding a sentence to the end of Q&A–36.

The additions read as follows:

§ 1.401(a)–20 Requirements of qualified joint and survivor annuity and qualified preretirement survivor annuuity.

* * * * *

A–16 * * * A plan does not fail to satisfy the requirements of this Q&A–16 merely because the amount payable under an optional form of benefit that is subject to the minimum present value requirement of section 417(e)(3) is calculated using the applicable interest rate (and, for periods when required, the applicable mortality table) under section 417(e)(3).

* * * * *

A–36 * * * However, the rules of § 1.401(a)–20, Q&A–36, as it appeared in 26 CFR Part 1 revised April 1, 2003, apply to the explanation of a QJSA under section 417(a)(3) for an annuity starting date prior to February 1, 2006.

* * * * *

Par. 3. Section 1.417(a)(3)–1 is amended by:

1. Removing the language ''paragraph (c)(3)(iii) of'' from paragraph (c)(2)(ii)(A).

2. Adding a sentence to the end of paragraph (d)(2)(ii).

3. Adding paragraph (d)(5).

4. Revising paragraph (f).

The additions and revision read as follows:

§ 1.417(a)(3)–1 Required explanation of qualified joint and survivor annuity and qualified preretirement survivor annuity.

* * * * *

(d) * * *

(2) * * *

(ii) *Actual benefit must be disclosed.* * * * Reasonable estimates of the type described in paragraph (c)(3)(i) may be used to determine the normal form of benefit for purposes of this paragraph (d)(2)(ii) if the requirements of paragraphs (c)(3)(ii) and (iii) of this section are satisfied with respect to those estimates.

* * * * *

(5) *Use of participant-specific information in generalized notice.* A QJSA explanation does not fail to satisfy the requirements of this paragraph (d) merely because it contains an item of participant-specific information in place of the corresponding generally applicable information.

* * * * *

(f) *Effective date*—(1) *General effective date for QJSA explanations.* Except as provided in paragraph (f)(2) of this section, this section applies to a QJSA explanation with respect to any distribution with an annuity starting date that is on or after February 1, 2006.

(2) *Special effective date for certain QJSA explanations—(i) Application to QJSA explanations with respect to certain optional forms that are less valuable than the QJSA.* This section also applies to a QJSA explanation with respect to any distribution with an annuity starting date that is on or after October 1, 2004, and before February 1, 2006, if the actuarial present value of any optional form of benefit that is subject to the requirements of section 417(e)(3) (*e.g.*, single sums, distributions in the form of partial single sums in combination with annuities, social security level income options, and installment payment options) is less than the actuarial present value (as determined under § 1.417(e)–1(d)) of the QJSA. For purposes of this paragraph (f)(2)(i), the actuarial present value of an optional form is treated as not less than the actuarial present value of the QJSA if—

(A) Using the applicable interest rate and applicable mortality table under § 1.417(e)–1(d)(2) and (3), the actuarial present value of that optional form is not less than the actuarial present value of the QJSA for an unmarried participant; and

(B) Using reasonable actuarial assumptions, the actuarial present value of the QJSA for an unmarried participant is not less than the actuarial present value of the QJSA for a married participant.

(ii) *Requirement to disclose differences in value for certain optional forms.* A QJSA explanation with respect to any distribution with an annuity starting date that is on or after October 1, 2004, and before February 1, 2006, is only required to be provided under this section with respect to—

(A) An optional form of benefit that is subject to the requirements of section 417(e)(3) and that has an actuarial present value that is less than the actuarial present value of the QJSA (as described in paragraph (f)(2)(i) of this section); and

(B) The QJSA (determined without application of paragraph (c)(2)(ii) of this section).

(3) *Annuity starting date.* For purposes of paragraphs (f)(1) and (2) of this section, in the case of a retroactive annuity starting date under section 417(a)(7), as described in § 1.417(e)–1(b)(3)(vi), the date of commencement of the actual payments based on the retroactive annuity starting date is substituted for the annuity starting date.

(4) *Effective date for QPSA explanations.* This section applies to any QPSA explanation provided on or after July 1, 2004.

Mark E. Matthews,

Deputy Commissioner for Services and Enforcement.

BILLING CODE 4830–01–P

DEPARTMENT OF DEFENSE

32 CFR Part 202

Restoration Advisory Boards (RABs)

AGENCY: Department of Defense, Office of the Deputy Under Secretary of Defense (Installations and Environment), DoD.

ACTION: Proposed rule.

SUMMARY: The Department of Defense (DoD) requests public comment on these proposed regulations regarding the scope, characteristics, composition, funding, establishment, operation, adjournment, and dissolution of Restoration Advisory Boards (RABs). DoD has proposed these regulations in response to 10 U.S.C. 2705(d)(2)(A), which requires the Secretary of Defense to prescribe regulations regarding RABs.

The propose of the RAB is to facilitate public participation in DoD environmental restoration activities and active and closing DoD installations and formerly used defense sites where local communities express interest in such activities. The proposed regulations are based on DoD's current policies for

reestablishing and operating RABs, as well as DoD's experience over the past ten years in using RABs.

DATES: Comments on this proposed rule must be submitted on or before March 29, 2005.

ADDRESSES: Comments on this proposal should be sent to the following address: RAB Rule, P.O. Box #5413, McLean, VA 22103–5413.

The public must send the original, and (whenever possible) a 3.5-inch computer disk containing comments in a common word processing format such as Microsoft Word. Public comments will also be collected via the Defense Environmental Network and Information eXchange (DENIX), located at the following Web site: *https://www.denix.osd.mil/rabruleTBD.*

FOR FURTHER INFORMATION CONTACT: Ms. Patricia Ferrebee, Office of the Deputy Under Secretary of Defense (Environmental Management), at (703) 695–6107.

SUPPLEMENTARY INFORMATION:

Preamble Outline

I. Authority

These regulations are proposed under the authority of section 2705 of title 10, United States Code (U.S.C.).

II. Background

The Defense Environmental Restoration Program (DERP) was established in 1986 to ''carry out a program of environmental restoration of facilities under the jurisdiction of the Secretary.'' Goals of the program include: ''(1) Identification, investigation, research and development, and cleanup of contamination from hazardous substances, and pollutants and contaminants. (2) Correction of other environmental damage (such as detection and disposal of unexploded ordnance) which creates an imminent and substantial endangerment to the public health or welfare or to the environment. (3) Demolition and removal of unsafe buildings and structures, including buildings and structures of the Department of Defense at sites formerly used by or under the jurisdiction of the Secretary.'' (10 U.S.C. 2701) DoD conducts these activities at active and closing Department of Defense (DoD) installations and formerly used defense sites (FUDS). DoD created distinct programs within the DERP to address sites environmentally impacted by DoD's past activities. The Installation Restoration program (IRP) established in 1986 covers environmental restoration activities to address hazardous substances, and, pollutants and contaminants. In September 2001, DoD established the Military Munitions Response program (MMRP) to manage cleanup of unexploded ordnance, discarded military munitions, and munitions constituents at areas other than operational ranges. The Building Demolition/Debris Removal (BD/DR) program category addresses the demolition and removal of unsafe buildings and structures at facilities or sites that are or were owned by, leased to, or otherwise possessed by the United States and under the jurisdiction of the Secretary of Defense.

During the early years of the DERP, the Office of the Secretary of Defense (OSD) managed the Defense Environmental Restoration Account (DERA) for the Department's Military Components—the Army, Navy, Air Force, Defense Logistics Agency (DLA), and Defense Threat Reduction Agency (DTRA)—who execute environmental restoration activities at their respective installations. In 1996, DoD decided to separate, or devolve, DERA into five Environmental Restoration (ER) accounts to better align each Military Component's DERP responsibilities and accountability for environmental cleanup efforts. Policy direction and oversight of the DERP is the responsibility of the Office of the Deputy Under Secretary of defense (Installations and Environment). The DoD Military Components are responsible for program implementation. The Army, Navy, and Air Force manage their own ER accounts. The U.S. Army Corps of Engineers manages the FUDS program for the Army, the Department's designated executive agent for FUDS. The FUDS program addresses environmental impacts on properties DoD once owned, leased, or operated and were under the jurisdiction of the Secretary of Defense. The final ER account, the Defense-Wide account, funds cleanup programs for DLA and DTRA in addition to providing the operating funds for OSD's oversight of the DERP. While DoD manages environmental restoration at Base Realignment and Closure (BRAC) installations as part of the DERP, it funds these environmental restoration activities through a separate BRAC Program account, which is part of DoD's overall Military Construction appropriation.

DoD recognizes the importance of public involvement at military installations. For the purposes of this proposed rule, the term installation means operating and closing DoD installations and FUDS that require environmental restoration. DoD has developed community involvement policies to ensure that local communities are provided the

opportunity as early as possible to obtain information about, and provide input to, the decisions regarding the environmental restoration activities at military installations. It is DoD policy to provide the public an opportunity to participate through the establishment of RABs, among other public involvement opportunities.

Based on statutory and regulatory requirements for community involvement and recommendations from the Federal Facilities Environmental Restoration Dialogue Committee (FFERDC), DoD has strengthened its community involvement efforts, including the RAB initiative, under its environmental restoration program. DoD believes that working in partnership with local communities and addressing the concerns of those communities early in the restoration process has enhanced its efforts under, and increased the credibility of, the environmental restoration program. DoD remains committed to involving communities neighboring its installations in environmental restoration decision processes that may affect human health, safety, and the environment. RABs have become a significant component of DoD's efforts to increase community involvement in DoD's environmental restoration program. RABs provide a continuous forum through which members of affected communities can provide input to an installation's ongoing environmental restoration activities. RAB members provide recommendations regarding environmental restoration to DoD, RABs are not Federal Advisory Committees and are specifically excluded from the requirements of the Federal Advisory Committee Act (10 U.S.C. 2705(d)(2)).

On September 27, 1994, DoD and the Environmental Protection Agency (EPA) jointly issued guidelines for the formation and operation of RABs (''Restoration Advisory Board Implementation Guidelines''). The guidelines describe how to implement the DoD RAB policy and identify each stakeholder's role with the RAB. The guidelines also state that existing Technical Review Committees (TRCs) or similar groups may be expanded or modified to become RABs, and that RABs may fulfill the statutory requirements for establishing TRCs (10 U.S.C. 2705(d)(1) grants DoD the authority to establish RABs instead of TRCs at installations undergoing environmental restoration).

As of September 30, 2003, DoD reported the existence of 298 active RABs across all of the Military Components' installations. Over the past several years, the number of RABs has remained fairly consistent, although the number fluctuates as some RABs adjourn and others form. RABs are one part of DoD's and the Military Components' extensive community outreach and public participation activities, which include compliance with the public notice and participation requirements of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), and other federal and state environmental laws as well as considerable consultation with our partners at federal, state and local government agencies. A RAB, however, may address only issues associated with environmental restoration activities under the DERP at DoD installations, including activities conducted under the MMRP category of the DERP to address unexploded ordnance, discarded military munitions, and the chemical constituents of munitions. If a RAB already exists at an installation and MMRP sites are identified, the RAB may be expanded to consider additional issues related to the MMRP sites. If the current RAB or DoD installation decides that it is necessary to involve new stakeholders, the installation should notify potential stakeholders of its intent to expand the RAB and solicit new members who have an interest in issues related to the MMRP. If there is no current RAB active at the installation and MMRP sites are identified, the installation will follow the prescribe guidance for determining sufficient community interest in forming a RAB.

The Secretary of Defense is required to ''prescribe regulations regarding the establishment, characteristics, composition, and funding of restoration advisory boards'' (10 U.S.C. 2705(d)(2)(A)). DoD's issuance of regulations is not, however, a precondition to the establishment of RABs (10 U.S.C. 2705(d)(2)(B)). Therefore, DoD proposes these regulations regarding the scope, characteristics, composition, funding, establishment, operation, adjournment, and dissolution of RABs. DoD recognizes that each RAB established will be a unique organization dealing with installation-specific issues. This proposal, developed consistent with the recommendations set forth in the FFERDC's Final Report, is consistent with existing DoD and EPA policy on RABs, and reflects over ten years of experience in establishing and operating RABs throughout the United States. DoD has structured this proposal to maximize flexibility for RAB members and installations nationwide.

III. Summary of the Proposed Rule

DoD is requesting public comment on these proposed regulations regarding the scope, characteristics, composition, funding, establishment, operation, adjournment, and dissolution of RABs. This section of the preamble provides a summary of the proposed regulations in 32 CFR part 202.

A. General Requirements

In this section of the proposed rule, DoD discusses the purpose, scope, relevant definitions, and applicability of the proposed regulations for RABs. DoD is required by 10 U.S.C. 2705(d)(2)(A) to issue regulations concerning the establishment, characteristics, composition, and funding of RABs. When issued as a final rule, the regulations will apply to all RABs, regardless of when they were established.

In this proposal, DoD defines the purposes of a RAB as follows:

- Provide an expanded opportunity for stakeholder involvement in the environmental restoration process at DoD installations.
- Act as a forum for the discussion and exchange of restoration program information, addressing the concerns of stakeholders and effectively reaching key groups and representatives from DoD, regulatory agencies, tribes, and the community.
- Provide an opportunity for RAB members to review progress and participate in a dialogue with the installation's decision makers concerning environmental restoration matters. Installations will listen, carefully-consider, and provide specific responses to the recommendations provided by the individual RAB members. While a RAB will complement other community involvement efforts the installation undertakes concerning environmental restoration, a RAB does not replace other types of community outreach and participation activities required by applicable federal and state laws.

A RAB may address issues associated with environmental restoration activities under the DERP at DoD installations. DoD funds RABs with money dedicated to supporting environmental restoration activities under the DERP. DoD understands that RABs may want to address environmental issues beyond the scope of environmental restoration activities. In these circumstances the installation co-chair should assist the interested individuals in finding the proper venue

to support a broader scope of issues. Environmental groups or advisory boards that address issues other than environmental restoration activities are not governed by this regulation.

The Office of the Deputy Under Secretary of Defense for Installations and Environment will issue guidance regarding the scope, characteristics, composition, funding, establishment, operation, adjournment, and dissolution of RABs pursuant to this rule. The issuance of the guidance is not a precondition to the establishment of RABs or the implementation of this rule.

This section of the proposed rule also discusses the criteria for establishment, notification of the formation, and composition of a RAB.

B. Operating Requirements

In this section of the proposed rule, DoD establishes basic requirements for the operation of a RAB. DoD proposes that each RAB will have a mission statement that describes its overall purpose and goals. DoD also specifies certain requirements regarding the selection process for co-chairs.

DoD proposes that each RAB will develop a set of operating procedures. Areas that may be addressed in the procedures include: clearly defined goals and objectives for the RAB, as determined by the DoD installation co-chair in consultation with the RAB; development and approval procedures for the RAB meeting minutes; attendance of members at meetings; meeting frequency and location; rules of order; frequency and procedures for conducting training; procedures for selecting, adding, or removing RAB members and co-chairs; specifics on the size of the RAB membership and the length of service for RAB members and co-chairs; methods for resolving disputes; processes for reviewing and responding to public comments on issues being addressed by the RAB; procedures for public participation in RAB activities; and keeping the public informed about RAB proceedings.

DoD is not proposing specified requirements concerning the conduct of RAB meetings because the meeting format of each RAB will vary and be dictated by the needs of the participants. DoD proposes, however, that all RAB meetings be open to the public; the installation will provide timely notice of each meeting in a local newspaper of general circulation; each RAB meeting will be held at a reasonable time and in a manner or place reasonably accessible to and usable by persons with disabilities; the installation co-chair will prepare meeting minutes of the RAB meetings; and the meeting minutes and other relevant documents will be available for public inspection and copying at a single, publicly accessible location. Additionally, the installation will document information on the activities of a RAB in the information repository.

In this section of the proposed rule, DoD also establishes requirements for adjourning a RAB. An Installation Commander may adjourn a RAB when there is no longer a need for a RAB or when community interest in the RAB declines. For FUDS, the Installation Commander may be the District Commander or equivalent.

Although Installation Commanders are expected to make every reasonable effort to ensure that a RAB performs its role as efficiently as possible, circumstances may prevent a RAB from operating efficiently or fulfilling its intended purpose. When this occurs, the Installation Commander will make a concerted attempt to resolve the issues that affect the RAB's effectiveness. If unsuccessful, the Installation Commander may elect to dissolve the RAB. The Installation Commander should discuss dissolution with regulators and the community as a whole before making a final decision. This section of the rule provides guidelines for how an Installation Commander may elect to dissolve a RAB.

In this section of the proposed rule, DoD sets forth requirements for adjourning a RAB, adjournment procedures, dissolving a RAB, dissolution procedures, reestablishing an adjourned or dissolved RAB, and public comment.

C. Administrative Support, Funding, and Reporting Requirements

In this section of the proposed rule, DoD sets forth requirements regarding administrative support for establishing, operating, and adjourning or dissolving a RAB, funding for administrative support, and reporting requirements regarding the activities and administrative expenses associated with RABs.

The Installation Commander, or if there is no such Commander, an appropriate DoD official, is authorized to pay for routine administrative expenses of a RAB established at an installation (10 U.S.C. 2705(d)(3)). To implement this provision, this proposed rule requires that the installation provide administrative support to establish and operate a RAB, subject to the availability of funds. The scope of this support corresponds to those activities that are eligible for DoD funding, including:

- RAB establishment
- Membership selection
- Training that meets certain criteria
- Meeting announcements
- Meeting facility, including accommodations necessary to comply with the Americans with Disabilities Act
- Meeting facilitators, including translators
- Meeting materials and minutes preparation
- RAB-member mailing list maintenance and RAB materials distribution
- RAB adjournment and dissolution.

The Secretaries of the Military Departments will make funds available for RAB administrative expenses (10 U.S.C. 2705(g)), subject to appropriations. The proposed rule establishes these requirements and specifies that active installations should pay for RAB administrative expenses using funds from their Military Component's ER accounts. The ER-FUDS account is used to pay for RAB administrative expenses at FUDS. At BRAC installations, the Base Closure account is used to pay for RAB administrative expenses.

This section of the rule also discusses the opportunities for the RAB to obtain technical assistance to facilitate members' understanding of the scientific and engineering issues underlying environmental restoration activities through DoD's Technical Assistance for Public Participation (TAPP) program. The DoD installation may also provide in-house assistance to discuss technical issues.

DoD is required to report annually to Congress on the activities of Technical Review Committees (TRCs) and RABs (10 U.S.C. 2706(a)(2)(J)). In order to fulfill this requirement, this proposed rule requires that where RABs are established the installation documents the activities of the RAB and tracks expenditures for administrative expenses of the RAB. This proposed rule does not prescribe specific procedures for the installation to follow as part of DoD's information collection when reporting to Congress. Rather, DoD will rely on existing internal reporting mechanisms within the Department and Military Components to collect this information annually.

IV. Section-by-Section Analysis of the Proposed Rule

This section of the preamble presents an analysis of each section of the proposed rule.

A. General Requirements

1. Purpose, Scope, Definitions, and Applicability

a. Purpose. The purpose of this part is to establish regulations regarding the characteristics, composition, funding, and establishment of RABs, as required by 10 U.S.C. 2705(d)(2)(A), and the operation, adjournment, and dissolution of RABs.

b. Purpose and Scope of Responsibilities of a RAB. DoD is proposing the purposes of a RAB be:

• To provide an expanded opportunity for stakeholder involvement in the environmental restoration process at DoD installations. DoD considers ''stakeholders'' to be parties that are actually or potentially affected by environmental restoration activities at an installation.

• To act as a forum for the discussion and exchange of restoration program information between DoD, regulatory agencies, and the community.

• To provide an opportunity for RAB members to review progress and participate in a dialogue with the installation's decision makers concerning environmental restoration matters. Installations will listen, give careful consideration, and provide specific responses to the recommendations provided by individual RAB members. Consensus is not a prerequisite for RAB member recommendations.

A RAB may address issues associated with environmental restoration activities under the DERP at DoD installations. DoD funds RABs with money dedicated to supporting environmental restoration activities under the DERP. DoD understands that RABs may want to address environmental issues beyond the scope of environmental restoration activities. In these circumstances the installation should assist the interested individuals in finding the proper venue to support a broader scope of issues. Environmental groups, advisory boards, or other entities that address issues other than environmental restoration activities are not RABs.

This proposed rule does not list specific responsibilities of RAB members, but DoD considers the following types of activities within the scope of RAB members' functions:

• Providing advice to the installation, EPA, state regulatory agency, and other government agencies on restoration activities and community involvement.

• Addressing important issues related to restoration, such as the scope of studies, cleanup levels, waste management, and remedial action alternatives.

• Reviewing and evaluating documents associated with environmental restoration activities, such as plans and technical reports.

• Identifying environmental restoration projects to be accomplished in the next fiscal year and beyond.

• Recommending priorities among environmental restoration sites or projects.

• Attending regular meetings that are open to the public and scheduled at convenient times and locations.

• Interacting with the local redevelopment authority (LRA) or other land use planning bodies to discuss future land use issues relevant to environmental restoration decision-making.

• Providing feedback to other community members on RAB activities and share community concerns and input with the RAB.

By establishing a RAB, DoD hopes to ensure that interested stakeholders have a voice and can actively participate in a timely and thorough manner in the planning and implementation of the environmental restoration process. A RAB will serve as one method for the expression and careful consideration of diverse points of view.

Installations will listen and give careful consideration to all advice provided by individual members.

DoD proposes that each installation undergoing environmental restoration activities establish a RAB where there is sufficient and sustained community interest. Where TRCs or similar advisory groups already exist, the TRC or similar advisory group will be considered for conversion to a RAB, provided there is sufficient and sustained interest within the community. DoD will recognize only one RAB or TRC per installation.

c. Definitions. In this section:

• Installation will include active and closing Department of Defense (DoD) installations and formerly used defense sites (FUDS).

• Community RAB member shall mean those individuals identified by community members and appointed by the Installation Commander to participate in a RAB who live and/or work in the affected community or are affected by the installation's environmental program.

• Environmental restoration shall include the identification, investigation, research and development, and cleanup of contamination from hazardous substances, and pollutants and contaminants.

• Installation Commander will include the Commanding Officer of an installation; the Installation Commander or other Military Department officials who close the facility and are responsible for its disposal at BRAC installations; or the U.S. Army Corps of Engineers Project Management District Commander at FUDS properties.

• Public participants shall include anyone else who may want to attend the RAB meetings, including those individuals who may not live and/or work in the affected community or may not be affected by the installation's environmental program but would like to attend and provide comments to the RAB.

• Stakeholders are those parties that may be affected by environmental restoration activities at an installation, including family members of military personnel and civilian workers, and tribal community members and indigenous people, as appropriate.

• Tribes means any federally recognized American Indian and Alaska Native government as defined by the most current Department of Interior/Bureau of Indian Affairs list of tribal entities published in the Federal Register pursuant to Section 104 of the Federally Recognized Tribe Act.

• RAB adjournment means when an Installation Commander, in consultation with the EPA, state, tribes, RAB members, and the local community, as appropriate, closes the RAB based on a determination that there is no longer a need for a RAB or when community interest in the RAB declines sufficiently.

• RAB dissolution means when an Installation Commander disbands a RAB that is no longer fulfilling the intended purpose of advising and providing community input to an Installation Commander and decision makers on environmental cleanup projects. Installation Commanders are expected to make every reasonable effort to ensure that a RAB performs its role as effectively as possible and makes a concerted attempt to resolve issues that affect the RAB's effectiveness. There are circumstances, however, that may prevent a RAB from operating efficiently or fulfilling its intended purpose.

d. Other Public Involvement Activities. RABs are one part of DoD and the Military Components' extensive community outreach and public participation activities, which include compliance with the public notice and participation requirements of CERCLA, RCRA, and other federal and state environmental laws, as well as considerable consultation with our partners at federal, state, and local environmental and resource agencies.

e. Applicability of Regulations to Existing RABs. DoD is proposing these

regulations regarding the establishment, characteristics, composition, and funding of RABs (10 U.S.C. 2705(d)(2)A)) to formalize current Department policy. DoD intends that the final regulations will apply to all RABs, including RABs established prior to the effective date of the final rule. DoD does not consider that applying final regulations to RABs already established will pose any additional requirements or conflict because the proposed regulations are based on existing DoD policy that has been implemented since September 1994.

f. Guidance. The Office of the Deputy Under Secretary of Defense for Environment will issue guidance regarding the scope, characteristics, composition, funding, establishment, operation, adjournment, and dissolution of RABs pursuant to this rule. The issuance of the guidance is not a precondition to the establishment of RABs or the implementation of this rule.

2. Criteria for Establishment

a. Determining if Sufficient Interest Warrants Establishing a RAB. In this rule, RABs may only be established at installations undergoing environmental restoration. There may be only one RAB per installation. In accordance with existing policy, DoD proposes that a RAB be established when the Installation Commander finds sufficient and sustained community interest and any of the following criteria are met:

- The closure of an installation involves the transfer of property to the community;
- At least 50 local citizens petition for a RAB;
- Federal, state, tribal, or local government representatives request formation of a RAB; or
- The installation determines the need for a RAB.

To clarify how an installation will determine the need for a RAB, DoD proposes that the Installation Commander determine the level of interest within the community for establishing a RAB by:

- Reviewing correspondence files;
- Reviewing media coverage;
- Consulting community members;
- Consulting relevant government officials; and
- Evaluating responses to communication efforts, such as notices placed in local newspapers.

At the majority of installations that have an environmental restoration program, DoD expects that local communities will be interested in forming a RAB. DoD notes that installation efforts identify the level of community interest in establishing a RAB should not be limited to a one-time assessment of the criteria discussed above. In special circumstances it may be advantageous to establish a joint RAB for multiple installations. The decision to establish a joint RAB must be made in consultation with RAB members. Only one RAB, however, will be recognized per installation. If a RAB already exists at an installation and there will be MMRP sites, the RAB may be expanded to consider issues related to the MMRP sites. If the current RAB or DoD installation decides that it is necessary to involve new stakeholders, then installation should notify potential stakeholders of its intent to expand the RAB and solicit net members who have an interest in issues related to the MMRP.

Where RABs are not formed initially, installations undergoing environmental restoration activities will reassess community interest at least every 24 months. Reassessment of community interest should include public notice through local media, such as a local newspaper. Where the reassessment finds sufficient and sustained community interest, the installation should establish a RAB. Where the reassessment does not find sufficient and sustained community interest in a RAB, the installation will document, in a memorandum for the Administrative Record, the procedures followed in the reassessment and the findings of the reassessment.

When all environmental restoration decisions have been made and required remedies are in place and properly operating at an installation, reassessment of the community interest for establishing or reestablishing a RAB is not necessary every 24 months. When additional environmental restoration decisions have to be made resulting from subsequent actions, such as long-term monitoring and five-year reviews, the installation will reassess community interest for establishing or reestablishing a RAB.

b. Responsibility for Forming and Operating a RAB. Once the installation determines that a RAB will be established, DoD proposes that the Installation Commander have the lead responsibility for forming and operating the RAB. The Installation Commander should have lead responsibility because the RAB will be an integral part of the installation's community involvement and outreach programs. The Installation Commander may also delegate his or her duties to appropriate personnel but retains oversight authority and responsibility. DoD recommends that installations involve, as appropriate, EPA, and state, tribal, and local governments and community members in all phases of RAB planning and operation.

c. Converting Existing Technical Review Committees (TRCs) to RABs. Before the implementation of RABs, TRCs were established at DoD installations to provide interested parties with a forum to discuss and provide input into environmental restoration activities. In accordance with 10 U.S.C. 2705(d)(1), a RAB fulfills the requirements of 10 U.S.C. 2705(c), which directs DoD to establish TRCs. DoD recommends that, where TRCs or similar advisory groups already exist, provided there is sufficient and sustained interest within the community for a RAB, the TRC or similar advisory group should be considered for conversion to a RAB.

RABs expand the TRC initiative in the following ways: (1) RABs involve a greater number of community members than TRCs, thereby better incorporating the diverse needs and concerns of the community directly affected by environmental restoration activities; and (2) chairmanship of the RAB is shared between the installation and community, promoting partnership and careful consideration of the community's concerns in the decision-making process.

In order to convert a TRC to a RAB, DoD should increase community representation, evaluate and ensure the diversity of community representation, add a community co-chair, and open meetings to the public.

3. Notification of Formation of a RAB

a. Public Notice and Outreach. Prior to establishing a RAB or converting a TRC to a RAB, DoD proposes that an installation notify potential stakeholders of its intent to form a RAB. In announcing the formation of a RAB, the installation should describe the purpose of a RAB and discuss membership opportunities.

DoD recommends that every effort be made to ensure that a broad spectrum of individuals or groups representing the community's interests are informed about the RAB, its purposes, and membership opportunities. In some cases, it may necessary that the installation directly solicit some groups or organizations, particularly groups that may be traditionally under represented, such as low-income and minority segments of the population. It is important that RAB memberships are fairly balanced in terms of points of view represented and functions to be performed. Installations should consult the existing TRC, EPA, and state, tribal, and local government representatives

for information or other comments before providing this notice.

b. RAB Information Meeting. While not required in the proposed rule, DoD suggests that an installation sponsor an informational meeting prior to establishing a RAB. The focus of this meeting will be to introduce the concept of RABs to the community and to begin the membership solicitation process.

4. Composition of a RAB

a. Membership. RAB membership shall be well balanced and reflect the diverse interests within the local community. Therefore, DoD proposes that each RAB should consist of representatives of the Military Component (the U.S. Army Corps of Engineers for FUDS), members of the community, EPA, and state, tribal, or local government representatives, as appropriate. RAB meetings will be widely publicized and open to all. Representatives of organizations and agencies who lie and work outside the affected area are encouraged to voice their opinions at RAB meetings within the rules of conduct established by the RAB.

b. Government Representation. In addition to the Military Component, DoD proposes that EPA and state, tribal, and local governments should be represented on the RAB, as they fulfill important roles because of their regulatory oversight of DoD environmental restoration activities. Potential candidates may include the Remedial Project Manager (RPM) from the installation, EPA at the discretion of the EPA Administrator, as well as representatives from the state, tribal, or local government agencies. In the case of closing military installations, members of the BRAC Cleanup Team (BCT) may serve on the RAB as government representatives. It is important that any government representative chosen for RAB membership dedicate the time necessary, and have sufficient authority, to fulfill all RAB responsibilities.

Ideally, DoD believes that RABs should have only one representative from each government agency, so as to prevent an inordinate representation by government and DoD officials. While DoD encourages other government representatives to attend RAB meetings, these representatives' role will be strictly one of providing information and support.

c. Community Representation. While DoD is not proposing specific procedures to be used for selecting community members of the RAB, DoD notes that one of the most sensitive issues facing installations that establish a RAB concerns the selection of community members. When members of the community feel the selection process for RAB members, particularly of community members, is conducted in an objective and unbiased manner, it enhances their perception that the RAB can be a credible forum for the discussion of their issues and concerns. If the selection of community members is not approached carefully, the result can be a loss of trust.

To support the objective selection of community RAB members, installations will use a selection panel comprised of community members to nominate community RAB members. The Installation Commander in consultation with the state, tribal, and local governments and EPA, as appropriate, will identify community interests and solicit names of individuals who can represent these interests on the selection panel. The panel will establish and announce the following:

- Procedures for nominating community RAB members,
- Process for reviewing community interest,
- Criteria for selecting community RAB members, and
- List of RAB nominees.

Following the panel nominations, the Installation Commander, in consultation with the state and EPA as appropriate, will review the nominations to ensure the panel fairly represents the local community. The Installation Commander will then appoint the community RAB members.

Some installations are located in close proximity to American Indian and Alaska Native communities. While DoD encourages individual tribal members to participate on RABs, RABs in no way replace or serve as a substitute forum for the government-to-government relationship between DoD and federally-recognized tribes, as defined by the most current Department of Interior/Bureau of Indian Affairs list of tribal entities published in the **Federal Register** pursuant to Section 104 of the Federally Recognized Indian Tribe List Act.

RAB community members should live and/or work in the affected community or be affected by the installation's environmental restoration program. DoD will not limit participation in the RAB of potential members who have or may bid on DoD contracts, if proper and appropriate assurances to avoid any potential conflicts of interest are issued. DoD will, however, apply applicable conflict of interest rules, pursuant to the Federal Acquisition Regulation.

At closing installations, members of the LRA, as defined under BRAC, are included as stakeholders and are encouraged to attend RAB meetings. There is not a specific requirement, however, that LRA members be invited to be a member of the RAB.

d. Chairmanship. DoD proposes that chairmanship of the RAB be shared between the installation and the community. DoD believes this will promote partnering between DoD and the community and reflect DoD's commitment to consider the community's concerns when making decisions about the environmental restoration process. Together, the installation and community co-chairs jointly will determine meeting agendas, run meetings, and ensure that issues related to environmental restoration are raised and adequately considered.

e. Compensation for Community RAB Members. DoD also is specifying in the proposed rule that the community co-chair and community RAB members are expected to serve without compensation for their services. DoD considers community membership on a RAB to be voluntary, and, therefore, DoD will not pay these members for their participation.

f. Roles and Responsibilities of Members. DoD is not proposing specific requirements concerning the roles and responsibilities of individual members of a RAB. DoD considers the issuance of such regulations to be overly burdensome to the formation and operation of RABs, and, therefore, unnecessary.

B. Operating Requirements

1. Creating a Mission Statement

DoD proposes that each RAB should have a mission statement that articulates the overall purpose of the RAB. DoD considers this necessary to provide focus and objectives for the group. In addition, when members of the RAB understand their mission from the onset, it provides a framework for discussions. Without the framework, discussions may become hampered with issues that are not relevant to the environmental restoration process. The DoD installation co-chair in conjunction with the RAB members will determine the RAB mission statement consistent with guidance provided by the DoD Component. The mission statement should be discussed with the RAB and the DoD installation co-chair will listen to and consider the RAB members' comments before finalizing.

2. Selecting Co-Chairs

DoD proposes that the installation co-chair be selected either by the Installation Commander or equivalent,

or defined by military service-specific guidance, while the community members of the RAB will select the community co-chair. DoD considers it necessary for the community members to select their co-chair to ensure their active participation in the operation of the RAB and to help ensure that the RAB can be a credible forum for discussing community issues and concerns. Public participants are not afforded the opportunity to vote for the community co-chair.

3. Developing Operating Procedures

DoD considers a formal and agreed-upon set of operating procedures necessary to manage the business of RABs. While DoD will allow each RAB to customize or tailor its operating procedures as it sees fit, DoD proposes that the co-chairs be responsible for the operating procedures, to include:

- Setting clearly defined goals and objectives for the RAB. These should be discussed with the RAB, and the DoD installation co-chair will listen to, consider, and provide specific responses to the RAB members' comments before finalizing the goals and objectives.
- Ensuring that an agenda is developed for RAB meetings. The agenda is considered an important organizational tool that should be developed to reflect the interests and concerns of RAB members.
- Announcing meetings.
- Establishing attendance requirements of members at meetings.
- Developing and approving procedures for the minutes of RAB meetings.
- Meeting frequency and location.
- Establishing the Rules of Order.
- Announcing the frequency and procedures for conducting training.
- Establishing procedures for selecting or replacing the community co-chair and selecting, replacing, or adding community RAB members.
- Specifying the size of the RAB membership and the periods for membership and co-chair length of service.
- Reviewing and responding to public comments.
- Establishing the participation of the public.
- Keeping the public informed about proceedings of the RAB.
- Discussing the agenda for the next meeting and issues to be addressed.

4. Training RAB Members

DoD is not proposing a requirement for training members of the RAB. DoD believes, however, that RAB members may need some initial orientation training to enable them to fulfill their responsibilities. DoD recommends that the installation should work with EPA, the state, tribes, and environmental groups to develop methods to quickly inform and educate the RAB members and to promote the rapid formation of a fully functioning RAB.

DoD notes that under this proposed rule, only certain types of training will be considered within the scope of administrative support for RABs, and therefore, may be financed using funds allocated to the administrative expenses of RABs. DoD further discusses training in context of administrative support eligible for available funding in section IV.C.1.b. of this preamble.

5. Conducting RAB Meetings

a. Public Participation. DoD believes the meeting format of each RAB will vary and be dictated by the needs of the participants. Therefore, DoD is not proposing specific procedures for conducting RAB meetings. All RAB meetings, however, shall be open to the public. The installation co-chair should prepare and publish a timely public notice in a local newspaper of general circulation announcing each RAB meeting. Each RAB meeting will be held at a reasonable time and in a manner or place reasonably accessible to and usable by persons with disabilities. Interested persons will be permitted to attend, appear before, or file statements with any RAB, subject to such reasonable rules or regulations that may be prescribed.

b. Nature of Discussions. Regarding the nature of discussions at RAB meetings, the installation will listen and give careful consideration to all advice provided by the individual RAB members. While voting or polling the members may facilitate RAB discussions, such votes are advisory only and not binding on agency decision makers. It is a RAB's decision on how to propose and debate recommendations; and this decision should be agreed upon by the RAB. Group consensus is not a prerequisite for RAB input; each member of the RAB may provide advice as an individual.

c. Meeting Facilitator: RABs may recommend to use a trained facilitator who is a neutral third-party and is acceptable to all members of the board. The facilitator's role is to guide the RAB through a cooperative communication process in order to fulfill the group's stated purpose or agenda as easily as possible. The facilitator has no substantive decision-making authority. The facilitator focuses on the group's communication process rather than the technical content of what is discussed.

d. Meeting minutes. DoD proposes that the installation co-chair, in coordination with the community co-chair, will prepare minutes of each RAB meeting. The RAB meeting minutes will be kept and will contain a record of the persons present, a complete and accurate description of matters discussed and opinions voiced, and copies of all reports received, issued, or considered by the RAB. At the installation's discretion, a court reporter or electronic taping is allowable, whether through live transmission or video or audiotape. The accuracy of all minutes will be certified by the RAB co-chairs. Although not required, DoD recommends that the installation consider mailing copies of the minutes to all community members who attended the meeting and/or to people identified on the installation's community relations mailing list. This is to ensure dissemination of the results to community members and interested parties.

6. RAB Adjournment and Dissolution

In this section of the proposed rule, DoD sets forth requirements for adjourning a RAB, adjournment procedures, dissolving a RAB, dissolution procedures, reestablishing an adjourned or dissolved RAB, and public comment.

a. RAB Adjournment

(1) Requirements for RAB Adjournment. An Installation Commander may adjourn a RAB when there is no longer a need for a RAB or when community interest in the RAB declines.

RABs may adjourn in the following situations:

- A record of decision has been signed for all DERP sites on the installation.
- An installation has achieved response complete at all sites and no further environmental restoration decisions are required.
- An installation has all remedies in place. When all environmental restoration decisions have been made and required remedies are in place and properly operating at an installation, the RAB may adjourn or decide to become inactive. The installation (or the designated authority at closure installations) will establish a mechanism to inform the community, including former RAB members, about subsequent actions, such as long-term monitoring and five-year reviews, that may interest the RAB and allow the community to address this information as appropriate. At a minimum, the installation will provide this

information to the community through status report mailings, Web sites, or local information repositories.

• The RAB has achieved its objectives as defined in the RAB Operating Procedures.

• If there is no longer sufficient, sustained community interest, as documented by the installation with RAB community members and community-at-large input, to sustain the RAB. The Installation Commander will be responsible for reassessing community interest that could warrant reactivating or reestablishing the RAB.

• The installation has been transferred out of DoD control and DoD is no longer responsible for making restoration response decisions.

(2) Adjournment Procedures. The Installation Commander should consult with EPA, states, tribes, RAB members, and the local community, as appropriate, regarding adjourning the RAB before making a final decision. The Installation Commander should consider all responses when determining the appropriate action.

If the Installation Commander decides to adjourn the RAB, the Installation Commander will document the rationale for adjournment in a memorandum for inclusion in the Administrative record, notify the public of the decision through written notice to the RAB members and through publication of a notice in a local newspaper of general circulation, and describe other ongoing public involvement opportunities that are available.

b. RAB Dissolution

(1) Requirements for RAB Dissolution. An Installation Commander may recommend dissolution of a RAB when a RAB is no longer fulfilling the intended purpose of advising and providing community input to an Installation Commander and decision makers on environmental cleanup projects as described in IV.A.1.b. Although Installation Commanders are expected to make every reasonable effort to ensure that a RAB performs its role as effectively as possible, circumstances may prevent a RAB from fulfilling the intended purpose as described in this rule. When this occurs, the Installation Commander will make a concerted attempt to resolve the issues that affect the RAB's effectiveness. If unsuccessful, the Installation Commander may elect to recommend dissolution of the RAB. In making such a decision, if environmental restoration activities are not complete, the Installation Commander should ensure that the community involvement program detailed in the Community Relations Plan provides for continued effective stakeholder input.

(2) Dissolution Procedures. The installation co-chair should consult with the community, EPA and state, tribal and local government representatives as appropriate, regarding dissolving the RAB. The installation co-chair should notify the RAB community co-chair and members in writing of the intent to dissolve the RAB and the reasons for doing so, and provide the RAB members 30 days to respond in writing. The installation co-chair should consider RAB member responses, and in consultation with EPA and state, tribal and local government representatives, as appropriate, determine the appropriate action.

If the Installation Commander decides to proceed with recommending the RAB for dissolution, the Installation Commander should notify the public of the proposal to dissolve the RAB and provide a 30-day public comment period on the proposal (see section d. Public Comment for further discussion). At the conclusion of the public comment period, the Installation Commander will review the public comments, consult with EPA, state, tribal and local government representatives, as appropriate, and render a recommendation.

The recommendation, responsiveness summary, and all supporting documentation should be sent via the chain-of-command to the Military Component's Environmental Deputy Assistant Secretary (or equivalent) for approval or disapproval. The Military Component's Environmental Deputy Assistant Secretary (or equivalent) will notify the Office of the Deputy Under Secretary of Defense (Installations & Environment) (or equivalent) of the decision to approve or disapprove the request to dissolve the RAB and the rationale for that decision.

Once the Military Component's Environmental Deputy Assistant Secretary (or equivalent) makes a final decision, the Installation Commander will document the rationale for dissolution in a memorandum for inclusion in the Administrative Record, notify the public of the decision through written notice to the RAB members and through publication of a notice in a local newspaper of general circulation, and describe other ongoing public involvement opportunities that are available.

c. Reestablishing an Adjourned or Dissolved RAB. An installation may reestablish an adjourned or dissolved RAB if there is sufficient and sustained community interest in doing so and there are environmental restoration activities still ongoing at the installation. Where a RAB is adjourned or dissolved and environmental restoration activities continue, the installation should reassess community interest at least every 24 months. When all environmental restoration decisions have been made and required remedies are in place and properly operating at an installation, reassessment of the community interest for reestablishing the RAB is not necessary. When additional environmental restoration decisions have to be made resulting from subsequent actions, such as long-term monitoring and five-year reviews, the installation will reassess community interest for reestablishing the RAB.

Reassessment should include, at a minimum, consultation with the chain-of-command, EPA, state, tribes, and the local community as appropriate, and a 30-day public comment period (see section d. Public Comment for further discussion). Where the reassessment finds sufficient and sustained community interest, at a previously adjourned RAB the Installation Commander should reestablish a RAB.

If there is interest for reestablishment at a previously dissolved RAB, but the Installation Commander determines that the same conditions exist that required the original dissolution, he or she will request, through the chain of command to the service component deputy assistant secretary, an exception to reestablishing the RAB. If those conditions no longer exist at a previously dissolved RAB, and there is interest in reestablishment the Installation Commander should notify the deputy assistant secretary of their recommendation for the RAB to be reestablished. The deputy assistant secretary will take the Installation Commander's recommendation under advisement and may approve that RAB for reestablishment.

Where the reassessment does not find sufficient and sustained community interest in reestablishing the RAB, the Installation Commander should document (in a memorandum for the record) the procedures followed in the reassessment and the findings of the reassessment. This document will be included in the Administrative Record for the installation.

d. Public Comment. If the Installation Commander intends to recommend dissolution of a RAB or reestablish a dissolved RAB, the Installation Commander will notify the public of the proposal to dissolve or reestablish the RAB and provide a 30-day public comment period on the proposal. The Installation Commander will notify the public of the decision through

publication of a notice in a local newspaper of general circulation and distribute the notice to community members. The installation's Public Affairs Office should have an updated mailing list. At the conclusion of the public comment period, the Installation Commander will review public comments, consult with the RAB, EPA, and state, tribal, or local government representatives, as appropriate, prepare a responsiveness summary, and render a recommendation. The Installation Commander will notify the public of the decision.

7. Documenting RAB Activities

Additionally, the installation will document the relevant information on the activities of a RAB in the Administrative Record. These activities will include, but are not limited to:

- Installation's efforts to survey community interest in forming a RAB,
- Steps taken to establish a RAB where there is sustained community interest,
- How the RAB relates to the overall community involvement program, and
- Steps taken to adjourn the RAB.

The records, reports, minutes, appendixes, working papers, drafts, studies, agenda, or other documents that were made available to or prepared for or by each RAB will be available for public inspection and copying at a single, publicly accessible location, such as the information repositories established under the installation's Community Relations Plan, a public library, or in the offices of the installation to which the RAB reports, until the RAB ceases to exist.

To the extent that RAB input is considered in a decision regarding environmental restoration activities, relevant information on the RAB activities will be included in the Administrative Record.

C. Administrative Support, Funding, and Reporting Requirements

1. Administrative Support and Eligible Expenses

a. Administrative Support. The Installation Commander, or if there is no such Commander, an appropriate DoD official, is authorized to pay for routine administrative expenses of a RAB established at an installation (10 U.S.C. 2705(d)(3)). To implement this provision, this proposed rule requires that the installation provide administrative support to establish, operate, and adjourn a RAB, subject to the availability of funds. Securing ongoing administrative support is especially important for closing or closed installations.

DoD proposes to define the scope of activities that are unique to the establishment and operation of RABs, and therefore eligible as a RAB administrative expense.

b. Eligible Administrative Expenses. In order for an activity to be considered as an eligible RAB administrative cost, the activity must be unique to and directly associated with establishing and operating the RAB. For example, an advertisement for a RAB meeting is an eligible RAB administrative cost. However, producing a fact sheet as part of obtaining a hazardous waste storage permit under RCRA or hosting an installation open house as specified by the Community Relations Plan under CERCLA, may not necessarily be relevant to a RAB's mission statement or operations. The costs incurred in preparing and distributing such a fact sheet or holding the open house would not be considered administrative support required for a RAB.

While DoD cannot identify all possible examples of activities unique to and directly associated with establishing and operating a RAB, DoD proposes to consider the following activities as typical of administrative support required for a RAB:

- RAB establishment.
- Membership selection.
- Training if it is unique to and mutually benefits the establishment and operation of a RAB and relevant to the environmental restoration activities occurring at the installation.
- Meeting announcements.
- Meeting facility.
- Meeting facilitators, including translators.
- Meeting agenda materials and minutes preparation.
- RAB-member mailing list maintenance and RAB materials distribution.
- RAB adjournment.

Training for RAB members is considered an eligible administrative cost if it mutually benefits all members of a RAB and is relevant to the environmental restoration activities occurring at the installation. For example, if the installation were to hold an orientation training for members of a RAB, costs incurred in preparing training manuals, slides, or other presentation materials would be considered an allowable administrative expense because such training is mutually beneficial to all members of the RAB. A type of training that would not qualify as a RAB administrative support includes specialized training for an individual member of a RAB, such as an off-site workshop on building leadership capabilities. However, DoD notes that types of training that are not eligible for funding as a RAB administrative expense may qualify and be eligible for funding as technical assistance.

RAB administrative support is for RAB purposes only. RAB administrative expenses do not include general community involvement expenses, such as preparation of public outreach materials, responses to public comment, or repository costs. RAB administrative support does not include efforts to determine community interest in forming a RAB that does not result in the actual formation of a RAB. These items will be categorized as a community involvement expense.

Additional types of expenses ineligible as RAB administrative costs include, but are not limited to:

- Salaries for DoD personnel.
- Dedicated equipment such as computers, software, facsimile machines, telephone lines, or electronic mail for community RAB members.
- Renting dedicated office space for community RAB members.
- Administrative support to community members of the RAB.
- Printed stationery and personal business cards.
- Temporary duty/travel, conference attendance, or fees, except where prior approval has been granted by DoD.
- Compensation to RAB members for meeting attendance, work hours lost, time reviewing and commenting on documents, travel to meetings, or long distance telephone calls.

c. *Funding.* The Secretaries of the Military Departments will make funds available for RAB administrative expenses (10 U.S.C. 2705(g)), subject to the availability of funds. Funds requested for environmental restoration activities that were appropriated to Military Components' ER or BRAC accounts or the ER–FUDS account may be used to provide administrative support to RABs. Such funds will not be used to support the activities of environmental groups or advisory boards in addressing issues other than environmental restoration activities. The Installation Commander is authorized to pay routine administrative expenses of the RABs, in accordance with 10 U.S.C. § 2705(d)(3). The activities of the RAB and expenditures of such funds for administrative expenses will be reported to ODUSD(I&E), at a minimum, on an annual basis.

2. Technical Assistance for Public Participation (TAPP)

Community members of a RAB may request technical assistance from the

private sector to assist their understanding of the scientific and engineering issues underlying eligible DoD environmental restoration activities. Technical assistance may be made available to community members of RABs or TRCs in accordance with 10 U.S.C. 2705(e) and the TAPP regulations found at 32 CFR part 203. RABs may submit TAPP requests to the Installation Commander, or to an appropriate DoD official. The DoD installation may also provide in-house assistance to discuss technical issues.

3. Documenting and Reporting Activities and Expenses

DoD is required to report to Congress on the activities of TRCs and RABs (10 U.S.C. 2706(a)(2)(J)). In order to fulfill this requirement, this proposed rule requires that, where RABs are established, the installation documents the activities of the RAB and tracks expenditures for administrative expenses of the RAB. With regards to tracking expenses, DoD recommends that installations tally costs according to the specific activities identified above (see section IV.C.1.b. of this rule) that are typical of administrative support required for RAB.

Although this proposed rule requires installations to document RAB activities and track expenditures, DoD is not prescribing specific procedures to accomplish this. In addition, DoD will use internal Department and Military Component-specific reporting mechanisms to obtain required information from installations on RAB activities and expenditures when reporting to Congress.

V. Regulatory Analysis

A. Regulatory Impact Analysis Pursuant to Executive Order 12866

Under Executive Order 12866 (58 FR 51735, October 4, 1993), as amended, DoD must determine whether a regulatory action is ''significant'' and therefore subject to review by the Office of Management and Budget (OMB) and the requirements of the Executive Order.

DoD has determined that this proposed rule is not a ''significant regulatory'' action because it is unlikely to:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, productivity, competition, jobs, environment, public health, or safety of state, local, or tribal governments or communities;

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan program or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

B. Regulatory Flexibility Act

It has been certified that this proposed rule is not subject to the Regulatory Flexibility Act of 1980, 5 U.S.C. 601 *et seq.* because it would not, if promulgated, have a significant economic impact on a substantial number of small entities. The primary effect of the proposed rule will be to increase community involvement in DoD's environmental restoration program.

C. Paperwork Reduction Act

It has been certified that the proposed rule does not impose any reporting or recordkeeping requirements subject to the Paperwork Reduction Act of 1995 (Pub. L. 104–13).

VI. Unfunded Mandates

Under section 202 of the Unfunded Mandates Reform Act of 1995, DoD must prepare a statement to accompany any rule where the estimated costs to state, local, or tribal governments in the aggregate, or to the private sector, will be $100 million or more in any one year.

DoD has determined that this proposed rule will not include a federal mandate that may result in estimated costs of $100 million or more to either state, local, or tribal governments in the aggregate, or to the private sector.

List of Subjects in 32 CFR Part 202

Administrative practice and procedure, Environmental protection—restoration, Federal buildings and facilities, Organization and functions (Government agencies).

Title 32 of the Code of Federal Regulations, Chapter I, Subchapter M, is proposed to be amended by adding part 202 to read as follows:

PART 202—RESTORATION ADVISORY BOARDS (RABs)

Subpart A—General Requirements

Sec.

Subpart B—Operating Requirements

Subpart C—Administrative Support, Funding, and Reporting Requirements

Authority: 5 U.S.C. 551 *et seq.* and 10 U.S.C. 2705.

Subpart A—General Requirements

§ 202.1 Purpose, scope, definitions, and applicability.

(a) *Purpose.* The purpose of this part is to establish regulations regarding the scope, characteristics, composition, funding, establishment, operation, adjournment, and dissolution of Restoration Advisory Boards (RABs).

(b) *Purpose and scope of responsibilities of RABs.* The purpose of a RAB is to provide:

(1) An opportunity for stakeholder involvement in the environmental restoration process at Department of Defense (DoD) installations. Stakeholders are those parties that may be affected by environmental restoration activities at the installation.

(2) A form for the discussion and exchange of environmental restoration program information between DoD installations, regulatory agencies, tribes and the community.

(3) An opportunity for RAB members to review progress, participate in a dialogue with, and provide comments and advice to the installation's decision makers concerning environmental restoration matters. Installations shall give careful consideration to the comments provided by the RAB members.

(c) *Definitions.* In this section:

(1) *Community RAB member* shall mean those individuals identified by community members and appointed by the Installation Commander to participate in a RAB who live and/or work in the affected community or are affected by the installation's environmental program.

(2) *Environmental restoration* shall include the identification, investigation, research and development, and cleanup of contamination from hazardous substances, and pollutants and contaminants.

(3) *Installation* shall include active and closing Department of Defense (DoD) installations and formerly used defense sites (FUDS).

(4) *Installation Commander* shall include the Commanding Officer or the equivalent of a Commanding Officer at active installations; the Installation Commander or other Military Department officials who close the facility and are responsible for its disposal at Base Realignment and Closure (BRAC) installations; or the U.S. Army Corps of Engineers Project Management District Commander at FUDS.

(5) *Public participants* shall include anyone else who may want to attend the RAB meetings, including those individuals may not live and/or work in the affected community or may not be affected by the installation's environmental program but would like to attend and provide comments to the RAB.

(6) *Stakeholders* are those parties that may be affected by environmental restoration activities at an installation, including family members of military personnel and civilian workers, and tribal community members and indigenous people, as appropriate.

(7) *Tribes* shall mean any federally recognized American Indian and Alaska Native government as defined by the most current Department of Interior/Bureau of Indian Affairs list of tribal entities published in the **Federal Register** pursuant to Section 104 of the Federally Recognized Tribe Act.

(8) *RAB adjournment* shall mean when an Installation Commander, in consultation with the Environmental Protection Agency (EPA), state, tribes, RAB members, and the local community, as appropriate, closes the RAB based on a determination that there is no longer a need for a RAB or when community interest in the RAB declines.

(9) *RAB dissolution* shall mean when an Installation Commander disbands a RAB that is no longer fulfilling the intended purpose of advising and providing community input to an Installation Commander and decision makers on environmental restoration projects. Installation Commanders are expected to make every reasonable effort to ensure that a RAB performs its role as effectively as possible and a concerted attempt to resolve issues that affect the RAB's effectiveness. There are circumstances, however, that may prevent a RAB from operating effectively or fulfilling its intended purpose.

(d) *Other public involvement activities.* A RAB should complement other community involvement efforts occurring at an installation; however, it does not replace other types of community outreach and participation activities required by applicable laws and regulations.

(e) *Applicability of regulations to existing RABs.* The regulations in this part apply to all RABs regardless of when the RAB was established.

(f) *Guidance.* The Office of the Deputy Under Secretary of Defense for Environment shall issue guidance regarding the scope, characteristics, composition, funding, establishment, operation, adjournment, and dissolution of RABs pursuant to this rule. The issuance of any such guidance shall not be a precondition to the establishment RABs or the implementation of this rule.

§ 202.2 Criteria for establishment.

(a) *Determining if sufficient interest warrants establishing a RAB.* A RAB should be established when there is sufficient and sustained community interest, and any of the following criteria are met:

(1) The closure of an installation involves the transfer of property to the community;

(2) At least 50 local citizens petition the installation for creation of a RAB;

(3) Federal, State, tribal, or local government representatives request the formation of a RAB; or

(4) The installation determines the need for a RAB. To determine the need for establishing a RAB, an installation should:

(i) Review correspondence files;

(ii) Review media coverage;

(iii) Consult local community members;

(iv) Consult relevant government officials; and

(v) Evaluate responses to communication efforts, such as notices placed in local newspapers.

(b) *Responsibility for forming or operating a RAB.* The installation shall have lead responsibility for forming and operating a RAB.

(c) *Converting existing Technical Review Communittees (TRCs) to RABs.* In accordance with 10 U.S.C. 2705(d)(1), a RAB may fulfill the requirements of 10 U.S.C. 2705(c), which directs DoD to establish TRCs. DoD recommends that, where TRCs or similar advisory groups already exist, the TRC or similar advisory group be considered for conversion to a RAB, provided there is sufficient and sustained interest within the community.

§ 202.3 Notification of formation of a Restoration Advisory Board.

Prior to establishing a RAB, an installation shall notify potential stakeholders of its intent to form a RAB. In announcing the formation of a RAB, the installation should describe the purpose of a RAB and discuss opportunities for membership.

§ 202.4 Composition of a RAB.

(a) *Membership.* At a minimum, each RAB shall include representatives from DoD and the community. RAB community membership shall be well balanced and reflect the diverse interests within the local community.

(1) *Government representation.* The RAB may also include representatives from the EPA at the discretion of the Administrator of the appropriate EPA regional office, and state, tribal, and local governments, as appropriate. At closing installations, representatives of the BRAC Cleanup Team (BCT) may also serve as the government representative(s) of the RAB.

(2) *Community representation.* Community RAB members should live and/or work in the affected community or be affected by the installation's environmental restoration program. While DoD encourages individual tribal members to participate on RABs, RABs in no way replace or serve as a substitute forum for the government-to-government relationship between DoD and federally-recognized tribes.

(b) *Chairmanship.* Each RAB established shall have two co-chairs, one representing the DoD installation and the other the community. Co-chairs shall be responsible for directing and managing the RAB operations.

(c) *Compensation for community members of the RAB.* The community co-chair and community RAB members serve voluntarily; therefore, DoD will not compensate them for their participation.

Subpart B—Operating Requirements

§ 202.5 Creating a mission statement.

The DoD installation co-chair in conjunction with the RAB members shall determine the RAB mission statement in accordance with guidance provided by the DoD Component.

§ 202.6 Selecting co-chairs.

(a) *DoD installation Co-chair.* The DoD installation co-chair shall be selected by the Installation Commander or equivalent, or in accordance with Military Service-specific guidance.

(b) *Community Co-chair.* The Community co-chair shall be selected by the community RAB members.

§ 202.7 Developing operating procedures.

(a) Each RAB shall develop a set of operating procedures. Areas that should be addressed in the procedures include:

(1) Clearly defined goals and objectives for the RAB, as determined by

the DoD installation co-chair in consultation with the RAB.

(2) Meeting announcements.

(3) Attendance requirements of members at meetings.

(4) Development and approval procedures for the minutes of RAB meetings.

(5) Meeting frequency and location.

(6) Rules of order.

(7) The frequency and procedures for conducting training.

(8) Procedures for selecting or replacing co-chairs and selecting, replacing, or adding RAB members.

(9) Specifics on the size of the RAB, periods of membership, and co-chair length of service.

(10) Review and responses to public comments.

(11) Participation of the general public.

(12) Keeping the public informed about proceedings of the RAB.

(13) Discussing the agenda for the next meeting and issues to be addressed.

(b) [Reserved].

§ 202.8 Training RAB members.

Training is not required for RAB members. It may be advisable, however, to provide RAB members with some initial orientation training to enable them to fulfill their responsibilities. Funding for training activities must be within the scope of administrative support for RABs, as permitted in § 202.12.

§ 202.9 Conducting RAB meetings.

(a) *Public participation.* RAB meetings shall be open to the public.

(1) The installation co-chair shall prepare and public a timely publish notice in a local newspaper of general circulation announcing each RAB meeting.

(2) Each RAB meeting shall be held at a reasonable time and in a manner or place reasonably accessible to and usable by persons with disabilities.

(3) Interested persons shall be permitted to attend, appear before, or file statements with any RAB, subject to such reasonable rules or regulations as may be prescribed.

(b) *Nature of discussions.* The installation shall give careful consideration to all comments provided by the individual RAB members.

(c) *Meeting minutes.* The installation co-chair, in coordination with the community co-chair, shall prepare minutes of each RAB meeting.

(1) The RAB meeting minutes shall be kept and shall contain a record of the persons present, a complete and accurate description of matters discussed and comments received, and copies of all reports received, issued, or approved by the RAB. The accuracy of all minutes shall be certified by the RAB co-chairs.

(2) The records, reports, minutes, appendixes, working papers, drafts, studies, agenda, or other documents that were made available to or prepared for or by each RAB shall be available for public inspection and copying at a single, publicly accessible location, such as the information repositories established under the installation's Community Relations Plan, a public library, or in the offices of the installation to which the RAB reports, until the RAB ceases to exist.

§ 202.10 RAB adjournment and dissolution.

(a) *RAB adjournment.* (1) Requirements for RAB adjournment. An Installation Commander may adjourn a RAB when there is no longer a need for a RAB or when community interest in the RAB declines. RABs may adjourn in the following situations:

(i) A record of decision has been signed for all DERP sites on the installation.

(ii) An installation has achieved response complete at all sites and no further environmental restoration decisions are required.

(iii) An installation has all remedies in place.

(iv) The RAB has achieved the desired end goal as defined in the RAB Operating Procedures.

(v) There is no longer sufficient, sustained community interest, as documented by the installation with RAB community members and community-at-large input, to sustain the RAB. The installation shall continue to monitor for any changes in community interest that could warrant reactivating or reestablishing the RAB.

(vi) The installation has been transferred out of DoD control and DoD is no longer responsible for making restoration response decisions.

(2) Adjournment procedures. If the Installation Commander is considering adjourning the RAB, the Installation Commander shall:

(i) Consult with the EPA, state, tribes, RAB members, and the local community, as appropriate, regarding adjourning the RAB and consider all responses before making a final decision.

(ii) Document the rationale for adjournment in a memorandum for inclusion in the Administrative Record, notify the public of the decision through written notice to the RAB members and through publication of a notice in a local newspaper of general circulation, and describe other ongoing public involvement opportunities that are available, if the Installation Commander decides to adjourn the RAB.

(b) *RAB dissolution.* (1) *Requirements for RAB dissolution.* An Installation Commander may recommend dissolution of a RAB when a RAB is no longer fulfilling the intended purpose of advising and providing community input to an Installation Commander and decision makers on environmental restoration projects as described in § 202.1(b).

(2) *Dissolution procedures.* If the Installation Commander is considering dissolving the RAB, the Installation Commander shall:

(i) Consult with EPA, state, tribal and local government representatives, as appropriate, regarding dissolving the RAB.

(ii) Notify the RAB community co-chair and members in writing of the intent to dissolve the RAB and the reasons for doing so and provide the RAB members 30 days to respond in writing. The Installation Commander shall consider RAB member responses, and in consultation with EPA, state, tribal and local government representatives, as appropriate, determine the appropriate action.

(iii) Notify the public of the proposal to dissolve the RAB and provide a 30-day public comment period on the proposal, if the Installation Commander decides to proceed with dissolution. At the conclusion of the public comment period, the Installation Commander will review the public comments, consult with EPA, state, tribal and local government representatives, as appropriate, and render a recommendation.

(iv) Send the recommendation, responsiveness summary, and all supporting documentation via the chain-of-command to the Military Component's Environmental Deputy Assistant Secretary (or equivalent) for approval or disapproval. The Military Component's Environmental Deputy Assistant Secretary (or equivalent) shall notify the Office of the Deputy Under Secretary of Defense (Installations & Environment) (or equivalent) of the decision to approve or disapprove the request to dissolve the RAB and the rationale for that decision.

(v) Document the rationale for dissolution in a memorandum for inclusion in the Administrative Record, notify the public of the decision through written notice to the RAB members and through publication of a notice in a local newspaper of general circulation, and describe other ongoing public involvement opportunities that are

available, once the Military Component's Environmental Deputy Assistant Secretary (or equivalent) makes a final decision.

(c) *Reestablishing an adjourned or dissolved RAB.* An Installation Commander may reestablish an adjourned or dissolved RAB if there is sufficient and sustained community interest in doing so and there are environmental restoration activities still ongoing at the installation. Where a RAB is adjourned and environmental restoration activities continue, the Installation Commander should reassess community interest at least every 24 months. When all environmental restoration decisions have been made and required remedies are in place and properly operating at an installation, reassessment of the community interest for reestablishing the RAB is not necessary. When additional environmental restoration decisions have to be made resulting from subsequent actions, such as long-term monitoring and five-year reviews, the installation will reassess community interest for reestablishing the RAB. Where the reassessment finds sufficient and sustained community interest at previously adjourned RAB, the Installation Commander should reestablish a RAB. Where the reassessment does not find sufficient and sustained community interest in reestablishing the RAB, the Installation Commander shall document in a memorandum for the record the procedures followed in the reassessment and the findings of the reassessment. This document shall be included in the Administrative Record for the installation. If there is interest for reestablishment at a previously dissolved RAB, but the Installation Commander determines that the same conditions exist that required the original dissolution, he or she will request, through the chain of command to the service component deputy assistant secretary, an exception to reestablishing the RAB. If those conditions no longer exist at a previously dissolved RAB, and there is interest in reestablishment the Installation Commander should notify the deputy assistant secretary of the recommendation for the RAB to be reestablished. The deputy assistant secretary will take the Installation Commander's recommendation under advisement and may approve that RAB for reestablishment.

(d) *Public comment.* If the Installation Commander intends to recommend dissolution of a RAB or reestablish a dissolved RAB, the Installation Commander shall notify the public of the proposal to dissolve or reestablish the RAB and provide a 30-day public comment period on the proposal. At the conclusion of the public comment period, the Installation Commander shall review public comments, consult with EPA, and state, tribal, or local government representatives, as appropriate, prepare a responsiveness summary, and render a recommendation. The recommendation, responsiveness summary, and all supporting documentation should be sent via the chain-of-command to the Military Component's Environmental Deputy Assistant Secretary (or equivalent) for approval or disapproval. The Installation Commander shall notify the public of the decision.

§ 202.11 Documenting RAB activities.

The installation shall document information on the activities of a RAB in the Information Repository. When RAB input has been used in decision-making, it should be documented as part of the Administrative Record. These activities shall include, but are not limited to:

(a) Installation's efforts to survey community interest in forming a RAB;

(b) Steps taken to establish a RAB where there is sustained community interest;

(c) How the RAB relates to the overall community involvement program; and

(d) Steps taken to adjourn, dissolve, or reestablish the RAB.

Subpart C—Administrative Support, Funding, and Reporting Requirements

§ 202.12 Administrative support and eligible expenses.

(a) *Administrative support.* Subject to the availability of funding, the installation shall provide administrative support to establish and operate a RAB.

(b) *Eligible administrative expenses for a RAB.* The following activities specifically and directly associated with establishing and operating a RAB shall qualify as an administrative expense of a RAB:

(1) RAB establishment.

(2) Membership selection.

(3) Training if it is:

(i) Unique to and mutually benefits the establishment and oeration of a RAB; and

(ii) Relevant to the environmental restoration activities occurring at the installation.

(4) Meeting announcement.

(5) Meeting facility.

(6) Meeting facilitators, including translators.

(7) Preparation of meeting agenda materials and minutes.

(8) RAB-member mailing list maintenance and RAB materials distribution.

(c) *Funding.* Subject to the availability of funds, administrative support to RABs may be funded as follows:

(1) At active installations, administrative expenses for a RAB shall be paid for using funds from the Military Component's Environmental Restoration accounts.

(2) At BRAC installations, administrative expenses for a RAB shall be paid using BRAC funds.

(3) At FUDS, administrative expenses for a RAB shall be paid using funds from the Environmental Restoration account for the Formerly Used Defense Sites program.

§ 202.13 Technical assistance for public participation (TAPP).

Community members of a RAB or TRC may request technical assistance for interpreting scientific and engineering issues with regard to the nature of environmental hazards at the installation and environmental restoration activities conducted, or proposed to be conducted at the installation in accordance with 10 U.S.C. 2705(e) and the TAPP regulations found at 32 CFR part 203.

§ 202.14 Documenting and reporting activities and expenses.

The installation at which a RAB is established shall document the activities and record the administrative expenses associated with the RAB. Installations shall use internal department and Military Component-specific reporting mechanisms to submit required information on RAB activities and expenditures.

Dated: January 19, 2005

Jeannette Owings-Ballard,

Federal Register Liaison Officer, Department of Defense.

Coast Guard

33 CFR Part 117

[CGD08–05–003]

RIN 1625–AA09

Drawbridge Operation Regulation; Gulf Intracoastal Waterway, Houma, LA

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to change the regulation governing the operation of the SR 315 (Bayou Dularge) bascule bridge across the Gulf Intracoastal Waterway, mile 59.9 west of Harvey Lock, in Houma, Louisiana. An increase in traffic during the noontime time period has facilitated a request to allow the bridge to remain closed to navigation for two (2), 30-minute periods in the middle of the day. These closures will allow local workers to transit the area with minimal delays during the noontime lunch period.

DATES: Comments and related material must reach the Coast Guard on or before March 29, 2005.

ADDRESSES: You may mail comments and related material to Commander (obc), Eighth Coast Guard District, 500 Poydras Street, New Orleans, Louisiana 70130–3310. The Commander, Eighth Coast Guard District, Bridge Administration Branch maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at the Bridge Administration office between 7 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: David Frank, Bridge Administration Branch, telephone 504–589–2965.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking [CGD08–05–003], indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know they reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not now plan to hold a public meeting. You may submit a request for a meeting by writing to Commander, Eighth Coast Guard District, Bridge Administration Branch at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register.**

Background and Purpose

The U.S. Coast Guard, at the request of the State of Louisiana, Department of Transportation and Development (LDOTD), and supported by the Terrebonne Parish Council, proposes to modify the existing operating schedule of the SR 315 (Bayou Dularge) bascule bridge across the Gulf Intracoastal Waterway, mile 59.9 west of Harvey Lock, in Houma, Terrebonne Parish, Louisiana. The modification of the existing regulations will allow the bridge to remain closed to navigation for two (2), 30-minute periods in the middle of the day to allow for local workers to transit the area with minimal delays during the noontime lunch period.

Currently, the bridge opens on signal; except that, the draw need not open for the passage of vessels Monday through Friday except Federal holidays from 6:30 a.m. to 8:30 a.m. and from 4:30 p.m. to 6 p.m.

Approximately 11,500 vehicles cross the bridge daily, 7% of which cross the bridge during the requested noon closure times. The bridge averages 288 openings a month. The requested two (2), 30-minute closures will delay approximately 35 additional tows a month for a maximum of 30 minutes. The average length of a bridge opening is approximately seven minutes, delaying an average of 92 vehicles per opening during the noontime bridge openings.

Navigation at the site of the bridge consists primarily of tugboats with barges. Alternate routes east and west through the bridge are not readily accessible; however, the bridge, in the closed-to-navigation position provides a vertical clearance of 40 feet above high water, elevation 3.8 feet Mean Sea Level.

Discussion of Proposed Rule

The proposed rule would modify the existing regulation in 33 CFR 117.451(c) to facilitate the movement of high volumes of vehicular traffic across the bridge during noontime lunch periods. The change would allow the SR 315 (Bayou Dularge) bridge, mile 59.9 west of Harvey Lock, at Houma, to remain closed to navigation from 11:45 a.m. to 12:15 p.m. and from 12:45 p.m. to 1:15 p.m. in addition to the presently published times of 6:30 a.m. to 8:30 a.m. and 4:30 p.m. to 6 p.m. Monday through Friday except Federal holidays.

Regulatory Evaluation

This proposed rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not ''significant'' under the regulatory policies and procedures of the Department of Homeland Security. We expect the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under the regulatory policies and procedures of DHS is unnecessary.

This proposed rule allows vessels ample opportunity to transit this waterway with proper notification before and after the peak vehicular traffic periods. According to the vehicle traffic surveys, the public at large is better served by the additional closure times during the noontime lunch periods.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. This proposed rule would affect the following entities: the owners and operators of vessels needing to transit the bridge from 11:45 a.m. to 12:15 p.m. and from 12:45 p.m. to 1:15 p.m. on weekdays.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this proposed rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule so that

they can better evaluate its effects on them and participate in the rulemaking. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the Eighth Coast Guard District Bridge Administration Branch at the address above. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this proposed rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not affect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This proposed rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this proposed rule under Commandant Instruction M16475.1D, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this proposed rule is categorically excluded, under figure 2–1, paragraph (32)(e), of the Instruction, from further environmental documentation. Paragraph (32)(e) excludes the promulgation of operating regulations or procedures for drawbridges from the environmental documentation requirements of NEPA. Since this proposed rule will alter the normal operating conditions of the drawbridge, it falls within this exclusion.

List of Subjects in 33 CFR Part 117

Bridges.

Regulations

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; Department of Homeland Security Delegation No. 0170.1; 33 CFR 1.05–1(g); section 117.255 also issued under the authority of Pub. L. 102–587, 106 Stat. 5039.

2. § 117.451(c) is revised to read as follows:

§ 117.451 Gulf Intracoastal Waterway.

* * * * *

(c) The draw of the SR 315 (Bayou Dularge) bridge, mile 59.9 west of Harvey Lock, at Houma, shall open on signal; except that, the draw need not open for the passage of vessels Monday through Friday except Federal holidays from 6:30 a.m. to 8:30 a.m., from 11:45 a.m. to 12:15 p.m., from 12:45 p.m. to 1:15 p.m. and from 4:30 p.m. to 6 p.m.

* * * * *

Dated: January 13, 2005.

RIN 1625–AA09

Drawbridge Operation Regulation; Houma Navigation Canal, Houma, LA

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to change the regulation governing the operation of the SR 661 (Houma Nav Canal) swing bridge across the Houma Navigation Canal, mile 36.0, in Houma, Louisiana. An increase in traffic during the noontime time period has facilitated a request to allow the bridge to remain closed to navigation for two (2), 30-minute periods in the middle of the day. These closures will allow local workers to transit the area with minimal delays during the noontime lunch period.

DATES: Comments and related material must reach the Coast Guard on or before March 29, 2005.

ADDRESSES: You may mail comments and related material to Commander (obc), Eighth Coast Guard District, 500 Poydras Street, New Orleans, Louisiana 70130–3310. The Commander, Eighth Coast Guard District, Bridge Administration Branch maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at the Bridge Administration office between 7 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: David Frank, Bridge Administration Branch, telephone 504–589–2965.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking [CGD08–05–004], indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know they reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not now plan to hold a public meeting. You may submit a request for a meeting by writing to Commander, Eighth Coast Guard District, Bridge Administration Branch at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

The U.S. Coast Guard, at the request of the State of Louisiana, Department of Transportation and Development (LDOTD), and supported by the Terrebonne Parish Council, proposes to modify the existing operating schedule of the SR 661 (Houma Nav Canal) swing bridge across the Houma Navigation Canal, mile 36.0, in Houma, Terrebonne Parish, Louisiana. The modification of the existing regulations will allow the bridge to remain closed to navigation for two (2), 30-minute periods in the middle of the day to allow for local workers to transit the area with minimal delays during the noontime lunch period.

Currently, the bridge opens on signal; except that, the draw need not open for the passage of vessels Monday through Friday except Federal holidays from 6:30 a.m. to 8:30 a.m. and from 4:30 p.m. to 6 p.m.

Approximately 9,500 vehicles cross the bridge daily, 6% of which cross the bridge during the requested noon closure times. The bridge averages 932 openings a month. The requested two (2), 30-minute closures will delay approximately 133 additional tows a month for a maximum of 30 minutes. The average length of a bridge opening is approximately nine minutes, delaying an average of 44 vehicles per opening during the noontime bridge openings.

Navigation at the site of the bridge consists primarily of tugboats with barges. Alternate routes are available but not readily accessible.

Discussion of Proposed Rule

The proposed rule would modify the existing regulation in 33 CFR 117.455 to facilitate the movement of high volumes of vehicular traffic across the bridge during noontime lunch periods. The change would allow the SR 661 (Houma Nav Canal) bridge, mile 36.0, at Houma, to remain closed to navigation from 11:45 a.m. to 12:15 p.m. and from 12:45 p.m. to 1:15 p.m. in addition to the presently published times of 6:30 a.m. to 8:30 a.m. and 4:30 p.m. to 6 p.m. Monday through Friday except Federal holidays.

Regulatory Evaluation

This proposed rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not ''significant'' under the regulatory policies and procedures of the Department of Homeland Security. We expect the economic impact of this proposed rule to be so minimal that a full Regulatory Evaluation under the regulatory policies and procedures of DHS is unnecessary.

This proposed rule allows vessels ample opportunity to transit this waterway with proper notification before and after the peak vehicular traffic periods. According to the vehicle traffic surveys, the public at large is better served by the additional closure times during the noontime lunch periods.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. This proposed rule would affect the following entities: the owners and operators of vessels needing to transit the bridge from 11:45 a.m. to 12:15 p.m. and from 12:45 p.m. to 1:15 p.m. on weekdays.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this proposed rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the Eighth Coast Guard District Bridge Administration Branch at the address above. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this proposed rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not affect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This proposed rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.*, specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this proposed rule under Commandant Instruction M16475.1D, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this proposed rule is categorically excluded, under figure 2–1, paragraph (32)(e), of the Instruction, from further environmental documentation. Paragraph (32)(e) excludes the promulgation of operating regulations or procedures for drawbridges from the environmental documentation requirements of NEPA. Since this proposed rule will alter the normal operating conditions of the drawbridge, it falls within this exclusion.

BILLING CODE 4910–15–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[R05–OAR–2004–MI–0003; FRL–7865–1]

Approval and Promulgation of Maintenance Plan Revisions; Michigan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a December 19, 2003 request from Michigan for a State Implementation Plan (SIP) revision of the Southeast Michigan carbon monoxide (CO) maintenance plan. The CO maintenance plan revision establishes a new on-road emissions inventory for the years 1996 and 2010. The revision also establishes a new transportation conformity motor vehicle emissions budget (MVEB) for the year 2010. The emission inventory and MVEB updates are designed to maintain the National Ambient Air Quality Standards (NAAQS) for CO as required by the CAA.

In the final rules section of this **Federal Register**, EPA is approving the SIP revision as a direct final rule without prior proposal, because EPA views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If we do not receive any adverse comments in response to these direct final and proposed rules, we do not contemplate taking any further action in relation to this proposed rule. If EPA receives adverse comments, we will withdraw the direct final rule and will respond to all public comments in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.

DATES: Written comments must be received on or before February 28, 2005.

ADDRESSES: Submit comments, identified by Regional Material in EDocket (RME) ID No. R05–OAR–2004–IL–0003 by one of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the on-line instructions for submitting comments.

Agency Web site: http://docket.epa.gov/rmepub/index.jsp. RME, EPA's electronic public docket and comment system, is EPA's preferred method for receiving comments. Once in the system, select ''quick search,'' then key in the appropriate RME Docket identification number. Follow the online instructions for submitting comments.

E-mail: mooney.john@epa.gov.

Fax: (312) 886–5824.

Mail: You may send written comments to: John M. Mooney, Chief, Criteria Pollutant Section, (AR–18J), U.S. Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604.

Hand delivery: Deliver your comments to: John M. Mooney, Chief, Criteria Pollutant Section (AR–18J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, 18th floor, Chicago, Illinois 60604.

Such deliveries are only accepted during the Regional Office's normal hours of operation. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m. excluding federal holidays.

Instructions: Direct your comments to RME ID No. R05-OAR–2004–IL–0003. EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through RME, regulations.gov, or e-mail. The EPA RME Web site and the *federal regulations.gov* Web site are ''anonymous access'' systems, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through RME or regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional instructions on submitting comments, go to Section I(B) of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: All documents in the electronic docket are listed in the RME index at *http://www.epa.gov/rmepub/index.jsp*. Although listed in the index, some information is not publicly available, *i.e.*, CBI or other information whose disclosure is restricted by statute. Publicly available docket materials are available either electronically in RME or in hard copy at Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. (Please telephone Anthony Maietta at (312) 353–8777 before visiting the Region 5 Office.)

FOR FURTHER INFORMATION CONTACT: Anthony Maietta, Life Scientist, Criteria Pollutant Section, Air Programs Branch (AR–18J), USEPA, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 353–8777. *maietta.anthony@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does This Action Apply to Me?

This action applies to the Southeast Michigan CO maintenance area, which consists of portions of Macomb, Wayne, and Oakland Counties.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit CBI to EPA through RME, regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for Preparing Your Comments.* When submitting comments, remember to:

a. Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).

b. Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

c. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

d. Describe any assumptions and provide any technical information and/or data that you used.

e. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

f. Provide specific examples to illustrate your concerns, and suggest alternatives.

g. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

h. Make sure to submit your comments by the comment period deadline identified.

II. What Action Is EPA Taking Today?

EPA is proposing to approve a December, 19, 2003 request from Michigan to revise the Southeast Michigan CO maintenance plan. In a separate Direct Final Rule in today's **Federal Register**, EPA is approving the December 19, 2003 request. The Southeast Michigan CO maintenance area consists of portions of Oakland, Macomb, and Wayne Counties. As a result of today's action, the 1996 base year on-road emissions inventory, forecast year 2010 emissions inventory, and the 2010 MVEB will be updated to meet EPA's requirement to use the Mobile6 emissions factor model to determine conformity to the CO maintenance SIP. By approving the revision, EPA ensures that future emission forecasts for conformity analyses in the Southeast Michigan CO maintenance area will be compared to budgets that are based on similar inputs and the same version of the Mobile model.

III. Where Can I Find More Information About This Proposal and the Corresponding Direct Final Rule?

For additional information, see the Direct Final Rule which is located in the Rules section of this **Federal Register**. Copies of the request and the EPA's analysis are available electronically at RME or in hard copy at the above address. (Please telephone Anthony Maietta at (312) 353–8777 before visiting the Region 5 Office.)

Dated: January 14, 2005.

Norman Niedergang,

Acting Regional Administrator, Region 5.

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

42 CFR Part 63a

RIN 0925–AA28

National Institutes of Health Training Grants

AGENCY: National Institutes of Health, Department of Health and Human Services.

ACTION: Notice of proposed rulemaking.

SUMMARY: The National Institutes of Health (NIH) proposes to amend the existing regulations governing its training grants to reflect applicability of the regulations to institutional training grants supporting pediatric research training.

DATES: Comments must be received on or before March 29, 2005, in order to assure that NIH will be able to consider all comments when preparing the final rule.

ADDRESSES: You may submit comments, identified by RIN number 0925–AA28, by any of the following methods:

- Federal eRulemaking Portal: *http://www.regulations.gov*. Follow the instructions for submitting comments.
- E-mail: *jm40z@nih.gov*. Include RIN number 0925–AA28 in the subject line of the message.
- Fax: 301–402–0169.
- Mail: Jerry Moore, NIH Regulations Officer, Office of Management Assessment, National Institutes of Health, 6011 Executive Boulevard, Suite 601, MSC 7669, Rockville, Maryland 20892.
- Hand Delivery/Courier: 6011 Executive Boulevard, Suite 601, MSC 7669, Rockville, Maryland 20892.

FOR FURTHER INFORMATION CONTACT: Jerry Moore at the address above, or telephone 301–496–4607 (not a toll-free number).

SUPPLEMENTARY INFORMATION: On October 17, 2000, Congress enacted the Children's Health Act of 2000, Public Law 106–310. Title X, section 1002, of this law amended the Public Health Service (PHS) Act by adding section 452G (42 U.S.C. 285g–10). Section 452G directs the Director of the National Institute of Child Health and Human Development, after consultation with the Administrator of the Health Resources and Services Administration, to support activities to provide for and increase in the number and size of institutional training grants to institutions supporting pediatric training. We propose to amend the present regulations codified at 42 CFR part 63a, National Institutes of Health Training Grants, to implement this pediatric research training grants authority. More specifically, we propose to amend part 63a to reference section 452G of the PHS Act in the authority section and in paragraph (2) of § 63a.1 of the regulations, and update information in unnumbered paragraphs 17 and 18 of § 63a.11.

The purpose of this notice is to invite public comment on this proposed action. We provide the following as public information.

Executive Order 12866

Executive Order 12866, Regulatory Planning and Review, requires that all regulatory actions reflect consideration of the costs and benefits they generate, and that they meet certain standards, such as avoiding the imposition of unnecessary burdens on the affected public. If a regulatory action is deemed to fall within the scope of the definition of the term ''significant regulatory action'' contained in section 3(f) of the Order, prepublication review by the Office of Management and Budget's Office of Information and Regulatory Affairs (OIRA) is necessary. The OIRA reviewed this proposed rule under Executive Order 12866 and deemed it not a significant regulatory action as defined by the Executive Order.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. chapter 6) requires that regulatory proposals be analyzed to determine whether they create a significant impact on a substantial number of small entities. The Secretary of Health and Human Services (Secretary) certifies that any final rule resulting from this proposed rule will not have such impact.

Executive Order 13132

Executive Order 13132, Federalism, requires that Federal agencies consult with State and local government officials in the development of regulatory policies with federalism implications. The Secretary reviewed the proposed rule as required under the Executive Order and determined that it does not have federalism implications. The Secretary certifies that this proposed rule will not have an effect on the States, or on the distribution of power and responsibilities among the various levels of government.

Paperwork Reduction Act

This proposed rule does not contain information collection requirements which are subject to Office of

Management and Budget (OMB) approval under the Paperwork Reduction Act of 1995, as amended (44 U.S.C. chapter 35).

Catalogue of Federal Domestic Assistance

The Catalogue of Federal Domestic Assistance numbered program affected by the proposed regulation is: 93.865.

List of Subjects in 42 CFR Part 63a

Grant programs—health, Health-medical research.

Dated: May 27, 2004.

Elias A. Zerhouni,

Director, National Institutes of Health.

Approved: January 14, 2005.

Tommy G. Thompson,

Secretary.

For the reasons set forth in the preamble, we propose to amend chapter 1 of title 42 of the Code of Federal Regulations as set forth below.

PART 63a—NATIONAL INSTITUTES OF HEALTH TRAINING GRANTS

1. The authority citation of part 63a would be revised to read as follows:

Authority: 42 U.S.C. 216, 242*l*(b)(3), 284(b)(1)(C), 285g–10, 287c(b), 300cc–15(a)(1), 300cc–41(a)(3)(C), 7403(h)(2).

2. Section 63a.1 would be amended by revising paragraph (a)(2) to read as follows:

§ 63a.1 To what programs do these regulations apply?

* * * * *

(a) * * *

(1) * * *

(2) Grants awarded by NIH for research training with respect to the human diseases, disorders, or other aspects of human health or biomedical research for which the institute or other awarding component was established, for which fellowship support is not provided under section 487 of the Act and which is not residency training of physicians or other health professionals, as authorized by sections 405(b)(1)(C), 452G, 485B(b), 2315(a)(1), and 2354(a)(3)(C) of the Act; and

* * * * *

3. Section 63a.11 would be amended by revising the 17th and 18th undesignated paragraphs to read as follows:

§ 63a.11 Other HHS regulations and policies that apply.

* * * * *

''NIH Grants Policy Statement,'' NIH Publication No. 99–8 (October 1998). (*NOTE:* this policy is subject to change, and interested persons should contact the Extramural Outreach and Information Resources Office (EOIRO), Office of Extramural Research, 6701 Rockledge Drive, Room 6208, MSC 7910, Bethesda, Maryland 20892–7910, telephone 301–435–0714 (not a toll-free number), to obtain references to the current version and any amendments. Information may also be obtained by contacting the EOIRO via e-mail address (*nih@odrockm1.od.nih.gov*) and browsing the NIH Home Page site on the World Wide Web (*http://www.nih.gov*).)

Federal Transit Administration

49 CFR Part 605

[Docket No. FTA–99–5082]

RIN 2131–AA67

School Bus Operations; Amendment of Tripper Service Definition

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Withdrawal of rulemaking.

SUMMARY: This document withdraws the rulemaking in which the Federal Transit Administration (FTA) proposed to amend its tripper service definition to clarify which student transportation operations are inconsistent with FTA requirements. The rulemaking is being withdrawn because after consideration of the comments, FTA has concluded that no regulatory clarification is necessary.

FOR FURTHER INFORMATION CONTACT: Elizabeth S. Martineau, Office of Chief Counsel, Federal Transit Administration, (202) 366–1936 or (202) 366–3809 (fax).

SUPPLEMENTARY INFORMATION:

Electronic Access

An electronic copy of this document may be downloaded using a modem and suitable communication software from the Government Printing Office's Electronic Bulletin Board Service at (202) 512–1661. Internet users may reach the **Federal Register**'s home page at: *http://www.archives.gov* and the Government Printing Office's database at: *http://www.access.gpo.gov/nar.*

Background

On May 3, 1999, the Federal Transit Administration published a Notice of Proposed Rulemaking proposing to amend its tripper service definition to clarify that buses used in tripper service may not carry destination signs such as ''student'' or any other marking indicating that they are carrying school children. Further, the rule would have clarified that, as consistent with the current regulation, these buses may only stop at stops that are accessible to the public and that are clearly marked as available to the public. 64 FR 23590, May 3, 1999.

Discussion of Comments on the NPRM

FTA received sixty comments on its proposal to amend the definition of tripper service.

Comments Supporting the Proposed Changes

Three commenters expressed support for FTA's proposed amendment to the tripper service definition. One commenter suggested that destination signs be permitted to inform the rider where the bus route goes. Another commenter was concerned that those who opposed the changes were confusing the issue of safety of school children with the tripper service definition. The commenter stated that the issue of safety of school children on public transportation is an important one that merits its own separate rulemaking. One other commenter recommended that if FTA is not going to eliminate tripper service, it should ensure timely and aggressive enforcement of the regulations.

Comments Opposing the Proposed Changes

Stopping at Marked Public Stops

Twenty-three commenters objected to the proposed amendment to the tripper service definition that would clarify that buses may stop only at stops that are accessible to the public and that are clearly marked as available to the public. Although the law currently prohibits stops on property that is not accessible to the general public,

nineteen commenters cited the risk to student safety from not being picked up and discharged on school property as a reason for objecting to the proposed amendment.

Commenters also raised non-safety-related objections to the requirement that buses providing tripper service may only stop at marked public stops. Eight commenters objected to the requirement because buses in suburban and rural areas often stop at unmarked flag stops that are known to the public. Seven commenters stated that loading and unloading students on school property prevents impediments to traffic flow on public streets. Seven commenters noted that in other situations buses are allowed to drop-off and pickup passengers at stops to which the general public may not have access, such as secured work sites, private business parks, and college campuses. Two commenters opposed the requirement that buses providing tripper service may only stop at clearly marked stops because they thought it would impose a higher standard than that generally required of fixed route transit services.

Six commenters asserted that the proposed changes would require cities to purchase new signs to mark each stop, which would be a significant cost. The American Public Transportation Association (APTA) commented that the marked bus stop requirement would impose an undue financial burden on numerous transit authorities.

Signage and Markings on Buses

The proposal to clarify that tripper buses may not carry any signs or markings indicating the presence of school children onboard raised objections from eleven commenters, all of whom cited safety as their primary concern. Two commenters noted that without signs and markings, drivers would not be alerted to the presence of school children who may be crossing the road. One commenter also noted that without signs and markings, there would be increased public ridership, which could pose additional safety risks to children onboard. One commenter added that there was no objective evidence that existing signage regarding school children caused the public to believe that buses used for tripper service were not open to the general public.

Two commenters who did not support FTA's proposed amendment did support the prohibition on signs and markings on transit buses that indicate the presence of school children. One of these commenters stated that the public becomes confused when equipment from yellow school buses is placed on transit buses.

Enlarge Scope To Address Safety Generally

Eleven commenters suggested that, rather than focus on one aspect of the tripper service definition, FTA should work with the school transportation and public transit communities to address the safety needs of school students on public transit vehicles. Nine of the commenters opposed the proposed amendment entirely, arguing that it is shortsighted. The National Association of State Directors of Pupil Transportation Services (NASDPTS) argued that while ensuring that tripper buses remain open to the public is an important objective of the tripper rule, providing for student safety is an equally important objective. Consequently, they argued, amending only one element of the rule at the expense of the other is ''inappropriate.'' NASDPTS suggested that FTA ''with the assistance of the school transportation community and the public transit community, develop a list of acceptable safety practices to accommodate the needs of school students.'' Six other commenters concurred in NASDPTS's suggestion.

One commenter, a private citizen from Altoona, Pennsylvania, noticed that tripper buses lack many of the safety features found in traditional school buses, such as forward facing seats and additional emergency exits. This difference in the level of passenger safety prompted the National Association for Pupil Transportation (NAPT) to suggest temporarily suspending tripper service altogether. NAPT suggested that tripper service be disallowed until ''it is clear that children who ride a transit bus to school receive the equivalent level of operational safety as children who ride a school bus to school.''

Forced Elimination or Reduction of Tripper Service

Ten commenters asserted that the proposed amendment would cost cities significant amounts of money, because to the extent that the proposed change eliminates or reduces tripper service, cities would be required to purchase and maintain a yellow bus fleet or to contract for those services.

Four commenters opposed the proposed amendments because they would either reduce or eliminate tripper service, which would increase the time that it takes students to get to and from school. Without tripper service, they asserted, some students would have to transfer buses one or more times, thus adding to the time it takes the student to reach the school.

Agency Response

Given the comments on the proposed rulemaking, FTA has decided to withdraw this rulemaking as unnecessary. FTA believes that the proposed amendments to the regulation were merely clarifying in nature, and not necessary to the enforcement of current law and regulation. The comments received generally indicated objections to the underlying law and current regulations, rather than to the clarifying amendments, indicating that confusion about the intent of the current regulation was not the primary issue.

The proposed amendment to the destination sign language was intended only to give additional information about language that is inappropriate on a tripper service bus by specifically prohibiting use of the word ''student'' and adding the language ''or any other marking indicating that they are carrying school children.'' FTA proposed this added language because it believed that grantees were interpreting the term ''such as'' in the existing regulation as an exclusive listing of prohibited signs, rather than a representative listing of prohibited signs that could also include other signs. However, based on the comments received, it appears that there is no general misunderstanding of the existing regulation. Indeed, commenters objected to the underlying prohibition on signs or markings that indicate the presence of school children on board, arguing that such a prohibition is unsafe. However, under the current regulation, tripper service cannot be operated in a way that would call into question its availability to the public. Moreover, FTA believes that allowing transit buses to carry such signs actually poses a greater threat to safety because the widespread use of these signs on transit buses could engender a false belief by parents or guardians that transit buses are the equivalent of school buses in terms of safety. In FTA's view, the comments opposing the prohibition on signage based on safety concerns failed to account for the fact that tripper service is intended to make ordinary transit bus service available to school children; it is not intended to substitute for school bus transportation.

Grantees that honor flag stops in suburban and rural areas expressed concern regarding the requirement that tripper buses stop only at clearly marked public bus stops. The proposed rulemaking was not intended to eliminate the use of flag stops for tripper service when such stops are generally

used for public transportation service. Commenters who opposed this clarification generally expressed concerns about student safety if buses were not allowed to stop on school property. This comment seemed to reflect a lack of clarity or misunderstanding of the proposed amendment; consistent with the current regulation, the proposed amendment would not have prohibited stops on school property, as long as those stops were clearly marked, accessible to the general public, and included in published bus schedules.

APTA also opposed the public bus stop amendment based on the fact that FTA allows grantees to make stops on private work sites, which are generally inaccessible to the public. However, the statute singles out school bus service for special attention and the current implementing regulation requires that tripper buses stop only at clearly marked stops that are open to the public.

List of Subjects in 49 CFR Part 605

Mass transit, Grants, School bus.

■ For the reasons set forth above, FTA is withdrawing its proposed amendments to title 49 of the Code of Federal Regulations, part 605.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 04–135–1]

Notice of Request for Extension of Approval of an Information Collection

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection for self-certification medical statements.

DATES: We will consider all comments that we receive on or before March 29, 2005.

ADDRESSES: You may submit comments by any of the following methods:

EDOCKET: Go to *http://www.epa.gov/feddocket* to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once you have entered EDOCKET, click on the ''View Open APHIS Dockets'' link to locate this document.

Postal Mail/Commercial Delivery: Please send four copies of your comment (an original and three copies) to Docket No. 04–135–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 04–135–1.

E-mail: Address your comment to *regulations@aphis.usda.gov*. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and ''Docket No. 04–135–1'' on the subject line.

Reading Room: You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

Other Information: You may view APHIS documents published in the **Federal Register** and related information, including the names of groups and individuals who have commented on APHIS dockets, on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html*.

FOR FURTHER INFORMATION CONTACT: For information on self-certification medical statements, contact Ms. Linda L. Lane, Human Resources Specialist, Human Resources Division, MRPBS, room 1726, South Building, 14th Street and Independence Avenue SW., Washington, DC 20250; (202) 720–3519. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734–7477.

SUPPLEMENTARY INFORMATION:

Title: Self-Certification Medical Statement.

OMB Number: 0579–0196.

Type of Request: Extension of approval of an information collection.

Abstract: The Marketing and Regulatory Programs (MRP) agencies of the U.S. Department of Agriculture facilitate the domestic and international marketing of U.S. agricultural products and protect the health of domestic animal and plant resources. The MRP agencies are the Agricultural Marketing Service (AMS), the Animal and Plant Health Inspection Service (APHIS), and the Grain Inspection, Packers and Stockyards Administration (GIPSA). Resource management and administrative services, including human resource management, for the three MRP agencies are provided by the MRP Business Services unit of APHIS, which is the lead agency in providing administrative support for MRP.

In accordance with 5 CFR part 339, Federal agencies are authorized to obtain medical information from applicants for positions that have approved medical standards. Medical standards may be established for positions for which the duties are arduous or hazardous or require a certain level of health status or fitness.

Certain positions in MRP agencies have medical standards. An example of such a position is the agricultural commodity grader position in AMS. Each year, AMS hires a number of agricultural commodity graders. These employees work under dusty conditions, around moving machinery and slippery surfaces, and in areas with high noise levels. They have direct contact with meat and dairy products, fresh and processed fruits and vegetables, and poultry products intended for human consumption or cotton and tobacco products intended for human use.

The MRP agencies require a self-certification statement from applicants for these positions regarding their fitness for the positions. The MRP agencies need this information to determine whether the applicants can perform the duties of the positions. Inability to collect this information would adversely affect the MRP agencies' ability to recruit and hire qualified individuals and carry out their missions.

We are asking the Office of Management and Budget (OMB) to approve our use of this information collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical,

and other collection technologies, *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.1666 hours per response.

Respondents: Applicants for MRP positions with approved medical standards.

Estimated annual number of respondents: 300.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 300.

Estimated total annual burden on respondents: 50 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 24th day of January 2005.

Elizabeth E. Gaston,

Acting Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 04–051–1]

Syngenta Seeds, Inc.; Availability of Petition and Environmental Assessment for Determination of Nonregulated Status for Cotton Genetically Engineered for Insect Resistance

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has received a petition from Syngenta Seeds, Inc., seeking a determination of nonregulated status for cotton designated as transformation Event COT102, which has been genetically engineered for insect resistance. The petition has been submitted in accordance with our regulations concerning the introduction of certain genetically engineered organisms and products. In accordance with those regulations, we are soliciting public comments on whether this cotton presents a plant pest risk. We are also making available for public comment an environmental assessment for the proposed determination of nonregulated status.

DATES: We will consider all comments we receive on or before March 29, 2005.

ADDRESSES: You may submit comments by any of the following methods:

• EDOCKET: Go to *http://www.epa.gov/feddocket* to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once you have entered EDOCKET, click on the ''View Open APHIS Dockets'' link to locate this document.

• Postal Mail/Commercial Delivery: Please send four copies of your comment (an original and three copies) to Docket No. 04–051–1, Regulatory Analysis and Development, PPD, APHIS, Station 3C71, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. 04–051–1.

• E-mail: Address your comment to *regulations@aphis.usda.gov*. Your comment must be contained in the body of your message; do not send attached files. Please include your name and address in your message and ''Docket No. 04–051–1'' on the subject line.

Reading Room: You may read the petitions, the environmental assessment, and any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

Other Information: You may view APHIS documents published in the **Federal Register** and related information, including the names of groups and individuals who have commented on APHIS dockets, on the Internet at *http://www.aphis.usda.gov/ppd/rad/webrepor.html*.

FOR FURTHER INFORMATION CONTACT: Dr. Margaret Jones, Biotechnology Regulatory Services, APHIS, Suite 5B05, 4700 River Road Unit 147, Riverdale, MD 20737–1236; (301) 734–4880. To obtain copies of the petition or the environmental assessment, contact Ms. Terry Hampton at (301) 734–5715; e-mail: *Terry.A.Hampton@aphis.usda.gov*. The petition and the EA are also available on the Internet at *http://www.aphis.usda.gov/brs/aphisdocs/03_15501p.pdf* and *http://www.aphis.usda.gov/brs/aphisdocs/03_15501p_ea.pdf*.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, ''Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason to Believe Are Plant Pests,'' regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such genetically engineered organisms and products are considered ''regulated articles.''

The regulations in § 340.6(a) provide that any person may submit a petition to the Animal and Plant Health Inspection Service (APHIS) seeking a determination that an article should not be regulated under 7 CFR part 340. Paragraphs (b) and (c) of § 340.6 describe the form that a petition for a determination of nonregulated status must take and the information that must be included in the petition.

On June 4, 2003, APHIS received a petition (APHIS Petition Number 03–155–01p) from Syngenta Seeds, Inc., (Syngenta) of Research Triangle Park, NC, requesting a determination of nonregulated status under 7 CFR part 340 for cotton (*Gossypium hirsutum* L.) designated as transformation Event COT102, which has been genetically engineered for selective lepidopteran insect resistance. The Syngenta petition states that the subject cotton should not be regulated by APHIS because it does not present a plant pest risk.

As described in the petition, Event COT102 cotton has been genetically engineered to contain an insecticidal *vip3A(a)* gene derived from *Bacillus thuringiensis* (Bt) strain AB88 under the control of the actin-2 promoter derived from *Arabidopsis thaliana,* which confers expression of the VIP3A(a) protein throughout the plant with the exception of the fiber. Event COT102 cotton also contains the selectable marker gene *aph4* derived from *Escherichia coli.* The *aph4* gene encodes the enzyme hygromycinB phosphotransferase and its expression is controlled by the ubiquitin-3 promoter from *A. thaliana.* Agrobacterium-mediated gene transfer was used to transfer the added genes into the recipient Coker 312 cotton variety. The petitioner states that while the VIP3A protein shares no homology with known Cry proteins, testing has shown that VIP3A is similarly specific in toxicity

only to the larvae of certain lepidopteran species. However, the VIP3A apparently targets a different receptor than the Cry1 proteins in sensitive species and therefore may be useful in the management of pest resistance.

Event COT102 has been considered a regulated article under the regulations in 7 CFR part 340 because it contains gene sequences from the plant pathogen *Agrobacterium tumefaciens.* This cotton event has been field tested since 2000 in the United States under APHIS notifications. In the process of reviewing the notifications for field trials of the subject cotton, APHIS determined that the vector was disarmed and that the trials, which were conducted under conditions of reproductive and physical confinement or isolation, would not present a risk of plant pest introduction or dissemination.

In § 403 of the Plant Protection Act (7 U.S.C. 7701–7772), plant pest is defined as any living stage of any of the following that can directly or indirectly injure, cause damage to, or cause disease in any plant or plant product: A protozoan, a nonhuman animal, a parasitic plant, a bacterium, a fungus, a virus or viroid, an infectious agent or other pathogen, or any article similar to or allied with any of the foregoing. APHIS views this definition very broadly. The definition covers direct or indirect injury, disease, or damage not just to agricultural crops, but also to plants in general, for example, native species, as well as to organisms that may be beneficial to plants, for example, honeybees, rhizobia, etc.

The U.S. Environmental Protection Agency (EPA) is responsible for the regulation of pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (7 U.S.C. 136 *et seq.*). FIFRA requires that all pesticides, including herbicides, be registered prior to distribution or sale, unless exempt by EPA regulation. In cases in which genetically modified plants allow for a new use of a pesticide or involve a different use pattern for the pesticide, EPA must approve the new or different use. Accordingly, Syngenta has submitted a request for commercial registration of VIP3A as a plant-incorporated protectant.

When the use of the pesticide on the genetically modified plant would result in an increase in the residues in a food or feed crop for which the pesticide is currently registered, or in new residues in a crop for which the pesticide is not currently registered, establishment of a new tolerance or a revision of the existing tolerance would be required. Residue tolerances for pesticides are established by EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended (21 U.S.C. 301 *et seq.*), and the Food and Drug Administration (FDA) enforces tolerances set by EPA under the FFDCA. Syngenta has submitted a request to EPA for a tolerance exemption for both the VIP3A and APH4 proteins as expressed in the subject cotton event. Subsequently, EPA granted a time-limited exemption from tolerance for the VIP3A protein and an exemption from tolerance for residues of the APH4 protein.

FDA published a statement of policy on foods derived from new plant varieties in the **Federal Register** on May 29, 1992 (57 FR 22984 23005). The FDA statement of policy includes a discussion of FDA's authority for ensuring food safety under the FFDCA, and provides guidance to industry on the scientific considerations associated with the development of foods derived from new plant varieties, including those plants developed through the techniques of genetic engineering. Syngenta has begun consultation with FDA on the subject cotton event.

To provide the public with documentation of APHIS' review and analysis of the environmental impacts and plant pest risk associated with a proposed determination of nonregulated status for Syngenta's Event COT102 cotton, an environmental assessment has been prepared. The EA was prepared in accordance with (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

In accordance with § 340.6(d) of the regulations, we are publishing this notice to inform the public that APHIS will accept written comments regarding the petition for a determination of nonregulated status from interested persons for a period of 60 days from the date of this notice. We are also soliciting written comments from interested persons on the environmental assessment prepared to examine any environmental impacts of the proposed determinations for the subject cotton event. The petition and the environmental assessment and any comments received are available for public review, and copies of the petitions and the environmental assessment are available as indicated in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

After the comment period closes, APHIS will review the data submitted by the petitioner, all written comments received during the comment period, and any other relevant information. After reviewing and evaluating the comments on the petition and the environmental assessment and other data and information, APHIS will furnish a response to the petitioner, either approving the petition in whole or in part, or denying the petition. APHIS will then publish a notice in the **Federal Register** announcing the regulatory status of Syngenta's insect-resistant cotton event COT102 and the availability of APHIS' written decision.

Authority: 7 U.S.C. 1622n and 7701–7772; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 19th day of January 2005.

Elizabeth E. Gaston,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. E5–328 Filed 1–27–05; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Proposed Collection; Comment Request—Feasibility of Computer Matching in the National School Lunch Program

AGENCY: Food and Nutrition Service, Department of Agriculture.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Food and Nutrition Service's intention to request Office of Management and Budget approval of a new information collection from State Child Nutrition (CN), Education, and Medicaid agencies, as well as School Food Authorities (SFAs). The study will collect information to examine the feasibility of using computer matching in the National School Lunch Program (NSLP) to help improve program integrity and operational efficiency.

DATES: Written comments on this notice must be received by March 29, 2005, to be assured of consideration.

ADDRESSES: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate

of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments may be sent to Alberta Frost, Director, Office of Analysis, Nutrition, and Evaluation, Food and Nutrition Service, Department of Agriculture, 3101 Park Center Drive, Room 1014, Alexandria, VA 22302.

All responses to this notice will be summarized and included in the request for Office of Management and Budget (OMB) approval of the information collection. All comments will also become a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the proposed information collection forms should be directed to Alberta Frost at (703) 305–2017.

SUPPLEMENTARY INFORMATION:

Title: Feasibility of Computer Matching in the National School Lunch Program.

OMB Number: Not yet assigned.

Expiration Date: Not applicable.

Type of Request: New collection of information.

Abstract: The Food and Nutrition Service (FNS) is seeking to improve the process by which SFAs determine and verify the children eligible for free and reduced-price school meals. Recent studies suggest that a significant number of ineligible children are being approved for free and reduced-price meals. Congress expressed concern about these issues in the Child Nutrition and WIC Reauthorization Act of 2004 (Pub. L. 108–265) (the Act). Section 105(a) requires USDA to conduct a study on the feasibility of using computer technology to reduce errors, waste, fraud, and abuse in the NSLP. The study will collect and analyze data through mail surveys of all states and in-depth telephone interviews with six selected States to: Assess current and planned use of computer matching for NSLP certification and application verification; identify benefits, challenges, and barriers to computer matching; collect information on statewide student information systems and education matches with Medicaid and wage data; and identify the types of information maintained by the Medicaid program that could be useful for NSLP certification and verification.

Estimate of Burden: The public reporting burden for the survey of State CN Program directors is estimated at 40 minutes for the mail survey. The public reporting burden for the survey of State Education Agency (SEA) liaisons to the National Center for Education Statistics (NCES) is estimated to be 15 minutes for the mail survey. The public reporting burden for the survey of State Medicaid Directors is estimated to be 30 minutes for the mail survey.

For the in-depth telephone interviews, the burden estimates per respondent in each of the six States are: State CN officials, 60 minutes; State Student Information Systems administrators, 60 minutes; State Food Stamp Program (FSP) agency officials, 60 minutes; State Medicaid agency officials, 60 minutes; State Wage Information Collection Agency (SWICA) officials, 60 minutes; and SFA administrators, 60 minutes.

Respondents: Respondents for the mail survey are State CN Directors, SEA NCES liaisons, and State Medicaid Directors. Respondents for the in-depth telephone interviews include: State CN officials; State Student Information Systems administrators; State FSP agency officials; State Medicaid agency officials, SWICA officials, and SFA administrators.

Estimated Number of Respondents: Mail surveys will be conducted with 51 State CN Program Directors, 51 SEA NCES liaisons, and 51 State Medicaid Directors.

In-depth telephone interviews will be conducted with: 12 State CN agency officials; 12 State Student Information Systems administrators; 12 State FSP agency officials; 12 State Medicaid agency officials; 12 SWICA officials; and 12 SFA administrators.

Number of Responses per Respondent: One response per respondent per data collection effort.

Estimated Time per Response:

Respondents	Number	Minutes	Total minutes
State CN Directors: Mail Survey	51	40	2,040
SEA NCES Liaisons: Mail Survey	51	15	765
State Medicaid Directors: Mail Survey	51	30	1,530
State CN Officials: Telephone Interview	12	60	720
State Student Information System Administrators: Telephone Interview	12	60	720
State FSP Officials: Telephone Interview	12	60	720
State Medicaid Officials: Telephone Interview	12	60	720
SWICA Officials: Telephone Interview	12	60	720
SFA Administrators: Telephone Interview	12	60	720
Total Respondent Burden	.....	.....	8,655

Estimated Total Annual Burden on Respondents: 144 hours.

Dated: January 21, 2005.

Roberto Salazar,

Administrator.

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. 04–045N]

Codex Alimentarius Commission: Thirty-Seventh Session of the Codex Committee on Food Additives and Contaminants

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice of public meeting, request for comments.

SUMMARY: The Office of the Under Secretary for Food Safety, United States Department of Agriculture (USDA), and the Food and Drug Administration (FDA), United States Department of Health and Human Services, are sponsoring a public meeting on March 9, 2005, to provide information and receive public comments on agenda items that will be discussed at the

Thirty-seventh Session of the Codex Committee on Food Additives and Contaminants (CCFAC), which will be held in The Hague, The Netherlands, on April 25–29, 2005. The Under Secretary and FDA recognize the importance of providing interested parties the opportunity to obtain background information on the agenda items that will be discussed at this forthcoming session of the CCFAC.

DATES: The public meeting is scheduled for Wednesday, March 9, 2005, from 1 p.m. to 4 p.m.

ADDRESSES: The public meeting will be held in the Auditorium (Room 1A–003), Harvey W. Wiley Federal Building, 5100 Paint Branch Parkway, College Park, Maryland. Documents related to the 37th Session of the CCFAC will be accessible via the World Wide Web at the following address: *http://www.codexalimentarius.net/current.asp*.

FSIS invites interested persons to submit comments on this notice. Comments may be submitted by any of the following methods:

- Mail, including floppy disks or CD–ROM's and hand-or courier-delivered items: Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, 300 12th Street, SW., Room 102, Cotton Annex, Washington, DC 20250–3700.

All comments received must include the Agency name and docket number #04–045N.

All comments submitted in response to this notice, will be available for public inspection in the FSIS Docket Room at the address listed above between 8:30 a.m. and 4:30 p.m., Monday through Friday. The comments also will be posted on the Agency's Web site at *http://www.fsis.usda.gov/regulations/2005_Notices_Index/*.

FOR FURTHER INFORMATION CONTACT: About the 37th session of the CCFAC: U.S. Delegate, Dr. Terry Troxell, Director, Office of the Plant and Diary Foods and Beverages, Center for Food Safety and Applied Nutrition, FDA, Harvey W. Wiley Federal Building, 5100 Paint Branch Parkway (HFS–300), College Park, MD 20740, phone: (301) 436–1700, fax: (301) 436–2632, e-mail: *terry.troxell@fda.hhs.gov*.

About the public meeting: Ellen Matten, U.S. Codex Office, Food Safety and Inspection Service, Room 4861, South Building, 1400 Independence Avenue, SW., Washington, DC 20250–3700, phone: (202) 205–7760, fax: (202) 720–3157. Attendees are requested to pre-register as soon as possible by e-mail to (e-mail address: *ccfac@cfsan.fda.gov*.)

SUPPLEMENTARY INFORMATION:

Background

The Codex Alimentarius Commission (Codex) was established in 1962 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Codex is the major international standard-setting organization for protecting the health and economic interests of consumers and encouraging fair international trade in food. Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to ensure that the world's food supply is sound, wholesome, free from adulteration, and correctly labeled. In the United States, USDA, FDA, and the Environmental Protection Agency (EPA) manage and carry out U.S. Codex activities.

The Codex Committee on Food Additives and Contaminants (CCFAC) establishes or endorses maximum or guideline levels for individual food additives, for contaminants (including environmental contaminants) and for naturally occurring toxicants in foodstuffs and animal feeds. In addition, the Committee prepares priority lists of food additives and contaminants for toxicological evaluation by the Joint FAO/WHO Expert Committee on Food Additives (JECFA); recommends specifications of identity and purity for food additives for adoption by the Commission; considers methods of analysis for the determination of food additives and contaminants in food; and considers and elaborates standards or codes for related subjects such as the labeling of food additives when sold as such, and food irradiation. The Committee is chaired by The Netherlands.

Issues To Be Discussed at the Public Meeting

Items on the provisional agenda of the 37th session of CCFAC to be discussed during the public meeting:

1. Matters referred or of interest to the committee arising from the Codex Alimentarius Commission and other Codex committees, including the endorsement or revision of maximum levels for food additives and contaminants in Codex commodity standards.

2. Summary reports of the 63rd and 64th meetings of the Joint Expert Committee for Food Additives (JECFA) and any actions required as a result of changes in the acceptable daily intake (ADI) status and other toxicological recommendations.

3. Consideration of the Codex General Standard for Food Additives (GSFA) including:

(a) Progress report of the working group on the working principles of the GSFA,

(b) Report of the electronic working group on the GSFA,

(c) Draft and proposed draft food additives provisions requiring information on their use, and

(d) Proposed draft food additive provisions at Step 3 and proposals for new uses.

4. Proposals for additions or amendments to the International Numbering System for Food Additives, including discussion papers on harmonizing the food additive class names used by Codex and JECFA, and a proposed definition of food additive carriers.

5. An updated Inventory of Processing Aids (IPA).

6. A discussion paper on flavoring agents with risk management options for CCFAC to consider.

7. Terms of reference for a Joint FAO/WHO expert group to conduct a comprehensive assessment of the use of active chlorine in food processing.

8. Specifications for the identity and purity of food additives.

9. Schedule 1 of the Codex General Standard for Contaminants and Toxins (GSCT) with proposed draft revisions.

10. Draft code of practice for the prevention and reduction of aflatoxin contamination in tree nuts.

11. Proposed draft maximum levels for aflatoxin in unprocessed and processed almonds, hazelnuts, and pistachios.

12. Proposed draft sampling plan for aflatoxin contamination in almonds, Brazil nuts, hazelnuts, and pistachios.

13. Discussion paper on aflatoxin contamination in Brazil nuts with risk management options for CCFAC to consider.

14. Information on deoxynivalenol (DON) contamination in cereal grains.

15. Information on mycotoxin contamination in sorghum.

16. Draft maximum levels for lead in fish, including a list of the major internationally traded fish species with proposals for lead maximum levels.

17. Proposed draft maximum levels for tin in food.

18. Draft code of practice for the prevention and reduction of inorganic tin contamination in canned foods.

19. Draft and proposed draft maximum levels for cadmium in rice, potatoes, wheat, vegetables, and mollusks.

20. Proposed draft code of practice for source directed measures to reduce dioxin and dioxin-like polychlorinated biphenyls (PCB) contamination of foods.

21. A discussion paper and proposed draft maximum levels for chloropropanols in food.

22. Discussion paper on acrylamide in food with risk management options for CCFAC to consider.

23. Discussion paper on polycyclic aromatic hydrocarbons in food with risk management options for CCFAC to consider.

24. Discussion paper on guideline levels for methylmercury in fish with risk management options for CCFAC to consider.

25. Draft revised guideline levels for radionuclides in foods for use in international trade.

26. Priority list of food additives, contaminants and naturally occurring toxicants proposed for evaluation by JECFA.

Each issue listed will be fully described in documents distributed, or to be distributed, by The Netherlands' Secretariat to the Meeting. Members of the public may access or request copies of these documents (*see* **ADDRESSES**).

Public Meeting

At the March 9, 2005, public meeting, the agenda items will be described and discussed, and attendees will have the opportunity to pose questions and offer comments. Written comments may be offered at the meeting or sent to the U.S. Delegate, for the 37th Session of the CCFAC, Dr. Terry Troxell (*see* **ADDRESSES**). Written comments should state that they relate to activities of the 37th Session of the CCFAC.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to ensure that the public and in particular minorities, women, and persons with disabilities are aware of this notice, FSIS will announce it on-line through the FSIS Web page. The Agency Web page is located at *http://www.fsis.usda.gov.*

FSIS also will make copies of this **Federal Register** publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, recalls, and other types of information that could affect or would be of interest to our constituents and shareholders. The update is communicated via Listserv, a free e-mail subscription service consisting of industry, trade, and farm groups, allied health professionals, scientific professionals, and other individuals that have requested to be included. The update also is available on the FSIS Web page. Through Listserv and the Web page, FSIS is able to provide information to a much broader, more diverse audience.

Done in Washington, DC on January 24, 2005.

F. Edward Scarbrough,

U.S. Manager for Codex Alimentarius.

[FR Doc. 05–1612 Filed 1–27–05; 8:45 am]

BILLING CODE 3410–DM–P

DEPARTMENT OF AGRICULTURE

Forest Service

Transfer of Administrative Jurisdiction: Joint Readiness Training Center (JRTC), Fort Polk Military Reservation Interchange and the Kisatchie National Forest, LA

AGENCY: Forest Service, USDA.

ACTION: Notice of joint interchange of lands.

SUMMARY: The Act of July 26, 1956 (70 Stat. 656; 16 U.S.C. 505a–b) authorizes the interchange of land between the Department of Agriculture and the Department of Defense through its various services. On August 10, 2004, and November 12, 2004, respectively, the Secretary of the Army and the Secretary of Agriculture signed a Joint Order authorizing the transfer of administrative jurisdiction from the Department of Agriculture to the Department of the Army of 480.00 acres, more or less, located in Natchitoches Parish, Louisiana and generally described as: Parts of Sections 26, 28, 30, 34, and 35, Township 5 North, Range 8 West, Louisiana Meridian, lying within the Joint Readiness Training Center (JRTC), Fort Polk Military Reservation, and the Kisatchie National Forest and more particularly described according to the map and legal description on file in the Forest Service office noted in the **ADDRESSES** section of this notice.

Furthermore, the Joint Order transfers from the Department of the Army to the Department of Agriculture for inclusion in the Kisatchie National Forest 481.33 acres, more or less, located in Vernon Parish, Louisiana, and generally described as: Parts of Section 18 and 34, Township 1 North, Range 6 West, Louisiana Meridian, being 120 acres, more or less; Parts of Sections 16 and 32, Township 1 North, Range 5 West, Louisiana Meridian, being 51.33 acres, more or less; Parts of Sections 32 and 33, Township 1 North, Range 8 West, Louisiana Meridian, being 310 acres, more or less, within the boundaries of the Kisatchie National Forest, and more particularly described according to the map and legal description on file in the Forest Service office noted in the **ADDRESSES** section of this notice. A copy of the Joint Order is set out at the end of this notice.

EFFECTIVE DATE: The 45-day Congressional oversight requirement of the Act of July 26, 1956 has been met. The Joint Order is effective January 28, 2005.

ADDRESSES: Copies of the maps with adjoining legal descriptions showing the lands included in this joint interchange are on file and available for public inspection in the Office of the Director of Lands, 4th Floor South, Sidney R. Yates Federal Building, Forest Service, USDA, 201 14th Street, SW., Washington, DC 20250, between the hours of 8:30 a.m. and 4:30 p.m. on business days. Those wanting to inspect the maps with adjoining legal descriptions are encouraged to call ahead to (202) 205–1248 to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: A.L. Richard, Lands Staff, at (202) 205–1792. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 twenty-four hours a day, every day of the year, including holidays.

Dated: January 25, 2005.

Gloria Manning,

Associate Deputy Chief.

Department of the Army

Department of Agriculture

Fort Polk, Louisiana Joint Order; Interchanging Administrative Jurisdiction of Department of the Army Lands and National Forest System Lands

By virtue of the authority vested in the Secretary of the Array and the Secretary of Agriculture by the Act of July 26, 1956 (70 Stat. 656; 16 U.S.C. 505a) it is ordered as follows:

1. The lands under the jurisdiction of the Department of the Army described in Exhibit A and shown on the attached maps which are on file and available for public inspection in the Office of the Chief, U.S. Department of Agriculture (USDA), Forest Service, Washington, DC, which lie within the boundary of Joint Readiness Training Center (JRTC) and Fort Folk's military reservation, Vernon and Natchitoches Parishes, Louisiana, are hereby transferred from the jurisdiction of the Secretary of the Army to the jurisdiction of the Secretary of Agriculture, subject to outstanding rights or interests of record.

2. The lands under the jurisdiction of the USDA Forest Service described in Exhibit B

and shown on the attached map which are on file and available for public inspection in the Office of the Chief, USDA Forest Service, Washington, DC, which lie within the Kisatchie National Forest (KNF), Louisiana, are hereby transferred from the jurisdiction of the Secretary of Agriculture to the jurisdiction of the Secretary of the Army, subject to outstanding rights or interests of record.

3. Pursuant to Section 2 of the aforementioned Act of July 26, 1956, the National Forest lands transferred to the Secretary of Army by this Joint Interchange order, are hereby subject only to the laws applicable to the Department of the Army lands comprising JRTC and Fort Polk, Louisiana. The Department of the Army lands transferred to the Secretary of Agriculture by this order are hereafter subject only to the laws applicable to lands acquired under the Act of March 1, 1911 (36 Stat. 961) as amended.

4. After the effective date of this Joint Interchange Order, the Department of the Army shall remain responsible for the response to any ordnance, explosives, hazardous substances, or pollutants or contaminants discovered on the lands described in Exhibits A and B, that are the result of past Army operations on those lands or that occurred during the Army's administration of those lands.

This joint Interchange Order will be effective as of the date of publication in the **Federal Register**.

Dated: August 10, 2004.

R.L. Brownlee,

Acting Secretary of the Army.

Dated: November 12, 2004.

Ann M. Veneman,

Secretary of Agriculture.

[FR Doc. 05–1623 Filed 1–27–05; 8:45 am]

BILLING CODE 3410–11–P

CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

Sunshine Act Meeting

In connection with its investigation into the cause of an dust explosion and fire that occurred at the CTA Acoustics manufacturing plant in Corbin, Kentucky, on February 20, 2003, the United States Chemical Safety and Hazard Investigation Board (CSB) announces that it will convene a Public Meeting starting at: 7 p.m. on February 15, 2005 at the London Community Center, 529 South Main Street, London, KY 40741; Telephone: (606) 864–7777.

At the meeting CSB staff will present to the Board the results of their investigation into this incident, including an analysis of the incident together with a discussion of the key findings, root and contributing causes, and draft recommendations. The CSB staff presentation will focus on four key safety issues: Combustible Dust Hazard Awareness, Work Practices, Building Design, and Product Stewardship.

The 2003 incident damaged the CTA Acoustics manufacturing plant in Corbin, Kentucky, fatally injuring seven workers. The facility produced fiberglass insulation for the automotive industry. CSB investigators have found that the explosion was fueled by a phenolic resin dust accumulated in a production area, likely ignited by flames from a malfunctioning oven. The resin was used in producing fiberglass mats.

After the staff presentation, the Board will allow a time for public comment. Following the conclusion of the public comment period, the Board will consider whether to vote to approve the final report and recommendations.

All staff presentations are preliminary and are intended solely to allow the Board to consider in a public forum the issues and factors involved in this case. No factual analyses, conclusions or findings should be considered final. Only after the Board has considered the staff presentation and approved the staff report will there be an approved final record of this incident.

The meeting will be open to the public. Please notify CSB if a translator or interpreter is needed, at least 5 business days prior to the public meeting. For more information, please contact the Chemical Safety and Hazard Investigation Board at (202) 261–7600, or visit our Web site at: *http://www.csb.gov.*

Christopher W. Warner,

General Counsel.

BILLING CODE 6350–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Deletions from Procurement List.

SUMMARY: The Committee is proposing to delete from the Procurement List services previously furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

Comments Must Be Received on or Before: February 27, 2005.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Jefferson Plaza 2, Suite 10800, 1421 Jefferson Davis Highway, Arlington, Virginia 22202–3259.

FOR FURTHER INFORMATION CONTACT: Sheryl D. Kennerly, Telephone: (703) 603–7740, Fax: (703) 603–0655, or e-mail *SKennerly@jwod.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Deletions

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. If approved, the action may result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. If approved, the action may result in authorizing small entities to furnish the services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the services proposed for deletion from the Procurement List.

End of Certification

The following services are proposed for deletion from the Procurement List:

Services

Service Type/Location: Commissary Shelf Stocking & Custodial; Fort Bragg and Malonee Village, Fayetteville, North Carolina.
NPA: None currently authorized.
Contracting Activity: Defense Commissary Agency, Fort Lee, Virginia.
Service Type/Location: Food Service; Pueblo Chemical Depot, Pueblo, Colorado.
NPA: Pueblo Diversified Industries, Inc., Pueblo, Colorado.
Contracting Activity: U.S. Army, Rocky Mountain Arsenal, Commerce City, Colorado.
Service Type/Location: Janitorial/Custodial; U.S. Federal Building and Courthouse, Fresno, California.
NPA: None currently authorized.
Contracting Activity: GSA, Public Buildings Service.

BILLING CODE 6353–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to and deletions from Procurement List.

SUMMARY: This action adds to the Procurement List products and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes from the Procurement List products previously furnished by such agencies.

EFFECTIVE DATE: February 27, 2005.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Jefferson Plaza 2, Suite 10800, 1421 Jefferson Davis Highway, Arlington, Virginia 22202–3259.

FOR FURTHER INFORMATION CONTACT: Sheryl D. Kennerly, Telephone: (703) 603–7740, fax: (703) 603–0655, or e-mail *SKennerly@jwod.gov*.

SUPPLEMENTARY INFORMATION:

Additions

On October 29, December 3, and December 17, 2004, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice (69 FR 63139, 70222/23, and 75507) of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the products and services and impact of the additions on the current or most recent contractors, the Committee has determined that the products and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and services to the Government.

2. The action will result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the products and services proposed for addition to the Procurement List.

End of Certification

Accordingly, the following products and services are added to the Procurement List:

Products

Product/NSN: Folder, File, Classification, 7530–01–011–9454.
NPA: Georgia Industries for the Blind, Bainbridge, Georgia.
Contracting Activity: Office Supplies & Paper Products Acquisition Center New York, New York.
Product/NSN: Mass Casualty First Aid Kit, USAF, 6545–01–525–9821—Mass Casualty Bag, 6545–01–525–9847—Trauma Module, 6545–01–525–9849—Minor Module, 6545–01–526–0062—Splint Module, 6545–01–526–0065—CPR Module, 6545–01–526–0423—Mass Casualty First Aid Kit.
NPA: Chautauqua County Chapter, NYSARC, Jamestown, New York.
Contracting Activity: U.S. Air Force—AFMLO/USAF, Frederick, Maryland.
Contracting Activity: Defense Supply Center Philadelphia, Philadelphia, Pennsylvania.

Services

Service Type/Location: Custodial & Grounds Maintenance, South Eastern Regional Archives, 5780 Jonesboro Road, Morrow, Georgia.
NPA: Goodwill Industries of North Georgia, Inc., Atlanta, Georgia.
Contracting Activity: National Archives & Records Administration, College Park, Maryland.
Service Type/Location: Document Destruction, Internal Revenue Service, NISH, Vienna, Virginia (Prime Contractor). Performance to be allocated to the Nonprofit Agencies identified at the following locations: 101 Park Deville Drive, Columbia, Missouri; 919 Jackson Street, Chillicothe, Missouri; 3702 W. Truman Blvd, Jefferson City, Missouri.
NPA: Independence and Blue Springs Industries, Inc., Independence, Missouri; 137 S. Broadview, Cape Girardeau, Missouri; 2725 N. Westwood Blvd, Poplar Bluff, Missouri.
NPA: Cape Girardeau Community Sheltered Workshop, Inc., Cape Girardeau, Missouri; 12941 I–45 North, Houston, Texas; 8876 Gulf Freeway, Houston, Texas; 8701 South Gessner (Alliance Tower), Houston, Texas; 1919 Smith Street (G. T. ''Mickey'' Leland Federal Building) Houston, Texas; 350 Pine Street (Petroleum Tower), Beaumont, Texas.
NPA: Austin Task, Inc., Austin, Texas, 4050 Alpha Road, Farmers Branch, Texas; 1801 N. Hampton Road (DeSoto State Bank Building), DeSoto, Texas; 1100/1114 Commerce Street (Earle Cabell Federal Building Complex) Dallas, Texas; 2601 Meacham Blvd (FAA Building), Fort Worth, Texas; 819 Taylor Street (U.S. Federal Courthouse), Fort Worth, Texas.
NPA: Expanco, Inc., Fort Worth, Texas; 1800 NW Loop 821 (Bank Building Office Center), Longview, Texas; 909 ESE Loop 323 (Commerce Square III), Tyler, Texas.
NPA: Goodwill Industries—Opportunities in Tyler, Tyler, Texas.
Contract Activity: IRS—Western Area Procurement Branch—APFW, San Francisco, California.
Service Type/Location: Laundry Service, U.S. Mint, 155 Hermann Street, San Francisco, California.
NPA: Toolworks, Inc., San Francisco, California.
Contracting Activity: U.S. Mint, San Francisco, California.

Deletions

On December 3, 2004, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice (69 FR 70223) of proposed deletions to the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the products listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action may result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the products to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the products deleted from the Procurement List.

End of Certification

Accordingly, the following products are deleted from the Procurement List:

Products

Product/NSN: Power Duster, 7045–00–NIB–0164, 7045–00–NIB–0165, 7045–00–NIB–0166.
NPA: Lighthouse for the Blind, St. Louis, Missouri.
Contracting Activity: Office Supplies & Paper Products Acquisition Center, New York, New York.

Product/NSN: Tape, Electronic Data Processing, 7045–00–377–9235.
NPA: North Central Sight Services, Inc., Williamsport, Pennsylvania.
Contracting Activity: Defense Supply Center Columbus, Columbus, Ohio.

Initiation of Five-Year (''Sunset'') Reviews; Correction

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

In accordance with section 751(c) of the Tariff Act of 1930, as amended (''the Act''), the Department of Commerce (''the Department'') published its notice of five-year (''sunset'') reviews of certain antidumping and countervailing duty orders on January 3, 2005. *See Initiation of Five-Year (''Sunset'') Reviews*, 70 FR 75 (January 3, 2005). In that notice, the published case number of the antidumping duty order on certain carbon cut-to-length quality steel plate from Japan was incorrect. The correct case number is A–588–847.

FOR FURTHER INFORMATION CONTACT: Martha Douthit, Office of Policy, Import Administration, International Trade Administration, U.S. Department of Commerce at (202) 482–5050.

Dated: January 24, 2005.

Gary Taverman,

Acting Deputy Assistant Secretary for Import Administration.

Certain Frozen Fish Fillets From the Socialist Republic of Vietnam: Rescission, in Part, of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, U.S. Department of Commerce.

SUMMARY: The Department of Commerce (''the Department'') is rescinding its administrative review of four companies under the antidumping duty order on certain frozen fish fillets from the Socialist Republic of Vietnam for the period January 1, 2003, through July 31, 2004. This rescission, in part, is based on the timely withdrawal of the request for review by the respective interested party that requested a review. A complete list of the companies for which the administrative review is being rescinded is provided in the *Rescission, in Part, of Administrative Review* section below. The Department is not rescinding its review of Can Tho Agricultural and Animal Products Import-Export Company (CATACO); Phan Quan Company, Ltd.; Phu Thanh Company, Co.; or Vinh Hoan Company, Ltd.

EFFECTIVE DATE: January 28, 2005.

FOR FURTHER INFORMATION CONTACT: Javier Barrientos or Alex Villanueva at (202) 482–2243 and (202) 482–3208, respectively, AD/CVD Operations, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

The Department published in the **Federal Register** an antidumping duty order on certain frozen fish fillets from the Socialist Republic of Vietnam on August 12, 2003 (68 FR 47909). Pursuant to its *Notice of Opportunity to Request an Administrative Review,* 69 FR 46496 (August 3, 2004), and in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended, and section 351.213(b) of the Department's regulations, the Department received timely requests for review from eight exporters: An Giang Fisheries Import and Export Joint Stock Company; An Giang Agriculture and Foods Import-Export Company (AFIEX); Can Tho Agricultural and Animal Products Import-Export Company (CATACO); Mekong Fisheries Joint Stock Company (MEKONIMEX); Phan Quan Company, Ltd.; Phu Thanh Company, Co.; QVD Food Co., Ltd.; and Vinh Hoan Company, Ltd. No other interested party requested a review.

On September 22, 2004, the Department published its *Notice of Initiation of Antidumping and Countervailing Duty Administrative Reviews, Requests for Revocation in Part and Deferral of Administrative Review,* 69 FR 56745 (September 22, 2004), initiating on all eight companies for which an administrative review was requested. The Department subsequently received timely withdrawal requests from four of the eight exporters that requested a review: An Giang Fisheries Import and Export Joint Stock Company (October 26, 2004); AFIEX (October 19, 2004); MEKONIMEX (November 5, 2004); and QVD Food Co., Ltd. (September 29, 2004).

Rescission, in Part, of Administrative Review

Pursuant to section 351.213(d)(1) of the Department's regulations, the Department may rescind an administrative review, ''if a party that requested the review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review.'' Because four exporters have timely withdrawn their requests for an administrative review within the ninety-day period, and no other party requested a review of these companies, we are rescinding this administrative review, in part, for the period January 1, 2003, through July 31, 2004, for the following companies: An Giang Fisheries Import and Export Joint Stock Company; AFIEX; MEKONIMEX; and QVD Food Co., Ltd. However, we will continue the administrative review with respect to: CATACO; Phan Quan Company, Ltd.; Phu Thanh Company, Co.; and Vinh Hoan Company, Ltd., as these exporters individually submitted a request for review.

The Department will issue appropriate assessment instructions directly to the U.S. Customs and Border Protection (''CBP'') within 15 days of the publication of this notice. The Department will direct CBP to assess antidumping duties for these companies at the cash deposit rate in effect on the date of entry for entries during the period January 1, 2003, through July 31, 2004.

Notification to Parties

This notice serves as a reminder to importers of their responsibility under section 351.402(f) of the Department's regulations to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this period of time. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and subsequent assessment of double antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with section 351.305(a)(3) of the Department's regulations. Timely written notification of the return or destruction of APO materials or

conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

This notice is issued and published in accordance with section 351.213(d)(4) of the Department's regulations and sections 751(a)(2)(C) and 777(i)(1) of the Tariff Act of 1930, as amended.

Dated: January 18, 2005.

Gary Taverman,

Acting Deputy Assistant Secretary for Import Administration.

International Trade Administration

North American Free-Trade Agreement, Article 1904 NAFTA Panel Reviews; Request for Panel Review

AGENCY: NAFTA Secretariat, United States Section, International Trade Administration, Department of Commerce.

ACTION: Notice of first request for panel review.

SUMMARY: On January 18, 2005, the Canadian Lumber Remanufacturer's Alliance (''CLRA'') and its individual members filed a First Request for Panel Review with the United States Section of the NAFTA Secretariat pursuant to Article 1904 of the North American Free Trade Agreement. A second, third, fourth and fifth Request for Panel Review was filed on January 19, 2005 on behalf of the Canfor Corporation and its affiliates Lakeland Mills Ltd. and the Pas Lumber Company Ltd. (collectively ''Canfor''); Terminal Forest Products Ltd. (''Terminal''); and on behalf of the Government of Canada, the Governments of the Provinces of Alberta, British Columbia, Manitoba, Ontario, and Saskatchewan, the Gouvernement du Quebec, the Governments of the Northwest Territories and the Yukon Territory, the British Columbia Lumber Trade Council and its constituent associations (the Coast Forest & Lumber Association and the Council of Forest Industries), the Ontario Forest Industries Association, the Ontario Lumber Manufacturers Association, Quebec Lumber Manufacturers Association; Apex Forest Products Inc., Aspen Planers Ltd., Buchanan Lumber Sales, Inc. and the Buchanan affiliated mills, exporters and importers (including Atikokan Forest Products Ltd., Buchanan Forest Products Ltd., Buchanan Northern Hardwoods Inc., Dubreuil Forest Products Limited, Great West Timber Limited, Long Lake Forest Products Inc., McKenzie Forest Products Inc., Nakina Forest Products Limited, Northern Sawmills Inc., Northern Wood, and Solid Wood Products Inc.), Devlin Timber (1992) Ltd., Downie Timber Ltd., Federated Co-operative Limited, Gorman Bros. Lumber Ltd., Haida Forest Products Ltd., Kenora Forest Products Ltd., Lecours Lumber Co. Limited, Liskeard Lumber Limited, Manitou Forest Products Ltd., Manning Diversified Forest Products Ltd., Midway Lumber Mills Ltd., Mill & Timber Products Ltd., Nickel Lake Lumber, North Enderby Timber Ltd., Olav Haavaldsrud Timber Company Limited, Pastway Planing Limited, R. Fryer Forest Products Limited, Selkirk Specialty Wood Ltd., Tembec Inc., Tyee Timber Products Ltd., and West Hastings Lumber Products (hereafter, ''the Parties''), respectively. Panel review was requested of the final results of countervailing duty administrative review and rescission of certain company-specific reviews made by the United States Department of Commerce, International Trade Administration, respecting Certain Softwood Lumber Products from Canada. This determination was published in the **Federal Register**, (69 FR 75917) on December 20, 2004. The determination was amended by Notice of Correction to Final Results on December 27, 2004 , 69 **Federal Register** 77220. The NAFTA Secretariat has assigned Case Number USA–CDA–2005–1904–01 to this request.

FOR FURTHER INFORMATION CONTACT: Caratina L. Alston, United States Secretary, NAFTA Secretariat, Suite 2061, 14th and Constitution Avenue, Washington, DC 20230, (202) 482–5438.

SUPPLEMENTARY INFORMATION: Chapter 19 of the North American Free-Trade Agreement (''Agreement'') establishes a mechanism to replace domestic judicial review of final determinations in antidumping and countervailing duty cases involving imports from a NAFTA country with review by independent binational panels. When a Request for Panel Review is filed, a panel is established to act in place of national courts to review expeditiously the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1994, the Government of the United States, the Government of Canada and the Government of Mexico established *Rules of Procedure for Article 1904 Binational Panel Reviews* (''Rules''). These Rules were published in the **Federal Register** on February 23, 1994 (59 FR 8686).

A first Request for Panel Review was filed with the United States Section of the NAFTA Secretariat, pursuant to Article 1904 of the Agreement, on January 18, 2005, requesting panel review of the final determination described above.

The Rules provide that:

(a) A Party or interested person may challenge the final determination in whole or in part by filing a Complaint in accordance with Rule 39 within 30 days after the filing of the first Request for Panel Review (the deadline for filing a Complaint is February 17, 2005);

(b) A Party, investigating authority or interested person that does not file a Complaint but that intends to appear in support of any reviewable portion of the final determination may participate in the panel review by filing a Notice of Appearance in accordance with Rule 40 within 45 days after the filing of the first Request for Panel Review (the deadline for filing a Notice of Appearance is March 4, 2005); and

(c) The panel review shall be limited to the allegations of error of fact or law, including the jurisdiction of the investigating authority, that are set out in the Complaints filed in the panel review and the procedural and substantive defenses raised in the panel review.

Dated: January 25, 2005.

Caratina L. Alston,

United States Secretary, NAFTA Secretariat.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Proposed Information Collection; Comment Request

AGENCY: Corporation for National and Community Service.

ACTION: Notice.

SUMMARY: The Corporation for National and Community Service (hereinafter the ''Corporation''), as part of its continuing effort to reduce paperwork and respondent burden, will submit the following public information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Public Law 104–13, (44 U.S.C. Chapter 35)). The Corporation is soliciting from members of the public and affected agencies comments concerning the proposed collection of information.

Currently, the Corporation is soliciting comments concerning a new information collection for the annual *State Profiles and Performance Report.* The Corporation proposes to conduct an annual data collection request from State Service Commissions to gather information on AmeriCorps member service activity not available in current agency data systems.

Copies of the information collection request can be obtained by contacting the office listed below in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the office listed in the **ADDRESSES** section by March 29, 2005.

ADDRESSES: You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) By mail sent to: Corporation for National and Community Service, Attn: Kelly Arey, Department of Research and Policy Development, Rm 8100, 1201 New York Avenue, NW., Washington, DC, 20525.

(2) By hand delivery or by courier to the Corporation's mailroom, Room 6010, at the mail address given in paragraph (1) above, between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

(3) By fax to: 202–565–2785, Attn: Kelly Arey.

(4) Electronically through the Corporation's e-mail address system: *karey@cns.gov.*

(5) Individuals who use a telecommunications device for the deaf (TTY–TDD) may call (202) 565–2799 between 8:30 a.m. and 5 p.m. Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The Corporation is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Corporation, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information to those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submissions of responses.

Background: The Corporation is strongly committed to evaluating the effectiveness of its programs. The *State Profiles and Performance Report* presents performance results achieved by the Corporation for National and Community Service programs. The Corporation presents performance data on its programs annually; however, the *State Profiles and Performance Report* is the Corporation's first comprehensive effort at presenting disaggregated performance data by state and program. This data collection effort will use e-mail and telephone correspondence to solicit information annually from State Service Commissions about the programs in their portfolio, including competitive, formula, and commission Education Award Only Programs.

Type of Review: New collection.

Agency: Corporation for National and Community Service.

Title: State Profiles and Performance Report.

OMB Number: None.

Agency Number: None.
Affected Public: State government and not-for-profit institutions.
Total Respondents: 52.
Frequency: Annually.
Average Time Per Response: 20 hours.
Estimated Total Burden Hours: 1,040 hours.
Total Burden Cost (Capital/Startup): None.
Total Burden Cost (Operating/Maintenance): None.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: January 14, 2005.

Robert Grimm,

Director, Department of Research and Policy Development.

BILLING CODE 6050–$$–P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Submission for OMB Emergency Review

AGENCY: Corporation for National and Community Service.

ACTION: Notice.

SUMMARY: The Corporation for National and Community Service (hereinafter the ''Corporation''), submitted the following information collection request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, (PRA 95) (44 U.S.C. Chapter 35). The Corporation has requested OMB to review and approve its emergency request by February 1, 2005, for a period of six months. A copy of this ICR, with applicable supporting documentation, may be obtained by contacting the Corporation for National and Community Service, Office of Grants Policy and Operations, Marci Hunn, (202) 606–5000, Ext. 432, or by e-mail at *mhunn@cns.gov*. Individuals who use a telecommunications device for the deaf (TTY–TDD) may call (202) 565–2799 between 8:30 a.m. and 5 p.m. eastern time, Monday through Friday.

ADDRESSES: Comments may be submitted, identified by the title of the information collection activity, by any of the following two methods:

(1) By fax to: (202) 395–6974, Attention: Ms. Katherine Astrich, OMB Desk Officer for the Corporation for National and Community Service; and

(2) Electronically by e-mail to: *Katherine_T._Astrich@omb.eop.gov*.

SUPPLEMENTARY INFORMATION: The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Corporation, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Propose ways to enhance the quality, utility, and clarity of the information to be collected; and
- Propose ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submissions of responses.

Description: The purpose of this grant competition is to engage persons with disabilities in national and community service programs. Through Congressional appropriations, this competition was established to fund innovative national or regional (operating in three or more states) partnership models in which persons with disabilities are engaged in service that results in a measurable impact on the community served. The Corporation encourages all eligible public and private non-profit organizations, including faith-based and other community-based organizations, to apply. This information collection contains application instructions to apply for funding under the Engaging Persons with Disabilities in National and Community Service competition.

Type of Review: Emergency request.
Agency: Corporation for National and Community Service.
Title: Engaging Persons with Disabilities in National and Community Service Application Instructions.
OMB Number: None.
Agency Number: None.
Affected Public: Eligible applicants to the Corporation for funding for disability programs.
Total Respondents: 40.
Frequency: On occasion.
Average Time Per Response: Ten (10) hours.
Estimated Total Burden Hours: 400 hours.
Total Burden Cost (capital/startup): None.
Total Burden Cost (operating/maintenance): None.

Dated: January 19, 2005.

Amy Mack,

Chief of Staff, Office of Chief Executive Officer.

DEPARTMENT OF DEFENSE

Department of the Army

Final Environmental Impact Statement for the Proposed Leasing of Lands at Fort Bliss, TX for the Proposed Siting, Construction, and Operation by the City of El Paso of a Brackish Water Desalination Plant and Support Facilities

AGENCY: Department of the Army, DoD.

ACTION: Notice of availability.

SUMMARY: The Department of the Army announces the availability of the Final Environmental Impact Statement (FEIS) evaluating the potential environmental impacts that could result from granting an easement to the City of El Paso, El Paso Water Utilities (EPWU), to use land in the South Training Areas of Fort Bliss for construction and operation of a desalination plant and support facilities, including wells, pipelines, and disposal sites for the residual brine resulting from the desalination process. The purpose of the proposed plant is to treat brackish (salty) water pumped from the Hueco Bolson Aquifer to provide an additional reliable source of potable water for use by the City of El Paso and Fort Bliss. Pumping of fresh water by EPWU, Fort Bliss, Ciudad Juárez, and others has resulted in declining groundwater levels in the aquifer. In addition, brackish water is intruding into the aquifer's freshwater layer and has the potential to affect water wells on Fort Bliss and in other areas of El Paso.

A sizable volume of brackish water exists adjacent to the freshwater zone of the Hueco Bolson Aquifer. Desalination of the brackish water offers a way to extend the life of the freshwater aquifer as a source of potable water that is to the mutual benefit of Fort Bliss and the City of El Paso. The proposed desalination plant would reduce withdrawals of fresh water from the aquifer, extending its useful life and intercepting the flow of brackish water to wells that are operated by Fort Bliss. Both Fort Bliss and the City of El Paso have considered constructing desalination facilities to tap into this potential water source. The Army and EPWU believe that building a single desalination plant to provide potable water for both the installation and the city would be more efficient and

cost effective than constructing separate desalination plants.

ADDRESSES: To obtain copies of the FEIS, contact John F. Barrera (915) 568–3908 or write to: Fort Bliss Directorate of the Environment, ATTN: AZC–DOE–C, Building 624, Pleasanton Road, Fort Bliss, TX 79916–6812.

FOR FURTHER INFORMATION CONTACT: John F. Barrera, (915) 568–3908.

SUPPLEMENTARY INFORMATION: The proposed desalination plant would treat brackish water drawn from the Hueco Bolson Aquifer using a technology called reverse osmosis (RO). RO uses semipermeable membranes to remove dissolved solids (primarily salts) from brackish water, producing fresh water. Water for the desalination process would be drawn from existing EPWU wells on the east side of El Paso International Airport and from proposed new wells to be installed on Fort Bliss land north of Biggs Army Airfield. The plant is being designed to produce approximately 27.5 million gallons per day (MGD) of drinking water and 3.0 MGD of a brine called concentrate. To implement the proposed desalination project, EPWU is applying for an easement for land in the South Training Areas of Fort Bliss for a desalination plant site, 16 new water wells, concentrate disposal sites, and various connecting pipelines.

The FEIS considers seven alternatives, six action alternatives and the No Action Alternative. The six action alternatives include various combinations of three potential sites for the proposed desalination plant and two methods of disposal on the concentrate. The three alternative desalination plant sites are located in Training Area 1B of the South Training Areas of Fort Bliss, adjacent to El Paso International Airport, north of Montana Avenue, and west of Loop 375. The two concentrate disposal methods under consideration include (1) injecting the concentrate underground into a confined zone where it would be isolated from potable water sources, or (2) piping the concentrate to evaporation ponds, where the liquid would evaporate leaving a solid salt residue that would be trucked to a landfill for final disposal.

Under the No Action Alternative, the Army would not provide land on Fort Bliss for construction and operation of the proposed desalination plant. None of the proposed facilities would be constructed on Army land at Fort Bliss. This alternative could, however, include one or more of the following actions without Army action or participation: construction and operation of a desalination plant on non-Army land, increase in water conservation measures, development of other water sources in the El Paso region, and/or importation of water from sources outside El Paso. Without the proposed desalination project, EPWU would continue to pump from the freshwater layer of the Hueco Bolson Aquifer until it no longer met drinking water standards.

The Army has selected Alternative 3—Constructing the facility north of Montana Avenue and using deep well injection for the disposal of concentrate—as the Preferred Alternative.

The FEIS analyzes the environmental consequences each alternative could have on geology and soils; water resources; utilities and services; hazardous materials, hazardous waste, and safety; air quality; biological resources; land use and aesthetics; transportation; cultural resources; and socioeconomics and environmental justice. In addition, it includes comments received on the Draft EIS, published August 6, 2004, during the public review period that ended September 27, 2004, as well as responses to those comments.

Copies of the FEIS are available for review at the following libraries in El Paso, Texas: El Paso Public Library, 501 N. Oregon Street; Richard Burgess Branch, 9600 Dyer; Irving Schwartz Public Library, 1865 Dean Martin Drive; and Westside Branch Library, 125 Belvedere Street.

Hugh M. Exton, Jr.,

Director, SWRO, Installation Management Agency.

BILLING CODE 3710–08–M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000–0035]

Federal Acquisition Regulation; Information Collection; Claims and Appeals

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for public comments regarding an extension to an existing OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat will be submitting to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning claims and appeals. The clearance currently expires on April 30, 2005.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

DATES: Submit comments on or before March 29, 2005.

ADDRESSES: Submit comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to the General Services Administration, FAR Secretariat (VIR), 1800 F Street, NW, Room 4035, Washington, DC 20405. Please cite OMB Control No. 9000–0035, Claims and Appeals, in all correspondence.

FOR FURTHER INFORMATION CONTACT: Rhonda Cundiff, Contract Policy Division, GSA (202) 501–0044.

SUPPLEMENTARY INFORMATION:

A. Purpose

It is the Government's policy to try to resolve all contractual issues by mutual agreement at the contracting officer's level without litigation. Contractor's claims must be submitted in writing to the contracting officer for a decision. Claims exceeding $100,000 must be accompanied by a certification that (1) the claim is made in good faith; (2) supporting data are accurate and complete; and (3) the amount requested accurately reflects the contract adjustment for which the contractor believes the Government is liable. Contractors may appeal the contracting officer's decision by submitting written appeals to the appropriate officials.

B. Annual Reporting Burden

Respondents: 4,500.
Responses Per Respondent: 3.

Annual Responses: 13,500.
Hours Per Response: 1.
Total Burden Hours: 13,500.
Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, FAR Secretariat (VIR), Room 4035, 1800 F Street, NW, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0035, Claims and Appeals, in all correspondence.

Dated: January 19, 2005.

Laura Auletta

Director, Contract Policy Division.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000–0060]

Federal Acquisition Regulation; Information Collection; Accident Prevention Plans and Recordkeeping

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat will be submitting to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning accident prevention plans and recordkeeping. The clearance currently expires May 31, 2005.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

DATES: Submit comments on or before March 29, 2005.

ADDRESSES: Submit comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to the General Services Administration, FAR Secretariat (VIR), 1800 F Street, NW, Room 4035, Washington, DC 20405. Please cite OMB Control No.9000–0060, accident prevention plans and recordkeeping, in all correspondence.

FOR FURTHER INFORMATION CONTACT Cecelia Davis, Contract Policy Division, GSA (202) 219–0202.

SUPPLEMENTARY INFORMATION:

A. Purpose

The FAR clause at 48 CFR 52.236–13 Accident Prevention requires Federal construction contractors to keep records of accidents incident to work performed under the contract that result in death, traumatic injury, occupational disease or damage to property, materials, supplies or equipment. Records of personal inquiries are required by OSHA (OMB Control No. 1220–0029). The FAR requires records of damage to property, materials, supplies or equipment to provide background information when claims are brought against the Government.

If the contract involves work of a long duration, the contractor must submit a written proposal for implementation of the clause. The Accident Prevention Plan, for projects that are hazardous or of long duration, is analyzed by the contracting officer along with the agency safety representatives to determine if the proposed plan will meet the requirement of the safety regulations and applicable statutes. The records maintained by the contractor are used to evaluate compliance and may be used in workmen's compensation cases. The Accident Prevention Plan is placed in the contract file for reference.

B. Annual Reporting Burden

Respondents: 2,106.
Responses Per Respondent: 2.
Annual Responses: 4,212.
Hours Per Response: 2.
Total Burden Hours: 8,424.
Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, FAR Secretariat (VIR), Room 4035, 1800 F Street, NW, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0060, Accident Prevention Plans and Recordkeeping, in all correspondence.

Dated: January 19, 2005.

Julia B. Wise

Acting Director, Contract Policy Division.

BILLING CODE 6820–EP–S

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education; Overview Information; Improving Literacy Through School Libraries Program; Notice Inviting Applications for New Awards for Fiscal Year (FY) 2005

Catalog of Federal Domestic Assistance (CFDA) Number: 84.364A.

Dates:
Applications Available: January 28, 2005.
Deadline for Transmittal of Applications: March 14, 2005.
Deadline for Intergovernmental Review: May 13, 2005.
Eligible Applicants: Local Educational Agencies (LEAs) in which at least 20 percent of the students served by the LEA are from families with incomes below the poverty line based on the most recent satisfactory data available from the U.S. Census Bureau at the time this notice is published. This data is Small Area Income and Poverty Estimates for school districts for income year 2002. A list of LEAs with their family poverty rates (based on this Census Bureau data) is posted on our Web site at: *http://www.ed.gov/programs/lsl/eligibility.html.*
Estimated Available Funds: $19,683,264. Of that amount, $19,092,766 will be awarded competitively. Contingent upon the availability of funds and quality of applications, the Secretary may make additional awards in FY 2006 from the list of unfunded applicants from this competition.
Estimated Range of Awards: $30,000 to $350,000.

Note: Actual award amounts will be based on the number of schools and students served by the project.

Estimated Average Size of Awards: $190,000.
Estimated Number of Awards: 100.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 12 months.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of this program is to improve student reading skills and academic achievement by providing students with

increased access to up-to-date school library materials; well-equipped, technologically advanced school library media centers; and well-trained, professionally certified school library media specialists.

Priority: Under this competition we are particularly interested in applications that address the following priority.

Invitational Priority: For FY 2005 this priority is an invitational priority. Under 34 CFR 75.105(c)(1) we do not give an application that meets this invitational priority a competitive or absolute preference over other applications.

Under this priority the Secretary strongly encourages applicants to focus their efforts on elementary schools to maximize the impact of the project on improving reading achievement.

Program Authority: 20 U.S.C. 6383.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 80, 81, 82, 84, 85, 97, 98 and 99. (b) The notice of final clarification of eligible local activities, published April 5, 2004 in the **Federal Register**, 69 FR 17894.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: $19,683,264. Of that amount, $19,092,766 will be awarded competitively. Contingent upon the availability of funds and quality of applications, the Secretary may make additional awards in FY 2006 from the list of unfunded applicants from this competition.

Note: Actual award amounts will be based on the number of schools and students served by the project.

Estimated Range of Awards: $30,000 to $350,000.

Estimated Average Size of Awards: $190,000.

Estimated Number of Awards: 100.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 12 months.

III. Eligibility Information

1. *Eligible Applicants:* LEAs in which at least 20 percent of the students served by the LEA are from families with incomes below the poverty line based on the most recent satisfactory data available from the U.S. Census Bureau at the time this notice is published. This data is Small Area Income and Poverty Estimates for school districts for income year 2002. A list of LEAs with their family poverty rates (based on this Census Bureau data) is posted on our Web site at: *http://www.ed.gov/programs/lsl/eligibility.html.*

2. *Cost Sharing or Matching:* This program does not involve cost sharing or matching, but does involve supplement-not-supplant funding provisions. Funds made available under this program must be used to supplement, and not supplant, other Federal, State, and local funds expended to carry out activities relating to library, technology, or professional development activities (20 U.S.C. 6383(i)).

IV. Application and Submission Information

1. *Address to Request Application Package:* You may obtain an application package via the Internet or from the Education Publications Center (ED Pubs). To obtain a copy via the Internet use the following address: *www.ed.gov/programs/lsl/applicant.html.* To obtain a copy from ED Pubs, write or call the following: ED Pubs, P.O. Box 1398, Jessup, MD 20794–1398. Telephone (toll free): 1–877–433–7827. Fax: (301) 470–1244. If you use a telecommunications device for the deaf (TDD), you may call (toll free): 1–877–576–7734.

You may also contact ED Pubs at its Web site: *www.ed.gov/pubs/edpubs.html* or you may contact ED Pubs at its e-mail address: *edpubs@inet.ed.gov.*

If you request an application from ED Pubs, be sure to identify this competition as follows: CFDA number 84.364A.

Individuals with disabilities may obtain a copy of the application package in an alternative format (*e.g.*, Braille, large print, audiotape, or computer diskette) by contacting the program contact person listed under Section VII of this notice.

2. *Content and Form of Application Submission:* Requirements concerning the content of an application, together with the forms you must submit, are in the application package for this program. An Eligibility Form is included in the application package. You must fill out the Eligibility Form, following the instructions provided in the application package.

Page Limit: The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. You must limit the narrative to the equivalent of no more than 15 pages, using the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger.

The page limit does not apply to the forms, budget section, budget justification, assurances and certifications, one-page abstract, endnotes, or resumes. However, you must include all of the application narrative in the narrative section. Charter Schools and State Administered Schools must include some form of documentation from their State Educational Agency (SEA) confirming eligibility for this program. This documentation is not counted toward the page limit.

Our reviewers will not read any pages of your application that—

- Exceed the page limit if you apply these standards; or
- Exceed the equivalent of the page limit if you apply other standards.

Appendices to the narrative are not permitted, with the exception of resumes and endnotes. None of the material sent as appendices to the narrative, with the exception of resumes and endnotes, will be sent to the reviewers.

3. *Submission Dates and Times:*

Applications Available: January 28, 2005.

Deadline for Transmittal of Applications: March 14, 2005.

Applications for grants under this program must be submitted electronically using the Electronic Grant Application System (e-Application) available through the Department's e-Grants system. For information (including dates and times) about how to submit your application electronically or by mail or hand delivery if you qualify for an exception to the electronic submission requirement, please refer to section IV.6. *Other Submission Requirements* in this notice.

We do not consider an application that does not comply with the deadline requirements.

Deadline for Intergovernmental Review: May 13, 2005.

4. *Intergovernmental Review:* This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this program.

5. *Funding Restrictions:* We reference regulations outlining funding

restrictions in the *Applicable Regulations* section of this notice.

6. *Other Submission Requirements:* Applications for grants under this competition must be submitted electronically, unless you qualify for an exception to requirement in accordance with the instructions in this section.

We will reject your application if you submit it in paper format unless, as described elsewhere in this section, you qualify for one of the exceptions to the electronic submission requirement and submit, no later than two weeks before the application deadline date, a written statement to the Department that you qualify for one of these exceptions. Further information regarding calculation of the date that is two weeks before the application deadline date is provided later in this section under *Exception to Electronic Submission Requirement.*

a. *Electronic Submission of Applications.*

Applications for grants under the Improving Literacy Through School Libraries program—CFDA Number 364A must be submitted electronically using e-Application available through the Department's e-Grants system, accessible through the e-Grants portal page at: *http://e-grants.ed.gov.*

While completing your electronic application, you will be entering data online that will be saved into a database. You may not e-mail an electronic copy of a grant application to us.

Please note the following:

• You must complete the electronic submission of your grant application by 4:30 p.m., Washington, DC time, on the application deadline date. The e-Application system will not accept an application for this competition after 4:30 p.m., Washington, DC time, on the application deadline date. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the application process.

• The regular hours of operation of the e-Grants Web site are 6 a.m. Monday until 7 p.m. Wednesday; and 6 a.m. Thursday until midnight Saturday, Washington, DC time. Please note that the system is unavailable on Sundays, and between 7 p.m. on Wednesdays and 6 a.m. on Thursdays, Washington, DC time, for maintenance. Any modifications to these hours are posted on the e-Grants Web site.

• You will not receive additional point value because you submit your application in electronic format, nor will we penalize you if you qualify for an exception to the electronic submission requirement, as described elsewhere in this section, and submit your application in paper format.

• You must submit all documents electronically, including the Application for Federal Education Assistance (ED 424), Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications.

• Any narrative sections of your application should be attached as files in a .DOC (document), .RTF (rich text), or .PDF (Portable Document) format.

• Your electronic application must comply with any page limit requirements described in this notice.

• Prior to submitting your electronic application, you may wish to print a copy of it for your records.

• After you electronically submit your application, you will receive an automatic acknowledgement that will include a PR/Award number (an identifying number unique to your application).

• Within three working days after submitting your electronic application, fax a signed copy of the ED 424 after following these steps:

(1) Print ED 424 from e-Application.

(2) The applicant's Authorizing Representative must sign this form.

(3) Place the PR/Award number in the upper right hand corner of the hard-copy signature page of the ED 424.

(4) Fax the signed ED 424 to (202) 742–5418.

• We may request that you provide us original signatures on other forms at a later date.

Application Deadline Date Extension in Case of e-Application System Unavailability: If you are prevented from electronically submitting your application on the application deadline date because the e-Application system is unavailable, we will grant you an extension of one business day in order to transmit your application electronically, by mail, or by hand delivery. We will grant this extension if—

(1) You are a registered user of e-Application and you have initiated an electronic application for this competition; and

(2) (a) The e-Application system is unavailable for 60 minutes or more between the hours of 8:30 a.m. and 3:30 p.m., Washington, DC time, on the application deadline date; or

(b) The e-Application system is unavailable for any period of time between 3:30 p.m. and 4:30 p.m., Washington, DC time, on the application deadline date.

We must acknowledge and confirm these periods of unavailability before granting you an extension. To request this extension or to confirm our acknowledgement of any system unavailability, you may contact either (1) the person listed elsewhere in this notice under **FOR FURTHER INFORMATION CONTACT** (*see* VII. Agency Contact) or (2) the e-Grants help desk at 1–888–336–8930. If the system is down and therefore the application deadline is extended, an e-mail will be sent to all registered users who have initiated an e-Application. Extensions referred to in this section apply only to the unavailability of the Department's e-Application system.

Exception to Electronic Submission Requirement: You qualify for an exception to the electronic submission requirement, and may submit your application in paper format, if you are unable to submit an application through the e-Application system because—

• You do not have access to the Internet; or

• You do not have the capacity to upload large documents to the Department's e-Application system; and

• No later than two weeks before the application deadline date (14 calendar days or, if the fourteenth calendar day before the application deadline date falls on a Federal holiday, the next business day following the Federal holiday), you mail or fax a written statement to the Department, explaining which of the two grounds for an exception prevent you from using the Internet to submit your application. If you mail your written statement to the Department, it must be postmarked no later than two weeks before the application deadline date. If you fax your written statement to the Department, we must receive the faxed statement no later than two weeks before the application deadline date.

Address and mail or fax your statement to: Irene Harwarth, U.S. Department of Education, Room 3W227, 400 Maryland Avenue, SW., Washington, DC 20202. Fax: (202) 260–8969.

Your paper application must be submitted in accordance with the mail or hand delivery instructions described in this notice.

b. *Submission of Paper Applications by Mail.*

If you qualify for any exception to the electronic submission requirement, you may mail (through the U.S. Postal Service or a commercial carrier) your application to the Department. You must mail the original and two copies of your application, on or before the application deadline date, to the Department at the applicable following address:

By mail through the U.S. Postal Service: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.364A) 400 Maryland Avenue, SW., Washington, DC 20202–4260; or

By mail through a commercial carrier: U.S. Department of Education, Application Control Center—Stop 4260, Attention: (CFDA Number 84.364A) 7100 Old Landover Road, Landover, MD 20785–1506.

Regardless of which address you use, you must show proof of mailing consisting of one of the following:

1. A legibly dated U.S. Postal Service postmark,

2. A legible mail receipt with the date of mailing stamped by the U.S. Postal Service,

3. A dated shipping label, invoice, or receipt from a commercial carrier, or

4. Any other proof of mailing acceptable to the Secretary of the U.S. Secretary of Education.

If you mail your application through the U.S. Postal Service, we do not accept either of the following as proof of mailing:

1. A private metered postmark, or

2. A mail receipt that is not dated by the U.S. Postal Service.

If your application is postmarked after the application deadline date, we will not consider your application.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, you should check with your local post office.

c. *Submission of Paper Applications by Hand Delivery*. If you qualify for an exception to the electronic submission requirement, you (or a courier service) may deliver your paper application to the Department by hand. You must deliver the original and two copies of your application by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention 84.364A, 550 12th Street, SW., Room 7041 Potomac Center Plaza, Washington, DC 20202–4260.

The Application Control Center accepts hand deliveries daily between 8 a.m. and 4:30 p.m., Washington, DC time, except Saturdays, Sundays and Federal holidays.

Note for Mail or Hand Delivery of Paper Applications: If you mail or hand deliver your application to the Department:

1. You must indicate on the envelope and—if not provided by the Department—in Item 4 of the ED424 the CFDA number—and suffix letter, if any—of the competition under which you are submitting your application.

2. The Application Control Center will mail a Grant Application Receipt Acknowledgment to you. If you do not receive the notification of application receipt within 15 business days from the application deadline date, you should call the U.S. Department of Education Application Control Center at (202) 245–6288.

V. Application Review Information

1. *Selection Criteria:* We use the following selection criteria to evaluate applications for new grants under this competition. The maximum score for all of these criteria is 100 points. The maximum score for each criterion is indicated in parentheses.

We evaluate an application by determining how well the proposed project meets the following criteria:

(a) *Meeting the purpose of the statute (10 points)*. How well the proposed project addresses the intended outcome of the statute to improve student reading skills and academic achievement by providing students with increased access to up-to-date school library materials; a well-equipped, technologically advanced school library media center; and well-trained, professionally certified school library media specialists.

(b) *Need for school library resources (10 points)*. How well the applicant demonstrates the need for school library media improvement, based on the age and condition of school library media resources, including: Book collections; access of school library media centers to advanced technology; and the availability of well-trained, professionally certified school library media specialists, in schools served by the applicant.

(c) *Use of funds (50 points)*. How well the applicant will use the funds made available through the grant to carry out one or more of the following activities that meet its demonstrated needs:

(1) Acquiring up-to-date school library media resources, including books.

(2) Acquiring and using advanced technology, incorporated into the curricula of the school, to develop and enhance the information literacy, information retrieval, and critical thinking skills of students.

(3) Facilitating Internet links and other resource-sharing networks among schools and school library media centers, and public and academic libraries, where possible.

(4) Providing professional development for school library media specialists, that improves literacy in grades K–3 as well as professional development for school library media specialists as described in section 1222(d)(2) of the ESEA (as described in the clarification of eligible local activities as published in the notice of final clarification of eligible local activities published April 5, 2004, in the **Federal Register**, 69 FR 17894) and providing activities that foster increased collaboration between school library media specialists, teachers, and administrators.

(5) Providing students with access to school libraries during non-school hours, including the hours before and after school, during weekends, and during summer vacation periods.

(d) *Use of scientifically based research (10 points)*. How well the applicant will use programs and materials that are grounded in scientifically based research, as defined in section 9101(37) of the ESEA, in carrying out one or more of the activities described under criterion (c).

(e) *Broad-based involvement and coordination (10 points)*. How well the applicant will extensively involve school library media specialists, teachers, administrators, and parents in the proposed project activities and effectively coordinate the funds and activities provided under this program with other literacy, library, technology, and professional development funds and activities.

(f) *Evaluation of quality and impact (10 points)*. How well the applicant will collect and analyze data on the quality and impact of the proposed project activities, including the extent to which the availability of, the access to, and the use of up-to-date school library media resources in the elementary schools and secondary schools served by the applicant were increased; and the impact on improving the reading skills of students.

2. *Review and Selection Process:* An additional factor we consider in selecting an application for an award is the equitable distribution of grants across geographic regions and among LEAs serving urban and rural areas.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN). We may also notify you informally.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other

requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Reporting:* At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary.

4. *Performance Measures:* In response to the Government Performance and Results Act (GPRA), the Department developed two measures for evaluating the overall effectiveness of the Improving Literacy Through School Libraries program. These measures gauge improvement in student achievement and resources in the schools and districts served by the Improving Literacy Through School Libraries program by assessing increases in: (1) The percentage of participating schools and districts that exceed State Adequate Yearly Progress targets for reading achievement for all students; and (2) the school library media collections at participating schools, compared to schools not participating in the program.

The Department will collect data for these measures from grantees' annual performance reports and other existing data sources.

VII. Agency Contact

For Further Information Contact: Irene Harwarth, U.S. Department of Education, 400 Maryland Avenue, SW., room 3W227, Washington, DC 20202–6200. Telephone: (202) 401–3751 or by e-mail: *Irene.Harwarth@ed.gov.*

If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

Individuals with disabilities may obtain this document in an alternative format (*e.g.*, Braille, large print, audiotape, or computer diskette) on request to the program contact person listed in this section.

VIII. Other Information

Electronic Access to This Document: You may view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *www.ed.gov/news/fedregister.*

To use PDF you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free, at 1–888–293–6498; or in the Washington, DC, area at (202) 512–1530.

Note: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: *www.gpoaccess.gov/nara/index.html.*

Dated: January 25, 2005.

Raymond Simon,

Assistant Secretary for Elementary and Secondary Education.

BILLING CODE 4000–01–U

DEPARTMENT OF EDUCATION

Office of Innovation and Improvement Overview Information, Charter Schools Program (CSP); Notice Inviting Applications For New Awards For Fiscal Year (FY) 2005

Catalog of Federal Domestic Assistance (CFDA) Number: 84.282A, 84.282B, and 84.282C.

DATES: *Applications Available:* January 28, 2005.

Deadline for Transmittal of Applications: March 14, 2005.

Deadline for Intergovernmental Review: May 13, 2005.

Eligible Applicants:

(a) State educational agencies (SEAs) in States with a State statute specifically authorizing the establishment of charter schools may apply for funding.

(b) Non-SEA eligible applicants may apply for funding directly from the U.S. Department of Education (Department) if the SEA in the State elects not to participate in the CSP or does not have an application approved under the program.

Additional information concerning eligibility requirements is in Section III, 1. in this notice.

Estimated Available Funds: $91,000,000.

Estimated Range of Awards: SEAs: $500,000–$20,000,000 per year. Other eligible applicants: $10,000–$150,000 per year.

Estimated Average Size of Awards: SEAs: $4,000,000 per year. Other eligible applicants: $130,000 per year.

Estimated Number of Awards: SEAs: 18–23. Other eligible applicants: 25–50.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Note: Planning and implementation grants or subgrants awarded by the Secretary or an SEA to non-SEA eligible applicants will be awarded for a period of up to 36 months, no more than 18 months of which may be used for planning and program design and no more than two years of which may be used for the initial implementation of a charter school. Dissemination grants and subgrants are awarded for a period of up to two years.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of the CSP is to increase national understanding of the charter school model and to expand the number of high-quality charter schools available to students across the Nation by providing financial assistance for the planning, program design, and initial implementation of charter schools, and evaluating the effects of charter schools, including the effects on students, student academic achievement, staff, and parents.

The Department will hold three (3) separate competitions under this program. All SEA applicants must apply for grant funds under CFDA No. 84.282A. Non-SEA eligible applicants that propose to use grant funds for planning, program design, and implementation must apply under CFDA No. 84.282B. Non-SEA eligible applicants that are requesting funds for dissemination activities must submit their applications under CFDA No. 84.282C.

Priorities: In accordance with 34 CFR 75.105(b)(2)(iv), these priorities are from section 5202(e) of the Elementary and Secondary Education Act of 1965, as amended (ESEA), 20 U.S.C. 7221a(e).

Competitive Preference Priorities: For FY 2005 these priorities are competitive preference priorities. Under 34 CFR 75.105(c)(2)(i) we award up to an additional 40 points to an applicant, depending on how well the application meets these priorities.

In awarding grants to SEAs under CFDA No. 84.282A, the Secretary gives priority to States to the extent that the State meets the statutory criterion described in paragraph (a) of this section, and one or more of the statutory criteria described in paragraphs (b) through (d) of this section.

An SEA that meets priority (a) but does not meet one or more of the other priorities will not receive any priority points.

An SEA that does not meet priority (a) but meets one or more of the other priorities will not receive any priority points.

In order to receive preference, an applicant must identify the priorities that it believes it meets and provide documentation supporting its claims.

These priorities are:

(a) *Periodic Review and Evaluation* (10 points). The State provides for periodic review and evaluation by the authorized public chartering agency of each charter school at least once every 5 years, unless required more frequently by State law, to determine whether the charter school is meeting the terms of the school's charter, and is meeting or exceeding the academic achievement requirements and goals for charter schools as provided under State law or the school's charter.

(b) *Number of High-Quality Charter Schools* (10 points). The State has demonstrated progress in increasing the number of high-quality charter schools that are held accountable in the terms of the schools' charters for meeting clear and measurable objectives for the educational progress of the students attending the schools, in the period prior to the period for which an SEA applies for a grant under this competition.

(c) *One Authorized Public Chartering Agency Other than a Local Educational Agency (LEA), or an Appeals Process* (10 points). The State—

(1) Provides for one authorized public chartering agency that is not an LEA, such as a State chartering board, for each individual or entity seeking to operate a charter school pursuant to State law; or

(2) In the case of a State in which LEAs are the only authorized public chartering agencies, allows for an appeals process for the denial of an application for a charter school.

(d) *High Degree of Autonomy* (10 points). The State ensures that each charter school has a high degree of autonomy over the charter school's budgets and expenditures.

Note: The Secretary encourages applicants to provide citations and examples from their State charter law in responding to each of the competitive preference priorities.

Invitational Priority: Under these competitions we are particularly interested in applications that address the following priority. For FY 2005 this priority is an invitational priority. Under 34 CFR 75.105(c)(1), we do not give an applicant that meets this invitational priority a competitive or absolute preference over other applications.

The priority is:

The applicant proposes to plan, design, and implement one or more high-quality charter schools in geographic areas, including urban and rural areas, in which a large proportion or number of public schools has been identified for improvement, corrective action, or restructuring under Title I, part A of the ESEA.

Program Authority: 20 U.S.C. 7221–7221j.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 76, 77, 79, 80, 81, 82, 84, 85, 86, 97, 98, and 99.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: $91,000,000.

Estimated Range of Awards: SEAs: $500,000–$20,000,000 per year. Other eligible applicants: $10,000–$150,000 per year.

Estimated Average Size of Awards: SEAs: $4,000,000 per year. Other eligible applicants: $130,000 per year.

Estimated Number of Awards: SEAs: 18–23. Other eligible applicants: 25–50.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Note: Planning and implementation grants or subgrants awarded by the Secretary or an SEA to non-SEA eligible applicants will be awarded for a period of up to 36 months, no more than 18 months of which may be used for planning and program design and no more than two years of which may be used for the initial implementation of a charter school. Dissemination grants and subgrants are awarded for a period of up to two years.

III. Eligibility Information

1. *Eligible Applicants:* (a) SEAs in States with a State statute specifically authorizing the establishment of charter schools may apply for funding.

Note: The Secretary awards grants to SEAs to enable them to conduct charter school programs in their States. SEAs use their CSP funds to award subgrants to non-SEA eligible applicants for planning, program design, and initial implementation of a charter school and to support the dissemination of information about, including successful practices in, charter schools.

(b) Non-SEA eligible applicants may apply for funding directly from the Department if the SEA in the State elects not to participate in the CSP or does not have an application approved under the program.

Note: A non-SEA *eligible applicant* is defined in the authorizing statute as a developer that has applied to an authorized public chartering authority to operate a charter school and has provided to that authority adequate and timely notice, and a copy, of its CSP application, except that the Secretary or the SEA may waive these requirements in the case of a pre-charter planning grant. Non-SEA eligible applicants, like SEAs, must be in States that have statutes specifically authorizing charter schools. If an SEA's application is approved in this competition, the Department will return applications from non-SEA eligible applicants in that State to the applicants. In such a case, the non-SEA eligible applicant should contact the SEA for information related to the State's subgrant competition.

The following States currently have approved applications under this program: Alaska, California, Colorado, Georgia, Indiana, Iowa, Kansas, Maryland, Massachusetts, Michigan, Missouri, New Hampshire, New Mexico, Ohio, Pennsylvania, South Carolina, and Texas. In these States, only the SEA is eligible to receive an award under this competition. Non-SEA eligible applicants in States that are not listed must apply directly to the Department on or before the deadline for transmittal of applications in order to be considered for funding in this competition.

(c) *Dissemination Grants.* A charter school may apply to an SEA for funds to carry out dissemination activities, whether or not the charter school has applied for or received funds under the CSP for planning or implementation, if the charter school has been in operation for at least three consecutive years and has demonstrated overall success, including—

(1) Substantial progress in improving student academic achievement;

(2) High levels of parent satisfaction; and

(3) The management and leadership necessary to overcome initial start-up problems and establish a thriving, financially viable charter school.

2. *Cost Sharing or Matching:* These competitions do not involve cost sharing or matching.

3. *Other:* All applications must meet the definitions of *charter school, developer, eligible applicant,* and *authorized public chartering agency,* as defined in the authorizing statute. These definitions are in the application package.

IV. Application and Submission Information

1. *Address to Request Application Package:* Dean Kern, U.S. Department of Education, 400 Maryland Avenue, SW., room 4W227, FB6, Washington, DC 20202–5961. Telephone: (202) 260–1882 or by e-mail: *dean.kern@ed.gov.*

If you use a telecommunications device for the deaf (TDD), you may call the Federal Relay Service (FRS) at 1–800–877–8339.

Individuals with disabilities may obtain a copy of the application package in an alternative format (*e.g.*, Braille, large print, audiotape, or computer diskette) by contacting the program contact person listed in this section.

2. *Content and Form of Application Submission:* Requirements concerning

the content of an application, together with the forms you must submit, are in the application package for this competition.

Page Limit: The application narrative (Part III of the application) is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. The Secretary strongly encourages applicants to limit Part III to the equivalent of no more than 50 pages, using the following standards:

• A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.

• Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.

• Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).

The suggested page limit does not apply to Part I, the cover sheet; Part II, the budget section, including the narrative budget justification; Part IV, the assurances and certifications; or the one-page abstract, the resumes, the bibliography, or the letters of support. However, you must include all of the application narrative in Part III.

3. *Submission Dates and Times:*

Applications Available: January 28, 2005.

Deadline for Transmittal of Applications: March 14, 2005.

Applications for grants under this competition must be submitted electronically using the Electronic Grant Application System (e-Application) available through the Department's e-Grants system. For information (including dates and times) about how to submit your application electronically or by mail or hand delivery if you qualify for an exception to the electronic submission requirement, please refer to section IV.6. *Other Submission Requirements* in this notice.

We do not consider an application that does not comply with the deadline requirements.

Deadline for Intergovernmental Review: May 13, 2005.

4. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

5. *Funding Restrictions: Use of Funds for Dissemination Activities.* An SEA may reserve not more than 10 percent of the grant funds to support dissemination activities. A charter school may use those funds to assist other schools in adapting the charter school's program (or certain aspects of the charter school's program), or to disseminate information about the charter school through such activities as—

(a) Assisting other individuals with the planning and start-up of one or more new public schools, including charter schools, that are independent of the assisting charter school and the assisting charter school's developers and that agree to be held to at least as high a level of accountability as the assisting charter school;

(b) Developing partnerships with other public schools, including charter schools, designed to improve student performance in each of the schools participating in the partnership;

(c) Developing curriculum materials, assessments, and other materials that promote increased student achievement and are based on successful practices within the assisting charter school; and

(d) Conducting evaluations and developing materials that document the successful practices of the assisting charter school and that are designed to improve student achievement.

We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

6. *Other Submission Requirements:* Applications for grants under this competition must be submitted electronically, unless you qualify for an exception to this requirement in accordance with the instructions in this section.

We will reject your application if you submit it in paper format unless, as described elsewhere in this section, you qualify for one of the exceptions to the electronic submission requirement *and* submit, no later than two weeks before the application deadline date, a written statement to the Department that you qualify for one of these exceptions. Further information regarding calculation of the date that is two weeks before the application deadline date is provided later in this section under *Exception to Electronic Submission Requirement.*

a. *Electronic Submission of Applications.*

Applications for grants under the Charter Schools Program—CFDA Number 84.282A, 84.282B, and 84.282C—must be submitted electronically using e-Application available through the Department's e-Grants system, accessible through the e-Grants portal page at: *http://e-grants.ed.gov.*

While completing your electronic application, you will be entering data online that will be saved into a database. You may not e-mail an electronic copy of a grant application to us.

Please note the following:

• You must complete the electronic submission of your grant application by 4:30 p.m., Washington, DC time, on the application deadline date. The e-Application system will not accept an application for this program [competition] after 4:30 p.m., Washington, DC time, on the application deadline date. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the application process.

• The regular hours of operation of the e-Grants Web site are 6 a.m. Monday until 7 p.m. Wednesday; and 6 a.m. Thursday until midnight Saturday, Washington, DC time. Please note that the system is unavailable on Sundays, and between 7 p.m. on Wednesdays and 6 a.m. on Thursdays, Washington, DC time, for maintenance. Any modifications to these hours are posted on the e-Grants Web site.

• You will not receive additional point value because you submit your application in electronic format, nor will we penalize you if you qualify for an exception to the electronic submission requirement, as described elsewhere in this section, and submit your application in paper format.

• You must submit all documents electronically, including the Application for Federal Education Assistance (ED 424), Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications.

• Any narrative sections of your application should be attached as files in a .DOC (document), .RTF (rich text), or .PDF (Portable Document) format.

• Your electronic application must comply with any page limit requirements described in this notice.

• Prior to submitting your electronic application, you may wish to print a copy of it for your records.

• After you electronically submit your application, you will receive an automatic acknowledgement that will include a PR/Award number (an identifying number unique to your application).

• Within three working days after submitting your electronic application, fax a signed copy of the ED 424 to the Application Control Center after following these steps:

(1) Print ED 424 from e-Application.

(2) The applicant's Authorizing Representative must sign this form.

(3) Place the PR/Award number in the upper right hand corner of the hard-copy signature page of the ED 424.

(4) Fax the signed ED 424 to the Application Control Center at (202) 245–6272.

• We may request that you provide us original signatures on other forms at a later date.

Application Deadline Date Extension in Case of e-Application System Unavailability: If you are prevented from electronically submitting your application on the application deadline date because the e-Application system is unavailable, we will grant you an extension of one business day in order to transmit your application electronically, by mail, or by hand delivery. We will grant this extension if—

(1) You are a registered user of e-Application and you have initiated an electronic application for this competition; and

(2) (a) The e-Application system is unavailable for 60 minutes or more between the hours of 8:30 a.m. and 3:30 p.m., Washington, DC time, on the application deadline date; or

(b) The e-Application system is unavailable for any period of time between 3:30 p.m. and 4:30 p.m., Washington, DC time, on the application deadline date.

We must acknowledge and confirm these periods of unavailability before granting you an extension. To request this extension or to confirm our acknowledgement of any system unavailability, you may contact either (1) the person listed elsewhere in this notice under **FOR FURTHER INFORMATION CONTACT** (*see* VII. Agency Contact) or (2) the e-Grants help desk at 1–888–336–8930. If the system is down and therefore the application deadline is extended, an e-mail will be sent to all registered users who have initiated an e-Application. Extensions referred to in this section apply only to the unavailability of the Department's e-Application system.

Exception to Electronic Submission Requirement: You qualify for an exception to the electronic submission requirement, and may submit your application in paper format, if you are unable to submit an application through the e-Application system because—

• You do not have access to the Internet; or

• You do not have the capacity to upload large documents to the Department's e-Application system; and

• No later than two weeks before the application deadline date (14 calendar days or, if the fourteenth calendar day before the application deadline date falls on a Federal holiday, the next business day following the Federal holiday), you mail or fax a written statement to the Department, explaining which of the two grounds for an exception prevent you from using the Internet to submit your application. If you mail your written statement to the Department, it must be postmarked no later than two weeks before the application deadline date. If you fax your written statement to the Department, we must receive the faxed statement no later than two weeks before the application deadline date.

Address and mail or fax your statement to: Dean Kern, U.S. Department of Education, 400 Maryland Avenue, SW., room 4W227, Washington, DC 20202–5961. Fax: (202) 205–5630.

Your paper application must be submitted in accordance with the mail or hand delivery instructions described in this notice.

b. *Submission of Paper Applications by Mail.*

If you qualify for any exception to the electronic submission requirement, you may mail (through the U.S. Postal Service or a commercial carrier) your application to the Department. You must mail the original and two copies of your application, on or before the application deadline date, to the Department at the applicable following address:

By mail through the U.S. Postal Service: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.282A, 84.282B, or 84.282C), 400 Maryland Avenue, SW., Washington, DC 20202–4260; or

By mail through a commercial carrier: U.S. Department of Education, Application Control Center—Stop 4260, Attention: (CFDA Number 84.282A, 84.282B, or 84.282C), 7100 Old Landover Road, Landover, MD 20785–1506.

Regardless of which address you use, you must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark,

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service,

(3) A dated shipping label, invoice, or receipt from a commercial carrier, or

(4) Any other proof of mailing acceptable to the Secretary of the U.S. Department of Education.

If you mail your application through the U.S. Postal Service, we do not accept either of the following as proof of mailing:

(1) A private metered postmark, or

(2) A mail receipt that is not dated by the U.S. Postal Service.

If your application is postmarked after the application deadline date, we will not consider your application.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, you should check with your local post office.

c. *Submission of Paper Applications by Hand Delivery.*

If you qualify for an exception to electronic submission requirement, you (or a courier service) may deliver your paper application to the Department by hand. You must deliver the original and two copies of your application, by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.282A, 84.282B, or 84.282C), 550 12th Street, SW., Room 7041, Potomac Center Plaza, Washington, DC 20202–4260.

The Application Control Center accepts hand deliveries daily between 8 a.m. and 4:30 p.m., Washington, DC time, except Saturdays, Sundays, and Federal holidays.

Note for Mail or Hand Delivery of Paper Applications: If you mail or hand deliver your application to the Department:

(1) You must indicate on the envelope and—if not provided by the Department—in Item 4 of the ED 424 the CFDA number—and suffix letter, if any—of the competition under which you are submitting your application.

(2) The Application Control Center will mail a grant application receipt acknowledgment to you. If you do not receive the grant application receipt acknowledgment within 15 business days from the application deadline date, you should call the U.S. Department of Education Application Control Center at (202) 245–6288.

V. Application Review Information

1. *Selection Criteria:* All SEA and non-SEA applicants applying for CSP grant funds must address both the application requirements and the selection criteria. Each SEA and non-SEA applicant applying for CSP grant funds may choose to respond to the application requirements in the context of the applicant's responses to the selection criteria.

(a) *SEAs (CFDA No. 84.282A).*

(i) *Application Requirements (CFDA No. 84.282A).*

(A) Describe the objectives of the SEA's charter school grant program and describe how these objectives will be fulfilled, including steps taken by the

SEA to inform teachers, parents, and communities of the SEA's charter school grant program;

(B) Describe how the SEA will inform each charter school in the State about Federal funds that the charter school is eligible to receive and Federal programs in which the charter school may participate;

(C) Describe how the SEA will ensure that each charter school in the State receives the school's commensurate share of Federal education funds that are allocated by formula each year, including during the first year of operation of the school;

(D) Describe how the SEA will disseminate best or promising practices of charter schools to each LEA in the State;

(E) If an SEA elects to reserve part of its grant funds (no more than 10 percent) for the establishment of a revolving loan fund, describe how the revolving loan fund would operate;

(F) If an SEA desires the Secretary to consider waivers under the authority of the CSP, include a request and justification for any waiver of statutory or regulatory provisions that the SEA believes is necessary for the successful operation of charter schools in the State; and

(G) Describe how charter schools that are considered to be LEAs under State law, and LEAs in which charter schools are located, will comply with sections 613(a)(5) and 613(e)(1)(B) of the Individuals with Disabilities Education Act.

(ii) *Selection Criteria (CFDA No. 84.282A).* SEAs that propose to use a portion of their grant funds for dissemination activities must address each selection criterion (A) through (E) individually and title each accordingly. SEAs that do not propose to use a portion of their grant funds for dissemination activities must address selection criteria (A) through (D) only, and need not address selection criterion (E).

The maximum possible score is 120 points for SEAs that do not propose to use grant funds to support dissemination activities and 150 points for SEAs that propose to use grant funds to support dissemination activities.

The maximum possible score for each criterion is indicated in parentheses following the criterion.

To ensure fairness, if an SEA is not proposing to use grant funds to support dissemination activities, the Secretary will not consider points awarded under criterion (E) in determining whether to approve an application for funding.

In evaluating an application from an SEA, the Secretary considers the following criteria:

(A) The contribution the charter schools grant program will make in assisting educationally disadvantaged and other students to achieve State academic content standards and State student academic achievement standards (30 points).

Note: The Secretary encourages applicants to provide a description of the objectives for the SEA's charter school grant program and how these objectives will be fulfilled, including steps taken by the SEA to inform teachers, parents, and communities of the SEA's charter school grant program and how the SEA will disseminate best or promising practices of charter schools to each LEA in the State.

(B) The degree of flexibility afforded by the SEA to charter schools under the State's charter school law (30 points).

Note: The Secretary encourages the applicant to include a description of how the State's law establishes an administrative relationship between the charter school and the authorized public chartering agency, and exempts charter schools from significant State or local rules that inhibit the flexible operation and management of public schools.

The Secretary also encourages the applicant to include a description of the degree of autonomy charter schools have achieved over such matters as the charter school's budget, expenditures, daily operation, and personnel in accordance with their State's law.

(C) The number of high-quality charter schools to be created in the State (30 points).

Note: The Secretary considers the SEA's estimate of the number of new charter schools to be authorized and opened in the State during the 36-month period of this grant.

Because research has identified the lack of adequate resources as a major impediment to the creation of high-quality charter schools, the Secretary encourages the applicant to describe how the SEA will inform each charter school in the State about Federal funds that the charter school is eligible to receive and about the Federal programs in which the charter school may participate.

The Secretary also considers how the SEA will ensure that each charter school in the State receives the school's commensurate share of Federal education funds that are allocated by formula each year, including during the first year of operation of the school and during a year in which the school's enrollment expands significantly.

(D) The quality of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks (30 points).

Note: In addition to describing the proposed objectives of the SEA charter school grant program and how these objectives will be fulfilled, the Secretary encourages applicants to provide descriptions of the steps that the SEA will take to award subgrant funds to eligible applicants desiring to receive these funds, including descriptions of the peer review process to review applications for assistance, the timelines for awarding such funds, and how the SEA will assess the quality of the applications.

(E) In the case of SEAs that propose to use grant funds to support dissemination activities under section 5204(f)(6) of the ESEA, the quality of the dissemination activities (15 points) and the likelihood that those activities will improve student achievement (15 points).

Note: The Secretary encourages applicants to provide a description of the steps that the SEA will take to award these funds to eligible applicants, including descriptions of the peer review process to review applications for dissemination, the timelines for awarding such funds, and how the SEA will assess the quality of the applications.

(b) *Non-SEA Applicants (CFDA No. 84.282B and 84.282C).* The application requirements for all non-SEA applicants are listed in paragraph (i) in this section.

The selection criteria for non-SEA applicants for *Planning, Program Design, and Implementation Grants (CFDA No. 82.282B)* are listed in paragraph (ii) in this section.

The selection criteria for non-SEA applicants for *Dissemination Grants (CFDA No. 84.282C)* are listed in paragraph (iii) in this section.

(i) *Application Requirements (CFDA Nos. 84.282B and 84.282C).* (A) Describe the educational program to be implemented by the proposed charter school, including how the program will enable all students to meet challenging State student academic achievement standards, the grade levels or ages of students to be served, and the curriculum and instructional practices to be used;

(B) Describe how the charter school will be managed;

(C) Describe the objectives of the charter school and the methods by which the charter school will determine its progress toward achieving those objectives;

(D) Describe the administrative relationship between the charter school and the authorized public chartering agency;

(E) Describe how parents and other members of the community will be

involved in the planning, program design, and implementation of the charter school;

(F) Describe how the authorized public chartering agency will provide for continued operation of the charter school once the Federal grant has expired, if that agency determines that the charter school has met its objectives;

(G) If the charter school desires the Secretary to consider waivers under the authority of the CSP, include a request and justification for waivers of any Federal statutory or regulatory provisions that the applicant believes are necessary for the successful operation of the charter school and a description of any State or local rules, generally applicable to public schools, that will be waived for, or otherwise not apply to, the school;

(H) Describe how the grant funds will be used, including how these funds will be used in conjunction with other Federal programs administered by the Secretary;

(I) Describe how students in the community will be informed about the charter school and be given an equal opportunity to attend the charter school;

(J) Describe how a charter school that is considered an LEA under State law, or an LEA in which a charter school is located, will comply with sections 613(a)(5) and 613(e)(1)(B) of the Individuals with Disabilities Education Act; and

(K) If the eligible applicant desires to use grant funds for dissemination activities under section 5202(c)(2)(C), describe those activities and how those activities will involve charter schools and other public schools, LEAs, developers, and potential developers.

(ii) *Selection Criteria (CFDA No. 84.282B).* Non-SEA Planning, Program Design, and Initial Implementation Grant applicants must address each selection criterion (A) through (I) individually and title each accordingly.

The maximum possible score for all of the criteria in this section is 145 points.

The maximum possible score for each criterion is indicated in parentheses following the criterion.

In evaluating an application from a non-SEA eligible applicant for Planning, Program Design, and Implementation, the Secretary considers the following criteria:

(A) The quality of the proposed curriculum and instructional practices (25 points).

(B) The degree of flexibility afforded by the SEA and, if applicable, the LEA to the charter school (10 points).

(C) The extent of community support for the application (10 points).

(D) The ambitiousness of the objectives for the charter school (15 points).

(E) The quality of the strategy for assessing achievement of those objectives (10 points).

(F) The likelihood that the charter school will meet those objectives and improve educational results for students during and after the period of Federal financial assistance (20 points).

(G) The extent to which the proposed project encourages parental involvement (20 points).

(H) The qualifications, including relevant training and experience, of the project director; and the extent to which the applicant encourages applications for employment from persons who are members of groups that traditionally have been underrepresented based on race, color, national origin, gender, age, or disability (10 points).

(I) The contribution the charter school will make in assisting educationally disadvantaged and other students to achieve to State academic content standards and State student academic achievement standards (25 points).

(iii) *Selection Criteria (CFDA No. 84.282C).* Non-SEA applicants for Dissemination Grants must address each selection criterion (A) through (E) individually and title each accordingly.

The maximum possible score for all of the criteria in this section is 125 points.

The maximum possible score for each criterion is indicated in parentheses following the criterion.

In evaluating an application from a non-SEA eligible applicant for a dissemination grant, the Secretary considers the following criteria:

(A) The quality of the proposed dissemination activities and the likelihood that those activities will improve student achievement (30 points).

(B) The extent to which the school has demonstrated overall success, including—

(1) Substantial progress in improving student achievement (15 points);

(2) High levels of parent satisfaction (15 points); and

(3) The management and leadership necessary to overcome initial start-up problems and establish a thriving, financially viable charter school (15 points).

(C) The extent to which the results of the proposed project will be disseminated in a manner that will enable others to use the information or strategies (20 points).

(D) The qualifications, including relevant training and experience, of the project director and the extent to which the applicant encourages applications for employment from persons who are members of groups that traditionally have been underrepresented based on race, color, national origin, gender, age, or disability (10 points).

(E) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks (20 points).

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we will notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN). We may also notify you informally.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Reporting:* At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multi-year award, you must submit an annual performance report that provides the most current performance and financial expenditure information as specified by the Secretary in 34 CFR 75.118.

4. *Performance Measures:* Under the Government Performance and Results Act (GPRA), one measure has been developed for evaluating the overall effectiveness of the CSP: To support the creation of a large number of high-quality charter schools. The objective of this goal is to encourage the development of a large number of high-quality charter schools that are free from State or local rules that inhibit flexible operation, are held accountable for enabling students to reach challenging State performance standards, and are open to all students. The Secretary has set an overall performance target that calls for an increase in both the number of States with charter school legislation and the number of charter schools in operation around the Nation.

All grantees will be expected to submit an annual performance report

documenting their contribution in assisting the Department in meeting this performance measure by creating or supporting the creation of one or more high-quality charter schools that are free from State or local rules that inhibit flexible operation, are held accountable for enabling students to reach challenging state performance standards, and are open to all students.

VII. Agency Contact

For Further Information Contact: Dean Kern, U.S. Department of Education, 400 Maryland Avenue, SW., room 4W227, FB6, Washington, DC 20202–5961. Telephone: (202) 260–1882 or by e-mail: *dean.kern@ed.gov.*

If you use a telecommunications device for the deaf (TDD), you may call the Federal Relay Service (FRS) at 1–800–877–8339.

Individuals with disabilities may obtain this document in an alternative format (*e.g.*, Braille, large print, audiotape, or computer diskette) on request to the program contact person listed in this section.

VIII. Other Information

Electronic Access to This Document: You may view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *http://www.ed.gov/news/fedregister.*

To use PDF you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free, at 1–888–293–6498; or in the Washington, DC, area at (202) 512–1530.

Note: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: *http://www.gpoaccess.gov/nara/index.html.*

Dated: January 25, 2005.

Nina Shokraii Rees,

Assistant Deputy Secretary for Innovation and Improvement.

[FR Doc. 05–1639 Filed 1–27–05; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Office of Innovation and Improvement; Overview Information; Excellence in Economic Education Program; Notice Inviting Applications for New Awards for Fiscal Year (FY) 2005

Catalog of Federal Domestic Assistance (CFDA) Number: 84.215B.

DATES: *Applications Available:* January 31, 2005.

Deadline for Transmittal of Applications: March 23, 2005.

Deadline for Intergovernmental Review: May 24, 2005.

Eligible Applicants: Any national nonprofit educational organization that has as its primary purpose the improvement of the quality of student understanding of personal finance and economics through effective teaching of economics in grades kindergarten through grade 12 in the Nation's classrooms.

Applicants are required to submit evidence of their organization's eligibility.

Estimated Available Funds: $1,478,000 for budget period one, and $1,500,000 for budget periods two through five.

Number of Awards: 1.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 60 months.

Budget Period: 12 months.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: This program promotes economic and financial literacy among all students in kindergarten through grade 12 through the award of one grant to a national nonprofit educational organization that has as its primary purpose the improvement of the quality of student understanding of personal finance and economics.

Priorities: This competition includes two absolute priorities and two invitational priorities that are explained in the following paragraphs.

In accordance with 34 CFR 75.105(b)(2)(iv), these priorities are from sections 5533(b), 5534(b), and 5535(b) of the Elementary and Secondary Education Act of 1965, as amended (ESEA) (20 U.S.C. 7267b–7267e).

Absolute Priorities: For FY 2005 these priorities are absolute priorities. Under 34 CFR 75.105(c)(3) we consider only applications that meet both of these priorities.

These priorities are:

Absolute Priority 1—Direct Activities

A project must indicate how it would use 25 percent of the funds available each year to do all of the following activities:

(a) Strengthen and expand the grantee's relationships with State and local personal finance, entrepreneurial, and economic education organizations.

(b) Support and promote training of teachers who teach a grade from kindergarten through grade 12 regarding economics, including the dissemination of information on effective practices and research findings regarding the teaching of economics.

(c) Support research on effective teaching practices and the development of assessment instruments to document student understanding of personal finance and economics.

(d) Develop and disseminate appropriate materials to foster economic literacy.

Absolute Priority 2—Subgrant Activities

A project must indicate how it would use 75 percent of the funds available each year to award subgrants both to (a) State educational agencies (SEAs) or local educational agencies (LEAs), and (b) State or local economic, personal finance, or entrepreneurial education organizations. (Definitions of SEAs and LEAs are found in section 9101(26) and (41) of the ESEA, as amended by NCLB (20 U.S.C. 7801(26) and (41)).

(a) *Allowable Subgrantee Activities.* Applications must indicate that these subgrants are to be used to pay for the Federal share of the cost of enabling the subgrantees to work in partnership with *one or more* eligible partners as described elsewhere in this notice, for *one or more* of the following purposes:

(1) Collaboratively establishing and conducting teacher training programs that use effective and innovative approaches to the teaching of economics, personal finance, and entrepreneurship. The teacher training programs must—(i) train teachers who teach a grade from kindergarten through grade 12; and (ii) encourage teachers from disciplines other than economics and financial literacy to participate in such teacher training programs, if the training will promote the economic and financial literacy of those teachers' students.

(2) Providing resources to school districts that desire to incorporate economics and personal finance into the curricula of the schools in those districts.

(3) Conducting evaluations of the impact of economic and financial literacy education on students.

(4) Conducting economic and financial literacy education research.

(5) Creating and conducting school-based student activities to promote consumer, economic, and personal finance education (such as saving, investing, and entrepreneurial education) and to encourage awareness and student academic achievement in economics.

(6) Encouraging replication of best practices to promote economic and financial literacy.

(b) *Eligible partners for subgrantees under Absolute Priority 2.* Applications must indicate that subgrants will be made to an eligible subgrantee to work in partnership with one or more of the following entities:

(1) A private-sector entity.

(2) An SEA.

(3) An LEA.

(4) An institution of higher education.

(5) An organization promoting economic development.

(6) An organization promoting educational excellence.

(7) An organization promoting personal finance or entrepreneurial education.

(c) *Subgrant application process under Absolute Priority 2.* (1) Applications must describe the subgrant process the grantee will conduct prior to awarding subgrants.

(2) Applications must provide that the grantee will invite the following types of individuals to review all applications for subgrants and to make recommendations to the grantee on the approval of the applications:

(A) Leaders in the fields of economics and education.

(B) Other individuals as the grantee determines to be necessary, especially members of the State and local business, banking, and finance communities.

In addition to the two absolute priorities, we are particularly interested in applications that address the following invitational priorities.

Invitational Priorities: For FY 2005 these priorities are invitational priorities. Under 34 CFR 75.105(c)(1) we do not give an application that meets one or both of these invitational priorities a competitive or absolute preference over other applications.

These priorities are:

Invitational Priority 1—Involvement of Business Community

The grantee and subgrantees are strongly encouraged to—

(a) Include interactions with the local business community to the fullest extent possible to reinforce the connection between economic and financial literacy and economic development; and

(b) Work with private businesses to obtain matching contributions for Federal funds and assist subgrantees in working toward self-sufficiency.

Invitational Priority 2—Scientifically Based Evaluation

The grantee and subgrantees are strongly encouraged to use scientifically based research as defined by the No Child Left Behind Act (20 U.S.C. 7801(37)) for the research and evaluation activities listed below that are required under the Absolute Priorities in this notice. Using scientifically based research for these activities will allow the grantee to provide the most trustworthy type of information necessary to meet the Performance Measures requirement for this program listed later in this notice. The activities are:

(a) For research on effective teaching practices and the development of assessment instruments to document student understanding of personal finance and economics;

(b) To conduct economic and financial literacy education research; and

(c) To conduct evaluations of the impact of economic and financial literacy education on students.

Program Authority: 20 U.S.C. 7267.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 84, 85, 86, 97, 98, and 99.

II. Award Information

Type of Award: Discretionary grant.

Estimated Available Funds: $1,478,000 for budget period one, and $1,500,000 for budget periods two through five.

Number of Awards: 1.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 60 months.

Budget Period: 12 months.

III. Eligibility Information

1. *Eligible Applicants:* Any national nonprofit educational organization that has as its primary purpose the improvement of the quality of student understanding of personal finance and economics through effective teaching of economics in grades Kindergarten through grade 12 in the Nation's classrooms.

Applicants are required to submit evidence of their organization's eligibility.

2. *Cost Sharing or Matching: Subgrant Activities.* The recipients of each subgrant are required to match the Federal grant funds with an equal amount of non-Federal funding. The Federal share of each subgrant will be fifty (50) percent of the cost of the funded activities. The recipient of the subgrant must pay the other fifty percent in cash or in kind. In kind payment, including plant, equipment, or services, must be fairly evaluated. (20 U.S.C. 7267e(a) and (b)).

Supplement not supplant. Funds provided through this grant must be used to supplement, and not supplant, other Federal, State, and local funds expended to support activities that fulfill the purpose of this program. (20 U.S.C. 7267f).

IV. Application and Submission Information

1. *Address to Request Application Package:* Carolyn J. Warren, U.S. Department of Education, 400 Maryland Avenue, SW., room 4W209, Washington, DC 20202–5900. Telephone: (202) 205–5443 or by e-mail: *carolyn.warren@ed.gov*.

If you use a telecommunications device for the deaf (TDD), you may call the Federal Relay Service (FRS) at 1–800–877–8339.

Individuals with disabilities may obtain a copy of the application package in an alternative format (*e.g.*, Braille, large print, audiotape, or computer diskette) by contacting the program contact person listed in this section.

2. *Content and Form of Application Submission:* Requirements concerning the content of an application, together with the forms you must submit, are in the application package for this competition.

Page Limit: The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. *All of the information addressing the selection criteria and the priorities must be included in the narrative section of the application.* It is strongly suggested that you limit the narrative of your application to the equivalent of no more than 25 pages, using the following standards:

- A ''page'' is 8.5″ × 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).

The suggested page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the one-page abstract, the resumes, the bibliography, the evidence of eligibility, or the letters of support.

3. *Submission Dates and Times: Applications Available:* January 31, 2005.

Deadline for Transmittal of Applications: March 23, 2005.

Applications for grants under this competition must be submitted electronically using the Grants.gov Apply site (Grants.gov). For information (including dates and times) about how to submit your application electronically or by mail or hand delivery if you qualify for an exception to the electronic submission requirement, please refer to section IV.6. *Other Submission Requirements* in this notice.

We do not consider an application that does not comply with the deadline requirements.

Deadline for Intergovernmental Review: May 24, 2005.

4. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

5. *Funding Restrictions:* Twenty-five (25) percent of the grant funds must be used for *Direct Activities* as described in Absolute Priority 1. (20 U.S.C. 7267b(b)(1)).

Seventy-five (75) percent of the grant funds must be used for *Subgrant Activities* as described in Absolute Priority 2. (20 U.S.C. 7267b(b)(2)).

The grantee and each subgrantee may use not more than five (5) percent of their grant funds for administrative costs. (20 U.S.C. 7267d(a)).

We reference regulations outlining other funding restrictions in the *Applicable Regulations* section of this notice.

6. *Other Submission Requirements:* Applications for grants under this competition must be submitted electronically unless you qualify for an exception to this requirement in accordance with the instructions in this section.

a. *Electronic Submission of Applications.* Applications for grants under the Excellence in Economic Education Program—CFDA Number 84.215B must be submitted electronically using the Grants.gov Apply site. Through this site, you will be able to download a copy of the application package, complete it offline, and then upload and submit your application. You may not e-mail an electronic copy of a grant application to us.

We will reject your application if you submit it in paper format unless, as described elsewhere in this section, you qualify for one of the exceptions to the electronic submission requirement *and* submit, no later than two weeks before the application deadline date, a written statement to the Department that you qualify for one of these exceptions. Further information regarding calculation of the date that is two weeks before the application deadline date is provided later in this section under *Exception to Electronic Submission Requirement.*

You may access the electronic grant application for Excellence in Economic Education Program at: *http://www.grants.gov*. You must search for the downloadable application package for this program by the CFDA number. Do not include the CFDA number's alpha suffix in your search.

Please note the following:

- When you enter the Grants.gov site, you will find information about submitting an application electronically through the site, as well as the hours of operation.
- Applications received by Grants.gov are time and date stamped. Your application must be fully uploaded and submitted with a date/time received by the Grants.gov system no later than 4:30 p.m., Washington, DC time, on the application deadline date. We will not consider your application if it was received by the Grants.gov system later than 4:30 p.m. on the application deadline date. When we retrieve your application from Grants.gov, we will notify you if we are rejecting your application because it was submitted after 4:30 p.m. on the application deadline date.
- The amount of time it can take to upload an application will vary depending on a variety of factors including the size of the application and the speed of your Internet connection. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the application process through Grants.gov.
- You should review and follow the Education Submission Procedures for submitting an application through Grants.gov that are included in the application package for this program [competition] to ensure that your application is submitted timely to the Grants.gov system.
- To use Grants.gov, you, as the applicant, must have a D–U–N–S Number and register in the Central Contractor Registry (CCR). You should allow a minimum of five business days to complete the CCR registration.
- You will not receive additional point value because you submit your application in electronic format, nor will we penalize you if you qualify for an exception to the electronic submission requirement, as described elsewhere in this section, and submit your application in paper format.
- You must submit all documents electronically, including all information typically included on the Application for Federal Education Assistance (ED 424), Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications. Any narrative sections of your application should be attached as files in a .DOC (document), .RTF (rich text), or .PDF (Portable Document) format.
- Your electronic application must comply with any page limit requirements described in this notice.
- After you electronically submit your application, you will receive an automatic acknowledgement from Grants.gov that contains a Grants.gov tracking number. The Department will retrieve your application from Grants.gov and send you a second confirmation by e-mail that will include a PR/Award number (an ED-specified identifying number unique to your application).
- We may request that you provide us original signatures on forms at a later date.

Exception to Electronic Submission Requirement: You qualify for an exception to the electronic submission requirement, and may submit your application in paper format, if you are unable to submit an application through the Grants.gov system because—

- You do not have access to the Internet; or
- You do not have the capacity to upload large documents to the Grants.gov system; *and*
- No later than two weeks before the application deadline date (14 calendar days or, if the fourteenth calendar day before the application deadline date falls on a Federal holiday, the next business day following the Federal holiday), you mail or fax a written statement to the Department, explaining which of the two grounds for an exception prevent you from using the Internet to submit your application. If you mail your written statement to the Department, it must be postmarked no later than two weeks before the application deadline date. If you fax

your written statement to the Department, we must receive the faxed statement no later than two weeks before the application deadline date.

Address and mail or fax your statement to: Carolyn J. Warren, U.S. Department of Education, 400 Maryland Avenue, SW., room 4W209, Washington, DC 20202–5900. FAX: (202) 205–5631.

Your paper application must be submitted in accordance with the mail or hand delivery instructions described in this notice.

b. *Submission of Paper Applications by Mail.* If you qualify for an exception to the electronic submission requirement, you may mail (through the U.S. Postal Service or a commercial carrier), your application to the Department. You must mail the original and two copies of your application, on or before the application deadline date, to the Department at the applicable following address:

By mail through the U.S. Postal Service: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.215B), 400 Maryland Avenue, SW., Washington, DC 20202–4260; or

By mail through a commercial carrier: U.S. Department of Education, Application Control Center—Stop 4260, Attention: (CFDA Number 84.215B), 7100 Old Landover Road, Landover, MD 20785–1506.

Regardless of which address you use, you must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark,

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service,

(3) A dated shipping label, invoice, or receipt from a commercial carrier, or

(4) Any other proof of mailing acceptable to the Secretary of the U.S. Department of Education.

If you mail your application through the U.S. Postal Service, we do not accept either of the following as proof of mailing:

(1) A private metered postmark, or

(2) A mail receipt that is not dated by the U.S. Postal Service.

If your application is postmarked after the application deadline date, we will not consider your application.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, you should check with your local post office.

c. *Submission of Paper Applications by Hand Delivery.* If you qualify for an exception to the electronic submission requirement, you (or a courier service) may deliver your paper application to the Department by hand. You must deliver the original and two copies of your application by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.215B), 550 12th Street, SW., Room 7041, Potomac Center Plaza, Washington, DC 20202–4260.

The Application Control Center accepts hand deliveries daily between 8 a.m. and 4:30 p.m., Washington, DC time, except Saturdays, Sundays and Federal holidays.

Note for Mail or Hand Delivery of Paper Applications: If you mail or hand deliver your application to the Department:

(1) You must indicate on the envelope and—if not provided by the Department—in Item 4 of the Application for Federal Education Assistance (ED 424) the CFDA number—and suffix letter, if any—of the competition under which you are submitting your application.

(2) The Application Control Center will mail a grant application receipt acknowledgment to you. If you do not receive the grant application receipt acknowledgment within 15 business days from the application deadline date, you should call the U.S. Department of Education Application Control Center at (202) 245–6288.

V. Application Review Information

Selection Criteria: The selection criteria for this competition are from EDGAR, 34 CFR 75.210, as follows:

1. *Quality of the Project Design—20 points.* In determining the quality of the design of the proposed project, the Secretary considers the extent to which the proposed project represents an exceptional approach to the priorities established for the competition.

2. *Quality of Project Services—30 points.* (a) In determining the quality of the services to be provided by the proposed project, the Secretary considers the quality and sufficiency of strategies for ensuring equal access and treatment for eligible project participants who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability.

(b) In addition, the Secretary considers the following factors:

(i) The extent to which the training or professional development services to be provided by the proposed project are of sufficient quality, intensity, and duration to lead to improvements in practice among the recipients of those services.

(ii) The likelihood that the services to be provided by the proposed project will lead to improvements in the achievement of students as measured against rigorous academic standards.

(iii) The extent to which the services to be provided by the proposed project involve the collaboration of appropriate partners for maximizing the effectiveness of project services.

3. *Quality of the Management Plan—20 points.* In determining the quality of the management plan for the proposed project, the Secretary considers the adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks.

4. *Quality of Project Personnel—10 points.* (a) In determining the quality of project personnel, the Secretary considers the extent to which the applicant encourages applications for employment from persons who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability.

(b) In addition, the Secretary considers the following factors:

(i) The qualifications, including relevant training and experience, of the project director.

(ii) The qualifications, including relevant training and experience, of key project personnel.

5. *Quality of Project Evaluation—20 points.* In determining the quality of the evaluation, the Secretary considers the following factors:

(a) The extent to which the methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the project and will produce quantitative and qualitative data to the extent possible.

(b) The extent to which the evaluation will provide guidance about effective strategies suitable for replication or testing in other settings.

Note: The Department notes that the grantee can, as authorized by section 5533(b)(2)(C) of the ESEA, award subgrants to conduct evaluations and to collect the information needed for implementation of the performance measure discussed elsewhere in this notice.

Factors Applicants May Wish to Consider in Developing an Evaluation Plan. A strong evaluation plan should be included in the application narrative and should be used, as appropriate, to shape the development of the project

from the beginning of the grant period. The plan should include benchmarks to monitor progress toward specific project objectives and also outcome measures to assess the impact on teaching and learning or other important outcomes for project participants. More specifically, the plan should, where possible, identify the individual and/or organization that has agreed to serve as evaluator for the project and describe the qualifications of that evaluator. The plan should describe the evaluation design, indicating:

(1) What types of data will be collected.

(2) When various types of data will be collected.

(3) What methods will be used.

(4) What instruments will be developed and when.

(5) How the data will be analyzed.

(6) When reports of results and outcomes will be available.

(7) How the applicant will use the information collected through the evaluation to monitor progress of the funded project and to provide accountability information both about success at the initial site and effective strategies for replication in other settings. Applicants are encouraged to devote an appropriate level of resources to project evaluation.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN). We may also notify you informally.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements*: We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Reporting*: At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multi-year award, you must submit an annual performance report that provides the most current performance and financial expenditure information as specified by the Secretary in 34 CFR 75.118.

4. *Performance Measures*: The percentage of students of teachers trained under the grant project that demonstrate an improved understanding of personal finance and economics as compared to similar students whose teachers have not had the training provided by this project. The grantee under this program will be expected to collect and report these data to the Department, and applicants are strongly encouraged to design their proposed project evaluations around this performance measure.

VII. Agency Contact

FOR FURTHER INFORMATION CONTACT: Carolyn J. Warren, U.S. Department of Education, 400 Maryland Avenue, SW., room 4W209, Washington, DC 20202–5900. Telephone: (202) 205–5443 or by e-mail: *carolyn.warren@ed.gov*.

If you use a telecommunications device for the deaf (TDD), you may call the Federal Relay Service (FRS) at 1–800–877–8339.

Individuals with disabilities may obtain this document in an alternative format (*e.g.*, Braille, large print, audiotape, or computer diskette) on request to the program contact person listed in this section.

VIII. Other Information

Electronic Access to This Document: You may view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *www.ed.gov/news/fedregister*.

To use PDF you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free, at 1–888–293–6498; or in the Washington, DC, area at (202) 512–1530.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services, Individuals With Disabilities Education Act, as Amended by the Individuals With Disabilities Education Improvement Act of 2004

ACTION: Notice of Public Meeting to seek comments and suggestions on regulatory issues under the Individuals with Disabilities Education Act (IDEA), as amended by the Individuals with Disabilities Education Improvement Act of 2004.

SUMMARY: The Secretary announces plans to hold the sixth of a series of public meetings to seek comments and suggestions from the public prior to developing and publishing proposed regulations to implement programs under the recently revised Individuals with Disabilities Education Act.

Date and Time of Public Meeting: Friday, February 18, 2005 from 3:30 p.m. to 5:30 p.m. and from 6:30 p.m. to 8:30 p.m.

ADDRESSES: University of Wyoming, Wyoming Union, 2nd Floor, Laramie, WY 82071.

FOR FURTHER INFORMATION CONTACT: Troy R. Justesen. Telephone: (202) 245–7468.

SUPPLEMENTARY INFORMATION:

Background

On December 3, 2004, the President signed into law Public Law 108–446, the Individuals with Disabilities Education Improvement Act of 2004, amending the Individuals with Disabilities Education Act (IDEA). Copies of the new law may be obtained at the following Web site: *http://edworkforce.house.gov/issues/108th/education/idea/conferencereport/confrept.htm.*

Enactment of the new law provides an opportunity to consider improvements in the regulations implementing the IDEA (including both formula and discretionary grant programs) that would strengthen the Federal effort to ensure every child with a disability has available a free appropriate public education that—(1) is of high quality, and (2) is designed to achieve the high standards reflected in the No Child Left Behind Act and regulations.

The Office of Special Education and Rehabilitative Services will be holding a series of public meetings during the first few months of calendar year 2005 to seek input and suggestions for developing regulations, as needed, based on the Individuals with Disabilities Education Improvement Act of 2004.

This notice provides specific information about the sixth of these meetings, scheduled for Laramie, WY (see Date and Time of Public Meeting earlier in this Notice). The final meeting will be conducted in the following location:

• Washington, DC.

In a subsequent **Federal Register** notice, we will notify you of the specific date and location of this meeting, as well as other relevant information.

Individuals who need accommodations for a disability in order to attend the meeting (*i.e.,* interpreting services, assistive listening devices, and material in alternative format) should notify the contact person listed under **FOR FURTHER INFORMATION CONTACT**. The meeting location is accessible to individuals with disabilities.

Dated: January 24, 2005.

John H. Hager,

Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Privacy Act of 1974; System of Records

AGENCY: Federal Student Aid, U.S. Department of Education.

ACTION: Notice of an altered system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (Privacy Act), 5 United States Code (U.S.C.) 552a, the Department of Education (Department) publishes this notice of an altered system of records entitled ''Student Aid Internet Gateway (SAIG), Participation Management System'' for the purpose of providing telecommunications support for the delivery and administration of Federal student aid programs authorized under Title IV of the Higher Education Act of 1965, as amended (HEA). This system stores personally identifiable data from individuals who elect to participate in the transfer of electronic data via the SAIG, or enroll in the Financial Aid Administration (FAA) Online Access system for access to either the Central Processing System (CPS) Online or eCampus Online. (The eCampus-Based Web site allows users to submit FISAP information, access Campus-Based account data, and view reports.) The Department is revising this system of records as a result of a system application change and other technical changes to the Title IV Wide Area Network (Title IV WAN 18–11–10) system notice. This altered system of records notice also changes the name of the system from Title IV WAN to Student Aid Internet Gateway (SAIG), Participation Management System; adds two new routine use disclosures; deletes number two under the ''Purposes'' statement, which refers to billing for customer service calls and ISIR data requests; and revises the safeguards and record retention and disposal sections to reflect the current safeguards and record retentions for the paper and electronic (Web-based) records and information.

DATES: The Department seeks comments on the altered system of records described in this notice, in accordance with the requirements of the Privacy Act. We must receive your comments on the proposed routine uses for this system of records on or before February 28, 2005.

The Department has filed a report describing the altered system of records with the Chair of the Senate Committee on Governmental Affairs, the Chair of the House Committee on Government Reform, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), on January 24, 2005. This altered system of records will become effective at the later date of: (1) The expiration of the 40-day period for OMB review on March 7, 2005 or (2) February 28, 2005, unless the system of records needs to be changed as a result of public comment or OMB review.

ADDRESSES: Address all comments on the proposed routine uses of this system, and requests for information about this system, to Gregory James, Application Processing, Students Channel, Federal Student Aid, U.S. Department of Education, Union Center Plaza, 830 First Street, NE., Room 31C4, Washington, DC 20202.

If you prefer to send your comments through the Internet, use the following address: *Comments@ed.gov.* You must include the term ''SAIG comments'' in the subject line of your electronic message.

During and after the comment period, you may inspect all comments about this notice at Federal Student Aid (FSA), U.S. Department of Education, Union Center Plaza, 830 First Street, NE., Room 31C4, Washington, DC 20202

between the hours of 8:30 a.m. and 4 p.m., eastern time, Monday through Friday of each week except Federal holidays.

Assistance to Individuals With Disabilities in Reviewing the Rulemaking Record

On request, we will supply an appropriate aid, such as a reader or print magnifier, to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking record for this notice.

If you want to schedule an appointment for this type of aid, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT: Gregory James, Telephone: (202) 377–3386. If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

Individuals with disabilities may obtain this document in an alternative format (*e.g.*, Braille, large print, audiotape, or computer diskette) on request to the contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Introduction

The Privacy Act (5 U.S.C. 552a(e)(4)) requires the Department to publish in the **Federal Register** a notice of altered systems of records managed by the Department. The Department's regulations implementing the Privacy Act are contained in the Code of Federal Regulations (CFR) in 34 CFR part 5b.

The Privacy Act applies to a record about an individual that is maintained in a system of records from which information is retrieved by a unique identifier associated with each individual, such as a name or social security number. The information about each individual is called a ''record,'' and the system, whether manual or computer-driven, is called a ''system of records.'' The Privacy Act requires each agency to publish a systems of records notice in the **Federal Register** and to prepare reports to OMB and Congressional Committees whenever the agency publishes a new or ''altered'' system of records.

Electronic Access to This Document

You may view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *http://www.ed.gov/news/fedregister*.

To use PDF you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free, at 1–888–293–6498; or in the Washington, DC, area at (202) 512–1530.

Note: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: *http://www.gpoaccess.gov/nara/index.html.*

Dated: January 24, 2005.

Theresa S. Shaw,

Chief Operating Officer, Federal Student Aid.

For the reasons discussed in the preamble, the Chief Operating Officer, Federal Student Aid, U.S. Department of Education, publishes a notice of an altered system of records to read as follows:

18–11–10

SYSTEM NAME:

Student Aid Internet Gateway (SAIG), Participant Management System.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Pearson Government Solutions, 2450 Oakdale Boulavard, Coralville, Iowa 52241.

Virtual Data Center (VDC), c/o Computer Science Corporation, 71 Deerfield Lane, Meriden, CT 06450–7151.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

This system contains records on those individuals who elect to participate in the electronic exchange of data with the Department of Education via the SAIG, or enroll in the Financial Aid Administration system for access to either the Central Processing System (CPS) Online or eCampus Online. Those eligible to participate include: financial aid administrators, authorized employees or representatives of postsecondary institutions, authorized employees or representatives of third-party servicers, authorized employees or representatives of lenders, authorized employees or representatives of guaranty agencies, and authorized employees or representatives of state scholarship programs.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of demographic contact information that individuals affiliated with an authorized entity provide to request electronic access to Title IV Student Aid Systems.

Demographic information includes the individual's name, address, and authentication information (mother's maiden name, Social Security Number, and date of birth).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

20 U.S.C. 1082, 1085, 1094, 1099C, Executive Order 9937.

PURPOSE(S):

The SAIG, Participant Management System performs the following: processes stored data from the SAIG Enrollment Forms (Web and paper versions); maintains the SAIG Enrollment Web site (named FSAWebEnrollment.ed.gov); manages the assignment of individual ID numbers (TG Numbers); and authenticate user's of the CPS Online and e-Campus Online systems.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Department may disclose information contained in a record in this system of records under the routine uses listed in this system of records without the consent of the individual if the disclosure is compatible with the purposes for which the record was collected.

These disclosures may be made on a case-by-case basis or, if the Department has complied with the computer matching requirements of the Privacy Act, under a computer matching agreement.

(1) *Program disclosures.* The Department may disclose records for the following program purposes:

(a) *Federal Direct Loan Program*—For participation in the Direct Loan Program including the submission of origination records and the reporting of disbursement records that require the transmission of data over the SAIG.

(b) *Central Processing System (CPS)*—Student application data including corrections can be entered and obtained over the SAIG.

(c) *Federal Pell Grant*—Program origination and disbursement records must be reported electronically via the SAIG.

(d) *Fiscal Operations Report and Application to Participate in the Federal Campus-Based Programs (FISAP)*—Participating institutions are required to submit their annual Fiscal Operations and Application to Participate to the Department via the SAIG.

(e) *National Student Loan Data Service (NSLDS)*—Institutions must be provided access to NSLDS to perform online Enrollment Reporting (formerly Student Status Confirmation Reporting

(SSCR)) for updating student enrollment data, and overpayment updates. Additionally, institutions will be able to receive their cohort default rate (CDR) notification (which includes eligibility letters and loan record detail reports) via the SAIG.

(f) *Lender Reporting System (LaRS)*—Lender institutions or their servicers have the option to send financial reporting information to Federal Student Aid's Financial Management System via SAIG.

(2) *Freedom of Information Act (FOIA) advice disclosure.* The Department may disclose records to the Department of Justice (DOJ) and the Office of Management and Budget if the Department seeks advice regarding whether records maintained in the system of records are required to be released under the FOIA and the Privacy Act of 1974.

(3) *Disclosure to the DOJ.* The Department May disclose records to the DOJ to the extent necessary for obtaining DOJ advice on any matter relevant to an audit, inspection, or other inquiry related to the programs covered by this system.

(4) **Contract Disclosure**. If the Department contracts with an entity for the purposes of performing any function that requires disclosure of records in this system to employees of the contractor, the Department may disclose the records to those employees. Before entering into such a contract, the Department shall require the contractor to maintain Privacy Act safeguards as required under 5 U.S.C. 552a(m) with respect to the records in the system.

(5) *Litigation and Alternative Dispute Resolution (ADR) disclosures.*

(a) *Introduction.* In the event that one of the parties listed below is involved in litigation or ADR, or has an interest in litigation or ADR, the Department may disclose certain records to the parties described in paragraphs (b), (c), and (d) of this routine use under the conditions specified in those paragraphs:

(i) The Department of Education, or any component of the Department; or

(ii) Any Department employee in his or her official capacity; or

(iii) Any Department employee in his or her individual capacity if the Department of Justice (DOJ) has agreed to provide or arrange for representation for the employee;

(iv) Any Department employee in his or her individual capacity where the agency has agreed to represent the employee; or

(v) The United States where the Department determines that the litigation is likely to affect the Department or any of its components.

(b) *Disclosure to the Department of Justice (DOJ).* If the Department determines that disclosure of certain records to the DOJ, or attorneys engaged by DOJ, is relevant and necessary to litigation or ADR, and is compatible with the purpose for which the records were collected, the Department may disclose those records as a routine use to the DOJ.

(c) *Adjudicative disclosures.* If the Department determines that disclosure of certain records to an adjudicative body before which the Department is authorized to appear, an individual or entity designated by the Department or otherwise empowered to resolve or mediate disputes is relevant and necessary to the litigation or ADR, the Department may disclose those records as a routine use to the adjudicative body, individual, or entity.

(d) *Parties, counsels, representatives and witnesses.* If the Department determines that disclosure of certain records to a party, counsel, representative or witness in an administrative proceeding is relevant and necessary to the litigation, the Department may disclose those records as a routine use to the party, counsel, representative or witness.

(6) *Research disclosure.* The Department may disclose records to a researcher if an appropriate official of the Department determines that the individual or organization to which the disclosure would be made is qualified to carry out specific research related to functions or purposes of this system of records. The official may disclose records from this system of records to that researcher solely for the purpose of carrying out that research related to the functions or purposes of this system of records. The researcher shall be required to maintain Privacy Act safeguards with respect to the disclosed records.

(7) *Congressional Member disclosure.* The Department may disclose records to a member of Congress from the record of an individual in response to an inquiry from the member made at the written request of that individual. The Member's right to the information is no greater than the right of the individual who requested it.

(8) *Disclosure for use by law enforcement agencies.* The Department may disclose information to any Federal, State, local or other agencies responsible for enforcing, investigating, or prosecuting violations of administrative, civil, or criminal law or regulation if that information is relevant to any enforcement, regulatory, investigative or prosecutorial responsibility within the entity's jurisdiction.

(9) *Enforcement disclosure.* In the event that information in this system of records indicates, either on its face or in connection with other information, a violation or potential violation of any applicable statute, regulation, or order of a competent authority, the Department may disclose the relevant records to the appropriate agency, whether foreign, Federal, State, tribal, or local, charged with the responsibility of investigating or prosecuting that violation or charged with enforcing or implementing the statute, Executive Order, rule, regulation, or order issued pursuant thereto.

(10) *Employment, benefit, and contracting disclosure.* (a) *Decisions by the Department.* The Department may disclose a record to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement or other pertinent records, or to another public authority or professional organization, if necessary to obtain information relevant to a decision concerning the hiring or retention of an employee or other personnel action, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

(b) *Decisions by Other Public Agencies and Professional Organizations.* The Department may disclose a record to a Federal, State, local, or foreign agency or other public authority or professional organization, in connection with the hiring or retention of an employee or other personnel action, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit, to the extent that the record is relevant and necessary to the receiving entity's decision on the matter.

(11) *Employee grievance, complaint or conduct disclosure.* The Department may disclose a record in this system of records to another agency of the Federal Government if the record is relevant to one of the following proceedings regarding a present or former employee of the Department: Complaint, grievance, discipline or competence determination proceedings. The disclosure may only be made during the course of the proceeding.

(12) *Labor organization disclosure.* The Department may disclose records from this system of records to an arbitrator to resolve disputes under a negotiated grievance procedure or to officials of labor organizations recognized under 5 U.S.C. chapter 71

when relevant and necessary to their duties of exclusive representation.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosure pursuant to 5 U.S.C. 552a(b)(12): The Department may disclose to a consumer reporting agency information regarding a claim, which is determined to be valid and overdue as follows: (1) The name, address, and other information necessary to establish the identity of the individual responsible for the claim; and (2) the program under which the claim arose. The Department may disclose the information specified in this paragraph under 5 U.S.C. 552a(b)(12) and the procedures contained in subsection 31 U.S.C. 3711(e).

A consumer-reporting agency to which these disclosures may be made is defined at 31 U.S.C. 3701(a)(3).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on a computer database as well as in hard copy. All hard copy forms are loaded into an imaging system accessible through internal systems only. Paper is stored in file cabinets at the Pearson Government Solutions facility in Coralville, Iowa.

RETRIEVABILITY:

The records are retrieved by the names of the individual user and/or unique system User ID.

SAFEGUARDS:

All users of this system will have a unique user ID with a personal identifier.

This system does not use persistent cookies (data that a Web server causes to be placed on a user's hard drive) to implement personalization. It is the policy of the Department to prohibit the use of persistent cookies on Department Web sites except when: there is a compelling need; there are appropriate safeguards in place; the use is personally approved by the Secretary of Education; and there is clear and conspicuous notice to the public.

All physical access to the Department site, and the sites of Department contractors where this system of records is maintained, is controlled and monitored by security personnel who check each individual entering the building for his or her employee or visitor badge.

The computer system employed by the Department offers a high degree of resistance to tampering and circumvention. This security system limits data access to Department and contract staff on a ''need-to-know'' basis, and controls individual users'' ability to access and alter records within the system.

All users of this system of records are given a unique user ID with personal identifiers.

All interactions by individual users with the system are recorded.

RETENTION AND DISPOSAL:

SAIG, Participation Management enrollment forms will be retained by the manager of the SAIG Participation Management System (Pearson Government Solutions) for 6 years after the expiration of the contract.

SYSTEM MANAGER(S) AND ADDRESS:

Sue O'Flaherty, Deputy Director, Application Processing, U.S. Department of Education, Students Channel, Federal Student Aid, Union Center Plaza, 830 First Street NE., Room 32E2, Washington, DC 20202.

NOTIFICATION PROCEDURE:

If you wish to determine whether a record exists regarding you in the system of records, contact the system manager. Your request must meet the requirements of the Department's Privacy Act regulations at 34 CFR 5b.5, including proof of identity.

RECORD ACCESS PROCEDURES:

If you wish to gain access to a record regarding you in the system of records, contact the system manager. Your request must meet the requirements of the Department's Privacy Act regulations at 34 CFR 5b.5, including proof of identity.

CONTESTING RECORD PROCEDURES:

If you wish to contest the content of a record regarding you in the system of records, contact the system manager. Your request must meet the requirements of the Department's Privacy Act regulations at 34 CFR 5b.7.

RECORD SOURCE CATEGORIES:

Information in this system is obtained from the following entities: financial aid administrators, postsecondary institutions, third-party servicers, lenders, guaranty agencies, and state scholarship programs.

SYSTEM EXEMPTED FROM CERTAIN PROVISION OF THE PRIVACY ACT:

None.

[FR Doc. 05–1651 Filed 1–27–05; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EC01–66–000, et al.]

Nevada Power Company, et al.; Electric Rate and Corporate Filings

January 19, 2005.

The following filings have been made with the Commission. The filings are listed in ascending order within each docket classification.

1. Nevada Power Company, Reid Gardner Power LLC and Clark Power LLC; Nevada Power Company and Reliant Energy Sunrise LLC

[Docket Nos. EC01–66–000 and EC01–73–000]

Take notice that on September 25, 2003, Nevada Power Company (Nevada Power) filed a motion to terminate the proceedings in the above-referenced docket numbers.

Comment Date: 5 p.m. Eastern Time on February 9, 2005.

2. Liberty Electric Power, LLC

[Docket Nos. EC05–37–000 and ER01–2398–009]

Take notice that on January 13, 2005, Liberty Electric Power, LLC (Applicant) submitted an application pursuant to section 203 of the Federal Power Act for authorization for disposition of jurisdictional facilities relating to the transfer of membership interests in Liberty's indirect upstream owner, LEP Holdings, LLC (LEP Holdings) to several financial institutions and other financial investors or their special purpose affiliates (collectively, New Investors) and the transfer of a managing membership interest in LEP Holdings to Tyr Energy, Inc. (Tyr) or one of its affiliates or another entity which will meet the criteria set forth in the Application.

Applicant states that it owns an approximately 567.7 MW combined cycle gas-fueled electric generating plant located in the Borough of Eddystone, Delaware County, Pennsylvania. Applicant also filed a notice of change in status in the above-captioned rate docket with respect to the proposed transfers of interests in LEP Holdings.

Comment Date: 5 p.m. Eastern Time on February 3, 2005.

3. Rainy River Energy Corporation and Constellation Energy Commodities Group, Inc.

[Docket No. EC05–39–000]

Take notice that on January 14, 2005, Rainy River Energy Corporation (Rainy

River) and Constellation Energy Commodities Group, Inc. (CCG) filed an application pursuant to section 203 of the Federal Power Act seeking authorization for Rainy River to transfer to CCG two power sales agreements. Rainy River and CCG state that they are power marketers with market-based rate tariffs on file with the Commission.

Comment Date: 5 p.m. Eastern Time on February 4, 2005.

4. River Hill Power Company, LLC

[Docket No. EG05–30–000]

Take notice that on January 12, 2005, River Hill Power Company, LLC (RHPC), with a principal place of business at 335 Madison Avenue, 28th Floor, New York, NY 10017, filed with the Commission an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's regulations.

RHPC states that it is a wholly owned subsidiary of RCG River Hill, LLC and that it intends to construct, own, and operate a nominal 290 MW waste coal-fired electricity and steam generating plant at a site in Karthaus Township, Clearfield County, Pennsylvania.

Comment Date: 5 p.m. Eastern Time on February 2, 2005.

5. The Empire District Electric Company

[Docket No. ER99–1757–007]

Take notice that on January 12, 2005, The Empire District Electric Company (Empire District), submitted additional responses and data pursuant to the Commission's deficiency letter order dated November 24, 2004 in Docket No. ER99–1757–005, as an amendment to the September 27, 2004 filing of Empire District's generation market power study.

Comment Date: 5 p.m. Eastern Time on February 2, 2005.

6. Split Rock Energy LLC

[Docket No. ER00–1857–005]

Take notice that on January 12, 2005, Split Rock Energy LLC (Split Rock) supplemented its triennial review originally submitted on November 9, 2004 in Docket No. ER00–1857–004 pursuant to the Commission's order issued May 13, 2004 in Docket No. ER02–1406–001, *et al.*, 107 FERC ¶ 61,168 (2004).

Comment Date: 5 p.m. Eastern Time on February 2, 2005.

7. Ameren Energy Development Company

[Docket Nos. ER01–294–003); Ameren Energy Generating Company (Docket No. ER00–3412–004); Ameren Energy Marketing Company (Docket No. ER00–816–002); AmerenEnergy Medina Valley Cogen, LLC (Docket No. ER04–8–003); AmerenEnergy Resources Generating Company (Docket No. ER04–53–004); Central Illinois Light Company (Docket No. ER98–2440–004); Central Illinois Public Service Company (Docket No. ER98–3285–001); Union Electric Company (Docket No. ER00–2687–003]

Take notice that on December 27, 2004, Ameren Services Company, on behalf of the above-listed affiliates and subsidiaries of Ameren Corporation, submitted an updated market power analysis in compliance with Commission orders in *AEP Power Marketing, Inc., et al.*, 107 FERC ¶ 61,018 (2004), *order on reh'g,* 108 FERC ¶ 61,026 (2004).

Comment Date: 5 p.m. Eastern Time on January 26, 2005.

8. Ameren Energy Development Company

[Docket Nos. ER01–294–004); Ameren Energy Generating Company (Docket No. ER00–3412–005); Ameren Energy Marketing Company (Docket No. ER00–816–003); AmerenEnergy Medina Valley Cogen, LLC (Docket No. ER04–8–004); Central Illinois Light Company (Docket No. ER98–2440–005); Central Illinois Public Service Company (Docket No. ER98–3285–002); Union Electric Company (Docket No. ER00–2687–004]

Take notice that on December 27, 2004, Ameren Services Company, on behalf of the above-listed affiliates and subsidiaries of Ameren Corporation, submitted updated and revised market-based rate tariffs and rate schedules in compliance with the Commission's orders in *Investigation of Terms and Conditions of Public Utility Market-Based Rate Authorizations, 105 FERC ¶ 61,218 (2003), order on reh'g,* 107 FERC ¶ 61,175 (2004).

Comment Date: 5 p.m. Eastern Time on January 26, 2005.

9. Williams Power Company, Inc.

[Docket No. ER05–44–001]

Take notice that on January 12, 2005, Williams Power Company, Inc. (Williams) filed amended pages to the reliability must-run agreements between Williams and the California Independent System Operator Corporation for the Alamitos and Huntington Beach Generation Units.

Comment Date: 5 p.m. Eastern Time on February 2, 2005.

10. Virginia Electric and Power Company

[Docket No. ER05–74–001]

Take notice that on January 12, 2005, Virginia Electric and Power Company (Dominion Virginia Power) tendered for filing an executed Standard Large Generator Interconnection Agreement (LGIA) with Five Forks Energy Associates, LLC (Five Forks) and its response to the Commission's deficiency letter issued December 15, 2004 in Docket No. ER05–74–000. Dominion Virginia Power states that the executed LGIA replaces the unexecuted LGIA that was filed in these proceedings on October 26, 2004. Dominion Virginia Power requests an effective date of January 13, 2005.

Dominion Virginia Power states that copies of the filing were served on the parties on the Commission's official service list in these proceedings, Five Forks and the Virginia State Corporation Commission.

Comment Date: 5 p.m. Eastern Time on February 2, 2005.

11. Northeast Energy Associates, a Limited Partnership

[Docket No. ER05–236–002]

Take notice that on January 14, 2005, Northeast Energy Associates, a Limited Partnership submitted a supplement to the application for market-based rate authority filed on November 18, 2004, which clarifies that it does not intend to retain its qualifying facility status.

Northeast Energy Associates states that copies of the filing were served upon the Florida Public Service Commission.

Comment Date: 5 p.m. Eastern Time on January 24, 2005.

12. Westbank Energy Capital LLC

[Docket No. ER05–294–001]

Take notice that on January 13, 2005, Westbank Energy Capital, LLC (Westbank) submitted an amendment to its petition filed December 6, 2004 in Docket No. ER05–294–000 for acceptance of Westbank's Rate Schedule FERC No. 1; the granting of certain blanket approvals, including the authority to sell electricity at market-based rates; and the waiver of certain Commission regulations.

Comment Date: 5 p.m. Eastern Time on February 3, 2005.

13. Spokane Energy, LLC

[Docket No. ER05–310–001]

Take notice that on January 12, 2005, Spokane Energy, LLC (Spokane Energy) filed with the Commission proposed revisions to its First Revised Rate Schedule FERC No. 1, which was

originally filed on December 7, 2004 in Docket No. ER05–310–000.

Comment Date: 5 p.m. Eastern Time on February 2, 2005.

14. Avista Turbine Power, Inc.

[Docket No. ER05–311–001]

Take notice that on January 12, 2005, Avista Turbine Power, Inc. (Avista Turbine) filed with the Commission proposed revisions to its First Revised Rate Schedule No. 1, which was originally filed on December 7, 2005 in Docket No. ER05–311–000.

Comment Date: 5 p.m. Eastern Time on February 2, 2005.

15. San Diego Gas & Electric Company

[Docket No. ER05–354–001]

Take notice that on December 28, 2004, San Diego Gas & Electric Company (SDG&E) tendered for filing an amendment to its December 17, 2004 filing of changes to its Transmission Owner Tariff Reliability Services Rates.

SDG&E states that copies of the filing have been served on the California Public Utilities Commission and the California Independent System Operator.

Comment Date: 5 p.m. Eastern Time on January 31 , 2005.

16. Sempra Generation

[Docket No. ER05–440–000]

Take notice that on January 12, 2005, Sempra Generation submitted a notice of succession pursuant to section 35.16 of the Commission's Regulations to reflect a corporate name change from Sempra Energy Resources to Sempra Generation, effective January 1, 2005.

Comment Date: 5 p.m. Eastern Time on February 2, 2005.

17. American Electric Power Service Corporation

[Docket No. ER05–441–000]

Take notice that on January 12, 2005, the American Electric Power Service Corporation (AEPSC), tendered for filing notices of cancellation of Service Agreement Nos. 317 and 318 under the Operating Companies of the American Electric Power System's FERC Electric Tariff, Third Revised Volume No. 6, for firm and non-firm point-to-point transmission service agreements for Entergy-Koch Trading, LP. AEPSC requests an effective date of January 1, 2005.

AEPSC states that a copy of the filing was served on the Parties and the state utility regulatory commissions of Arkansas, Indiana, Kentucky, Louisiana, Michigan, Ohio, Oklahoma, Tennessee, Texas, Virginia and West Virginia.

Comment Date: 5 p.m. Eastern Time on February 2, 2005.

18. Condon Wind Power, LLC

[Docket Nos. ER05–442–000 and ER02–305–003); AES Alamitos, LLC (Docket No. ER98–2185–008); AEE 2, LLC (Docket No. ER99–2284–004); AES Creative Resources, LP and AES Eastern Energy, LP (Docket No. ER99–1773–004); Indianapolis Power & Light Company (Docket No. ER00–1026–009); AES Ironwood, LLC (Docket No. ER04–1010–002); AES Red Oak, LLC (Docket No. ER01–2401–003); AES Huntington Beach, LLC (Docket No. ER98–2184–008); AES Redondo Beach, LLC (Docket No. ER98–2186–008); AES Placerita, Inc. (Docket No. ER00–33–006); AES Delano, Inc. (Docket No. ER03–1207–002]

Take notice that on January 12, 2005, the above-captioned entities (collectively, Applicants) tendered for filing an amendment to the tariff of Condon Wind Power, LLC (Condon), and a notice of change in status. Applicants state that the amendment to the Condon's tariff and the notice of change in status are intended to reflect a transaction in which SeaWest Holdings, Inc., which owns a 38.9 percent managing interest in Condon, will be acquired by a subsidiary of AES Corporation, the parent of the other Applicants.

Comment Date: 5 p.m. Eastern Time on February 2, 2005.

19. Transmission Owners of the Midwest Independent Transmission System Operator, Inc.

[Docket No. ER05–447–000]

Take notice that on January 13, 2005, the Transmission Owners of the Midwest Independent Transmission System Operator (Midwest ISO Transmission Owners) submitted for filing a rate schedule change concerning the direct recovery of Midwest ISO Schedule 10 and 17 costs assessed to Carved-Out Grandfathered Agreements by the Midwest ISO to the transmission owners.

The Midwest ISO Transmission Owners state that this filing will be served on all affected customers and on all applicable state commissions and that the filing will be posted on the Midwest ISO's home page.

Comment Date: 5 p.m. Eastern Time on February 3, 2005.

20. Arizona Public Service Company

[Docket No. ER05–448–000]

Take notice that on January 13, 2005, Arizona Public Service Company (APS) tendered for filing revisions to its open access transmission tariff in order to comply with Order 2003–B issued December 20, 2004 in Docket No. RM02–1–005.

APS states that a copy of the transmittal letter has been served on all parties listed on the Service List and that copies of the complete filing can be found on APS' OASIS at *http://www.oatioasos.com\azps\index.*

Comment Date: 5 p.m. Eastern Time on February 3, 2005.

Standard Paragraph

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant and all parties to this proceeding.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible online at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Linda Mitry,

Deputy Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[OW–2004–0038, FRL–7865–3]

Agency Information Collection Activities: Proposed Collection; Comment Request; Survey of Airport Deicing Operations, EPA ICR Number 2171.01

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit a proposed Information Collection Request (ICR) to the Office of Management and Budget (OMB). This is a request for a new collection. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before March 29, 2005.

ADDRESSES: Submit your comments, referencing docket ID number OW–2004–0038, to EPA online using EDocket (our preferred method), by e-mail to *ow-docket@epa.gov,* or by mail to: Water Docket, 4101T, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Eric Strassler, EPA Office of Water, telephone 202–566–1026, email *strassler.eric@epa.gov.*

SUPPLEMENTARY INFORMATION: EPA has established a public docket for this ICR under Docket ID number OW–2004–0038, which is available for public viewing at the Water Docket in the EPA Docket Center (EPA/DC), EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is 202–566–1744, and the telephone number for the Water Docket is 202–566–2422. An electronic version of the public docket is available through EPA Dockets (EDocket) at *http://www.epa.gov/edocket.* Use EDocket to obtain a copy of the draft collection of information, submit or view public comments, access the index listing of the contents of the public docket, and to access those documents in the public docket that are available electronically. Once in the system, select ''Search,'' then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA within 60 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EDocket as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDocket. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDocket. For further information about the electronic docket, see EPA's **Federal Register** notice describing the electronic docket at 67 FR 38102 (May 31, 2002), or go to *http://www.epa.gov/edocket.*

Affected entities: Entities potentially affected by this action are airport owners/operators.

Title: Survey of Airport Deicing Operations (Airport Questionnaire)

Abstract: EPA is developing wastewater discharge standards, called ''effluent guidelines,'' for airports pursuant to the Agency's 2004 Effluent Guidelines Plan (69 FR 53719, September 2, 2004). The focus of the rulemaking is on wastewater discharges from aircraft and runway deicing operations. EPA will send survey questionnaires to a sample of airport owners/operators to help the Agency compile a national assessment of deicing operations. The survey will include questions on the deicing technologies employed, amount of deicing chemicals used, wastewater collection and treatment systems used, pollution prevention techniques, and economic and financial information. Completion of this one-time survey will be mandatory pursuant to sec. 308 of the Clean Water Act. (EPA is preparing a separate questionnaire for airlines. This questionnaire will be announced in a separate **Federal Register** notice.)

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Burden Statement. The estimated burden for this survey is 30 hours per airport respondent. The total number of airport respondents is 157, producing an approximate total burden of 4,710 hours. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: January 13, 2005.

Geoffrey H. Grubbs,

Director, Office of Science and Technology.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[Docket No. R10–OAR–2005–WA–001; FRL–7864–9]

Adequacy Status of the Spokane, WA Carbon Monoxide Maintenance Plan and Redesignation Request for Transportation Conformity Purposes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of adequacy.

SUMMARY: In this notice, EPA is notifying the public that we have found that the motor vehicle emissions budget contained in the submitted Spokane Carbon Monoxide Maintenance Plan and Redesignation Request is adequate for transportation conformity purposes. On March 2, 1999, the D.C. Circuit Court ruled that submitted State Implementation Plans (SIPs) cannot be used for conformity determinations

until EPA has found them adequate. This affects future transportation conformity determinations prepared, reviewed and approved by the Spokane Regional Transportation Council, Washington State Department of Transportation, Federal Highway Administration and the Federal Transit Administration.

DATES: This finding is effective February 14, 2005.

FOR FURTHER INFORMATION CONTACT: The finding is available at EPA's conformity Web site: *http://www.epa.gov/otaq/transp.htm*, (once there, click on the ''Transportation Conformity'' button, then look for ''Adequacy Review of SIP Submissions''). You may also contact Wayne Elson, U.S. EPA, Region 10, Office of Air, Waste, and Toxics (AWT–107), 1200 Sixth Ave, Seattle WA 98101; (206) 553–1463 or *elson.wayne@epa.gov*.

SUPPLEMENTARY INFORMATION:

Background

Today's notice is simply an announcement of a finding that we have already made. EPA Region 10 sent a letter to the Washington Department of Ecology January 13, 2005, stating that the SIP is adequate for transportation conformity purposes.

Transportation conformity is required by section 176(c) of the Clean Air Act. EPA's conformity rule requires that transportation plans, programs, and projects conform to SIPs. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the national ambient air quality standards.

The criteria by which we determine whether a SIP is adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4). Please note that an adequacy review is separate from EPA's completeness review and it also should not be used to prejudge our ultimate approval of the SIP. Even if we find a SIP adequate for conformity, the SIP could later be disapproved. For the reader's ease, the 2002 motor vehicle emission budget excerpted from the Maintenance Plan is 279 tons per winter time day of carbon monoxide.

We have described our process for determining adequacy in SIPs in guidance dated May 14, 1999. This guidance is now reflected in the amended transportation conformity rule, July 1, 2004 (69 FR 40004). We followed this process in making our adequacy determination.

Authority: 42 U.S.C. 7401–7671q.

Dated: January 20, 2005.

Julie M. Hagensen,

Acting Regional Administrator, Region 10.

Environmental Impact Statements; Notice of Availability

Responsible Agency: Office of Federal Activities, General Information (202) 564–7167 or *http://www.epa.gov/compliance/nepa/*.

Weekly receipt of Environmental Impact Statements

Filed January 17, 2005 through January 21, 2005

Pursuant to 40 CFR 1506.9.

EIS No. 050017, Final EIS, NOA, ME, MA, RI, NH, CT, Atlantic Herring Fishery Management Plan, Minimizing Impacts on Essential Fish Habitat of Any Species, Gulf of Maine—Georges Bank, ME, NH, MA, CT and RI, Wait Period Ends: February 22, 2005, Contact: Peter D. Colosi (978) 281–3332.

The above NOA EIS should have appeared in the 01/21/2005 **Federal Register**. The 30 day Wait Period is Calculated from 01/21/2005.

EIS No. 050018, Draft EIS, FAA, IL, O'Hare Modernization Program, Proposes Major Development, Chicago O'Hare International Airport, Airport Layout Plan (ALP), Federal Funding, US Army COE Section 404 Permit, City of Chicago, IL, Comment Period Ends: March 23, 2005, Contact: Michael W. MacMullen (847) 294–8339.

The above FAA EIS should have appeared in the 01–21–2005 **Federal Register**.

EIS No. 050019, Final EIS, AFS, AK, Shoreline Outfitter/Guide Plan, Commercial Permits Issuance for Shoreline-Based Activities on National Forest System Lands, Admiralty Island National Monument, Hoonah, Sitka and Juneau Ranger Districts, Tongass National Forest, AK, Wait Period Ends: February 28, 2005, Contact: Bill Tremblay (907) 772–5877.

EIS No. 050020, Draft EIS, USN, FL, Navy Air-To-Ground Training at Avon Park Air Force Range, To Conduct Air-to-Ground Ordnance Delivery and Training, Fleet Forces Command's Fleet Readiness Training Program (FRTP), Polk and Highlands Counties, FL, Comments Period Ends: March 14, 2005, Contact: Will Sloger (843) 820–5797.

EIS No. 050021, Draft EIS, NRC, WI, Generic-License Renewal for Point Beach Nuclear Plant, Units 1 and 2, Supplement 23, to NUREG–1437 (TAC Nos. MC2049 and MC2050), Lake Michigan, Manitowoc County, WI, Comment Period Ends: April 13, 2005, Contact: Stacey Imboden (301) 415–2462.

EIS No. 050022, Draft EIS, AFS, WA, Methow Transmission Project, Construction of New Transmission Line or Reconstruction an Existing Line, Okanogan and Wenatchee National Forests, Methow Valley Ranger District, Okanogan County, WA, Comment Period Ends: March 15, 2005, Contact: Jan Flatten (509) 826–3277.

EIS No. 050023, Final EIS, DOE, SC, Savannah River Site Construction and Operation of a Mixed Oxide (MOX) Fuel Fabrication Facility, NUREG–1767, Aiken, Barnwell and Allendale Counties, SC, Wait Period Ends: February 28, 2005, Contact: Matthew Blevins (301) 415–7684.

EIS No. 050024, Draft EIS, AFS, CO, Gold Camp Road Plan, Develop a Feasible Plan to Manage the Operation of Tunnel #3 and the 8.5 mile Road Segment, Pike National Forest, Pikes Peak Ranger District, Colorado Springs, El Paso County, CO, Comment Period Ends: March 29, 2005, Contact: Frank Landis (719) 477–4203.

EIS No. 050025, Final EIS, UAF, TX, Relocation of the C–5 Formal Training Unit from Altus Air Force Base, Oklahoma to Lackland Air Force Base, Bexar County, TX, Wait Period Ends: February 28, 2005, Contact: Lt.Col. Dee Anderson (210) 671–2907.

EIS No. 050026, Draft EIS, BIA, WI, Beloit Casino Project, To Expand to Tribal Governmental Revenue Base, St. Croix Chippewa Indians of Wisconsin and Bad River Band of the Lake Superior Tribe of Chippewa Indians, Rock County, WI, Comment Period Ends: March 14, 2005, Contact: Herb Nelson (612) 713–4400.

EIS No. 050027, Final EIS, BLM, AK, Northeast National Petroleum Reserve Alaska Amended Integrated Activity Plan, To Amend 1998 Northeast Petroleum Reserve, To Consider Opening Portions of the BLM-Administrated Lands, North Slope Borough, AK, Wait Period Ends: February 28, 2005, Contact: Susan Childs (907) 271–1985.

EIS No. 050028, Draft Supplement EIS, FHW, AK, Juneau Access Transportation Project, Improvements in the Lynn Canal/Taiya Inlet

Corridor between Juneau and Haines/Skagway, Updated Information, Special-Use-Permit and COE Section 10 and 404 Permits, Tongass National Forest, Klondike Gold Rush National Historic Park, Haines States Forest, City and Borough of Juneau, Haines Borough, Cities Haines and Skagway, AK, Comment Period Ends: 03/21/2005, Contact: Tim Haugh (907) 586–7430.

Amended Notices

EIS No. 050014, Final EIS, FAA, CA, Los Angeles International Aiport Proposed Master Plan Improvements, Alternative D Selected, Enhanced Safety and Security Plan, Los Angeles County, CA, Wait Period Ends: February 22, 2005, Contact: David B. Kessler (310) 725–3615.

Revision of FR Notice Published on 01/21/2004: Correction to EIS Status from Draft to Final.

EIS No. 040544, Draft Supplemental EIS, FHW, UT, Legacy Parkway Project, Construction from I–215 at 2100 North in Salt Lake City to I–15 and US 89 near Farmington, Updated Information, Funding and US Army COE Section 404 Permit, Salt Lake and Davis Counties, UT, Comment Period Ends: March 4, 2005, Contact: Gregory Punske (801) 963–0182.

Revision of FR Notice Published on 12/03/2004: CEQ Comment Period Ending 02/01/2005 has been Extended to 03/04/2005.

Dated: January 25, 2005.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7864–7]

Meeting of the Local Government Advisory Committee

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The Local Government Advisory Committee will meet on February 9–11, 2005 in Half Moon Bay, CA. The Committee will be discussing environmental indicators, water infrastructure needs and small community issues.

The Committee will hear comments from the public between 10 a.m.–10:15 a.m. on Thursday, February 10th. Each individual or organization wishing to address the LGAC meeting will be allowed a maximum of five minutes to present their point of view. Please contact the Designated Federal Officer (DFO) at the number listed below to schedule agenda time. Time will be allotted on a first come, first serve basis, and the total period for comments may be extended, if the number of requests for appearances require it.

This is an open meeting and all interested persons are invited to attend. LGAC meeting minutes and Subcommittee summary notes will be available after the meeting and can be obtained by written request from the DFO. Members of the public are requested to call the DFO at the number listed below if planning to attend so that arrangements can be made to comfortably accommodate attendees as much as possible. Seating will be on a first come, first serve basis.

DATES: The Local Government Advisory Committee plenary session will begin at 8:30 a.m. Thursday, February 10th and conclude at 12 p.m. on Friday, February 11th.

ADDRESSES: The meeting will be held in Half Moon Bay, CA at the Half Moon Bay Lodge, located at 2400 S. Cabrillo Highway in the Club Conference Room.

Additional information can be obtained by writing the DFO at 1200 Pennsylvania Avenue, NW., (1301A), Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: The DFO for the Local Government Advisory Committee (LGAC) is Pamela Luttner (202) 564–3107.

Information on Services for the Handicapped: For information on facilities or services for the handicapped or to request special assistance at the meetings, contact the Designated Federal Officer at (202) 564–3107 as soon as possible.

Dated: January 12, 2005.

Pamela A. Luttner,

Designated Federal Officer, Local Government Advisory Committee.

Board of Scientific Counselors, Human Health Subcommittee Meetings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meetings.

SUMMARY: Pursuant to the Federal Advisory Committee Act, Public Law 92–463, the Environmental Protection Agency, Office of Research and Development (ORD), announces three meetings of the Board of Scientific Counselors (BOSC) Human Health Subcommittee.

DATES: Two teleconference call meetings will be held, the first on Tuesday, February 15, 2005, from 12 noon to 2 p.m., and the second on Thursday, February 24, 2005, from 12 noon to 2 p.m. A face-to-face meeting will be held beginning Monday, February 28, 2005 (8:30 a.m. to 5 p.m.), continuing on Tuesday, March 1, 2005 (8:30 a.m. to 5 p.m.), and concluding on Wednesday, March 2, 2005 (8:30 a.m. to 2 p.m.). All times noted are Eastern Standard Time. Meetings may adjourn early if all business is completed.

ADDRESSES: *Conference calls:* Participation in the conference calls will be by teleconference only—meeting rooms will not be used. Members of the public may obtain the call-in number and access code for the teleconference meeting from Virginia Houk, whose contact information is listed under the **FOR FURTHER INFORMATION CONTACT** section of this notice. Face-to-Face Meeting: The face-to-face meeting will be held at the U.S. EPA Research Triangle Park (RTP) Campus (Room C–111A/B/C), located at 109 T.W. Alexander Drive, Research Triangle Park, NC 27711.

Document Availability

Draft agendas for the meetings are available from Virginia Houk, whose contact information is listed under the **FOR FURTHER INFORMATION CONTACT** section of this notice. Requests for the draft agendas will be accepted up to 2 business days prior to each conference call/meeting date. The draft agendas also can be viewed through EDOCKET, as provided in Unit I.A. of the **SUPPLEMENTARY INFORMATION** section.

Any member of the public interested in making an oral presentation at one of the conference calls or at the face-to-face meeting may contact Virginia Houk, whose contact information is listed under the **FOR FURTHER INFORMATION CONTACT** section of this notice. Requests for making oral presentations will be accepted up to 2 business days prior to each conference call/meeting date. In general, each individual making an oral presentation will be limited to a total of three minutes.

Submitting Comments

Written comments may be submitted electronically, by mail, or through hand

delivery/courier. Follow the detailed instructions as provided in Unit I.B. of this section. Written comments will be accepted up to 2 business days prior to each conference call/meeting date.

FOR FURTHER INFORMATION CONTACT: Virginia Houk, Designated Federal Officer, Environmental Protection Agency, Office of Research and Development, Mail Code B305–02, Research Triangle Park, NC, 27711; telephone (919) 541–2815; fax (919) 685–3250; e-mail *houk.virginia@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

This notice announces three meetings of the BOSC Human Health Subcommittee. The purpose of the meetings are to evaluate EPA's Human Health Research Program. Proposed agenda items for the conference calls include, but are not limited to: charge questions, objective of program reviews, background on the U.S. EPA's Human Health Research Program, writing assignments, and planning for the face-to-face meeting. Proposed agenda items for the face-to-face meeting include, but are not limited to: presentations by key EPA staff involved in the Human Health Research Program, poster sessions on ORD's Human Health research, and preparation of the draft report. The conference calls and the face-to-face meeting are open to the public.

Information on Services for the Handicapped: Individuals requiring special accommodations at this meeting should contact Virginia Houk, Designated Federal Officer, at (919) 541–2815 at least five business days prior to the meeting so that appropriate arrangements can be made to facilitate their participation.

A. How Can I Get Copies of Related Information ?

1. *Docket.* EPA has established an official public docket for this action under Docket ID No. ORD–2005–0002. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Documents in the official public docket are listed in the index in EPA's electronic public docket and comment system, EDOCKET. Documents are available either electronically or in hard copy. Electronic documents may be viewed through EDOCKET. Hard copies of the draft agendas may be viewed at the Board of Scientific Counselors, Human Health Meetings Docket in the EPA Docket Center (EPA/DC), EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the ORD Docket is (202) 566–1752.

2. *Electronic Access.* You may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr/.*

An electronic version of the public docket is available through EDOCKET. You may use EDOCKET at *http://www.epa.gov/edocket/* to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select ''search,'' then key in the appropriate docket identification number (ORD–2005–0002).

For those wishing to make public comments, it is important to note that EPA's policy is that comments, whether submitted electronically or on paper, will be made available for public viewing in EPA's electronic public docket as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EPA's electronic public docket. The entire printed comment, including the copyrighted material, will be available in the public docket.

Public comments submitted on computer disks mailed or delivered to the docket will be transferred to EPA's electronic public docket. Written public comments mailed or delivered to the Docket will be scanned and placed in EPA's electronic public docket.

B. How and to Whom Do I Submit Comments?

You may submit comments electronically, by mail, or through hand delivery/courier. To ensure proper receipt by EPA, identify the appropriate docket identification number (ORD–2005–0002) in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period.

1. *Electronically.* If you submit an electronic comment as prescribed below, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment. Also include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment, and it allows EPA to contact you if further information on the substance of the comment is needed or if your comment cannot be read due to technical difficulties. EPA's policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

i. *EDOCKET.* Your use of EPA's electronic public docket to submit comments to EPA electronically is EPA's preferred method for receiving comments. Go directly to EDOCKET at *http://www.epa.gov/edocket/*, and follow the online instructions for submitting comments. To access EPA's electronic public docket from the EPA Internet Home Page, *http://www.epa.gov*, select ''Information Sources,'' ''Dockets,'' and ''EDOCKET.'' Once in the system, select ''search,'' and then key in Docket ID No. ORD–2005–0002. The system is an anonymous access system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.

ii. *E-mail.* Comments may be sent by electronic mail (e-mail) to *ORD.Docket@epa.gov*, Attention Docket ID No. ORD–2005–0002. In contrast to EPA's electronic public docket, EPA's e-mail system is not an anonymous access system. If you send an e-mail comment directly to the docket without going through EPA's electronic public docket, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

iii. *Disk or CD ROM.* You may submit comments on a disk or CD ROM mailed to the mailing address identified in Unit I.B.2. These electronic submissions will be accepted in Word, WordPerfect or rich text files. Avoid the use of special characters and any form of encryption.

2. *By Mail.* Send your comments to: U.S. Environmental Protection Agency, ORD Docket, EPA Docket Center (EPA/DC), Mailcode: 28221T, 1200 Pennsylvania Ave., NW, Washington, DC, 20460, Attention Docket ID No. ORD–2005–0002.

3. *By Hand Delivery or Courier.* Deliver your comments to: EPA Docket Center (EPA/DC), Room B102, EPA West Building, 1301 Constitution Avenue, NW., Washington, DC, Attention Docket ID No. ORD–2005–0002 (**note:** this is not a mailing address). Such deliveries are only accepted during the docket's normal hours of operation as identified in Unit I.A.1.

Dated: January 24, 2005.

Kevin Y. Teichman,

Director, Office of Science Policy.

[FR Doc. 05–1631 Filed 1–27–05; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[OPPT–2005–0002; FRL–7697–2]

Certain New Chemicals; Receipt and Status Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5 of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture (defined by statute to include import) a new chemical (i.e., a chemical not on the TSCA Inventory) to notify EPA and comply with the statutory provisions pertaining to the manufacture of new chemicals. Under sections 5(d)(2) and 5(d)(3) of TSCA, EPA is required to publish a notice of receipt of a premanufacture notice (PMN) or an application for a test marketing exemption (TME), and to publish periodic status reports on the chemicals under review and the receipt of notices of commencement to manufacture those chemicals. This status report, which covers the period from December 1, 2004 to December 14, 2004, consists of the PMNs pending or expired, and the notices of commencement to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period.

DATES: Comments identified by the docket ID number OPPT–2005–0002 and the specific PMN number or TME number, must be received on or before February 28, 2005.

ADDRESSES: Comments may be submitted electronically, by mail, or through hand delivery/courier. Follow the detailed instructions as provided in Unit I. of the **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Colby Lintner, Regulatory Coordinator, Environmental Assistance Division, Office of Pollution Prevention and Toxics (7408M), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (202) 554–1404; e-mail address: *TSCA-Hotline@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. As such, the Agency has not attempted to describe the specific entities that this action may apply to. Although others may be affected, this action applies directly to the submitter of the premanufacture notices addressed in the action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket.* EPA has established an official public docket for this action under docket identification (ID) number OPPT–2005–0002. The official public docket consists of the documents specifically referenced in this action, any public comments received, and other information related to this action. Although a part of the official docket, the public docket does not include Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The official public docket is the collection of materials that is available for public viewing at the EPA Docket Center, Rm. B102-Reading Room, EPA West, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The EPA Docket Center Reading Room telephone number is (202) 566–1744 and the telephone number for the OPPT Docket, which is located in EPA Docket Center, is (202) 566–0280.

2. *Electronic access.* You may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr/*.

An electronic version of the public docket is available through EPA's electronic public docket and comment system, EPA Dockets. You may use EPA Dockets at *http://www.epa.gov/edocket/* to submit or view public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. Once in the system, select ''search,'' then key in the appropriate docket ID number.

Certain types of information will not be placed in the EPA Dockets. Information claimed as CBI and other information whose disclosure is restricted by statute, which is not included in the official public docket, will not be available for public viewing in EPA's electronic public docket. EPA's policy is that copyrighted material will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. To the extent feasible, publicly available docket materials will be made available in EPA's electronic public docket. When a document is selected from the index list in EPA Dockets, the system will identify whether the document is available for viewing in EPA's electronic public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the docket facility identified in Unit I.B.1. EPA intends to work towards providing electronic access to all of the publicly available docket materials through EPA's electronic public docket.

For public commenters, it is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EPA's electronic public docket as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EPA's electronic public docket. The entire printed comment, including the copyrighted material, will be available in the public docket.

Public comments submitted on computer disks that are mailed or delivered to the docket will be transferred to EPA's electronic public docket. Public comments that are mailed or delivered to the docket will be scanned and placed in EPA's electronic public docket. Where practical, physical

objects will be photographed, and the photograph will be placed in EPA's electronic public docket along with a brief description written by the docket staff.

C. How and To Whom Do I Submit Comments?

You may submit comments electronically, by mail, or through hand delivery/courier. To ensure proper receipt by EPA, identify the appropriate docket ID number and specific PMN number or TME number in the subject line on the first page of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments. If you wish to submit CBI or information that is otherwise protected by statute, please follow the instructions in Unit I.D. Do not use EPA Dockets or e-mail to submit CBI or information protected by statute.

1. *Electronically*. If you submit an electronic comment as prescribed in this unit, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment. Also include this contact information on the outside of any disk or CD ROM you submit, and in any cover letter accompanying the disk or CD ROM. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. EPA's policy is that EPA will not edit your comment, and any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

i. *EPA Dockets*. Your use of EPA's electronic public docket to submit comments to EPA electronically is EPA's preferred method for receiving comments. Go directly to EPA Dockets at *http://www.epa.gov/edocket/*, and follow the online instructions for submitting comments. Once in the system, select ''search,'' and then key in docket ID number OPPT–2005–0002. The system is an ''anonymous access'' system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment.

ii. *E-mail*. Comments may be sent by e-mail to *oppt.ncic@epa.gov*, Attention: Docket ID Number OPPT–2005–0002 and PMN Number or TME Number. In contrast to EPA's electronic public docket, EPA's e-mail system is not an ''anonymous access'' system. If you send an e-mail comment directly to the docket without going through EPA's electronic public docket, EPA's e-mail system automatically captures your e-mail address. E-mail addresses that are automatically captured by EPA's e-mail system are included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

iii. *Disk or CD ROM*. You may submit comments on a disk or CD ROM that you mail to the mailing address identified in Unit I.C.2. These electronic submissions will be accepted in WordPerfect or ASCII file format. Avoid the use of special characters and any form of encryption.

2. *By mail*. Send your comments to: Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.

3. *By hand delivery or courier*. Deliver your comments to: OPPT Document Control Office (DCO) in EPA East Bldg., Rm. 6428, 1201 Constitution Ave., NW., Washington, DC. Attention: Docket ID Number OPPT–2005–0002 and PMN Number or TME Number. The DCO is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the DCO is (202) 564–8930.

D. How Should I Submit CBI to the Agency?

Do not submit information that you consider to be CBI electronically through EPA's electronic public docket or by e-mail. You may claim information that you submit to EPA as CBI by marking any part or all of that information as CBI (if you submit CBI on disk or CD ROM, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

In addition to one complete version of the comment that includes any information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket and EPA's electronic public docket. If you submit the copy that does not contain CBI on disk or CD ROM, mark the outside of the disk or CD ROM clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and EPA's electronic public docket without prior notice. If you have any questions about CBI or the procedures for claiming CBI, please consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

E. What Should I Consider as I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Provide specific examples to illustrate your concerns.

6. Offer alternative ways to improve the notice or collection activity.

7. Make sure to submit your comments by the deadline in this document.

8. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action and the specific PMN number you are commenting on in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. Why is EPA Taking this Action?

Section 5 of TSCA requires any person who intends to manufacture (defined by statute to include import) a new chemical (i.e., a chemical not on the TSCA Inventory to notify EPA and comply with the statutory provisions pertaining to the manufacture of new chemicals. Under sections 5(d)(2) and 5(d)(3) of TSCA, EPA is required to publish a notice of receipt of a PMN or an application for a TME and to publish periodic status reports on the chemicals under review and the receipt of notices of commencement to manufacture those chemicals. This status report, which covers the period from December 1, 2005 to December 14, 2005, consists of the PMNs pending or expired, and the notices of commencement to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period.

III. Receipt and Status Report for PMNs

This status report identifies the PMNs pending or expired, and the notices of

commencement to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period. If you are interested in information that is not included in the following tables, you may contact EPA as described in Unit II. to access additional non-CBI information that may be available.

In Table I of this unit, EPA provides the following information (to the extent that such information is not claimed as CBI) on the PMNs received by EPA during this period: the EPA case number assigned to the PMN; the date the PMN was received by EPA; the projected end date for EPA's review of the PMN; the submitting manufacturer; the potential uses identified by the manufacturer in the PMN; and the chemical identity.

I. 34 PREMANUFACTURE NOTICES RECEIVED FROM: 12/01/04 TO 12/14/04

Case No.	Received Date	Projected Notice End Date	Manufacturer/Importer	Use	Chemical
P–05–0159	12/01/04	02/28/05	CBI	(S) Resin for wood coatings	(G) Copolymer of acrylic and methacrylic esters

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Committee on Vital and Health Statistics: Meeting

Pursuant to the Federal Advisory Committee Act, the Department of Health and Human Services (HHS) announces the following advisory committee meeting.

Name: National Committee on Vital and Health Statistics (NCVHS), Subcommittee on Standards and Security (SSS).

Time and Date: February 1st, 2005 9 a.m.–5 p.m., February 2nd, 2005 9 a.m.–1 p.m.

Place: Hubert H. Humphrey Building, 200 Independence Avenue, SW., Room 505A, Washington, DC 20201.

Status: Open.

Purpose: The Subcommittee will continue to focus on potential e-prescribing standards, including a discussion on the use of RxNorm in the e-prescribing context and an update from the industry on the progress of related workgroups (e.g., codified SIG). The development of a draft recommendation letter to the HHS Secretary will be discussed.

Contact Person For More Information: Substantive program information as well as summaries of meetings and a roster of Committee members may be obtained from Maria Friedman, Health Insurance Specialist, Security and Standards Group, Centers for Medicare and Medicaid Services, MS: C5–24–04, 7500 Security Boulevard, Baltimore, MD 21244–1850, telephone: 410–786–6333 or Marjorie S. Greenberg, Executive Secretary, NCVHS, National Center for Health Statistics, Centers for Disease Control and Prevention, Room 1100, Presidential Building, 3311 Toledo Road, Hyattsville, Maryland 20782, telephone: (301) 458–4245. Information also is available on the NCVHS home page of the HHS Web site: *http://www.ncvhs.hhs.gov/* where an agenda for the meeting will be posted when available.

Should you require reasonable accommodation, please contact the CDC Office of Equal Employment Opportunity on (301) 458–4EEO (4336) as soon as possible.

Dated: January 14, 2005.

James Scanlon,

Acting Deputy Assistant Secretary for Science and Data Policy, Office of the Assistant Secretary for Planning and Evaluation.

[60Day–05–0263]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call (404) 371–5976 or send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS–D74, Atlanta, GA 30333 or send an e-mail to *omb@cdc.gov*.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information

on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Requirement for a Special Permit to Import Cynomolgus, African Green, or Rhesus Monkeys into the United States (0920–0263)—Revision—National Center for Infectious Diseases (NCID), Centers for Disease Control and Prevention (CDC).

A registered importer must request a special permit to import Cynomolgus, African Green, or Rhesus Monkeys. To receive a special permit to import nonhuman primates the importer must submit to the Director of CDC, a written plan which specifies the steps that will be taken to prevent exposure of persons and animals during the entire importation and quarantine process for the arriving nonhuman primates.

Under the special permit arrangement, registered importers must submit a plan to CDC for the importation and quarantine if they wish to import the specific monkeys covered. The plan must address disease prevention procedures to be carried out in every step of the chain of custody of such monkeys, from embarkation in the country of origin to release from quarantine. Information such as species, origin and intended use for monkeys, transit information, isolation and quarantine procedures, and procedures for testing of quarantined animals is necessary for CDC to make public health decisions. This information enables CDC to evaluate compliance with the standards and to determine whether the measures being taken to prevent exposure of persons and animals during importation are adequate. Once CDC is assured, through the monitoring of shipments (normally no more than 2), that the provisions of a special permit plan are being followed by a new permit holder and that the use of adequate disease control practices is being demonstrated, the special permit is extended to cover the receipt of additional shipments under the same plan for a period of 180 days, and may be renewed upon request. This eliminates the burden on importers to repeatedly report identical information, requiring only that specific shipment itineraries and information on changes to the plan which require approval be submitted.

Respondents are commercial or not-for-profit importers of nonhuman primates. The burden represents full submission of information and itinerary/change information respectively. There are no costs to respondents except for their time to complete the requisition process.

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Business (limited permit)	5	2	30/60	5
Businesses (extended permit)	1	3	10/60	.5
Organizations (limited permit)	3	2	30/60	3
Organizations (extended permit)	12	2	10/60	4
Total				12.5

Dated: January 21, 2005.

Betsey Dunaway,

Acting Reports Clearance Officer, Office of the Chief Science Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–R–50 and CMS–10054]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's function; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Medical Records Review under Inpatient PPS and Supporting Regulations in 42 CFR, Sections 412.40–412.52; *Form No:* CMS–R–50 (OMB# 0938–0359); *Use:* The Quality Improvement Organizations (QIOs) are authorized to conduct medical review activities under the Prospective Payment System (PPS). In order to conduct these review activities, CMS depends upon hospitals to make available specific records regarding care provided to Medicare beneficiaries. The Clinical Data Abstraction Centers (CDACs) obtain copies of medical records from which they abstract data to analyze patterns of care and outcomes for heart failure/myocardial infarction, pneumonia, diabetes and surgical infection; *Frequency:* When records are reviewed; *Affected Public:* Business or other for-profit, Not-for-profit institutions, Federal Government, and State, Local or Tribal Government; *Number of Respondents:* 6,100; *Total Annual Responses:* 397,500; *Total Annual Hours:* 11,925.

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Recognition of Payment for New Technology Services for Ambulatory Payment Classifications (APCs) Under the Outpatient Prospective Payment System and Supporting Regulations in 42 CFR, Sections 413.65 and 419.42; *Form Number:* CMS–10054 (OMB# 0938–0860); *Use:* Information is necessary to determine eligibility of medical devices for establishment of additional device categories for payment under transitional pass-through payment

provisions as required by section 1833(t)(6) of the Social Security Act. Transitional pass-through payments have been made to hospitals for certain drugs, biologicals, and medical devices; *Frequency:* On occasion; *Affected Public:* Business or other for-profit; *Number of Respondents:* 15; *Total Annual Responses:* 15; *Total Annual Hours:* 180.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS Web site address at *http://www.cms.hhs.gov/regulations/pra/,* or E-mail your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov,* or call the Reports Clearance Office on (410) 786–1326.

Written comments and recommendations for the proposed information collections must be mailed within 30 days of this notice directly to the OMB desk officer: OMB Human Resources and Housing Branch, Attention: Christopher Martin, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: January 19, 2005.

John P. Burke, III,

CMS Paperwork Reduction Act Reports Clearance Officer, Office of Strategic Operations and Regulatory Affairs, Regulations Development Group.

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare & Medicaid Services (CMS) is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Attending Physicians Statement and Documentation of Medicare Emergency and Supporting Regulations in 42 CFR, Section 424.103; *Use:* Payment may be made for certain part A inpatient hospital services and part B outpatient provided in a nonparticipating U.S. or foreign hospital when services are necessary to prevent the death or serious impairment of the health of the individual. This collection is used to document the attending physician's statement that the hospitalization was required due to an emergency and give clinical support for the claim.; *Form Number:* CMS–1771 (OMB#: 0938–0023); *Frequency:* On Occasion; *Affected Public:* Business or other for-profit; *Number of Respondents:* 200; *Total Annual Responses:* 200; *Total Annual Hours:* 50.

2. *Type of Information Collection Request:* Extension of a Currently Approved Collection; *Title of Information Collection:* Quality Improvement Organization (QIO) Assumption of Responsibilities and Supporting Regulations in 42 CFR Sections 412.44, 412.46, 431.630, 476.71, 476.73, 476.74, 476.78; *Form No.:* CMS–R–71 (OMB# 0938–0445); *Use:* This collection describes the review functions to be performed by the QIO. It outlines relationships among QIOs, providers, practitioners, beneficiaries, intermediaries, and carriers. QIOs assure that covered care provided to Medicare patients is reasonable, medically necessary, appropriate, and of a quality that meets professionally recognized standards of care, and that inpatient services could not be more appropriately provided on an outpatient basis or in a different type of facility.; *Frequency:* As Needed; *Affected Public:* Business or other for-profit; *Number of Respondents:* 6,036; *Total Annual Responses:* 6,036; Total Annual Hours: 81,818.

3. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Independent Rural Health Center/Freestanding Federally Qualified Health Center Cost Report and Supporting Regulations in 42 CFR, Section 413.20 and 413.24; *Form No.:* CMS–222 (OMB#0938–0107); *Use:* The independent rural health clinic/freestanding federally qualified health center cost report is the cost report to be used by the mentioned clinics/centers to submit annual information. This information is used to achieve a settlement of costs for health care services rendered to Medicare beneficiaries. *Frequency:* Annually; *Affected Public:* Not-for-Profit institutions, Business or other for-profit, and State, local or tribal government; *Number of Respondents:* 3,000; *Total Annual Responses:* 3,000; *Total Annual Hours Requested:* 150,000.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS'' Web site address at *http://www.cms.hhs.gov/regulations/pra/,* or E-mail your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov,* or call the Reports Clearance Office on (410) 786–1326.

Written comments and recommendations for the proposed information collections must be mailed within 60 days of this notice directly to the CMS Paperwork Reduction Act Reports Clearance Officer designated at the address below: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Melissa Musotto, Room C5–14–03, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Dated: January 19, 2005.

BILLING CODE 4120–03–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare and Medicaid Services

[Document Identifier: CMS–10132]

Emergency Clearance: Public Information Collection Requirements Submitted to the Office of Management and Budget (OMB)

Agency: Center for Medicare and Medicaid Services, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare and Medicaid services (CMS), Department of Health

and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

We are requesting an emergency review of the information collection referenced below. In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, we have submitted to the Office of Management and Budget (OMB) the following requirements for emergency review. We are requesting an emergency review because the collection of this information is needed before the expiration of the normal time limits under OMB's regulations at 5 CFR part 1320. This is necessary to ensure compliance with an initiative of section 641 of the Medicare Modernization Act of 2003. We cannot reasonably comply with the normal clearance procedures because the normal procedures are likely to cause a statutory deadline to be missed.

Section 641 of the MMA provides for the implementation of a demonstration in which Medicare would pay for selected self-administered drugs or biologicals that replace currently-covered Part B drugs. Apart from under this demonstration, Medicare outpatient drug coverage is limited to drugs that are provided incident to a physician's service or are oral cancer drugs with the same chemical composition as physician-administered agents. This demonstration project offers temporary, early coverage for selected prescription drugs before the new prescription drug benefit (Medicare Part D) begins in January 2006. The evaluation is required to address the effects of the program on beneficiary access, outcomes, and costs. Survey results are necessary for CMS to complete its mandated Report to Congress. The survey also represents a unique opportunity to inform CMS on the magnitude of effects on access and health status that result from expanding coverage of a select set of drugs to a well-defined group or seriously ill beneficiaries, and to provide CMS information on how enrollees learned about the demonstration.

CMS is requesting OMB review and approval of this collection by March 1, 2005, with a 180-day approval period. Written comments and recommendations will be considered from the public if received by the individuals designated below by January 31, 2005.

Type of Information Collection Request: New collection; *Title of Information Collection:* Beneficiary Survey on the Medicare Replacement Drug Demonstration; *Use:* The statute authorizing the Medicare Replacement Drug Demonstration mandates a report to Congress on the effects of the demonstration, to be submitted not later than July 2006. This report is to include an evaluation of patient access to care and patient outcomes under the project. The Medicare Replacement Drug Demonstration Evaluation is necessary to collect information on the demonstration's effects on access and outcomes for this report; *Form Number:* CMS–10132 (OMB#: 0938–NEW); *Frequency:* Other—once per beneficiary; *Affected Public:* Individuals or Households; *Number of Respondents:* 3200; *Total Annual Responses:* 3200; *Total Annual Hours:* 800. We have submitted a copy of this notice to OMB for its review of these information collections. A notice will be published in the **Federal Register** when approval is obtained.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS' Web site address at *http://www.cms.hhs.gov/regulations/pra* or E-mail your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov*, or call the Reports Clearance Office on (410) 786–1326.

Interested persons are invited to send comments regarding the burden or any other aspect of these collections of information requirements. However, as noted above, comments on these information collection and recordkeeping requirements must be mailed and/or faxed to the designees referenced below by January 31, 2005:

Centers for Medicare and Medicaid Services, Office of Strategic Operations and Regulatory Affairs, Room C5–13–27, 7500 Security Boulevard, Baltimore, MD 21244–1850, Fax Number: (410) 786–0262, Attn: William N. Parham, III, CMS–10056.

and,

OMB Human Resources and Housing Branch, Attention: Christopher Martin, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: January 13, 2005.

Dawn Willinghan,

Acting, CMS Paperwork Reduction Act Reports Clearance Officer, Office of Strategic Operations and Regulatory Affairs, Regulations Development Group.

Medicare Program: Re-Chartering of the Advisory Panel on Medicare Education (APME) and Notice of the APME Meeting—February 24, 2005

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice of meeting.

SUMMARY: This notice announces the renewal of the charter of the Advisory Panel on Medicare Education (the Panel). The Panel advises and makes recommendations to the Secretary of the Department of Health and Human Services and the Administrator of the Centers for Medicare & Medicaid Services on opportunities to enhance the effectiveness of consumer education strategies concerning the Medicare program. The charter renewal was signed by the Secretary on January 14, 2005. The charter will terminate on January 14, 2007, unless renewed by the Secretary.

In accordance with the Federal Advisory Committee Act, 5 U.S.C. Appendix 2, section 10(a) (Pub. L. 92–463), this notice also announces a meeting of the Panel on February 24, 2005. This meeting is open to the public.

DATES: The meeting is scheduled for February 24, 2005 from 9 a.m. to 4 p.m., e.s.t.

Deadline for Presentations and Comments: February 17, 2005, 12 noon, e.s.t.

ADDRESSES: The meeting will be held at the Loews L'Enfant Plaza Hotel, 480 L'Enfant Plaza, Washington, DC 20024, (202) 484–1000.

FOR FURTHER INFORMATION CONTACT: Lynne Johnson, Health Insurance Specialist, Division of Partnership Development, Center for Beneficiary

Choices, Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Mail stop S2–23–05, Baltimore, MD 21244–1850, (410) 786–0090. Please refer to the CMS Advisory Committees' Information Line (1–877–449–5659 toll free)/(410–786–9379 local) or the Internet (*http://www.cms.hhs.gov/faca/apme/default.asp*) for additional information and updates on committee activities, or contact Ms. Johnson via e-mail at ljohnson3@cms.hhs.gov.

Press inquiries are handled through the CMS Press Office at (202) 690–6145.

SUPPLEMENTARY INFORMATION: Section 222 of the Public Health Service Act (42 U.S.C. 217a), as amended, grants to the Secretary of the Department of Health and Human Services (the Secretary) the authority to establish an advisory panel if the Secretary finds the panel necessary and in the public interest. The Secretary signed the charter establishing the Advisory Panel on Medicare Education (the Panel) on January 21, 1999 and approved the renewal of the charter on January 14, 2005. The Panel advises and makes recommendations to the Secretary and the Administrator of the Centers for Medicare & Medicaid Services (CMS) on opportunities to enhance the effectiveness of consumer education strategies concerning the Medicare program.

The goals of the Panel are as follows:

- To develop and implement a national Medicare education program that describes the options for selecting a health plan under Medicare.
- To enhance the Federal government's effectiveness in informing the Medicare consumer, including the appropriate use of public-private partnerships.
- To expand outreach to vulnerable and underserved communities, including racial and ethnic minorities, in the context of a national Medicare education program.
- To assemble an information base of best practices for helping consumers evaluate health plan options and build a community infrastructure for information, counseling, and assistance.

The current members of the Panel are: Dr. Drew E. Altman, President and Chief Executive Officer, Henry J. Kaiser Family Foundation; James L. Bildner, Chairman and Chief Executive Officer, New Horizons Partners, LLC; Dr. Jane Delgado, Chief Executive Officer, National Alliance For Hispanic Health; Clayton Fong, President and Chief Executive Officer, National Asian Pacific Center on Aging; Thomas Hall, Chairman and Chief Executive Officer, Cardio-Kinetics, Inc.; Bobby Jindal; David Knutson, Director, Health System Studies, Park Nicollet Institute for Research and Education; Dr. David Lansky, Director, Health Program, Markle Foundation; Donald J. Lott, Executive Director, Indian Family Health Clinic; Dr. Frank I. Luntz, President and Chief Executive Officer, Luntz Research Companies; Dr. Daniel Lyons, Senior Vice President, Government Programs, Independence Blue Cross; Katherine Metzger, Director, Medicare and Medicaid Programs, Fallon Community Health Plan; Dr. Keith Mueller, Professor and Section Head, Health Services Research and Rural Health Policy, University of Nebraska; David Null, Financial Advisor, Merrill Lynch; Lee Partridge, Senior Health Policy Advisor, National Partnership for Women and Families; Dr. Marlon Priest, Professor of Emergency Medicine, University of Alabama at Birmingham; Susan O. Raetzman, Associate Director, Public Policy Institute, AARP; Catherine Valenti, Chairperson and Chief Executive Officer, Caring Voice Coalition; and Grant Wedner, Senior Director, New Services Department, WebMD.

The agenda for the February 24, 2005 meeting will include the following:

- Recap of the previous (November 30, 2004) meeting.
- Centers for Medicare & Medicaid Services update.
- Medicare Modernization Act: education and outreach strategies.
- Public comment.
- Listening session with CMS leadership.
- Next steps.

Individuals or organizations that wish to make a 5-minute oral presentation on an agenda topic should submit a written copy of the oral presentation to Lynne Johnson, Health Insurance Specialist, Division of Partnership Development, Center for Beneficiary Choices, Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Mail stop S2–23–05, Baltimore, MD 21244–1850 or by e-mail at *ljohnson3@cms.hhs.gov* no later than 12 noon, e.s.t., February 17, 2005. The number of oral presentations may be limited by the time available. Individuals not wishing to make a presentation may submit written comments to Ms. Johnson by 12 noon, e.s.t., February 17, 2005. The meeting is open to the public, but attendance is limited to the space available.

Special Accommodation: Individuals requiring sign language interpretation or other special accommodations should contact Ms. Johnson at least 15 days before the meeting.

Authority: Sec. 222 of the Public Health Service Act (42 U.S.C. 217a) and sec. 10(a) of Pub. L. 92–463 (5 U.S.C. App. 2, sec. 10(a) and 41 CFR 102–3).

(Catalog of Federal Domestic Assistance Program No. 93.733, Medicare—Hospital Insurance Program; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: January 19, 2005.

Centers for Medicare & Medicaid Services

[CMS–5037–N]

Medicare Program; Demonstration of Coverage of Chiropractic Services Under Medicare

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces the implementation of a demonstration mandated under Section 651 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173), which will expand coverage of chiropractic services under Medicare beyond the current coverage for manipulation to correct a neuromusculoskeletal condition. Chiropractors will be permitted to bill Medicare for diagnostic and other services that a chiropractor is legally authorized to perform by the State or jurisdiction in which such treatment is provided. The demonstration will be conducted in four sites, two urban and two rural; one site in each area type must be a health professional shortage area (HPSA).

Any chiropractor that provides services in these geographic areas will be able to participate in the demonstration. Any beneficiary enrolled under Medicare Part B, and served by chiropractors practicing in these sites would be eligible to receive services. Physician approval would not be required for these services. The statute requires that the demonstration be budget neutral. We anticipate that the demonstration will begin in April 2005 and operate for two years.

ADDRESSES:

1. *By Mail:* Written inquiries regarding this demonstration must be submitted by mail to the following address:

Centers for Medicare & Medicaid Services, Attn: Sidney Trieger, Division of Health Promotion and Disease Prevention Demonstrations, Office of Research, Development, and Information, Centers for Medicare & Medicaid Services, S3–02–01, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Please allow sufficient time for mailed information to be received in a timely manner in the event of delivery delays.

2. *E-mail:* Inquiries may be sent to the following e-mail address: *MMA_section_651@cms.hhs.gov.*

FOR FURTHER INFORMATION CONTACT: Julie Jones, (410) 786–3039 or Sidney Trieger, (410) 786–6613.

SUPPLEMENTARY INFORMATION:

I. Background

Section 651 of the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (MMA) (Pub. L. 108–173) provides for a two-year demonstration to evaluate the feasibility and advisability of covering chiropractic services under Medicare. These services extend beyond the current coverage for manipulation to correct neuromusculoskeletal conditions typical among eligible beneficiaries, and would cover diagnostic and other services that a chiropractor is legally authorized to perform by the State or jurisdiction in which the treatment is provided. Physician approval would not be required for these services. The demonstration must be budget neutral and will be conducted in four sites, two rural and two urban; one site of each area type must be a health professional shortage area (HPSA).

Current Medicare coverage for chiropractic care is limited to manual manipulation of the spine to correct a subluxation, which chiropractors define as a malfunction of the spine. The three currently covered CPT codes are 98940 (manipulative treatment, 1–2 regions of the spine), 98941 (manipulative treatment, 3–4 regions of the spine), and 98942 (manipulative treatment, 5 regions of the spine).

Treatment must be provided for an active subluxation and not for prevention or maintenance. Treatment of the subluxation must be related to a neuromusculoskeletal condition where there is a reasonable expectation of recovery or functional improvement. Chiropractors are required to document the patient's complaint and establish a treatment plan, which includes the expected duration and frequency of treatment, specific goals and measures of effectiveness. This information must be maintained in the medical record and made available to Medicare upon request. Patients do not need a medical physician referral for treatment by a chiropractor under fee-for-service; some Medicare Advantage (MA) plans may require an enrollee to obtain a referral before seeing a chiropractor. In addition, some MA plans do not have chiropractors in their networks and allow osteopaths to provide manipulative services.

II. Provisions of the Notice

A. Covered Services

To determine which services will be covered, we conducted a literature review of the evidence of the effectiveness of chiropractor services. We held discussions with the American Chiropractic Association (ACA) and also reviewed the current coverage of chiropractor services with the Department of Defense and the Veterans Administration. In addition, we convened an Open Door Forum in November 2004 to invite comments on our proposed design for the demonstration. Based on these discussions, the evidence for effectiveness of chiropractic care, and current Medicare policy, the following guidelines for the demonstration were developed:

1. Services must be related to active treatment, not maintenance or prevention. This follows current Medicare coverage for similar services, such as physical therapy. Medicare does not authorize payment for maintenance therapies for other providers. We will require that all claims under the demonstration will have the active therapy (AT) modifier.

2. The demonstration will expand the services chiropractors are allowed to provide in the demonstration only to treatment of neuromusculoskeletal conditions, but not to other conditions. We have found no literature that provides conclusive evidence that chiropractic services are effective for treatment of other diagnoses.

3. Under the demonstration chiropractors can provide plain x-rays, electromyography (EMG) tests and nerve conduction studies; order magnetic resonance imaging (MRI) scans and computed tomography (CT) scans; as well as order or provide laboratory tests (where the applicable State practice act permits chiropractors to provide these services). These diagnostic services are related to the diagnosis and treatment of neuromusculoskeletal conditions. No limits will be imposed on chiropractors for providing diagnostic services, unless limits exist for other providers delivering these services.

4. The demonstration will cover CPT code 98943 for extraspinal manipulation, as it is a recognized procedure for treating neuromusculoskeletal conditions. It will also expand coverage to include other services chiropractors are legally allowed to provide and Medicare currently covers. These procedures include electrotherapy, ultrasound, transcutaneous electrical nerve stimulation (TENS) therapy, and other services that are medically necessary for the treatment of neuromusculoskeletal conditions. Chiropractors delivering these services will be subject to the same payment policies as other Medicare clinicians currently delivering these services. These requirements can be found in the Medicare Benefit Policy Manual 100–2 in Chapter 15, Sections 220 and 230 and the Medicare Claims Processing Manual 100–4 in Chapter 4, Section 20 and other manual sections. For example, physical and occupational therapy services must be identified through the use of modifiers GP and GO respectively. Chiropractors will also be allowed to make referrals for these therapy services.

5. Chiropractors would also be reimbursed for evaluation and management (E&M) services delivered for neuromusculoskeletal conditions.

Under the demonstration, chiropractors would be allowed to bill Medicare for treatment in addition to an E&M visit on the same day the first time they assess a patient, and thereafter only when they assess a patient for a new, separate problem not currently being treated. The current E&M CPT codes will apply.

We will require chiropractors to submit claims for demonstration services separately from claims for currently covered services (CPT codes 98940, 98941, and 98942). Chiropractors will have to add demonstration code 45 to all demonstration claims in order to be reimbursed for demonstration services.

B. Managed Care Plans

The legislation requires that the same demonstration benefits be offered under MA plans as for Medicare fee for service beneficiaries. Because participation of managed care plans is voluntary, we cannot require plans to participate in the demonstration. We therefore plan to approach MA plans in the demonstration site areas to determine if they would offer demonstration services to beneficiaries, but we will not change the MA plan rates since the demonstration is required to be budget neutral.

C. Payment Rates

The payment rates for demonstration services will be the same as under the physician fee schedule.

D. Budget Neutrality

The statute requires the Secretary to ensure that the aggregate payments made under the Medicare program do not exceed the amount that would have been paid under the Medicare program in the absence of this demonstration.

Ensuring budget neutrality requires that the Secretary develop a strategy for recouping funds should the demonstration result in costs higher than would occur in the absence of the demonstration. We will first determine over the two-year demonstration whether the demonstration was budget neutral. If the demonstration is not budget neutral, we plan to meet the legislative requirements by making adjustments in the national chiropractor fee schedule to recover the costs of the demonstration in excess of the amount estimated to yield budget neutrality. We will assess budget neutrality by determining the change in costs based on a pre-post comparison of costs and the rate of change for specific diagnoses that are treated by chiropractors and physicians in the demonstration sites and control sites. We will not limit our analysis to reviewing only chiropractor claims because the costs of the expanded chiropractor services may have an impact on other Medicare costs.

A CMS evaluation contractor will conduct the analysis of claims and budget neutrality. Since it will take approximately two years to complete the claims analysis, we anticipate that any necessary reduction will be made in the 2010 and 2011 fee schedules. If we determine that the adjustment for budget neutrality would be greater than two percent of the chiropractor fee schedule, we will implement the adjustment over a two-year period. However, if the adjustment is less than two percent of the chiropractor fee schedule, we will implement the adjustment over a one-year period. We will include the detailed analysis of budget neutrality and the proposed offset in the 2009 **Federal Register** publication of the physician fee schedule.

We invite comments regarding the appropriate methodology for determining budget neutrality. Written materials may be submitted by mail or e-mail to the addresses listed in the **ADDRESSES** section of this notice.

E. Site Selection

The statute requires that this demonstration be conducted in four sites—two rural and two urban; one site in each type of area must be a health professional shortage area (HPSA). We have selected:

- 26 northern counties in Illinois which includes Cook, Dekalb, DuPage, Grundy, Kane, Kendall, McHenry, Will, Boone, Bureau, Carroll, Henry, JoDaviess, Kankakee, Lake, LaSalle, Lee, Marshall, Mercer, Ogle, Putnam, Rock Island, Stark, Stephenson, Whiteside, and Winnebago, and Scott county in Iowa (urban);
- 17 central HPSA counties in Richmond, Charlottesville, Lynchburg, and Danville MSAs in Virginia (urban HPSA)—the Virginia counties include Pittsylvania, Campbell, Appomattox, Nelson, Buckingham, Fluvanna, Louisa, Caroline, Hanover, New Kent, Henrico, Richmond City, Goochland, Cumberland, Powhatan, Amelia and Danville City;
- New Mexico (rural HPSA); and
- Maine (rural).

We first grouped States by Medicare carriers, because we determined it was important that control and experimental sites should have the same carriers (since some carriers impose limits on chiropractor claims they approve). We then determined appropriate sites based on the following criteria:

- Exclude States with restrictive practice regulations.
- Exclude States that will not have transitioned to the MCS system in time for the demonstration.
- Exclude States that are ranked in the top or bottom 5 values for two or more of the following six statistics:

—Medicare per capita claims costs
—Medicare per capita chiropractic costs
—Per user (patient) chiropractic costs based on carrier data
—Chiropractic service users as a percentage of Part B beneficiaries
—Chiropractors per 10,000 State population
—Chiropractors per 1,000 Part B beneficiaries

- Exclude States among those remaining that are served by a unique carrier and, thus, would lack a potential comparison site.
- Each carrier group was assessed to determine its ability to support treatment and comparison groups for one or more types of sites.
- Data was then used to estimate the number of beneficiaries residing in Urban/Rural and HPSA/non HPSA areas and determine which of the remaining States could support a demonstration site or sites.

Few States had enough beneficiaries residing in HPSAs to be considered for one of the HPSA demonstration sites.

III. Collection of Information Requirements

This document does not impose information collection and record-keeping requirements. Consequently, it does not need to be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995.

Authority: Section 651 of the Medicare Prescription Drug Improvement and Modernization Act of 2003 (Pub. L. 108–173).

[CMS–5033–N2]

Medicare Program; Meeting of the Advisory Board on the Demonstration of a Bundled Case-Mix Adjusted Payment System for End-Stage Renal Disease Services

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces the first public meeting of the Advisory Board on the Demonstration of a Bundled Case-Mix Adjusted Payment System for End-Stage Renal Disease (ESRD) Services. Notice of this meeting is required by the Federal Advisory Committee Act (5 U.S.C. App. 2, section 10(a)(1) and (a)(2)). The Advisory Board will provide advice and recommendations with respect to the establishment and operation of the demonstration mandated by section 623(e) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003. This notice also announces the appointment of eleven individuals to serve as members of the Advisory Board, including one individual to serve as co-chairperson, and one additional co-chairperson, who is employed by CMS.

DATES: The meeting is on February 16, 2005 from 9 a.m. to 5 p.m., eastern standard time.

Special Accomodations: Persons attending the meeting, who are hearing

or visually impaired, or have a condition that requires special assistance or accommodations, are asked to notify Pamela Kelly by February 8, 2005 by e-mail at *ESRDAdvisoryBoard@cms.hhs.gov* or by telephone at (410) 786–2461.

ADDRESSES: The meeting will be held at the Hyatt Regency, 300 Light Street, Baltimore, MD 21202.

Attendance is limited to the space available, so seating will be on a first come, first served basis.

Web site: Up-to-date information on this meeting is located at *http://www.cms.hhs.gov/faca/esrd.*

Hotline: Up-to-date information on this meeting is located on the CMS Advisory Committee Hotline at 1 (877) 449–5659 (toll free) or in the Baltimore area at (410) 786–9379.

FOR FURTHER INFORMATION CONTACT: Pamela Kelly by e-mail at *ESRDAdvisoryBoard@cms.hhs.gov* or telephone at (410) 786–2461. The CMS Press Office at (202) 690–6145.

SUPPLEMENTARY INFORMATION: On June 2, 2004, we published a **Federal Register** notice requesting nominations for individuals to serve on the Advisory Board on the Demonstration of a Bundled Case-Mix Adjusted Payment System for End-Stage Renal Disease (ESRD) Services. The June 2, 2004 notice also announced the establishment of the Advisory Board and the signing by the Secretary on May 11, 2004 of the charter establishing the Advisory Board. This notice announces the first public meeting of this Advisory Board and the appointment of eleven individuals to serve as members of the Advisory Board on the Demonstration of a Bundled Case-Mix Adjusted Payment System for ESRD Services, including one individual to serve as co-chairperson, and one additional co-chairperson, who is employed by CMS.

I. Members of the Advisory Board

The Advisory Board on the Demonstration of a Bundled Case-Mix Adjusted Payment System for ESRD Services members are: Dr. Robert Rubin (Co-Chairperson), Clinical Professor of Medicine at Georgetown University School of Medicine; Dr. John Burkart, Professor of Internal Medicine/Nephrology at Wake Forest University; Tom Cantor, Owner of Scantibodies Laboratory; Paula Cuellar, RN, Dialysis Care Center Director for the University of Chicago Hospitals; Paul Eggers, Program Director for Kidney and Urology Epidemiology, National Institute for Diabetes and Digestive and Kidney Diseases, National Institute of Health; Bonnie Greenspan, Health Care Consultant; Dr. Michael J. Lazarus, Chief Medical Officer and Senior Vice President of Clinical Quality, Fresenius Medical Care NA; Dr. William Owen, Adjunct Professor of Medicine, Duke University School of Medicine, and Senior Scholar, Fuqua School of Business; Nancy Ray, Research Director for the Medicare Payment Advisory Commission; Kris Robinson, Executive Director of the American Association of Kidney Patients; and Dr. Jay Wish, President of ESRD Networks 9 and 10. The Advisory Board will also be co-chaired by Brady Augustine, a CMS employee.

II. Topics of the Advisory Board Meeting

The Advisory Board on the Demonstration of a Bundled Case-Mix Adjusted Payment System for ESRD Services will study and make recommendations on the following issues:

- The drugs, biologicals, and clinical laboratory tests to be bundled into the demonstration payment rates.
- The method and approach to be used for the patient characteristics to be included in the fully case-mix adjusted demonstration payment system.
- The manner in which payment for bundled services provided by non-demonstration providers should be handled for beneficiaries participating in the demonstration.
- The feasibility of providing financial incentives and penalties to organizations operating under the demonstration that meet or fail to meet applicable quality standards.
- The specific quality standards to be used.
- The feasibility of using disease management techniques to improve quality and patient satisfaction and reduce costs of care for the beneficiaries participating in the demonstration.
- The selection criteria for demonstration organizations.

III. Procedure and Agenda of the Advisory Board Meeting

This meeting is open to the public. First, the appointees will be sworn in by a Federal Official. Each Advisory Board member will then be given the opportunity to make a self-introduction. The Advisory Board will hear background presentations from CMS. The Advisory Board will then deliberate openly on the general topic and will make recommendations on specific topics for future meetings. The Advisory Board will also allow a 30-minute open public session. Interested parties may speak or ask questions during the public comment period. Comments may be limited by the time available. Written questions should be submitted by February 8, 2005 to *ESRDAdvisoryBoard@cms.hhs.gov.* Parties may also submit written comments following the meeting to the contact listed under the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Authority: 5 U.S.C. App. 2, section 10(a).

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–3150–N]

Medicare Program; Meeting of the Medicare Coverage Advisory Committee—March 29, 2005

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces a public meeting of the Medicare Coverage Advisory Committee (MCAC). The Committee provides advice and recommendations about whether scientific evidence is adequate to determine whether certain medical items and services are reasonable and necessary under the Medicare statute. This meeting concerns usual care of chronic wounds. Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. App. 2, section 10(a)).

DATES: The public meeting will be held on Tuesday, March 29, 2005 from 7:30 a.m. until 4:30 p.m. e.s.t.

Deadline for Presentations and Comments: Written comments and presentations must be received by February 3, 2005, 5 p.m., e.s.t.

Special Accommodations: Persons attending the meeting who are hearing or visually impaired, or have a condition that requires special assistance or accommodations, are asked to notify the Executive Secretary by February 3, 2005 (*see* **FOR FURTHER INFORMATION CONTACT**).

ADDRESSES: The meeting will be held in the auditorium at the Centers for

Medicare & Medicaid Services, 7500 Security Blvd, Baltimore, MD 21244.

Presentations and Comments: Interested persons may present data, information, or views orally or in writing on issues pending before the Committee. Please submit written comments to Kimberly Long, by e-mail at *klong@cms.hhs.gov* or by mail to the Executive Secretary for MCAC, Coverage and Analysis Group, Office of Clinical Standards and Quality, Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Mail Stop C1–09–06, Baltimore, MD 21244.

Web site: You may access up-to-date information on this meeting at *www.cms.hhs.gov/mcac/default.asp#meetings.*

Hotline: You may access up-to-date information on this meeting on the CMS Advisory Committee Information Hotline, 1–877–449–5659 (toll free) or in the Baltimore area (410) 786–9379.

FOR FURTHER INFORMATION CONTACT: Kimberly Long, Executive Secretary, by telephone at 410–786–5702 or by e-mail at *klong@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION: On December 14, 1998, we published a notice in the **Federal Register** (63 FR 68780) to describe the Medicare Coverage Advisory Committee (MCAC), which provides advice and recommendations to us about clinical issues. This notice announces a public meeting of the Committee.

Meeting Topic: The Committee will discuss evidence, hear presentations and public comment and make recommendations regarding the standard treatment of chronic wounds. Discussion will address such usual care treatment as cleansing, debridement, dressings, compression, off-loading and antibiotics. Members will also review factors necessary for quality clinical trials that address other wound healing technologies. The Committee will not discuss other treatments that may be used when wounds do not heal.

Background information about this topic, including panel materials, is available on the Internet at *http://www.cms.hhs.gov/coverage/.*

Procedure: This meeting is open to the public. The Committee will hear oral presentations from the public for approximately 45 minutes. The Committee may limit the number and duration of oral presentations to the time available. If you wish to make formal presentations, you must notify the Executive Secretary named in the **FOR FURTHER INFORMATION CONTACT** section and submit the following by the *Deadline for Presentations and Comments* date listed in the **DATES** section of this notice: a brief statement of the general nature of the evidence or arguments you wish to present, and the names and addresses of proposed participants. A written copy of your presentation must be provided to each Committee member before offering your public comments. Your presentation must address the questions asked by CMS to the Committee. The questions will be available on our Web site at *http://www.cms.hhs.gov/mcac/default.asp* meetings. If the specific questions are not addressed, your presentation will not be accepted. We request that you declare at the meeting whether or not you have any financial involvement with manufacturers of any items or services being discussed (or with their competitors).

After the public and CMS presentations, the Committee will deliberate openly on the topic. Interested persons may observe the deliberations, but the Committee will not hear further comments during this time except at the request of the chairperson. The Committee will also allow a 15-minute unscheduled open public session for any attendee to address issues specific to the topic. At the conclusion of the day, the members will vote and the Committee will make its recommendation.

Registration Instructions

The Coverage and Analysis Group is coordinating meeting registration. While there is no registration fee, individuals must register to attend. You may register by contacting Maria Ellis at 410–786–0309, mailing address: Coverage and Analysis Group, OCSQ; Centers for Medicare & Medicaid Services; 7500 Security Blvd, Mailstop: C1–09–06; Baltimore, MD 21244, or by e-mail at *Mellis@cms.hhs.gov.* Please provide your name, address, organization, telephone and fax number, and e-mail address.

You will receive a registration confirmation with instructions for your arrival at the CMS complex. You will be notified if the seating capacity has been reached.

Because the meeting is located on Federal property, for security reasons, any persons wishing to attend this meeting must register by close of business on January 17, 2005. In order to gain access to the building and grounds, participants must show to the Federal Protective Service or guard service personnel, government-issued photo identification and a copy of their registration confirmation. Individuals who have not registered in advance will not be allowed to enter the building to attend the meeting.

Authority: 5 U.S.C. App. 2, section 10(a).

(Catalog of Federal Domestic Assistance Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: January 21, 2005.

Sean R. Tunis,

Director, Office of Clinical Standards and Quality, Centers for Medicare & Medicaid Services.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 2005N–0010]

High Chemical Co. et al.; Proposal to Withdraw Approval of 13 New Drug Applications; Opportunity for a Hearing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for a hearing on the agency's proposal to withdraw approval of 13 new drug applications (NDAs) from multiple sponsors. The basis for the proposal is that the sponsors have repeatedly failed to file required annual reports for these applications.

DATES: Submit written requests for a hearing by February 28, 2005; submit data and information in support of the hearing request by March 29, 2005.

ADDRESSES: Requests for a hearing, supporting data, and other comments are to be identified with Docket No. 2005N–0010 and submitted to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Florine P. Purdie, Center for Drug Evaluation and Research (HFD–7), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–594–2041.

SUPPLEMENTARY INFORMATION: The holders of approved applications to market new drugs for human use are required to submit annual reports to FDA concerning each of their approved applications in accordance with § 314.81 (21 CFR 314.81). The holders of the approved applications listed in the following table have failed to submit the required annual reports and have not responded to the agency's request by certified mail for submission of the reports.

Application No.	Drug	Applicant
NDA 0–763	Sterile Solution Procaine Injection 2% (Procaine Hydrochloride (HCl))	High Chemical Co., 1760 N. Howard St., Philadelphia, PA 19122
NDA 2–959	Nicotinic Acid (Niacin) Tablets	The Blue Line Chemical Co., 302 South Broadway, St. Louis, MO 63102
NDA 4–236	Sherman (thiamine HCl) Elixir	Do.
NDA 4–368	Ascorbic Acid Tablets	Do.
NDA 5–159	D.S.D. (diethylstilbestrol dipropionate)	Do.
NDA 9–452	Multifuge (piperazine citrate) Syrup	Do.
NDA 10–055	Fire Gard Three-Alarm Burn Relief (Methylcellulose)	Gard Products, Inc., 2560 Tara Lane, Brunswick, GA 31520
NDA 10–337	Fling Antiperspirant Foot Powder	Bauer & Black, A Division of The Kendall Co., One Federal St., Boston, MA 02110
NDA 10–541	BY–NA–MID (Butylphenamide or B and Zinc Oxide or Stearate) Tincture, Ointment, Lotion, and Powder	Miles Inc., Cutter Biological, P.O. Box 1986, Berkeley, CA 94701
NDA 10–823	BIKE Foot and Body Powder	Bauer & Black, A Division of The Kendall Co.
NDA 10–824	BIKE Anti-Fungal Aerosol Spray	Do.
NDA 11–233	TKO with Entrin Roll-On Liquid	Modern-Labs, Inc., Maple Rd., Gambrills, MD 21504
NDA 19–432	Spectamine (Iofetamine Hydrochloride I–123) Injection	IMP Inc., 8050 El Rio, Houston, TX 77054

Therefore, notice is given to the holders of the approved applications listed in the table and to all other interested persons that the Director of the Center for Drug Evaluation and Research proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 355(e)) withdrawing approval of the applications and all amendments and supplements thereto on the ground that the applicants have failed to submit reports required under § 314.81.

In accordance with section 505 of the act and 21 CFR part 314, the applicants are hereby provided an opportunity for a hearing to show why the applications listed previously should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of the drug products covered by these applications.

An applicant who decides to seek a hearing shall file: (1) A written notice of participation and request for a hearing (see **DATES**) and (2) the data, information, and analyses relied on to demonstrate that there is a genuine and substantial issue of fact that requires a hearing (see **DATES**). Any other interested person may also submit comments on this document. The procedures and requirements governing this notice of opportunity for a hearing, notice of participation and request for a hearing, information and analyses to justify a hearing, other comments, and a grant or denial of a hearing are contained in § 314.200 and 21 CFR part 12.

The failure of an applicant to file a timely written notice of participation and request for a hearing, as required by § 314.200, constitutes an election by that applicant not to avail itself of the opportunity for a hearing concerning the proposal to withdraw approval of the applications and constitutes a waiver of any contentions concerning the legal status of the drug products. FDA will then withdraw approval of the applications and the drug products may not thereafter lawfully be marketed, and FDA will begin appropriate regulatory action to remove the products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must present specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. Reports submitted to remedy the deficiencies must be complete in all respects in accordance with § 314.81. If the submission is not complete or if a request for a hearing is not made in the required format or with the required reports, the Commissioner of Food and Drugs (the Commissioner) will enter summary judgment against the person who requests the hearing, making findings and conclusions, and denying a hearing.

All submissions under this notice of opportunity for a hearing must be filed in four copies. Except for data and information prohibited from public disclosure under section 301 of the act (21 U.S.C. 331(j)) or 18 U.S.C. 1905, the submissions may be seen in the Division of Dockets Management (see **ADDRESSES**) between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the act (section 505 (21 U.S.C. 355)) and under authority delegated to the Director, Center for Drug Evaluation and Research, by the Commissioner.

Dated: January 19, 2005.

Jeffrey Shuren,

Assistant Commissioner for Policy.

[FR Doc. 05–1656 Filed 1–27–05; 8:45 am]

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Antiviral Drugs Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). The meeting will be open to the public.

Name of Committee: Antiviral Drugs Advisory Committee.

General Function of the Committee: To provide advice and recommendations to the agency on FDA's regulatory issues.

Date and Time: The meeting will be held on March 11, 2005, from 8 a.m. to 5 p.m.

Location: Hilton Washington DC North/Gaithersburg, Salons A and B, 620 Perry Pkwy., Gaithersburg, MD.

Contact Person: Anuja Patel, Center for Drug Evaluation and Research (HFD–21), Food and Drug Administration, 5600 Fishers Lane (for express delivery, 5630 Fishers Lane, rm. 1093), Rockville, MD 20857, 301–827–7001, FAX: 301–827–6776, e-mail: *patela@cder.fda.gov*, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area), code 3014512531. Please call the Information Line for up-to-date information on this meeting.

Agenda: The committee will discuss new drug applications 21–797 and 21–798, entecavir tablets and entecavir oral solution, respectively, Bristol-Myers Squibb Co., proposed for the treatment of patients with chronic hepatitis B infection (HBV).

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person by February 25, 2005. Oral presentations from the public will be scheduled between approximately 1 p.m. and 2 p.m. Time allotted for each presentation may be limited. Those desiring to make formal oral presentations should notify the contact person before February 25, 2005, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation.

Persons attending FDA's advisory committee meetings are advised that the agency is not responsible for providing access to electrical outlets.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Angie Whitacre at 301–827–7001, at least 7 days in advance of the meeting.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: January 23, 2005.

Sheila Dearybury Walcoff,

Associate Commissioner for External Relations.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Access to Recovery (ATR) Program—New

In preparation for implementing Performance Partnership Grants, SAMHSA has developed a set of performance outcome measures for substance abuse treatment that cover seven domains. The domains are: Abstinence from drug use and alcohol abuse, or decreased mental illness symptomatology; increased or retained employment and school enrollment; decreased involvement with the criminal justice system; increased stability in family and living conditions; increased access to services; increased retention in services for substance abuse treatment or decreased utilization of psychiatric inpatient beds for mental health treatment; and increased social connectedness to family, friends, co-workers and classmates.

SAMHSA's Center for Substance Abuse Treatment (CSAT), is responsible for implementing the new Access to Recovery (ATR) grant program. States funded in the ATR program will use these outcome measures to meet the reporting requirements of the Government Performance and Results Act (GPRA) by quantifying the effects and accomplishments of the funded programs. The ATR Program is part of a Presidential initiative to: (1) Provide client choice among substance abuse clinical treatment and recovery support service providers, (2) expand access to a comprehensive array of clinical treatment and recovery support options (including faith-based programmatic options), and (3) increase substance abuse treatment capacity. Monitoring outcomes, tracking costs, and preventing waste, fraud and abuse to ensure accountability and effectiveness in the use of Federal funds are also important elements of the ATR program. Grantees, as a contingency of their award, are responsible for collecting data from their clients at intake, discharge, at 30 days after intake, and every two months during an episode of care. An episode of care is defined as a client's entry to and exit from the ATR.

The following tables summarize the annual response burden for the ATR activities using the performance outcome measures.

Data collection point	Number of respondents	Responses per respondent	Total responses	Hours per response	Total hour burden (proportion of added burden)*
Client Interviews:					
ATR Intake	42,095	1	42,095	0.33	7,640
Discharge/30 day interview**	42,095	1	42,095	0.33	13,891
3 months	28,625	1	28,625	0.33	9,446
5 months	22,732	1	22,732	0.33	7,502
7 months	18,101	1	18,101	0.33	5,973
9 months	15,155	1	15,155	0.33	5,001

Data collection point	Number of respondents	Responses per respondent	Total responses	Hours per response	Total hour burden (proportion of added burden)*
11 months	11,787	1	11,787	0.33	3,890
12 months***	7,999	1	7,999	0.33	2,640
Total	188,589		188,589		55,983
Record Management by Provider Staff:					
Sections A and G per client at each data collection point after intake	[1] 146,494	1	146,494	.16	23,439
Voucher information and transaction	42,095	1.5	63,143	.03	1,894
Provider staff total per client	188,589		209,637		25,333
Grantees (14 States and 1 Tribal Organization):					
Grantee extract and upload	15	4	60	.03	2
Total	377,193		398,226		81,318

* This estimate is an added burden proportion which is an adjustment reflecting the extent to which programs typically already collect the data items. The formula for calculating the proportion of added burden is: total number of items in the standard instrument, minus the number of core items currently included, divided by the total number of items in the standard instrument. Thus, 13,891 times .55 proportion of added burden = 7,640. This only applies to the intake interview.

** The ATR interview will be administered every 2 months beginning at 30 days. It is assumed that those who are discharged at 30 days or less will receive an intake and discharge interview only and are included in the number in the first two rows. The number of respondents who are still in treatment by month is based on experience with CSAT's GPRA services data.

*** Based on experience with CSAT's GPRA services data, it is expected that few clients will still be in treatment longer than 12 months.

\1\ Clients.

Written comments and recommendations concerning the proposed information collection should be sent by February 28, 2005 to: SAMHSA Desk Officer, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503; due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, respondents are encouraged to submit comments by fax to: (202) –395–6974.

Dated: January 24, 2005.

Anna Marsh,

Executive Officer, SAMHSA.

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Federal Emergency Management Agency, Emergency Preparedness and Response Directorate, U.S. Department of Homeland Security.

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA) has submitted the following information collection to the Office of Management and Budget (OMB) for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The submission describes the nature of the information collection, the categories of respondents, the estimated burden (*i.e.*, the time, effort and resources used by respondents to respond) and cost, and includes the actual data collection instruments FEMA will use.

Title: Emergency Management Institute Follow-up Evaluation Survey.

OMB Number: 1660–0044.

Abstract: FEMA Form 95–56 is a continuous self-assessment qualitative tool used to identify trainees' knowledge and skills gained through emergency management-related courses and the extent to which they have been beneficial and applicable in the conduct of their official positions. The information collected is primarily used to review course content and offerings for program planning and management purposes. Results are combined with other program metrics to document performance per GPRA mandates.

Affected Public: Individuals or households; State, local or tribal governments.

Number of Respondents: 2,300.

Estimated Time Per Respondent: FEMA Form 95–56, 15 minutes; Students participating in pilot testing for electronic version of FEMA Form 95–56, 30 minutes.

Estimated Total Annual Burden Hours: 600.

Frequency of Response: One per course.

COMMENTS: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs at OMB, Attention: Desk Officer for the Department of Homeland Security/FEMA, Docket Library, Room 10102, 725 17th Street, NW., Washington, DC 20503, or facsimile number (202) 395–7285. Comments must be submitted on or before February 28, 2005.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Muriel B. Anderson, Section Chief, Records Management, FEMA at 500 C Street, SW., Room 316, Washington, DC 20472, facsimile number (202) 646–3347, or e-mail address *FEMA-Information-Collections@dhs.gov.*

Dated: January 21, 2005.

Edward W. Kernan,

Branch Chief, Information Resources Management Branch, Information Technology Services Division.

BILLING CODE 9110–17–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[FEMA–3197–EM]

Indiana; Emergency and Related Determinations

AGENCY: Federal Emergency Management Agency, Emergency Preparedness and Response Directorate, Department of Homeland Security.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of an emergency for the State of Indiana (FEMA–3197–EM), dated January 11, 2005, and related determinations.

EFFECTIVE DATE: January 11, 2005.

ADDRESSES:

FOR FURTHER INFORMATION CONTACT: Magda Ruiz, Recovery Division, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–2705.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated January 11, 2005, the President declared an emergency declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121–5206 (Stafford Act), as follows:

I have determined that the impact in certain areas of the State of Indiana, resulting from the record/near record snow on December 21–23, 2004, is of sufficient severity and magnitude to warrant an emergency declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121–5206 (the Stafford Act). Therefore, I declare that such an emergency exists in the State of Indiana.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide emergency protective measures under the Public Assistance program to save lives, protect public health and safety, and property. Other forms of assistance under Title V of the Stafford Act may be added at a later date, as you deem appropriate. You are further authorized to provide this emergency assistance in the affected areas for a period of 48 hours. You may extend the period of assistance, as warranted. This assistance excludes regular time costs for sub-grantees' regular employees. Assistance under this emergency is authorized at 75 percent Federal funding for eligible costs.

Further, you are authorized to make changes to this declaration to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Under Secretary for Emergency Preparedness and Response, Department of Homeland Security, under Executive Order 12148, as amended, Ron Sherman, of FEMA is appointed to act as the Federal Coordinating Officer for this declared emergency.

I do hereby determine the following areas of the State of Indiana to have been affected adversely by this declared emergency:

The counties of Bartholomew, Blackford, Brown, Clark, Crawford, Daviess, Dearborn, Decatur, Delaware, Dubois, Fayette, Floyd, Franklin, Gibson, Greene, Hamilton, Hancock, Harrison, Henry, Jackson, Jay, Jefferson, Jennings, Johnson, Knox, Lawrence, Madison, Marion, Martin, Monroe, Morgan, Ohio, Orange, Owen, Perry, Pike, Posey, Randolph, Ripley, Rush, Scott, Shelby, Sullivan, Switzerland, Union, Vanderburgh, Warrick, Washington, and Wayne for emergency protective measures (Category B) under the Public Assistance program for a period of 48 hours.

(Catalog of Federal Domestic Assistance No. 97.036, Disaster Assistance.)

Michael D. Brown,

Under Secretary, Emergency Preparedness and Response, Department of Homeland Security.

[FEMA–3197–EM]

Indiana; Amendment No. 1 to Notice of an Emergency Declaration

AGENCY: Federal Emergency Management Agency, Emergency Preparedness and Response Directorate, Department of Homeland Security.

ACTION: Notice.

SUMMARY: This notice amends the notice of an emergency declaration for the State of Indiana (FEMA–3197–EM), dated January 11, 2005, and related determinations.

EFFECTIVE DATE: January 19, 2005.

FOR FURTHER INFORMATION CONTACT: Magda Ruiz, Recovery Division, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–2705.

SUPPLEMENTARY INFORMATION: The notice of an emergency declaration for the State of Indiana is hereby amended to include the following area among those areas determined to have been adversely affected by the catastrophe declared an emergency by the President in his declaration of January 11, 2005:

Spencer County for emergency protective measures (Category B) under the Public Assistance program for a period of 48 hours.

(Catalog of Federal Domestic Assistance No. 97.036, Disaster Assistance.)

Ohio; Emergency and Related Determinations

AGENCY: Federal Emergency Management Agency, Emergency Preparedness and Response Directorate, Department of Homeland Security.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of an emergency for the State of Ohio (FEMA–3198–EM), dated January 11, 2005, and related determinations.

EFFECTIVE DATE: January 11, 2005.

FOR FURTHER INFORMATION CONTACT: Magda Ruiz, Recovery Division, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–2705.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated January 11, 2005, the President declared an emergency declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121–5206 (Stafford Act), as follows:

I have determined that the impact in certain areas of the State of Ohio, resulting from the record snow on December 22–24, 2004, is of sufficient severity and magnitude to warrant an emergency declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121–5206 (the Stafford Act). Therefore, I declare that such an emergency exists in the State of Ohio.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide emergency protective measures under the Public Assistance program to save lives, protect public health and safety, and property. Other forms of assistance under Title V of the Stafford Act may be added at a later date, as you deem appropriate. You are further authorized to provide this emergency

assistance in the affected areas for a period of 48 hours. You may extend the period of assistance, as warranted. This assistance excludes regular time costs for sub-grantees' regular employees. Assistance under this emergency is authorized at 75 percent Federal funding for eligible costs.

Further, you are authorized to make changes to this declaration to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Under Secretary for Emergency Preparedness and Response, Department of Homeland Security, under Executive Order 12148, as amended, Lee Champagne, of FEMA is appointed to act as the Federal Coordinating Officer for this declared emergency.

I do hereby determine the following areas of the State of Ohio to have been affected adversely by this declared emergency:

The counties of Butler, Champaign, Clark, Darke, Delaware, Franklin, Greene, Hamilton, Hardin, Logan, Madison, Miami, Montgomery, Preble, Shelby, Union, and Warren for emergency protective measures (Category B) under the Public Assistance program for a period of 48 hours.

(Catalog of Federal Domestic Assistance No. 97.036, Disaster Assistance.)

BILLING CODE 4210–29–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA 180–1150 BS]

Notice of Emergency Closure of Public Lands in Amador County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given that certain access roads and certain areas are temporarily closed to all public entry that could result in the spread of *Phytophthora cinnamomi*, a fungus related to the one responsible for sudden oak death, to uninfected stands of Ione and whiteleaf manzanita as well as to other susceptible plants including natives and ornamentals. These activities include motor vehicle operation and foot traffic.

DATES: The closure will take effect on October 27, 2004 and continue until further notice.

FOR FURTHER INFORMATION CONTACT: Deane Swickard, Folsom Field Office Manager, 63 Natoma Street, Folsom, California 95630, telephone (916) 985–4474.

SUPPLEMENTARY INFORMATION: *Phytophthora cinnamomi* is a root and crown fungus that attacks Ione manzanita (*Archtostaphylos myrtifolia*) and whiteleaf manzanita (*Archtostaphylos viscida*). The Ione manzanita is listed as threatened under the Endangered Species Act, and occurs in Amador and Calaveras Counties, California. Infected stands of these species experience rapid desiccation and mortality at the onset of hot weather. *Phytophthora cinnamomi* is primarily spread by humans driving or walking through infested areas, and then into non-infested areas.

The closed area is the Ione Manzanita Area of Critical Environmental Concern (ACEC), and portions of nearby public lands portions in which the Ione manzanita occurs, a total of about 240 acres. Legal descriptions of the closed areas are:

T.5 N, R.10 E, M.D.B. & M.;
Sec. 32, NE ¼ SE ¼, SW ¼ SE ¼, E ½ SE ¼;
Sec. 33, SW ¼ NW ¼, NW ¼ SW ¼.
T.7 N, R.9 E, M.D.B. & M.;
Sec. 28, S ½ SE ¼ SW ¼;
Sec. 33, NW ¼ NE ¼.

Closure signs will be posted at main entry points to this area. Maps of the closure area may be obtained from the Folsom Field Office, 63 Natoma Street, Folsom, California, 95630. Phone: (916) 985–4474.

Under the authority of 43 CFR 8364.1(a), the Bureau of Land Management will enforce the closure of the infested lands to prevent the spread of the fungus to uninfested stands of the federally threatened Ione manzanita and other susceptible vegetation. Official vehicles, including fire or law enforcement, are exempt from the emergency order. Currently, there is no legal public access to the subject lands. The only people affected by the emergency closure order are adjacent property owners.

The authority for this closure is found under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 CFR 8360.0–7). Any person who violates this closure may be tried before a United States Magistrate and fined no more than $1,000 or imprisoned for no more that 12 months, or both. Such violations may also be subject to the enhanced fines provided for by 18 U.S.C. 8571.

(Authority: 43 CFR 8364.1(a))

Dated: October 27, 2004.

D.K. Swickard,

Folsom Field Office Manager.

BILLING CODE 4310–40–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[OR–027–1020–PI–020H; G5–0035]

Steens Mountain Advisory Council; Call for Nominations

AGENCY: Bureau of Land Management (BLM), Burns District.

ACTION: Call for nominations for the Steens Mountain Advisory Council (SMAC).

SUMMARY: BLM is publishing this notice under Section 9(a)(2) of the Federal Advisory Committee Act. Pursuant to the Steens Mountain Cooperative Management and Protection Act of 2000 (Public Law 106–399), BLM gives notice that the Secretary of the Interior intends to call for nominations for terms expiring on the SMAC. This notice requests the public to submit nominations for membership on the SMAC. Any individual or organization may nominate one or more persons to serve on the SMAC. Individuals may nominate themselves for SMAC membership. Nomination forms may be obtained from the Burns District Office, Bureau of Land Management (see address below). To make a nomination, submit a completed nomination form, letters of reference from the represented interests or organizations, and any other information that speaks to the nominee's qualifications, to the Burns District Office. Nominations may be made for the following categories of interest:

- One person who is a grazing permittee on Federal land in the Steens Mountain Cooperative Management and Protection Area (CMPA) (appointed from nominees submitted by the County Court of Harney County);
- One person who is a recognized environmental representative from the local area (appointed from nominees submitted by the Governor of Oregon);
- A person who participates in what is commonly called dispersed recreation, such as hiking, camping, nature viewing, nature photography, bird watching, horseback riding, or trail walking (appointed from nominees submitted by the Oregon State Director of the BLM); and
- A person with expertise and interest in wild horse management on Steens Mountain (appointed from nominees submitted by the Oregon State Director for BLM).

The specific category the nominee will represent should be identified in the letter of nomination. The Burns District will collect the nomination forms and letters of reference and distribute them to the officials responsible for submitting nominations (County Court of Harney County, the Governor of Oregon, and BLM). BLM will then forward recommended nominations to the Secretary of the Interior, who has responsibility for making the appointments.

DATES: Nominations should be submitted to the address listed below no later than 30 days after publication of this notice.

FOR FURTHER INFORMATION CONTACT: Rhonda Karges, Management Support Specialist, Burns District Office, 28910 Hwy 20 West, Hines, Oregon 97738, (541) 573–4433, or *Rhonda_Karges@or.blm.gov* or from the following Web site *http://www.or.blm.gov/steens* (Public Law 106–399 in its entirety can be found on the Steens Web site as previously cited.)

SUPPLEMENTARY INFORMATION: The purpose of the SMAC is to advise BLM on the management of the CMPA as described in Title 1 of Public Law 106–399. Each member will be a person who, as a result of training and experience, has knowledge or special expertise which qualifies him or her to provide advice for one or more of the interest categories listed above.

Members of the SMAC are appointed for terms of 3 years. The Grazing Permittee, Environmental Representative, Dispersed Recreation, and Wild Horse Management position terms will expire August 2005. These four positions will begin no earlier than August 2005 and will end August 2008.

Members will serve without monetary compensation, but will be reimbursed for travel and per diem expenses at current rates for Government employees. The SMAC shall meet only at the call of the Designated Federal Official, but not less than once per year.

Dated: December 21, 2004.

Karla Bird,

Andrews Resource Area Field Manager, Bureau of Land Management, Burns, Oregon.

[FR Doc. 05–1596 Filed 1–27–05; 8:45 am]

BILLING CODE 4310–33–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK–931–1310–DT–NPRA]

Notice of Availability of the Amendment to the Northeast National Petroleum Reserve-Alaska Final Integrated Activity Plan/Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Amendment to the Northeast National Petroleum Reserve-Alaska (NPR-A) Final Integrated Activity Plan/ Environmental Impact Statement (IAP/EIS) will be made available to the public for a 30-day period beginning on the date the Environmental Protection Agency (EPA) files a Notice of Availability of the Final IAP/EIS in the **Federal Register**. The EPA notice is expected to occur on or about January 28, 2005. A Record of Decision (ROD) will be issued after the 30-day availability period. The ROD will identify the selected alternative as well as mitigation measures.

The Final IAP/EIS addresses two primary objectives for the amendment of the Northeast National Petroleum Reserve-Alaska IAP/EIS.

1. Consider making available all or portions of lands currently closed to oil and gas leasing in the Planning Area; and,

2.Consider developing performance-based lease stipulations and ROPs to provide the BLM greater flexibility in protecting important surface resources from the impacts of oil and gas activities, similar to those developed for the Northwest National Petroleum Reserve—Alaska.

Location of the Document: The Final IAP/EIS will be available in either hard copy or on compact disk at the Alaska State Office, Public Information Center at 222 West 7th Avenue, Anchorage, Alaska 99513–7599. Copies of the Final IAP/EIS will also be available at the following locations: Tuzzy Public Library, Barrow, Alaska; City of Nuiqsut, Nuiqsut, Alaska; City of Atqasuk, Atqasuk, Alaska; City of Anaktuvuk Pass, Anaktuvuk Pass, Alaska; City of Bethel, Bethel, Alaska, Z. J. Loussac Public Library, Anchorage, AK; Noel Wien Public Library, Fairbanks, AK.

The final IAP/EIS will also be available on the project Web site at *http://nenpra.ensr.com/nenpra/default.html.*

FOR FURTHER INFORMATION CONTACT: Susan Childs, BLM Alaska State office (907) 271–1985.

SUPPLEMENTARY INFORMATION: The Northeast Planning Area (Planning Area) boundary encompasses approximately 4.6 million acres located in the northeastern portion of the National Petroleum Reserve-Alaska. The Planning Area is roughly bounded by the Beaufort Sea to the North, the Ikpikpuk River to the west and the Colville River to the east and south of the planning area. The 1998 Record of Decision (ROD) for the Northeast Planning area provided 87% of the area for oil and gas leasing; however, approximately 840,000 acres, much of the area surrounding the Teshekpuk Lake, including the lake, was made unavailable for leasing under the 1998 ROD. In 2002, the President's National Energy Policy Development Group recommended that the President direct

the Secretary of the Interior to consider additional environmentally responsible oil and gas development, based on sound science and the best available technology, through further lease sales in the National Petroleum Reserve-Alaska and that such consideration should include areas not currently leased within the northeast corner of the National Petroleum Reserve-Alaska. In addition, Public Law 96–514 of December 12, 1980, amended the NPRPA authorizing oil and gas leasing in the reserve and as codified in 42 U.S.C. 6508 stated, ''There shall be conducted, not withstanding any other provision of law and pursuant to such rules and regulations as the Secretary may prescribe, an expeditious program of competitive leasing of oil and gas in the National Petroleum Reserve in Alaska; provided, that: (1) Activities undertaken pursuant to this section shall include or provide for such conditions, restrictions, and prohibitions as the Secretary deems necessary or appropriate to mitigate reasonably foreseeable and significantly adverse effects on the surface resources of the National Petroleum Reserve in Alaska * * *.'' In exercising this authority a revised Preferred Alternative which incorporates additional surface protection measures has been developed to safeguard important resources and subsistence activities. This Final IAP/EIS amendment contains four alternatives for a land management plan for the 4.6 million-acre planning area and assessments of each plan's impacts on the surface resources present there, as well as the cumulative effects of each alternative.

A Draft Amended IAP/EIS was made available for a 76-day comment period on June 9, 2004. Scoping and comment meetings on the Draft IAP/EIS were held in Bethel, Nuiqsut, Atqasuk, Barrow, Anaktuvuk Pass, Fairbanks, Anchorage, and Washington, DC. The Northeast Planning Area provides particularly important habitat for caribou, waterfowl, subsistence species, and other waterfowl. Many of the local residents of the area rely on harvesting these resources for subsistence purposes. Ensuring adequate protection of these resources has been one of the main focuses of public comment. The BLM held public hearings on subsistence as well as public hearings on the Draft IAP/EIS. The first set of subsistence hearings was held in conjunction with the public hearings on the Draft IAP/EIS during the weeks of June 28, August 9 and 16 in Bethel, Nuiqsut, Atqasuk, Barrow, Anaktuvuk Pass, Fairbanks, Anchorage (all in Alaska) and Washington, DC. An additional set of subsistence hearings was held in the effected Alaska North Slope communities of Nuiqsut, Ataqasuk, Barrow and Anaktuvuk Pass, Alaska, as well as the community of Bethel, Alaska, in the Yukon Delta, during the weeks of October 25 and November 29. Under the final Preferred Alternative, approximately 4,389,000 acres of BLM administered subsurface estate within the Planning Area would be available for oil and gas leasing. Teshekpuk Lake would be deferred from oil and gas leasing under this alternative. In addition, there would be no recommended Wilderness Study Areas or Wild and Scenic Rivers. Lease stipulations and required operating procedures under the final Preferred Alternative, would establish setbacks prohibiting permanent facilities within ¼ to 1 mile along major rivers and 1 to 3 miles along Fish Creek; ¼ mile shoreward from deep water lakes and ¾ mile along coastal areas, to protect subsistence resources/activities and other important surface resources. No Surface Occupancy for permanent oil and gas development stipulations were included which would protect goose molting areas, caribou movement corridors, and the southern caribou calving grounds. Multi-year studies would be required prior to development to protect spectacled and Steller's eiders, yellow-billed loons, and caribou. Other stipulations and required operating procedures would establish restrictions and guidance that apply to waste prevention and spills, water use, winter overland moves and seismic activity, exploratory drilling, aircraft use and subsistence consultation.

The no action alternative calls for continuation of current management, which does provide for continued leasing in the area previously made available for oil and gas leasing through the 1998 Northeast National Petroleum Reserve-Alaska IAP/EIS and Record of Decision. Alternatives A through C make progressively more land, available for oil and gas leasing. The final Proposed Action, Altnerative D, would make a more land available Alternatives A, but less land available than Alternatives B or C. Alternative A, makes available 87% of the planning area available for oil and gas leasing; Alternative B makes 96% percent of the planning area available for oil and gas leasing; Alternative C makes 100% of the planning area available for oil and gas leasing; and the final Proposed Action, Alternative D, makes approximately 95% available for oil and gas leasing. Performance-based stipulations and (ROPs) would provide protection for natural and cultural resources under all alternatives: B, C, and D, but their nature, number and scope varies between the alternatives. Alternative A, the No Action Alternative, would continue to protect the planning area with stipulations implemented throughout the 1998 Northeast Record of Decision.

Dated: December 6, 2004.

Henri R. Bisson,

State Director, Alaska.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[UTU76532]

Notice of Proposed Reinstatement of Terminated Oil and Gas Lease, Utah

December 22, 2004.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Public Law 97–451), a petition for reinstatement of oil and gas lease UTU76532 for lands in San Juan County, Utah, was timely filed and required rentals accruing from July 1, 2004, the date of termination, have been paid.

FOR FURTHER INFORMATION CONTACT: Teresa Catlin, Acting Chief, Branch of Fluid Minerals at (801) 539–4122.

SUPPLEMENTARY INFORMATION: The lessee has agreed to new lease terms for rentals and royalties at rates of $5 per acre and 16–⅔ percent, respectively. The $500 administrative fee for the lease has been paid and the lessee has reimbursed the Bureau of Land Management for the cost of publishing this notice.

Having met all the requirements for reinstatement of the lease as set out in Section 31(d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate lease UTU76532, effective July 1, 2004, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Robert Henricks,

Acting Chief, Branch of Fluid Minerals.

Bureau of Land Management

[WY–920–1310–01; WYW145952]

Notice of Proposed Reinstatement of Terminated Oil and Gas Lease

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of proposed reinstatement of terminated oil and gas lease.

SUMMARY: Under the provisions of 30 U.S.C. 188(d) and (e), and 43 CFR 3108.2–3(a) and (b)(1), the Bureau of Land Management (BLM) received a petition for reinstatement of oil and gas lease WYW145952 for lands in Lincoln County, Wyoming. The petition was filed on time and was accompanied by all the rentals due since the date the lease terminated under the law.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, Theresa M. Stevens, Land Law Examiner, at (307) 775–6167.

SUPPLEMENTARY INFORMATION: The lessee has agreed to the amended lease terms for rentals and royalties at rates of $5.00 per acre or fraction thereof, per year and 16⅔ percent, respectively. The lessee has paid the required $500 administrative fee and $166 to reimburse the Department for the cost of this **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in Section 31(d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease WYW145952 effective August 1, 2003, under the original terms and conditions of the lease and the increased rental and royalty rates cited above. BLM has not issued a valid lease affecting the lands.

Theresa M. Stevens,

Land Law Examiner.

Bureau of Land Management

[MT–070–05–1220–AL]

Notice to Rescind Seasonal Area Closure of Public Lands Along Hauser Lake, MT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The purpose of this notice is to rescind the annual October 15 to December 31 closure of all public lands lying in the 2.5 mile stretch from Canyon Ferry Dam downstream to Brown's Gulch Road and between the east shore of Hauser Lake and Johnny's Gulch Road. The public lands affected by this notice are all lands administered by the Bureau of Land Management in Sections 5 and 6, T. 10 N., R.1 W., and Section 32, T. 11N., R. 1 W. Principle Meridian, Montana. The closure area that we are rescinding totals 769 acres.

DATES: This Notice will take affect upon publication in the **Federal Register**.

ADDRESSES: Copies of this rescindment and a map are available from the Butte Field Office, 106 N. Parkmont, Butte, Montana 59701.

FOR FURTHER INFORMATION CONTACT: Steve Hartmann, Assistant Field Manager, Butte Field Office at (406) 533–7600.

SUPPLEMENTARY INFORMATION: Kokanee Salmon were introduced into Hauser Reservoir in the 1970's to provide a fishery for local anglers. The salmon population thrived and bald eagles migrating from Canada to their wintering grounds in Utah, Colorado, and Wyoming began to congregate around Hauser Reservoir to feed on spawning salmon. When the numbers of eagles began to steadily increase, the Bureau of Reclamation, Bureau of Land Management, Forest Service, and Montana Fish, Wildlife and Parks closed the area to public access to protect bald eagles from human disturbance.

From 1991 to 1996, 100–300 migrating eagles were identified congregating at Hauser Reservoir. By 1997, however, the number of bald eagles had dropped to fewer than 65, the lowest number of bald eagles counted over the seven year period. Declining angler success, reduced captures in Montana Fish, Wildlife and Parks gill nets, and extremely low carcass counts from 1995–1997 showed a decline in the Kokanee salmon population. Migrating bald eagles responded to the reduction in food supply. By 2000, fewer than 20 bald eagles were identified at Hauser Reservoir and the closure is no longer necessary.

Dated: December 1, 2004.

Richard M. Hotaling,

Field Manager.

Bureau of Land Management

[OR–958–1430–ET; HAG05–0004; OR 52171]

Termination of Classification and Order Providing for Opening of Land, OR 52171

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice.

SUMMARY: This notice terminates the existing classification in its entirety for public lands that were classified as suitable for lease/disposal pursuant to the Recreation and Public Purposes Act

of June 14, 1926, as amended (43 U.S.C. 869 *et seq.*), and opens 3.00 acres of land to surface entry and mining, subject to the existing laws, rules, and regulations applicable to public lands administered by the Bureau of Land Management.

EFFECTIVE DATE: February 28, 2005.

FOR FURTHER INFORMATION CONTACT: Lakisha Sloan, Land Law Examiner, Oregon State Office, PO Box 2965, Portland, OR 97208, 503–808–6595, or Stuart Hirsh, Realty Specialist, Salem District Office, 1717 Fabry Road SE., Salem, OR 97306, (503) 375–5623.

SUPPLEMENTARY INFORMATION: On July 19, 1995, 3.00 acres of public land under the jurisdiction of the Bureau of Land Management were classified as suitable for lease pursuant to the Recreation and Public Purposes Act of June 14, 1926, as amended, (43 U.S.C. 869 *et seq.*), and the regulations at 43 CFR 2400. Upon classification the land was leased to the Pacific City water district for the construction, operation, and maintenance of an administration/maintenance facility for the term of 25 years under Bureau of Land Management Serial Number OR 52171. On May 20, 2004, this lease was relinquished.

The formerly leased land is described as follows:

Willamette Meridian, Oregon

T. 4 S., R. 10 W.,
Sec. 19, Lot 18

The area described contains 3.00 acres in Tillamook County, Oregon.

At 8:30 a.m., on February 28, 2005, the land will be opened to operation of the public land laws generally, but not to location or entry, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid existing applications received at or prior to 8:30 a.m., on February 28, 2005, will be considered as simultaneously filed at that time. Those received thereafter will be considered in the order of filing.

At 8:30 a.m., on February 28, 2005, the land will be opened to location and entry under the United States mining laws. Appropriation under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Sec. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determination in local courts.

(Authority: 43 CFR 2461.5(c)(2)).

Ralph R. Kuhns, Jr.,

Acting, Chief, Branch of Realty and Records Services.

Bureau of Land Management

Limitation on Use of Credit and Debit Cards for Payments to the Bureau of Land Management

Authority: 31 U.S.C. 3720, 31 CFR 206.4, 43 CFR 3103.1–1.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management has established a $99,999.99 limit on payments made by credit and debit cards. Under U.S. Department of the Treasury regulations, federal agencies are required to use electronic fund transfers for collections and payments, as long as it is cost effective to do so. Fees for large dollar debit and credit card transactions are prohibitive. Cardholders cannot be required to pay any part of the fees which financial institutions charge, directly or indirectly, through any increase in price or otherwise. Customers who need to tender payments larger than the cap are encouraged to make electronic payments using the Automated Clearing House or Federal Wire Transfer procedures.

EFFECTIVE DATE: February 1, 2005.

ADDRESSES: Bureau of Land Management, National Business Center, Attention: Alice Sonne (BC–621), PO Box 25047, Denver, CO 80225–0047.

FOR FURTHER INFORMATION CONTACT: Jay Douglas, BLM (202) 452–0336 or Alice Sonne, BLM (303) 236–6332.

SUPPLEMENTARY INFORMATION: Effective February 1, 2005, the Bureau of Land Management will not accept credit or debit card payments for any amount greater than $99,999.99 for any purpose. Multiple same-day transactions of smaller amounts, which in their total exceed the cap, cannot be used to bypass this requirement. Detailed guidance about how to make electronic payments is available from each Bureau State Office. A list of State offices is available at the Bureau's external Web site (*http://www.blm.gov/nhp/directory/index.htm*) and at Title 43 Code of Federal Regulations Subpart 1821.10. Personal and corporate checks are acceptable forms of payment.

Thomas F. Boyd,

Director, National Business Center.

Bureau of Land Management

[NV–050–5853–ES; N–59514, N–77790]

Notice of Realty Action: Segregation Terminated, Lease/Conveyance for Recreation and Public Purposes (R&PP)

AGENCY: Bureau of Land Management, Interior.

ACTION: Segregation terminated, Recreation and Public Purposes lease/conveyance.

SUMMARY: Clark County, Nevada has relinquished an R&PP lease (N–59514) for a fire station site on 2.5 acres of public land in Las Vegas, Nevada. The fire station site is proposed to be relocated on nearby public land (N–77790), located in Clark County, Nevada, which BLM has determined is suitable for classification for lease/conveyance to Clark County.

FOR FURTHER INFORMATION CONTACT: Beth Domowicz, BLM Realty Specialist, (702) 515–5147.

SUPPLEMENTARY INFORMATION: Clark County, Nevada has relinquished an R&PP lease (N–59514) for a fire station on public lands due to development in the area that made the land unsuitable for the proposed use. These lands in Las Vegas, Clark County, Nevada are described as follows:

N–59514

Mount Diablo Meridian, Nevada

T. 22 S., R. 60 E., Sec. 24,
NW¼NW¼SW¼NW¼.
Consisting of 2.5 acres.

The segregation of the subject land for R&PP (N–59514) under the Notice published in the **Federal Register** volume 61, page 1944, dated January 24, 1996, will be terminated upon publication of this notice.

The following described public land in Las Vegas, Clark County, Nevada has been examined and found suitable for lease/conveyance for recreational or public purposes under provisions of the Recreation and Public Purposes (R&PP) Act, as amended (43 U.S.C. 869 *et seq.*). Clark County proposes to use the land for a fire station.

N–77790

Mount Diablo Meridian, Nevada

T. 22 S., R. 60 E.,
Sec. 24, NE¼NE¼SW¼NW¼.
Consisting of 2.5 acres

The public land is not required for any Federal purpose. Lease/conveyance is consistent with current Bureau planning for this area and would be in the public interest. The lease/conveyance, when issued, will be subject to the provisions of the Recreation and Public Purposes Act and applicable regulations of the Secretary of the Interior and will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

And will be subject to:

1. All valid and existing rights.

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas Field Office, 4701 N. Torrey Pines Drive, Las Vegas, Nevada 89130.

Upon publication of this notice in the **Federal Register**, the public lands described in N–77790 will be segregated from all other forms of appropriation under the public land laws, including the general mining laws, except for lease/conveyance under the Recreation and Public Purposes Act, leasing under the mineral leasing laws and disposal under the mineral material disposal laws.

Interested parties may submit comments regarding the proposed classification for lease/conveyance of the public lands to the Field Manager, Las Vegas Field Office, 4701 N. Torrey Pines Drive, Las Vegas, Nevada 89130 until March 14, 2005.

Classification Comments: Interested parties may submit comments involving the suitability of the public land for the proposed facilities. Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning or if the use is consistent with State and Federal programs.

Application Comments: Interested parties may submit comments regarding the specific use proposed in the application and plan of development, whether the BLM followed proper administrative procedures in reaching the decision or any other factor not related to the suitability of the land for the proposed church facilities. Any adverse comments will be reviewed by the State Director who may sustain, vacate, or modify this Realty action. In the absence of any adverse comments, the classification of the land described in the Notice will become effective on March 29, 2005. The lands will not be offered for lease/conveyance until after the classification becomes effective.

Dated: December 28, 2004.

Sharon DiPinto,

Assistant Field Manager, Division of Lands.

Notice of Realty Action: Change of Use for Recreation and Public Purposes Lease/Conveyance

AGENCY: Bureau of Land Management, Interior.

ACTION: Recreation and Public Purposes lease/conveyance change of use.

SUMMARY: Clark County, Nevada proposes to change the use on 40.87 acres of public land in Las Vegas, Nevada from a fire station and training facility to a fire station, Regional Park and Clark County Family Services building.

FOR FURTHER INFORMATION CONTACT: Beth Domowicz, BLM Realty Specialist, SCEP, (702) 515–5147.

SUPPLEMENTARY INFORMATION: The following described public land in Las Vegas, Clark County, Nevada was segregated on October 20, 1999 for lease/conveyance under provisions of the Recreation and Public Purposes (R&PP) Act, as amended (43 U.S.C. 869 *et seq.*).

N–65825—Clark County proposes a change of use on the following public lands:

Mount Diablo Meridian, Nevada

T. 21 S., R. 62 E., Sec. 2: Lot 15.
Consisting of 40.87 acres

This public land was previously classified and segregated for Recreation and Public Purposes under FR, Volume 64, No. 212, page 59789, on Wednesday, November 3, 1999. The change of use from a fire station and fire training facility to a fire station, Regional Park and Clark County Family Services building is consistent with the uses authorized under the Recreation and Public Purposes Act. The change of use is consistent with current Bureau planning for this area and would be in the public interest.

Interested parties may submit comments regarding the proposed change of use for the public lands to the Field Manager, Las Vegas Field Office, 4701 N. Torrey Pines Drive, Las Vegas, Nevada 89130 until March 14, 2005.

Classification Comments: Given that the public lands were previously classified for Recreation and Public Purposes, comments pertaining to classification will not be accepted.

Application Comments: Interested parties may submit comments regarding the specific use proposed in the application and plan of development, whether the BLM followed proper administrative procedures in reaching the decision or any other factor not related to the suitability of the public land for the proposed facilities. Any adverse comments will be reviewed by the State Director who may sustain, vacate, or modify this Realty action. In the absence of any adverse comments, the classification of the public land described in the Notice will become effective on March 29, 2005. The lands will not be offered for lease/conveyance until after the classification becomes effective.

Dated: December 27, 2005.

Receipt of Application for Conveyance of Mineral Interests, Josephine County, OR [OR 60700]

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of mineral conveyance application.

SUMMARY: This action informs the public of the receipt of an application from Stephen E. Evensen of Murphy, Oregon for conveyance of 20 acres of federal mineral estate from lands administered by the BLM in the Medford District.

EFFECTIVE DATE: January 28, 2005.

FOR FURTHER INFORMATION CONTACT: Phyllis Gregory, BLM Oregon/Washington State Office, P.O. Box 2965, Portland, Oregon 97208, 503–808–6188.

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to Section 209 of the Act of October 21, 1976 (90 Stat. 2757), Stephen E. Evensen has filed an application to purchase the Federally-owned mineral estate in the land described below:

Willamette Meridian,

T. 37 S., R. 05 W.,
Sec. 09, W½NW¼SE¼.

The area described contains 20 acres, more or less, in Josephine County, Oregon. On May 19, 2004, the surface estate was offered to the Evensen family following the processing of a class 1 application for Color-of-Title (OR–57154). Mr. Evensen desires to acquire the mineral estate beneath the 20 acres of BLM administered lands included in the color-of-title application to effectively acquire fee title to the land. The mineral interests being offered for conveyance have no known mineral value.

Upon publication of this notice in the **Federal Register**, the mineral interest described above will be segregated to the extent that it will not be subject to appropriation under the public land laws including the mineral laws. The segregative effect of the application shall terminate either upon issuance of a patent or other document of conveyance to such mineral interests, upon final rejection of the application, or two years from the date of filing of the application, June 30, 2004, whichever comes first.

(Authority: 43 CFR 2720.1–1(b)).

Dated: October 25, 2004.

Robert D. DeViney, Jr.,

Chief, Branch of Realty and Records Services.

[CO–100–1610–DU]

Notice of Intent To Amend the Little Snake Resource Management Plan for Acquisition and Management of Emerald Mountain

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: This document provides notice that the Bureau of Land Management (BLM) will initiate a plan amendment to address acquisition and management of lands in Routt County, Colorado. The lands would be acquired in a proposed land exchange between the State of Colorado (Colorado State Land Board) and the United States (Little Snake Field Office, BLM).

DATES: All relevant public meetings will be announced through the local news media, newsletters, and the BLM Web site at: *http://www.co.blm.gov/lsra/lsraindex.htm*, at least 15 days prior to the event. The minutes and list of attendees from each meeting will be available in the Field Office and at the Web site, and will be open for 30 days after a meeting to any participant who wishes to clarify the views they expressed.

ADDRESSES: Please send written comments to the Bureau of Land Management, Little Snake Field Office, Attn: Emerald Mountain Land Use Amendment, 455 Emerson Street, Craig, CO 81625–1129; FAX: (970) 826–5002. Email comments may be sent to *Duane_Johnson@co.blm.gov*.

FOR FURTHER INFORMATION CONTACT: For further information and/or to have your name added to the mailing list, contact Duane Johnson, Team Leader, at the Little Snake Field Office (LSFO) address listed below or by calling (970) 826–5001.

SUPPLEMENTARY INFORMATION: The proposed land exchange involves 129 public land parcels totaling approximately 15,621 acres and one 6,347 acre parcel of State land called Emerald Mountain. The proposed land exchange would result in BLM acquiring new Federal land and disposing of scattered Federal lands.

The parcel to be acquired is currently not under BLM management, and an amendment of the current Resource Management Plan (RMP) is required to address acquisition and future management of the parcel by BLM. As part of the RMP amendment, an Environmental Assessment (EA) will be prepared to analyze and compare the impacts of the management alternatives for the acquired lands. As provided by 43 CFR 1610.5–5, the BLM will prepare the plan amendment and associated EA simultaneously with the processing of the Notice of Exchange Proposal (NOEP). The plan will be amended in conformity with the National Environmental Policy Act (NEPA), the Federal Land Policy and Management Act (FLPMA), and BLM management policies. The BLM will ask state and local governments to be cooperators on the plan amendment. BLM will work with interested parties to identify the management decisions that are best suited to local, regional, and national needs. The public scoping process will identify planning issues and planning criteria. The BLM will prepare the land management amendment through coordination with other federal, state and local agencies, and affected users of BLM managed lands. The BLM will hold public meetings during the plan scoping period. Early participation is encouraged and will help determine the future management decisions of the BLM-administered lands involved in this amendment. Comments on issues and concerns can be submitted in writing to the address listed above and will be accepted throughout the creation of the Draft RMP amendment/EA. In addition to the ongoing public participation process, the BLM will provide formal opportunities for public participation by conducting scheduled public meetings and requesting comments upon BLM's publication of the draft RMP amendment/EA. The BLM will notify the Governor of Colorado, the Routt County Commissioners, adjacent landowners, and potentially affected members of the public of the proposed management decisions. The Emerald Mountain Partnership has promoted the exchange. The Emerald Mountain Partnership is a non-profit group dedicated to the conservation of the natural resources of Emerald Mountain and surrounding lands and to the creation of a multi-use model of land use to ensure the compatibility of agriculture, wildlife, recreation, and education. A notice of exchange proposal (NEOP) will be prepared, published in local news media, and mailed to interested parties. Anyone wishing to obtain a copy of the NOEP may request one from the LSFO contact listed above.

Documents pertinent to this proposal may be examined at the LSFO and Web site at: *http://www.co.blm.gov/lsra/emerald_mtn/em.html*. Comments, including names and street addresses of respondents, will be available for public review at the LSFO during regular business hours (7:45 a.m. to 4:30 p.m.) Monday through Friday, except holidays; and may be published as part of the EA. Individual respondents may request confidentiality. If you wish to withhold your name or street address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public inspection in their entirety.

Preliminary issues and management concerns have been identified by BLM personnel, other agencies, and in meetings with the Emerald Mountain Partnership, the Routt County Commissioners, and user groups. They represent the BLM's knowledge to date on the existing issues and concerns with current management. The preliminary issues include: impacts to users of BLM-administered lands and adjacent private landowners; impacts to wildlife habitat; and impacts to water quality, vegetation, including riparian and wetland areas, soils, and recreation opportunities on Emerald Mountain. These issues, along with others that may be identified through public participation, will be considered in the planning process. After gathering public comments on what issues the plan amendment should address, the suggested issues will be placed in one of the three categories:

1. Issues to be resolved in the plan amendment;

2. Issues resolved through policy or administrative action; or

3. Issues beyond the scope of the plan amendment.

Rationale will be provided in the plan for each issue placed in category two or three. In addition to these major issues, a number of management questions and concerns will be addressed in the plan amendment. The public is encouraged to help identify these questions and concerns during the scoping phase.

An interdisciplinary approach will be used to develop the plan amendment in order to consider the variety of resource issues and concerns identified. Disciplines involved in the planning process will include specialists with expertise in rangeland management, minerals and geology, forestry, outdoor recreation, law enforcement, cultural resources, wildlife and fisheries, lands and realty, hydrology, soils, vegetation, and fire.

(Authority: 43 CFR 1610.2(c) and (f)).

John E. Husband,

Field Manager.

BILLING CODE 4310–JB–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NM–030–1610–DO]

Notice of Intent To Prepare a Resource Management Plan (RMP) Revision, a Resource Management Plan Amendment (RMPA), and Associated Environmental Impact Statement (EIS); and Notice of Public Scoping Meetings.

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Intent to Revise the White Sands RMP, New Mexico and Notice of Intent to Amend the Mimbres RMP, New Mexico, and Notice of Public Scoping Meetings.

SUMMARY: The BLM proposes to revise the White Sands RMP and to amend the Mimbres RMP. The revision and amendment and associated environmental analysis will update planning level decisions for public lands in Sierra, Otero, and Dona Ana Counties, which are managed by the Las Cruces Field Office (LCFO), New Mexico. The proposed RMP revision and amendment are intended to address issues that have developed since the previous RMPs were prepared in 1986 and 1994 respectively. This notice initiates the public scoping process to identify specific issues related to the proposed revision and amendment and the NEPA process.

DATES: The public scoping period for the proposal will commence with publication of this Notice. Comments about the proposal must be submitted on or before 60 calendar days from the date the Environmental Protection Agency (EPA) publishes its NOI in the **Federal Register**. The BLM can best utilize your participation, comments and resource information submissions during the 60 day comment period and scheduled public meetings. Public meetings will be held in Truth or

Consequences, Alamogordo, and Las Cruces, New Mexico to ensure the opportunity for local community participation and input. All public meetings will be announced through the local news media and will be posted on the New Mexico BLM Web site (*http://www.nm.blm.gov*) at least 15 days in advance.

ADDRESSES: Existing planning documents and information are available at the Las Cruces Field Office, 1800 Marquess St., Las Cruces, New Mexico 88005. Written comments regarding the proposed plan revision and amendment should be sent to the BLM at the above address, Attention: RMP Team Leader. Written comments may also be faxed to 505–525–4412 or e-mailed to *LCFO_RMP@nm.blm.gov.* Comments that are faxed or e-mailed must include ''Scoping Comments for LCFO–RMP'' in the subject line. Public comments, including names and street addresses of respondents, will be available for public review at the LCFO during regular business hours 7:30 a.m. to 4:30 p.m., Monday through Friday, except holidays, and may be published as part of the EIS. Individual respondents may request confidentiality. If you wish to withhold your name or street address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. All submissions from organizations and businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public inspection in their entirety.

FOR FURTHER INFORMATION CONTACT: Tom Phillips, RMP Team Leader, at (505) 525–4377. To have your name added to our mailing list, contact Rena Gutierrez at (505) 525–4338 or via e-mail at: *Rena_Gutierrez@nm.blm.gov.*

SUPPLEMENTARY INFORMATION: The area encompassed by this planning effort includes Sierra, Otero, and Dona Ana Counties, New Mexico. Public lands in Sierra and Otero County are administered under the White Sands RMP, while public lands in Dona Ana County are administered under the Mimbres RMP. This entire Planning Area is about 6.65 million acres with approximately 2.88 million surface acres of public land and 5.01 million acres of federal minerals. BLM managed lands comprise about 43 percent of the three-county area.

The planning process will comply with the Federal Land Policy and Management Act of 1976 (FLPMA), the National Environmental Policy Act of 1969 (NEPA) and associated Federal regulations. The BLM will work collaboratively with interested parties to identify the management decisions that are best suited to local and regional needs as well as national needs and concerns.

There are several preliminary issues that BLM is seeking public input on through scoping. These issues were identified from evaluation of decisions in the current RMPs that BLM believes require updating and include: recreation; off highway vehicle management; threatened and endangered species management; renewable energy development potential (solar, wind, etc.); Areas of Critical Environmental Concern (ACECs); naturalness, solitude, and primitive recreation; special status species habitat management; access; travel management; rights-of-way; and land tenure (acquisition or disposal). The preliminary planning criteria, which have been identified to guide the development of the RMP Revision-Amendment/EIS, are:

A. Actions must comply with laws, regulations, executive orders, and BLM Manuals (*i.e.*, supplemental program guidance).

B. Actions must be reasonable and achievable and allow for flexibility where appropriate (*i.e.*, adaptive management).

C. The Economic Profile System (EPS) developed by the Sonoran Institute will be used as a community involvement technique and a source of demographic and economic data for the planning process.

D. Actions will be considered through an interdisciplinary approach.

E. The White Sands RMP Revision and the Mimbres RMP Amendment planning team will work cooperatively with county and municipal governments, other Federal, State and local agencies, and interested groups and individuals. Collaborative public involvement and participation will be emphasized throughout this process.

F. The revision and amendment will establish the guidance upon which the LCFO will manage public lands within the three counties.

G. The planning process will include an EIS that complies with NEPA standards.

H. The revision and amendment will provide for the maintenance and enhancement of habitats for special status species within the Planning Area, while allowing the public the opportunity for access to public lands in a productive and meaningful way.

I. The revision and amendment will recognize valid existing rights related to the use of public lands. The revision and amendment will define the process that the LCFO will use to address applications or notices filed after the completion of the revision and amendment on existing land use authorizations.

J. The RMP revision and amendment process will involve Native American tribal governments and will provide strategies for protection of cultural resources on public lands.

K. Decisions in the revision and amendment will strive to be compatible with existing plans and policies of adjacent local, State, and Federal governments and agencies, as long as the decisions are in conformance with BLM management policies.

Public participation will be encouraged through the three public meetings described above. Early participation is encouraged. In addition to the public meetings, opportunities for public participation will be available during the development of alternatives and upon publication of the Draft EIS. Notification of the publications and updates will be sent to various State and local government agencies, interest groups, Native American Tribes, permittees, and other interested public, as well as to the local news media. Federal, State and county governments have been asked to participate in the process and will be offered an opportunity to be cooperating agencies to assure their active participation.

Dated: November 5, 2004.

Linda S. C. Rundell,

New Mexico State Director.

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Extension of the Public Review Period for the Draft Environmental Impact Statement for the Oil and Gas Management Plan, Big Thicket National Preserve

AGENCY: National Park Service, Department of the Interior.

SUMMARY: This notice informs the public that the comment period is extended.

DATES: The comment period is extended 30 days, to March 10, 2005.

ADDRESSES: The OGMP/DEIS will be available for public review and comment at the following locations: Office of the Superintendent, Art Hutchinson, Big Thicket National Preserve, 3785 Milam Street, Beaumont,

Texas 77701–4724, Telephone: (409) 951–6802; Office of Minerals/Oil and Gas Support, Intermountain Region, National Park Service, 1100 Old Santa Fe Trail, Santa Fe, New Mexico 87501, Telephone: (505) 988–6095; Planning and Environmental Quality, Intermountain Region, National Park Service, 12795 W. Alameda Parkway, Lakewood, Colorado 80228, Telephone: (303) 969–2377; Office of Public Affairs, Department of the Interior, 18th and C Streets NW., Washington, DC 20240, Telephone: 202–208–6843. The OGMP/DEIS can also be downloaded at *http://www.nps.gov/bith/pphtml/documents.html*. A printed copy or CD is also available, upon request, from Linda Dansby, EIS Project Manager, while supplies last.

FOR FURTHER INFORMATION CONTACT: Linda Dansby, EIS Project Manager, Office of Minerals/Oil and Gas Support, Intermountain Region, P.O. Box 728, Santa Fe, New Mexico 87504–0728, telephone (505) 988–6095.

SUPPLEMENTARY INFORMATION: Notices of availability of the Draft Environmental Impact Statement for the Oil and Gas Management Plan, Big Thicket National Preserve, Texas, were published in the **Federal Register** by the National Park Service on December 13, 2004, (69 FR 72214–72215) and by the U.S. Environmental Protection Agency on December 10, 2004. (EIS No. 040555) (69 FR 71811). The 60-day public review period began on the day of the EPA's publication and would have ended on February 8, 2005.

Dated: January 7, 2005.

BILLING CODE 4312–CB–P

DEPARTMENT OF THE INTERIOR

National Park Service

Mississippi National River and Recreation Area, Environmental Impact Statement Concerning the Disposition of the Bureau of Mines, Twin Cities Research Center Main Campus, Hennepin County, MN

AGENCY: National Park Service, Department of the Interior.

ACTION: Notice of Intent to prepare an Environmental Impact Statement concerning disposition of the former Bureau of Mines, Twin Cities Research Center Main Campus, Hennepin County, Minnesota.

SUMMARY: Pursuant to the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C), the National Park Service (NPS) will prepare an environmental impact statement (EIS) in partnership with the U.S. Fish and Wildlife Service, Region 3, concerning disposition of the former Bureau of Mines, Twin Cities Research Center Main Campus (Center), Hennepin County, near Minneapolis, Minnesota, and within the Mississippi National River and Recreation Area (MNRRA), a unit of the National Park System. The EIS will consider a range of alternatives for disposition of the Center and will be part of a planning process that will span three to four years, ending with a record of decision. There has been considerable public interest in the disposition of the Center. Some of the issues identified to date concern preservation and protection of cultural and natural resources, including protection of the groundwater associated with Coldwater Spring, and continued public access to the site.

The NPS anticipates starting the public scoping process for the EIS in February 2005. The NPS will prepare a scoping newsletter in the coming months that will identify issues and inform the public of the schedule for the EIS process and dates for upcoming meetings. To receive a copy of the newsletter, telephone or e-mail the NPS at the address listed below. Public scoping will occur through open public meetings and newsletters to State and Federal Agencies; federally recognized Indian Tribes, neighborhood community groups, county commissioners, local organizations, the congressional delegation, local elected officials, and other interested members of the public. All interested persons, organizations, and agencies are encouraged to submit comments and suggestions on issues, concerns and future uses of the Center that should be addressed in the EIS. Public meetings and site visits of the Center will be held throughout the spring and summer of 2005.

In addition to attending the upcoming scoping meetings, interested parties may provide comments on this initial phase of developing alternatives for the EIS. Send or e-mail comments to the NPS address listed below.

DATES: Specific dates, times, and locations of upcoming public meetings will be announced in the St. Paul Pioneer Press and the Minneapolis Star Tribune newspapers, on the Internet at *http://www.nps.gov/miss/bom,* and will also be available by contacting the NPS office listed in the contact information below.

ADDRESSES: The National Park Service, Mississippi National River and Recreation Area, 111 Kellogg Blvd East, St. Paul, Minnesota, telephone: 651–290–3030. E-mail: *miss_bomcomments@nps.gov.*

FOR FURTHER INFORMATION CONTACT: General information about MNRRA is available on the Internet at: *http://www.nps.gov/miss;* information specific to the proposed action is available at: *http://www.nps.gov/miss/bom.*

SUPPLEMENTARY INFORMATION: If you wish to comment on any issues associated with the EIS, you may submit your comments by any one of several methods. You may mail or hand deliver comments to the address listed in the contact information section of this notice or via the Internet at *miss_bomcomments@nps.gov.* Due to concerns regarding computer viruses, comments will not be accepted as attachments. All comments you provide must be within the body of the e-mail. Be sure to include your name and return street address in your Internet message. Our practice is to make comments, including the names, home addresses, and other personal identifying information of commenters, available for public review during regular business hours. Individual commenters may request that we withhold specified personal identifying information from the public record, which we will honor to the extent allowable by law. There, also, may be circumstances in which, on our own initiative, we would withhold from the public record a commenter's identity, as allowable by law. If you wish us to withhold any of your personal identifying information from the public record you must state this prominently at the beginning of your comment and identify the specific information you wish us to withhold. We cannot withhold an entire comment from the public record. We will make all commenter's submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for inspection in the public record.

Dated: October 27, 2004.

Ernest Quintana,

Regional Director, Midwest Region.

BILLING CODE 4312–98–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[DES 05–06]

Humboldt Project Conveyance, Pershing, Churchill and Lander Counties, Nevada

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of Availability of the Draft Environmental Impact Statement (DEIS) and notice of public hearing.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA) of 1969, as amended, the Bureau of Reclamation (Reclamation) has prepared a DEIS to evaluate the potential effects of conveying title of the Humboldt Project (Project) and associated lands to the Pershing County Water Conservation District (PCWCD), State of Nevada, Lander County and Pershing County. The action is needed to comply with Title VIII of Public Law 107–282 which directs Reclamation to transfer title of the Project to the entities listed above.

DATES: Submit written comments on the Draft EIS on or before March 28, 2005, at the address provided below.

Public hearings will be held to accept oral and written comments on the DEIS:

- Monday, March 14, 2005, 12:30 p.m. to 2:30 p.m., Lovelock, Nevada;
- Monday, March 14, 2005, 7 p.m. to 9 p.m., Battle Mountain, Nevada;
- Tuesday, March 15, 2005 6:30 p.m. to 8:30 p.m., Reno, Nevada.

ADDRESSES: The public hearings will be held at the following locations:

- Lovelock, Nevada—Lovelock Community Center, 820 Sixth Street;
- Battle Mountain, Nevada—Battle Mountain Civic Center, 625 South Broad Street;
- Reno, Nevada—Washoe County Dept. of Water Resources, 4930 Energy Way.

Comments should be sent to Caryn Huntt DeCarlo, Bureau of Reclamation, Lahontan Basin Area Office, 705 N Plaza, Room 320, Carson City, NV 89701; or faxed to (775) 882–7592; or e-mail to *chunttdecarlo@mp.usbr.gov*.

A copy of the document may be obtained by writing to Greystone Environmental Consultants, 401 West Baseline Road, Ste. 204, Tempe, AZ 85283, or by calling (480) 775–6330. The DEIS is accessible from the following Web site: *http://www.usbr.gov/mp/nepa/nepa_projdetails.cfm?Project_ID=550*.

FOR FURTHER INFORMATION CONTACT: Caryn Huntt DeCarlo, Bureau of Reclamation, Lahontan Basin Area Office, 705 N Plaza, Room 320, Carson City, NV 89701, telephone (775) 884–8352.

SUPPLEMENTARY INFORMATION: The Project is located along the Humboldt River in northwestern Nevada. Reclamation began Project construction in 1935 and in 1941 the first water was delivered to agricultural lands in the Lovelock Valley from storage in Rye Patch Reservoir. PCWCD assumed operation of the Project in 1941. PCWCD has had several Project repayment contracts with Reclamation that have all been repaid. Project features include Battle Mountain Community Pasture, Rye Patch Dam and Reservoir, and the Humboldt Sink. Battle Mountain Community Pasture, located near Battle Mountain, is approximately 30,000 acres and is managed for grazing by the PCWCD under a lease agreement with Reclamation. Rye Patch Reservoir is located 26 miles upstream from Lovelock, is 21 miles in length, and has a capacity of 190,000 acre-feet. The State of Nevada manages the recreation at the reservoir under a management agreement with Reclamation and the PCWCD. The Humboldt Sink is also part of the Project and is managed by the State of Nevada under a management agreement with Reclamation.

Copies of the DEIS are available for public inspection and review at the following locations:

- Bureau of Reclamation, Lahontan Basin Area Office, 705 N Plaza, Room 320, Carson City, Nevada, (775) 884–8352.
- Pershing County Water Conservation District Office, Lovelock, Nevada, (775) 273–2293.
- Nevada Division of State Parks, 1300 South Curry Street, Carson City, Nevada (775) 687–4384.
- Nevada Division of Wildlife, 1100 Valley Road, Reno, Nevada, (775) 688–1500.
- Lander County Court House, 315 South Humboldt, Battle Mountain, Nevada, (775) 635–5195.
- Pershing County Court House, 400 Main Street, Lovelock, Nevada, (775) 273–2613.
- Humboldt County Court House, 25 West 5th Street, Winnemucca, Nevada, (775) 623–6369.

Libraries:

- Reno Public Library, 301 South Center Street, Reno, Nevada, (775) 328–2586.
- Pershing County Library, 1125 Central Avenue, Lovelock, Nevada, (775) 273–2216.
- Humboldt County Library, 85 East 5th Street, Winnemucca, Nevada, (775) 623–6388.
- Battle Mountain County Library, 625 South Broad Street, Battle Mountain, Nevada, (775) 635–2534.
- Elko County Library, 720 Court Street, Elko, Nevada, (775) 738–3066.

Hearing Process Information. The purpose of the public hearing is to provide the public with an opportunity to comment on environmental issues addressed in the DEIS. Written comments will also be accepted. Persons needing reasonable accommodations in order to attend and participate in the public meeting should contact Sandra Fairchild by telephone at (480) 775–6330; or fax (480) 775–6253 for accessibility accommodations, including sign language interpreters or other auxiliary aids. Requests should be made within 10 business days of the hearing, to allow sufficient time to arrange for accommodation. Requests to make oral comments at the public hearings may be made at each hearing. Comments will be recorded by a court reporter. Speakers will be called in the order of their requests. In the interest of available time, each speaker will be asked to limit oral comments to 5 minutes. Longer comments should be summarized at the public hearing and submitted in writing either at the public hearing or identified as hearing comments and mailed to be received by Caryn Huntt DeCarlo no later than close of business on April 1, 2005.

Our practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There may also be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public disclosure in their entirety.

Dated: January 18, 2005.

Kirk C. Rodgers,

Regional Director, Mid-Pacific Region.

BILLING CODE 4310–MN–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–653 (Second Review)]

Sebacic Acid From China

AGENCY: United States International Trade Commission.

ACTION: Revised schedule for the subject review.

EFFECTIVE DATES: January 25, 2005.

FOR FURTHER INFORMATION CONTACT: Jai Motwane (202–205–3176), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*http://www.usitc.gov*). The public record for this review may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov*.

SUPPLEMENTARY INFORMATION: On July 28, 2004 (69 FR 45075), the Commission published a notice in the **Federal Register** scheduling a full five-year review concerning the antidumping duty order on sebacic acid from China. Pursuant to 19 U.S.C. 1675 (c)(5)(B),[1] the Commission has extended the review period by up to 90 days.

The record in this review will be reopened and parties may submit final comments on any new information on or before April 21, 2005. Such final comments must comply with section 207.68 of the Commission's rules.

For further information concerning this review, see the Commission's notice cited above and the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and F (19 CFR part 207).

Authority: This review is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to sections 201.35 and 207.62 of the Commission's rules.

By order of the Commission.

[1] As a transition order five-year review, the subject review is extraordinarily complicated pursuant to section 751(c)(5)(C) of the Tariff Act of 1930.

Issued: January 25, 2005.

Marilyn R. Abbott,

Secretary to the Commission.

[FR Doc. 05–1655 Filed 1–27–05; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Bureau of Alcohol, Tobacco, Firearms and Explosives

Agency Information Collection Activities: Proposed Collection; Comments Requested

ACTION: 60-day notice of information collection under review: Firearms Transaction Record Part II—Intrastate Non-Over-the-Counter.

The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for ''sixty days'' until March 29, 2005. This process is conducted in accordance with 5 CFR 1320.10.

If you have comments, especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Cherie Knoblock, Firearms Enforcement Branch, Room 7202, 650 Massachusetts Avenue NW., Washington, DC 20226.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* Extension of a currently approved collection.

(2) *Title of the Form/Collection:* Firearms Transaction Record Part II—Intrastate Non-Over-the-Counter.

(3) *Agency Form Number, if Any, and the Applicable Component of the Department of Justice Sponsoring the Collection:* Form Number: ATF F 4473 Part II (5300.9). Bureau of Alcohol, Tobacco, Firearms and Explosives.

(4) *Affected Public Who Will be Asked or Required to Respond, as Well as a Brief Abstract:* Primary: Individuals or households. Other: Business or other for-profit. The form is used to determine the eligibility of a person to receive a firearm from a Federal firearms licensee and to establish the identity of the buyer. The form is also used in law enforcement investigations to trace firearms or to confirm criminal activity.

(5) *An Estimate of the Total Number of Respondents and the Amount of Time Estimated for an Average Respondent to Respond:* It is estimated that 500 respondents will complete a 20 minute form.

(6) *An Estimate of the Total Public Burden (in Hours) Associated With the Collection:* There are an estimated 167 annual total burden hours associated with this collection.

If additional information is required contact: Brenda E. Dyer, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Patrick Henry Building, Suite 1600, 601 D Street NW., Washington, DC 20530.

Dated: January 25, 2005.

Brenda E. Dyer,

Department Clearance Officer, Department of Justice.

[FR Doc. 05–1582 Filed 1–27–05; 8:45 am]

BILLING CODE 4410–FY–P

DEPARTMENT OF JUSTICE

Office of Justice Programs

Agency Information Collection Activities: Proposed Collection; Comments Requested

ACTION: 60-day notice of information collection under review: 2005 National Survey of Prosecutors.

The Department of Justice (DOJ), Office of Justice Programs (OJP), has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for ''sixty days'' until March 29, 2005. This process is conducted in accordance with 5 CFR 1320.10.

If you have comments, especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Steven W. Perry, Bureau of Justice Statistics, Office of Justice Programs, Department of Justice, 810 Seventh Street, NW., Washington, DC 20531.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* Reinstatement, with change, of previously approved collection for which approval has expired.

(2) *Title of the Form/Collection:* 2005 National Survey of Prosecutors.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form Number: NSP–05. Bureau of Justice Statistics, Office of Justice Programs, Department of Justice.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* The NSP–05 is the only collection effort that provides basic information on prosecutorial office staffing and operations, use of innovative prosecution techniques, felony and misdemeanor caseloads, prosecution of computer related crimes, juvenile offenses, and use of DNA evidence.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: It is estimated that 310 surveys, requiring approximately 30 minutes to complete, will be submitted to the State Prosecutor Offices in each selected district.

(6) An estimate of the total public burden (in hours) associated with the collection: The estimated public burden associated with this collection is 155 hours.

If additional information is required contact: Brenda E. Dyer, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Patrick Henry Building, Suite 1600, 601 D Street NW., Washington, DC 20530.

Dated: January 25, 2005.

Brenda E. Dyer,

Department Clearance Officer, Department of Justice.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Employment Standards Administration; Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled ''General Wage Determinations Issued Under the Davis-Bacon and Related Acts,'' shall be the minimum paid by

contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S–3014, Washington, DC 20210.

Modification to General Wage Determination Decisions

The number of the decisions listed to the Government Printing Office document entitled ''General Wage Determinations Issued Under the Davis-Bacon and related Acts'' being modified are listed by Volume and State. Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled ''General Wage determinations Issued Under the Davis-Bacon And Related Acts''. This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

General wage determinations issued under the Davis-Bacon and related Acts are available electronically at no cost on the Government Printing Office site at *www.access.gpo.gov/davisbacon.* They are also available electronically by subscription to the Davis-Bacon Online Service (*http://davisbacon.fedworld.gov*) of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at 1–800–363–2068. This subscription offers value-added features such as electronic delivery of modified wage decisions directly to the user's desktop, the ability to access prior wage decisions issued during the year, extensive Help desk Support, etc.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate Volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, D.C. this 19 day of January 2005.

John Frank,

Acting Chief, Branch of Construction Wage Determinations.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 05–008]

NASA Nuclear Systems Strategic Roadmap Committee; Meeting

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a meeting of the NASA Nuclear Systems Strategic Roadmap Committee.

DATES: Tuesday, February 15, 2005, 8 a.m. to 7:30 p.m., Wednesday, February 16, 2005, 8 a.m. to 7:30 p.m., eastern standard time.

ADDRESSES: University of Maryland University College, The Inn and Conference Center, 3501 University Blvd. E., Adelphi, MD 20783–7998, (301) 985–7303.

FOR FURTHER INFORMATION CONTACT: Ms. Victoria Friedensen, Exploration Systems Directorate, National Aeronautics and Space Administration, Washington, DC 20546, (202) 358–1916.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up

to the seating capacity of the meeting room. Attendees will be requested to sign a register.

The agenda for the meeting is as follows:

—Launch Approval Processes
—Public Engagement
—Radioisotope-based Power Sources
—Fission-based Power Systems
—Nuclear Thermal Propulsion

It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants.

P. Diane Rausch,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

NASA Space Science Advisory Committee, Solar System Exploration Subcommittee; Meeting

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of meeting.

SUMMARY: The National Aeronautics and Space Administration announces a meeting of the NASA Space Science Advisory Committee (SScAC), Solar System Exploration Subcommittee (SSES).

DATES: Monday, February 14, 2005, 8:30 a.m. to 5:30 p.m., and Tuesday, February 15, 2005, 8:30 a.m. to 5 p.m.

ADDRESSES: Santa Fe Institute, Noyce Conference Room, 1399 Hyde Park Road, Sante Fe, NM 87501.

FOR FURTHER INFORMATION CONTACT: Dr. Michael H. New, Science Mission Directorate, National Aeronautics and Space Administration, Washington, DC 20546, (202) 358–1766, *michael.h.new@nasa.gov*.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the room. The agenda for the meeting is as follows:

—Status of Solar System Exploration
—Status of Mars Exploration Program
—Update on the Discovery Program
—Kepler Mission Update
—Update on Deep Space Network
—Status of Robotic Lunar Exploration Program
—Update on Jupiter Icy Moons Orbiter

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants. Attendees will be requested to sign a visitor's register.

Dated: January 21, 2005.

[Notice 05–009]

NASA Sun-Solar System Connection Strategic Roadmap Committee; Meeting

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a meeting of the NASA Sun-Solar System Connection Strategic Roadmap Committee.

DATES: Thursday, February 10, 2005, 8:30 a.m. to 5 p.m., Friday, February 11, 2005, 8:30 a.m. to 5 p.m. eastern standard time.

ADDRESSES: NASA Headquarters, Auditorium (February 10) and room 6H46 (February 10 and 11), 300 E Street, SW., Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Dr. Barbara Giles, 202–358–1762.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the meeting room.

The agenda for the meeting is as follows:

—Sun-Earth Systems Program Overview and Status
—Reports on Sun-Solar System Connection Roadmap foundation work
—Discussion of science objectives and missions under study

Attendees will be requested to sign a register and to comply with NASA security requirements, including the presentation of a valid picture ID, before receiving an access badge. Foreign nationals attending this meeting will be required to provide the following information no less than 3 working days prior to the meeting: Full name; gender; date/place of birth; citizenship; visa/green card information (number, type, expiration date); passport information (number, country, expiration date); employer/affiliation information (name of institution, address, country, phone); title/position of attendee. To expedite admittance, attendees with U.S. citizenship can provide identifying information in advance by contacting Wanda Doyle via e-mail at *wdoyle@hq.nasa.gov* or by telephone at (202) 358–2206.

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Dated: January 21, 2005.

NATIONAL SCIENCE FOUNDATION

Committee on Equal Opportunities in Science and Engineering; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

Name: Committee on Equal Opportunities in Science and Engineering (1173).

Dates and Time: February 15, 2005, 8:30 a.m.–5:30 p.m. and February 16, 2005, 8:30 a.m.–2 p.m.

Place: National Science Foundation, 4201 Wilson Boulevard, Room 1235 S, Arlington, VA 22230.

Type of Meeting: Open.

Contact Person: Dr. Margaret E.M. Tolbert, Senior Advisor and Executive Liaison, CEOSE, Office of Integrative Activities, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230, Telephone: (703) 292–8040.

Minutes: May be obtained from the Executive Liaison at the above address.

Purpose of Meeting: To provide advice and recommendations concerning broadening participation in science and engineering.

Agenda:

Tuesday, February 15, 2005

Welcome by the CEOSE Chair
Introductions
Review of CEOSE Meeting Agenda and Minutes
Discussions/Presentations:
- Broadening Participation in Chemistry—Dr. Arthur B. Ellis, Director of the Chemistry Division/National Science Foundation
- Congressionally Required Decennial and Biennial Reports Prepared by CEOSE Members
- Dialogue with Dr. Arden L. Bement, Jr., Director of the National Science Foundation

Wednesday, February 16, 2005

Opening Statement by the CEOSE Chair
Discussions/Presentations:
- Continuation of Unfinished Discussions of February 15, 2005
- Response to Action Items in the CEOSE Meeting Minutes
- Reports on NSF Advisory Committees
- Plans for the Final Preparation and Distribution of the Single-Volume Decennial and 2004 Biennial Report to Congress
- Information on the Nomination of New Members
- Refinement of Recommendations by CEOSE
- Selection of Dates for Future CEOSE Meetings

Dated: January 25, 2005.

Susanne Bolton,

Committee Management Officer.

BILLING CODE 7999–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. PAPO–00, ASLBP No. 04–829–01–PAPO NEV–01]

Atomic Safety and Licensing Board; Department of Energy (High Level Waste Repository: Pre-Application Matters); First Case Management Order (Regarding Preparation of Privilege Logs)

January 24, 2005.

Before Administrative Judges: Thomas S. Moore, Chairman, Alex S. Karlin and Alan S. Rosenthal

The purpose of this order is to promote good management and efficiency in the resolution of documentary privilege disputes during the pre-license application phase of the expected application by the United States Department of Energy (DOE) for a license to construct a repository for high-level radioactive waste (HLW) at Yucca Mountain, Nevada. DOE, the NRC Staff, the State of Nevada (State), other potential parties, interested Indian Tribes, and interested units of local government (collectively Potential Participants) are directed to submit their responses to this order within the times specified below.

I. Background

On August 31, 2004, this Board granted the motion of the State to strike DOE certification regarding its production of documentary material on the grounds, *inter alia*, that the gaps in its document production, and the incompleteness of DOE's review of the documents for claims of privilege, showed that DOE had not made all documentary material available as required by 10 CFR 2.1003(a). LBP–04–20, 60 NRC 300 (2004). In that decision, we noted that DOE had claimed approximately one million of its documents were entitled to some form of privilege and yet had not completed its privilege review for several hundred thousand of these documents. 60 NRC at 316, 318. Underscoring the magnitude of the issue, counsel for the State indicated that, given DOE's numerous claims of privilege, ''we're going to be [before the Board] thousands of times asking for documents.'' 60 NRC at 328 n.47. Although our ruling of August 31, 2004 temporarily postponed such privilege disputes, once DOE re-submits and re-certifies its documents, the controversies will begin anew.

Even assuming that DOE's pending document production is of the highest quality, it is now clear that thousands of documents in this proceeding (whether

from DOE or other participants) will be subject to various claims of privilege and that hundreds, if not thousands, of these claims will be disputed. This threatens to delay the proceeding. But, as we noted in August, ''a full and fair 6-month document discovery period, where all of DOE's documents are to be available to the potential parties and the public, is a necessary precondition to the development of well articulated contentions and to the Commission's ability to meet the statutory mandate to issue a final decision within three years.'' 60 NRC at 315. Mindful of the enormous task that looms before us, it is incumbent on this Board to develop procedures to manage and to resolve efficiently a very large number of privilege disputes.

II. Regulatory Structure

Development of an efficient plan for managing the privilege disputes in this proceeding first requires an understanding of the scope of the types of privilege claims that are available, and of the existing regulatory and technical structure.

A. Scope of Available Privilege Claims

As we explained in our August decision, the regulations applicable to the Yucca Mountain proceeding, 10 CFR Part 2, Subpart J, require that DOE and other Potential Participants make ''all documentary material'' available. 10 CFR 2.1003(a)(1); *see generally* 60 NRC at 311. Documents must be produced electronically and will be placed on the NRC Licensing Support Network (LSN). The full text and an ''electronic bibliographic header'' (Header) is required for all documents except for documents ''(i) for which a claim of privilege is asserted; (ii) which constitutes confidential financial or commercial information; or (iii) which constitute safeguards information,'' where only a Header is required. 10 CFR 2.1003(a)(4)(i)–(iii) (collectively ''privileges'' or ''privileged documents'').[1]

The scope of the privileges available under 10 CFR 2.1003(a)(4)(i) is addressed in 10 CFR 2.1006(a), that states:

> [T]he traditional discovery privileges recognized in NRC adjudicatory proceedings and the exceptions from disclosure in § 2.390 may be asserted by potential parties, interested States, local governmental bodies, Federally-recognized Indian Tribes, and parties. In addition to Federal agencies, the deliberative process privilege may also be asserted by States, local governmental bodies and Federally-recognized Indian Tribes.

The regulation specifies that the Board may, in appropriate circumstances, deny claims of privilege, order the document produced, and/or require document production under an appropriate protective order.

The exemptions from disclosure specified in 10 CFR 2.390 are those specified in the Freedom of Information Act (FOIA), 5 U.S.C. 552. The regulation sets forth the general rule that NRC must make all records and documents available to the public, and the nine FOIA exemptions from disclosure. These nine exemptions include documents that (1) are properly classified; (2) relate solely to internal personnel rules and practices; (3) are specifically exempted from disclosure by a statute that leaves no discretion on the issue; (4) are trade secrets or privileged or confidential commercial or financial information; (5) are interagency or intra-agency memoranda that would not be available by law to a party other than in litigation;[2] (6) personnel and medical files, etc.[3]

In sum, the Subpart J regulations establish numerous categories of privileged documents with respect to which the person producing them need only provide a ''Header.'' These categories include:

> (1) The traditional discovery privileges recognized in NRC proceedings (e.g., the attorney work product privilege and the attorney-client communication privilege);
> (2) Confidential financial or commercial information;
> (3) Safeguards information;
> (4) The deliberative process privilege information (for governmental entities); and
> (5) The nine FOIA exemptions of 10 CFR 2.390(a).

For each of these privileges, there are specific elements or requirements that must be met, and the elements vary substantially depending on the privilege. For example, a person claiming that a document is protected under the attorney-client communication privilege generally must establish that the document was (a) to or from an attorney acting in his or her capacity as an attorney; (b) written primarily for the purpose of seeking or providing legal advice; and (c) not shared or disseminated to persons outside of the attorney-client relationship. On the other hand, in order for a document to qualify under the deliberative process privilege the person claiming the privilege generally needs to show that it is pre-decisional, deliberative, and that an appropriately senior agency official personally reviewed and specifically identified the documents as meeting the requirements of the deliberative process privilege.[4] In order to determine whether a document properly qualifies for a specific privilege, the Board must be provided with the facts showing that the document satisfies all of the elements applicable to the privilege claimed.

B. Content of Electronic Bibliographic Headers

Turning to the prescribed content of the Headers, they do not appear to provide the parties or the Board with the information necessary to determine whether a given document satisfies the elements applicable to the privilege claimed for it. More fundamentally, the regulations do not require that the Header state that a withheld document is claimed to be privileged, much less the type of privilege claimed.[5] Similarly, there is no requirement that the person producing the document provide the essential information that would normally be required in a litigation privilege log, *i.e.*, the facts relating to the document that represent the elements of each privilege. ''Bibliographic header'' is defined as ''the minimum series of descriptive fields that a potential party, interested governmental participant, or party must submit with a document or other material.'' 10 CFR 2.1001. But no regulation lists or mandates this ''minimum series of descriptive fields'' or their contents.

The LSN Administrator and the LSN Advisory Review Panel, neither of which have authority to issue binding regulations, have attempted to fill this gap by issuing guidance. Guidance document ''LSN Baselined Design Requirements'' specifies a ''Recommended Participant

[1] A Header only is also acceptable for a document that is not suitable for image or searchable full text. 10 CFR 2.1003(a)(3).

[2] This FOIA exclusion is related to, but not identical with, the deliberative process privilege.

[3] There is some obvious overlap between the three categories of documents excluded under 10 CFR 2.1003(a)(4)(i)–(iii) and the nine FOIA exclusions. For example, section 2.1003(a)(4)(I) excludes ''confidential financial or commercial information,'' whereas section 2.390(a)(4) (FOIA Exemption 4) excludes ''trade secrets and commercial or financial information obtained from a person and privileged or confidential.'' These are not identical.

[4] The descriptions of the elements of the attorney-client communication privilege and the deliberative process privilege are provided to illustrate their differences, and are not to be construed as this Board's final interpretation of the elements of these privileges.

[5] A person may provide only a Header for a document that (a) is not technically suitable for electronic text display or (b) is claimed to be privileged. *See* 10 CFR 2.1003(a)(3) and (4). But the regulations and guidance do not require the person to state which of the two reasons justify his or her withholding of the document's text.

Bibliographic Header Field Structure,'' that suggests that each Header include fields for items such as: Addressee name, addressee organization, author name, author organization, comments, descriptors, document date, document type, and title.[6] The guidance describes the ''comments'' field basically as a catch-all field that can be used to explain (a) whether the document was claimed to be privileged and (b) if so, why.[7] The guidance document divides the suggested fields into three categories—mandatory, required if available, and optional—and the comments field is listed as ''optional.''

Although the recommended Header fields help identify a document (name of author, date, subject), they do not provide the information necessary to assess whether a document qualifies for any given privilege. For example, although the recommended Header fields include the ''addressee name'' and the ''author name,'' they do not provide the information necessary to determine whether the document qualifies for the attorney-client communication privilege, *i.e.*, (a) whether the addressee or author was an attorney, (b) whether the addressee and author had an attorney-client relationship, (c) whether the document was written for purposes of requesting or providing legal advice, and (d) whether the document was shared or disseminated to persons outside of the attorney-client relationship.[8] Alternatively, the Header fields provide no information about whether the document might qualify for the deliberative process privilege, such as was it pre-decisional and was it deliberative.

In short, even if a person were inclined to follow the optional recommendations of the LSN Administrator's non-binding guidance, the information in the Header fields would be of little assistance in resolving privilege disputes.

[6] LSN Baselined Design Requirements (June 5, 2001), at 17, Table A, 22–23.

[7] The guidance document states that the ''comments'' field should include ''any information not covered in other fields which the submitter or indexer believes would be of help to identify or retrieve the document, or to further explain any field entry for the document * * * This field may include summaries of documents that are privileged.'' *Id.* at 17.

[8] Of course the Board, by inspecting the document, might glean some or all of this information. But this misses the point, which is that it is literally impossible for this Board to review individually 100,000 or a million documents to attempt to determine what privilege, if any, the document provider is claiming and whether the document meets the necessary elements.

C. Privilege Logs

Privilege logs are the tool employed to manage and to resolve privilege claims. For example, Rule 26(b)(1) of the Federal Rules of Civil Procedure states that a party ''may obtain discovery regarding any matter, not privileged, that is relevant to the claim or defense of any party'' and further provides:

> When a party withholds information otherwise discoverable under these rules by claiming that it is privileged or subject to protection as trial preparation material, the party shall make the claim expressly and shall describe the nature of the documents, communications, or things not produced or disclosed in a manner that, without revealing information itself privileged or protected, will enable other parties to assess the applicability of the privilege or protection.

Fed. R. Civ. Proc. 26(b)(5). The ''privilege log'' is the mechanism whereby a party claiming the privilege ''describes the nature of the documents * * * in a manner that * * * will enable other parties to assess the applicability of the privilege or protection.'' The log is generally a chart, listing each document for which a privilege applies, and providing, in different columns or fields, the information necessary to assess whether the privilege legitimately applies.

The Commission's general rules of practice for adjudicatory proceedings support the use of privilege logs. The rules governing Subpart G proceedings are virtually identical to the above quoted provisions of Rule 26. *See* 10 CFR 2.705(b)(1) and (4). Even in Subpart L proceedings, where discovery is limited to certain mandatory disclosures, the rules require each party to provide a privilege log—''a list of documents otherwise required to be disclosed for which a claim of privilege or protected status is being made, together with sufficient information for assessing the claim of privilege or protected status of the documents.'' 10 CFR 2.336(a)(3).

Although the regulations for the Yucca Mountain HLW proceeding do not incorporate 10 CFR 2.705 or 2.336 (*see* 10 CFR 2.1001), privilege logs remain an authorized and necessary tool under Subpart J. This Board, as the pre-license application presiding officer, is required and authorized to resolve privilege claims, *see* 10 CFR 2.1006(b) and 2.1010(b), and possesses all the general powers of a presiding officer, including the power to manage the process, rule on offers of proof, and avoid delay. *See* 10 CFR 2.1010(e) and 2.319.

Privilege logs will vary from case to case.[9] In many lawsuits, only a few dozen, or perhaps a hundred documents will be listed on a privilege log. In most cases, only two privileges are asserted—the attorney-client communication privilege and the attorney work product privilege. In these typical cases the privilege logs will be short and relatively simple. In other cases, privilege logs are larger and more complicated. For example, in the tobacco claims litigation involving massive numbers of documents, the court issued a detailed case management plan and procedure for resolving discovery and privilege disputes.[10] Likewise, in FOIA cases, where there are nine FOIA exemptions, rather than the two traditional privileges, the logs may be more complicated because each type of FOIA exemption has its own sub-elements. *See Vaugh* v. *Rosen*, 484 F.2d 820 (DC Cir. 1973). Certainly in any case involving a significant number of privileged documents, it is critical to establish at an early point the information that the privilege log must contain if there is to be any hope that the case is to proceed fairly and expeditiously.[11]

III. Order

Based on the foregoing, the Board hereby orders DOE, the NRC Staff and the State, together with any other Potential Participants who may wish to respond, to meet, either telephonically or in person, within 20 days of the publication of this order in the **Federal Register**, for the purpose of developing and agreeing on (a) a joint proposed format for privilege logs and (b) associated procedures for resolving

[9] *See* Robert J. Nelson, *The Importance of Privilege Logs*, The Practical Litigator, 27, 29 (Mar. 2000). *See also Heavin* v. *Owens-Corning Fiberglass*, No. 02–2572–KHV–DJW, 2004 U.S. Dist. LEXIS 2265 *1, *24 (D. Kan. Feb. 3, 2004) (describing what a privilege log should include ''at a minimum''); *Hill* v. *McHenry*, No. 99–2026–CM, 2002 U.S. Dist. LEXIS 6637 *1, *8 (D. Kan. Apr. 10, 2002) (listing requirements of satisfactory privilege log).

[10] *United States* v. *Phillip Morris, Inc.*, Ninth Case Management Order, 99–CV–2496, 2001 U.S. Dist. LEXIS 12603 *1 (D.D.C. Mar. 27, 2001).

[11] As one commentator has noted that ''it is in the producing party's interest to provide the absolute minimum amount of information about the document on the privilege log; downplay the potential importance of the document, disguise the weaknesses associated with the privilege or work product claim; and ultimately to delay producing or never produce the document.'' Robert J. Nelson, *The Importance of Privilege Logs*, The Practical Litigator, 27, 29 (Mar. 2000). To the contrary, it is in the public interest in this case, as well as the interest of sound judicial management, that the privilege logs contain all necessary information, so that privilege disputes can be minimized and promptly resolved.

privilege disputes. The joint proposed format for the privilege logs shall cover all categories of privilege or protected status claims available under Subpart J and relevant to this proceeding. *See* II.A.(1)–(5) above. For each category of claimed privilege (e.g., attorney-client communication, deliberative, Privacy Act), the joint proposed format for that particular privilege log should specify and define the sub-elements of information that must be provided in order to enable other parties to assess the applicability of the privilege or protection without revealing the privileged or protected information itself.[12]

The jointly agreed procedures associated with privilege claims and disputes shall be based upon the regulatory requirements and procedures of Subpart J and provide any suggested additional measures or procedures that will avoid, or expedite the resolution of, privilege disputes.[13] For example, the procedure may call for additional conferences between the parties, or for a mechanism for the redaction of small amounts of ''privileged information'' from an otherwise unprivileged document, in lieu of the blanket exclusion of a document. To the maximum extent possible, the privilege logs and procedures should encourage the prompt resolution of privilege disputes by the parties themselves. The proposed procedures should distinguish between those privileges that are absolute, and those that are qualified. The proposed procedures shall maximize the effective use of the LSN.

Not later than 40 days after the publication of this order in the **Federal Register**, DOE, the NRC Staff, and the State shall submit a jointly-agreed proposed case management order to the Board that establishes a proposed format for a privilege log and specifies privilege claim related procedures for this proceeding. They shall allow any other Potential Participant the opportunity to negotiate, to endorse and/or to join in the joint submission. In addition, such other Potential Participants may develop and submit their own joint or individual alternative proposed case management orders on the subject of privilege log formats and procedures.

If DOE, the NRC Staff, and the State are unable to agree upon a joint proposed case management order prescribing the format for a privilege log and associated procedures, then, 50 days after the publication of this order in the **Federal Register**, each of them, and any other Potential Participant shall submit separate proposed case management orders on this subject. In such case, 65 days after publication of this order in the **Federal Register,** each person or entity filing a proposed case management order shall file a supplement identifying and explaining the material differences between its proposed order and the other proposed orders.

It is so ordered.

January 24, 2005, Rockville, Maryland.

Administrative Judge.

Alex S. Karlin,

Administrative Judge.

[FR Doc. 05–1575 Filed 1–27–05; 8:45 am]

BILLING CODE 7590–01–U

[12] For example, DOE and its litigation support contractor, CACI Inc., are using computer software to screen documents for potential claims of privilege as well as teams of people reviewing and evaluating documents for privilege. *See* 60 NRC at 318. This software, and DOE's instructions to these individuals, presumably identify the elements of each category of privilege that DOE is claiming. The NRC, which made its documents available on the LSN on September 30, 2004, presumably developed similar criteria and went through a similar process in evaluating which documents qualified for a privilege.

[13] Appointment of a discovery master, authorized under 10 CFR 2.1018(g), merely pushes the discovery disputes to another level and, therefore, would not appear to be a panacea.

OFFICE OF MANAGEMENT AND BUDGET

2004 List of Designated Federal Entities and Federal Entities

AGENCY: Office of Management and Budget.

ACTION: Notice.

SUMMARY: As required by the Inspector General Act of 1978, as amended (IG Act), this notice provides a list of Designated Federal Entities and Federal Entities.

FOR FURTHER INFORMATION CONTACT: Office of Federal Financial Management, Office of Management and Budget, at (202) 395–3993.

SUPPLEMENTARY INFORMATION: This notice provides a copy of the 2004 List of Designated Federal Entities and Federal Entities which, under the IG Act, the Office of Management and Budget (OMB) is required to publish annually. This list is also posted on the OMB Web site at *http//www.whitehouse.gov/omb.html*.

The list is divided into two groups: Designated Federal Entities and Federal Entities. Designated Federal Entities are listed in the IG Act, except for those agencies that have ceased to exist or that have been deleted from the list. The Designated Federal Entities are required to establish and maintain Offices of Inspector General to: (1) Conduct and supervise audits and investigations relating to programs and operations; (2) promote economy, efficiency, and effectiveness of, and to prevent and detect fraud and abuse in such programs and operations; and (3) provide a means of keeping the entity head and the Congress fully and currently informed about problems and deficiencies relating to the administration of such programs and operations and the necessity for, and progress of, corrective actions.

Federal Entities are defined, in section 8G(a)(1) of the Inspector General Act, as any Government corporation (within the meaning of section 103(1) of title 5, United States Code), any Government controlled corporation (within the meaning of section 103(2) of such title), or any other entity in the Executive Branch of the government, or any independent regulatory agency, but does not include:

(1) An establishment (as defined in section 11(2) of the Inspector General Act) or part of an establishment;

(2) A designated Federal entity (as defined in section 8G(a)(2) of the Inspector General Act) or part of a designated Federal entity;

(3) The Executive Office of the President;

(4) The Central Intelligence Agency;

(5) The Government Accountability Office; or

(6) Any entity in the judicial or legislative branches of the Government, including the Administrative Office of the United States Courts and the Architect of the Capitol and any activities under the direction of the Architect of the Capitol.

Federal Entities are required to report annually to each House of the Congress and OMB on audit and investigative activities in their organizations.

For the Designated Federal Entities list for 2004, there is one addition (the Broadcasting Board of Governors succeeded the Board for International Broadcasting) and one amendment (the designated entity head of Amtrak was changed to the Chairperson who is the chief policymaking officer), for a total of two changes to the 2003 list. For the Federal Entities list for 2004, there are four additions (the Court Services and Offender Supervision Agency for the District of Columbia, the Millennium Challenge Corporation, the U.S. Interagency Council on Homelessness, and the White House Commission on the National Moment of Remembrance) and three deletions (the Commission on

Ocean Policy, the Office of Independent Counsels, and the Pacific Charter Commission), for a total of seven changes to the 2003 list.

The 2004 List of Designated Federal Entities and Federal Entities was prepared in consultation with the U.S. Government Accountability Office.

Linda M. Springer,

Controller, Office of Federal Financial Management.

Herein follows the text of the 2004 List of Designated Federal Entities and Federal Entities:

2004 List of Designated Federal Entities and Federal Entities

The Inspector General Act of 1978, as amended, requires OMB to publish a list of ''Designated Federal Entities'' and ''Federal Entities'' and the heads of such entities. Designated Federal Entities are required to establish Offices of Inspector General and to report semiannually to each House of the Congress and the Office of the Management and Budget summarizing the activities of the Office during the immediately preceding six-month periods ending March 31 and September 30. Federal Entities are required to report annually on October 31 to each House of the Congress and the Office of Management and Budget on audit and investigative activities in their organizations.

Designated Federal Entities and Entity Heads

1. Amtrak—Chairperson.
2. Appalachian Regional Commission—Federal Co-Chairperson.
3. The Board of Governors, Federal Reserve System—Chairperson.
4. Broadcasting Board of Governors—Chairperson.
5. Commodity Futures Trading Commission—Chairperson.
6. Consumer Product Safety Commission—Chairperson.
7. Corporation for Public Broadcasting—Board of Directors.
8. Denali Commission—Chairperson.
9. Election Assistance Commission—Chairperson.
10. Equal Employment Opportunity Commission—Chairperson.
11. Farm Credit Administration—Chairperson.
12. Federal Communications Commission—Chairperson.
13. Federal Election Commission—Chairperson.
14. Federal Housing Finance Board—Chairperson.
15. Federal Labor Relations Authority—Chairperson.
16. Federal Maritime Commission—Chairperson.
17. Federal Trade Commission—Chairperson.
18. Legal Services Corporation—Board of Directors.
19. National Archives and Records Administration—Archivist of the United States.
20. National Credit Union Administration—Chairperson.
21. National Endowment for the Arts—Chairperson.
22. National Endowment for the Humanities—Chairperson.
23. National Labor Relations Board—Chairperson.
24. National Science Foundation—National Science Board.
25. Peace Corps—Director.
26. Pension Benefit Guaranty Corporation—Chairperson.
27. Securities and Exchange Commission—Chairperson.
27. Smithsonian Institution—Secretary.
28. United States International Trade Commission—Chairperson.
29. United States Postal Service—Governors of the Postal Service.

Federal Entities and Entity Heads

1. Advisory Council on Historic Preservation—Chairperson.
2. African Development Foundation—Chairperson.
3. American Battle Monuments Commission—Chairperson.
4. Architectural and Transportation Barriers Compliance Board—Chairperson.
5. Armed Forces Retirement Home—Board of Directors.
6. Barry Goldwater Scholarship and Excellence in Education Foundation—Chairperson.
7. Chemical Safety and Hazard Investigation Board—Chairperson.
8. Christopher Columbus Fellowship Foundation—Chairperson.
9. Commission for the Preservation of America's Heritage Abroad—Chairperson.
10. Commission of Fine Arts—Chairperson.
11. Commission on Civil Rights—Chairperson.
12. Committee for Purchase From People Who Are Blind or Severely Disabled—Chairperson.
13. Court of Appeals for Veterans Claims—Chief Judge.
14. Court Services and Offender Supervision Agency for DC—Director.
15. Defense Nuclear Facilities Safety Board—Chairperson.
16. Delta Regional Authority—Federal Co-Chairperson.
17. Farm Credit System Financial Assistance Corporation—Chairperson.
18. Farm Credit System Insurance Corporation—Chairperson.
19. Federal Financial Institutions Examination Council—Chairperson.
20. Federal Mediation and Conciliation Service—Director.
21. Federal Mine Safety and Health Review Commission—Chairperson.
22. Federal Retirement Thrift Investment Board—Executive Director.
23. Harry S. Truman Scholarship Foundation—Chairperson.
24. Institute of American Indian and Alaska Native Culture and Arts Development—Chairperson.
25. Institute of Museum and Library Services—Director.
26. Inter-American Foundation—Chairperson.
27. James Madison Memorial Fellowship Foundation—Chairperson.
28. Japan-U.S. Friendship Commission—Chairperson.
29. Marine Mammal Commission—Chairperson.
30. Merit Systems Protection Board—Chairperson.
31. Millennium Challenge Corporation—Chief Executive Officer.
32. Morris K. Udall Scholarship and Excellence in National Environmental Policy Foundation—Chairperson.
33. National Capital Planning Commission—Chairperson.
34. National Commission on Libraries and Information Science—Chairperson.
35. National Council on Disability—Chairperson.
36. National Mediation Board—Chairperson.
37. National Transportation Safety Board—Chairperson.
38. National Veterans Business Development Corporation—Chairperson.
39. Neighborhood Reinvestment Corporation—Chairperson.
40. Nuclear Waste Technical Review Board—Chairperson.
41. Occupational Safety and Health Review Commission—Chairperson.
42. Office of Government Ethics—Director.
43. Office of Navajo and Hopi Indian Relocation—Chairperson.
44. Office of Special Counsel—Special Counsel.
45. Overseas Private Investment Corporation—Board of Directors.
46. Presidio Trust—Chairperson.
47. Selective Service System—Director.
48. Smithsonian Institution/John F. Kennedy Center for the Performing Arts—Chairperson.
49. Smithsonian Institution/National Gallery of Art—President.
50. Smithsonian Institution/Woodrow Wilson International Center for Scholars—Director.
51. Trade and Development Agency—Director.
52. U.S. Holocaust Memorial Museum—Chairperson.
53. U.S. Interagency Council on Homelessness—Chairperson.
54. U.S. Institute of Peace—Chairperson.
55. Vietnam Educational Foundation—Chairperson.
56. White House Commission on the National Moment of Remembrance—Chairperson.

BILLING CODE 3110–01–P

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Financial Management; Proposed Policy on Research and Research-Related Grant Terms and Conditions

AGENCY: Executive Office of the President, Office of Science and Technology Policy (OSTP) and Office of Management and Budget (OMB), Office of Federal Financial Management (OFFM).

ACTION: Notice of proposed issuance of policy on terms and conditions for grants under Federal research and research-related programs.

SUMMARY: The Federal Demonstration Partnership (FDP), a streamlining initiative of ten Federal awarding offices and 92 academic and nonprofit research institutions, developed a core set of FDP terms and conditions that it has been using for several years for the implementation of OMB Circular A–110, ''Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations,'' (2 CFR part 215). The OSTP and OFFM request comment on making the FDP terms and conditions a government-wide standard, and broadening their use to all academic and nonprofit grantees, under Federal research and research-related programs.

The proposed policy directive also instructs Federal agencies to minimize the degree to which they supplement the core set with agency-specific, program-specific, or award-specific terms and conditions. The directive should therefore result in the near term in the use of more uniform terms and conditions for Federal research and research-related grants. In parallel with the establishment of this standard for research and research-related grants, an interagency group helping to implement the Federal Financial Assistance Management Improvement Act of 1999 (Public Law 106–107) will continue working toward the longer-term objective of standard award format and content for all Federal grants and cooperative agreements, including government-wide standard terms and conditions.

DATES: Comments must be received by February 28, 2005.

ADDRESSES: Comments should be addressed to Beth Phillips, Office of Federal Financial Management, 725 17th Street, NW., Washington, DC 20503; telephone (202) 395–3993; FAX (202) 395–3952; e-mail *ephillip@omb.eop.gov.* Due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, we encourage respondents to submit comments electronically to ensure timely receipt. We cannot guarantee that comments mailed will be received before the comment closing date.

FOR FURTHER INFORMATION CONTACT: For information on OMB Circular A–110 requirements, contact Beth Phillips at the addresses noted above. For information on the Research Business Models (RBM) Subcommittee see the RBM Web site at *http://rbm.nih.gov,* or contact Geoff Grant at the Office of Science and Technology Policy at 725 17th Street, NW., Washington, DC 20503; e-mail *ggrant@ostp.eop.gov;* telephone (202) 456–6131; FAX (202) 456–6027.

SUPPLEMENTARY INFORMATION

I. Background

This proposal is an initiative of the Research Business Models (RBM) Subcommittee of the Committee on Science (CoS), a committee of the National Science and Technology Council (NSTC). The RBM Subcommittee's objectives include:

- Facilitating a coordinated effort across Federal agencies to address policy implications arising from the changing nature of scientific research, and
- Examining the effects of these changes on business models for the conduct of scientific research sponsored by the Federal government.

The Subcommittee used public comments, agency perspectives, and input from a series of regional public meetings to identify priority areas in which it would focus its initial efforts. In each priority area, the Subcommittee is pursuing initiatives to promote, as appropriate, either common policy, the streamlining of current procedures, or the identification of agencies' and institutions' ''effective practices.'' As information about the initiatives becomes available, it is posted at the Subcommittee's Internet site *http://rbm.nih.gov.*

The objective of one RBM priority area is greater consistency in the format and content of Federal agencies' research grant and cooperative agreement awards. Federal agency awarding offices currently include different requirements in their awards, use different language to state the same requirements, and organize the award content differently. The variation in format and content increases both administrative effort and costs for recipients of Federal awards. More uniformity is possible because most requirements flow from common sources in the OMB circulars and in government-wide statutes and regulations.

Within the priority area on award uniformity, the Subcommittee identified two initiatives—one that could be achieved in the near term and a second that would be a longer-term effort. The proposal in this **Federal Register** notice is the result of the near-term initiative, which is to broaden use of the core set of terms and conditions developed by the FDP for research and research-related grants. The longer-term initiative relies on work being carried out by the Pre-Award Work Group under Public Law 106–107 to develop standard award format and content for all Federal grants and cooperative agreements.

This near-term initiative will broaden use of the core set of terms and conditions developed by the FDP:

- From Federal agencies that participate in the FDP to all Federal agencies that make research and research-related awards (each Federal agency must determine which of its programs are ''research-related'' for purposes of using the terms and conditions).
- From the ten awarding offices in agencies that currently participate in the FDP to all awarding offices in those agencies.
- From research and research-related awards received by universities and nonprofit organizations that participate in the FDP to research and related awards received by all such institutions.

II. Terms and Conditions—General Approaches

While Federal agencies organize their grant and cooperative agreement awards differently, there are three elements that they include in some form. One element is what some agencies call the award notice, which includes basic information such as the name of the recipient organization, the amount of Federal funding under the award, any required cost sharing, the beginning and end dates for Federal support, and the title of the project. Because this information is specific to a particular award, an awarding agency transmits it to the recipient each time an award is made.

The other two elements of the award are the administrative requirements and the national policy requirements with which recipients must comply, which together comprise the award terms and conditions. Examples of administrative

requirements are: Standards that a recipient's financial management, property management, and procurement systems must meet; performance reporting requirements; and rules for use and disposition of supplies and equipment. OMB Circular A–110 (2 CFR part 215) is the government-wide source of administrative requirements for an academic or other nonprofit research institution. An award's administrative terms and conditions therefore must implement that circular. In some cases, awards under a particular program may impose additional administrative requirements due to the nature of the program or its authorizing statute. In a relatively few instances, there also may be award-specific administrative requirements due to the nature of a particular project.

National policy requirements arise from Federal statutes, Presidential executive orders, or regulations with government-wide effect, such as prohibitions against discrimination. Most apply broadly to many or all Federal programs, though some apply only to specific agencies or programs. National policy requirements are included in award terms and conditions to help ensure post-award compliance, notwithstanding any pre-award assurances of compliance an agency requires applicants to submit.

Usually, an awarding office has a set of general terms and conditions that apply to a broad class of awards, which may be all of the awards that office makes or, in some cases, all of the awards the office makes under a particular program. An awarding office's general terms and conditions include the government-wide, as well as agency-specific, administrative requirements and national policy requirements described above, and also may include program-specific requirements. Agencies often do not transmit the general terms and conditions with each award, instead incorporating them by reference in the award notice (*e.g.*, by reference to an Internet site where the agency or office maintains its general terms and conditions). In that case, the agency only needs to transmit with the award notice any award-specific terms and conditions that are required to supplement the general terms and conditions.

III. The Proposed Core Set of Terms and Conditions—The FDP Approach

The core terms and conditions developed by the FDP work differently from the general approach described in the previous section, in that there is a core set that all of the FDP participating agencies use along with a separate set of agency-specific terms and conditions for each agency. The core set includes both uniform administrative requirements and national policy requirements.

The administrative requirements are designed as a model implementation of OMB Circular A–110 (2 CFR part 215), and they:

- Provide a standard organization of the administrative requirements that parallels the order of presentation in the circular.
- Provide standard language for administrative requirements for which the circular sets a single government-wide approach, rather than alternative approaches among which an agency may select.
- Include default provisions, with standard language, for administrative requirements for which there are agency options. For example, OMB Circular A–110 (2 CFR part 215) provides multiple options for disposition of program income a recipient might earn—an agency can specify that a recipient is to use: (1) An additive method, using the income to increase the total funding for the project supported by the award; (2) a deductive method, keeping the amount of support the same and reducing the amount of Federal funding to be used; or (3) a method that uses the income to help meet the recipient's cost sharing requirement. The administrative requirements in the FDP core terms and conditions include language in the program income article to specify use of the additive method. An agency that needs to override that default can do so by specifying a different option in its agency-specific or award-specific terms and conditions.

The administrative requirements may be viewed in one of two ways on the Internet at *http://rbm.nih.gov.* One of the posted documents shows the core set's administrative terms and conditions. The other document shows each article of the administrative requirements in a side-by-side presentation with the section of OMB Circular A–110 (2 CFR part 215) that is the basis for that article. The second document is designed to assist users who are not familiar with the language of the circular.

The national policy requirements in the core set of terms and conditions also may be viewed at *http://rbm.nih.gov.* They are presented within a table that includes information on the types of awards, types of recipient organizations, and specific situations to which each requirement applies. Each award term, in the left-hand column of the table, includes citations for the agencies' regulations pertinent to the particular national policy requirement.

In the future, OMB in conjunction with OSTP plans to maintain—or designate a Federal agency or interagency group to maintain—the core set of administrative and national policy requirements in an RBM Tool Kit at *http://rbm.nih.gov,* perhaps with links to additional sites such as OMB, OSTP, and the NSTC. When the terms and conditions are amended, previous versions would be maintained in the archives at the RBM site for access by recipients with awards pre-dating the amendment. Each version would bear a version date for clarity.

At the same Internet site, OSTP plans to maintain a list of the research or research-related programs that obtained approval, under Section 5.b of the proposed policy directive, for an exception from the requirement to use the government-wide core set of terms and conditions. With a centrally maintained list, an academic or nonprofit research institution can verify whether an award that does not include the standard terms and conditions falls within an approved exception. To enable OMB to maintain the list, Section 5.c of the proposed policy directive would require agencies to notify OMB when they approve exceptions.

As we expand the use of the core set of terms and conditions to more agencies, awarding offices, and programs, it is possible that some offices may need to augment the core set with program-specific or award-specific terms and conditions, in addition to any agency-wide supplement. A particular program, for example, may not need the article in the terms and conditions that specifies procedures a recipient must follow when research results unexpectedly raise questions about a need to classify the results for national security reasons. A program office that did not need that article could include an agency-specific or program-specific term to override the requirement. The proposed policy directive would allow that flexibility, which is essential to some programs; however, to maintain maximum uniformity Section 4.b of the proposed directive includes language that would instruct agencies to minimize supplementation of the core set.

IV. Invitation To Comment

We welcome your input on any aspect of the proposed policy provided below, and the core set of terms and conditions posted on the Internet at *http://rbm.nih.gov.* (Please note the final policy will include the core set of terms and conditions as an attachment, as stated in the ''Background'' section. However, those are not included in this

notice, but rather are available at the Web site noted above.) Questions that you may wish to address include:

- Are the terms and conditions easy to use and understand?
- With the general terms and conditions posted on the Internet, would you be able to readily determine which terms and conditions apply to a specific award?
- Where OMB Circular A–110 (2 CFR part 215) gives agencies options for addressing particular administrative requirements, does the core set of terms and conditions include default provisions appropriate for research and research-related grants?
- Are there other national policy requirements that should be included in the core set of terms and conditions?
- Is the proposed policy directive clear and unambiguous, or does it need further detail?

Dated: January 25, 2005.

Associate Director for Science, Office of Science and Technology Policy.

To the Heads of Executive Departments and Establishments

Subject: Interim Standard Terms and Conditions for Research Grants.

1. *Purpose.* This policy letter establishes a core set of terms and conditions as the government-wide standard for research grants. The standard is for use by Executive Branch departments and agencies on an interim basis, pending completion of an ongoing effort to develop a standard for all Federal grant and cooperative agreement awards.

2. *Authority.* This policy letter is a result of the regular review of the Government-university research partnership under Executive Order 13185. It also is a part of the implementation of the Federal Financial Assistance Management Improvement Act of 1999 (Public Law 106–107).

3. *Background.* Begun as the Florida Demonstration Project in the 1980's, the Federal Demonstration Partnership (FDP) is a cooperative initiative among ten Federal awarding offices and 92 academic and nonprofit institutions that receive Federal research awards. The FDP's purpose is to streamline administrative procedures associated with the award and administration of research funding. In the late 1990's, the FDP developed terms and conditions that are a model implementation, specifically for research grants, of the 1993 issuance of OMB Circular A–110, ''Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations.'' (OMB Circular A–110 is now located in Title 2 Code of Federal Regulations, Part 215.) The ten Federal awarding offices have been using the FDP terms and conditions for research grants to the non-Federal institutions participating in the FDP.

Another effort to develop standard terms and conditions began after the enactment of Pub. L. 106–107. That Act requires the Office of Management and Budget (OMB) to direct, coordinate, and assist Executive Branch departments and agencies in establishing an interagency process to streamline and simplify Federal financial assistance procedures for non-Federal entities. Twenty-six Executive Branch agencies currently participate in interagency initiatives to implement Pub. L. 106–107. One of the initiatives is to develop standard terms and conditions, to the extent practicable, for all Federal awards of grants and cooperative agreements to governmental and nonprofit organizations, including research awards.

Pending the completion of the Pub. L. 106–107 initiative, which is a long-term endeavor, some near-term benefits can be obtained on an interim basis by expanding the use of the FDP's grant terms and conditions to more Federal awarding offices and more research recipients. To enable that expanded use, the Research Business Models (RBM) Subcommittee of the National Science and Technology Council's Committee on Science made minor modifications to the terms and conditions developed originally for FDP participants. The result—the terms and conditions attached to this policy letter—are appropriate for all Federal agencies' research grants to academic and nonprofit institutions.

4. *Policy.* a. The standard terms and conditions maintained by OMB and the Office of Science and Technology Policy (OSTP) under paragraph 5.b.i of this directive are the government-wide core set to be used by agencies for grants awarded to institutions of higher education, hospitals, and other non-profit organizations under basic and applied research and research-related programs.

b. Agencies may supplement the core set of terms and conditions with agency-specific, program-specific, or award-specific terms and conditions. Agencies are to minimize supplements, limiting these to terms and conditions that are required by a statute or:

i. Consistent with OMB Circular A–110; and

ii. Necessary for programmatic purposes or good stewardship of Federal funds.

c. Agencies are encouraged to extend the use of the attached grant terms and conditions to cooperative agreements and other forms of financial assistance, to the extent practicable.

5. *Responsibilities.* a. Each Executive Branch department and agency must:

i. Issue any needed direction to offices that award research grants, in order to establish the attached terms and conditions as the core set for those offices' awards.

ii. Designate policy level officials, (1) authorized to grant exceptions from the requirement to use the attached core set if a departmental or agency office, or program, can demonstrate the need for an exception; and (2) responsible for notifying the OMB in writing about the scope of exceptions approved by the department or agency and the reasons for them.

b. OMB and OSTP will maintain—or designate a Federal agency or interagency group to maintain—at a government-wide Internet site (either the RBM Web site, currently at *http://rbm.nih.gov,* or a site to be named) and with additional links to OMB, OSTP, and the National Science and Technology Council:

i. The core set of terms and conditions, including uniform administrative requirements and national policy requirements.

ii. A list of agency programs and offices that have been granted exceptions, under paragraph 5.a.ii of this directive, from the requirement to use the core set of terms and conditions.

6. *Information Contact.* Direct any questions regarding this policy letter to Elizabeth Phillips, Office of Federal Financial Management, (202) 395–3993.

7. *Effective Date.* The policy letter is effective 30 days after issuance. All implementing actions other than regulatory revisions must be completed by the Executive departments and agencies within 6 months of the effective date; any regulatory revisions must be completed within 18 months.

BILLING CODE 3110–01–P

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon Written Request, Copy Available From: Securities and Exchange Commission, Office of Filings and

Information Services, Washington, DC 20549.

Extension:

Form N–14, SEC File No. 270–297, OMB Control No. 3235–0336.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget requests for extension of the previously approved collection of information discussed below.

Form N–14—Registration Statement Under the Securities Act of 1933 for Securities Issued in Business Combination Transactions by Investment Companies and Business Development Companies. Form N–14 is used by investment companies registered under the Investment Company Act of 1940 [15 U.S.C. 80a–1 *et seq.*] (''Investment Company Act'') and business development companies as defined by section 2(a)(48) of the Investment Company Act to register securities under the Securities Act of 1933 [15 U.S.C. 77a *et seq.*] to be issued in business combination transactions specified in Rule 145(a) (17 CFR 230.145(a)) and exchange offers. The securities are registered under the Securities Act to ensure that investors receive the material information necessary to evaluate securities issued in business combination transactions. The Commission staff reviews registration statements on Form N–14 for the adequacy and accuracy of the disclosure contained therein. Without Form N–14, the Commission would be unable to verify compliance with securities law requirements. The respondents to the collection of information are investment companies or business development companies issuing securities in business combination transactions. The estimated number of responses is 457 and the collection occurs only when a merger or other business combination is planned. The estimated total annual reporting burden of the collection of information is approximately 620 hours per response for a new registration statement, and approximately 350 hours per response for an amended Form N–14, for a total of 235,010 annual burden hours. Providing the information on Form N–14 is mandatory. Responses will not be kept confidential. Estimates of the burden hours are made solely for the purposes of the Paperwork Reduction Act, and are not derived from a comprehensive or even a representative survey or study of the costs of SEC rules and forms.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

General comments regarding the above information should be directed to the following persons: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or e-mail to: *David_Rostker@omb.eop.gov*; and (ii) R. Corey Booth, Director/Chief Information Officer, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comments must be submitted to OMB within 30 days of this notice.

Dated: January 21, 2005.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. E5–321 Filed 1–27–05; 8:45 am]

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

Submission for OMB Review; Comment Request

Upon written request, copies available from: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549.

Extension: Rule 7d–1; SEC File No. 270–176; OMB Control No. 3235–0311.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget requests for extension of the previously approved collections of information discussed below.

Section 7(d) of the Investment Company Act of 1940 [15 U.S.C. 80a–7(d)] (the ''Act'' or ''Investment Company Act'') requires an investment company (''fund'') organized outside the United States (''foreign fund'') to obtain an order from the Commission allowing the fund to register under the Act before making a public offering of its securities through the United States mail or any means of interstate commerce. The Commission may issue an order only if it finds that it is both legally and practically feasible effectively to enforce the provisions of the Act against the foreign fund, and that the registration of the fund is consistent with the public interest and protection of investors.

Rule 7d–1 [17 CFR 270.7d–1] under the Act, which was adopted in 1954, specifies the conditions under which a Canadian management investment company (''Canadian fund'') may request an order from the Commission permitting it to register under the Act. Although rule 7d–1 by its terms applies only to Canadian funds, other foreign funds generally have agreed to comply with the requirements of rule 7d–1 as a prerequisite to receiving an order permitting the foreign fund's registration under the Act.

The rule requires a Canadian fund proposing to register under the Act to file an application with the Commission that contains various undertakings and agreements of the fund. Certain of these undertakings and agreements, in turn, impose the following additional information collection requirements:

(1) The fund must file agreements between the fund and its directors, officers, and service providers requiring them to comply with the fund's charter and bylaws, the Act, and certain other obligations relating to the undertakings and agreements in the application;

(2) The fund and each of its directors, officers, and investment advisers that is not a U.S. resident, must file an irrevocable designation of the fund's custodian in the United States as agent for service of process;

(3) The fund's charter and bylaws must provide that (a) the fund will comply with certain provisions of the Act applicable to all funds, (b) the fund will maintain originals or copies of its books and records in the United States, and (c) the fund's contracts with its custodian, investment adviser, and principal underwriter, will contain certain terms, including a requirement that the adviser maintain originals or copies of pertinent records in the United States;

(4) The fund's contracts with service providers will require that the provider perform the contract in accordance with the Act, the Securities Act of 1933 (15 U.S.C. 77a–77z–3), and the Securities Exchange Act of 1934 (15 U.S.C. 78a–78mm), as applicable; and

(5) The fund must file, and periodically revise, a list of persons affiliated with the fund or its adviser or underwriter.

Under section 7(d) of the Act the Commission may issue an order permitting a foreign fund's registration only if the Commission finds that ''by reason of special circumstances or arrangements, it is both legally and practically feasible effectively to enforce the provisions of the [Act].''The

information collection requirements are necessary to assure that the substantive provisions of the Act may be enforced as a matter of contract right in the United States or Canada by the fund's shareholders or by the Commission.

Certain information collection requirements in rule 7d–1 are associated with complying with the Act's provisions. These information collection requirements are reflected in the information collection requirements applicable to those provisions for all registered funds.

The Commission believes that one fund is registered under rule 7d–1 and currently active. Apart from requirements under the Act applicable to all registered funds, rule 7d–1 imposes ongoing burdens to maintain records in the United States, and to update, as necessary, the foreign fund's list of affiliated persons. The Commission staff estimates that the rule requires a total of three responses each year. The staff estimates that a respondent would make two responses each year under the rule, one response to maintain records in the United States and one response to update its list of affiliated persons. The Commission staff further estimates that a respondent's investment adviser would make one response each year under the rule to maintain records in the United States. Commission staff estimates that each recordkeeping response would require 6.25 hours each of secretarial and compliance clerk time at a cost of $21.10 and $21.50 per hour, respectively, and the response to update the list of affiliated persons would require 0.25 hours of secretarial time, for a total annual burden of 25.25 hours at a cost of $537.78. The estimated number of 25.25 burden hours is identical to the current allocation.

If a foreign fund were to file an application under the rule, the Commission estimates that the rule would impose initial information collection burdens (for filing an application, preparing the specified charter, bylaw, and contract provisions, designations of agents for service of process, and an initial list of affiliated persons, and establishing a means of keeping records in the United States) of approximately 90 hours for the fund and its associated persons. The Commission is not including these hours in its calculation of the annual burden because no fund has applied under rule 7d–1 to register under the Act in the last three years.

After registration, a foreign fund may file a supplemental application seeking special relief designed for the fund's particular circumstances. Because rule 7d–1 does not mandate these applications and the fund determines whether to submit an application, the Commission has not allocated any burden hours for these applications.

These estimates of average burden hours are made solely for the purposes of the Paperwork Reduction Act. The estimate is not derived from a comprehensive or even a representative survey or study of Commission rules.

The Commission believes that the active registrant and its associated persons may spend (excluding the cost of burden hours) approximately $540 per year in maintaining records in the United States. These estimated costs include fees for a custodian or other agent to retain records, storage costs, and the costs of transmitting records.

If a Canadian or other foreign fund in the future applied to register under the Act under rule 7d–1, the fund initially might have capital and start-up costs (not including hourly burdens) of an estimated $17,280 to comply with the rule's initial information collection requirements. These costs include legal and processing-related fees for preparing the required documentation (such as the application, charter, bylaw, and contract provisions), designations for service of process, and the list of affiliated persons. Other related costs would include fees for establishing arrangements with a custodian or other agent for maintaining records in the United States, copying and transportation costs for records, and the costs of purchasing or leasing computer equipment, software, or other record storage equipment for records maintained in electronic or photographic form.

The Commission expects that a foreign fund and its sponsors would incur these costs immediately, and that the annualized cost of the expenditures would be $17,280 in the first year. Some expenditures might involve capital improvements, such as computer equipment, having expected useful lives for which annualized figures beyond the first year would be meaningful. These annualized figures are not provided, however, because, in most cases, the expenses would be incurred immediately rather than on an annual basis. The Commission is not including these costs in its calculation of the annualized capital/start-up costs because no investment company has applied under rule 7d–1 to register under the Act pursuant to rule 7d–1 in the last three years.

These estimates of average costs are made solely for the purposes of the Paperwork Reduction Act. The estimate is not derived from a comprehensive or even a representative survey or study of the costs of Commission rules.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

General comments regarding the above information should be directed to the following persons: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or e-mail to: *David_Rostker@omb.eop.gov*; and (ii) R. Corey Booth, Director/Chief Information Officer, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Comments must be submitted to OMB within 30 days of this notice.

Dated: January 21, 2005.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–51062; File No. SR–Amex–00–27]

Self-Regulatory Organizations; Order Approving a Proposed Rule Change and Amendments No. 1, 2, 3, 4, 5, and 6 Thereto, and Notice of Filing and Order Granting Accelerated Approval to Amendments No. 7 and 8 Thereto by the American Stock Exchange LLC To Require the Immediate Display of Customer Options Limit Orders

January 21, 2005.

I. Introduction

On May 10, 2000, the American Stock Exchange LLC (''Amex'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend Amex Rules 958A and 958A–ANTE to require the immediate display of customer options limit orders. Amex filed amendments to the proposed rule change on March 13,

[1] 15 U.S.C. 78s(b)(1).

[2] 2 17 CFR 240.19b–4

2002,[3] April 3, 2003,[4] July 15, 2003,[5] August 19, 2003,[6] October 22, 2003,[7] and August 12, 2004.[8] The proposed rule change, as amended by Amendments No. 1 through 6, was published for comment in the **Federal Register** on August 19, 2004.[9] No comments were received regarding the amended proposal. Amex filed amendments to the proposed rule change on December 16, 2004,[10] and January 6, 2005.[11] This order approves the proposed rule change and Amendments No. 1 through 6 and grants accelerated approval to and solicits comment on Amendments No. 7 and 8.

II. Description of Proposed Rule

Amex proposes to amend Amex Rules 958A and 958A–ANTE to require the immediate display of customer options limit orders[12] that better the current market quotation (''Display Obligation''). Under the proposal, Amex specialists would be required to display immediately upon receipt the price and size of each customer options limit order held by the specialist that is at a price or size that would improve the displayed bid or offer in the option that is the subject of the limit order. Amex proposes to define ''immediately upon receipt'' to mean, under normal market conditions, as soon as practicable but no later than 30 seconds after receipt by the specialist.[13]

Amex proposes to exempt, or partially exempt, certain orders from the Display Obligation. Specifically, Amex proposes to exempt orders executed upon receipt as well as any order where the customer who placed it requests that the order not be displayed if, upon receipt of the order, the specialist announces to the trading crowd the information about the order that would be displayed absent the customer's request. Amex further proposes that orders the terms of which are delivered by the specialist to another exchange for execution be exempted from the Display Obligation. Exempt order types would also include all or none orders, at the close orders, fill or kill orders, immediate or cancel orders, stop orders, stop limit orders, and complex orders (*i.e.*, spread, straddle, switch and combination orders), orders received prior to or during the opening trading rotation whether at the beginning of the trading day or after a trading halt (although once the trading rotation ends such orders would then be subject to the Display Obligation), and orders of more than 100 contracts, unless the customer placing such order requests that it be displayed.[14] Amex also proposes to amend Amex Rule 590 to include violations of the Exchange's limit order display rule in the Minor Rule Violation Fine System.

III. Commission Findings and Order Granting Approval

The Commission finds that the proposed rule change, as amended, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange[15] and, in particular, the requirements of section 6(b)(5) of the Act,[16] which requires, among other things, that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

Specifically, the Commission believes that the display of customer options limit orders that improve the price or size of the best disseminated Amex quote should promote transparency and enhance the quality of executions of customer options limit orders on Amex. The proposed amendments to Amex Rules 958A and 958A–ANTE introduce requirements for customer limit order display that are comparable to the requirements of the Commission's Display Rule, Rule 11Ac1–4 under the Act,[17] which is applicable to customer limit orders received in the equity market. In addition, the Commission believes that the Exchange's proposal to exempt all or none, fill or kill, immediate or cancel, and large sized orders from the Display Obligation is reasonable since these order types are either identical or substantially similar to order types exempt from the Commission's Display Rule.

The Commission also believes that it is consistent with the Act for Amex to exempt stop orders and stop limit orders from the Display Obligation under its rules. These orders are contingent orders that are subject to a particular triggering event and, thus, are not available for execution until the triggering event occurs. A stop order becomes a market order when triggered and thus is not subject to the Display Obligation because such an order would then be immediately executable. A stop limit order becomes a limit order when the triggering event occurs. This limit order would be subject to the Display Obligation.

At the close orders may not be represented, displayed or booked until as near as possible to the close of trading, and, therefore, the Commission believes it is reasonable to exempt such orders from the Display Obligation. Spread, combination, straddle, stock-option, and one-cancels-the-other orders are complex orders with more than one component and, thus, the Commission believes, are not suitable for display.

During a trading rotation, Amex systems attempt to set an opening price for the series. Until that opening price is established, there is no disseminated market. Therefore, the Commission believes it is reasonable to exempt

---

[3] On March 13, 2002, Amex filed a Form 19b–4, which replaced the original filing in its entirety (''Amendment No. 1'').

[4] On April 3, 2003, Amex filed a Form 19b–4, which replaced the original filing and Amendment No. 1 in their entirety (''Amendment No. 2'').

[5] On July 15, 2003, Amex filed a Form 19b–4, which replaced the original filing and all previous amendments in their entirety (''Amendment No. 3'').

[6] On August 19, 2003, Amex filed a Form 19b–4, which replaced the original filing and all previous amendments in their entirety (''Amendment No. 4'').

[7] *See* letter from Claire P. McGrath, Senior Vice President and Deputy General Counsel, Amex, to Nancy Sanow, Assistant Director, Division of Market Regulation, Commission, dated October 21, 2003 (''Amendment No. 5'').

[8] On August 12, 2004, Amex filed a Form 19b–4, which replaced the original filing and all previous amendments in their entirety (''Amendment No. 6'').

[9] *See* Securities Exchange Act Release No. 50188 (August 12, 2004), 69 FR 51495 (''Notice of the Proposal'').

[10] *See* Amendment No. 7, dated December 16, 2004, submitted by Clare P. McGrath, Senior Vice President and Deputy General Counsel, Amex (''Amendment No. 7''). In Amendment No. 7, Amex proposes a minor modification to the exemptions to the Display Obligation.

[11] *See* Amendment No. 8, dated January 6, 2005, submitted by Clare P. McGrath, Senior Vice President and Deputy General Counsel, Amex (''Amendment No. 8''). In Amendment No. 8, Amex proposes a minor modification to the exemptions to the Display Obligation.

[12] Amex proposes to define the term ''customer options limit order'' as ''an order to buy or sell an option at a specified price and size that is for the account of a customer as defined in paragraph (a)(26) of Rule 11Ac1–1 under the Securities Exchange Act of 1934.'' Proposed Amex Rules 958A(e)(3) and 958A–ANTE(e)(3).

[13] In its filing, Amex states that ''receipt'' means the time the order enters the Amex Order File system (''AOF''), which is consistent with its surveillance standard for other rules, such as the firm quote rule, wherein the Exchange measures compliance with the rule using the time the order enters the AOF. This means that the time of receipt is when the order is received in the AOF, even if the specialist does not happen to see it for several seconds.

[14] For a complete discussion of these exempt order types, see Notice of the Proposal, supra note 3.

[15] In approving this proposal, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[16] 15 U.S.C. 78f(b)(5).

[17] 17 CFR 240.11Ac1–4.

orders received during a trading rotation from the Display Obligation. The Commission notes, however, that once the trading rotation ends, any orders not executed would then be subject to the Display Obligation.

Finally, customer orders the terms of which are delivered by the specialist to another exchange for execution are exempt from the Exchange's Display Obligation. The Commission believes it is reasonable to exempt such orders since they are subject to execution upon receipt at the other options exchange. Moreover, the Exchange represents that if the order delivered to the other options exchange were canceled, in whole or in part, by the other exchange, then the original customer order would be subject to the Display Obligation immediately upon receipt of the cancellation notice by the Exchange.

The Commission finds good cause for approving Amendments No. 7 and 8 to the proposed rule change prior to the thirtieth day after their publication in the **Federal Register**, pursuant to section 19(b)(2) of the Act.[18] Amendments No. 7 and 8 made minor modifications to the exemption for customer orders the terms of which are immediately delivered to another exchange for execution. Acceleration of Amendments No. 7 and 8 will permit the Exchange to implement the proposal in an expeditious manner. The Commission, therefore, believes that good cause exists, consistent with section 6(b)(5)[19] and section 19(b)[20] of the Act, to accelerate approval of Amendments No. 7 and 8.

IV. Solicitation of Comments Concerning Amendments No. 7 and 8

Interested persons are invited to submit written data, views, and arguments concerning Amendments No. 7 and 8, including whether they are consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR-Amex-00–27 on the subject line.

Paper Comments

- Send paper comments in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609.

All submissions should refer to File Number SR-Amex-00–27. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-Amex-00–27 and should be submitted on or before February 18, 2005.

V. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[21] that the proposed rule change (File No. SR-Amex-00–27), as amended, be approved, and that Amendments No. 7 and 8 thereto be approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[22]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–51063; File No. SR–CBOE–2004–35]

Self-Regulatory Organizations; Order Approving a Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 2 Thereto by the Chicago Board Options Exchange, Inc. To Require the Immediate Display of Customer Limit Orders

January 21, 2005.

I. Introduction

On June 17, 2004, the Chicago Board Options Exchange, Inc. (''CBOE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b-4 thereunder,[2] a proposed rule change to amend CBOE Rule 8.85 to require the immediate display of customer limit orders. The proposed rule change was published for comment in the **Federal Register** on July 2, 2004.[3] No comments were received regarding the proposal. CBOE filed Amendments No. 1 and 2 with the Commission on August 31, 2004,[4] and January 6, 2005,[5] respectively. This order approves the proposed rule change, grants accelerated approval to Amendment No. 2, and solicits comment on Amendment No 2.

II. Description of Proposed Rule

CBOE proposes to amend CBOE Rule 8.85(b)(i) to codify an immediate display requirement with respect to eligible customer limit orders[6] (''Display Obligation''). Under the proposal, each DPM would be required

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 49916 (June 25, 2004), 69 FR 40422 (''Notice of the Proposal'').

[4] *See* letter from Steve Youhn, Assistant Secretary, CBOE, to Nancy Sanow, Assistant Director, Commission, Division of Market Regulation, dated August 30, 2004 (''Amendment No. 1''). In Amendment No. 1, CBOE corrected a typographical error in the proposed rule text. Because Amendment No. 1 is a technical amendment, it is not subject to notice and comment.

[5] *See* Amendment No. 2, dated January 6, 2005, submitted by Steve Youhn, Assistant Secretary, CBOE (''Amendment No. 2''). In Amendment No. 2, CBOE proposes a minor modification to the exemptions to the Display Obligation.

[6] CBOE proposes to define the term ''customer limit order'' as ''an order to buy or sell a listed option at a specified price that is not for the account of either a broker or dealer; provided, however, that the term customer limit order shall include an order transmitted by a broker or dealer on behalf of a customer.'' Proposed CBOE Rule 8.85(b)(i).

to display the price and full size of eligible customer limit orders when such orders represent buying or selling interest that is at a better price than the best disseminated CBOE quote. A DPM also must increase the size of its quote to reflect a limit order priced equal to the CBOE disseminated quote. In proposed CBOE Rule 8.85(b)(i), CBOE proposes to define ''immediately'' to mean, under normal market conditions, as soon as practicable but no later than 30 seconds after receipt by the DPM.[7]

CBOE proposes to exempt, or partially exempt, certain orders from the Display Obligation. Specifically, CBOE proposes to exempt orders executed upon receipt as well as any order where the customer who placed it requests that the order not be displayed, if upon receipt of the order the DPM announces via public outcry the information about the order that would be displayed if the order were subject to display. CBOE further proposes an exemption from the Display Obligation for orders for which, immediately upon receipt, a related order for the principal account of a DPM reflecting the terms of the customer order is routed to another options exchange that is a participant in the intermarket options linkage plan.[8] Exempt order types would also include contingency orders (*i.e.*, market-if-touched, market-on-close, stop (stop-loss), and stop-limit orders), one-cancels-the-other orders, all or none orders, fill or kill orders, immediate or cancel orders, complex orders (*i.e.*, spread, combination, straddle and stock-option orders), orders received during a trading rotation (although once the trading rotation ends such orders would then be subject to the Display Obligation), and orders of more than 100 contracts, unless the customer placing such order requests that it be displayed.[9]

III. Commission Findings and Order Granting Approval

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange[10] and, in particular, the requirements of section 6(b)(5) of the Act,[11] which requires, among other things, that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

Specifically, the Commission believes that the display of customer options limit orders that improve the price or size of the best disseminated CBOE quote should promote transparency and enhance the quality of executions of customer limit orders on CBOE. The proposed amendments to CBOE Rule 8.85 introduce requirements for customer limit order display that are comparable to the requirements of the Commission's Display Rule, Rule 11Ac1–4 under the Act,[12] which is applicable to customer limit orders received in the equity market. In addition, the Commission believes that the Exchange's proposal to exempt all-or-none, fill-or-kill, immediate-or-cancel, and large sized orders from the Display Obligation is reasonable since these order types are either identical or substantially similar to order types exempt from the Commission's Display Rule.

The Commission also believes that it is consistent with the Act for CBOE to exempt from the Display Obligation under its rules market-if-touched, stop-limit, and stop or stop-loss orders. These orders are contingent orders that are subject to a particular triggering event and, thus, are not available for execution until the triggering event occurs. A market-if-touched or stop-loss order becomes a market order when triggered and thus is not subject to the Display Obligation because such an order would then be immediately executable. A stop-limit order becomes a limit order when the triggering event occurs. This limit order would be subject to the Display Obligation.

Market-on-close orders may not be represented, displayed or booked until as near as possible to the close of trading, and, therefore, the Commission believes it is reasonable to exempt such orders from the Display Obligation.

Spread, combination, straddle, stock-option, and one-cancels-the-other orders are complex orders with more than one component and, thus, the Commission believes, are not suitable for display.

During a trading rotation, CBOE systems attempt to set an opening price for the series. Until that opening price is established, there is no disseminated market. Therefore, it is reasonable to exempt orders received during a trading rotation from the Display Obligation. The Commission notes, however, that once the trading rotation ends, any orders not executed would then be subject to the Display Obligation.

Finally, the Exchange proposes to exempt from the Display Obligation customer orders for which a related order for the principal account of a DPM reflecting the terms of the customer order is routed to another options exchange. The Commission believes it is reasonable to exempt such orders since they are subject to execution upon receipt at the other options exchange. Moreover, the Exchange represents that if an order routed to another options exchange is cancelled in whole or in part by the other exchange, then the order would be subject to the Display Obligation immediately upon receipt of the cancellation notice by the Exchange.

The Commission finds good cause for approving Amendment No. 2 to the proposed rule change prior to the thirtieth day after their publication in the **Federal Register**, pursuant to section 19(b)(2) of the Act.[13] Amendment No. 2 made a minor modification to the exemption for customer orders for which a related order reflecting the terms of the customer order is immediately delivered to another exchange for execution. Acceleration of Amendment No. 2 will permit the Exchange to implement the proposal in an expeditious manner. The Commission, therefore, believes that good cause exists, consistent with section 6(b)(5)[14] and section 19(b)[15] of the Act, to accelerate approval of Amendment No. 2.

IV. Solicitation of Comments Concerning Amendment No. 2

Interested persons are invited to submit written data, views, and arguments concerning Amendment No. 2, including whether it is consistent with the Act. Comments may be submitted by any of the following methods:

[7] In its filing, CBOE states that ''receipt by the DPM'' means receipt on the PAR terminal in the DPM trading crowd, which is consistent with the firm quote definition of ''time of receipt.'' This means that the time of receipt is when the order is received on PAR, even if the DPM or PAR operator does not happen to see it for several seconds.

[8] *See* Securities Exchange Act Release No. 43086 (July 28, 2000), 65 FR 48023 (August 4, 2000) (order approving the Plan for the Purpose of Creating and Operating an Intermarket Option Linkage).

[9] For a complete discussion of these exempt order types, *see* Notice of the Proposal, *supra* note 3.

[10] In approving this proposal, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–CBOE–2004–35 on the subject line.

Paper Comments

• Send paper comments in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609.

All submissions should refer to File Number SR–CBOE–2004–35. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2004–35 and should be submitted on or before February 18, 2005.

V. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[16] that the proposed rule change (File No. SR–CBOE–2004–35) be approved, and that Amendment No. 2 thereto be approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[17]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–51066; File No. SR–FICC–2005–02]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Filing of Proposed Rule Change To Amend the Application and Continuing Membership Standards of the Government Securities Division and the Mortgage-Backed Securities Division

January 21, 2005.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] notice is hereby given that on January 7, 2005, the Fixed Income Clearing Corporation (''FICC'') filed with the Securities and Exchange Commission (''Commission'') and on January 14, 2005, amended the proposed rule change described in Items I, II, and III below, which items have been prepared primarily by FICC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FICC is seeking to amend the rules of the Government Securities Division (''GSD'') and the Mortgage-Backed Securities Division (''MBSD'') to: (1) Provide that when an applicant, member, or participant becomes subject to an order of statutory disqualification or order of similar effect, including an order issued by a non-U.S. regulator or examining authority, the FICC Membership and Risk Management Committee (''Committee'') shall determine whether such order shall be the basis for denial of the membership applicant or termination of membership rather than such denial or termination being automatic; (2) impose a fine on members and participants that fail to notify FICC within two business days of falling out of compliance with specified membership standards, including becoming subject to an order of statutory disqualification or order of similar effect; and (3) require applicants, members, and participants to notify FICC within two business days if they become aware of an investigation or similar proceeding against them that could lead them to violate a FICC membership standard.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FICC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FICC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.[2]

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

FICC is seeking to amend the application and continuing membership standards of the GSD and the MBSD to: (1) Provide that when an applicant, member, or participant becomes subject to an order of statutory disqualification or order of similar effect, including an order issued by a non-U.S. regulator or examining authority, the Committee shall determine whether this shall be the basis for denial of the membership applicant or termination of membership, rather than such denial or termination being automatic; (2) impose a fine on members and participants that fail to notify FICC within 2 business days of falling out of compliance with specified membership standards, including becoming subject to an order of statutory disqualification or order of similar effect; and (3) require applicants, members, and participants to notify FICC within two business days if they become aware of an investigation or similar proceeding against them that could lead them to violate a FICC membership standard.

1. Action in Cases of Statutory Disqualification or Orders of Similar Effect

The GSD and MBSD rules currently provide that a membership applicant that is subject to an order of statutory disqualification under Section 3(a)(39) of the Act or an order of similar effect is not eligible for membership.[3]

[16] *Id.*

[17] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] The Commission has modified the text of the summaries prepared by FICC.

[3] For example, GSD Rule 3, ''Financial Responsibility and Operational Capability

Continued

Currently, a waiver of this requirement by the Committee is necessary in order for FICC to admit such applicant into membership. The admission requirements also serve as continuance standards for current members and participants. Therefore, if a member or participant becomes subject to a statutory disqualification, a waiver must be sought in order for membership in FICC to continue.

At the time it was organized as a clearing corporation, the Government Securities Clearing Corporation, the predecessor to FICC, modeled its rules provisions regarding statutory disqualifications on those of other clearing agencies which are now subsidiaries of The Depository Trust & Clearing Corporation. The understanding at the time was that instances of statutory disqualification were a rare occurrence and called into question the entity's ability to meet membership requirements or to remain a member in good standing. More recently, firms are increasingly becoming subject to statutory disqualification, but the reasons for a firm's statutory disqualification may have little or no bearing on its ability to become or remain a member in good standing.[4] FICC would retain the ability to deny membership to or terminate as a member or participant a firm whose ability to meet applicable membership requirements is called into question. However, to the extent an order of statutory disqualification does not call this into question, FICC does not believe it appropriate for the Committee to issue a waiver in order to admit or retain the member.

The proposed rule change would eliminate the automatic need to obtain a waiver in cases where an entity is subject to an order of statutory disqualification or order of similar effect but would keep such orders as a criterion to be considered for membership or continued membership. FICC management would continue to present all instances of such orders to the Committee, and the Committee would make all final determinations with respect to these entities. In this manner, FICC management and the Committee would be able to thoroughly evaluate the risks presented by an applicant, member, or participant that becomes subject to an order. The proposed rule change would allow the Committee to permit FICC to admit or retain members or participants that pose no risk to FICC.[5] In instances where waivers are still required under the rules and are granted by the Committee, FICC would promptly notify the Commission.

2. Fines for Failure To Notify FICC for Falling Out of Compliance With Membership Criteria

In addition to the changes above, FICC is proposing to implement a fine for those members and participants that do not promptly notify FICC of their noncompliance with any membership standard.[6] The membership standards are set forth in GSD Rules 2, ''Members,'' and 3, ''Financial Responsibility and Operational Capability Standards,'' which apply to comparison-only and netting members as applicable, and in MBSD clearing rules Article III, ''Participants,'' which apply to MBSD clearing participants. For risk management purposes, it is important that FICC learn of a member or participant's failure to meet a membership standard as soon as possible in order to determine a course of action that will best protect FICC. In addition, in some instances, such as certain cases where a member or participant becomes subject to a statutory disqualification order,[7] FICC is required to promptly notify the Commission. Given the importance of FICC's membership standards and the need for FICC to learn of noncompliance as soon as possible, FICC is proposing to fine members $1,000 per instance of a failure to notify FICC within two business days of the member or participant first having knowledge of its falling out of compliance with the particular membership standard.[8] Members and participants would be afforded the same due process as is currently available under FICC's rules with respect to other types of fines. As with all fines, FICC will notify the Commission of all fines that are imposed pursuant to this rule change.

In addition, members and participants that fail to timely notify FICC of falling out of compliance with any membership standard would automatically be placed on the Watch List and be subject to more frequent and thorough monitoring as provided for in GSD Rule 4, ''Clearing Fund, Watch List, and Loss Allocation,'' Section 3, ''Watch List,'' and MBSD Article IV, ''Participants Fund,'' Rule 6, ''Watch List.''

3. Notification of Pending Investigations

The proposed rule change also requires applicants, members, and participants to notify FICC within two business days of first having knowledge of a pending investigation or similar proceeding or condition that could lead them to violate a membership standard. The proposed rule change would provide an exception to this requirement in cases where disclosure to FICC would cause the applicant, member, or participant to violate an applicable law, rule, or regulation.

4. Definitions

Finally, MBSD is proposing to add two definitions to Article I, ''Definitions and General Provisions.'' The term ''Associated Person'' would be defined to mean, when applied to any ''person,'' any partner, officer, or director of such ''person'' or any ''person'' directly or indirectly controlling or controlled by such ''person,'' including an employee of such ''person.'' The term ''Person'' would mean a partnership, Corporation or other organization, entity or individual.

FICC believes that the proposed rule change is consistent with the requirements of Section 17A of the Act[9] and the rules and regulations thereunder applicable to FICC because it amends FICC's membership criteria in a prudent manner. It imposes fines that will encourage members and participants to notify FICC promptly of falling out of compliance with membership standards, which will

Standards,'' Section 1, ''Admissions Criteria for Comparison-Only Members,'' provides that an applicant may not be subject to an order of statutory disqualification or ''an order of similar effect issued by a Federal or State banking authority, or other examining authority or regulator.'' Section 3(a)(39) of the Act, which sets forth the definition of ''statutory disqualification,'' specifically covers orders issued by foreign financial regulatory authorities that are the equivalent to Commission-issued orders covered by the definition. The statutory definition also includes specific references to entities being barred from the ''foreign equivalent of a self-regulatory organization [or a] foreign or international securities exchange'' under ''any substantially equivalent foreign statute or regulation.''

[4] Of note is that in those situations brought by management before the Committee recently, the Commission has permitted the entity to continue operating as a registered broker-dealer, and the relevant designated examining authority has retained the entity as a member. In addition, Rule 19h–1 promulgated pursuant to the Act, does not require that self-regulatory organizations automatically terminate the membership of entities subject to statutory disqualification.

[5] To the extent the Committee determines to admit or retain a member despite a statutory disqualification, the Committee will still retain all rights it currently has under FICC rules to impose limitations or restrictions on such member or participant.

[6] The rules of FICC currently require members and participants to promptly notify FICC in the event that they are not meeting their membership standards.

[7] Rule 19h–1 of the Act does not require a notification or notice to the Commission in all cases of statutory disqualification.

[8] Once FICC is notified of an applicant or member's statutory disqualification, it will follow the provisions of Rule 19h–1 of the Act.

[9] 15 U.S.C. 78q–1.

enable FICC to act quickly to protect itself and its members and participants and which will better enable FICC to safeguard the securities and funds in its custody or control or for which it is responsible.

(B) Self-Regulatory Organization's Statement on Burden on Competition

FICC does not believe that the proposed rule change will have any impact or impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments relating to the proposed rule change have not yet been solicited or received. FICC will notify the Commission of any written comments received by FICC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*) or
- Send an E-mail to *rule-comments@sec.gov*. Please include File Number SR–FICC–2005–02 on the subject line.

Paper Comments

- Send paper comments in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609.

All submissions should refer to File Number SR–FICC–2005–02. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of FICC and on FICC's Web site at *http://www.ficc.com.* All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–FICC–2005–02 and should be submitted on or before February 18, 2005.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[10]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–51075; File No. SR–NASD–2004–179]

Self Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Amendments to Section 13 of Schedule A to the NASD By-Laws (Review Charge for Advertisement, Sales Literature, and Other Such Material Filed With or Submitted to NASD)

January 24, 2005.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 8, 2004, the National Association of Securities Dealers, Inc. (''NASD'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in items I, II, and III below, which items have been prepared by NASD. NASD has designated the proposed rule change as ''establishing or changing a due, fee or other charge'' under section 19(b)(3)(A)(ii) of the Act[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NASD is proposing to amend Section 13 of Schedule A to the NASD By-Laws (''Section 13'') governing the review charges for advertisements, sales literature, and other such material filed with or submitted to NASD's Advertising Regulation Department (the ''Department''). Below is the text of the proposed rule change. Proposed new language is *italicized;* proposed deletions are in [brackets].

* * * * *

SCHEDULE A TO NASD BY-LAWS

* * * * *

Section 13—Review Charge for Advertisement, Sales Literature, and Other Such Material Filed or Submitted

There shall be a review charge for each and every item of advertisement, sales literature, and other such material, whether in printed, video or other form, filed with or submitted to NASD, except for items that are filed or submitted in response to a written request from NASD's Advertising Regulation Department issued pursuant to the spot check procedures set forth in NASD's Rules as follows: (1) For printed material reviewed, [$75.00] *$100.00*, plus $10.00 for each page reviewed in excess of 10 pages; and (2) for video or audio media, [$75.00] *$100.00*, plus $10.00 per minute for each minute of tape reviewed in excess of 10 minutes.

Where a member requests expedited review of material submitted to the Advertising Regulation Department there shall be a review charge of $500.00 per item plus $25 for each page reviewed in excess of 10 pages. Expedited review shall be completed within three business days, not

including the date the item is received by the Advertising Regulation Department, unless a shorter or longer period is agreed to by the Advertising Regulation Department. The Advertising Regulation Department may, in its sole discretion, refuse requests for expedited review.

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in item IV below. NASD has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Department is responsible for ensuring that all NASD member firms' communications with the public are fair, balanced, and not misleading. The mission of the Department, as provided in Rule 2210 and the Interpretations issued thereunder, is to ensure that all member communications with the public, including advertisements, sales literature, and correspondence, are based on principles of fair dealing and good faith, are fair and balanced, and provide a sound basis for evaluating the facts in regard to any particular security or type of security, industry, or service. Among other things, the Department reviews member communications with the public for false, exaggerated, unwarranted, misleading statements or claims, and exaggerated or unwarranted claims, opinions or forecasts.

The purpose of the proposed rule change is to amend Section 13 to raise the fee that may be charged by the Department for reviewing each and every item of advertisement, sales literature, and other such material, whether in printed, video or other form, filed with or submitted to NASD (except for items that are filed or submitted in response to a written request from the Department issued pursuant to the spot check procedures set forth in NASD's Rules).

Despite annual cost increases, NASD has not adjusted the charge to members for submitting advertisements, sales literature, and other such material to the Department since 1999. A recent analysis of the Department's operating and technology costs showed that NASD's costs have increased significantly due to increased responsibilities, economic conditions and the need for enhanced technology. Based on this review, NASD proposes to raise the fee charged for the review of printed material and video or audio media from $75.00 to $100.00 to offset these cost increases.

2. Statutory Basis

NASD believes that the proposed rule change is consistent with the provisions of section 15A of the Act[5] in general and with section 15A(b)(5) of the Act[6] in particular, which requires, among other things, that NASD's rules provide for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system that NASD operates or controls. NASD believes that the rule change is consistent with section 15A(b)(5) of the Act in that the proposed review charge is reasonable based on NASD's costs and equitably allocated among all members that file or submit advertisements, sales literature, and other such material, whether in printed, video or other form.

B. Self-Regulatory Organization's Statement on Burden on Competition

NASD does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective upon filing with the Commission, pursuant to section 19(b)(3)(A)(ii) of the Act[7] and paragraph (f)(2) of Rule 19b–4 thereunder,[8] because it establishes or changes a due, fee, or other charge imposed by NASD. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–NASD–2004–179 on the subject line.

Paper Comments

- Send paper comments in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609.

All submissions should refer to File Number SR–NASD–2004–179. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal office of NASD. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to the File Number SR–NASD–2004–179 and should be submitted on or before February 18, 2005.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–51048; File No. SR–NYSE–2004–70]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change and Amendment No. 1 Thereto by the New York Stock Exchange, Inc. To Amend Exchange Rule 104 to Require Specialists To Yield Orally-Consummated Proprietary Trades to Later-Arriving System Orders

January 18, 2005.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 13, 2004, the New York Stock Exchange, Inc. (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in items I, II, and III below, which items have been prepared by the Exchange. On January 7, 2005, the Exchange filed Amendment No. 1 to the proposed rule change.[3] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE Rule 104, Dealings by Specialists, to require that in transactions between a specialist and a contra order that have been orally agreed to but not yet reported, the specialist must yield to any system orders that enter the specialist's book and can take the specialist's position in the orally-consummated transaction.

The text of the proposed amendments is set forth below. Italics indicate additions.

Rule 104

Dealings by Specialists

* * * * *

Supplementary Material

Functions of Specialists

.10

* * * * *

(11)(i) Notwithstanding the ability of a specialist to trade for his or her dealer account, dealer transactions by a specialist that have not yet been reported by the specialist must yield to any order or orders received through an Exchange order delivery system after the oral commitment to transact, provided that such order or orders are capable of trading in place of the specialist in the consummated transaction.

(ii) The provisions of subparagraph (i) above shall not apply if the specialist's trade for his or her dealer account:

(a) *Is to correct an error on a previously reported transaction;*

(b) *Is executed in satisfaction of the specialist's obligation to give up a trade to an agency order;*

(c) *Is a non-regular way trade between the specialist and a Crowd broker;*

(d) *Is the result of the election of ''stop'' orders as required in Rule 123A.40;*

(e) *Is in connection with the execution of ''stop'' orders or CAP orders executed as part of the opening of trading;*

(f) *Participates on the closing transaction in a security to offset a market-at-the-close and/or limit-at-the-close order imbalance; or*

(g) *Is a report of principal participation on a commitment sent to another market center through the ITS system.*

(iii) Transactions by a specialist pursuant to subparagraph (ii) above must be documented and reported to the Exchange in such manner and within such time as the Exchange shall designate.

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE Rule 104 to provide that where a specialist has completed, but not yet reported, a transaction as principal with an order in the book or in the crowd, the specialist must yield to any order received through SuperDOT® that could take the specialist's place in the unreported principal transaction.

Exchange rules provide that specialists must always yield to customer orders on the book when trading in the specialist's specialty securities for the dealer account. When no other interest is present on the book, specialists may trade for their own account with interests represented on the book or by a broker in the crowd; in such situations, the specialist may trade either fully or in parity with other contra interests represented in the crowd, as the case may be. The Exchange proposes to amend NYSE Rule 104.10 to include new section (11) to require that, notwithstanding the ability of a specialist to trade as principal with either a system order or a broker in the crowd, if a marketable order arrives on the book before the report of the specialist's trade as principal is completed, the specialist must yield to such order. Where the specialist is required to yield, the customer whose order entered the book would be reported as the contra party for the trade instead of the specialist.

The proposed rule would provide seven limited exceptions, representing situations in which it would continue to be appropriate for the specialist to act as principal, notwithstanding the presence of a new customer order on the book. These exceptions are:

(1) Corrections of bona fide specialist errors;

(2) Trading in satisfaction of the specialist's obligation to give up a trade to an agency order;

(3) Reports of non-regular-way principal-to-crowd transactions;

(4) Principal participation on stop order electing transactions;

(5) Principal participation in connection with opening transactions;

(6) Closing transactions involving market-on-close (''MOC'') imbalances; and

(7) Report of principal participation on a commitment sent to another market

[9] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Form 19b–4 dated January 7, 2004 (''Amendment No. 1''). In Amendment No. 1, the NYSE changed the basis under which the proposed rule change was filed from section 19(b)(3) of the Act to section 19(b)(2) of the Act.

through the Intermarket Trading System (''ITS'').

These exceptions are discussed in more detail below:

1. Corrections of Bona Fide Specialist Errors: These are cases where a specialist has to issue corrected reports that include dealer participation via the Display Book® to correct a previously executed and reported transaction. Such corrections could involve the price, volume, or names involved in a transaction. If an executable system order is on the same side as the dealer participation necessary to correct the error, this would trigger the Display Book's® ''P'' indicator (preventing the specialist from participating as dealer ahead of executable system orders). In this situation, the specialist would be permitted to use the ''Prin Ahead'' override feature, provided that the specialist placed the notation ''Error'' in the Display Book's® free-form comment field. The specialist would be required to adequately document the error on the firm's books and records.

2. Trading in satisfaction of the specialist's obligation to give up a trade to an agency order: These are cases where Exchange rules require the specialist to give up a trade to an agency order after the initial trade has been reported and the specialist cannot substitute the agency customer's name, such as where a customer requests to participate on a trade previously executed by the specialist as principal on a non-regular way basis. When reporting such substituted trades, the specialist would have to participate as dealer in order to unwind his own participation in the initial transaction. If an executable system order is on the same side as the dealer participation necessary to effect the substitution, this would trigger the Display Book's® ''P'' indicator. In this situation, the specialist would be permitted to use the ''Prin Ahead'' override feature to complete the substitute transaction. The specialist would be required to document the substitution trade in the Display Book's® free-form comment field.

3. Reports of non-regular-way principal-to-crowd transactions: These are cases where a crowd broker represents a non-regular-way settlement order (*e.g.*, cash basis, next day, and sellers option) and the specialist is willing to trade with that order at a price at which there are regular way settlement customer orders on the same side on the Display Book®. The ''Prin Ahead'' override feature may be used by the specialist to effect the non-regular way transaction, provided, however, that the specialist may be required to give up the trade to an agency order if the customer indicates its willingness to participate on the same terms as the specialist.

4. Principal participation on stop order electing transactions: These are cases where the specialist participation in an electing transaction requires the guarantee of the same price to the elected stop order(s), the specialist bases the price on the total volume of both transactions, and the specialist effects both transactions contemporaneously and at the same price. Exchange rules require the specialist to report the transaction that elects the stop orders independently from the transaction that fills the stop orders. Orders may arrive on the Display Book® between the time the specialist reports the electing trade and the fill for the stop transaction, which would trigger the ''P'' indicator. In connection with the transaction filling the stop order, the specialist would be permitted to use the ''Prin Ahead'' override feature. The specialist would be required to document the dealer participation by placing a stop order comment in the Display Book's® free-form comment field.

5. Principal participation in connection with opening transactions: These are cases where the specialist participates as dealer in connection with stop orders and convert-and-parity (''CAP'') orders [4] that are included in the specialist's calculation of the opening price, elected by the opening crossing trade, and executed substantially contemporaneously with the opening transaction at the opening cross price, but that are reported separately from the report of the opening transaction. Orders may arrive on the Display Book® between the time the specialist reports the opening trade and the fill for the elected stop transaction, which would trigger the ''P'' indicator. In connection with the transaction filling the stop order at the opening, the specialist would be permitted to use the ''Prin Ahead'' override feature. The specialist would be required to document the dealer participation by placing a stop order comment in the Display Book's® free-form comment field.

6. Closing transactions involving MOC imbalances: These are cases where the specialist participates on the closing transaction to offset a market-on-close/limit-on-close order imbalance. The situation may arise if unexecuted market orders entered just prior to the close are assigned to the paired-off portion of the closing trades. When the specialist reports dealer participation to offset an imbalance on the first print of the closing (as required by Exchange rules) and there are market orders on the same side assigned to the paired off portion, which is the second print of the close, the ''P'' indicator would be triggered. In this instance, the specialist would be permitted to use the ''Prin Ahead'' override feature. The specialist would be required to document the dealer participation by indicating ''MOC'' in the Display Book's® free-form comment field.

7. Report of principal participation on a commitment sent to another market through the ITS System: These are cases where the specialist has indicated dealer interest to trade on a regional exchange and has sent a commitment to trade. It may take a regional exchange up to 30 seconds to execute and report the transaction. However, before the specialist can report the trade to the position minder system via the Display Book®, customer orders on the same side at the same or a better price may have been received, which would trigger the ''P'' indicator when the specialist attempts to report the ITS trade. In such cases, the specialist would be permitted to use the ''Prin Ahead'' override feature. The specialist would be required to document the situation.

The Exchange believes that the amendment is designed to further ensure that public orders receive executions in the Exchange market against other public orders to the greatest extent possible.

2. Statutory Basis

The Exchange believes that the proposal, as amended, is consistent with section 6(b)(5) of the Act,[5] which requires that an exchange have rules that are designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal would not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

[4] CAP orders are orders in which the specialist may convert all or part of an unelected portion of a percentage order, and may trade on parity with the elected or converted portions of the order, as long as the specialist is not holding orders at the same price that do not grant parity.

[5] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the Exchange consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send e-mail to *rule-comments@sec.gov*. Please include File Number SR–NYSE–2004–70 on the subject line.

Paper Comments

- Send paper comments in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609.

All submissions should refer to File Number SR–NYSE–2004–70. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro/shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2004–70 and should be submitted on or before February 18, 2005.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–51051; File No. SR–PCX–2004–58]

Self-Regulatory Organizations; the Pacific Exchange, Inc.; Order Approving Proposed Rule Change and Amendment No. 2 Thereto by the Pacific Exchange, Inc., Relating to the Exchange's Rules Under Its Minor Rule Plan and Recommended Fine Schedule

January 18, 2005.

On December 2, 2004, the Pacific Exchange, Inc., (''PCX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend PCX Rule 10.12 to add new provisions (h)(45) and (k)(i)45. These provisions amend the PCX Minor Rule Plan (''MRP'') and Recommended Fine Schedule (''RFS'') to add the failure to maintain adequate procedures and controls to monitor and supervise the entry of electronic orders by Users [3] to prevent the prohibited practices set forth in PCX Rules 6.87(d) and 6.90(e).[4] The proposed rule change was published for comment in the **Federal Register** on December 17, 2004.[5] On January 3, 2005, PCX filed Amendment No. 1 to the proposal. On January 4, 2005, PCX withdrew Amendment No. 1 and filed Amendment No. 2 to the proposal.[6] The Commission received no comments on the proposal. This order approves the proposed rule change, as amended.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange,[7] and, in particular, the requirements of section 6(b)(5) of the Act,[8] in that it is designed to promote just and equitable principles of trade, facilitate transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Commission also finds that the proposal is consistent with section 6(b)(6) of the Act,[9] which requires that members and persons associated with members be appropriately disciplined for violations of Exchange rules, and section 6(b)(7) of the Act,[10] which requires that members and persons associated with members are provided a fair procedures for disciplinary procedure.

In approving this proposal, the Commission in no way minimizes the importance of compliance with these rules, and all other rules subject to the imposition of fines under the MRP. The Commission believes that the violation of any self-regulatory organization's rules, as well as Commission rules, is a serious matter. However, in an effort to provide the Exchange with greater flexibility in addressing certain violations, the MRP provides a reasonable means to address rule violations that do not rise to the level of requiring formal disciplinary

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Pursuant to PCX Rule 6.87(a)(2), ''User'' means any person or firm that obtains electronic access to Auto-Ex (defined in PCX Rule 6.87(a)(1)) through an Order Entry Firm (defined in PCX Rule 6.87(a)(3)). Pursuant to PCX Rule 6.90(c)(1), ''User'' means any person or broker-dealer that obtains electronic access to PCX Plus (defined in PCX Rule 6.90(a)) through an Order Entry Firm (defined in PCX Rule 6.90(c)(2)).

[4] PCX Rules 6.87(c)(4) and 6.90(d)(3) require Order Entry Firms to maintain such controls and procedures.

[5] *See* Securities Exchange Act Release No. 50830 (December 9, 2004), 69 FR 75581 (December 17, 2004) (''Notice'').

[6] In Amendment No. 2, PCX proposes to correct a typographical error in the proposed rule text by changing footnote 1 to tie to PCX Rule 10.12(k)(i) instead of to PCX Rule 10.12(k). Amendment No. 2 is a technical amendment, and, therefore, not subject to notice and comment.

[7] In approving this proposed rule change, the Commission notes that it has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[8] 15 U.S.C. 78f(b)(5).

[9] 15 U.S.C. 78f(b)(6).

[10] 15 U.S.C. 78f(b)(7).

proceedings. The Commission notes, however, that after the first failure by an Order Entry Firm to maintain adequate controls and procedures to monitor and supervise the entry of electronic orders pursuant to PCX Rules 6.87(c)(4) and 6.90(d)(3), the Exchange will treat subsequent violations as a formal disciplinary matter.[11] The Commission expects that the Exchange will continue to conduct surveillance with due diligence, and make a determination based on its findings as to whether fines of more or less than the recommended amount are appropriate for violations of rules under the MRP on a case-by-case basis, or if a violation requires formal disciplinary action.

It is therefore ordered, pursuant to section 19(b)(2) of the Act[12], that the proposed rule change, including Amendment No.2 thereto (File No. SR–PCX–2004–58) be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[13]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–51053; File No. SR–PCX–2005–03]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Pacific Exchange, Inc., Relating to Exchange Fees and Charges

January 18, 2005.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 11, 2005, the Pacific Exchange, Inc., (''PCX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the PCX. The PCX has designated this proposal as one establishing or changing a due, fee, or other charge imposed by the PCX under section 19(b)(3)(A)(ii) of the Act,[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PCX is proposing to amend its Schedule of Fees and Charges For Exchange Services (''Schedule'') in order to add provisions for the handling of options on the Standard and Poor's Depositary Receipts (ticker symbol ''SPY'') under the Exchange's marketing fee program. The text of the proposed rule change is available on the PCX's Web site (*http://www.pacificex.com*), at the PCX's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the PCX included statements concerning the purpose of and basis for its proposal and discussed any comments it had received regarding the proposal. The text of these statements may be examined at the places specified in Item IV below. The PCX has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The PCX states that the purpose of the proposed filing is to amend the Schedule in order to add provisions for the handling of SPY options under the Exchange's marketing fee program. The Exchange proposes to collect a $1.00 per contract marketing fee for SPY options and assess this fee on all transactions except for Market Maker to Market Maker transactions. In addition, the Exchange is proposing to exclude trades of SPY options from the existing cap on marketing fees. The PCX states that this charge is necessary as a result of the costs associated with trading SPY options. The Exchange believes that capping marketing fees at $200 per trade would put it at a competitive disadvantage to other exchanges that trade SPY options.

The Exchange has also proposed to revise the Schedule to show the change in the symbol of the Nasdaq-100 Tracking Stock Options from QQQ to QQQQ.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act[5] in general, and furthers the objectives of section 6(b)(4) of the Act[6] in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities for trading option contracts.[7]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The PCX neither solicited nor received written comments with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change establishes or changes a due, fee, or other charge imposed by the Exchange, it has become effective pursuant to section 19(b)(3)(A)(ii) of the Act[8] and subparagraph (f)(2) of Rule 19b–4 thereunder.[9] Accordingly, the proposal will take effect upon filing with the Commission. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–51061; File No. SR–PCX–00–15]

Self-Regulatory Organizations; Order Approving a Proposed Rule Change and Amendments No. 1 and 2 Thereto and Notice of Filing and Order Granting Accelerated Approval to Amendments No. 3, 4, 5, 6, and 7 Thereto by the Pacific Exchange, Inc. To Require the Immediate Display of Customer Limit Orders

January 21, 2005.

I. Introduction

On June 14, 2000, the Pacific Exchange, Inc. (''PCX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend PCX Rule 6.55 to require the immediate display of customer limit orders. PCX filed Amendments No. 1 and 2 to the proposed rule change on August 1, 2000,[3] and October 17, 2000,[4] respectively. The proposed rule change, as amended by Amendments No. 1 and 2, was published for comment in the **Federal Register** on November 21, 2000.[5] No comments were received regarding the amended proposal.

PCX filed Amendments No. 3, 4, 5, 6, and 7 with the Commission on October 28, 2004,[6] November 18, 2004,[7] December 10, 2004,[8] December 31, 2004,[9] and January 7, 2005,[10] respectively. This order approves the proposed rule change and Amendments No. 1 and 2 and grants accelerated approval to and solicits comment on Amendments No. 3, 4, 5, 6 and 7.

II. Description of Proposed Rule

PCX proposes to amend PCX Rule 6.55 to codify an immediate display requirement with respect to eligible customer limit orders (''Display Obligation''). The text of the proposed rule change, as amended, follows. Additions are in *italics*. Deletions are in [brackets].

Displaying Bids and Offers in the Book Rule 6.55. The limit orders in the custody of an Order Book Official [shall] constitute *the* [his] book. *Each Order Book Official shall display immediately the full price and size of any customer limit order that improves the price or increases the size of the best disseminated PCX quote.* [So far as practicable, an Order Book Official shall continuously display, in a visible manner, the highest bid and lowest offer along with an indication of the number of option contracts bid for at the highest bid and offered at the lowest offer in his book in each option contract for which

[6] On October 28, 2004, PCX filed a Form 19b–4, which replaced the original filing and Amendments No. 1 and 2 in their entirety (''Amendment No. 3''). In Amendment No. 3, PCX proposes to revise the proposal to reflect changes to PCX's systems (*i.e.*, the approval and roll-out of PCX Plus) since the Notice was published for comment. Amendment No. 3 also added a number of exemptions to the Display Obligation, discussed in more detail below, which mirror exemptions proposed by the Chicago Board Options Exchange (''CBOE'') and American Stock Exchange (''Amex'') in recently-published proposals. *See* Securities Exchange Act Release Nos. 49916 (June 25, 2004), 69 FR 40422 (July 2, 2004) (SR–CBOE–2004–35) (''CBOE Notice'') and 50188 (August 12, 2004), 69 FR 51495 (August 19, 2004) (SR–Amex–00–27) (''Amex Notice''), which we also approve today, *see* Securities Exchange Act Release Nos. 51063 (January 21, 2005) (''CBOE Approval'') and 51062 (January 21, 2005) (''Amex Approval'').

[7] *See* letter from Tania Blanford, Staff Attorney, Regulatory Policy, PCX, to Nancy Sanow, Assistant Director, Division, Commission, dated November 18, 2004 (''Amendment No. 4''). In Amendment No. 4, PCX proposes a minor modification to the exemptions to the Display Obligation.

[8] *See* Partial Amendment, dated December 10, 2004, submitted by Tania Blanford, Staff Attorney, PCX (''Amendment No. 5''). In Amendment No. 5, PCX proposes a minor modification to the exemptions to the Display Obligation.

[9] *See* Partial Amendment, dated December 31, 2004, submitted by Tania Blanford, Staff Attorney, PCX (''Amendment No. 6''). In Amendment No. 6, PCX proposes a minor modification to the exemptions to the Display Obligation.

[10] *See* Partial Amendment, dated January 7, 2005, submitted by Tania Blanford, Staff Attorney, PCX (''Amendment No. 7''). In Amendment No. 7, PCX proposes a minor modification to the exemptions to the Display Obligation.

he is acting as Order Book Official.] *For the purpose of this rule ''immediately'' means as soon as practicable after receipt, which under normal market conditions means no later than 30 seconds after receipt. The term ''customer limit order'' means an order to buy or sell a listed option at a specified price that is not for the account of either a broker or dealer; provided, however, that the term customer limit order shall include an order transmitted by a broker or dealer on behalf of a customer.* [provided, however, that where the highest bid or lowest offer is for more than twenty-five option contracts, or such other number of option contracts as may be prescribed from time to time by the Options Floor Trading Committee, the Order Book Official may display an indication that the bid or offer is for at least that number of option contracts. When required by market conditions, he may make such quotations available orally rather than by displaying them.] *The following order types are exempt from the display obligation:*

(a) An order executed upon receipt;

(b) An order where the customer who placed it requests that it not be displayed, and upon receipt of the order, the Floor Broker announces in public outcry the information concerning the order that would be displayed if the order were subject to being displayed;

(c) An order the terms of which are delivered immediately upon receipt to another options exchange that is a participant in the Intermarket Options Linkage Plan;

(d) Order types defined in PCX Rule 6.62(c)–(d), (f)–(h) and (j)–(k);

(e) Large-sized orders (orders for more than 100 contracts), unless the customer placing such order requests that the order be displayed;

(f) Orders received before or during a trading rotation (once the trading rotation ends and regular trading begins, orders received before or during the trading rotation will be subject to the display requirement).

Commentary:

[.01 In displaying the highest bid or the lowest offer in his book for a particular option contract, an Order Book Official shall indicate the full size of such bid or offer if it is for 25 or fewer option contracts. If the highest bid or the lowest offer is for more than 25 option contracts, the Order Book Official shall display a size indication of at least 25 units, and may indicate at his discretion, a larger number.]

[.02] *.01* Renumbered.

[.03] *.02* Renumbered.

Currently, PCX Rule 6.55 provides that an Order Book Official (''OBO'') ''shall continuously display, in a visible manner, the highest bid and lowest offer along with an indication of the number of option contracts bid for at the highest bid and offered at the lowest offer in his book in each option contract for which he is acting as Order Book Official.'' The OBO may take custody of limit orders both manually and electronically. An order is entered manually into an OBO's custody when a Floor Broker places a written, time-stamped order ticket into the proper receptacle at the trading post.[11] Alternatively, an order is entered electronically into the OBO's custody when an OTP Holder or OTP Firm sends it to the Pacific Options Exchange Trading System (''POETS'') or PCX Plus [12] via the Exchange's Member Firm Interface and the order, not being marketable, is electronically entered into the Consolidated Book [13] via the Auto-Ex Book [14] function of POETS or via PCX Plus. Orders entered electronically into the Consolidated Book are immediately displayed on the overhead screens on the trading floor and disseminated to the public via the Options Price Reporting Authority (''OPRA''). Orders entered manually must be entered into POETS or PCX Plus before being displayed on the floor or disseminated via OPRA.

Under the proposal, OBOs would be required to display immediately the price and full size of any eligible customer limit order that improves the price or increases the size of the best disseminated PCX quote. PCX proposes to define ''immediately'' to mean, under normal market conditions, as soon as practicable but no later than 30 seconds after receipt by the OBO.[15] PCX proposes to define the term ''customer limit order'' as ''an order to buy or sell a listed option at a specified price that is not for the account of either a broker or dealer; provided, however, that the term customer limit order shall include an order transmitted by a broker or dealer on behalf of a customer.''

PCX proposes to exempt, or partially exempt, certain order types from the Display Obligation. Specifically, PCX proposes to exempt orders executed upon receipt as well as any order where the customer who placed it requests that the order not be displayed, if upon receipt of the order, the Floor Broker announces via public outcry the information about the order that would be displayed if the order were subject to display.[16] PCX further proposes to exempt from the Display Obligation a customer order the terms of which are delivered, immediately upon receipt, to another options exchange that participates in the options intermarket linkage plan.[17]

The Exchange also proposes to exempt, or partially exempt, from the Display Obligation the following types of orders set forth in PCX Rule 6.62(c)–(d), (f)–(h) and (j)–(k):

Contingency orders: Stop-limit orders (PCX Rule 6.62(c)(1)) and stop (stop-loss) orders (PCX Rule 6.62(c)(2))—These orders are not executable until the market reaches a specified ''trigger'' price, at which point a stop-limit order converts to a limit order and a stop order converts to a market order. As such, these orders are not available to trade and have no standing in the quoted markets until the specified price trigger is reached. However, the limit order resulting from a triggered stop-limit order is subject to the Display Obligation.

Complex orders: Spread orders (PCX Rule 6.62(d)); straddle orders (PCX Rule 6.62(g)); combination orders (PCX Rule 6.62(h)); stock/option orders (PCX Rule 6.62(j)(1)); and ratio orders (PCX Rule 6.62(k))—These orders specify instructions to trade more than one options series or product as a package,

[11] *See* PCX Rule 6.52, Commentary .04. A Floor Broker must use due diligence in handling an order that it represents as agent. *See generally* PCX Rule 6.46.

[12] *See* Securities Exchange Act Release No. 49718 (May 17, 2004), 69 FR 29611 (May 24, 2004) (order approving PCX Plus).

[13] *See* PCX Rule 6.1(b)(37).

[14] *See* PCX Rule 6.87(1).

[15] In its filing, PCX states that ''receipt by the OBO'' means receipt on POETS or the PCX Plus system, which is consistent with the firm quote definition of ''time of receipt.'' This means that the time of receipt is when the order is received on POETS or PCX Plus, even if the OBO does not happen to see it for several seconds.

[16] While the Exchange's proposed Display Obligation would be imposed on the OBO, the OBO, who does not hold customer orders, cannot take custody of a limit order that a customer has instructed not to be displayed. Under PCX Rule 6.46(a) and (f) and Commentaries .01 and .05 thereto, the Floor Broker, as the person holding the order, will have the obligation to vocalize the information concerning the order that would be displayed if the order were subject to being displayed. Telephone conversation between Tania Blanford, Staff Attorney, Regulatory Policy, PCX, and Nathan Saunders, Attorney, Division, Commission, November 9, 2004.

[17] *See* Securities Exchange Act Release No. 43086 (July 28, 2000), 65 FR 48023 (August 4, 2000) (order approving the Plan for the Purpose of Creating and Operating an Intermarket Option Linkage). The Exchange represents that if such a related order that is delivered immediately upon receipt to another options exchange that is a particiipant in the intermarket options linkage plan were canceled, in whole or in part, by the other options exchange, then the OBO would be obligated to display immediately upon receipt of the cancellation notice the price and size of the customer order as set forth in proposed PCX Rule 6.55.

typically at a specified net debit or credit as opposed to at a specific limit price for each leg involved. Therefore, there is no specified limit price for each leg of the order to display in the Exchange's disseminated quotes. Moreover, OPRA does not accept complex order quotes at net prices.

One-cancels-the-other orders (PCX Rule 6.62(f))—A one-cancels-the-other order consists of two or more orders treated as a unit. The execution of any one of the orders causes the others to be cancelled. If the Floor Broker cannot execute any of the orders upon receipt, then none can be displayed or booked as doing so could result in the approximately simultaneous execution of more than one component order, in direct contravention of the primary order condition.

Large sized orders—The Commission's Display Rule, Rule 11Ac1–4 under the Act,[18] applicable to customer limit orders received in the equity market, provides a general exclusion for block size orders of at least 10,000 shares.[19] PCX proposes to adopt a similar exemption for large sized orders. Accordingly, there would be no obligation to display orders for more than 100 contracts, unless the customer placing such order requests otherwise.

Orders received during a trading rotation—Orders received before or during a trading rotation (as defined in PCX Rule 6.64) would be exempt from the 30-second standard. During a rotation, the PCX systems attempt to find the opening price and until the opening price is established, there is no disseminated market. Once the trading rotation ends and regular trading begins, orders received before or during the trading rotation would be subject to the Display Obligation.

Finally, PCX proposes to delete language in PCX Rule 6.55, Commentary .01, referring to display obligations where the highest bid or lowest offer is for more than twenty-five option contracts as such language is no longer applicable.

III. Commission Findings and Order Granting Approval

The Commission finds that the proposed rule change, as amended, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange[20] and, in particular, the requirements of section 6(b)(5) of the Act,[21] which requires, among other things, that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Specifically, the Commission believes that the immediate display of customer limit orders that improve the price or size of the best disseminated PCX quote should promote transparency and enhance the quality of executions of customer limit orders on PCX.

The proposed amendments to PCX Rule 6.55 introduce requirements for customer limit order display that are comparable to the requirements of the Commission's Display Rule, which is applicable to customer limit orders received in the equity market. In addition, the Commission believes that the Exchange's proposal to exempt large sized orders from the Display Obligation is reasonable since a substantially similar exemption is set forth in the Commission's Display Rule.

The Commission also believes that it is consistent with the Act for PCX to exempt from the Display Obligation under its rules stop-limit and stop or stop-loss orders. These orders are contingent orders that are subject to a particular triggering event and, thus, are not available for execution until the triggering event occurs. A stop-loss order becomes a market order when triggered and thus is not subject to the Display Obligation because such an order would then be immediately executable. A stop-limit order becomes a limit order when the triggering event occurs. This limit order would be subject to the Display Obligation. Spread, straddle, combination, stock/option, ratio and one-cancels-the-other orders are complex orders with more than one component and, thus, the Commission believes, are not suitable for display.

During a trading rotation, PCX systems attempt to set an opening price for the series. Until that opening price is established, there is no disseminated market. Therefore, it is reasonable to exempt orders received before or during a trading rotation from the Display Obligation. The Commission notes, however, that once the trading rotation ends, any orders not executed would then be subject to the Display Obligation.

Finally, the Exchange proposes to exempt from the Display Obligation customer orders the terms of which are delivered, immediately upon receipt, to another options exchange. The Commission believes it is reasonable to exempt such orders since they are subject to execution upon receipt at the other options exchange. Moreover, the Exchange represents that if the order delivered to the other options exchange were canceled, in whole or in part, by the other exchange, then the original customer order would be subject to the Display Obligation immediately upon receipt of the cancellation notice by the Exchange.

The Commission finds good cause for approving Amendments No. 3, 4, 5, 6, and 7 to the proposed rule change prior to the thirtieth day after their publication in the **Federal Register,** pursuant to section 19(b)(2) of the Act.[22] Amendment No. 3 would revise the proposal to reflect changes to PCX's systems since the Notice was published for comment. These revisions are necessary given recent changes to PCX's systems, such as the approval and implementation of the PCX Plus electronic trading platform, but do not alter the primary purpose of the proposal: to require immediate display of customer limit orders on the Exchange.

In Amendment No. 3, PCX also proposes several exemptions to the Display Obligation. The Commission notes that these exemptions, discussed in detail in Part II above, are substantially identical to exemptions proposed by CBOE and Amex in their customer limit order display proposals, which were recently noticed for full 21-day comment periods.[23] No comments were received on either the CBOE or Amex proposal. Amendments No. 4, 5, 6, and 7 proposed minor modifications to the proposed rule text, and thus are appropriate for accelerated approval.

Accelerated approval of Amendments No. 3, 4, 5, 6, and 7 will permit the Exchange to implement the proposal in an expeditious manner, *i.e.,* simultaneously with the implementation of similar proposals by CBOE, Amex and the Philadelphia Stock Exchange (''Phlx''), which we also approve today.[24] The Commission,

[18] 17 CFR 240.11Ac1–4.

[19] *See* 17 CFR 240.11Ac1–4(c)(4).

[20] In approving this proposal, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

therefore, believes that good cause exists, consistent with section 6(b)(5) [25] and section 19(b) [26] of the Act, to accelerate approval of Amendments No. 3, 4, 5, 6, and 7.

IV. Solicitation of Comments Concerning Amendments No. 3, 4, 5, 6, and 7

Interested persons are invited to submit written data, views, and arguments concerning Amendments No. 3, 4, 5, 6, and 7, including whether they are consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–PCX–00–15 on the subject line.

Paper Comments

• Send paper comments in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609.

All submissions should refer to File Number SR–PCX–00–15. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–PCX–00–15 and should be submitted on or before February 18, 2005.

V. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[27] that the proposed rule change (File No. SR–PCX–00–15), as amended, be approved, and that Amendments No. 3, 4, 5, 6, and 7 thereto be approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[28]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–51060; File No. SR–Phlx–2005–01]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating To Imposing a New Licensing Fee in Connection With the Firm-Related Equity Option and Index Option Fee Cap

January 19, 2005.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 10, 2005, the Philadelphia Stock Exchange, Inc. (''Exchange'' or ''Phlx'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in items I, II, and III below, which items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Phlx, pursuant to section 19(b)(1) of the Act and Rule 19b–4 thereunder, proposes to amend its schedule of fees to adopt a license fee of $.10 for options traded on the Standard & Poor's Depositary Receipts®, Trust Series 1 (''SPDRs''), traded under the symbol SPY (''SPY''),[3] to be assessed per contract side for equity option ''firm'' transactions (comprised of equity option firm/proprietary comparison transactions, equity option firm/proprietary transactions and firm/proprietary facilitation transactions). This license fee will be imposed only after the Exchange's $60,000 ''firm-related'' equity option and index option comparison and transaction charge cap, described more fully below, is reached.

Currently, the Exchange imposes a cap of $60,000 per member organization [4] on all ''firm-related'' equity option and index option comparison and transaction charges combined.[5] Specifically, ''firm-related'' charges include equity option firm/proprietary comparison charges, equity option firm/proprietary transaction charges, equity option firm/proprietary facilitation transaction charges, index option firm (proprietary and customer executions) comparison charges, index option firm/proprietary transaction charges, and index option firm/proprietary facilitation transaction charges (collectively, ''firm-related charges''). Thus, such firm-related charges for equity options and index options, in the aggregate for one billing month, may not exceed $60,000 per month per member organization.

The Exchange also imposes a license fee of $0.10 per contract side for equity option ''firm'' transactions on options on Nasdaq-100 Index Tracking Stocksm,[6] traded under the symbol

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] ''Standard & Poor's,'' ''S&P®,'' ''S&P 500®,'' ''Standard & Poor's 500®,'' ''Standard & Poor's Depositary Receipts®,'' and ''500'' are trademarks of The McGraw-Hill Companies, Inc., and have been licensed for use by the Philadelphia Stock Exchange, Inc., in connection with the listing and trading of SPDRs, on the Phlx. These products are not sponsored, sold or endorsed by Standard & Poor's, a division of The McGraw-Hill Companies, Inc., and Standard & Poor's makes no representation regarding the advisability of investing SPDRs.

[4] The firm/proprietary comparison or transaction charge applies to member organizations for orders for the proprietary account of any member or non-member broker-dealer that derives more than 35% of its annual, gross revenues from commissions and principal transactions with customers. Member organizations are required to verify this amount to the Exchange by certifying that they have reached this threshold and by submitting a copy of their annual report, which was prepared in accordance with Generally Accepted Accounting Principles (''GAAP''). In the event that a member organization has not been in business for one year, the most recent quarterly reports, prepared in accordance with GAAP, will be accepted. *See* Securities Exchange Act Release No. 43558 (November 14, 2000), 65 FR 69984 (November 21, 2000) (SR–Phlx–00–85).

[5] *See* Securities Exchange Act Release No. 51024 (January 11, 2005), 70 FR 3088 (January 19, 2005) (File No. SR–Phlx–2004–94).

[6] The Nasdaq-100®, Nasdaq-100 Index®, Nasdaq®, The Nasdaq Stock Market®, Nasdaq-100 Shares℠, Nasdaq-100 Trust℠, Nasdaq-100 Index

QQQQ (''QQQ''), and certain other licensed products [7] (collectively, ''licensed product'') after the $60,000 cap, as described above, is reached. Therefore, when a member organization exceeds the $60,000 cap (comprised of combined firm-related charges), the member organization is charged $60,000, plus license fees of $0.10 per contract side for any applicable licensed product trades (if any) over those that were included in reaching the $60,000 cap. In other words, once the cap is reached, the $0.10 license fee is imposed on all subsequent firm-related transactions; these license fees are charged in addition to the $60,000 cap.

The Exchange proposes to adopt a $.10 license fee per contract side for the SPY for equity option firm transactions, which will be imposed after the $60,000 cap is reached in the same way the current licensed product fees are assessed. Thus, when a member organization exceeds the $60,000 cap, the member organization will be charged $60,000 plus any applicable license fees for trades of licensed products, including the SPY, over those trades that were counted in reaching the $60,000 cap.[8]

The fees set forth in this proposal are scheduled to become effective for transactions settling on or after January 10, 2005.

The Exchange also proposes to make a minor change to its $60,000 Firm Related Equity Option and Index Option Cap Schedule by changing the reference to ''$50,000'' to read ''$60,000.'' Although other references to $50,000 were changed to $60,000 in SR–Phlx–2004–94, this reference was inadvertently omitted.

A copy of the applicable portions of the Exchange's Summary of Equity Options Charges and the Exchange's $60,000 ''Firm Related'' Equity Option and Index Option Cap Schedule is available on Phlx's Web site (*http://www.phlx.com/exchange/phlx_rule_fil.html*), at Phlx's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in item IV below. The Exchange has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of assessing the SPY license fee of $.10 per contract side after reaching the $60,000 cap as described in this proposal is to help defray licensing costs associated with the trading of this product, while still capping member organizations' fees enough to attract volume from other exchanges. The cap operates this way in order to offer an incentive for additional volume without leaving the Exchange with out-of-pocket costs.

2. Statutory Basis

The Exchange believes that the proposal is consistent with Section 6(b)(4) of the Act,[9] in that it provides for the equitable allocation of reasonable dues, fees and other charges among its members and other persons using its facilities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change establishes or changes a due, fee or other charge imposed by the Exchange, it has become effective pursuant to section 19(b)(3)(A)(ii) of the Act [10] and Rule 19b–4(f)(2) [11] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an E-mail to *rule-comments@sec.gov*. Please include File No. SR–Phlx–2005–01 on the subject line.

Paper Comments

- Send paper comments in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609.

All submissions should refer to File Number SR–Phlx–2005–01. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written

---

Tracking Stock℠, and QQQ℠ are trademarks or service marks of The Nasdaq Stock Market, Inc. (''Nasdaq'') and have been licensed for use for certain purposes by the Phlx pursuant to a License Agreement with Nasdaq. The Nasdaq-100 Index® (''Index'') is determined, composed, and calculated by Nasdaq without regard to the Licensee, the Nasdaq-100 Trust℠, or the beneficial owners of Nasdaq-100 Shares℠. Nasdaq has complete control and sole discretion in determining, comprising, or calculating the Index or in modifying in any way its method for determining, comprising, or calculating the Index in the future.

[7] In addition to the QQQs, the following products are assessed a $.10 license fee per contract side after the $60,000 cap is reached: Russell 1000 Growth iShares (''IWF''); Russell 2000 iShares (''IWM''); Russell 2000 Value iShares (''IWN''): Russell 2000 Growth iShares (''IWO''); Russell Midcap Growth iShares (''IWP''); Russell Midcap Value iShares (''IWS''); NYSE Composite Index (''NYC''); and NYSE U.S. 100 Index (''NY'').

[8] Consistent with current practice, when calculating the $60,000 cap, the Exchange first calculates all equity option and index option transaction and comparison charges for products without license fees, and then equity option transaction and comparison charges for products with license fees (*i.e.*, QQQ license fees) that are assessed by the Exchange after the $60,000 cap is reached. *See* Securities Exchange Act Release No. 50836 (December 10, 2004), 69 FR 75584 (December 17, 2004) (SR–Phlx–2004–70).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–51064; File No. SR-Phlx-2004–73

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Notice of Filing and Order Granting Accelerated Approval to a Proposed Rule Change and Amendments No. 1 and 2 Thereto To Require the Immediate Display of Customer Options Limit Orders

January 21, 2005.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1], and Rule 19b–4[2] thereunder, notice is hereby given that on November 3, 2004, the Philadelphia Stock Exchange, Inc. (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in items I, II, and III, below, which items have been substantially prepared by the Exchange. Phlx filed Amendment No. 1 to the proposed rule change on January 13, 2005,[3] and filed Amendment No. 2 to the proposed rule change on January 19, 2005.[4] The Commission is publishing this notice to solicit comment on the proposed rule change, as amended, from interested persons, and at the same time is granting accelerated approval to the proposed rule change, as amended.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Phlx proposes to amend Phlx Rules 1014, 1063 and 1080, and to delete Option Floor Procedure Advice A–1, to: (1) Reflect that the Exchange's Automated Options Market (''AUTOM'') System,[5] and not the specialist, will immediately display the full price and size of any limit order that establishes the Exchange's disseminated price or increases the size of the Exchange's disseminated bid or offer, subject to certain exemptions; and (2) establish new rules that require Exchange Registered Options Traders (''ROTs'') and Floor Brokers to place limit orders on the limit order book electronically.

The text of the proposed rule change, as amended, follows. Additions are in *italics*. Deletions are in [brackets].

* * * * *

Rule 1014. Obligations and Restrictions Applicable to Specialists and Registered Options Traders

(a)–(h) No Change.

Commentary:

.01–.17 No change.

.18. An ROT who wishes to place a limit order on the limit order book must submit such a limit order electronically.

* * * * *

Rule 1063. Responsibilities of Floor Brokers

(a)–(e) No change.

Commentary:

.01. A Floor Broker who wishes to place a limit order on the limit order book must submit such a limit order electronically through the Options Floor Broker Management System.

* * * * *

Rule 1080. Philadelphia Stock Exchange Automated Options Market (AUTOM) and Automatic Execution System (AUTO–X)

(a)–(b) No change

(c) AUTO–X. * * *

(i)–(iii) No change.

(iv) Except as otherwise provided in this Rule, in the following circumstances, an order otherwise eligible for automatic execution will instead be manually handled by the specialist:

(A)–(C) No change.

(D) When the [specialist posts] *Exchange's best* [a] bid or offer *is represented by a limit order on the book* [that is better than the specialist's own bid or offer] (except with respect to orders eligible for ''Book Sweep'' as described in Rule 1080(c)(iii) above, and ''Book Match'' as described in Rule 1080(g)(ii) below);

(E)–(H) No change.

(d)–(k) No change.

Commentary:

.01 No change.

.02 The Electronic Order Book is the Exchange's automated [specialist] limit order book, which automatically routes all unexecuted AUTOM orders to the book and displays orders real-time in order of price/time priority. [Orders not delivered through AUTOM may also be entered onto the Electronic Order Book.]

(a)(i) Except as provided in sub-paragraph (a)(ii) below, the AUTOM System will immediately display the full price and size of any limit order that establishes the Exchange's disseminated price or increases the size of the Exchange's disseminated bid or offer.

(ii) The AUTOM System will not display:

(A) An order executed upon receipt;

(B) An order where the customer who placed it requests that it not be displayed, and upon representation of such order in the trading crowd the Floor Broker announces in public outcry the information concerning the order that would be displayed if the order were subject to being displayed;

(C) A customer limit order for which, immediately upon receipt, a related order for the principal account of the specialist, reflecting the terms of the customer order, is routed to another options exchange;

(D) Orders received before or during a trading rotation, however, such limit orders will be displayed immediately upon conclusion of the applicable rotation if they represent the Exchange's best bid or offer;

[12] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Amendment No. 1, dated January 13, 2005, submitted by Richard S. Rudolph, Director and Counsel, Phlx (''Amendment No. 1''). In Amendment No. 1, Phlx proposes clarifying language to be included in the previously submitted proposed rules.

[4] *See* Amendment No. 2, dated January 19, 2005, submitted by Richard S. Rudolph, Director and Counsel, Phlx (''Amendment No. 2''). In Amendment No. 2, Phlx proposes a minor modification to the previously submitted proposed rules.

[5] AUTOM is the Exchange's electronic order delivery, routing, execution and reporting system, which provides for the automatic entry and routing of equity option and index option orders to the Exchange trading floor. Orders delivered through AUTOM may be executed manually, or certain orders are eligible for AUTOM's automatic execution features: AUTO-X, Book Sweep, and Book Match. Equity option and index option specialists are required by the Exchange to participate in AUTOM and its features and enhancements. Option orders entered by Exchange members into AUTOM are routed to the appropriate specialist unit on the Exchange trading floor. *See* Phlx Rule 1080.

(E) The following order types as defined in Rule 1066: Contingency Orders; One-Cancels-the-Other Orders; Hedge Orders (e.g., spreads, straddles, combination orders); Synthetic Options;

(F) Immediate or Cancel (''IOC'') orders.

(b) Limit orders may only be placed on the limit order book by: (i) An ROT via electronic interface with AUTOM pursuant to Rule 1014, Commentary .18; (ii) a Floor Broker using the Options Floor Broker Management System (as described in Commentary .06 below); or (iii) the AUTOM System for eligible customer and off-floor broker-dealer limit orders.

(c) A limit order to be executed manually by the specialist pursuant to Rule 1080(c)(iv) will be displayed automatically by the AUTOM System until such limit order is executed or cancelled. If such limit order is partially executed, the AUTOM System will automatically display the actual number of contracts remaining in such limit order.

.03 No change.

.04 ROT Limit Orders. * * *

Not later than ten days following approval by the Securities and Exchange Commission of the rules applicable to the Exchange's electronic trading platform, Phlx XL, the Exchange will commence the initial deployment of Phlx XL by allowing specialists and ROTs who are Streaming Quote Traders (''SQTs,'' as defined in the Phlx XL rules) to submit electronic quotations in Streaming Quote Options (as defined in the Phlx XL rules), and ROTs who are not SQTs to submit limit orders onto the limit order book via electronic interface with AUTOM [or manually through a Floor Broker or the Specialist]. Eligible incoming orders and quotations will automatically execute against quotations of specialists and SQTs and orders of ROTs in accordance with the functionality of the Phlx XL system, as set forth in the Phlx XL rules.

* * *

.05–.07 No change.

* * * * *

Option Floor Procedure Advices—A–1: Reserved

[Responsibility of Displaying Best Bids and Offers

(a) A Specialist shall use due diligence to ensure that the best available bid and offer is displayed for those option series in which he is assigned.

Bids and offers for the Specialist's own account, bids and offers on the book, and bids and offers established in the crowd are deemed available for display purposes.

(b) After voicing a bid/offer, the Floor Broker or ROT shall use due diligence to inform the Specialist when s/he is no longer bidding/offering at that price. Specifically, the Floor Broker or ROT must immediately inform the Specialist when s/he is ''out'' of that bid/offer, including due to an execution or departure from the crowd.

FINE SCHEDULE (Implemented on a two-year running calendar basis)

A–1

1st Occurrence—$250.00
2nd Occurrence—$500.00
3rd Occurrence—$1,000.00
4th Occurrence and Thereafter Sanction is discretionary with Business Conduct Committee]

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Phlx included statements concerning the purpose of and basis for the proposed rule change, as amended, and discussed any comments it received on the proposed rule change, as amended. The text of these statements may be examined at the places specified in item III below. The Phlx has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change, as amended, is to establish Phlx rules that reflect the immediate, automatic display of limit orders (with certain exemptions as described below), and to require that Phlx ROTs and Floor Brokers who wish to place limit orders on the limit order book do so electronically.

Currently, Exchange Options Floor Procedure Advice (''OFPA'') A–1[6] requires the specialist to use due diligence to ensure that the best available bid and offer is displayed for those option series in which he is assigned, including limit orders that represent the Exchange's best bid or offer. However, due to the recently enhanced display functionality of the AUTOM System, the Exchange is proposing to remove this responsibility from the specialist and to fully automate that process. Accordingly, the proposal would delete OFPA A–1 in its entirety.

The Exchange also proposes to adopt Commentary .02(a) to Phlx Rule 1080 to provide generally that the AUTOM System will immediately[7] display the full price and size of any limit order that establishes the Exchange's disseminated price or increases the size of the Exchange's disseminated bid or offer. The proposal would delete the current provision in Commentary .02 that states that orders not delivered through AUTOM may also be entered onto the Electronic Order Book, because this can no longer be done manually.

Consistent with the full automation of the display of limit orders on the limit order book, the Exchange proposes to adopt Commentary .02(b) to clarify that limit orders may be placed on the limit order book only by: (i) An ROT via electronic interface with AUTOM pursuant to Phlx Rule 1080, Commentary .18;[8] (ii) a Floor Broker using the Options Floor Broker Management System pursuant to Phlx Rule 1063, Commentary .01;[9] or (iii) the AUTOM System for eligible customer and off-floor broker-dealer limit

[6] *See* Securities Exchange Act Release Nos. 21760 (February 14, 1985), 50 FR 7248 (February 21, 1985) (SR–Phlx–84–13); 39754 (March 13, 1998), 63 FR 13901 (March 23, 1998) (SR–Phlx–97–53); and 44537 (July 11, 2001), 66 FR 37511 (July 18, 2001) (SR–Phlx–2001–36).

[7] The Exchange represents that, for the purposes of this rule, ''immediately'' display means that the AUTOM System will display eligible orders not subject to an exemption automatically and instantaneously upon receipt. Telephone call between Rick Rudolph, Director and Counsel, Phlx, and Nathan Saunders, Attorney, Division of Market Regulation (''Division''), Commission, November 8, 2004.

[8] In November, 2002, the Commission approved the Exchange's proposal to allow on-floor, in-crowd ROTs to place electronic price improving limit orders on the limit order book via electronic interface with AUTOM (''ROT Access''). *See* Securities Exchange Act Release No. 46763 (November 1, 2002), 67 FR 68898 (November 13, 2003) (SR–Phlx–2002–04). The rules governing ROT Access were amended in July 2004 in the Phlx XL proposal by eliminating the requirement that ROT limit orders placed on the limit order book under ROT Access be price-improving limit orders. *See* Securities Exchange Act Release No. 50100 (July 27, 2004), 69 FR 46612 (August 3, 2004) (SR–Phlx–2003–59).

[9] The Options Floor Broker Management System is a component of AUTOM designed to enable Floor Brokers and/or their employees to enter, route and report transactions stemming from options orders received on the Exchange. The Options Floor Broker Management System also is designed to establish an electronic audit trail for options orders represented and executed by Floor Brokers on the Exchange, such that the audit trial provides an accurate, time-sequenced record of electronic and other orders, quotations and transactions on the Exchange, beginning with the receipt of an order by the Exchange, and further documenting the life of the order through the process of execution, partial execution, or cancellation of that order. *See* Phlx Rule 1080, Commentary .06.

orders.[10] In conjunction with this rule, the Exchange proposes to adopt Commentary .18 to Phlx Rule 1014, to require an ROT who wishes to place a limit order on the limit order book to submit such a limit order electronically, and Commentary .01 to Phlx Rule 1063, to establish that a Floor Broker who wishes to place a limit order on the limit order book must submit such a limit order electronically through the Options Floor Broker Management System. The proposed rule change would delete the provision currently contained in Commentary .04 to Phlx Rule 1014 that an ROT may place a limit order onto the limit order book manually through a Floor Broker or the specialist.

Additionally, because the specialist would no longer have the ability to post a limit order, the Exchange proposes to amend Phlx Rule 1080(c)(iv)(D), which currently provides that an order otherwise eligible for automatic execution is instead handled manually by the specialist ''when the specialist posts a bid or offer that is better than the specialist's own bid or offer.'' Currently, Phlx Rule 1080(c)(iv)(D) states that the specialist will handle an order otherwise eligible for automatic execution manually in this situation, except with respect to orders eligible for Book Sweep, where an automatic execution occurs when a contra-side quotation that matches a limit order on the book results in an execution at the NBBO,[11] and Book Match, where an automatic execution occurs when an inbound contra-side order that matches a limit order on the book results in an execution at the NBBO.[12] To accurately reflect that the specialist can no longer ''post'' a bid or offer (as described above), the Exchange proposes to amend Phlx Rule 1080(c)(iv)(D) to provide that an order otherwise eligible for automatic execution would instead be handled manually by the specialist when the Exchange's best bid or offer is represented by a limit order on the book. While generally a limit order on the book would be eligible for automatic execution by way of Book Match or Book Sweep, Phlx Rule 1080(c)(iv)(D) is still necessary, because the specialist still would handle an order manually when a ROT or a Floor Broker in the trading crowd verbally announces to the specialist that he/she intends to trade against the limit order on the book representing the Exchange's best bid or offer. While the specialist no longer has the ability to ''post'' a limit order on the limit order book, the specialist would continue to have the ability to execute such an order, once it is placed on the limit order book electronically, against the ROT or Floor Broker's order, by pointing and clicking on the limit order on the book and entering the contra-side account number against which the limit order on the book will trade.

The proposed rule change also includes in Commentary .02(c) a provision that limit orders to be executed manually by the specialist pursuant to Phlx Rule 1080(c)(iv)[13] would be displayed automatically by the AUTOM system until the limit order is executed or cancelled. If a limit order is partially executed, the AUTOM System would automatically display the actual number of contracts remaining in the limit order.

Finally, the proposed rule change would establish certain exemptions, or partial exemptions, to the limit order display rule. The proposed exemptions provide that AUTOM will not display: (a) Limit orders executed upon receipt; (b) a limit order where the customer who placed it requests that it not be displayed, and upon representation of such order in the trading crowd the Floor Broker announces in public outcry the information concerning the order that would be displayed if the order were subject to being displayed; (c) a customer limit order for which, immediately upon receipt, a related order for the principal account of the specialist, reflecting the terms of the customer order, is routed to another options exchange; (d) a limit order received before or during a trading rotation[14] (however, such limit orders will be displayed immediately upon conclusion of the applicable rotation if they represent the Exchange's best bid or offer); (e) certain contingent and complex order types defined in Phlx Rule 1066, as discussed more fully below; and (f) immediate or cancel limit orders.

Generally, Phlx has proposed exemptions or partial exemptions for certain types of contingent and complex orders because these order types, by definition, are priced in a way that is dependent on a condition or another variable, such that displaying the price of such an order without the other information would not accurately reflect that trading interest.

Contingency Orders (Phlx Rule 1066(c)): These orders are contingent upon a condition being satisfied, and are not executable until the prerequisite condition is satisfied. Phlx Rule 1066(c) contains the following types of contingency orders eligible for delivery via AUTOM that would not be immediately displayed under the proposal: stop (stop-loss), stop-limit, all-or-none, market-on-close, and cancel-replacement orders.

Stop (Stop-Loss) and Stop Limit Orders (Phlx Rule 1066(c)(1)): These orders are not executable until the market reaches a specified price that ''elects'' the order, at which point they convert to a market order. As such, they are not available to trade and have no standing in the quoted markets until the specified price is reached. A trade or a quote can be the ''triggering'' event for the election of a stop order. Because they convert to market orders upon the triggering event, stop orders cannot then be subject to the display requirement.

A stop-limit order is not ''triggered'' until the option contract trades or is bid (offered) at or above (below) the stop price, at which point it converts to a limit order. As such, a stop-limit order has no standing in the quoted markets until the specified price trigger is reached. Once triggered, the stop-limit order converts to a limit order, and thus would be subject to display.

All-or-None Orders (Phlx Rule 1066(c)(4)): While an all-or-none order can be a limit order, instructions require the order be executed in its entirety or not at all. The Commission's Display Rule, applicable to customer limit orders received in the equity market, also provides an exemption for all-or-none orders.[15]

Market-on-Close Orders (Phlx Rule 1066(c)(6)): These orders may have a limit price attached, but are not eligible for representation until the close of trading is imminent. Regardless of the time at which a market-on-close order is entered, the floor broker is required to hold such an order, and is precluded from representing it, until as near as

[10] Off-floor broker-dealers may deliver limit orders for entry onto the limit order book via AUTOM. *See* Phlx Rule 1080(b)(i)(C). The Exchange represents that orders that are not eligible for routing through the AUTOM System would be rejected and sent back either (a) to the firm that submitted the order, for reentry, or (b) to the Floor Broker who submitted the order, to be represented using the Options Floor Broker Management System. Telephone call between Rick Rudolph, Director and Counsel, Phlx, and Nathan Saunders, Attorney, Division, Commission, November 8, 2004.

[11] *See* Phlx Rule 1080(c)(iii).

[12] *See* Phlx Rule 1080(g)(ii).

[13] Phlx Rule 1080(c)(iv) enumerates a variety of circumstances under which orders otherwise eligible for automatic execution are instead handled manually by the specialist.

[14] During a trading rotation, the specialist attempts to find the opening price and until the opening price is established, there is no disseminated market. Once the trading rotation ends and regular trading begins, limit orders received before or during the trading rotation that are not executed at the opening price and remain on the limit order book will be displayed if they represent the Exchange's best bid or offer.

[15] *See* 17 CFR 240.11Ac1–4(c)(7).

possible to the close of trading. Furthermore, because representation and execution of these orders must occur on or as near to the close of trading as possible, it would be difficult if not impossible to determine whether members met an appropriate display standard for such orders.

Cancel-Replacement Order (Phlx Rule 1066(c)(7)): A cancel-replacement order is a contingency order consisting of two or more parts which require the immediate cancellation of a previously received order prior to the replacement of a new order with new terms and conditions. If the previously placed order is already filled partially or in its entirety, the replacement order is automatically canceled or reduced by the number of contracts partially filled. AUTOM would not immediately display all parts of the cancel-replacement order, but rather would display only the order that remains after the previously received order is cancelled.

In addition to contingency orders, the Exchange also proposes to establish an exemption for one-cancels-the-other orders, hedge orders and synthetic options.

One-Cancels-the-Other Orders (Phlx Rule 1066(e)): A one-cancels-the-other order is comprised of two or more orders treated as a collective unit. The execution of any one of the component orders cancels the other(s). If the specialist cannot execute any of the orders upon receipt, then none can be displayed or booked as doing so could result in the approximate simultaneous execution of more than one component order, in direct contravention of the primary order condition.

Hedge Orders (Phlx Rule 1066(f)) and Synthetic Options (Phlx Rule 1066(g)): Hedge orders (*e.g.*, spreads, straddles, and combination orders) and synthetic options are orders that specify instructions to trade more than one options series or product as a package, typically (with respect to hedge orders) at a specified net debit or credit, as opposed to a specific limit price for each leg involved. Therefore, there is no specified limit price for each series involved to display in the quotes. Moreover, the Options Price Reporting Authority (''OPRA'') does not accept complex order quotes at net prices. Therefore, these orders would not be displayed. Each component of these complex orders is, in essence, itself contingent on the ability to execute the other components of the order. Since there is no guarantee that all components will become executable at the same time, if at all, the immediate display of all components could result in the execution of less than all components of the order.

Immediate or Cancel Orders: An immediate or cancel order is a market or limit order which is to be executed in whole or in part as soon as such order is represented in the trading crowd. Any portion not executed is to be cancelled, which means it cannot be displayed. An immediate or cancel order shares most of the same characteristics of an all-or-none order, which is exempt from the Commission's Display Rule.[16] Given the similarity between these order types, the Exchange believes that immediate or cancel orders should also be exempt from the requirements of the Exchange's limit order display rule.

2. Statutory Basis

The Exchange believes that its proposal is consistent with section 6(b) of the Act[17] in general, and furthers the objectives of section 6(b)(5) of the Act[18] in particular, in that it is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanisms of a free and open market and a national market system, and to protect investors and the public interest, by establishing rules requiring the immediate automated display of limit orders on the Exchange, and by requiring ROTs and Floor Brokers to place limit orders on the book electronically, which should enhance transparency on the Exchange and should enhance the Exchange's ability to provide an electronic audit trail respecting the immediate display of limit orders.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether they are consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–Phlx–2004–73 on the subject line.

Paper Comments

- Send paper comments in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609.

All submissions should refer to File Number SR–Phlx–2004–73. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2004–73 and should be submitted on or before February 18, 2005.

IV. Commission's Findings and Order Granting Accelerated Approval of Proposed Rule Change

The Commission finds that the proposed rule change, as amended, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange[19] and, in particular, the requirements of section 6(b)(5) of the Act,[20] which requires, among other

[16] *See supra* note 15 and accompanying text.

[17] 15 U.S.C. 78f(b).

[18] 15 U.S.C. 78f(b)(5).

[19] In approving this proposal, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[20] 15 U.S.C. 78f(b)(5).

things, that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Specifically, the Commission believes that the immediate display of customer options limit orders that improve the price or size of the best disseminated Phlx quote should promote transparency and enhance the quality of executions of customer limit orders on the Phlx.

The proposed amendments to Phlx rules introduce requirements for limit order display that are comparable to the requirements of the Commission's Display Rule, Rule 11Ac1–4 under the Act,[21] which is applicable to customer limit orders received in the equity market. The Exchange has represented that immediate display of limit orders by the AUTOM system means that eligible limit orders will be displayed automatically and instantaneously, as soon as the order is received on the Exchange. Proposed commentaries .02(b) to Phlx Rule 1080, .18 to Phlx Rule 1014, and .01 to Phlx Rule 1063 provide that the only way limit orders may be sent to the Exchange will be electronically via AUTOM, either by an ROT via electronic interface with AUTOM, by a Floor Broker via the Options Floor Broker Management System component of AUTOM, or by off-floor broker-dealers who transmit orders via AUTOM. Thus, under Phlx's system, all limit orders subject to display must be delivered electronically to the Exchange, and would then be displayed automatically and instantaneously.

The Commission believes that the Exchange's proposal to exempt all-or-none and immediate or cancel orders from the Phlx's limit order display rule is reasonable since these order types are either identical or substantially similar to order types exempt from the Commission's Display Rule.

The Commission also believes that it is consistent with the Act for the Phlx to exempt from the limit order display requirements under its rules stop-limit and stop or stop-loss orders. These orders are contingent orders that are subject to a particular triggering event and, thus, are not available for execution until the triggering event occurs. A stop-loss order becomes a market order when triggered and thus is not subject to the Phlx's limit order display rule because such an order would then be immediately executable. A stop-limit order becomes a limit order when the triggering event occurs. This limit order would be subject to display under the Phlx's rules.

Cancel-replacement orders may be reduced in size if the order intended to be cancelled and replaced has already been filled partially or in its entirety. Thus, a cancel-replacement order would not be immediately displayed, but would be subject to display only after any necessary adjustments were made as a result of the contingency.

Market-on-close orders may not be represented, displayed or booked until as near as possible to the close of trading, and, therefore, the Commission believes it is reasonable to exempt such orders from the Phlx's limit order display rule. Hedge orders (*e.g.*, spread, straddle, and combination orders), synthetic options and one-cancels-the-other orders are complex orders with more than one component and, thus are not suitable for display.

In addition, during a trading rotation, Phlx systems attempt to set an opening price for the series. Until that opening price is established, there is no disseminated market. Therefore, it is reasonable to exempt orders received during a trading rotation from the Exchange's limit order display rule. The Commission notes, however, that once the trading rotation ends, any orders not executed would then be subject to display.

Finally, the Exchange proposes to exempt from its limit order display rule customer limit orders for which, immediately upon receipt, a related order for the principal account of the specialist, reflecting the terms of the customer order, is routed to another options exchange. The Commission believes it is reasonable to exempt such orders since they are subject to execution upon receipt at the other options exchange. Moreover, the Exchange represents that if the order delivered to the other options exchange were canceled, in whole or in part, by the other exchange, then, immediately upon receipt of the cancellation notice, the original customer order would be subject to the Exchange's limit order display rule and automatically displayed.[22]

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the proposal is published in the **Federal Register**, pursuant to Section 19(b)(2) of the Act.[23] The Commission notes that the proposed rule change, which provides for immediate display of limit orders that better the Exchange's disseminated quote, is substantially identical to the proposals filed by the Chicago Board Options Exchange (''CBOE'') [24] and the American Stock Exchange (''Amex''),[25] although the form of Phlx's proposed rule differs slightly.[26] Phlx also proposes several exemptions to its limit order display rule. The Commission notes that these exemptions, discussed above, are substantially identical to exemptions proposed by CBOE and Amex in their options limit order display proposals. The Amex and CBOE proposals were recently noticed for full 21-day comment periods.[27] No comments were received on the CBOE or Amex proposal.

Accelerated approval of the proposed rule change will permit the Exchange to implement the proposal in an expeditious manner, *i.e.*, simultaneously with the implementation of the similar proposals by CBOE, Amex and the Pacific Exchange, Inc. (''PCX''), which we also approve today.[28] The Commission, therefore, believes that good cause exists, consistent with section 6(b)(5) [29] and section 19(b) [30] of the Act, to accelerate approval of the proposed rule change.

V. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[31] that the proposed rule change, as amended (File No. SR–Phlx–2004–73), be approved on an accelerated basis.

BILLING CODE 8010–01–P

SMALL BUSINESS ADMINISTRATION

Small Business Size Standards: Waiver of the Nonmanufacturer Rule

AGENCY: U.S. Small Business Administration.

ACTION: Notice of termination of waiver of the Nonmanufacturer Rule for Petroleum and Coal Products Manufacturing.

SUMMARY: The U.S. Small Business Administration (SBA) is terminating the waiver of the Nonmanufacturer Rule for Petroleum and Coal Products Manufacturing based on our recent discovery of small business manufacturers for this class of products. Terminating this waiver will require recipients of contracts set aside for small businesses, service-disabled veteran-owned small businesses, SBA's Very Small Business Program or 8(a) businesses to provide the products of small business manufacturers or process on such contracts.

DATES: This termination of waiver is effective on February 14, 2005.

FOR FURTHER INFORMATION CONTACT: Edith Butler, Program Analyst, by telephone at (202) 619–0422; by fax at (202) 481–1788; or by e-mail at *edith.butler@sba.gov*.

SUPPLEMENTARY INFORMATION: Section 8(a)(17) of the Small Business Act, (Act) 15 U.S.C. 637(a)(17), requires that recipients of Federal contracts set aside for small businesses, service-disabled veteran-owned small businesses, SBA's Very Small Business Program or SBA's 8(a) Business Development Program provide the product of a small business manufacturer or processor, if the recipient is other than the actual manufacturer or processor of the product. This requirement is commonly referred to as the Nonmanufacturer Rule.

The SBA regulations imposing this requirement are found at 13 CFR 121.406(b). Section 8(a)(17)(b)(iv) of the Act authorizes SBA to waive the Nonmanufacturer Rule for any ''class of products'' for which there are no small business manufacturers or processors available to participate in the Federal market.

[32] 17 CFR 200.30–3(a)(12).

As implemented in SBA's regulations at 13 CFR 121.1204, in order to be considered available to participate in the Federal market for a class of products, a small business manufacturer must have submitted a proposal for a contract solicitation or received a contract from the Federal government within the last 24 months. The SBA defines ''class of products'' based on six digit coding systems. The first coding system is the Office of Management and Budget North American Industry Classification System (NAICS). The second is the Product and Service Code established by the Federal Procurement Data System.

The SBA received a request on November 2, 2004 to waive the Nonmanufacturer Rule for Petroleum and Coal Products Manufacturing. In response, on December 6, 2004, SBA published in the **Federal Register** a notice of intent to the waiver of the Nonmanufacturer Rule for Petroleum and Coal Products Manufacturing.

In response to these notices, SBA discovered the existence of small business manufacturers of that class of products. Accordingly, based on the available information, SBA has determined that there are small business manufacturers of this class of products, and is therefore terminating the class waiver of the Nonmanufacturer Rule for Petroleum and Coal Products Manufacturing, NAICS 324210.

Authority: 15 U.S.C. 637(a)(17).

Dated: January 19, 2005.

Emily Murphy,

Acting Associate Administrator for Government Contracting.

Federal Aviation Administration

Termination of Review of Noise Compatibility Program, Jackson International Airport, Jackson, MS

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces it has terminated its review of the noise compatibility program, at the request of the Jackson Municipal Airport Authority, under the provisions of 49 U.S.C. 47501 *et seq.*, and 14 CFR Part 150.

EFFECTIVE DATE: The effective date of the FAA's determination of its review of the Jackson International Airport noise compatibility program is January 20, 2005.

FOR FURTHER INFORMATION CONTACT: Kristi Ashley, 100 West Cross St., Suite B, Jackson, MS 39208, (601) 664–9891.

SUPPLEMENTARY INFORMATION: On September 21, 2004, the FAA determined that the noise exposure maps submitted by the Jackson Municipal Airport authority were in compliance with applicable requirements, and began its review of the noise compatibility program. On January 14, 2005, the Jackson Municipal Airport Authority requested that the FAA suspend its review and processing of the noise compatibility program for immediate project closure.

Questions may be directed to the individual named above under the heading **FOR FURTHER INFORMATION CONTACT.**

Issued in FAA Southern Region, Jackson ADO, January 20, 2005.

Rans D. Black,

Manager, Jackson Airports District Office.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Program To Permit Cost-Sharing of Air Traffic Modernization Projects Guidance 2005

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Program guidance for air traffic modernization cost-share program.

SUMMARY: The FAA is authorized to approve up to 10 air traffic modernization cost share projects per year under Vision 100—Century of Aviation Reauthorization Act, (Vision 100), Public Law 108–176, Section 183. The initial cost-share program was conducted under the authorization of Public Law 106–181, Section 304 of the Wendell H. Ford Aviation and Investment Reform Act for the 21st Century (AIR–21). Under the Vision 100, section 183 the FAA is now issuing program guidance based upon the lessons learned from the pilot program implementation. This guidance is to inform potential sponsors of the cost share program, the process to apply for the program and the criteria for approval for cost-sharing projects for this fiscal year. The purpose of Vision 100, Section 183 is to improve aviation safety and enhance mobility of the Nation's air transportation system by encouraging non-Federal investment in air traffic control facilities and equipment. Under this program, the Secretary of Transportation may make

grants to eligible project sponsors. Each eligible project is limited to Federal funding as highlighted in section 2.3.1 with the Federal cost share not to exceed 33 percent of the project's facilities and equipment (excluding operations and maintenance) cost. A project sponsor means any major user of the National Airspace System as determined by the Secretary, including a public-use airport or a joint venture between a public-use airport and one or more U.S. air carriers.

DATES: The FAA's Vice President for Finance may receive initial sponsors' expressions of interest at any time in fiscal year 2005. While the agency has no proposal submission deadline, potential sponsors are encouraged to submit proposals as soon as possible.

ADDRESSES: Sponsors' expressions of interest/proposal should be mailed or delivered, in duplicate, to the Federal Aviation Administration, Director of Capital Expenditures Programs, 800 Independence Avenue, SW., Washington, DC 20590. Electronic submissions will be accepted, but must be followed up with a signed paper copy within five working days, to the address listed above. The electronic submissions should be mailed to *Chris.Witt@faa.gov.* Deliveries may be made between 8:30 a.m. and 5 p.m. weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Chris Witt of the Finance Capital Expenditure Directorate Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20590; telephone (202) 267–7646.

SUPPLEMENTARY INFORMATION:

1. Background

In performing its mission of providing a safe and efficient air transportation system, the FAA operates and maintains a complex air traffic control system infrastructure. Vision 100, Section 183 authorizes a program to permit cost-sharing of air traffic modernization projects, under which major users of the national aerospace system, which includes a public use airport or airport/airline joint ventures, may procure and install facilities and equipment in cooperation with the FAA. The program is intended to allow project sponsors to achieve accelerated deployment of eligible facilities or equipment, and to help expand aviation infrastructure.

The FAA is authorized to approve up to 10 projects per year under Vision 100, Section 183. Those sponsors whose projects were approved in the AIR 21 pilot program may submit additional proposals under the new authorization. All sponsors who anticipate submitting a request should review the criteria in sections 2.1 and 2.2 before submission.

2. Program Guidance

This section provides the statutory language sponsor eligibility of Vision 100 section 183 and outlines FAA's supplementary criteria for the cost share program. The sponsor eligibility, project eligibility, and evaluation and screening criteria are outlined in Sections 2.1, 2.2 and 2.6 respectively of this guidance.

2.1 Eligible Project Sponsors

2.1.1 Statutory Provisions of Vision 100 for Sponsor Eligibility

A project sponsor means any major user of the National Airspace System as determined by the Secretary, including a public-use airport or a joint venture between a public-use airport and one or more U.S. air carriers.

2.1.2 Supplementary FAA Criteria for Sponsor Eligibility

An eligible project sponsor is any major user of the national airspace system including public-use airport (or group of airports), either publicly or privately owned, acting on its own or in a joint venture with one or more U.S. air carriers. All landing facilities meeting these criteria are eligible, including but not limited to commercial service airports, reliever airports, general aviation airports, and heliports. Eligibility is not limited to airports; other National Airspace System (NAS) major users such as state or regional aviation activities may be eligible.

All eligible sponsors are encouraged to participate. If selected for the program, the sponsor must be willing to enter into a Memorandum of Agreement with the FAA outlining the specific goals to be accomplished, the roles and responsibilities of each party, schedule milestones, and funding contributions of the parties. An eligible sponsor must have an available source of funds to execute the program.

2.2 Eligible Projects

2.2.1 Statutory Provisions for Project Eligibility

The term 'eligible project' means a project to purchase equipment or software relating to the Nation's air traffic control system that is certified or approved by the Administrator of the Federal Aviation Administration and that promotes safety, efficiency, or mobility. Such projects may include:

a. Airport-specific air traffic facilities and equipment, including local area augmentation systems,* instrument landings systems, weather and wind shear detection equipment, and lighting improvements;

b. Automation tools to effect improvements in airport capacity, including passive final approach spacing tools and traffic management advisory equipment; and

c. Equipment and software that enhance airspace control procedures or assist in en route surveillance, including oceanic and offshore flight tracking.

* Note these projects will be eligible, assuming availability and viability of the equipment within the time limitation highlighted in 2.2.2.c.

2.2.2 Supplementary FAA Criteria for Project Eligibility

a. Projects should align with the FAA's strategic Flight Plan goals.

b. The project should be consistent with FAA's air traffic equipment/systems infrastructure and architecture and should be a validated project of a FAA program. The project, when commissioned, should provide measurable benefits that benefit national, regional, or local objectives/interests and the FAA NAS.

c. The project shall be initiated within one year of project approval and completed/commissioned within five years of project approval (allowing for an environmental impact study (if necessary), acquisition, supply support, training programs, etc.).

d. Equipment and facilities should meet applicable FAA advisory circulars and specifications.

e. The project should serve the general welfare of the flying public; it should not be used for the exclusive interest of a for-profit entity.

f. Any facility/equipment acquired under the project should be a new asset, not an asset that the sponsor has already acquired or is committed to acquiring.

g. The project should have a useful and expected life of ten years or more, notwithstanding the possible need to replace project components during its operating life.

h. The cost-share program is not the correct forum for requesting development of RNAV procedures.

i. A sponsor may submit a multiple component project proposal (as outlined in paragraph 2.5) where each component forms part or all of an integrated system. The FAA reserves the option to accept one or multiple components of a proposal.

j. A project may not be co-mingled with other FAA cost-sharing programs.

k. All equipment and facilities should meet appropriate OSHA standards for employee safety and fire protection. Where land is involved, the property

should meet all environmental compliance requirements, including noise, hazardous material, property access, and zoning rights.

2.3 Funding

2.3.1 Statutory Provisions for Funding

The Federal share of the cost of an eligible project carried out under the program shall not exceed 33 percent. No project may receive more than $5,000,000 in Federal funding. The sponsor's share of the cost of an eligible project shall be provided from non-Federal sources, including revenues collected pursuant to Title 49, United States Code 40117.

2.3.2 Supplementary FAA Criteria for Funding

FAA is not obligated to fund one-third of the total project costs; rather, FAA's share may not exceed this threshold. The project sponsor must provide two-thirds or more of the total project cost. The Federal and non-Federal shares of project cost may take the form of in-kind contributions. Equipment in FAA's inventory that has not been previously deployed qualifies as eligible equipment. If selected for the program, a sponsor may use passenger facility charge (PFC) revenues to acquire and install eligible facilities and equipment, but not to fund their operation or maintenance. Normal PFC processing procedures under Federal Aviation Regulation 14 CFR part 158 will be used to approve the imposition of a PFC or the use of PFC revenue as the non-Federal share of a program project.

Federal contributions applied to any other Federal project or grant may not be used to satisfy the sponsor's cost share under this program.

The following criteria apply to the calculation of the cost-sharing ratio:

a. Project costs are limited to those costs that the FAA would normally incur in conventional facilities and equipment funding (*e.g.*, if land/right-of-way must be acquired or leased for a project, its cost can be included in the cost-sharing ratio only if FAA would otherwise incur it in conventional program funding).

b. Operations and maintenance costs of the project, both before and after any sponsor-elected project transfer to the FAA, will not be considered as part of the cost-share contribution. However, these costs must be identified.

c. Non-Federal funding may include cash, substantial equipment contributions that are wholly utilized as an integral part of the project, and personnel services dedicated to the proposed project prior to commissioning, as long as such personnel are not otherwise supported with Federal funds. The non-Federal cost may include in-kind contributions (*e.g.*, buildings). In-kind contributions will be evaluated as to whether they present a cost that FAA would otherwise incur in conventional facilities and equipment funding.

d. Aside from in-kind contributions, only funds expended by the sponsor after the project approval date will be eligible for inclusion in the cost-sharing ratio.

e. Unless otherwise specified by these criteria, the principles and standards for determining costs should be conducted in accordance with OMB Circular A–87, Cost Principles for State, Local, and Indian Tribal Governments.

f. As with other U.S. DOT cost-sharing grants, it is inappropriate for a management/administrative fee to be included as part of the sponsor's contribution. This does not prohibit appropriate fee payments to vendors or others that may provide goods or services to support the project.

FAA funding decisions will be based on the project evaluation and project selection processes discussed later in this notice.

The U.S. Department of Transportation and the Comptroller General of the United States have the right to obtain and assess all documents pertaining to the use of Federal and non-Federal contributions for selected projects. Sponsors should maintain sufficient documentation during negotiations and during the life of the project to substantiate costs.

2.4 Transfer of Facility or Equipment to FAA

2.4.1 Statutory Provisions for Facility or Equipment Transfer

Notwithstanding any other provision of law, and upon agreement by the Administrator, a project sponsor may transfer, without consideration, to the FAA, facilities, equipment, and automation tools, the purchase of which was assisted by a grant made under this section if such facilities, equipment or tools meet Federal Aviation Administration operation and maintenance criteria.

2.4.2 Supplementary FAA Criteria for Facility or Equipment Transfer

Project transfers to the FAA will be at the sponsor's election and in accordance with the criteria listed below.

a. At the time of transfer, the project should be operable and maintainable by the FAA and should comply with FAA Order 6700.20, Non-Federal Navigational Aids and Air Traffic Control Facilities, or any successor Order then in effect.

b. In the event of transfer, software code, data rights, and support tools should be provided to the FAA at no cost to the FAA.

If the project is not transferred to the FAA, the sponsor remains liable for all operations and maintenance costs, including the costs of capital sustainment.

2.5 Application Procedures

Unlike the cost share pilot program, for this fiscal year all applications will be reviewed upon receipt and selected based upon individual merit and alignment with the FAA's goals and objectives as outlined in the strategic planning documents. The statutory limit is ten projects per fiscal year. The following application procedures will be used when applying for cost-share:

a. The purpose of the application is provide sufficient information to conduct detained analysis that evaluates cost, benefits, risk, alignment with strategic direction of the proposed project and to compare the proposal with other NAS needs. It is suggested that the sponsor contact the FAA's cost share office to discuss the potential project before the applicant expends excessive resources on the project application.

b. Eligible sponsors may submit multiple projects and projects with multiple components, but each piece of equipment/activity must be identified and costed separately, with appropriately defined benefits and should be listed in priority order. An example of a multiple component project would be an instrument landing system (ILS) project that may include in addition to the ILS equipment, middle markers and runway lighting for a complete package. The FAA reserves the option to accept one or multiple pieces of each proposal.

c. Projects that would be good candidates for this program may include equipment and systems that monitor weather, support runway incursion reduction, and support regional interest.

d. Under this program, either the FAA or the sponsor may acquire and/or install facilities or equipment. In the case where the FAA manages the procurement, existing FAA contracts will be used where possible.

e. Proposals for new air traffic control towers will only be considered if they enhance the National Airspace System. Per FAA Order 6030.1, FAA Policy on Relocation, movement of an existing air traffic control tower for the convenience/benefit of only the airport

will not be considered. Requests for towers will be considered utilizing the criteria in Order 7031.2C, Airway Planning Standards Number One (APS–1).

2.5.2. Formal Application and Selection of Projects

The proposal should not be more than thirty pages in length. During the evaluation process each sponsor should submit an application with the following elements needed by the FAA to evaluate the merits of the application.

a. *Project Description:* The project description should contain: (1) The identity of the submitting sponsor (including point-of-contact's name, mailing address, telephone number, fax number, and e-mail address) and all participating authorities or entities in the case of joint ventures; (2) project name and location; and (3) a detailed project description. In addition, the sponsor must provide a statement of intent to transfer the project to the FAA, including anticipated transfer date, or intent not to transfer the project to the FAA.

b. *Projected Benefits:* All applications should describe the need for the project and demonstrate it's measurable contributions to safety, efficiency, capacity, productivity and as applicable, at the airport, regional, and system-wide levels. The sponsor may conduct its own analysis, or where the FAA has the equipment/system on an acquisition waterfall the sponsor may opt to summarize existing FAA cost benefit analysis, and/or may use the investment criteria in FAA Order 7031.2C, Airway Planning Standard Number One.

c. *Economic Analysis:* Supporting the projected benefits review the applicant should conduct an economic analysis. The analysis should include a schedule of project costs, including: (1) Up-front costs broken down into proposed shares between the sponsor and the FAA; and (2) annual and life-cycle operations and maintenance costs before and after transfer to the FAA (if the sponsor elects to transfer). The level of effort devoted to the analyses should be tailored to the scope and cost of the project. For complex programs FAA guidance can be found in Report FAA–APO–98–4, Economic Analysis of Investment and Regulatory Programs—Revised Guide, and Report FAA–APO–98–8, Economic Values for Evaluation of Federal Aviation Administration Investment and Regulatory Programs.

d. *Schedule:* The Schedule should list all significant proposed project dates, including the start date, completion date, date of project transfer to the FAA (if applicable), and key interim milestone dates.

e. *Financial Plan:* The Financial Plan should contain: (1) The proposed local and Federal cost shares, (2) evidence of the sponsor's ability to provide funds for its cost share (*e.g.,* approved local appropriation or Memorandum of Agreement); and (3) any commitment the sponsor might choose to offer for the assumption and liability of cost overruns aside from the liability criterion provided earlier in this notice.

f. *Letter of Commitment:* Sponsors should demonstrate a commitment to the project, as evidenced by a Letter of Commitment signed by all project participants (including any participating air carriers). The letter should, at a minimum, include a list of the participating agencies and organizations in the proposed project; the roles, responsibilities and relationship of each participant; and the name, address, and telephone number of the individual representing the sponsor.

g. *Letter of Acknowledgement/Support:* The application will include a letter of acknowledgment/support from the applicable State Department of Transportation and/or other appropriate jurisdiction (to avoid circumventing State and metropolitan planning processes). It is the intent of FAA Headquarters for the appropriate projects to include the FAA's Regional Office in the project review cycle. It would be in the best interest of the applicant to pre-coordinate the projects with the appropriate FAA Regional Office.

The FAA will review and evaluate the application using a panel of technical program experts and senior managers based on the criteria outlined below in Section 2.6. Following its evaluations, the review panel will recommend to the FAA's Air Traffic Operations Senior Vice President for Finance and the appropriate Vice President under whose area of responsibility the system will be installed, if the application in their view should be accepted. If the FAA selects a project for inclusion in the cost share program, an agreement will be executed between the sponsor and the FAA.

2.6 Application Evaluation and Screening Criteria

The FAA will review each of the applications based upon the individual merit of the application. The FAA will consider the following elements in evaluating an application:

a. Compliance with statutory criteria, FAA's supplemental criteria, and application procedures.

b. Degree to which the project provides benefits that contributes to the FAA's documented goals and objectives.

c. Qualitative and quantifiable benefits to the airport, region, and national airspace system.

d. Likelihood of project success in terms of cost, schedule and performance and achieving proposed benefits/outcomes.

e. Evidence that the project can be implemented in accordance with the proposed schedule.

f. Ability of sponsor to provide its cost share.

g. Availability of FAA resources.

h. Degree of Federal leveraging (degree to which the proposal minimizes the ratio of Federal costs to total project costs).

i. Cost to the FAA: post-transfer life-cycle operating and maintenance costs.

2.7 Schedule Summary

Applications may be submitted at any time during the fiscal year. The time required for reviewing and approving/disapproving the typical application is outlined below.

Milestone	Time frame
Applications	
Applications due to FAA.	Anytime.
FAA Responses to Sponsor's Application requesting additional information (may not be necessary).	One month after receipt of application.
FAA Announcement of Decision.	Three months after receipt of application.

2.8 Project Implementation Information

During the life of the project, the FAA may collect data from the sponsor and conduct (with non-project funds) independent evaluations of the project's impact on safety, efficiency, and mobility objectives. This will allow the FAA to ascertain the success of the program.

3. Impact of Revised Guidelines

Under the Vision 100—Section 183, the guidelines shall not be subject to administrative rulemaking requirements under subchapter II of chapter 5 of title 5.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Open Meeting of the Area 4 Taxpayer Advocacy Panel (Including the States of Illinois, Indiana, Kentucky, Michigan, Ohio, West Virginia, and Wisconsin)

AGENCY: Internal Revenue Service (IRS) Treasury.

ACTION: Notice.

SUMMARY: An open meeting of the Area 4 Taxpayer Advocacy Panel will be conducted (via teleconference). The Taxpayer Advocacy Panel is soliciting public comment, ideas, and suggestions on improving customer service at the Internal Revenue Service.

DATES: The meeting will be held Tuesday, February 22, 2005, at 11 a.m., eastern time.

FOR FURTHER INFORMATION CONTACT: Mary Ann Delzer at 1–888–912–1227, or (414) 297–1604.

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1988) that a meeting of the Area 4 Taxpayer Advocacy Panel will be held Tuesday, February 22, 2005, at 11 a.m., eastern time via a telephone conference call. You can submit written comments to the panel by faxing to (414) 297–1623, or by mail to Taxpayer Advocacy Panel, Stop 1006MIL, 310 West Wisconsin Avenue, Milwaukee, WI 53203–2221 or you can contact us at *http://www.improveirs.org.* This meeting is not required to be open to the public, but because we are always interested in community input, we will accept public comments. Please contact Mary Ann Delzer at 1–888–912–1227 or (414) 297–1604 for dial-in information.

The agenda will include the following: Various IRS issues.

Dated: January 21, 2005.

Bernard Coston,

Director, Taxpayer Advocacy Panel.

Medicare Program; Medicare Prescription Drug Benefit

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule.

SUMMARY: This final rule implements the provisions of the Social Security Act (the Act) establishing and regulating the Medicare Prescription Drug Benefit. The new voluntary prescription drug benefit program was enacted into law on December 8, 2003 in section 101 of Title I of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173). Although this final rule specifies most of the requirements for implementing the new prescription drug program, readers should note that we are also issuing a closely related rule that concerns Medicare Advantage organizations, which, if they offer coordinated care plans, must offer at least one plan that combines medical coverage under Parts A and B with prescription drug coverage. Readers should also note that separate CMS guidance on many operational details appears or will soon appear on the CMS website, such as materials on formulary review criteria, risk plan and fallback plan solicitations, bid instructions, solvency standards and pricing tools, plan benefit packages.

The addition of a prescription drug benefit to Medicare represents a landmark change to the Medicare program that will significantly improve the health care coverage available to millions of Medicare beneficiaries. The MMA specifies that the prescription drug benefit program will become available to beneficiaries beginning on January 1, 2006.

Generally, coverage for the prescription drug benefit will be provided under private prescription drug plans (PDPs), which will offer only prescription drug coverage, or through Medicare Advantage prescription drug plans (MA PDs), which will offer prescription drug coverage that is integrated with the health care coverage they provide to Medicare beneficiaries under Part C of Medicare. PDPs must offer a basic prescription drug benefit. MA-PDs must offer either a basic benefit or broader coverage for no additional cost. If this required level of coverage is offered, MA-PDs or PDPs, but not fallback PDPs may also offer supplemental benefits through enhanced alternative coverage for an additional premium. All organizations offering drug plans will have flexibility in the design of the prescription drug benefit. Consistent with the MMA, this final rule also provides for subsidy payments to sponsors of qualified retiree prescription drug plans to encourage retention of employer-sponsored benefits.

We are implementing the drug benefit in a way that permits and encourages a range of options for Medicare beneficiaries to augment the standard Medicare coverage. These options include facilitating additional coverage through employer plans, MA-PD plans and high-option PDPs, and through charity organizations and State pharmaceutical assistance programs. See sections II.C, II.J, and II.P, and II.R of this preamble for further details on these issues.

The proposed rule identified options and alternatives to the provisions we proposed and we strongly encouraged comments and ideas on our approach and on alternatives to help us design the Medicare Prescription Drug Benefit Program to operate as effectively and efficiently as possible in meeting the needs of Medicare beneficiaries.

DATES: These regulations are effective on March 22, 2005.

FOR FURTHER INFORMATION CONTACT: Lynn Orlosky (410) 786–9064 or Randy Brauer (410)786–1618 (for issues related to eligibility, elections, enrollment, including auto-enrollment of dual eligible beneficiaries, and creditable coverage).

Melvin Sanders (410) 786–8355 (for issues related to marketing and user fees).

Vanessa Duran (214) 767–6435 (for issues related to benefits and beneficiary protections, including Part D benefit packages, Part D covered drugs, coordination of benefits in claims processing and tracking of true-out-of-pocket costs, pharmacy network access standards, plan information dissemination requirements, and privacy of records).

Craig Miner, RPh. (410) 786–1889 for issues of pharmacy benefit cost and utilization management, formulary development, quality assurance, medication therapy management, and electronic prescribing).

Mark Newsom (410) 786–3198 (for issues of submission, review, negotiation, and approval of risk and limited risk bids for PDPs and MA-PD plans; the calculation of the national average bid amount; determination and collection of enrollee premiums; calculation and payment of direct and reinsurance subsidies and risk-sharing; and retroactive adjustments and reconciliations.)

Jim Owens (410) 786–1582 (for issues of licensing and waiver of licensure, the assumption of financial risk for unsubsidized coverage, and solvency requirements for unlicensed sponsors or sponsors who are not licensed in all States in the region in which it wants to offer a PDP.)

Jim Slade (410) 786–1073 (for issues related to pre-emption of State law) and (for issues related to solicitation, review and approval of fallback prescription drug plan proposals; fallback contract requirements; and enrollee premiums and plan payments specific to fallback plans.)

Christine Hinds (410) 786–4578 (for issues of coordination of Part D plans with providers of other prescription drug coverage including Medicare Advantage plans, State pharmaceutical assistance programs (SPAPs), Medicaid, and other retiree prescription drug plans; also for issues related to eligibility for and payment of subsidies for assistance with premium and cost-sharing amounts for Part D eligible individuals with lower income and resources; for rules for States on eligibility determinations for low-income subsidies and general State payment provisions including the phased-down State contribution to drug benefit costs assumed by Medicare).

Mark Smith (410) 786–8015 (for issues related to conditions necessary to contract with Medicare as a PDP sponsor, as well as contract requirements, intermediate sanctions, termination procedures and change of ownership requirements.)

Jean LeMasurier (410) 786–1091 (for issues related to employer group waivers and options).

Frank Szeflinski (303) 844–7119 (for issues related to cost-based HMOs and CMPS offering Part D coverage.)

John Scott (410) 786–3636 (for issues related to the procedures PDP sponsors must follow with regard to grievances, coverage determinations, and appeals.)

Mark Smith (410) 786–8015 (for issues related to solicitation, review and approval of fallback prescription drug plan proposals; fallback contract requirements; and enrollee premiums and plan payments specific to fallback plans.)

Jim Mayhew (410) 786–9244 (for issues related to the alternative retiree

drug subsidy and other employer-based sponsor options.)

Joanne Sinsheimer (410) 786–4620 (for issues related to physician self-referral prohibitions.)

Brenda Hudson (410) 786–4085 (for issues related to PACE organizations offering Part D coverage.)

Julie Walton (410) 786–4622 or Kathryn McCann (410) 786–7623 (for issues related to provisions on Medicare supplemental (Medigap) policies.)

IDIQ	Indefinite duration, indefinite quantity
IEP	Initial enrollment period
IHS	Indian Health Service
IRE	Independent review entity
I/T/U	Indian Tribes and Tribal organizations, and urban Indian organizations
JCHACO	Joint Commission on Accreditation of Health Care Organizations
LIS	Low-income subsidy
LTC	Long term care
MA	Medicare Advantage (formerly Medicare+Choice)
MA-PD	Medicare Advantage prescription drug plans
MAC	Medicare Appeals Council
MAX	Medicaid Analytic extract
MCBS	Medicare Current Beneficiary Survey
MMA	Medicare Prescription Drug, Improvement, and Modernization Act of 2003
MSA	Medicare savings account
MSIS	Medicaid Statistical Information System
MSP	Medicare Secondary Payor
MTMP	Medication Therapy Management Program
NAIC	National Association of Insurance Commissioners
NCQA	National Committee for Quality Assurance
NCPDP	National Council for Prescription Drug Programs
NCVHS	National Center for Vital and Health Statistics
NDC	National Drug Code
NHE	National Health Expenditure
NPA	National PACE Association
NPI	National Provider Identifier
OACT	Office of the Actuary (CMS)
OBRA	Omnibus Budget Reconciliation Act
OCR	Office for Civil Rights
OEPI	Open enrollment period for institutionalized individuals
OIG	Office of the Inspector General
OPM	Office of Personnel Management
P&T	Pharmaceutical and therapeutic
PBA	Pharmacy benefit administrator
PBMs	Pharmacy benefit managers
PBP	Plan Benefit Package
PDP	Private prescription drug plan

PDSC	Phased-down State contribution
PFFS	Private fee-for-service plan
PHI	Protected health information
PhRMA	Pharmaceutical Manufacturers and Researchers of America
PPO	Preferred provider organization
PPV	Pharmaceutical Prime Vendor
PSO	Provider-sponsored organization
QDWIs	Qualified disabled and working individuals
QII	Qualified individuals
QIO	Quality Improvement Organization
QMB	Qualified Medicare beneficiaries
REACH	Regional Education About Choices in Health
RHC	Rural Health Center
SCHIP	State Children's Health Insurance Program
SEP	Special enrollment period
SHIP	State health insurance assistance program
SLMB	Special Low-Income Beneficiaries
SOW	Scope of work
SPAP	State Pharmaceutical Assistance Program
SPD	Summary Plan Description
SPOC	Single point of contact
SSA	Social Security Administration
SSI	Supplemental Security Income
SSRI	Selective serotonin reuptake inhibitor
SSSGs	Similarly Sized Subscriber Groups
TANF	Temporary assistance for needy families
TrOOP	True out-of-pocket
U&C	Usual and customary
URAC	Utilization Review Accreditation Commission
USP	U.S. Pharmacopoeia
VA	Department of Veterans Affairs
VDSA	Voluntary data sharing agreement

I. Background

A. Medicare Prescription Drug, Improvement, and Modernization Act of 2003

Section 101 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173) amended Title XVIII of the Social Security Act (the Act) by establishing a new Part D: the Voluntary Prescription Drug Benefit Program. (For ease of reference, we will refer to the new prescription drug benefit program as Part D of Medicare and we will refer to the Medicare Advantage Program described in Part C of title XVIII of the Act -as Part C of Medicare.)

We believe that the new Part D benefit constitutes the most significant change to the Medicare program since its inception in 1965. The addition of outpatient prescription drugs to the Medicare program reflects the Congress' recognition of the fundamental change in recent years in how medical care is delivered in the U.S. It recognizes the vital role of prescription drugs in our health care delivery system, and the need to modernize Medicare to assure their availability to Medicare beneficiaries. This final rule is designed to broaden participation in the new benefit both by organizations that offer prescription drug coverage and by eligible beneficiaries. In conjunction with complementary improvements to the Medicare Advantage program, these changes should significantly increase the coverage and choices available to Medicare beneficiaries.

Effective January 1, 2006, the new program establishes an optional prescription drug benefit for individuals who are entitled to or enrolled in Medicare benefits under Part A and Part B. Beneficiaries who qualify for both Medicare and Medicaid (full-benefit dual eligibles) will automatically receive the Medicare drug benefit unless Medicare has identified the individual as having other creditable coverage through an employer-based prescription drug plan. The statute also provides for assistance with premiums and cost sharing to eligible low-income beneficiaries.

In general, coverage for the new prescription drug benefit will be provided through private prescription drug plans (PDPs) that offer drug-only coverage, or through Medicare Advantage (MA) (formerly known as Medicare+Choice) plans that offer integrated prescription drug and health care coverage (MA-PD plans). PDPs must offer a basic drug benefit. MA-PDs must offer either a basic benefit, or a benefit with broader coverage than the basic benefit, but at no additional cost to the beneficiary. If this required level of coverage is offered, MA-PDs or PDPs, but not fallback plans, may also offer supplemental benefits, called ''enhanced alternative coverage,'' for an additional premium.

All organizations offering drug plans will have flexibility in terms of benefit design, including the authority to establish a formulary to designate specific drugs that will be available, and the ability to have a cost-sharing structure other than the statutorily-defined structure, subject to certain actuarial tests. Most Part D plans also may include supplemental drug coverage such that the total value of the coverage offered exceeds the value of basic prescription drug coverage. The specific sections of the Act that address the prescription drug benefit program are the following:

1860D–1	Eligibility, enrollment, and information.
1860D–2	Prescription drug benefits.
1860D–3	Access to a choice of qualified prescription drug coverage.
1860D–4	Beneficiary protections for qualified prescription drug coverage.
1860D–11	PDP regions; submission of bids; plan approval.
1860D–12	Requirements for and contracts with prescription drug plan (PDP) sponsors.
1860D–13	Premiums; late enrollment penalty.
1860D–14	Premium and cost-sharing subsidies for low-income individuals.
1860D–15	Subsidies for Part D eligible individuals for qualified prescription drug coverage.
1860D–16	Medicare Prescription Drug Account in the Federal Supplementary Medical Insurance Trust Fund.
1860D–21	Application to Medicare Advantage program and related managed care programs.
1860D–22	Special rules for employer-sponsored programs.
1860D–23	State pharmaceutical assistance programs.
1860D–24	Coordination requirements for plans providing prescription drug coverage.
1860D–41	Definitions; treatment of references to provisions in Part C.
1860D–42	Miscellaneous provisions.
	Specific sections of the MMA that also relate to the prescription drug benefit program are the following:
Sec. 102	Medicare Advantage Conforming Amendments
Sec. 103	Medicaid Amendments
Sec. 104	Medigap
Sec. 109	Expanding the work of Medicare Quality Improvement Organizations to include Parts C and D.

B. Codification of Regulations

The final provisions set forth here are codified in 42 CFR Part 423–Voluntary Medicare Prescription Drug Benefit. Note that the regulations—

- for Medicare supplemental policies (Medigap) will continue to be located in 42 CFR part 403 (subpart B);
- for exclusions from Medicare and limitations on Medicare payment (the physician self-referral rules) will continue to be located in 42 CFR part 411;
- for managed care organizations that contract with us under cost contracts will continue to be located in 42 CFR part 417, Health Maintenance Organizations, Competitive Medical Plans, and Health Care Prepayment Plans;
- for PACE organizations will continue to be located in 42 CFR part 460.

C. Organizational Overview of Part 423

The regulations set forth in this final rule are codified in the new 42 CFR Part 423–Voluntary Medicare Prescription Drug Benefit. There are a number of places in which statutory provisions in Part D incorporate by reference specific sections in Part C of Medicare (the MA program). The MA regulations appear at 42 CFR Part 422. Since the same organizations that offer MA coordinated care plans will also be required to offer MA-PD plans, we believed it was appropriate to adopt the same organizational structure as part 422. Wherever possible, we modeled the prescription drug regulations on the parallel provisions of the part 422 regulations.

The major subjects covered in each subpart of part 423 are as follows:

Subpart A, General Provisions: Basis and scope of the new part 423, Definitions and discussion of important concepts used throughout part 423, and sponsor cost-sharing in beneficiary education and enrollment-related costs (user fees).

Subpart B, Eligibility, Election, and Enrollment: Eligibility for enrollment in the Part D benefit, enrollment periods, disenrollment, application of the late enrollment penalty, approval of marketing materials and enrollment forms, and the meaning and documentation of creditable coverage. (Please note that other, related topics, are discussed in the following subparts: Subpart P, eligibility and enrollment for low-income individuals; Subpart S, provisions relating to the phase-down of State contributions for dual-eligible drug expenditures; Subpart F, calculation and collection of late enrollment fees; Subpart C, plan disclosure; Subpart Q, eligibility and enrollment for fallback plans; and Subpart T, the definition of a Medicare supplemental (Medigap) policy.)

Subpart C, Benefits and Beneficiary Protections: Prescription drug benefit coverage, service areas, network and out-of-network access, formulary requirements, dissemination of plan information to beneficiaries, and confidentiality of enrollee records. (Please note that actuarial valuation of the coverage offered by plans, as well as the submission of the bid, is discussed in subpart F. Access to negotiated prices is discussed in subpart C, while the reporting of negotiated prices is discussed in subpart G. Formularies are discussed in subpart C, while appeals related to formularies are discussed in subpart M. Incurred costs toward true out-of-pocket (TrOOP expenditures) are discussed in subpart C, while the procedures for determining whether a beneficiary's Part D out-of-pocket costs are actually reimbursed by insurance or another third-party arrangement are discussed in subpart J. Information that plans must disseminate to beneficiaries is discussed in subpart C, while Part D information that CMS must disseminate to beneficiaries is discussed in subpart B.)

Subpart D, Cost Control and Quality Improvement Requirements for Part D Plans: Utilization controls, quality assurance, and medication therapy management, as well as rules related to identifying enrollees for whom medication therapy management is appropriate, consumer satisfaction surveys, and accreditation as a basis for deeming compliance.

Subpart E, Reserved.

Subpart F, Submission of Bids and Monthly Beneficiary Premiums; Plan Approval: Bid submission, the actuarial value of bid components, review and approval of plans, and the calculation and collection of Part D premiums.

Subpart G, Payments to Part D plans for Qualified Prescription Drug Coverage: Data submission, payments and reconciliations for direct subsidies, risk adjustment, reinsurance, and risk-sharing arrangements.

Subpart H, Reserved.

Subpart I, Organization Compliance with State Law and Preemption by Federal Law: Licensure, assumption of financial risk, solvency, and State premium taxes.

Subpart J, Coordination Under Part D With Other Prescription Drug Coverage: Applicability of Part D rules to the Medicare Advantage program, waivers available to facilitate the offering of employer group plans, waivers of part D provisions for PACE plans and 1876 cost plans offering qualified prescription drug coverage, and procedures to facilitate calculation of true out-of-pocket (TrOOP) expenses and coordination of benefits with State pharmaceutical assistance programs and other entities that provide prescription drug coverage. (Please note that subpart C discusses, in more detail, coordination of benefits from the perspective of which prescription drug benefits are covered by Part D and the determination of which incurred beneficiary costs will be counted as TrOOP expenditures. Provisions relating to disenrollment for material misrepresentation by a beneficiary are discussed in subpart B.)

Subpart K, Application Procedures and Contracts with PDP Sponsors: Application procedures and requirements; contract terms; procedures for termination of contracts; reporting by PDP sponsors.

Subpart L, Effect of Change of Ownership or Leasing of Facilities during Term of Contract: Change of ownership of a PDP sponsor; novation agreements; leasing of a PDP sponsor's facilities.

Subpart M, Grievances, Coverage Determinations and Appeals: Coverage determinations by sponsors, exceptions procedures, and all levels of appeals by beneficiaries.

Subpart N, Medicare Contract Determinations and Appeals: Notification by CMS about unfavorable contracting decisions, such as nonrenewals or terminations; reconsiderations; appeals.

Subpart O, Sanctions: Provisions concerning available sanctions for participating organizations.

Subpart P, Premiums and Cost-Sharing Subsidies for Low-Income Individuals: Eligibility determinations and payment calculations for low-income subsidies.

Subpart Q, Guaranteeing Access to a Choice of Coverage (Fallback Plans): Definitions, access requirements, bidding process, and contract requirements for fallback PDPs.

Subpart R, Payments to Sponsors of Retiree Prescription Drug Plans: Provisions for making retiree drug subsidy payments to sponsors of qualified retiree prescription drug plans.

Subpart S, Special Rules for States—Eligibility Determinations for Subsidies and General Payment Provisions: State/Medicaid program's role in determining eligibility for low-income subsidy and other issues related to the Part D benefit.

In addition, in subpart T, this final rule also makes changes to: part 400 relating to definitions of Parts C & D, part 403 relating to Medicare supplemental policies (Medigap), part 411 relating to exclusions from Medicare and limitations on Medicare payment (the physician self-referral rules), part 417 relating to cost-based health maintenance organizations (HMOs), and part 460 relating to PACE organizations.

II. Provisions of the Proposed Rule

We received 7,696 items of correspondence containing comments on the August 2004 proposed rule. Commenters included managed care organizations and other insurance industry representatives, pharmacy benefit management firms, pharmacies and pharmacy education and practice-related organizations, pharmaceutical manufacturers, representatives of physicians and other health care professionals, beneficiary advocacy

groups, representatives of hospitals and other healthcare providers, States, employers and benefits consulting firms, members of the Congress, Indian Health Service, Tribal and Urban Health Programs, American Indians and Alaska Natives, beneficiaries, and others. We also received many comments expressing concerns unrelated to the proposed rule. Some commenters expressed concerns about Medicare unrelated to the Prescription Drug Benefit, while others addressed concerns about health care and health insurance coverage unrelated to Medicare. Because of the volume of comments we received in response to the proposed rule, we will be unable to address comments and concerns that are unrelated to the proposed rule.

Most of the comments addressed multiple issues, often in great detail. Listed below are the areas of the regulation that received the most comments:

- Transition of Coverage for Dual Eligibles from Medicaid to Medicare
- Access to Drugs in Long Term Care Facilities
- Formulary Policies
- Medication Therapy Management Requirements
- Network Access Standards
- Part B/Part D Drug Identification and Coordination
- Dispensing Fees

In this final rule, we address comments received on the proposed rule. For the most part, we will address issues according to the numerical order of the related regulation sections.

A. General Provisions

1. Overview

Section 423.1 of subpart A specified the general statutory authority for the ensuing regulations and indicated that the scope of part 423 is to establish requirements for the Medicare prescription drug benefit program. We proposed key definitions at § 423.4 for terms that appear in multiple sections of part 423.

Consistent with the MMA statute, in many cases we proposed procedures that parallel those in effect under the MA program. Our goal was to maintain consistency between these two programs wherever possible; thus we evaluated the need for parallel changes in the MA final rule when we received comments on provisions that affect both programs.

Comment: Many commenters urged us to finalize regulations by early January—and detailed business requirements soon thereafter. Some also recommended that we make public certain key decisions and data sooner than January in order to promote planning.

Response: We agree that the earliest possible release of program requirements and final rules will facilitate planning and implementation of new business processes required to offer and administer this new program. Consequently we have made numerous draft documents, such as the risk plan solicitation, PDP solvency requirements, formulary review policies, and the actuarial bidding instructions, available for public comment in November and December of 2004 and have expedited the rulemaking process to meet these goals. In response to the lack of specificity regarding the PDP regions in our proposed rule, we conducted extensive outreach in order to obtain public input prior to the publication of our final rule. On December 6, 2004, we announced the establishment of 26 MA regions and 34 PDP regions.

2. Discussion of Important Concepts and Key Definitions (§ 423.4)

a. Introduction

For the most part, the proposed definitions were taken directly from section 1860D–41 of the Act. The definitions set forth in subpart A apply to all of part 423 unless otherwise indicated, and are applicable only for the purposes of part 423. For example, ''insurance risk'' applies only to pharmacies that contract with PDP sponsors under part 423.

Definitions that have a more limited application have not been included in subpart A, but instead are set forth within the relevant subpart of the regulations. For example, in subpart F, we have included all the definitions related to bids and premiums. The detailed definitions and requirements related to prescription drug coverage are included in subpart C, but because of their direct relevance to the bidding process they are also referenced in subpart F.

Following our discussion of important concepts, we provide brief definitions of terms that occur in multiple sections of this preamble and part 423. We believe that it is helpful to define these frequently occurring terms to aid the reader, but that these terms do not require the extended discussion necessary in our section on important concepts.

b. Discussion of Actuarial Equivalence, Creditable Prescription Drug Coverage, PDP Plan Regions, Service Area, and User Fees

- Discussion of the Meaning of Actuarial Equivalence

The concept of actuarial equivalence is applied in several different contexts in Title I of the MMA. In very general terms, actuarial equivalence refers to a determination that, in the aggregate, the dollar value of drug coverage for a set of beneficiaries under one plan can be shown to be equal to the dollar value for those same beneficiaries under another plan. Given the various uses for this term in the Part D provisions, we proposed the following relatively general definition: ''Actuarial equivalence'' means a state of equivalent values demonstrated through the use of generally accepted actuarial principles and in accordance with section 1860D–11(c) of the Act and § 423.265(c)(3) of this part. This concept is discussed in further detail in those sections of this preamble, such as section II.F, where actuarial equivalence comes into play. We will provide further detailed guidance on methods required to demonstrate actuarial equivalence.

Comment: One commenter requested that the definition of actuarial equivalence be refined through examples or more descriptive language.

Response: We agree that it is critical to disclose our requirements for calculation of actuarial values under Part D requirements as fully and as expeditiously as possible to reduce uncertainty on the part of potential plan sponsors. To that end we made available our draft bid preparation rules and processes early in December 2004 for public comment, and we will continue to refine our guidance to bidders through vehicles such as the annual 45-day notice and the CMS website. We have modified our definition to refer to this separate guidance.

- Discussion of the Meaning of Creditable Prescription Drug Coverage

Comments on creditable coverage are addressed in the preamble for subparts B and T.

- Prescription Drug Plan Regions

Prescription drug plan regions are areas in which a contracting PDP sponsor must provide access to covered Part D drugs. Although we included specifications for regions in § 423.112, the regions themselves were not set forth in the proposed rule. To the extent feasible, we tried to establish PDP regions that were consistent with MA regions. The MMA specifically required no fewer than 10 regions and no more than 50 regions, not including the territories. For a further discussion of the PDP regions, see section II.C of this preamble.

Comment: Many commenters expressed concerns about the MA and PDP region decisions. Many argued that

regions should closely mirror existing State insurance markets to maximize participation. Others representing rural constituencies argued for larger regions to encourage offering of coverage in rural areas.

Response: We conducted a market survey and analysis, including an examination of current insurance markets as required in the MMA. Key factors in the survey and analysis included payment rates; eligible population size per region; preferred provider organization (PPO) market penetration; current existence of PPOs, MA plans, or other commercial plans; and presence of PPO providers and primary care providers. Additional factors were also considered, including solvency and licensing requirements, as well as capacity issues. Recognizing the lack of specificity regarding the PDP regions in our proposed rule, we conducted extensive outreach in order to obtain public input prior to the publication of our final decision. On December 6, 2004, we announced the establishment of 26 MA regions and 34 PDP regions. For maps and fact sheets on the regions, please see *http://www.cms.hhs.gov/medicarereform/mmaregions/*.

- Service Area

In the proposed rule we proposed that Medicare beneficiaries would be eligible to enroll in a PDP or an MA-PD plan only if they reside in the PDP's or MA-PD plan's ''Service Area.'' For PDPs the service area is defined as the region or regions for which they must provide access. This is the Region established by CMS either pursuant to proposed § 423.112, or, in the case of fallback plans, the fallback service area pursuant to § 423.859, within which the PDP is responsible for providing access to the Part D drug benefit in accordance with the access standards in proposed § 423.120. Under the MA program, an MA plan's service area is defined in § 422.2. For coordinated care plans, the definition of ''service area'' expressly includes the condition that the service area is an area in which access is provided in accordance with access standards in § 422.112.

We also proposed that for purposes of enrolling in Part D with a PDP, or under an MA-PD plan, the definition of Service Area that governs eligibility to enroll is the area within which the Part D access standards under § 423.120 are met. Beneficiaries in jail or prison do not have access to pharmacies available as required under § 423.120. Therefore, such beneficiaries would not be considered to be in a PDP or MA-PD plan's Service Area for purposes of enrolling in Part D. Incarcerated individuals accordingly would not be assessed a late penalty when they enroll in Part D (either with a PDP or MA-PD plan) upon being released. The same analysis applies with regard to a beneficiary who lives abroad, and does not reside within the boundaries of any PDP Region or MA-PD Service Area. We have modified our definition of service area to clarify our intent as proposed.

Comment: Several commenters asked that we waive the service area requirement for employer group PDP plans.

Response: We agree that we have the authority to waive the service area requirement for employer-sponsored group prescription drug plans, and we plan to do so in appropriate cases. We will provide further details on waivers in separate CMS guidance.

- Sponsor Cost-Sharing in Beneficiary Education and Enrollment Related Costs-User Fees (§ 423.6)

The last section of subpart A proposed regulations implementing the user fees provided for in section 1857(e)(2) of the Act, as incorporated by section 1860D–12(b)(3)(D) of the Act. These fees are currently required of MA plans for the purpose of defraying part of the ongoing costs of the national beneficiary education campaign that includes developing and disseminating print materials, the 1–800–MEDICARE telephone line, community based outreach to support State health insurance assistance programs (SHIPs), and other enrollment and information activities required under section 1851 of the Act and counseling assistance under section 4360 of the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 103–66).

The MMA expands the user fee to apply to PDP sponsors as well as MA plans. The expansion of the application of user fees recognizes the increased Medicare beneficiary education activities that we would require as part of the new prescription drug benefit. In 2006 and beyond, user fees will help to offset the costs of educating over 41 million beneficiaries about the drug benefit through written materials such as a publication describing the drug benefit, internet sites, and other media. The user fee provisions establish the applicable aggregate contribution portions for PDP sponsors and MA organizations through two calculations.

Comment: Several commenters supported the extension of user fees to PDP sponsors in addition to MA plans. One commenter emphasized the need for Medicare to provide national beneficiary educational materials in accessible formats (including Braille and other languages commonly used by beneficiaries), as well as telecommunications equipment to support beneficiaries with hearing impairments, in order to meet the various needs of Medicare beneficiaries with disabilities. Another commenter urged us to focus beneficiary education efforts on helping beneficiaries make a choice, as opposed to simply describing the array of choices. This commenter also urged us not to overlook the M+C population in its outreach campaign.

Response: We have a long-standing tradition of making our beneficiary education materials accessible in a variety of formats to meet the needs of people with disabilities and special communications barriers. Beneficiary publications on a variety of topics are available in Braille, large print, and audiotape versions, in addition to conventional formats. We expect to continue these practices when educating beneficiaries about MMA topics. In addition, we are finalizing a partnership with the Social Security Administration (SSA) that will allow some of our educational products to be translated into 14 languages (other than English and Spanish) and reach a broader audience.

We are currently planning the development of a range of tools and strategies that will help beneficiaries make a choice that meets their needs. We agree that this action is an essential part of our education process, in addition to building general awareness and understanding. We will address the needs of multiple audiences through our outreach and education efforts, including those with M+C (MA) plans.

c. Definitions of Frequently Occurring Terms

The following definitions were discussed in the preamble to our proposed rule:

Full-benefit dual eligible beneficiary means an individual who meets the criteria established in § 423.772 (Subpart P), regarding coverage under both Part D and Medicaid.

Comment: One commenter asked us to clarify whether individuals eligible for Medicaid at the special income level for long term care qualify as full benefit dual eligibles for a full subsidy.

Response: Yes, all individuals who qualify for Medicaid, including expansion populations and persons eligible for Medicaid in long term care facilities under a State's special income standard which does not exceed 300 percent of the supplemental security income (SSI) payment standard will qualify as full benefit dual eligible beneficiaries eligible for a full subsidy.

Insurance risk means, for a participating pharmacy, risk of the type

commonly assumed only by insurers licensed by a State and does not include payment variations designed to reflect performance-based measures of activities within the control of the pharmacy, such as formulary compliance and generic drug substitutions, nor does it include elements potentially in the control of the pharmacy (for example, labor costs or productivity).

Comment: Several commenters supported our definition of 'insurance risk', including the exclusion of performance-based compensation as this is not commonly viewed as insurance risk.

Response: We will adopt the definition as proposed.

MA means Medicare Advantage, which refers to the program authorized under Part C of Title XVIII of the Act.

MA-PD plan means an MA plan that provides qualified prescription drug coverage.

Medicare prescription drug account means the account created within the Federal Supplementary Medical Insurance Trust Fund for purposes of Medicare Part D.

Part D eligible individual means an individual who is entitled to Medicare benefits under Part A or enrolled in Medicare Part B. For purposes of this part, enrolled under Part B means ''entitled to receive benefits'' under Part B.

Prescription drug plan or *PDP* means prescription drug coverage that is offered under a policy, contract, or plan that has been approved as specified in § 423.272 and that is offered by a PDP sponsor that has a contract with CMS that meets the contract requirements under subpart K or in the case of fallback PDPs also under subpart Q.

PDP region means a prescription drug plan region as determined by CMS under § 423.112.

PDP sponsor means a nongovernmental entity that is certified under this part as meeting the requirements and standards of this part for that sponsor.

Comment: Several commenters noted that the terms PDP sponsor and MA organization offering an MA-PD plan were not consistently used in the proposed rule to represent distinct and mutually exclusive entities. As a result the proposed rule was not always clear regarding when requirements or options applied only to one or the other entity, or both.

Response: We acknowledge that the terminology regarding sponsors and plans was inconsistently applied. We have revised the language in the final rule accordingly and have also standardized the terms 'Part D plan' and 'Part D plan sponsor' when referring to all plans and sponsors in general. Consequently we have relocated these terms from subpart C to this subpart and clarified that references to ''Part D plans'' in the final rule refer to any or all of MA-PD plans, PDPs, PACE plans and cost plans. Likewise, the term ''Part D plan sponsor'' refers to MA organizations offering MA-PD plans, PDP sponsors, and sponsors of PACE plans and cost plans.

Comment: Several commenters asked that we be flexible in its definition of a non-governmental entity to allow either the creation of State-sponsored entities as PDPs or the selection of a preferred PDP entity for Medicaid dual eligible and SPAP populations.

Response: While we understand and support the goals of minimizing client confusion and facilitating continuity of care, we believe the requirements imposed by sections 1860D–41(13) and 1860D–23(b)(2) of the Act do not allow us to approve State-sponsored PDPs or the selection of preferred PDPs for State populations. We would note, however, that we believe we can waive the non-governmental requirement in section 1860D–41(23) of the Act under the employer waiver authority for States that seek to sponsor Part D plans on behalf of their employees. This is discussed in more detail in subpart J of this rule.

d. Financial Relationships between PDP Sponsors, Health Care Professionals and Pharmaceutical Manufacturers

The financial relationships that exist between or among PDP sponsors, health care professionals (including physicians and pharmacists), or pharmaceutical manufacturers may be subject to the anti-kickback statute and, if the relationship involves a physician, the physician self-referral statute. Nothing in this regulation should be construed as implying that financial relationships described in this final rule meet the requirements of the anti-kickback statute or physician self-referral statute or any other applicable Federal or State law or regulation. All such relationships must comply with applicable laws.

In addition to the provisions in these regulation, under section 6(a)(1) of the Inspector General Act of 1978, as amended, OIG has access to all records, reports, audits, reviews, documents, papers and other materials to which the Department has access that relate to programs and operations for which the Inspector General has responsibilities under the Inspector General Act. The provisions in these regulations do not limit the Office of the Inspector General's (OIG) authority to fulfill the Inspector General's responsibilities under Federal law.''

e. ERISA application and requirements

The rules contained in this rulemaking apply for purposes of Title I of the MMA and no inference should be drawn from anything in this rule regarding the applicability of title I of ERISA. In addition, nothing in this rulemaking should be construed as relieving a plan administrator or other fiduciary of obligations under title I of ERISA.

B. Eligibility and Enrollment

We outlined the eligibility and enrollment requirements for Part D plans in subpart B of the August 2004 proposed rule. We received over 100 comments on this subpart. Below we summarize the provisions of the proposed rule and our final rule and respond to public comments. (Please refer to the proposed rule (69 FR 46637) for a detailed discussion of our proposals.)

1. Eligibility for Part D (§ 423.30)

Section 101 of the MMA established section 1860D–1 of the Act, which includes the eligibility criteria an individual must meet in order to obtain prescription drug coverage and enroll in a Part D plan. Section 1860D–1(a)(3)(A) of the Act defines a ''Part D eligible individual'' as an individual who is entitled to Medicare benefits under Part A or enrolled in Part B. Further, in order to be eligible to enroll in a PDP plan, § 423.30(a) of the proposed rule provided that the individual must reside in the plan's service area, and cannot be enrolled in an MA plan, other than a Medicare savings account (MSA) plan or private fee-for-service (PFFS) plan that does not provide qualified prescription drug coverage. In addition, § 423.4 of the proposed rule provided the definition of service area, which describes that for purposes of eligibility to enroll to receive Part D benefits, certain access standards must be met, hence, making certain individuals ineligible to enroll.

Generally, a Part D eligible individual enrolled in an MA plan that does not provide qualified prescription drug coverage (that is, an MA plan) may not enroll in a PDP. There are, however, exceptions under sections 1860D–1(a)(1)(B)(iii) and (iv) of the Act for individuals who are enrolled in either an MA private fee-for-service plan (as defined in section 1859(b)(2) of the Act) that does not provide qualified prescription drug coverage or an MSA plan (as defined in section 1859(b)(3) of the Act). We provided for these

exceptions in § 423.30(b) of the proposed rule.

Except as provided above, in accordance with section 1860D–1(a)(1)(B)(i) of the Act, and as provided in § 423.30(c) of the proposed rule, a Part D eligible individual who is enrolled in an MA-PD plan must obtain prescription drug coverage through that plan. In order to enroll in an MA-PD plan, a Part D eligible individual must also meet the eligibility and enrollment requirements of the MA-PD plan as provided in § 422.50 through § 422.68 of the proposed rule establishing and regulating the MA program (CMS–4069–P) which was also published August 2004.

Except as otherwise provided below, the final rule adopts the eligibility criteria set forth in § 423.30 of the proposed rule.

Comment: Several commenters requested clarification of the definition of a Part D eligible individual. One commenter stated than a literal reading of the proposed definition appears to say that any individual who is eligible for Medicare but not enrolled could get the Part D benefit, and asks if an individual must enroll in Part A or Part B in order to be eligible for Part D. One commenter indicated that it was unclear how CMS would coordinate Part D eligibility with any retroactive eligibility determinations made by SSA.

Response: Section 1860D–1(a)(3)(A) of the Act defines a ''Part D eligible individual'' as ''an individual who is entitled to benefits under Part A or enrolled under Part B.''

In other context, we generally have interpreted the concept of ''entitled'' to benefits to mean that an individual has met all of the necessary requirements for a benefit (that is, is eligible for the benefit), and has actually applied for and been granted coverage. We believe for purposes of applying the definition of ''Part D eligible individual'' under section 1860D–1(a)(3) of the Act, we believe this interpretation of ''entitlement'' is the appropriate interpretation. Accordingly, we will deem an individual ''entitled'' to Part A, and thus a Part D eligible individual, if the individual is eligible for benefits under Part A, and has actually applied for and been granted coverage under Part A. On the other hand, under our Medicare Part B regulations at part 407, an individual is considered to be ''enrolled'' in Part B when he or she has applied for Part B coverage (or is deemed to have applied). Nevertheless, we do not believe this interpretation of ''enrolled'' in Part B is the correct interpretation of section 1860D–1(a)(3)(A) of the Act, and instead interpret ''enrolled under Part B'' to mean that the individual is entitled to receive benefits under Part B.

When establishing eligibility and enrollment rules for the MA program upon its inception, we adopted a similar interpretation of section 1851(a) (3) of the Act. Section 1851(a) (3) of the Act defined the term ''Medicare+Choice eligible individual'' to mean an individual who is entitled to benefits under part A ''and enrolled under part B.'' As we explained in our proposed rule for the Medicare+Choice program (see 63 FR 34979), we believe that the Congress intended that we provide an individual the opportunity to enroll in the Medicare+Choice program only if entitled to actually receive benefits under Part B in addition to Part A. As we explained, under some situations, an individual may apply for or be deemed to have applied for Part B before he or she is actually entitled to receive coverage. For example, if an individual applies for Part B coverage after he or she reaches age 65, the individual may not actually be entitled to Part B coverage under section 1837 of the Act until one or several months after the month of application and enrollment. If we had interpreted section 1851(a) (3) of the Act to permit individuals to enroll in a Medicare+Choice plan when an individual has only been enrolled in Part B, but is not yet entitled to Part B, he or she could be entitled to the benefits under a Medicare+Choice plan before actually being entitled to Medicare Part B coverage. In order to avoid such a result, we interpreted the language ''enrolled'' in Part B in section 1851(a) (3) of the Act to mean ''entitled'' to Part B.

We similarly will interpret section 1860D–1(a)(3)(A) of the Act as providing that an individuals is eligible for Part D only if the individual is entitled to receive benefits under Part A or Part B. Section 1860D–1(b)(1)(B) of the Act requires us to use rules similar to and coordinated with certain rules for enrollment that govern eligibility for the MA program. Hence, we believe that the Congress intended that we provide an individual the opportunity to enroll in part D only if entitled to actually receive benefits under Part B (or Part A); otherwise an individual would be entitled to receive coverage of Part D drugs under PDP before being entitled to receive benefits under original fee-for-service Medicare.

Our regulations at § 422.2 define an MA eligible individual as someone who meets the requirements of § 422.50, which outlines the various criteria that an individual must meet to be eligible to elect an MA plan, including: entitlement to Parts A and B, residency in a plan's service area, making an enrollment election and agreeing to abide by the rules of the MA plan. We intend to apply a parallel approach to the Part D program. We will amend § 423.4 to define a Part D eligible individual as an individual who meets the requirements at § 423.30, that is, the individual is entitled to Medicare benefits under Part A or enrolled in Part B and lives in the service area of the Part D plan. We clarify, however, that ''enrolled'' in Part B means that the individual not only has applied for and enrolled in Part B, but is also receiving coverage for Part B services, in accordance with part 407.

We have included in § 423.30 to be eligible to enroll in a Part D plan, the individual must also reside in the Part D plan's service area and not be enrolled in another Part D plan.

We have clarified Part D eligibility for those individuals for whom eligibility determinations for Medicare Part A or B have been made retroactively, which results in retroactive entitlement to these programs. The MA statute at section 1851(f) of the Act provides that initial elections shall take effect upon the date the individual becomes entitled to Part A or B, except as the Secretary may provide ''in order to prevent retroactive coverage.'' Under the MA program, an individual who has received a retroactive eligibility determination for Medicare Part A or B is not permitted to enroll in an MA plan retroactively. Again, using section 1860D–1(b)(1)(B) of the Act that directs us to establish rules similar to those in MA, we envision individuals enrolling in a Part D plan prospectively and have revised § 423.30 so that individuals who become entitled to Medicare Part A or Part B benefits for a retroactive effective date are deemed Part D eligible as of the month in which notice of Medicare Part A or Part B entitlement is provided.

Such revisions at § 423.4 and § 423.30 will clarify that an individual is eligible for Part D at the same time an individual is eligible to enroll in Part D.

Comment: Commenters requested clarification on the eligibility of incarcerated individuals. One commenter did not believe that we had the authority to create such exclusion. Another requested clarification of the ability of individuals released from incarceration on probation or parole to enroll in Part D.

Response: In the preamble of the proposed rule, we explained that individuals who are incarcerated likely do not have access to Part D services, as they cannot obtain their prescription drugs from network pharmacies, yet

technically the jail or prison may be located within the larger geographic area encompassing a PDP's service area. As a result, the individual would be subject to a late enrollment penalty for not enrolling in a Part D plan. As a result, we believe that it is appropriate to provide in § 423.4 that a PDP's service area would exclude areas in which incarcerated individuals reside (that is, a correctional facility) and as a result, incarcerated individuals would be ineligible to enroll in a PDP and we have revised the definition to clarify this point. Upon release from incarceration, such as for probation or parole, individuals will be considered eligible for Part D by living in a PDP service area, if they meet other Part D eligibility requirements.

Comment: One commenter suggested that we consider individuals who are residents of a State mental institution to be out of the service area and therefore ineligible for enrollment in a Part D plan.

Response: We would not consider individuals who are residing in a State mental institution to be out of the service area. Medicare beneficiaries residing in such institutions have access to Medicare benefits under Parts A and B and therefore would be entitled to enroll in a Part D plan. However, we do recognize that individuals in a State mental institution may be limited to the pharmacy network contracted with the facility. Therefore, we will provide such individuals a Special Enrollment Period (SEP) to enable them to join the appropriate Part D plan based upon their situation. We will clarify this in guidance following publication of this rule.

Comment: One commenter asked that we clarify § 423.30(c) in the final rule to indicate when an individual in an MA-PD plan can change plans.

Response: The provisions explaining the opportunities for individuals to make PDP enrollment choices are fully set forth at § 423.38 of the final rule. The requirements for MA plans are outlined under § 422.50 through § 422.80.

Comment: One commenter suggested that we permit beneficiaries enrolled in an MA plan to enroll in a PDP or disenroll from the MA plan and enroll in an MA-PD plan.

Response: Section 1860D–1(a)(1) of the Act specifically prohibits an MA plan enrollee from enrolling in a PDP except in the case of enrollees of a MA PFFS plan that does not provide qualified prescription drug coverage or enrollees of an MSA plan. All individuals, including enrollees of MA plans, can enroll in a Part D plan during the established enrollment periods, as described at § 423.38 of the final rule.

2. Enrollment Process (§ 423.32)

Section 1860D–1(b)(1) of the Act requires that we establish a process for the enrollment, disenrollment, termination, and change of enrollment of Part D eligible individuals in prescription drug plans. The statute further requires that this process use rules similar to, and coordinated with, the enrollment, disenrollment, termination, and change of enrollment rules for MA plans under certain provisions of section 1851 of the Act. Thus, we proposed, where possible, to adopt the MA enrollment requirements provided under § 422.50 through § 422.80.

Generally, a Part D eligible individual who wishes to make, change, or discontinue an enrollment during applicable enrollment periods must file an enrollment with the PDP directly. However, we will allow PDPs to use other enrollment mechanisms, as approved by us. In addition, § 423.32 of the final rule provides that beneficiaries will remain enrolled in their PDP without having to actively re-enroll in that PDP at the beginning of each calendar year. Except as otherwise provided below, the final rule adopts the enrollment rules set forth in § 423.34 of the proposed rule.

Comment: Several commenters submitted identical comments on various aspects of the coordination of the enrollment process reflected at both § 423.34(b) and § 423.42(a).

Response: Commenters provided similar comments about the enrollment process at § 423.34(b)(1) of the proposed rule and the coordination of enrollment and disenrollment process at § 423.42(a) of the proposed rule. After reviewing these comments, we recognized that these sections were duplicative and could cause confusion. To address this problem, we have reorganized the following subjects in subpart B into a more logical order: the enrollment process at § 423.32 (previously proposed § 423.34); auto-enrollment process for dual eligible individuals at § 423.34 (previously proposed § 423.34(d); the disenrollment process at § 423.36; the enrollment periods in § 423.38; and the effective dates at § 423.40. We believe that this will simplify and clarify these provisions.

Comment: Several commenters supported the inclusion of regulatory provisions that would permit enrollment through means other than the submission of signed, hard-copy enrollment forms in order to facilitate flexibility for future enrollments. These commenters supported allowing alternative mechanisms for enrollment, particularly electronic enrollments, to enable beneficiaries with access to computers to enroll or disenroll through secure websites established by PDP sponsors. Another commented that we should make the same enrollment mechanisms that are available to Medicare Advantage plans available to PDP sponsors. A few commenters requested clarification as to the ''other mechanisms'' referenced by us in the proposed rule, specifically what types of enrollment are envisioned and the populations to which these ''other mechanisms'' would be applied. One commenter recommended we allow electronic enrollments through a CMS-hosted web site, and that we develop a standard registration process to authenticate the enrollments. Another stated that processing applications via the Internet would require significant systems changes and that the regulation appeared to lack requirements necessary to process applications in such a manner.

Response: We were pleased by the general support for flexibility and creativity in this important part of the enrollment process, and we anticipate working in collaboration with all of our partners to develop enrollment processes that will be convenient, reliable and secure for all beneficiaries. We will adopt this provision as proposed at § 423.32(b), rather than specify or limit the types of alternative enrollment processes that may be used. We will continue to assess the technology available and provide additional operational guidance in the future, including specific systems requirements and other information necessary to implement these processes.

Comment: We received several comments requesting clarification of what parties are authorized to act on behalf of a beneficiary for enrollment purposes. One commenter noted that the regulation does not appear to recognize a beneficiary's ''authorized'' or ''personal'' representative who could be designated to make decisions for individuals and refers to the personal representative definition that we created in subpart P of the proposed rule. Another commenter was concerned that individuals in long-term care facilities do not have a designated surrogate decision maker in place to make such a decision and lack the cognitive capacity to select a PDP. While some commenters stated that we should allow an individual's personal representative to enroll a person into a PDP, others requested that we recognize specific representatives who could effectuate

such an enrollment within the regulatory text (for example, SPAP).

Response: In the regulation, we refer to a Part D eligible ''individual'' who wishes to enroll. An individual who has been appointed as the legal representative to execute such an enrollment on behalf of the beneficiary, in accord with State law, would constitute the ''individual'' for purposes of making the enrollment or disenrollment. As with the Medicare Advantage provisions, we will recognize State laws that authorize persons to effect an enrollment for Medicare beneficiaries. We will include more information on this clarification in future operational guidance.

Comment: Several commenters asked that we clarify that nothing would prevent a person or entity from assisting a beneficiary in completing and submitting his or her application to the PDP, as the MA program allows at § 422.60(c).

Response: We agree and have revised the regulatory language at § 423.32(b) to allow for such assistance, consistent with the MA regulations.

Comment: One commenter suggested that we set forth an appeals process for beneficiaries who are denied enrollment.

Response: Although we agree with the commenter that we should establish a procedure for beneficiaries to dispute enrollment denials, we do not believe that a formal appeals process is necessary. Instead, we intend to address beneficiary complaints regarding enrollment in a similar manner as we have done under the MA program. Under the MA program, individuals are advised through their notice of denial of enrollment that if they disagree with the decision to deny enrollment, they may contact the MA organization. We monitor MA organizations periodically to ensure that they are providing this notification. We also respond to specific inquiries from beneficiaries and investigate possible situations where MA organizations have failed to notify beneficiaries of the process or where an organization may have incorrectly denied a beneficiary's enrollment. If we discover a beneficiary was incorrectly denied enrollment we can require the MA organization to enroll that individual, as provided in our manual instructions. We believe our current process provides adequate remedies to beneficiaries and will therefore establish a similar process for PDPs. We decline to establish a separate appeals process for these denials at this time.

Comment: One commenter requested that we specify in the final rule that PDPs must provide written notice of enrollment decisions to each consumer.

Response: In § 423.32(d) we require PDPs to provide all individuals prompt notice of acceptance or denial of enrollment in the PDP in a format and manner specified by CMS. We will provide specific instructions on the format and manner of these required notices in operational guidance and intend to provide model language and materials for PDPs to use as well. Looking ahead, we believe that beneficiaries may want to receive documents (such as notices) in a variety of formats, rather than just in writing. To that end, we decline to require a specific format in regulation, thereby preserving the flexibility to foster innovation and creativity to satisfy beneficiary and industry expectations in the future.

Comment: One commenter suggested that individuals enrolled in PACE should remain enrolled in the PACE organization for purposes of Part D coverage effective January 1, 2006. Another commenter suggested a similar process be established for cost plans.

Response: Section 1860D–21(f) of the Act provides that a PACE plan may elect to provide qualified prescription drug coverage to its Part D eligible enrollees. Section 1860D–21(e) of the Act establishes a similar directive to cost-based HMO or competitive medical plan (CMP) plans. Discussion of the application of the Part D benefit to both PACE and cost-based HMO or CMP plans can be found under subpart T of the proposed rule. For PACE plans, we stated that PACE plans generally will be treated similar to MA local plans. Applying the appropriate MA rules from § 422.66, PACE enrollees will receive their Part D benefits through the PACE plan if the PACE plan has elected to provide such coverage. Beneficiaries who are enrolled in PACE plans that provide such coverage as of December 31, 2005 will remain enrolled in that plan on January 1, 2006. For cost-based HMO or CMP plans, we state that cost contracts may offer Part D coverage only to individuals also enrolled for Medicare in the cost contract. As a result of the provisions for PACE and cost-based HMO or CMP plans, we revised § 423.32(f) to provide that individuals who are in PACE or cost-based HMO or CMP plans that provide prescription drug coverage on December 31, 2005 will remain enrolled in that plan and be enrolled in the Part D benefit offered through that plan as of January 1, 2006.

3. Enroll Full-Benefit Dual Eligible Individuals (§ 423.34)

In the proposed rule, § 423.34(d) required that full benefit dual eligible individuals who fail to enroll in a PDP or MA-PD during their initial enrollment period would be automatically enrolled into an appropriate Part D plan, specifically a PDP with a Part D premium that does not exceed the low-income premium subsidy amount. When there is more than one available PDP in a region, full benefit dual eligible individuals would be auto-enrolled on a random basis.

All beneficiaries in an MA plan with any prescription drug coverage on December 31, 2005 will be deemed enrolled on January 1, 2006 in an MA-PD plan offered by the same MA organization in accordance with § 422.66(e)(2) and (e)(3) of Title II of the final regulation even if the monthly beneficiary premium exceeds the low-income premium subsidy amount. For full-benefit dual eligible individuals only, the proposed rule provided that those already enrolled in an MA plan without any prescription drug coverage would be auto-enrolled into an MA-PD plan offered by the same organization, and that has a monthly Part D premium that does not exceed the low-income premium subsidy amount. The proposed rule clarified that those auto-enrolled into a Part D plan may affirmatively decline Part D coverage or change Part D plans.

In a related area, § 423.36(c) of the proposed rule provided a SEP for full-benefit dual eligible individuals that permits them to change Part D plans at any time. Separately, there already exists a SEP for full-benefit dual eligible individuals to enroll in or disenroll from a Medicare Advantage plan at any time, and this will be expanded to include MA-PD plans. This SEP is provided in operational guidance (see section 30.4.4–5 of Chapter 2 of the Medicare Managed Care Manual), in accordance with section 1851(e)(4)(D) of the Act, which gives us the authority to provide Special Enrollment Periods for exceptional circumstances. Taken together, the PDP and MA-PD plan SEPs mean a full-benefit dual eligible individual may switch from Original Medicare and a PDP into an MA-PD plan and vice versa; from one PDP to another; and from one MA-PD plan to another MA-PD plan at any time.

We requested comment on two areas: whether we or States should conduct auto-enrollment, and how to address an inherent conflict in the statute, whereby the statute requires auto-enrollment of full-benefit dual eligible individuals

into a Part D plan with a premium that does not exceed the low-income premium subsidy amount, but does not speak to those instances in which an individual is enrolled in an MA organization whose premium for the available MA-PD plan(s) exceeds the low-income premium subsidy amount.

Except as otherwise provided below, the final rule adopts the enrollment rules for full-benefit dual eligible individuals set forth in § 423.34(d) of the propose rule.

Comment: Several commenters supported CMS performing the auto-enrollment function. They viewed it as the most appropriate entity because it is in the best position to randomly assign beneficiaries to MA-PD plans or PDPs in the region, and to establish links with each MA-PD plan or PDP in each region, thereby more efficiently auto-enrolling individuals. Some commenters also suggested that we consider adding an enrollment broker to the process for populations with special health care needs.

A number of other commenters recommended that States either be required or have the option to perform the auto-enrollment function, as they view the States as having more readily available data identifying dual eligible individuals and a vested interest in ensuring these individuals are enrolled in appropriate Part D plans. This option was also viewed as advancing care coordination and ensuring continuity of care. It was noted that these options also present a disincentive for States to maximize enrollment, since the phased-down State contribution payments are tied to the number of Part D eligible individuals enrolled in Part D plans. Commenters also acknowledged that, if we were to afford States the option of conducting the auto-enrollment function, we would have to develop its own systems for auto-enrollment in States that lack the capacity to develop such systems. Commenters supporting this option felt strongly that we should reimburse States for all of their costs related to enrollment activities they are required to perform.

Some commenters recommended that an independent third party coordinate the enrollment process. Those parties could include State and local officials and representatives of nonprofit organizations specializing in care for seniors. One also suggested that the contracted agent would need to be compliant with the Health Insurance Portability and Accountability Act of 1996 (HIPAA) privacy rule and should have no financial incentives regarding a full-benefit dual eligible individual's assignment beyond the contract between it and CMS.

Response: We agree with those who commented that we, or a contractor on our behalf, should perform the auto-enrollment function because we can better ensure consistent, timely implementation. In addition, we would not have to develop and implement a separate administrative structure to oversee auto-enrollment being performed by some or all of the States. Finally, it would likely be more cost effective for us to have a single entity perform auto-enrollment, rather than pay 51 separate entities. For these reasons, we will modify the final regulation to specify that we will conduct the auto-enrollment process.

At this time, we do not envision contracting with an enrollment broker to provide more intensive choice counseling for beneficiaries subject to auto-enrollment. Because the statute makes us ultimately responsible for the auto-enrollment process, we will, at least initially, conduct it ourselves. Instead of hiring a new third party, we believe it would be more effective to partner with existing stakeholders to conduct broad-based outreach and education; provide clear and comprehensive information to beneficiaries; and refer individuals to either the 1–800–MEDICARE toll-free line or to Part D plans for additional information. However, if we decide in the future to contract with an independent enrollment broker, we agree with the commenter that the entity would need to be free of conflicts of interest and comply with HIPAA privacy rules. We note that any delegation to a third party would make the third party a business associate of ours for HIPAA purposes, since the entity would be performing a function on behalf of us.

Comment: Many commenters recommended that we define ''random'' to include auto-enrollment based on beneficiaries' particular drug needs, pharmacy affiliation, or on their classification as a special needs population. Many commenters expressed concerns about how random assignment will impact individuals who are on drug regimens on which they have been previously stabilized. They were concerned that these individuals would be auto-enrolled in a ''low-cost'' plan that may not cover the drugs they need. Without direct access to the coverage they need, this population would have no real choice but to switch medications, even though changing medications can be difficult and lead to adverse health outcomes, reactions, and so on.

Several other commenters expressed similar concerns about individuals who reside in long-term care facilities. In addition, some long-term care facilities require residents to use a pharmacy selected and contracted by the facility. One commenter requested that we define ''random,'' specifically detail how we envision the random process would work, and seek further public comment.

Response: We share the commenters' concerns with ensuring access to necessary prescription drug coverage for vulnerable populations. For ensuring continued access to existing drugs prescribed for an individual, please refer to comments on § 423.120(b) of the final regulation. For ensuring access to long-term care facilities' contracted pharmacies, please refer to comments on § 423.120(a) of the final regulation.

The systems challenges associated with anything other than a random process would be significant, and possibly result in inappropriate assignment or delayed implementation. For example, we have drug utilization data for Medicaid beneficiaries, but there is a time lag in receiving those data. Furthermore, we do not currently have access to information about the pharmacies that contract with long-term care facilities. Finally, we realize that pharmacy affiliation and particular drug needs are only two of the variables that impact a beneficiary's choice of a Part D plan. For example, a beneficiary may also consider cost-sharing, formulary structure, customer service and, in the case of MA-PD plans, whether she or he would want to receive all of her or his Medicare benefits from one organization.

Given these data limitations, and the many and varied reasons for choosing a Part D plan, we do not believe we are in a position to make a judgment about what is best for individual beneficiaries, and decline to change the proposed regulations. However, we will make every effort to ensure that beneficiaries and community organizations receive enough information in time for them to determine the appropriate plan for the beneficiary. The SEP provided for full-benefit dual eligible individuals in the statute and in our final rule at § 423.38(c)(4) also ensures that they can change plans to better accommodate their pharmaceutical needs and pharmacy affiliations.

Comment: One commenter recommended that we establish a bid process whereby PDPs with an expected enrollment by full-benefit dual eligible individuals that is higher than the proportion in the total Medicare eligible population in the relevant PDP region

automatically qualify for inclusion in the auto-enrollment process. The commenter further recommended that, if such a plan has a monthly beneficiary premium above the low-income premium subsidy amount, we should permit a ''waiver'' based on a subsidy or payment of that excess premium by CMS or another entity in order to reduce the premium to an amount equal to or below the low-income premium subsidy amount.

Response: Those plans available for purposes of auto-enrollment are ones that have premiums at or below the low-income premium subsidy amount. This includes fallback plans in areas where they exist. It is our intent to implement the Part D program and adhere to the statute as closely as possible, assuming tenable options are available to do so. In the case of PDPs that serve a disproportionate share of full-benefit dual eligible individuals, and whose premium exceeds the low-income premium subsidy amount, we believe there are tenable options, that is, other PDPs with premiums at or below the low-income premium subsidy amount. However, we note that risk-adjustment should correct for the higher costs incurred by plans with larger proportions of full-benefit dual eligible individuals.

Comment: A few commenters recommended that we not limit the Part D plans available for auto-enrollment to just those plans with premiums below the low-income premium subsidy amount, as this limits full-benefit dual eligible individuals to the ''lowest cost'' plans, which may offer a less generous benefit. The commenters suggested that, regardless of whether these individuals enroll on their own or are auto-enrolled, they should be permitted to enroll in any plan and not be charged any additional premium. At a minimum, a beneficiary's medical provider could attest that a higher premium plan will better meet his or her medical needs and therefore be allowed to enroll in a higher premium plan without the added premium.

Response: We appreciate the commenters' concern that full-benefit dual eligible individuals be able to enroll in the plan best suited for them, not just ''low cost'' plans. We note that a full-benefit dual eligible individual is free to enroll in any Part D plan during the initial enrollment period or annual coordinated election period.

For auto-enrollment, however, section 1860D–1(b)(1)(C) of the Act only permit us to, auto-enroll full-benefit dual eligible individuals into those plans with premiums at or below the low-income premium subsidy amount. In addition, those full-benefit dual eligible individuals randomly auto-enrolled in a particular plan may still choose another plan pursuant to a special enrollment period.

In addition, as we do not have the authority under section 1860D–14(a)(1)(A) of the Act to increase the low-income premium subsidy amount (as defined under section 1860D–14(b)(2)(B) of the Act), full-benefit dual eligible individuals who elect to enroll in a plan with a premium exceeding the low-income premium subsidy amount must pay the difference in premium. We are also precluded under sections 1860D–13(a)(1)(F) and 1854(c) of the Act from requiring or even permitting Part D plans from waiving any premium in excess of the premium subsidy amount, including allowing MA-PD plans to use rebate dollars to reduce the premium only for this portion of their enrolled population.

Comment: We received numerous comments related to the timing of the auto-enrollment process for full-benefit dual eligible individuals. Commenters identified the possibility of a gap in coverage for some of those individuals if the auto-enrollment did not occur until the close of the Initial Enrollment Period on May 15, 2006, since Medicaid coverage of Part D drugs ends several months earlier, on January 1, 2006. They proposed that we require auto-enrollment of these individuals to be completed prior to Medicaid coverage ending on December 31, 2005. Some commenters recommended that the process be completed as early as November 15, 2005, and one commenter suggested starting the 2005 Initial Enrollment Period for full-benefit dual eligible individuals prior to November 15, 2005. Another commenter recommended that auto-enrollment precede Part D eligibility by 6 months, and that Medicaid coverage of Part D drugs be continued until auto-enrollment can be done.

Response: We did not intend to implement a process that would create a gap in drug coverage for full-benefit dual eligible individuals. We do not believe that the Congress intended for such a gap to occur. Therefore, we will modify the final rule so that the auto-enrollment of these individuals will begin as soon as Part D plans with premiums at or below the low-income premium subsidy amount are known prior to January 1, 2006. We will also modify the final rule to provide that those full-benefit Medicaid individuals who become eligible for Medicare after January 1, 2006, will be enrolled as soon as their Medicare Part D eligibility is determined. For the suggestion to start the 2005 Initial Enrollment Period for full-benefit dual eligible individuals before November 15, 2005, we are precluded from doing so, as this date is explicitly identified in section 1860D–1(b)(2)(A) of the Act as the date upon which enrollment in Part D may commence.

Comment: Many other commenters suggested that we delay implementation of the Part D program for full-benefit dual eligible individuals by at least five or six months, and some recommended a year's delay, although the commenters recognized that such a delay would require a legislative change. The commenters' concern was based on the limited time to transition drug coverage for these full-benefit dual eligible individuals from Medicaid to Medicare. The commenters expressed concern about the feasibility of identifying, educating, and enrolling the population of full-benefit dual eligible individuals in time for a smooth transition of drug coverage. Some commenters highlighted the need to ensure adequate time for physicians and patients to navigate administrative barriers and change medications to comply with formularies. One commenter suggested Medicare beneficiaries who currently participate in Medicaid buy-in programs (that is, qualified Medicare beneficiaries (QMB), special low-income beneficiaries (SLMB), and qualified individuals (QI1)) be permitted to keep Medicaid drug coverage after Part D starts.

A few commenters recommended that, assuming Part D coverage begins for full-benefit dual eligible individuals on January 1, 2006, Medicaid coverage of Part D drugs be extended past December 31, 2005, and continued until such time as full-benefit dual eligible individuals are enrolled in Part D.

One commenter recommended that full-benefit dual eligible individuals who are American Indians or Alaska Natives (AI/AN) be exempt from Part D and continue to be eligible for Medicaid drug coverage after January 1, 2006. The commenter argued that this would prevent loss of revenues to pharmacies operated by Indian Health Services (IHS), Tribal Clinics, and Urban Indian Clinics, who may receive lower payments from Part D plans than they currently receive from Medicaid, and eliminate barriers for this population.

Response: As the commenters correctly point out, a delay in the implementation of the Part D program, including auto-enrollment for full-benefit dual eligible individuals would require a change to the statute. Similarly, extending Medicaid coverage of prescription drugs covered under Part D would also require a legislative

change. Absent such changes, we cannot delay implementation, extend Medicaid coverage of Part D drugs, nor can we exclude full-benefit dual eligible individuals who are AI/AN, or participants in Medicaid buy-in programs from Part D.

Comment: A couple of commenters requested clarification about the circumstances under which a beneficiary may affirmatively decline participation in Part D. They expressed concern that individuals with diminished mental faculties may not fully understand the impact of their decision, and that States would likely bear additional costs associated with full-benefit dual eligible individuals whose health deteriorates due to their failure to take necessary medications. One commenter urged that States be able to obtain FFP to provide prescription drug coverage in these instances. Another commenter asserted that permitting a full-benefit dual eligible individual to affirmatively decline enrollment in Part D contradicts numerous statutory and regulatory provisions that require this population's enrollment in Part D. One commenter urged CMS to make disenrollment contingent upon selection of another Part D plan to ensure there is no lapse in coverage. Finally, one commenter suggested expanding the ability to affirmatively decline enrollment in Part D to Medicare beneficiaries who are not auto-enrolled.

Response: The Congress specified that prescription drug coverage under this program is voluntary, and section 1860D–1(b)(1)(C) of the Act specifically stipulates that auto-enrollment does not prevent a full-benefit dual eligible individual from declining or changing such enrollment. Absent any legislative change, we cannot intervene with an individual's right to decline coverage. Nor can we adopt the suggestion to permit Federal financial participation (FFP) for State Medicaid agencies that choose to provide drug coverage for full-benefit dual eligible individuals who affirmatively decline auto-enrollment. Section 1935(d)(1) of the Act stipulates that no FFP is available for any Part D drugs or cost-sharing for Part D drugs for full-benefit dual eligible individuals who are eligible for Part D, even if they are not enrolled in a Part D plan. However, we will be making every effort to ensure that beneficiaries and community organizations have sufficient information to assist individuals in making the most appropriate choices about participating in Part D.

Concerning the comment that we should make disenrollment from a Part D plan contingent upon enrolling in another Part D plan to prevent a coverage gap for full-benefit dual eligibles, we decline to do so in regulation, but will continue to work develop strategies to prevent a coverage gap in this instance.

We decline to expand the ability to affirmatively decline Part D enrollment to individuals who are not auto-enrolled or for whom we do not facilitate enrollment into a Part D plan. This population is comprised of those who are not deemed or determined eligible for the low-income subsidy. If these individuals do not want Part D coverage, they can simply choose not to enroll in a Part D plan.

Comment: One commenter suggested that there should be flexibility for CMS to change the plan into which a beneficiary has been auto-enrolled should the plan no longer meet the needs of the enrollee.

Response: We agree that it would be prudent to retain the flexibility to enroll an individual in subsequent years in a different plan from the one into which we originally enrolled the individual, and have modified the final rule to provide for this. We note that this will require an exception to the maintenance of enrollment provision in § 423.32(e), so we have modified the final rule to provide for one.

We envision this may only be necessary in certain limited circumstances. For example, we may want to consider doing this if the plan's premium in a subsequent year exceeded the low-income premium subsidy amount. We will ensure that beneficiaries are fully notified, and have the option to remain in their original plan. We will examine the need for this as the program evolves and provide operational guidance should we implement it.

Comment: A number of commenters responded to our request in the preamble for solutions to an inherent conflict in the statute. In this instance, the statute requires auto-enrollment of full-benefit dual eligible individuals into a Part D plan with a premium at or below the low-income premium subsidy amount. Section 423.34(d) of the proposed rule stipulated that those in an MA-only plan would be auto-enrolled into an MA-PD plan in the same organization that has a premium that does not exceed the low-income premium subsidy amount. However, there may be instances in which an individual is enrolled in an MA-only plan offered by an MA organization, and all the MA-PD plans in that organizations have premiums that exceed the low-income premium subsidy amount.

We note that most MA enrollees will be deemed to be enrolled into an MA-PD plan in accordance with § 422.66(e)(2) and (e)(3). However, deeming does not address those who elect an MA-only plan that does not offer any drug coverage in 2005, nor qualified prescription drug coverage thereafter.

Several commenters supported auto-enrolling these full-benefit dual eligible individuals into an MA-PD plan offered by the same organization with the lowest Part D premium, even if it was higher than the low-income premium subsidy amount. This would provide seamless continuation of their Medicare benefits through the same organization. Commenters noted that these individuals retain the right to decline Part D coverage, and have a SEP that permits them to change PDPs or MA-PD plans at any time.

One commenter noted that excluding full-benefit duals from auto-enrollment in an MA-PD plan with a premium higher than the low-income premium subsidy amount would give those MA plans an unfair advantage by removing from their risk pool full-benefit dual eligible individuals, who tend to have higher drug utilization.

Response: We agree with commenters' concerns about ensuring continuity of care through the same MA organization, if possible. However, as we discussed in the preamble to the proposed regulation, there is an inherent statutory conflict that would seem to preclude using auto-enrollment authority to accomplish this. Section 1860D–1(b)(1)(C) of the Act directs the Secretary to auto-enroll full-benefit dual eligible individuals who do not enroll in a PDP or MA-PD plan on a random basis into a PDP with a premium at or below the low-income premium subsidy amount; it does not identify an MA-PD plan as an entity into which an individual could be auto-enrolled.

General principles of statutory interpretation requires us to reconcile two seemingly conflicting statutory provisions rather than allowing one provision to effectively nullify the other provision. We had proposed to resolve this by interpreting the reference to ''prescription drug plans'' in section 1860D–1(b)(1)(C) of the Act as including both PDPs and MA-PD plans, thereby allowing auto-enrollment of an MA full-benefit dual eligible individual into an MA-PD offered by the same organization offering his or her MA plan if the premium for such plan did not exceed the low-income premium subsidy amount.

Upon further consideration, we believe there continue to be legal concerns as to whether we have the authority to auto-enroll full-benefit dual eligible individuals into an MA-PD plan. Rather than rely on auto-enrollment authority under section 1860D–1(b)(1)(C) of the Act to ensure continuity of Part D coverage for full-benefit dual eligible individuals enrolled in MA-only plans, we instead will rely on our general authority to establish enrollment procedures under section 1860D–1(b)(1)(A) of the Act to establish a facilitated enrollment process that substantially fulfills the intent of ensuring no prescription drug coverage gap for these individuals.

We will therefore facilitate enrollment into Part D for full-benefit dual eligible individuals enrolled in a MA plan that does not offer qualified prescription drug coverage by assigning them to an MA-PD plan with the lowest premium offered by the same MA organization, even if the plan's MA monthly prescription drug beneficiary premium exceeds the low income premium subsidy amount. We will inform them in advance of this assignment. If the beneficiary fails to affirmatively elect an alternative plan or declines enrollment in Part D, she or he will be enrolled into the plan into which she or he has been assigned. In this instance, a beneficiary's silence would be deemed consent to the enrollment choice we are making on their behalf. We note that the right to affirmatively decline in § 423.34(e), on affirmatively declining Part D enrollment, and the Special Enrollment Period in § 423.38(c)(4), apply equally to all full-benefit dual eligibles, whether they are auto-enrolled or have their enrollment facilitated.

In the case of a full-benefit dual eligible for whom we facilitate enrollment into an MA-PD plan with a premium higher than the low-income premium subsidy amount, we acknowledge that this creates a new financial obligation for the enrollee to pay the balance of the monthly MA monthly prescription drug beneficiary premium not covered by the low-income premium subsidy amount. However, this option best preserves informed enrollee choice, is consistent with statutory intent, respects the beneficiary's initial choice to enroll in an MA plan, and ensures continuity of prescription drug coverage. These individuals will have information about other plan choices available and retain their right to a Special Enrollment Period to choose another plan at any time, as provided by section 1861D–1(b)(3) of the Act for PDPs, and section 1851(e)(4)(D) of the Act and section 30.4.4–5 of Chapter 2 of the Medicare Managed Care Manual for MA-PD plans.

Comment: A few commenters generally supported auto-enrolling full-benefit dual eligible individuals into an MA-PD plan, but urged CMS to find a solution that would ensure no additional costs were imposed on beneficiaries. Some of the commenters that supported auto-enrollment into the MA-PD plan with the lowest Part D premium provided suggestions as to how to minimize the financial impact on beneficiaries. A few suggested that for those who are institutionalized, the excess premium should be considered an incurred medical expense and deducted from their monthly share of cost to the facility. For non-institutionalized beneficiaries, in States with State Pharmacy Assistance Programs (SPAPs), SPAPs should be allowed to pay the balance. For full-benefit dual eligible individuals who are medically needy, the balance should be considered an incurred medical expense contributing towards their spend-down. Otherwise, individuals should be counseled about the premium discrepancy and about the right to disenroll from an MA plan and enroll in Original Medicare with a PDP.

Response: We appreciate these suggestions for minimizing the financial impact on beneficiaries. We intend to highlight the impact of our facilitating enrollment into an MA-PD plan with a premium higher than the low-income premium subsidy amount to these beneficiaries and advise them of their ability to switch plans. We note that under Medicaid, whatever portion of the premium the individual pays would be an incurred medical expense, including any portion of the premium that is paid by the SPAP. Since incurred medical expenses are deducted from income when determining patient liability for an institutionalized individual, and are deducted from income for medically needy spend-down purposes, the commenter's suggestions correctly characterize how Medicaid would treat any premium difference paid by the individual. The commenter is also correct in noting that SPAPs will be allowed to pay the balance for their enrollees, but we note this is an option for all enrollees of an SPAP, not just non-institutionalized enrollees. Since these options are already permitted under the regulatory language in the proposed rule, we will not modify the regulation further to specify them.

Comment: One commenter suggested that we permit MA-PD plans to waive the portion of their premium above the low-income premium subsidy amount. The commenter suggested that explicit authorization by CMS would be a contract amendment, not an inducement to a beneficiary to enroll, which would ensure that the waiver of the excess premium does not implicate the Federal anti-kickback rules or be considered disparate treatment.

Response: We appreciate the intent of the commenter's suggestion. However, we are precluded from permitting MA-PD plans to waive a portion of the Part D premium for a subset of their enrollees by section 1854(c) of the Act, which requires uniform premiums for all enrollees of an MA plan.

Comment: A few commenters urged CMS to prohibit auto-enrollment of full-benefit dual eligible individuals into MA-PD plans. Instead, these MA enrollees should be auto-enrolled into a PDP for their Part D benefit. The commenters note that these beneficiaries could always switch to an MA-PD plan.

Response: Section 1861D–1(a)(1)(B)(ii) of the Act specifies that, with limited exceptions, individuals in an MA plan may not also enroll in a PDP. The only exceptions are those enrolled in a MSA plan, or in a MA private fee-for-service plan or cost-based HMO or CMP that does not offer qualified prescription drug coverage, may enroll in a PDP. Thus, auto-enrolling these individuals into a PDP would require us to also disenroll them from their MA plan, which could be inconsistent with our current MA requirements § 422.66(e), which provide that an individual who elects an MA plan is considered to have continued to have made that election until he or she voluntarily changes that election, or the plan is discontinued or no longer serves the service area.

Comment: Finally, one commenter suggested that if no MA-PD plan is available, or if the Part D premium of the available MA-PD plan exceeds the low-income premium subsidy amount, CMS should auto-enroll these beneficiaries into another organization's MA-PD plan whose premium does not exceed the low-income premium subsidy amount.

Response: For the concern that no MA-PD plan would be available, we note that section 1860D–21(a) of the Act requires all MA organizations to offer at least one MA-PD plan.

Involuntarily disenrolling the individual from his or her MA plan, and auto-enrolling him or her into another MA-PD plan offered by another MA organization, is inconsistent with MA requirements at § 422.66(e) described above.

Comment: A few commenters urged expanding Part D auto-enrollment in the

case of full-benefit dual eligible individuals who are in an organization's Medicaid managed care product, but currently receive Part A and B benefits through Original Medicare. Specifically, the commenters recommended that these beneficiaries be auto-enrolled into an MA-PD plan that is offered under common ownership and control of the organization offering the Medicaid managed care plan.

Response: Please refer to responses to comments on § 422.66(d) in Title II of the final regulation for a discussion on this issue.

Comment: A few commenters proposed that, where a full-benefit dual eligible individual in Original Medicare will be auto-enrolled into a PDP that is affiliated with an MA Special Needs Plan, CMS auto-enroll the individual into the MA Special Needs Plan for their Part A and B benefits, as a way to promote better overall coordination of care. To preserve the beneficiary choice, the commenter suggested the regulation provide an opportunity for the individual to ''opt out'' within some specified period of time (for example, 90 days).

Response: The statute prohibits beneficiaries who have Part D coverage through a PDP from getting their Medicare A and B coverage through an MA-only plan. As a result, we decline to make the suggested change.

Comment: One commenter asked CMS to clarify that, if a full-benefit dual eligible individual is auto-enrolled into an MA-PD plan with a premium higher than the low-income premium subsidy amount, that the State Medicaid program would not be obliged to pay the balance on behalf of the beneficiary.

Response: We confirm that the State Medicaid agency has no obligation to pay any Part D premium in excess of the low-income premium subsidy amount. Further, section 1905(a) of the Act, which provides Federal medical assistance for Medicare cost-sharing (as defined in section 1905(p)(3)(A) of the Act), does not include Part D premiums.

Comment: A few commenters recommended that we consider establishing a process for automatically enrolling or at least facilitating the enrollment into Part D plans all individuals deemed eligible for the full low-income subsidy. In effect, this would expand auto-enrollment to individuals in Medicare Savings Programs. These are individuals for whom State Medicaid agencies pay for Medicare cost sharing, but who are not eligible for comprehensive Medicaid benefits and thus are not considered full-benefit dual eligible individuals. They include QMB, SLMB, and QI1. To the extent that we accept this recommendation, the commenters suggested we also broaden the SEP provision to cover any full subsidy eligible individual who is auto-enrolled in a Part D Plan.

A few commenters advocated expanding auto-enrollment even further to all those who receive the low-income subsidy. This would include not only those deemed eligible for the subsidy, but also those who have to apply and be determined eligible. Auto-enrollment would ensure that these individuals are not subject to a late enrollment penalty.

Response: We agree that there are compelling reasons to promote Part D enrollment of all individuals deemed or determined eligible for the low-income subsidy. These individuals typically are less healthy and often face barriers to care. Effective medication management and prescription drug coverage can lead to reduced inpatient hospital expenditures, making it more cost-effective to provide drug coverage.

Facilitating enrollment into Part D would promote access to drug coverage for these beneficiaries by ensuring that they have drug coverage starting in 2006, while also preserving the voluntary nature of enrollment in Part D. Doing so would also ensure that beneficiaries with limited means would not be liable for a late enrollment penalty for failing to enroll in Part D when first eligible.

We intend to pursue many steps to assist beneficiaries, particularly low-income beneficiaries, in taking advantage of the new Medicare drug coverage. Such steps could include facilitating enrollment into Part D for those beneficiaries. We will provide details in operational guidance to be issued shortly after the publication of the final regulation, including details on the population for whom we will facilitate enrollment. By facilitating enrollment, we mean giving beneficiaries an opportunity to choose a Part D plan first; if they do not choose, we would notify them that we intend to facilitate their enrollment into a specific plan prospectively. If the beneficiary fails to affirmatively elect an alternative plan or declines enrollment in Part D by a given date, she or he would be enrolled into the plan into which she or he has been assigned. In this instance, a beneficiary's silence would be deemed consent to the enrollment choice we are making on their behalf. If we facilitate enrollment in this manner, we would likely follow rules for assigning beneficiaries to Part D plans similar to those for the auto-enrollment and facilitated enrollment process for full-benefit dual eligibles: MA enrollees would be enrolled into an MA-PD plan with the lowest Part D premium; Original Medicare beneficiaries would be enrolled in a PDP with a Part D premium that does not exceed the low-income premium subsidy amount, and, if there is more than one such PDP available, the individual would be randomly enrolled into one of the plans available. In establishing a process for this facilitated enrollment, we would rely upon discretion afforded the Secretary under section 1860D–1(b)(1)(A) of the Act to establish enrollment processes for Part D eligible individuals. Similarly, we would extend some of the same protections afforded the full-benefit dual eligible population who are auto-enrolled to those whose enrollment we facilitate. These protections would include a Special Enrollment Period, the right to affirmatively decline Part D enrollment, and where possible, facilitating enrollment into plans whose premiums do not exceed the low-income premium subsidy amount.

Comment: One commenter suggested expanding auto-enrollment to PACE enrollees, that is, CMS auto-enroll them into their PACE organization for purposes of Part D coverage effective January 1, 2006, unless the PACE enrollee makes another enrollment choice. PACE organizations would provide their enrollees an opportunity to opt out of enrollment in Part D (and, as a result, out of the PACE organization).

Response: We agree that PACE enrollees should not be required to take any additional steps to obtain their Part D benefit through their PACE organization. Individuals who enroll in a PACE organization elect to get all their Medicaid (if eligible for Medicaid) and Medicare benefits through the PACE organization. As noted in response to a similar comment on § 423.32 of the final regulation, we will modify the final regulation to deem individuals enrolled in a PACE organization as of December 31, 2005 to be enrolled with that PACE organization for their Part D benefit as of January 1, 2006. This precludes the need to expand auto-enrollment to PACE enrollees, so we decline to make that change.

Comment: One commenter noted that no provision was made for auto-enrollment of full-benefit dual eligible individuals enrolled in Medicare cost-based HMO or CMPs. The commenter suggested that for full-benefit dual eligible individuals enrolled in a cost-based HMO or CMP, CMS auto-enroll these individuals into the cost-based HMO or CMP for Part D benefits if the cost-based HMO or CMP offers Part D,

even if the Part D premium is higher than the low-income premium subsidy amount. If the cost-based HMO or CMP does not offer Part D benefits, the commenter recommends auto-enrolling the beneficiary into a PDP.

Response: We agree that we should ensure that full-benefit dual eligible individuals, and potentially others eligible for the low-income subsidy who are enrollees of a cost-based HMO or CMP obtain Part D benefits. As noted in response to a similar comment on § 423.32 of the final regulation, we will modify the final regulation to specify that all individuals enrolled in a cost-based HMO or CMP that offers any prescription drug coverage as of December 31, 2005, will be deemed to be enrolled in the cost-based HMO or CMP for Part D benefits as of January 1, 2006, if the cost-based HMO or CMP opts to provide Part D benefits, and regardless of whether the Part D premium exceeds the low-income subsidy amount.

We believe the same legal concerns noted above for auto-enrolling full-benefit dual eligible individuals into MA-PD plans arise for auto-enrolling them into a cost plan HMO or CMP. As a result, we decline to expand auto-enrollment a suggested by this commenter. Instead, we will use a facilitated enrollment process discussed above to accomplish substantially the same end. We will facilitate the enrollment of full-benefit dual eligible individuals enrolled in a cost plan HMO or CMP that offers Part D benefits and who fail to enroll in a Part D plan into the Part D benefits offered by their cost plan HMO or CMP. If the cost plan HMO or CMP does not offer Part D benefits, the individual will be enrolled in a PDP. We may similarly facilitate the enrollment of other cost plan enrollees eligible for the low-income subsidy who fail to elect a Part D plan into the Part D benefit offered by their cost plans.

Comment: One commenter requested clarification as to whether auto-enrollment into a PDP will only occur for Medicare beneficiaries who receive comprehensive health care benefits (full hospital and physician services) from both Medicare and Medicaid, or whether auto-enrollment also applies to Medicare beneficiaries that receive pharmacy-only benefits through Medicaid.

Response: The final rule will limit auto-enrollment to only those dual eligible individuals who receive comprehensive health benefits from both Medicare and Medicaid. As noted above, we may facilitate enrollment of all others deemed or determined eligible for the low-income subsidy into Part D plans. To the extent that a Medicare beneficiary with pharmacy-only Medicaid benefits is in the population whose enrollment we facilitate, we would facilitate that individual's enrollment into a Part D plan.

Comment: One commenter recommended that we explore auto-enrolling residents of long term care facilities who are not full-benefit dual eligible individuals, and permitting these beneficiaries to disenroll or choose another Part D plan. The commenter was especially concerned about residents who lack the cognitive capacity to select a PDP and who do not have a designated surrogate decision-maker in place.

Response: Generally, enrollment in Part D is voluntary. Section 1860D–1(b)(1)(C) of the Act provides for auto-enrollment of full-benefit dual eligible individuals. As noted above, we may facilitate enrollment of others deemed or otherwise determined eligible for the low-income subsidy into Part D plans. To the extent that a resident of a long term care facility is in the population whose enrollment we facilitate, we would facilitate that individual's enrollment into a Part D plan.

Since the Act limits auto-enrollment to full-benefit dual eligible individuals, we decline to auto-enroll long-term care residents who do not receive the low-income subsidy. While we acknowledge that access to prescription drug coverage is critical for this population, we believe they generally have the resources and support to make timely enrollment decisions. We will, however, continue to explore options regarding enrollment for all individuals in long-term care facilities.

Comment: A number of commenters urged CMS to permit SPAPs to act as authorized representatives and enroll some or all of the beneficiaries they serve into the SPAP's preferred PDP. These beneficiaries should be permitted to decline enrollment in the SPAP's preferred PDP or to change to another Part D plan.

Response: With regard to the issue of authorized representatives, we defer to State law, as discussed in response to comments on § 423.32. However, it is important to note that SPAPs that act as the authorized representative for the individual must also comply with the nondiscrimination provisions at § 423.464(e). Please see responses to related comments in subpart J.

Comment: One commenter noted that it appears that a full-benefit dual eligible individual cannot enroll in an MA-PD plan if the individual is not already an MA enrollee. The commenter urged that MA-PD plans that bid at or below the low-income premium subsidy amount should be an enrollment option for all full-benefit dual eligible individuals.

Response: During the Part D initial enrollment period that starts November 15, 2005, full-benefit dual eligible individuals who are in Original Medicare are free to change to an MA-PD plan. Further, we have established in our operational guidance a Special Enrollment Period (SEP) that permits full-benefit dual eligible individuals to enroll in and disenroll from an MA plan at any time, and will extend this SEP to MA-PD plans. This will ensure that MA-PD plans are an option for all full-benefit dual eligible individuals.

As indicated previously, any individual enrolled in a PACE organization as of December 31, 2005 will be deemed to be enrolled with that organization for their Part D benefit as of January 1, 2006.

The chart below provides a summary of the enrollment rules for all beneficiaries, including those with and without the low-income subsidy, in accordance with § 423.32, § 423.34, and § 422.66.

Population	Enrollment Rules
General Medicare Population	(1) A beneficiary who chooses to enroll a Part D plan must do so as follows: Original Medicare ➜ Original Medicare with separate PDP MA Plan without drug coverage ➜ MA-PD plan Medical Savings Account (MSA) Plan ➜ MSA with separate PDP PFFS with Part D ➜ PFFS with Part D Private Fee-For-Service Plan (PFFS) without Part D ➜ PFFS with separate PDP Cost Plan with Part D ➜ Cost plan Part D or cost plan with separate PDP

Population	Enrollment Rules
	Cost Plan without Part D ➜ Cost Plan with separate PDP (2) A beneficiary enrolled in an entity that offers any drug coverage in 2005, CMS deems him or her enrolled as follows* : MA Plan ➜ MA-PD Plan Cost Plan ➜ Cost Plan with Part D PACE Organization ➜ PACE Organization (3) On a case-by-case basis, CMS may allow an MA organization to process ''seamless'' enrollments into the organization's MA-PD plan if individuals are enrolled in a health plan offered by that MA organization that includes prescription drug coverage upon their entitlement to Medicare.
Full-Benefit Dual Eligible Beneficiaries	(1) A beneficiary who chooses to enroll in a Part D Plan follows the same rules as above; otherwise CMS auto-enrolls or facilitates enrollment for him or her as follows: Original Medicare ➜ PDP MSA Plan ➜ PDP PFFS Plan without Part D ➜ PDP Cost Plan with Part D ➜ Cost plan with Part D Cost Plan without Part D ➜ PDP MA-Only Plan ➜ MA-PD Plan (2) For a beneficiary enrolled in an entity that offers any drug coverage in 2005, CMS deems him or her enrolled as follows: MA Plan ➜ MA-PD Plan Cost Plan ➜ Cost Plan with Part D PACE Organization ➜ PACE Organization (3) On a case-by-case basis, CMS may allow an MA organization to process ''seamless'' enrollments into the organization's MA-PD plan if individuals are enrolled in a health plan offered by that MA organization that includes prescription drug coverage upon their entitlement to Medicare.
* Those in an MA Plan without any drug coverage in 2005 will not be deemed into an MA-PD plan, but instead must actively choose one if they want Part D benefits. ** We may facilitate enrollment for other beneficiaries eligible for the low income subsidy; if so, we would likely follow these same rules. For additional detail, please see discussion on: § 423.32—Beneficiary's choice § 422.66(d)(5)—''Seamless'' enrollment on case-by-case basis § 422.66(e)(2)–(3)—Deemed enrollment in 2005 § 423.34—Auto-enrollment and facilitated enrollment	

4. Disenrollment process (§ 423.36)

Section 1860D–1(b)(1)(A) of the Act authorizes us to establish a process to allow disenrollment from prescription drug plans. In the proposed rule, we outlined the rules for a Part D eligible individual who wishes to change or discontinue an enrollment during applicable enrollment periods, including filing a disenrollment with the PDP directly or enrolling in another PDP.

While we initially envision a paper disenrollment process, we retain the flexibility for other secure and convenient mechanisms that we may approve in the future. Any such mechanism will be available at the option of each PDP sponsor. We believe it is important to clarify that, as other mechanisms are approved and implemented, we will require all PDPs offer a minimum standard process, which at this time would be a paper process, along with any optional election mechanism available to prospective enrollees and plan members in conjunction with the paper process. In the future, as technology evolves, another process may be a more appropriate minimum standard. Except as provided below, the final rule adopts the disenrollment rules set forth at § 423.42 of the proposed rule.

Comment: One commenter asked that we clarify whether an enrollment in a different PDP would automatically disenroll the beneficiary from his or her previous PDP effective the first day of enrollment in a new PDP and asked who is responsible for that notification.

Response: We envision creating a process similar to that created for the MA program, under which an individual who is eligible to enroll in another PDP will automatically be disenrolled from the previous PDP upon enrollment in the new PDP. The PDP to which the individual submits an enrollment is required to provide a notice of acceptance or denial, as provided in § 423.32(d). We will notify the previous PDP of the disenrollment and that PDP will inform the individual that he or she has been disenrolled. As for the specifics of the notice requirements, we will issue guidance to PDPs following the publication of this rule.

Comment: One commenter requested that we clarify in the regulations that proper beneficiary protections for retroactive disenrollments are in place for beneficiary requests that are made but not properly acted upon.

Response: We will treat an individual's request for disenrollment that was made but not properly acted upon as if the disenrollment had properly occurred. We will provide guidance to PDPs as to how to handle the processing of such requests, including proper notification to the beneficiary.

Comment: One commenter asked CMS to address the issue for those retirees who enroll in both a PDP and the employer sponsored plan due to their confusion over the variety of new coverage options. The commenter indicated that this not only results in duplicative coverage and unnecessary premium costs. In addition, the commenter was concerned because

many retirees may not be aware that a consequence of enrolling in Part D may be the discontinuation of their employer group benefits, often permanently prevented from ever being able to rejoin the group once he or she enrolls in other coverage, such as Part D. One commenter requested that we allow for retroactive disenrollment from Part D and refund of the Part D premiums for these retirees who enrolled by mistake into a PDP.

Response: We recognize that during the initial enrollment period that some retirees may be confused about how their employer-based coverage may coordinate with Part D coverage. While we feel that establishing a retroactive disenrollment process specifically for this reason would generally be inappropriate, we can establish a process in which we would work with employer group sponsors, PDPs and MA-PDs to educate beneficiaries prior to open enrollment and at the time of enrollment. In addition, we intend to establish a process for the PDPs and MA-PDs to verify an enrollment request for those individuals who have been identified to CMS as having been claimed by an employer group sponsor to receive the employer based subsidy. We will also include information in beneficiary education and enrollment materials targeted to those individuals who already have other prescription drug coverage to provide assistance in determining whether enrollment in Part D would be appropriate for that individual. We will issue operational guidance on this process shortly following publication of the final rule.

5. Part D Enrollment Periods (§ 423.38)

In the proposed rule, as directed by the MMA, we established three coverage enrollment periods: (1) the initial enrollment period (IEP); (2) the annual coordinated election period (AEP); and (3) SEPs. Generally, in accordance with section 1860D–1(b)(2)(B) of the Act, the IEP for Part D is the same as the initial enrollment period established for Part B. In addition, as part of the implementation of the Part D program, and in accordance with section 1860D–1(b)(2)(A) of the Act, we have established an initial enrollment period for Part D from November 15, 2005 until May 15, 2006 for those individuals who are already eligible to enroll in a Part D plan as of November 15, 2005.

In accordance with section 1860D–1(b)(1)(B)(iii) of the Act, the AEP for Part D is concurrent with the annual coordinated election period for the MA program under section 1851(e)(3) of the Act. It is during this annual period in which all PDP plans must open enrollment to Medicare beneficiaries. For coverage beginning in 2006, the annual coordinated election period begins on November 15, 2005 and ends on May 15, 2006. As a result, the initial enrollment period for individuals who are eligible to enroll in a Part D plan as of November 15, 2005 and the annual coordinated election period will run concurrently during this time frame. In accordance with section 1851(e)(3)(B)(iv) of the Act, § 423.36(b)(2) of our proposed rule provides that, for 2007 and subsequent years, the annual coordinated election period will be November 15 through December 31 for coverage beginning on January 1 of the following year.

The MMA also establishes SEPs. SEPs allow an individual to disenroll from one PDP and enroll in another PDP. Similarly, the SEP rules that will apply for individuals in an MA-PD plan will be provided under § 422.62(b). We will include in regulation those SEPs that have been specifically named in the statute. Those SEPs established for exceptional circumstances for PDPs and MA-PDs, as authorized by section 1860D–1(b)(3)(C) of the Act and section 1851(e)(4) for MA-PDs of the Act, respectively, will be provided in our manual instructions. The final rule adopts the enrollment periods as proposed.

Comment: We received several comments regarding SEPs. Several commenters supported the SEPs for exceptional conditions we proposed to provide through manual guidance. Specifically, these include certain SEPs already established in the MA program for circumstances where a plan terminates its contract or the individual changes his or her permanent residence. These commenters also supported an SEP to enroll in a PDP for individuals disenrolling from an MA-PD plan during the MA Open Enrollment Period, and for institutionalized individuals. Other commenters suggested we establish various other SEPs, including the following:

- A subsidy-eligible individual who leaves private prescription drug coverage for any reason, including his or her inability to pay;
- A change in a person's health status that makes a current plan choice no longer suitable to his or her needs;
- Individuals eligible for the low-income subsidy, other than full benefit dual eligible individuals;
- If there are substantial changes to the plan's formulary;
- Individuals with ''life-threatening situations;''
- Individuals whose situations are pharmacologically complex;
- All individuals for the first 18 months of the program as it may be a confusing time;
- All beneficiaries leaving MA plans throughout the year so that they can enroll in a PDP;
- Medicare-eligible retirees whose plan sponsor changes their retiree drug coverage so that it no longer meets the criteria for creditable coverage;
- Individuals enrolled in, or desiring to enroll in PACE, as the PACE program has continuous enrollment and disenrollment; and
- Full benefit dual eligibles at any time, including every time a PDP changes its plan in a way that directly effects these individuals, such as removing a drug from its formulary, changing the co-payment tier for a drug, or denying their appeal concerning a non-formulary drug or an effort to change the co-payment tier.

Response: We appreciate this feedback. As previously mentioned, we have historically included in regulation only those SEPs that have been specifically named in the statute. The SEPs explicitly provided for in statute include an SEP for full-benefit dual eligible individuals, individuals who permanently change their residence so that they no longer reside in their PDP's service area, and individuals enrolled in a PDP whose contract is terminated.

We will issue guidance regarding the above SEPs and other additional SEPs that we choose to establish following publication of the regulation. We intend to establish in this guidance an SEP for those individuals eligible for the low-income subsidy whose enrollment into a Part D plan will be facilitated, individuals in long-term care facilities, individuals enrolled in, or desiring to enroll, in PACE and individuals enrolled in employer group health plans. However, we decline to establish SEPs for other reasons included in the comments described above, because we do not view these circumstances as exceptional. However, we retain the right to establish additional SEPs in the future and will do so in our operational guidance. Furthermore, we may establish SEPs on a case-by-case basis, where warranted by an immediate exceptional circumstance, such as an individual with a life-threatening condition or illness. For the commenter's request that we provide an SEP for the first 18 months of the program, we do not believe that such an SEP is warranted in the circumstances. First, we are committed to ensuring all beneficiaries have adequate information to make informed choices about participating in the Part D program. Second, the statute provides for an

extended AEP and provides a concurrent IEP at the beginning of this program. These extended enrollment periods, in conjunction with the planned education and information campaigns, will provide all beneficiaries with adequate time and information to make an enrollment decision. Therefore, we do not believe that such an SEP is warranted.

Comment: A few commenters recommended that we should provide a SEP to permit those individuals who will receive the low-income subsidy under subpart P but who are not full-benefit dual eligible individuals to change to a plan of their choosing.

Response: We strongly agree that we should permit those individuals who are enrolled or whose enrollment is facilitated by CMS the opportunity to change to a plan of their choosing. Since we are generally limiting in regulation those SEPs specified in statute, we will provide for this SEP in operational guidance.

Comment: One commenter recommends that we change the provision of an SEP for the involuntary loss of creditable coverage to include individuals who lose such coverage due to failure to pay premiums. The commenter believes the provision as proposed is too restrictive and should be modified.

Response: Section 1860D–1(b)(3)(A)(iii) of the Act is clear that disenrollments for failure to pay premiums will be considered a voluntary disenrollment action. We therefore do not believe it appropriate to treat this disenrollment as an exceptional circumstance justifying an SEP.

Comment: One commenter asked if MA-PD plans are required to participate in the AEP.

Response: The MA enrollment periods are discussed in the MA regulations at § 422.62. The AEP applies to both PDP and MA-PD plans.

Comment: One commenter requested clarification of how many times an individual may use an SEP to enroll in a PDP and encouraged CMS to limit the number of times an SEP may be used to enroll.

Response: The duration and applicability of an SEP is specific to each SEP and may vary from one specific circumstance to another. For example, an SEP in the MA program for individuals affected by a plan termination is specific to the circumstances surrounding that specific action and limited in duration. Other SEPs apply more generally to individuals, for example, full-benefit dual eligible dual individuals. We will provide detailed guidance concerning each SEP following the publication of this rule.

Comment: One commenter requested clarification of proposed § 423.36(c)(3) regarding the SEP for individuals whose enrollment or nonenrollment in Part D is caused by an error of a Federal employee or any person authorized by the Federal government to act on its behalf. The commenter suggests that we include all sponsors of Part D plans as ''persons authorized by the Federal Government to act on its behalf.''

Response: We have interpreted this statutorily required SEP to apply to Federal government employees, staff, and contractors hired by the Federal government to perform government duties. We would not consider Part D plans to be performing enrollment functions as a subcontractor on the behalf of CMS; rather, Part D plans must perform certain enrollment functions as requirement of their direct contract with CMS. While it is unlikely that an SEP would be necessary, we will correct any errors made by the plan and not hold the individual liable for the plan's mistake. Thus, we may allow an SEP in individual situations, if appropriate.

Comment: One commenter asked if SEP enrollment in a PDP could be retroactive in order to maintain continuity of care.

Response: An SEP enrollment in a PDP will generally be prospective. We establish the effective date for SEPs and can accommodate unusual circumstances on a case-by-case basis.

Comment: One commenter suggested that we establish an SEP with no late enrollment penalty if a Medigap issuer or other entity fails to provide adequate or accurate notice of whether such coverage is creditable.

Response: Section 423.38(c)(2) of the final rule establishes an SEP for all individuals who are not adequately informed when their creditable prescription drug coverage is lost or changes so that it is no longer creditable prescription drug coverage or that the individual never had such creditable coverage. We believe that these provisions adequately protect an individual who does not receive the required notice from a Medigap issuer or other entity. Regarding the late enrollment penalty, the provision of an SEP is not directly related to, nor does it have a direct effect upon, the imposition of applicable late enrollment penalties. The late enrollment penalty is discussed in more detail at § 423.46 and its relationship to creditable prescription drug coverage is discussed at § 423.56. Specifically, at § 423.56(g) of the final rule we describe the available remedy for an individual who was not adequately informed that their prescription drug coverage is not creditable.

Comment: One commenter believed the enrollment process should ensure that residents of a long-term care facility are enrolled in a PDP that provides access to the pharmacy located in the long-term care facility.

Response: We understand the issue raised by the commenter. Individuals who are in a long-term care facility will be given an SEP to ensure they can choose the PDP that is appropriate for their situation. This will be clarified in guidance following publication of this rule.

6. Effective Dates of Coverage and Change of Coverage (§ 423.40)

Section 1860D–1(b)(1)(B)(iv) of the Act directs us to apply the effective date requirements provided under the MA program at section 1851(f) of the Act. As described above, the three enrollment periods provided under Part D are the IEP, the AEP, and SEP. In the proposed rule, we established the following effective dates for these enrollment periods:

a. Initial Enrollment Period

In accordance with section 1851(f)(1) of the Act, as incorporated into Part D under section 1860D–1(b)(1)(B)(iv) of the Act, an enrollment made during the initial enrollment period will generally be effective the first day of the calendar month following the month in which the individual enrolled in Part D. An enrollment made prior to the month of entitlement to Part A or enrollment in Part B is effective the first day of the month the individual is entitled to Part A or enrolled in Part B. Since the Part D provisions are not effective until January 1, 2006, we clarified that in no case may enrollment in Part D be effective prior to this date. We also clarified that initial enrollments made between November 15 and December 31, 2005 will be effective January 1, 2006. An enrollment made during or after the month of entitlement to Part A or enrollment in Part B is effective the first day of the calendar month following the month in which the enrollment in Part D is made.

b. Annual Coordinated Election Period

In accordance with section 1851(f)(3) of the Act, as incorporated into Part D under section 1860D–1(b)(1)(B)(iv) of the Act, an enrollment made during the annual coordinated election period is effective as of the first day of the following calendar year, that is, January 1st. One exception to this rule occurs during 2006 in the special annual coordinated election period in 2006, in

which elections made between January 1, 2006 though May 15, 2006 will be effective the first day of the calendar month following the month in which the enrollment in Part D is made.

c. Special Enrollment Period

A SEP is effective in a manner that we determine to ensure continuity of health benefits coverage.

The final rule adopts the effective dates as proposed.

Comment: Three commenters suggested that we specify a distinct effective date for the SEPs in the final rule (as described in § 423.38(c) of the proposed rule) to ensure adequate consumer protection. Two commenters suggested adding: ''but no later than the first day of the second calendar month following the month of the request for the enrollment change'' to the end of this section. The third commenter suggested we add: ''changes made before the 20th of the month are effective the first day of the second month following'' the change.

Response: We have outlined the specific effective date requirements for SEPs granted in the MA program in operational guidance and will follow the same process for the Part D program. We believe that in so doing, we retain our ability to react quickly to changes or unforeseen circumstances.

7. Involuntary Disenrollment by the PDP (§ 423.44)

Section 1860D–1(b)(1)(B) of the Act generally directs us to use disenrollment rules similar to those established under section 1851 of the Act. The proposed disenrollment provisions for PDPs were outlined in § 423.44 of our proposed rule, including the basis for disenrollment—both optional and required—and guidance for notice requirements.

Specifically, we proposed at § 423.44(b)(2) that a PDP is required to disenroll an individual who dies, no longer resides in the PDP's service area, loses entitlement or enrollment to Medicare benefits under Part A and is no longer enrolled in Part B, or knowingly misrepresents to the PDP that he or she has received or expects to receive reimbursement for covered Part D drugs through other third-party coverage. The proposed rule also required a PDP to disenroll an individual if the PDP sponsor's contract is terminating.

In addition to providing requirements for mandatory disenrollments, we also provided under § 423.44(d) of our proposed rule that PDPs may disenroll individuals who do not pay monthly premiums or whose behavior is disruptive, consistent with section 1860D–1(b)(1)(B)(v) of the Act.

As with the MA program, PDP sponsors will be required in the final rule to provide proper notice to the beneficiary, as outlined at proposed § 423.44(c), and afford him or her due process in accordance with the procedures outlined in our operational instructions prior to disenrolling the individual. For example, a PDP that wishes to disenroll a beneficiary for disruptive behavior must receive our prior approval and demonstrate to our satisfaction that it has made a good faith effort to resolve the issue prior to requesting the disenrollment. We will review these requests on a case-by-case basis, taking into account all of the facts and circumstances of a particular case, prior to making its decision. PDP sponsors must apply their policies for optional disenrollment for failure to pay premiums and disruptive behavior consistently among individuals enrolled in their plans, unless we permit otherwise, and must do so consistent with applicable laws regarding discrimination on the basis of disability.

Except as otherwise provided below, the final rule adopts the involuntary disenrollment rules set forth in § 423.44 of the proposed rule.

Comment: Several commenters urged CMS to establish a process for individuals to appeal disenrollment decisions. Several commenters believed that individuals should have access to an outside independent review process, especially if these individuals are disenrolled without an SEP. Another commenter stated that involuntary disenrollments must be heavily scrutinized and an appeal right be available on an expedited basis.

Response: As we discussed under a previous comment regarding appeals for enrollment denials, we do not believe that a formal appeals process is necessary. Instead, we intend to address beneficiary complaints regarding disenrollment in a manner addressed under the MA program. Under the MA program, MA plans are required to follow a specific process, which includes notice of potential disenrollment if the individual does not address situation. We currently provide assistance to MA organizations to handle beneficiary inquiries and complaints regarding disenrollment through staff assigned to each MA organization. We envision a similar process being established under the PDP program.

Comment: Several commenters pointed out an error in the numbering of the regulatory text for disruptive behavior at proposed § 423.44(b)(1).

Response: We concur and have corrected the numbering.

Comment: A commenter requested that we clearly define how long an individual would need to reside out of the PDP service area before we would consider the individual as no longer residing in the service area. One commenter did not think that it was reasonable to apply a 6-month time limit to PDPs; PDPs should not be required to disenroll individuals if the PDP can provide individuals access to benefits out of the service area through a PDP in another region, or the PDP's network of pharmacies in other regions, or mail order pharmacies. One commenter believed the decision should be left to the individual as to when he or she has permanently moved out of the PDP service area. A few commenters did not believe that a person's residency should be a factor in a plan's basis for disenrollment. Another commenter stated that a PDP should not be required to disenroll an individual if the PDP meets licensure requirements in the State where the individual has moved and the PDP has a national pharmacy network in place. Another commenter suggested that PDP maintain members if they are an established sponsor and meet certain network adequacy requirements in the region in which the beneficiary moves.

Response: We agree that disenrolling a beneficiary after being temporarily out of the service area for a certain period of time may be less appropriate for PDPs than in the MA program. The MMA directs us to use rules similar to (and coordinated with) the MA residency requirements at section 1851(b)(1)(A) of the Act, which provides that an individual may elect an MA plan only if the plan serves the geographic area in which the individual resides, except as the Secretary may otherwise provide. However, the MA regulation at § 422.74(d)(4) generally provides for disenrollment of an individual if that individual is out of the service area, even temporarily, for 6 months, unless the MA organization offers visitor or traveler benefits that provide for benefits while outside of the service area. We believe that the nature of the prescription drug benefit and the ability for many individuals to access the benefit through mail order or chain drug stores provide greater flexibility in accessing the prescription drug benefit while temporarily being out of the PDP's service area. However, while an individual has greater flexibility to be temporarily outside the service area and still access the PDP benefit, we maintain that the individual must maintain his or her permanent residence within the

PDP's service area to be a member of the PDP. If the PDP learns of a change in the individual's permanent address, the PDP would initiate the disenrollment process. It is, however, an individual's responsibility to notify the PDP if the individual permanently moves out of the service area. We will provide further guidance to PDPs on the process of disenrollment when an individual permanently moves out of the service area following publication of this rule.

Comment: One commenter asked how a PDP will learn of loss of entitlement to Part A or Part B.

Response: We will notify the PDPs of the loss of Part A or B benefits. We will issue detailed operational guidance for PDPs prior to 2006.

Comment: A few commenters requested that we further clarify the provision that an individual who ''knowingly misrepresents to the PDP that he or she has received or expects to receive reimbursement for covered Part D drugs through other third party coverage'' (that is, whether his or her costs are expected to be reimbursed through insurance or otherwise, such as a group health plan) must be disenrolled. These commenters also asked how ''knowingly'' will be determined and what entity would be responsible for investigating such a case. One commenter indicated that a beneficiary should not be penalized for unintended errors or inadvertent omissions, and that many beneficiaries will be confused at the outset about their PDP coverage and how it may coordinate with other insurance.

Response: Section 1860D–2(b)(4)(D)(ii) of the Act provides that ''material misrepresentation'' by an individual as to whether his or her costs are expected to be reimbursed through insurance or otherwise (through a group health plan or other third party payment arrangement) shall be grounds for termination by the PDP. Since section 1860D–2(b)(4)(D)(ii) of the Act also provides that a PDP sponsor may periodically ask Part D eligible individuals about such reimbursement, the statute establishes a penalty for an individual who ''materially'' misrepresents such information. This provision is not intended to disenroll individuals who simply make an error, but instead apply to those individuals who knowingly provide such false information. We would be responsible for reviewing and issuing the final decision on such a case. We plan to issue further guidance on this for PDPs prior to 2006.

Comment: We received several comments on the disenrollment for nonpayment of premium provision, both supporting and opposing inclusion of such a process. Several commenters requested that we clarify the details of disenrollment for nonpayment of premium, including what we view as ''reasonable efforts'' to collect the premium. Several commenters recommended providing a minimum grace period for repayment before permitting disenrollment. One commenter requested that we waive payment of past premiums for full-benefit dual eligible individuals or low-income subsidy individuals. Some commenters believe that it is inappropriate for us to disenroll any individual from Part D for nonpayment of premium. One commenter stated that individuals enrolled in a PACE plan should not be subject to the disenrollment requirements under § 423.44 of the proposed rule.

Response: Section 1860D–1(b)(1)(B)(v) of the Act specifically directs us to apply rules to PDPs that are similar to (and coordinated with) the MA provisions at section 1851(g) of the Act related to disenrollment for nonpayment of premium. While some commenters objected to disenrollment by the PDP on those grounds, we note that such disenrollment is at the PDP sponsor's option and PDP sponsors therefore have the ability to apply this rule to their plan enrollees. In contrast, under Part B, individuals who fail to pay their Part B supplementary medical insurance premiums must be disenrolled from Part B. While we do not review and approve such disenrollments, we maintain that if a PDP chooses the option to disenroll a beneficiary for nonpayment of the premium, we would require that the PDP apply this policy consistently, as we direct, amongst all its members and could not ''waive'' the premium for a certain group of its members. As indicated in the preamble of subpart T of this rule, we will issue additional guidelines that will include a comprehensive listing of Part D waivers applicable to PACE organizations. However, we agree that PACE organizations should not be subject to the disenrollment requirements of § 423.44 as they are duplicative of the PACE disenrollment requirements associated with § 460.164 of the PACE regulation.

Comment: Several commenters recommended that we permit plans to deny reinstatement following disenrollment for failure to pay premiums unless the enrollee pays the outstanding amount that is due. Other commenters stated that PDP should not be required, under any circumstance, to re-enroll individuals who are disenrolled for nonpayment of the premium.

Response: We have provided in the final regulation at § 423.44(d)(1)(iii) that a PDP may decline future enrollment to individuals who have been disenrolled for failure to pay premiums until past due premiums are paid to the PDP. However, we would not allow a PDP to prohibit an individual from enrolling in its plan if the individual has paid all past due premiums to the PDP.

Comment: We received a substantial number of comments on proposed § 423.44(d)(2) to allow PDP sponsors to disenroll individuals who exhibit disruptive behavior.

One commenter supported the definition established in the proposed rule, while several commenters supported the due process safeguards afforded by our approval of disenrollment requests. Two commenters suggested that we provide guidance to PDP sponsors on the symptoms of mental illness and dementia and other personality disorders to distinguish between disruptive behavior and behavior resulting from a medical condition. There were other commenters who asked us to clearly define the terms and requirements for disenrolling a beneficiary for disruptive behavior. These commenters recommended that we include in the final rule such requirements as documentation of a PDP sponsor's effort to provide a reasonable accommodation for individuals with disabilities and sufficient notice of the sponsor's actions during the course of the disenrollment process.

Numerous commenters expressed concern that the proposed definition of disruptive behavior does not adequately protect individuals whose behavior is induced by disability, mental illness, cognitive impairment, or certain prescribed drugs and who rely on prescription drug therapy to stabilize their behavior. Some commenters recommended that we prohibit PDP sponsors from disenrolling certain populations for disruptive behavior, explaining that State Medicaid programs will not be able to claim Federal matching funds for prescription drugs spending on behalf of full-benefit dual eligibles who have been disenrolled by a PDP sponsor. Other commenters suggested that we develop more stringent criteria for PDP sponsors requesting to disenroll a full-benefit dual eligible individual. Several commenters stated that, in cases where an individual is unstable, disruptive behavior could be related to unsuccessful attempts to find the proper medication. There were also a number

of commenters who asserted that we lacked statutory authority to permit PDPs sponsors to disenroll individuals for disruptive behavior. Two commenters questioned the appropriateness of applying a policy of involuntary disenrollment for disruptive behavior to PDPs. One commenter suggested that we allow an individual who is disruptive to designate an authorized representative to access services on his or her behalf.

Response: In the final rule, we aim to strike a balance between allowing PDP sponsors to disenroll individuals who exhibit disruptive behavior and creating adequate protections for individuals who face involuntary disenrollment from a PDP. In accordance with the statute (at section 1860D–1(b)(1)(B)(v) of the Act), we must establish a process that is similar to and coordinated with the process under the MA program that permits MA organizations to disenroll an individual for disruptive behavior. At the same time, we recognize the impact of such a disenrollment on an individual's ability to access prescription drug coverage under the Medicare program, and the need for adequate safeguards for individuals whose disruptive behavior is due to mental illness or a medical condition. Continuity of care for these individuals is essential, especially if they are taking prescription medications that can minimize the debilitating impact of their illness and restore their functioning.

Therefore, in revising our proposed definition of disruptive behavior in § 423.44(d)(2)(i) of the final rule, we focus on behavior that substantially impairs a PDP sponsor's ability to arrange or provide care for the individual or other plan members. Behavior that is related to the use of medical services or compliance (or non-compliance) with medical advice is not disruptive behavior.

We also agree with commenters that arranging or providing care for individuals with mental illness, cognitive impairments such as Alzheimer's disease or other dementias, and medical conditions and treatments that may cause disruptive behavior warrant special consideration, and therefore revise § 423.44(d)(2)(v) to require PDP sponsors to provide a reasonable accommodation to individuals in such exceptional circumstances that we deem necessary. Such accommodation is intended to ensure that the individual can maintain Medicare prescription drug coverage and may include granting an individual a SEP to choose another plan, or requiring the plan to continue the individual's enrollment until the Annual Coordinated Election Period, when the individual has an opportunity to enroll in another plan. We will determine the type of accommodation necessary after a case-by-case review of the needs of all parties involved. This review will be conducted as part of our review and approval of the PDP sponsor's request, as required in regulations at § 423.44(d)(2)(v), and will include expert opinion from our staff with appropriate clinical or medical background.

In addition, we recognize that circumstances may arise where an individual is only able to obtain qualified prescription drug coverage from a fallback prescription drug plan operating in his or her service area. In such instances, allowing a fallback entity to disenroll an individual may create substantial barriers to accessing prescription medications under the Medicare program. Section 1860D–11(g)(4)(B) of the Act grants us authority to establish additional requirements specifically for fallback prescription plans. Under this authority, we reserve the right at § 423.44(d)(2)(vi) to deny a fallback prescription drug plan's request to disenroll an individual for disruptive behavior.

In the proposed rule, we established procedures that PDP sponsors must follow prior to requesting to disenroll a member for disruptive behavior. Under proposed § 423.44(c), a PDP sponsor must give an individual timely notice of the disenrollment, which includes an explanation of the individual's right to a hearing under the PDP's grievance procedures. We further required at proposed § 423.44(d)(2)(ii) a sponsor to make a serious effort to resolve the problems presented by the individual, including the use or attempted use of the organization's grievance procedures. Finally, we established under proposed § 423.44(d)(2)(iii) that a PDP sponsor must document the individual's behavior, its own efforts to resolve the problem, and the use or attempted use of its internal grievance procedures. We are preserving all of these requirements in the final rule at § 423.44(c) and § 423.44(d)(2)(iii) and (d)(2)(iv).

We believe that the final rule achieves the twin goals of permitting involuntary disenrollment based on an individual's disruptive behavior, while also establishing necessary protections for individuals who are subject to our disenrollment rules.

Comment: Several commenters contended that allowing a PDP sponsor to disenroll an individual for disruptive behavior provides an opportunity for PDP sponsors to discriminate against individuals with disabilities, mental illness, Alzheimer's, and other cognitive conditions.

Response: We appreciate the commenters concern about the need to ensure that individuals are not discriminated against on the basis of their disability. However, the Part D plans are not provided the authority to make the decision on such a disenrollment. In addition to establishing safeguards in the final rule for individuals with special needs by requiring PDP sponsors to make reasonable accommodations where we deem necessary, it is CMS who reviews the request for disenrollment and makes the decision to approve or deny the request. In our review, we will include our staff with the appropriate clinical or medical expertise review the case before a final decision is made.

Comment: Several commenters noted that the proposed rule denies protection to individuals who comply with medical advice by trying an on-formulary drug instead of the drug originally prescribed and subsequently experience an adverse reaction that triggers the disruptive behavior. A few commenters asked us to prohibit PDPs from disenrolling an individual because of his or her refusal or inability to adhere to a treatment plan developed by the PDP or other health care professionals associated with the plan.

Response: We agree with the commenters and clarify in the final rule at § 423.44(d)(2)(i) that an individual cannot be considered disruptive if such behavior is related to the use of medical services or compliance (or non-compliance) with medical advice or treatment.

Comment: Two commenters supported the flexibility afforded PDP sponsors by our allowing PDP sponsors to limit re-enrollment for individuals who are disenrolled for disruptive behavior, and one of these commenters specifically asked us to establish criteria for re-enrolling an individual such as a minimum waiting period and a commitment by the individual to discontinue such behavior. On the other hand, there were many commenters who opposed the ability of a PDP sponsor to decline re-enrollment of an individual. These commenters contended that prohibiting an individual from re-enrolling in a PDP for a specified period could cause undue harm and lapses in coverage, especially if the individual is not able to enroll in another PDP. One commenter requested that we specify the maximum period of time that a PDP sponsor may prohibit re-enrollment of

an individual who has been disenrolled for disruptive behavior.

Response: In the proposed rule, we enabled PDP sponsors to request, at their option, the ability to decline future enrollment by an individual who had been disenrolled for disruptive behavior. While we retain this option for PDPs in the final rule, we require these sponsors to request future conditions on re-enrollment as part of their disenrollment request. At the same time, we reserve the right in accordance with § 423.44(d)(2)(v) to review each request on a case-by-case basis. In the review process, we will give due consideration to exceptional circumstances that may warrant reasonable accommodations in addition to the appropriateness of conditions on re-enrollment.

Comment: There were several commenters who objected to the expedited disenrollment process. The commenters noted that the expedited process lacks even the minimal standards and requirements that are in place to protect beneficiaries in these circumstances.

Response: It is our intent to ensure that all individuals facing involuntary disenrollment for disruptive behavior have sufficient opportunity, as provided by the notice requirements, to change their behavior or grieve the PDP sponsor's decision to request involuntary disenrollment from us. We have therefore removed this provision from the final regulation.

Comment: One commenter asked us to clarify whether a full-benefit dual eligible individual who is disenrolled for disruptive behavior is entitled to a SEP.

Response: In accordance with the § 423.38(c)(4), a full-benefit dual eligible individual as defined under section 1935(c)(6) of the Act is entitled to a SEP. A full benefit dual eligible individual who is involuntarily disenrolled for disruptive behavior remains entitled to a Special Enrollment Period.

Comment: We received two comments asking us to adopt an interpretation of nonpayment of cost sharing as disruptive behavior as we had discussed in the preamble of the proposed rule for MA organizations.

Response: We appreciate the feedback provided on the consideration to include nonpayment of cost-sharing as disruptive for the purposes of applying the provisions under disruptive behavior. We will consider these comments in developing guidance for the disruptive behavior provisions.

8. Late Enrollment Penalty (§ 423.46)

Section 1860D–13(b) of the Act establishes late enrollment penalties for beneficiaries who fail to maintain creditable prescription drug coverage for a period of 63 days following the last day of an individual's initial enrollment period and ending on the effective date of enrollment in a Part D plan. We outlined this process for imposing the penalty in the proposed rule. We also proposed that an uncovered month is any month in which an individual does not have creditable coverage at any time during that month. We also reference the calculation of the amount of the penalty, which was described at § 423.286(d)(3) of the proposed rule. The final rule adopts the rules for late enrollment penalties as proposed.

Comment: Several commenters requested that we waive the late enrollment penalty for certain individuals, such as full-benefit dual eligible individuals, subsidy eligible individuals, individuals who are eligible for a special enrollment period and individuals who are involuntarily disenrolled. One commenter asked that State Medicaid programs be allowed to request and obtain such a waiver. Other commenters urged CMS to delay the implementation of the late enrollment penalty for one to two years, or be flexible with the application of the penalty, stating the Part D program was new and complex. Another commenter asked if we would provide any exception to the penalties for exceptional circumstances, such as natural disaster, family death, or clinical justification. A few commenters did not see a late penalty appeals process in the regulation and requested that we add an opportunity to appeal the late penalty.

Response: There is nothing in the statute that would provide us with the authority to waive or delay the late enrollment penalty at any time unless an individual was not adequately informed that his or her prescription drug coverage as described at § 423.56 was not creditable. Only in this limited situation will we be able to deem the individual's prescription drug coverage as creditable, regardless of whether it actually is creditable, so as not to impose the late penalty. Further, it is clear that the statute intended this provision to apply to full-benefit dual eligible individuals since the application of the penalty is specifically referenced in the definition of the full premium subsidy under section 1860D–14(a)(1)(A) of the Act, for which full-benefit dual eligible individuals are eligible. Specifically, section 1860D–14(a)(1)(A) of the Act provides that full subsidy eligible individuals, including full-benefit dual eligible individuals, are responsible for 20 percent of any late enrollment penalty for the first 60 months during which such penalty is imposed. As discussed in the proposed rule, we will develop a process for individuals to apply to CMS for reconsideration of the penalty. We appreciated the feedback that organizations provided on setting up such a process.

Comment: Several commenters asked CMS to clarify that those who do not receive a notice that their prescription drug coverage was not creditable (or received the wrong notice) are not subject to the late enrollment penalty.

Response: As provided in § 423.56(g) of the final rule, an individual who is not adequately informed that his or her prescription drug coverage was not creditable may apply for our review and make a determination if this occurred. If we determine that the individual did not receive adequate notice or received incorrect information, we may deem the individual to have had creditable coverage so that the late enrollment penalty will not be imposed.

Comment: One commenter asked CMS to clarify how the 63-day period would be counted. The commenter recommended from the end of the IEP to the date of the application for the low-income subsidy since individuals may delay a decision until he or she knows whether there will be a subsidy.

Response: The count of the 63-day period will commence the day following the end of the individual's IEP or, once the IEP has passed, the day following the last day of creditable coverage or Part D enrollment (in a PDP or MA-PD plan). The application of the 63-day period will be consistently applied to all individuals, regardless of when an individual may or may not apply for the low-income subsidy.

Comment: One commenter asked how the late enrollment penalty will be coordinated with the late enrollment penalty for Part B.

Response: We are currently developing operational and system requirements to implement the late enrollment penalty process. Additional guidance will be provided to PDPs and individuals with specific information as to how this will occur.

9. Part D Information That CMS Provides to Beneficiaries (§ 423.48)

As provided under section 1860D–1(c)(1) of the Act, we will conduct activities designed to broadly disseminate information about Part D coverage to individuals who are either eligible or prospectively eligible for Part

D benefits. In the proposed rule, we indicated that this information will be made available to beneficiaries at least 30 days prior to their initial enrollment period.

Each organization offering a PDP or MA-PD plan must provide us annually with the information to disseminate to individuals who are currently or prospectively eligible for Part D benefits. The information dissemination activities for Part D will be similar to, and coordinated with, the information dissemination activities that we currently perform for Medicare beneficiaries under sections 1851(d) and 1804 of the Act.

As required under section 1860D–1(c)(3) of the Act, we proposed to include the following comparative information for qualified prescription drug coverage provided by PDPs and MA-PD plans as part of our dissemination of Part D information and our efforts to promote informed beneficiary decisions:

- Benefits and prescription drug formularies;
- Monthly beneficiary premium;
- Quality and performance;
- Beneficiary cost-sharing; and
- Results of consumer satisfaction surveys.

We also proposed to provide information to beneficiaries regarding the methodology we will use for determining late enrollment penalties, as provided in § 423.286(d) of our proposed rule.

In carrying out the annual dissemination of Part D information, we will conduct a significant public information campaign to educate beneficiaries about the new Medicare drug benefit and to ensure the broad dissemination of accurate and timely information. We will work with SSA and the States to ensure that low-income individuals eligible for or currently enrolled in Part D benefits are aware of the additional benefits available to them and how to receive those benefits. In order to maximize the enrollment of Part D eligible individuals, this public information campaign would include outreach, information, mailings, and enrollment assistance with and through appropriate State and Federal agencies, including SHIPs, and will coordinate with other Federal programs providing assistance to low-income individuals. In addition, we will undertake special outreach efforts to disadvantaged and hard-to-reach populations, including targeted efforts among historically underserved populations, and coordinate with a broad array of public, voluntary, private community organizations, plan sponsors and stakeholders serving Medicare beneficiaries to explain the options available under this program. Materials and information will be made available in languages other than English where appropriate.

This information will enable beneficiaries to make informed decisions regarding their Part D coverage options. Organizations offering a PDP or MA-PD plan will be required to provide this information in a format and to use standard terminology that we will specify in further operational guidance.

In the interest of broadly disseminating information that promotes informed decision-making among Part D enrollees and prospective Part D enrollees, as required under Section 1860D–1(c) of the Act, we would extend the price comparison requirements to PDP sponsors and MA organizations offering MA-PD plans and making comparative information about Part D plans' negotiated prices available to beneficiaries through *www.medicare.gov*.

Since the introduction of *www.medicare.gov* in 1998, we have substantially increased the amount of personalized information available to Medicare beneficiaries, making it one of the government's most comprehensive and customer-oriented sites available to the public. The web site hosts twelve separate database applications to help individuals make their own health care decisions. The most significant ones are: the Medicare Personal Plan Finder (which contains costs, benefits, quality, satisfaction and disenrollment measures), Nursing Home Compare (which contains basic characteristics, staffing information and inspection results), the Prescription Drug and Other Assistance Programs application (which contains the most extensive, nationally complete listing of the Medicare-approved discount drug cards, including price comparisons, as well as other government and private programs designed to help with prescription drug costs), and the Medicare Eligibility Tool (which assists users in determining when they are eligible, how to enroll and what they need to consider when joining Medicare). Other tools providing customized results include: the Participating Physician and Supplier Directories, Home Health and Dialysis Facility Compare, Your Medicare Coverage, Helpful Contacts, Publications, and Frequently Asked Questions. By updating all information on the web site at least once a month, the information provided to Medicare beneficiaries via *www.medicare.gov* is the most reliable and consistent information available.

Much of the information available through *www.medicare.gov* is also available via the 1–800–MEDICARE helpline. 1–800–MEDICARE is a major information channel for providing the most personalized and reliable information to people with Medicare. The beneficiary can call 1–800–MEDICARE to find out the most reliable information on public and private programs that offer discounted or free medication, programs that provide help with other health care costs, and Medicare health plans that include prescription drug coverage. The caller can always talk to a live person at 1–800–MEDICARE to get the facts they need. We can also give the beneficiary personalized brochures containing information on their health plan choices, nursing homes and Medicare participating physicians in their area. 1–800–MEDICARE is available 24 hours a day, 7 days a week, to provide the one-on-one service that our Medicare beneficiaries need to make appropriate health care decisions.

The final rule adopts the information requirements set forth in the proposed rule.

Comment: Several commenters were concerned that the web site should reflect accurate information that is presented in an appropriate context and in a way that is useful for beneficiaries to use. Many commenters noted that the web site should provide beneficiaries with the ability to compare plans on the basis of estimating their out-of-pocket spending, including premiums and applicable cost sharing. Several commenters encouraged CMS to rely not only on price as the factor in determining which Part D plan fits beneficiary needs. Another commenter urged CMS to include specific information regarding which drugs are covered by each plan. Other commenters indicated that other information that the beneficiaries would need to consider would be the level of coinsurance, the amount a beneficiary would pay during any period he or she is liable for 100 percent of the cost sharing, whether the drug is on or off the formulary, and other cost management techniques that may apply, such as step therapy and prior authorization. Another commenter stated that we must post prices on its website of retail pharmacies that offer maintenance supplies of medications. One commenter stated that beneficiaries need to know whether the pharmacy is included in the plan's network.

Response: We appreciate this feedback and will consider this when

developing the requirements for the Part D price comparison web tool.

Comment: Another commenter stated that we need to ensure that any website includes price comparisons about generic drugs compared to their innovator brands, as well as generics compared to other brand name drugs in a similar therapeutic class.

Response: This comment will be considered when developing the requirements for the Part D price comparison web tool. As with the current price comparison tool for the Medicare-approved drug discount card program, we include pricing information for both brand and generic drugs.

Comment: One commenter noted that correct information may not be provided to seniors if we require plans to post the maximum price that could be charged, since the maximum price is typically the pharmacy's usual and customary cash price.

Response: It is our understanding that usual and customary pricing data is not readily accessible; therefore, we anticipate posting the maximum negotiated prices for prescription drugs on the website with the understanding that beneficiaries will pay the lower of the negotiated or usual and customary price at the point of sale. It is anticipated that the prices displayed on the website would reflect what enrollees would expect to pay at the point of sale for their prescriptions under the respective plans.

Comment: One commenter asked that we define the process for the information sharing exchange between PDPs and CMS.

Response: The process has not been defined at this time. Once we have developed the data requirements and process for submission of data, we will share this information with all prospective Part D plans.

Comment: Several commenters believe that the price comparison tool should not be a requirement for PDP sponsors or MA organizations offering MA-PD plans.

Response: It is important for beneficiaries to have access to all information in order to make informed choices. We are committed to providing Medicare beneficiaries with information about both PDPs and MA-PD plans through the price comparison tool. Therefore, we will keep this requirement.

Comment: One commenter expressed a general concern with the disclosure of negotiated prices and the negative impact that disclosure of such information could have on competition. The commenter further noted that negotiated prices may be subject to confidentiality agreements. The commenter suggested that we disclose only estimated or average prices and that this information only be posted on the specific website of the Part D plan.

Response: As mentioned previously, it is anticipated that the prices displayed on the website will reflect what enrollees would expect to pay at the point of sale for their prescriptions under the respective plans.

Comment: A commenter stated it was unacceptable for CMS not to provide quality and performance information in the first year or second year of the Part D program.

Response: Quality data will not be available for the first year since this is a new program and historical data will not be available for reporting. For year two, the regulation simply states that if it is impractical to obtain data or if it is not available, it will not be reported; this is not the same as stating that it will not be available for the second plan year. From the perspective of many beneficiaries, cost and availability are the most important quality issues. Hence, we will be able to report timely in response to these issues.

Comment: One commenter urged the agency to work closely with pharmacies to ensure that any price comparison website is understandable and free of errors before it is made public.

Response: Historically, we have worked closely with beneficiaries, stakeholders, partners, and advocacy groups to ensure the information disseminated meets the needs of the Medicare population we serve. We will continue this practice in the development of the website for Part D plan information.

Comment: One commenter stated that we are silent on the notification timeframe for beneficiaries. CMS simply refers to the 30-day notice period. The commenter thinks that beneficiaries will need much more than 30 days to digest all of the information they will receive from CMS to enable them to make informed choices about their Part D coverage. The commenter urges information to be disseminated as soon as possible and urges CMS to plan numerous information campaigns now and involve numerous organizations in developing education activities and materials. Another commenter suggests dissemination activities occur at least 60 days prior to the initial enrollment period for Part D, which begins November 15, 2005.

Response: We are planning outreach and education activities that will occur throughout 2005 and 2006. Detailed information about drug plans and their individual benefit structures will be released as soon as possible after this information is approved. It is impossible to send out plan data any sooner due to submission dates for plan information and the process steps needed to translate the raw data into consumer-friendly information, as well as the print production steps for the publication that will house this comparative information.

Comment: One commenter asked what information we will provide to SSA, SHIPs, and other groups to educate beneficiaries about the late enrollment penalty.

Response: We will provide important details about the penalty associated with late enrollment in the information provided to SSA and SHIPs, as well as in SHIP training materials. In addition, we will develop materials that can be used by employers, unions, partners, advocacy groups and other stakeholders to educate beneficiaries about the late enrollment penalty.

Comment: One commenter stated that we must give greater attention to developing materials and education campaigns focused on informing beneficiaries, especially those with special needs, about the new drug benefit and to help them to enroll in the best plan available.

Response: We are planning a multi-tiered education program to repeatedly reach all beneficiaries. This program will include plans for specific important target audiences, including those with special needs. Mailings and outreach activities to dual eligibles are currently being planned. Education and outreach materials developed for beneficiaries will be thoroughly tested with the target audience.

Comment: Another commenter stated that we should mail, no later than October 15, 2005, standardized, easy-to-understand notices to full-benefit dual eligible individuals that, among other things: inform them of their eligibility to receive the low-income subsidy if they enroll in a PDP; list of choices of health plans, clearly denoting those that meet the benefit premium assistance limit, and contact information for each plan; explain that full-benefit dual eligible individuals will be randomly enrolled in a prescription drug plan at a specified date if they fail to opt out or enroll in a plan themselves; explain how they may change their drug plans if they wish at any time; and inform them of where in their community they can go to get help with enrollment. The commenter also recommended that these notices should be tested for readability by focus groups and experts.

Response: We plan to consumer test beneficiary notices and send out the information noted by the commenter above by October 15, 2005. We are considering using the mailing to inform the full-benefit dual eligible individuals about what plan they will be auto-enrolled in if they fail to elect a Part D plan by December 31, 2005 or affirmatively opt of Part D, and that they have a right to choose to enroll in a different plan.

Comment: One commenter stated that the website should be provided in languages other than English to reflect the language spoken in a PDP service area.

Response: We appreciate this feedback and will consider this when developing the requirements for the website.

Comment: CMS should include in the final rule binding and enforceable standards defining information plans must provide to beneficiaries with various types of disabilities. For example, this information must be available to individuals who are blind or have low-vision. Further, CMS must require PDP internet websites to be accessible for individuals with vision impairments.

Response: Our websites are accessible to people with various disabilities, including those who are blind or have low-vision. Under our marketing requirements in § 423.50, we require Part D plans to demonstrate that marketing resources are allocated to marketing to the vulnerable populations, as well as beneficiaries age 65 and over. It is also important to note that Section 508 of the Rehabilitation Act of 1973 allows individuals with disabilities to access electronic information.

Comment: Commenters stated that the proposed rule focused largely on support through Internet sources and the 1–800 Medicare number, and argued that both are necessary and helpful but insufficient to meet the needs of many duals, as well as those eligible for the low-income subsidy.

Response: Although the basis for information dissemination is through publications, *www.medicare.gov* and 1–800–MEDICARE, we do not plan to solely rely on these resources to reach the population as a whole. We will work closely with SSA, SHIPs, Area Associations on Aging as well as other national stakeholders and partners, to provide assistance to those who may qualify for the low-income subsidy. Through a broad network of support from community based organizations, we will make considerable efforts to reach those beneficiaries who do not have access to the Internet or are uncomfortable calling 1–800–MEDICARE.

Comment: CMS should also make detailed information about PDPs available electronically to others in accessible formats that would enable them to conduct independent analyses about what plan would be best for a particular individual.

Response: Because the actual plan data underlying the price comparison tool is considered proprietary, we do not anticipate making the underlying data available electronically to outside organizations. Since nothing in the MMA addresses disclosure of plan data, the Freedom of Information Act (FOIA) rules apply. FOIA Exemption 4 protects certain confidential commercial information that is submitted to a Federal agency. Determinations about the applicability of FOIA Exemption 4 to plans' pricing data would be made on a case-by-case basis depending on whether the submitter of the data could demonstrate that disclosure of this information would likely cause substantial competitive harm to the submitter's competitive position. If FOIA Exemption 4 is found to protect submitted price information, we cannot disclose this information because to do so would violate the Trade Secrets Act (18 U.S.C. 1905).

Comment: Several commenters stated that we should develop specific outreach and education strategies for vulnerable populations, including disabled Medicare beneficiaries and dual eligibles. Another commenter stated that PDPs should be required to include specific plans for encouraging enrollment of hard-to-reach populations, including individuals with mental illness. Another commenter indicated that outreach efforts must involve community-based groups on a collaborative basis and not just use these groups as conduits for distributing written materials produced by CMS regarding the new benefit. Resources must be provided to enable these groups to educate beneficiaries about their choices and help enroll them. This collaboration with community groups must begin as soon as possible to establish the infrastructure needed once Part D goes into effect.

Response: We are developing an extensive outreach campaign for these individuals and are working closely with U.S. Department of Health and Human Services' Office of Disability to ensure that this important audience is reached.

Comment: One commenter strongly urged CMS to develop a specific plan for facilitating enrollment of beneficiaries with disabilities that incorporates collaborative partnerships with State and local agencies and disability advocacy organizations.

Response: In addition to working closely with the HHS Office of Disability to ensure we reach this group of individuals, we plan to broaden local partner networks though the Regional Education About Choices in Health (REACH) campaign to provide training, information and planning support to provide outreach and assistance to these populations. REACH is a national education and publicity campaign implemented at the local level by our Regional Offices and their partners. The REACH campaign works through partnerships to increase awareness of the Medicare program and resources among hard to reach populations.

Comment: A commenter suggested that we should develop and implement effective outreach strategies utilizing the Medicare Beneficiary Ombudsman authorized under section 923 of the MMA.

Response: Section 923 of the MMA states that, to the extent possible, the Ombudsman shall work with SHIPs to facilitate the provision of information to individuals entitled to benefits under Part A or enrolled under Part B, or both regarding MA plans and changes to those plans. We will ensure that SHIPs receive sufficient training in all aforementioned subjects so that SHIPs can provide information and assistance to beneficiaries referred to them by the Ombudsman. The Ombudsman operational design assumes that 1–800–MEDICARE will refer callers to appropriate sources, including SHIPs, for resolution of complaints and appeals and, when necessary, refer them directly to the Ombudsman as a last resort.

Comment: We received two comments that strongly recommended that we clarify the SHIPs mandate to ensure that they address the needs of individuals with disabilities, including non-elderly individuals.

Response: Section 4360 of the Omnibus Budget Reconciliation Act (OBRA) 1990, which created SHIP, requires that SHIPs provide information, counseling and assistance to Medicare eligible beneficiaries, including beneficiaries with disabilities. All CMS SHIP grant announcements expressly reference beneficiaries with disabilities as intended recipients of SHIP services. In addition, we provide training and information on the special needs and issues related to this population. We agree with the commenters and will clarify the SHIP mandate through the methods described here to address this need.

Comment: One commenter suggested that we partner with and fund community-based disability organizations to conduct outreach, information, and referral activities on the new Part D benefit.

Response: While we agree to partner with these organizations in these activities, funding these groups are subject to available funds in our budget.

Comment: One commenter was concerned about beneficiaries being inundated with marketing and outreach materials. Since many beneficiaries will need counseling on plan selection, this commenter asked for clarification regarding whether counseling will be available, what the States' role will be, and whether there will be Federal financial participation available for such costs.

Response: States that had SPAPs on October 1, 2003 will have Federal assistance available to them through the transitional grant program authorized under section 1860D–23(d) of the Act. These States will use the transitional grant funds to educate SPAP enrollees about the plans that are available to them under part D, as well as provide technical assistance, phone support, counseling, and other activities the SPAP believes will promote the effective coordination of enrollment in Part D. States that do not have a SPAP operational as of October 1, 2003 will not have these transitional funds available to them.

In addition, we will continue to provide grants to the States through the SHIP. SHIP is a national program that offers one-on-one counseling and assistance to people with Medicare and their families. Through grants directed to States, SHIPs provide free counseling and assistance via telephone and face-to-face interactive sessions, public education presentations and programs, and media activities. We expect SHIP counseling to be an important source of information for beneficiaries about Part D.

Comment: One commenter was concerned that the targeted and hands-on outreach, education and decision support and enrollment services, particularly outreach to lower income, rural and disabled beneficiaries is not adequate.

Response: Through the REACH campaign, we plan to broaden local partner networks in order to provide training, information and planning support to provide outreach and assistance to these populations. Through a broad network of support from community-based organizations as well as national stakeholders and partners, considerable effort will be made to reach those beneficiaries who do not have access to the Internet or who are uncomfortable calling 1–800–MEDICARE.

Comment: One commenter stated that we should consider preparing educational materials that would help pharmacists understand the benefits and other material that they can use to educate beneficiaries.

Response: We are working with our provider education staff to develop materials for all providers, including pharmacists, for educational use.

10. Approval of Marketing Materials and Enrollment Forms (§ 423.50)

Section 1860D–1(b)(1)(B)(vi) of the Act directs us to use rules similar to those established under section 1851 of the Act to review PDPs' marketing materials and application forms.

In the proposed rule, we generally replicated the marketing provisions established under § 422.80 for MA plans as appropriate for PDPs. Therefore, we proposed at § 423.50(a) guidance for our review of marketing materials, definition of marketing materials, deemed approval, and standards for PDP marketing. We do recognize that the differences between PDPs and MA plans will require different marketing requirements and we requested comments on this issue. We have drafted the final rule to apply the marketing requirements to all Part D sponsors, although we may waive the Part D provisions in deference to similar MA, PACE and cost plan requirements.

We also proposed to add § 423.50(a)(3) in order to streamline the marketing review process for all PDP sponsors for those materials which pose the lowest risk of confusing or misleading beneficiaries. This aspect of the File and Use program allows the PDP sponsor, prior to distribution, to submit and certify that for certain types of marketing materials it followed all applicable marketing guidelines, or for certain other marketing materials that it used, without modification, proposed model language as specified by CMS.

Except as otherwise provided below, the final rule adopts the marketing rules set forth in § 423.50 of the proposed rule. Although the following area generally applies to Fallback plans, subpart Q specifically addresses issues related Fallback plans.

In addition to marketing materials and enrollment forms, comments provided the opportunity to respond to enrollment issues related to SPAPs, pharmacist and physician marketing to beneficiaries, and organizations marketing additional products in conjunction with PDP services.

Comment: We received several comments on types and quantity of information that should be disseminated to beneficiaries. Many commenters suggested that specific formulary information needs to be provided including specific drugs (top 25–50), pricing and premium information, benefit structure, pharmacy networks, plan availability by region, medication management services offered (and who is eligible for them), appeals and exception process and information on plan performance. Most agreed that this information should be mailed, as well as provided on the Internet and that comparison tables with this information for all plans in a geographic region should be provided so that beneficiaries can compare plans side-by-side. One commenter was concerned that beneficiaries would be overwhelmed with materials and expressed concern about the potential for adverse selection. It was suggested that strict and detailed regulations on marketing be issued to protect beneficiaries. One commenter suggested that we need more detail in the final rule around patient education.

Response: We agree with the commenters that beneficiaries will need information on the Part D plans available in their areas. Our goals in providing information has always been to ensure that beneficiaries have access to timely, accurate and reliable information that helps them make informed health care decisions. Our education and outreach efforts related to Part D are no exception. We will employ multiple tactics, including publications, direct mailings, the Internet (*www.medicare.gov*), toll-free telephone numbers, and localized grassroots partnerships to help beneficiaries access the level of detailed information that they want and need to make their best choice among Part D plans. Our tiered communications approach recognizes that different beneficiaries have varying information needs and what might be an overwhelming level of detail to some individuals may only meet the baseline needs of another. By using multiple, integrated education and outreach approaches and thoroughly market testing our products and messages during development, we are working to strike the best balance of providing the right information at the right time. In addition, we are committed to making sure plans provide clear, accurate information on covered benefits, including formulary, pharmacy networks, and costs. We intend to require such information in guidance rather than specifying the full range of materials in the regulations so that we

can modify our requirements in a timely manner to meet beneficiary needs.

Comment: We received several comments regarding the use of various marketing vehicles to promote PDPs. Several of the commenters supported the distribution of information through websites, 800 numbers, written communications and telemarketing. One commenter stated that marketing should be limited to mail contacts only due to concerns regarding fraud. One commenter stated that the restrictions on marketing need to be expanded due to the potential for fraud. Many commenters opposed telemarketing and one was explicitly against email as well.

Response: Section § 1860(D)(1)(b) of the Act allows for similar marketing rules for the drug benefit as those for MA. We intend to follow this guidance and promote marketing guidelines that are in line with those under the MA program. The MA program supports the use of websites, 800 numbers, mailings, email and telemarketing for plan marketing. By allowing plans multiple routes for marketing, we believe that greater numbers of beneficiaries will be reached and thus enrolled in drug benefit plans. We believe this is an important goal given the penalty for late enrollment in Part D. We understand that this is contrary to what we allowed in the drug discount programs. We did not allow the drug discount card programs to participate in telemarketing practices because many of the drug card sponsors were stand alone start-up companies that did not have a previous history of doing business. We expect that the PDP sponsors will have previous experience administering drug plans, insurance or other lines of similar business, with established reputations, much like MA plans.

Marketing guidelines are in the process of being established, and these will set forth in greater detail what will be expected of the plans. PDP sponsors may be barred from engaging in certain practices if abuses occur. In addition, PDPs will be prohibited from requesting beneficiary identification numbers over the telephone or via email as related to marketing activities.

Comment: One commenter stated that the States should be able to steer its SPAP enrollees toward the most appropriate plan.

Response: Section 1860D–23(b)(2) of the Act defines an SPAP as a State program which, in determining eligibility and the amount of assistance to a Part D eligible individual under the program, provides assistance to such individuals in all Part D plans and does not discriminate based upon the Part D plan in which the individual is enrolled. We further interpreted that provision in the preamble of the proposed regulation such that a SPAP may not designate a preferred PDP, even if the State allows beneficiaries to choose a non-preferred plan and provides for benefits equivalent to that which it also provides for the preferred plan (referred to as wrap-around benefits). We believe that, regardless of whether the SPAP is authorized under State law to make enrollment decisions on behalf of the beneficiary, we interpret using that authority to steer beneficiaries to a preferred PDP or MA-PD plan would be interpreted to violate the non-discrimination provision under section 1860D–23(b)(2) of the Act.

Section 1860D–23(d) of the Act provides for grants to SPAPs, in existence as of October 1, 2003, which were awarded in September of 2004 for fiscal year 2005, for the purpose of educating their members about options to access Medicare drug benefit coverage and about comparing options so they can choose the best value to them. We will reach out to SPAPs with information to help people with Medicare understand their drug plan options. We will also assist SPAPs in adapting this information to ensure that their members understand the way that the new Part D plans coordinate with their SPAP benefit and supporting their members in making informed decisions about drug benefit plan options. Outreach to SPAPs would also include instruction on the educational/outreach/assistance activities SPAPs could pursue while not discriminating against Part D plans.

SPAPs cannot discriminate amongst plans; however, they may provide beneficiaries with comparable education on all of the available Part D plans (PDPs, MA-PD plans, and PACE and cost-based HMO or CMPs offering qualified prescription drug coverage) in terms of the following: which plans have lower premiums after application of any uniform SPAP premium subsidy; which plans offer formularies that cover the drugs utilized by the beneficiaries so that beneficiaries can continue to use the same drugs; which plans offer the drugs used by the beneficiary at the most favorable combination of deductibles, coinsurance/co-pays, and negotiated prices; which plans use the same network pharmacies as the SPAP so that beneficiaries can continue to use the same pharmacy; and which plans (if any) have ID cards that include an emblem or symbol indicating its coordination with the SPAP to facilitate secondary payment at the point of service.

In addition, SPAPs are prohibited from recommending Part D plans based on their financial interest in minimizing their cost of providing coverage that supplements (wraps-around) their members Part D benefits. They are required to mirror our process auto-enrolling full-benefit dual eligible individuals among PDPs on a random basis in the event that members do not actively select a Part D plan during their IEP or after enroll in the SPAP.

Part D plans benefit coordination requirements include establishing procedures to share information with SPAPs on enrollment files, the processing and payment of claims, claims reconciliation reports and whether the beneficiary has satisfied the out-of-pocked limit. Part D plans are encouraged to work with all SPAPs to co-brand the Part D benefits by providing (in its electronic claim response to the pharmacy) information on payment of premiums and coverage, and whether claims should be sent to an SPAP for processing. Plans should also consider including the SPAPs' benefits in marketing and educational materials to beneficiaries, which includes SPAP benefit information, eligibility criteria, order of party payment, and a phone number for SPAP enrollment and claims payment information.

Comment: Two commenters were concerned that SPAP beneficiaries will be confused by materials and decline enrollment if premiums, deductibles and coverage gaps are discussed since SPAP participants were never required to pay these amounts. It was also stated that marketing materials for this population should include coordination of benefit (COB) information.

Response: We expect that SPAPS will provide information to beneficiaries on their drug plan choices in their States. We expect that plans will work cooperatively with SPAPs to co-brand materials, when appropriate, to ensure that beneficiaries are provided with comprehensive, appropriate, coordinated information that will facilitate education and understanding of their benefits. Requirements for coordination of benefits with other providers of prescription drug coverage are described under § 423.464 (e). We expect Part D plans to work with SPAPs on coordination of benefit activities to ensure that beneficiaries are provided seamless care that is easily understandable.

Comment: We received multiple comments regarding the specific requirements for marketing materials. Many commenters agreed that marketing materials should be available in Spanish and in other languages that

are in the plan's service area. Two commenters stated that marketing materials should be developed at an appropriate health literacy level. Two commenters stated that the information will need to be adapted for the blind/low vision, those with cognitive disabilities, in Braille, large print and on audio or computer disks. It was also stated that there should be a requirement that the Internet site be accessible for the visually impaired and that interpreters and alternative communication methods should be mandated. Another commenter stated that a subpart should be devoted to notice requirements.

Response: We agree that there are special needs of beneficiaries that will need to be provided for. The regulation currently dictates that marketing materials need to be available in low-literacy formats. While we do not require materials to be available in other languages, it is highly encouraged. In addition, basic enrollee information should be developed to accommodate the visually impaired. Call centers must be able to accommodate non-English speaking/reading beneficiaries. Plan sponsors should have appropriate individuals or translation services available to call center personnel to answer questions that beneficiaries may have concerning aspects of the drug benefit. We are working on developing guidance shortly following publication of the final rule that is similar to the MA requirements to ensure appropriate information is available to beneficiaries.

Comment: Several commenters stated that marketing materials should be consistent with other Medicare programs.

Response: We are currently developing additional marketing guidelines and expect them to be similar to other Medicare programs (for example, the MA and the Medicare-approved prescription drug discount card programs), to the extent possible, in order to reduce the administrative burden for plans that participate in these programs.

Comment: We received many conflicting comments regarding whether providers (pharmacists and physicians) should be allowed to market to beneficiaries. This includes the display of materials from Part D sponsors as well as verbally steering beneficiaries to particular plans. Several commenters were in support of pharmacies marketing MA/PD and PDPs; some of these commenters stated that equal attention should be provided to all plans in the particular area. In addition, some commenters specifically mentioned that they were in support of physicians marketing Part D plans.

Other commenters were against marketing of Part D plans in the pharmacy setting; three specifically mentioned the prohibition of physicians from marketing to beneficiaries. Most stated that the reasons for their positions were that physicians or pharmacists could steer a beneficiary to inappropriate Part D plans.

Response: Both the MA and the Medicare-approved prescription drug discount card programs allow some provider marketing to occur. Our position is that it is appropriate to allow providers and pharmacies to market to beneficiaries. This marketing provides beneficiaries with access to information about the options available to them under Part D that they may not have received through other sources because beneficiaries often look to their health care professionals to provide them with complete information regarding their health care choices. Therefore, we believe that providers and pharmacies should provide prospective enrollees with information on the full range of options available to them under Part D. This process is similar to the process followed for the discount drug card program, where pharmacies may provide information on where beneficiaries may get complete information regarding all the Medicare-approved discount cards available in the region in their service area. We would require Part D sponsors that want their network pharmacies to provide marketing materials to prospective enrollees to include in their contracts language requiring the pharmacies Part D eligible individuals with information on all Part D options available in the service area. This requirement would be specified in the further guidance issued by CMS. Any remuneration offered to providers in exchange for providing to patients information about particular Part D plans must comply with applicable Federal and State laws on fraud and abuse.

Comment: Two commenters stated that Part D sponsors should be prohibited from using Medicare discount card enrollee and applicant information to provide leads for marketing their Part D plans.

Response: We acknowledge the importance of beneficiary privacy, and the marketing limitations that drug cards operate in accordance with section 1860D–31(h)(7) of the Act. The drug card provisions under section 1860D–31 of the Act contemplate a transition from the drug card program to Part D, and we are considering what will be the specific drug card responsibilities of drug card sponsors during transition. From that understanding we will assess whether PDP sponsors currently offering a drug card may use of beneficiary drug card information to market their Part D plans and we will provide further guidance to the drug card sponsors and Part D sponsors at a later time. We note, however, that the HIPAA Privacy Rules may limit the ability of drug card sponsors to disclose their enrollees' information to un-affiliated Part D sponsors.

Comment: One commenter suggested that the File & Use program should be delayed one year until we have more experience with evaluating the practice of the PDPs, and that the term ''performance requirements'' needs to be defined.

Response: We will define the eligibility and performance requirements associated with the File & Use program in further guidance.

Comment: There was concern over the amount of time that was stated was necessary for a review of PDP and MA-PD marketing materials. Some suggestions included decreasing the time of this review from 45 days to 30 days, and instituting a 10-day review period for resubmitted materials. In addition, if unaltered model materials were used, the review should be limited to 10 days.

Response: We agree that that timelines for reviewing marketing materials should be shortened. However, we intend on maintaining the proposed timelines for Part D marketing materials as defined in the statute. We will work to develop a review process that is as efficient as possible. We will develop a range of model materials for Part D sponsors.

Comment: We also received a comment that the amount of materials that must be individually approved should be limited. There was also concern that we may not have enough staff to review the materials and that the process needs to be open, fair and constructive.

Response: We will develop a range of model materials for Part D sponsors to choose from to improve efficiency of the marketing review process. Materials that utilize ''model language'', without modification, are subject to a streamlined review process. We will work to develop a review process that is as efficient and effective as possible utilizing standardized criteria to review the materials.

Comment: Two commenters stated that it is unacceptable that marketing materials are deemed approved if we fail to approve them within the time

period and materials should be reviewed multiple times for multiple regions.

Response: It is a statutory requirement that we approve marketing materials within 45 days or that they are then deemed approved. In developing sub regulatory marketing guidance and processes, we will work to ensure that our reviews are completed within the statutory timeframe.

Comment: Commenters stated that guidelines for CMS review under § 423.5(c)(i),(ii), and (iii) of the proposed rule need to be more specific. These sections lay out the information that Part D plans need to provide to beneficiaries.

Response: We will provide greater detail in the sub regulatory guidance in order to facilitate any necessary future changes that would need to be made.

Comment: Many commenters gave input as to whether additional products, such as financial services, should be marketed to Medicare beneficiaries in conjunction with the Part D benefit. Several of the organizations expressed their concerns over the fact that beneficiaries may be confused with receiving additional information for other products and services in conjunction with information about the Part D benefit. The major concern is that beneficiaries would choose not to participate in Part D because they did not like some of the other products or that they may mistakenly believe that we have approved these products. One commenter suggested that individuals must actively agree to receive marketing materials other than enrollment materials. Some commenters suggested that financial institutions should not be encouraged to participate as PDPs, since the potential for abuse, as in selection of healthier beneficiaries into plans and avoidance of financial services to less healthy individuals, is enormous.

Some health plans commented that they are in favor of allowing PDP sponsors to market additional health-related and non-health-related products to beneficiaries. These products could be provided for an additional fee or at no additional cost to the beneficiary. The belief is that the additional tools could help beneficiaries manage their expenses and financial securities. One organization also stated that if PDP sponsors are permitted to provide these additional products, than MA-PD plans should be allowed to similarly provide these additional products.

Response: We do not want to restrict beneficiaries from receiving materials about of health-related and non-health-related services that may be of benefit to them in managing their health or payments for health care. All organizations that are qualified to be a Part D sponsor are encouraged to participate in providing services under Part D. In situations where plans want to use or disclose protected health information (PHI), for purposes of marketing these other products or services, for example beneficiary enrollment information, Part D plans must comply with the HIPAA Privacy Rule and obtain a written authorization from the beneficiary prior to using the beneficiary's PHI to market non-health-related products and services. In other cases where Part D plans implement general marketing mailings that do not use beneficiary PHI, we would not object to plans providing such information to beneficiaries as long as the information is not contingent upon PHI to do so. For example, a plan may obtain a general mailing list from a non-related marketing vendor to mail materials to all individuals over age 65 in a geographic area to promote its products. The use of beneficiary names and addresses obtained from a plan and used for mailings to beneficiaries only, would presumably use PHI. Consequently, plans could not market non-health-related products through mailings using beneficiary information absent authorization.

Comment: One commenter recommended that any Part D sponsor offering other health coverage to its Part D plan enrollees be required to provide anti-duplication notices like those that are required under the National Association of Insurance Commissioners (NAIC) model regulation for Medigap policies. The purpose of these anti-duplication notices is to advise Medicare beneficiaries as to whether other non-Medigap types of coverage being offered to them might duplicate coverage they already have under Medicare.

Response: The disclosure statements that are required under the NAIC model regulation for Medigap policies were adopted by the NAIC pursuant to anti-duplication provisions contained in section 171(d) of the Social Security Act Amendments of 1994 (SSAA'94–Pub. L. 103–432) that amended section 1882(d)(3)(A) of the Act. These statements apply to all issuers of health insurance coverage that is offered to Medicare beneficiaries that is neither a Medigap policy nor a type of coverage that is listed as exempt from this requirement in a **Federal Register** notice that CMS [then HCFA] published on June 12, 1995. Section 171(d) required CMS to either publish the disclosure statements developed by the NAIC or publish its own. The FR notice through which CMS accepted the 10 separate disclosure statements developed by the NAIC for the various types of coverage commonly offered to Medicare beneficiaries contained a list of types of policies not requiring disclosure statements (See 60 FR 30880).

Among the types of coverage not requiring the use of a disclosure statement were managed care organizations with Medicare contracts under section 1876 of the Act. The notice went on to explain that these types of policies are exempt because ''these plans do not 'duplicate' Medicare benefits; rather their purpose is to actually provide all covered Medicare benefits directly to enrolled beneficiaries.'' In 1995, cost and risk managed care organizations with contracts under section 1876 of the Act were the primary alternative to fee-for-service Medicare. Medicare+Choice plans were authorized by the Balanced Budget Act (BBA) in 1997, and the program has now been renamed Medicare Advantage by MMA. MMA also provided for private prescription drug plans (PDPs) to contract to deliver Medicare prescription drug benefits under Medicare Part D. Because Part D plans will actually provide all covered Medicare drug benefits directly to enrolled beneficiaries, we wish to clarify that these entities will not have to provide anti-duplication notices for their provision of coverage pursuant to their Medicare Part D contracts. However, if Part D plans choose to market to their enrollees other (non-Medigap) health insurance products that are not part of their contracts under Part D, these other types of health insurance products will have to bear the disclosure statements required by section 1882(d)(3)(A) (vi) of the Act and the NAIC model regulation unless the other coverage comes within one of the specified exemptions.

11. Information Provided to PDP sponsors and MA Organizations

Section 1860D–1(b)(4)(A) of the Act authorizes us to provide information about Part D eligible individuals to PDP sponsors and MA organizations to facilitate the marketing and enrollment of beneficiaries in their PDP and MA-PD plans. This information is intended to ensure participation in the Part D program, as well as to reduce costs to those plans.

In the final rule, it is not necessary to provide regulatory text implementing this provision; however, we intend to provide additional guidance shortly following publication of this rule, as explained below.

Comment: We received several comments on this MMA provision. Several of the commenters supported the provision of such information to organizations, with a few offering to work with CMS to develop guidance and ensure that the appropriate beneficiary protections are in place. Many who supported this initiative believed that, at a minimum, the name, address, and telephone number of the individual should be provided. Another commenter believed that the statute permits organizations to contact beneficiaries through written, electronic, or phone communication. Another commenter stated that the individual's dual eligible or low-income subsidy status should also be provided. The commenter also noted that we should provide the information to organizations upon request, as opposed to being limited to only receiving such information at certain times of the year. The commenter also believed that the statute would permit PDP sponsors to obtain marketing information on low-income and dual eligible individuals directly from States and SPAPs.

Several commenters also opposed such information being provided to organizations. One commenter believed that providing such information to Part D competitors would generate more problems and ''incite'' more negative beneficiary reaction that would outweigh any value in enhancing beneficiary outreach. Other commenters were concerned that such information would be used to ''cherry pick'' healthier and less expensive beneficiaries. Several commenters noted that if we were to provide such information to organizations, such information should be limited to the minimum amount necessary. They stated that certain information, such as health or financial information or telephone numbers should not be provided. Further, beneficiaries should be given the option to request that we not share their information with plans. Several commenters did not believe that PDPs or MA-PD plans should be able to use the information for telemarketing purposes. Another commenter indicated that we should only disclose information to the plan if the plan's marketing material contains formulary and drug pricing information and is accompanied by an application form.

Response: We decline to provide specifics on the provision of this information at this time but reserves the right to provide this information to plans in the future. We will develop further guidance on this issue shortly after publication of this rule.

12. Procedures to Determine and Document Creditable Status of Prescription Drug Coverage (§ 423.56)

Section 1860D–13(b)(6) of the Act identifies certain entities, which we describe in our proposed rule that must disclose whether the prescription drug coverage that they provide to their members who are Part D eligible is creditable prescription drug coverage.

Sections 1860D–13(b)(4) (A) through (G) of the Act lists seven forms of potential creditable prescription drug coverage: Coverage under a PDP or under an MA-PD plan; Medicaid; a group health plan (including coverage provided by a Federal or a nonfederal government plan and by a church plan for its employees); a State pharmaceutical assistance program; veterans' coverage of prescription drugs, prescription drug coverage under a Medigap policy; and military coverage (including Tricare). Many of these terms are defined elsewhere in Federal regulations; some of them are under the jurisdiction of other Federal agencies.

In addition to the forms of creditable coverage identified in sections 1860D–13(b)(4) (A)-(G) of the Act, section 1860D–13(b)(4)(H) of the Act provides the Secretary with the flexibility to identify ''other coverage'' that could be considered to be creditable prescription drug coverage. We proposed, at § 423.56, to expand the list of types of creditable prescription drug coverage.

As discussed in § 423.46 of the proposed rule, upon becoming eligible for Part D, beneficiaries must decide whether to enroll in Part D, or forego that opportunity and face a possible financial penalty should they later decide to enroll. Beneficiaries who decide not to enroll in Part D because they have creditable prescription drug coverage will not face such a penalty if they later decide to enroll in Part D.

According to section 1860D–13(b)(5) of the Act, an enrollee who would otherwise be subject to a late enrollment penalty may avoid the penalty if his or her previous coverage met the standards of ''creditable prescription drug coverage''. Under section 1860D–13(b)(5) of the Act, previous coverage will only meet those standards ''if the coverage is determined (in a manner specified by the Secretary) to provide coverage of the cost of prescription drugs the actuarial value of which (as defined by the Secretary) to the individual equals or exceeds the actuarial value of standard prescription drug coverage.''

In the proposed rule, we interpreted ''to the individual'' in this case as being to the average individual under the plan, as opposed to the sponsor of the plan. For purposes of determining creditable coverage, we proposed a ''gross'' test: will the expected plan payout on average be at least equal to the expected plan payout under the standard benefit? We also proposed at § 423.56(c) that any entity seeking to offer coverage of the type described in § 423.56 must attest to the actuarial equivalence (or non-equivalence) of its prescription drug coverage in their notice to Medicare beneficiaries and in a submission to CMS, and must maintain documentation of the actuarial analysis and assumptions supporting the attestation.

In coordination with the provisions regarding the late enrollment penalty, we proposed at § 423.56 to establish a process under which these entities will disclose the creditable status of their prescription drug coverage to us and to each part D eligible beneficiary enrolled in such coverage.

Section 1860D–13(b)(6)(C) of the Act, implemented at § 423.56(g) of the proposed rule, provides that an individual who was not adequately informed that his or her prescription drug coverage was not creditable prescription drug coverage may apply to CMS to have such coverage treated as creditable prescription drug coverage for purposes of not having the late penalty imposed.

Comment: One commenter stated that Medicaid should not be considered creditable prescription drug coverage, for the purposes of Part D, because no Medicaid benefit for Part D covered prescription drugs is available to Part D eligible beneficiaries.

Response: All entities listed under § 423.56(b), except PDPs and MA-PDs under (b)(1) and PACE plans and cost-based HMOs and CMPs offering qualified prescription drug coverage, must provide notice to both CMS and its members whether the prescription drug coverage provided is or is not creditable. The purpose of the notice of creditable coverage is to ensure that individuals are aware of whether such coverage is creditable prescription drug coverage and its implication to the late enrollment penalty.

Medicaid is prohibited from providing Part D drugs to full-benefit dual eligible individuals. However, since there may be other individuals who are not receiving the full range of benefits from Medicaid but who will continue to receive some drug coverage from the State, these individuals must also receive this notice providing status of the coverage.

Comment: One commenter requested that we include SPAP in the definition

of types of coverage that may be creditable.

Response: The proposed rule at § 423.56(b)(4) includes SPAPs as potentially creditable. Section 1860D–13(b)(4)(D) of the Act specifies these programs, as described in section 1860D–23(b) of the Act, as such. To ensure this concept is clear, we will revise § 423.56(b)(4) to include the acronym ''SPAP.''

Comment: We received a comment indicating that the value of prescription drug coverage under PACE will likely equal or exceed the actuarial value of Part D standard prescription drug coverage as a result of existing requirements in sections § 460.90 and § 460.92 of the PACE regulation. The commenter recommended incorporating PACE into the CMS definition of creditable prescription drug coverage found in § 423.56(a).

Response: We agree with the commenter and have incorporated PACE into the definition of potentially creditable prescription drug coverage found in § 423.56(b). Additional discussion of the applicability to Part D benefits and requirements to PACE are outlined in subpart T of the final rule.

Comment: A few commenters inquired about the actuarial equivalence test that the entities listed will be required to meet, since the actuarial equivalence reference in § 423.265 refers to bid submissions. Commenters supported both the concept of ''gross'' test and an ''aggregate test'' for calculation of the actuarial equivalence for plans, including group health plans which offer several benefit packages to determine if the prescription drug coverage is creditable.

Response: The basic actuarial equivalence value test for the determination of creditable coverage of alternative coverage is determined by calculating whether the expected plan payout on average will be at least equal to the expected plan payout under defined prescription drug coverage (gross test). We believe Section 1860D–22(a)(2) of the Act is subject to two reasonable interpretations of calculating the creditable coverage test (gross test). Under the first interpretation, the actuarial equivalence standard for determining creditable coverage would be applied to the alternative coverage as a whole, and under the second interpretation the actuarial standard would be applied for each benefit option (including separate cost-sharing arrangements) within a single group health plan. Whereas our proposed rule required plans to apply the actuarial equivalence standard at the aggregate level, for the final rule we instead require plans to apply the actuarial equivalence standard to each benefit option within its plan.

Our rationale for revising the actuarial equivalence test is to ensure that beneficiaries are adequately informed that their coverage is or is not creditable prescription drug coverage. A sponsor may offer many different benefit options to beneficiaries. One of those benefit options may not pass the gross test but be included in an overall (or ''aggregate'') text. As a result, this would leave beneficiaries in certain benefit options with a determination that their coverage is creditable, when in actuality it is not. For example, a sponsor has a group in which richer benefits are offered, compared to another group that has more limited benefits. If the sponsor would aggregate the two benefits together, the lower benefit will end up as ''creditable'' when the benefit packages are averaged together.

We will issue guidance on the aspects of actuarial equivalence shortly following publication of the final rule.

Comment: One commenter asked if any coverage that is less than full pharmacy benefits could be considered creditable prescription drug coverage, such as coverage for maintenance or coverage of specific disease-only drugs.

Response: We believe that the definition of creditable prescription drug coverage would prohibit us from concluding that such coverage is creditable. To be creditable prescription drug coverage, the coverage must equal or exceed the actuarial value of defined standard prescription drug coverage, as we will define in guidance referenced in the previous response. It is likely that coverage of a very limited scope such as the commenter refers will not likely meet our actuarial equivalence test.

Comment: In response to our request for comments on other forms of coverage that may potentially be considered creditable, two commenters requested that we cost-based HMOs and CMPs authorized under section 1876 of the Act as potential providers of creditable prescription drug coverage. Both commenters also suggest that we include a provision allowing CMS to designate other types of coverage as potentially creditable prescription drug coverage in the future without requiring such an addition be accomplished through the rule making process. Another commenter suggested that coverage provided by State high risk insurance pools also be included in the types of coverage that may be creditable.

Response: We agree with these suggestions and have revised § 423.56(b) to include cost-based HMOs and CMPs and coverage offered by State high risk pools, as defined under the HIPAA regulations at § 146.113(a)(1)(vii), as well as a provision permitting CMS to recognize other types of coverage as potentially creditable prescription drug coverage, which we would do so in separate guidance as determined necessary.

Comment: Several commenters supported permitting the disclosure of the creditable prescription drug status of coverage through the inclusion of this information in already existing beneficiary materials, such as Summary Plan Descriptions (SPDs), or annual notices. One commenter suggested that because beneficiaries are already familiar with these documents, they provide a more recognizable and familiar avenue for this important information. On the other hand, several commenters supported requiring all notices of the creditable status of coverage to ''stand alone;'' that is; to be provided separately in a specific notice to each individual. Some commenters expressed concern that if this disclosure were not highlighted in a separate notice, the important message could go unnoticed and inadvertently subject an individual to the late enrollment penalty. Another commenter suggested that all notices be linked to ERISA disclosure documents (that is, SPDs), and to HIPAA or COBRA required notices. One commenter suggested that notice of creditable status could be incorporated into already existing beneficiary information materials, while notice of non-creditable status should stand alone. Lastly, a commenter requested that we specify the elements that would be required to be included in these notices.

Response: We specifically requested comment on the disclosure of creditable prescription drug notice requirements and appreciate the feedback received. Based on the comments we received we believe that linking the notice of creditable status to other required documents is an acceptable vehicle provided it is conspicuous and includes standard information elements. This approach appropriately recognizes the importance and familiarity of materials that beneficiaries currently receive regarding coverage they have. Further, we believe that it is important to encourage compliance with the provision of these notices by eliminating duplication and the undue burden associated with it. To that end, we have revised § 423.56(c) to allow notices of creditable and non-creditable status to be provided in the same manner, and will provide specific guidance following the publication of the rule. This guidance will require that

a notice of creditable and non-creditable status be provided, at minimum, prominently with other beneficiary information materials, and will include model language for both types of notices.

We may specify different requirements for those entities identified at § 423.56(b) that are required to provide these notices, where appropriate, to reduce beneficiary confusion and minimize administrative burden. For example, as explained in our discussion of § 423.34 above, we intend to notify full benefit dual eligible individuals that they are eligible for the low-income subsidy. This notice will also inform individuals that Medicaid will no longer cover those prescription drugs covered under Part D and that any additional prescription drug coverage provided by Medicaid would not be creditable coverage under Part D. Including this information in the same notice will avoid duplication of effort and possible beneficiary confusion.

Comment: Several commenters felt that requiring an attestation by group health plans of actuarial equivalence for creditable coverage when the sponsor of such coverage elects not to enroll in the retiree drug subsidy program under subpart R was an unnecessary cost and an administrative burden. The commenters believed that for those employer groups that offer prescription drug coverage to active employees who might be Part D eligible individuals, such coverage should be assumed to be ''creditable'' and should only have to provide notices to those qualified retirees and dependents who are Part D eligible individuals. The commenters also suggested that notices could be published in summary plan descriptions, on employer website and via e-mail.

Response: Section 1860D–13(b)(6)(B) of the Act requires specific entities that offer prescription drug coverage to provide notices to all Part D eligible individuals enrolled in their plans regarding whether such prescription drug coverage is creditable. This would include sponsors (as defined under § 423.880) not electing the Retiree Drug Subsidy, as described in subpart R. A notice of creditable or non-creditable coverage must be provided to active Medicare eligible employees and Medicare eligible dependents so that a late enrollment penalty will not be imposed when the beneficiary enrolls in Part D coverage.

We will provide further guidance on a simplified method of determining creditable coverage for those sponsors not electing the retiree drug subsidy.

We will also provide guidance to sponsors on the form, manner, and timing of such notice requirements, following publication of this final rule. Notices may be provided, at minimum, prominently with other plan participant information materials (for example, summary plan descriptions, or HIPAA notices) that the sponsor is required to provide as long as it is conspicuous and includes standard information elements as determined in our guidance. This approach appropriately recognizes the importance and familiarity of materials that beneficiaries currently receive regarding coverage they have.

Comment: Many commenters responded to our request for comments on the timing of the delivery of creditable coverage status notices to Part D eligible individuals. Several of these commenters suggested that the initial notice should be required to be delivered prior to the commencement of the AEP which begins on November 15, 2005. One commenter suggested that notices also be issued at least 60 days prior to the effective date of any change to current coverage. Another commenter suggested that entities required to deliver these notices should do so within 30 to 45 days of the end of Part D enrollment periods.

Response: We appreciate the feedback we received regarding the timing of notices to disclose creditable prescription drug coverage. We agree that, in order to ensure beneficiaries are making informed choices regarding enrollment in Part D, notice must be provided to all Part D eligible individuals each year prior to the commencement of the AEP, which begins on November 15th. We also believe there are three other key times when notice must be provided: (1) prior to the commencement of the individual's initial enrollment period in Part D; (2) prior to the effective date of enrollment in such coverage or any change in creditable status of that coverage; and, (3) upon request by the beneficiary. We will revise § 423.56(f) to require that notice be provided, at minimum, at these 4 times.

Comment: One commenter requested that we clarify the meaning of the words in § 423.56(b) of the proposed rule ''with the exception of PDPs and MA-PD plans.'' for the duty to furnish notices of creditable coverage to beneficiaries. The commenter also requested clarification of the duty of Cost plans offered under section 1876 of the Act that provide qualified prescription drug coverage to furnish such notice. Lastly, the commenter asked us to clarify if the provision at § 423.56(d) of the proposed rule regarding the disclosure of creditable status to CMS applies to any entity that is exempted from notice requirements according to § 423.56(b).

Response: It is our view that the practical need for disclosure of creditable status notices is directly related to a beneficiary's understanding of their options related to enrolling in Part D and any consequences should they choose not to, such as the late enrollment penalty. It also provides the beneficiary with information about how their coverage compares to what is available under a Part D plan. Beneficiaries enrolled in a PDP, MA-PD plan, PACE plan or cost plan that provides qualified prescription drug coverage are enrolled in Part D, and therefore not subject to any consequence of choosing not to enroll. Including these types of coverage in the list of coverage that may be considered creditable ensures that at no time could a beneficiary who has maintained enrollment in a legitimate Part D plan be subject to the late enrollment penalty for the same time period. However, sending notice of creditable status seems superfluous since, as these plans are Part D plans, the creditable status is automatic.

The statute at 1860D–13(b)(6)(B) of the Act exempts PDP sponsors and MA organizations from providing notice of creditable coverage to its members. Since sections 1860D–21(e) and (f) of the Act provide that we treat cost-based HMO and CMPs and PACE organizations that elect to provide qualified prescription drug coverage similar to MA-PD local plans, such cost-based HMO and CMP and PACE organizations offering qualified prescription drug coverage will also be excepted from this notice requirement. We will revise the notice requirements under § 423.56(c) to reflect that PACE plans and 1876 Cost plans offering qualified prescription drug coverage as excepted entities from the notice requirements under § 423.56(c). We also note that PACE plans and section 1876 of the Act cost plans that do not offer qualified prescription drug coverage must provide notices, as required. To ensure that Part D plan members understand their options, we will ensure that an explanation of the late enrollment penalty and the concept of creditable coverage are included in plan documents.

Similarly, a requirement for organizations that provide Part D benefits to submit separate notice would be duplicative by their nature as CMS approved Part D plans, they are creditable. We will revise § 423.56(e) to clarify that all entities providing CMS-approved Part D coverage do not have

to disclose creditable status of Part D coverage to us under this paragraph.

Comment: One commenter suggests that we consider ways that entities could provide the required notice of creditable status to beneficiaries and CMS via electronic means.

Response: We recognize that most plan documents have been historically provided to beneficiaries in hard-copy (that is, paper) but know from the comments received from plan sponsors and business advocates that participants are receiving plan information through other electronic means, such as websites and e-mail. Most beneficiaries are probably accustomed to receiving materials in one of these manners. We feel that paper documents have better ensured that the beneficiary receives and understands the information. In addition, paper documents will provide beneficiaries a hard copy that they can present whenever needed to show proof of creditable coverage. Since beneficiaries may already be choosing to receive information electronically, we will explore this option as we develop operational guidance for creditable notice requirements.

As for entities notifying us of the creditable status of their coverage, we will describe the form and manner in which entities disclose this information to us in operational guidance and will consider various options for entities to do so.

C. Voluntary Prescription Benefits and Beneficiary Protections

1. Overview and Definitions (§ 423.100)

Proposed subpart C of part 423 implemented sections 1860D–2, 1860D–4(a), 1860D–4(b), 1860D–4(i), 1860D–4(k), 1860D 11(a), 1860D–21(a), 1860D–21(c)(3), and 1860D 21(d)(2) of the Act. This subpart set forth requirements regarding—

- Definitions for terms that are frequently used in this subpart.
- The benefits offered by Part D sponsors.
- The establishment of prescription drug plan service areas.
- Access standards with regard to covered Part D drugs.
- Part D sponsor formularies.
- Information dissemination by Part D sponsors.
- Disclosure to beneficiaries of pricing information for generic versions of covered Part D drugs.
- Privacy, confidentiality, and accuracy of PDP sponsors' beneficiary records.

Below we summarize the provisions of subpart C and respond to public comments. (Please refer to the proposed rule (69 FR 46646) for a detailed discussion of our proposals.)

a. Part D Drug

The definition of a covered Part D drug in § 423.100 of our proposed rule closely followed the statutory definition in section 1860D–2(e) of the Act. According to this definition, a covered Part D drug was available only by prescription, approved by the Food and Drug Administration (FDA), used and sold in the United States, and used for a medically accepted indication (as defined in section 1927(k)(6) of the Act). A covered Part D drug included prescription drugs, biological products, insulin as described in specified paragraphs of section 1927(k) of the Act, and vaccines licensed under section 351 of the Public Health Service Act. The definition also included ''medical supplies associated with the injection of insulin (as defined in regulations of the Secretary).'' We proposed to define those medical supplies to include syringes, needles, alcohol swabs, and gauze.

In accordance with section 1860D–2(e)(2) of the Act, the definition of a covered Part D drug specifically excluded drugs or classes of drugs, or their medical uses, which may be excluded from coverage or otherwise restricted under Medicaid under section 1927(d)(2) of the Act, with the exception of smoking cessation agents. In accordance with section 1927(d)(2) of the Act, the drugs or classes of drugs that may currently be excluded or otherwise restricted under Medicaid include: (1) agents when used for anorexia, weight loss, or weight gain; (2) agents when used to promote fertility; (3) agents when used for cosmetic purposes or hair growth; (4) agents when used for the symptomatic relief of cough and colds; (5) prescription vitamins and mineral products, except prenatal vitamins and fluoride preparations; (6) nonprescription drugs; (7) outpatient drugs for which the manufacturer seeks to require that associated tests or monitoring services be purchased exclusively from the manufacturer or its designee as a condition of sale; (8) barbiturates; and (9) benzodiazepines.

The definition of a covered Part D drug also excluded any drug for which, as prescribed and dispensed or administered to an individual, payment would be available under Parts A or B of Medicare for that individual (even though a deductible may apply).

Except as otherwise provided below, the final rule adopts the definition of ''covered Part D drug'' set forth in § 423.100 of the proposed rule.

Comment: Several commenters were confused about the distinction between drugs that may be covered under Part D given the definition of the term ''covered Part D drug'' in section 1860D–2(e) of the Act and those drugs that are actually included on a Part D plan's formulary.

Response: In order to clarify when we are referring to a drug that may be covered under Part D and one that not only is covered by Part D but is also included on a particular Part D plan's formulary, we refer to drugs that may be covered under Part D, consistent with the definition of the term ''covered Part D drug'' in section 1860d–2(e) of the Act, simply as ''Part D drugs.'' We use the term ''covered Part D drug'' to refer to a drug that not only is a Part D drug, but that is included in a Part D plan's formulary or treated (through a coverage determination or appeal described in subpart M of this preamble) as being included in a Part D plan's formulary, and is obtained at a network pharmacy or at an out-of-network pharmacy in accordance with § 423.124 of our final rule. Both terms are defined in § 423.100 of our final rule.

Comment: One commenter recommended that we consider expanding the definition of ''medically accepted indication'' beyond the FDA-approved indications to include uses in official compendia or research. Another commenter was concerned that the definition of ''medically accepted indication'' may allow Part D sponsors to limit their payments for use of Part D drugs solely to FDA-approved indications even though clinical standards allow for alternative uses. Another commenter was concerned that pharmacists will be penalized for dispensing prescriptions that are prescribed for an indication that is not a medically accepted indication. This commenter indicated that pharmacists cannot be expected to contact each physician for each prescription in question to determine if the drug is being prescribed for a medically-accepted indication.

Response: To qualify as a Part D drug, a drug or biological must be used for a medically accepted indication, as defined under section 1927(k)(6) of the Act. This definition states that a medically accepted indication means not only any use for a covered outpatient drug which is FDA-approved, but also a use which is supported by one or more citations included or approved for inclusion in any of the compendia listed in section 1927(g)(1)(B)(i) of the Act-the American Hospital Formulary Service Drug Information, United States

Pharmacopoeia-Drug Information, the DRUGDEX Information System, and American Medical Association Drug Evaluations. We cannot extend the meaning of ''medically accepted indication'' to cover uses in research, as one commenter notes, since the definition of ''medically accepted indication'' in section 1927(k)(6) of the Act does not include the reference in section 1927(g)(1)(B)(ii) of the Act to peer-reviewed medical literature. Thus, a ''medically accepted indication'' is limited by statute to a use for a covered outpatient drug which is approved by the FDA, or the use of which is supported by one or more citations in the compendia listed above. It will be Part D plans' responsibility to ensure that covered Part D drugs are prescribed for a medically accepted indication; plans may, for example, rely on utilization management policies and procedures (which we will review as part of our comprehensive review of Part D plan benefits) to ensure that drugs are prescribed and used for medically accepted indications. We clarify that pharmacists will not be required to contact each physician to verify whether a prescription is being used for other than a medically accepted indication.

Comment: Some commenters recommended including coverage for all EPA-recommended disposal methods and disposal solutions as part of the definition of ''medical supplies associated with injection of insulin''. The commenters noted that proper disposal of needles and lancets are necessary to patient safety and important to public health. Some commenters requested that the definition include lancets, blood glucose test strips, glucometers, syringes, and needles. One commenter suggested that gauze not be included.

Response: We are interpreting the term ''medical supplies associated with the injection of insulin'' in section 1860D–2(e)(1)(B) of the Act as comprising syringes, needles, alcohol swabs, gauze, and insulin delivery devices not otherwise covered by Part B, such as insulin pens, pen supplies, and needle-free syringes. Given that section 1860D–2(e)(2)(B) of the Act excludes products covered by Part B from the definition of a Part D drug, test strips and lancets, which are covered under Part B, cannot be covered under Part D. While we recognize the importance of needle disposal systems, we also do not consider the systems to be directly associated with injection. Thus, these devices fall outside of our interpretation of medical supplies associated with the injection of insulin.

We note that it is our intention to narrowly construe further Part D plan determinations of what constitutes ''medical supplies associated with the injection of insulin'' in order to ensure that such determinations are consistent with the examples we have provided, and that they do not lead to an inappropriate expansion of the Part D benefit.

Comment: Some commenters asked for clarification on coverage of smoking cessation products, specifically regarding whether over-the-counter products will be covered under Part D. Another commenter suggested that in order to cover smoking cessation products, Part D plans should require proof of smoking cessation classes.

Response: Section 1860D–2(e)(1)(A) of the Act specifies that a Part D drug is a drug that may be dispensed only upon a prescription. Although section 1860D–2(e)(1)(B) of the Act specifically allows smoking cessation agents to be covered under Part D, such agents must not otherwise be excluded from coverage under Part D. Over-the-counter smoking cessation products (for example, gum and most patches), by virtue of being not being drugs that may be dispensed only upon a prescription, therefore cannot be considered Part D drugs, even though they are smoking cessation products. Smoking cessation products that may be dispensed only upon a prescription, however (for example, some patches, oral inhalants, nasal sprays, and Zyban), may be considered Part D drugs provided they meet all other applicable requirements under the definition of a Part D drug in § 423.100 of the final rule. We do not have the authority to require Part D plans to condition coverage of permissible smoking cessation agents on proof of smoking cessation classes.

Comment: One commenter requested clarification in the final rule that Part D plans are not prohibited from providing drugs on the exclusion list (under section 1927(d)(2) of the Act, other than smoking cessation drugs) if they are provided through an enhanced benefit.

Response: As provided in § 423.104(f)(1)(ii)(A) of our final rule and in accordance with section 1860D–2(a)(2)(A)(ii) of the Act, Part D plans may only provide coverage of drugs that are specifically excluded as Part D drugs under section 1860D–2(e)(2)(A) of the Act, that is, drugs or classes of drugs, or their medical uses, which may be excluded from coverage or otherwise restricted under Medicaid under section 1927(d)(2) of the Act, with the exception of smoking cessation agents—if they do so as supplemental benefits through enhanced alternative coverage and if they would otherwise meet the definition of a Part D drug under section 1860D–2(e)(1) of the Act, but for the application of section 1860D–2(e)(2)(A) of the Act.

Comment: Many commenters urged us to remove benzodiazepines from the exclusion list indicating the multiple therapeutic uses of this drug. One commenter was concerned that excluding drugs such as these from the Part D benefit would force health care providers to alter how they treat patients based on which medications are Part D drugs. Many commenters noted that benzodiazepines serve as valuable therapy for anxiety disorders, bipolar disorder, Parkinson's disease, seizures, and other conditions. Some commenters noted that excluding drugs such as benzodiazepines that are inexpensive, first-line therapies would require more expensive drugs to be prescribed simply because they are covered. Some commenters were concerned about the dangers of beneficiary withdrawal from benzodiazepines if these drugs are not covered under Part D. Some commenters were concerned about loss of drug coverage for benzodiazepines for dual eligibles, especially because benzodiazepines are covered in many States. Many commenters also urged us to remove barbiturates from the exclusion list, citing similar reasons as those listed for benzodiazepines.

Some commenters urged us to make an exception for vitamins used under special circumstances, specifically with ESRD patients. Another commenter was concerned about the exclusion of renal vitamins under Part D and requested that we allow the coverage of water-soluble vitamins lost during dialysis to be covered under Part D. Another commenter noted that prescription vitamins are relatively inexpensive.

Some commenters requested coverage of over-the-counter medications for beneficiaries with certain conditions. One commenter asked us to reconsider excluding over-the-counter drugs that were formerly prescription-only drugs and now have over-the-counter status. Another commenter recommended including a provision allowing over-the-counter drugs to be covered if prescribed in the same manner as a prescription item. Another commenter asked us to consider over-the-counter drugs and medications for unintended weight loss as a covered drug under Part D. One commenter suggested that we amend the exclusion for ''agents used for symptomatic relief of cough or cold'' to ''non-prescription agents used for symptomatic relief of cough or cold''.

Response: Section 1860D–2(e)(2) of the Act clearly requires us to exclude certain drugs from the definition of a Part D drug. According to the statute, the definition of a Part D drug specifically excludes certain drugs or classes of drugs that may be excluded from Medicaid coverage under section 1927(d)(2) of the Act, including agents when used for anorexia, weight loss, or gain; agents when used for cosmetic purposes or hair growth; agents when used for symptomatic relief of cough and colds; prescription vitamins and mineral products, except prenatal vitamins and fluoride preparations; outpatient drugs for which the manufacturer seeks to require that associated tests or monitoring services be purchased exclusively from the manufacturer or its designee as a condition of sale; nonprescription drugs; barbiturates; and benzodiazepines. We have no flexibility to allow Part D coverage of any of these drugs, including over-the-counter drugs used to treat certain medical conditions, except as provided in § 423.104(f)(1)(ii)(A) of the final rule, which permits Part D plans to provide coverage of drugs that otherwise meet the definition of a Part D drug under section 1860D–2(e)(1) of the Act and are not otherwise excluded under section 1860D–2(e)(2)(B) of the Act, if they do so as supplemental benefits through enhanced alternative coverage. We also note that insurance or otherwise, group health plans, or third party payment arrangements (including States under Medicaid and State Pharmaceutical Assistance Programs) may, at their discretion, provide Part D enrollees with supplemental coverage for drugs excluded from coverage under Part D.

Comment: One commenter said that many of the categories of excludable drugs in section 1927(d)(2) of the Act refer to drugs when used for a specific purpose and that it is inappropriate to simply exclude these drugs when they may be covered depending on the specific clinical use. This commenter recommended that that we provide coverage for potentially excludable drugs when they are prescribed for a clinical use not covered by section 1927(d)(2) of the Act. Two examples provided were ''weight loss agents'' when used not for cosmetic purposes, but for the treatment of morbid obesity, and decongestant combination products, which while commonly prescribed to treat coughs and colds, could be used for the treatment of allergic conditions.

Response: Drugs that are excluded from coverage under Part D when used as agents for certain conditions may be considered covered when used to treat other conditions not specifically excluded by section 1927(d)(2) of the Act, provided they otherwise meet the requirements of section 1860D–2(e)(1) of the Act and are not otherwise excluded under section 1860D–2(e)(2)(B) of the Act. To the extent this is the case, and a drug is dispensed for a ''medically accepted indication'' as described in the statute, weight loss agents may be covered for the treatment of morbid obesity, and decongestant products for example, may be covered when used to treat allergies. However, we clarify that Part D plans may establish utilization management processes in order to ensure that such drugs are being prescribed for medically accepted indications that are not excluded under section 1927(d)(2) of the Act (for example, decongestant products when used for ''symptomatic relief of coughs and colds'').

Comment: One commenter suggested excluding drugs that have non-prescription drug alternatives available as Part D drugs. Two commenters supported excluding drugs that are ''lifestyle'' drugs such as Viagra, Levitra, and Cialis.

Response: We do not have the authority to exclude the drugs if they meet all the criteria of a Part D drug as provided under section 1860D–2(e)(1) of the of the Act and are not otherwise excluded under section 1860D–2(e)(2) of the Act. However, we clarify that Part D plans may subject these drugs to utilization management processes provided we do not find such processes to discourage enrollment by certain Part D enrollees as part of the benefits package review we will conduct (and which is discussed in detail elsewhere in this preamble).

Comment: One commenter supports the current statutory language regarding the manufacturer tying arrangements exclusion, whereas another commenter supports expanding this prohibition but does not specify how we should expand it. One commenter opposes any CMS effort to mandate the interactions between Part D plans and pharmaceutical manufacturers, and another asks us to affirm that this exclusion will not interfere with Part D plan decisions to cover drugs/diagnostic test combinations if manufacturers do not require the purchase of the combinations. Yet another commenter points out that the tying arrangement exclusion would exclude drugs from Part D coverage that are tied to one pharmacy system because of requirements for patient monitoring.

Response: We appreciate the clarification provided by the various commenters. We are not expanding the manufacturer tying arrangement exclusion of coverage under Part D in our final rule. We believe that existing Federal fraud and abuse laws, including the anti-kickback statute at section 1128B(b) of the Act, as well as the civil monetary penalty provision at Section 1128A(a)(5) of the Act, provide clear guidance regarding what are and are not inappropriate manufacturer tying arrangements. Manufacturers remain responsible for ensuring that they do not engage in any tying arrangements that violate the anti-kickback statute or, where applicable, the civil monetary penalty provision prohibiting inducements to beneficiaries.

Comment: Some commenters asked for clarification on which vaccines are covered under the Part D benefit and suggested that we provide additional guidance on how non-Part B vaccines are to be covered under Part D, including administrative fees. Another commenter requested that we strongly encourage Part D plans to include all vaccines that are not covered under Part B on their formularies.

Response: The definition of a Part D drug in section 1860D–2(e) of the Act clarifies that Part D may cover a biological product described in sections 1927(k)(2)(B)(i) to (k)(2)(B)(iii) of the Act—to include a vaccine licensed under section 351 of the Public Health Service Act. Since section 1860D–2(e)(2)(B) of the Act excludes an otherwise covered Part D drug from coverage under Part D ''if payment for such drug as so prescribed and dispensed or administered with respect to that individual is available (or would be available but for the application of a deductible) under Part A or B for that individual,'' certain drugs and vaccines would be covered under Part D only to the extent they are not covered under Part B.

In addition to excluding Part B vaccines from coverage under Part D, section 1860D–2(e)(3) of the Act provides that a Part D plan may exclude from coverage covered Part D drugs for which payment may not be made under section 1862(a) of the Act if applied to Part D. Section 1862(a)(1)(A) generally excludes from payment items and services that are not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member, except those vaccines identified in section 1862(a)(1)(B) of the Act as covered Part B vaccines. Section 1862(a)(1)(A) of the Act, however, excepts from this rule vaccines covered under Part B. Therefore, if these provisions are read literally, Part D plans would be permitted to exclude

from coverage preventative vaccines that are covered Part D drugs because they are not ''reasonable and necessary for the diagnosis or treatment of an illness or injury.''

However, we argue that whereas section 1862(a)(1)(B) of the Act requires coverage under Part B of covered Part B vaccines, by analogy, section 1862(a)(1)(B) of the Act as applied to Part D should be read as requiring coverage under Part D of vaccines that are covered Part D drugs. This argument is buttressed by the fact that the Congress specifically defined Part D drugs under section 1860D–2(e)(1) of the Act to include vaccines. Moreover, section 1860D–2(e)(3) of the Act references all of section 1862(a) of the Act, and the only way to give meaning to the reference to section 1862(a)(1)(B) of the Act is to extend the provision to permit coverage of Part D vaccines. In other words, if section 1862(a)(1)(B) of the Act as applied to Part D were read literally as only permitting coverage of Part B vaccines, the reference in section 1860D–2(e)(3)(A) of the Act to section 1862(a)(1)(B) of the Act would be rendered meaningless.

Building on the argument that by analogy section 1862(a)(1)(B) of the Act should be extended to Part D so as to require coverage of non-Part B vaccines under Part D, the standard under Part D should reflect a standard similar to section 1862(a)(1)(b) of the Act but adapted to apply to preventative vaccines. Therefore, we believe such standard should be vaccines that are ''reasonable and necessary for the prevention of illness.'' Plans will need to develop explicit criteria that can be applied on a case-by-case basis to determine that the administration of Part D vaccine is ''reasonable and necessary'' and that the Part D vaccine is therefore a covered Part D drug. Presumably these will comply with any widely accepted practice guidelines. If widely accepted practice guidelines are not available for certain vaccines, Part D plans will need to develop criteria that they can support with sound clinical reasoning.

Currently, most vaccines of interest to the Medicare population are covered under Part B. Although Part B makes only three exceptions (influenza, pneumococcal, and hepatitis B vaccines for high risk patients) to its rule requiring injury or direct exposure, these three exceptions probably account for the majority of vaccinations needed by an elderly population. Since many of the remaining vaccines on the market are administered during childhood, we do not expect that Part D will cover a large number of vaccines. However, as more vaccines are developed and practice guidelines develop, Part D plans might face a growing burden with supplying vaccinations to significant numbers of their Part D patient populations. Therefore, the ability of Part D plans to limit payment to those situations that are ''reasonable and necessary for the prevention of illness'' will become more and more important.

Given the definition of dispensing fees we have incorporated in the final rule, the costs of Part D-covered vaccine administration could not be covered as part of a dispensing fee. Neither could those costs be covered as separate administrative fees, since as discussed elsewhere in this preamble, other than medication therapy management programs (described in subpart D), we do not expect medical or clinical services to be included in administrative fees.

As discussed in subpart J, Part D-covered vaccines administered in a physician's office will be covered under the out-of-network access rules at § 423.124 of our final rule. The costs of vaccine administration may be included in physician fees under Part B since Part B pays for the medically necessary administration of non-covered drugs and biologicals. However, there is currently no ready mechanism for physicians to bill Part D plans for Part D-covered vaccine costs. In the short-term, we will require that a Part D enrollee self-pay the physician for the Part D-covered vaccine cost and submit a paper claim for reimbursement by his or her Part D plan. This approach is consistent with how beneficiaries accessing covered Part D drugs at an out-of-network pharmacy will be reimbursed by Part D plans for costs associated with those drugs. Once Part D is implemented, we will get a better sense for the actual volume of Part D-covered vaccines (and other covered Part D drugs appropriately dispensed and administered in a physician's office) and the need and most appropriate mechanisms for any automatic cross-over procedures such that physicians could submit claims for reimbursement of Part D-covered vaccine ingredient costs directly to the appropriate Part B carrier. Any such automatic cross-over procedures would mean that beneficiaries would not have to submit paper claims and, instead, physicians could submit a single claim for reimbursement of both the Part D-covered vaccine ingredient costs and the administration fee directly to the appropriate Part B carrier, which would forward the Part D charge to the appropriate Part D plan.

Comment: One commenter asked that we cover individually compounded medications or combinations of medications. Another commenter stated that we should not consider compounded drugs as meeting the definition of a Part D drug, as it is contrary to the definition in the MMA and would put patients at risk.

Response: Historically, extemporaneous compounding has filled an important role in pharmacy practice and continues to be an important part of contemporary pharmacy practice. While less than one percent of prescriptions are compounded, these compounded prescriptions often provide medically necessary drug therapies that would otherwise be unavailable to patients. Compounding also provides many independent pharmacies with the opportunity to offer services that competitively differentiate them from the chain industry. In addition, compounded prescription drug products are frequently reimbursed under commercial prescription drug benefit plans. Therefore, excluding compounded prescription drug products from Medicare Part D would be a significant change from current pharmacy practice.

Section 1860D–2(e)(1)(A) of the Act defines a Part D drug as including a drug that may be dispensed only upon a prescription and that is described in section 1927(k)(2)(A)(i), (A)(ii) or (A)(iii) of the Act. As a matter of simplification, we refer to these products as ''FDA approved prescription drug products,'' and note that, as used in this part of the preamble, that term incorporates the non-FDA approved drug products specifically described under sections 1927(k)(2)(A)(ii) and (A)(iii) of the Act.

Compounded prescription drug products may contain: (1) all FDA approved prescription drug products; (2) some FDA approved prescription drug products; or (3) all non-FDA approved drug products. While the strictest reading of section 1927(k)(2) of the Act appears to indicate that non-FDA approved compounded prescription drug products are not Part D drugs, we believe that FDA-approved prescription drug product components of a non-FDA approved compounded prescription drug product could be considered to be Part D drugs. The definition of a Part D drug is not based on the final form of the drug as dispensed to the beneficiary; rather, section 1860D–2(e)(1)(A) of the Act speaks to a drug ''that may be dispensed'' only upon a prescription and that meets the requirements of section 1927(k)(2) of the Act. Therefore,

the FDA approved component can satisfy section 1860D–2(e)(1)(A) of the Act even if the finished product does not. Although reimbursement must be limited to the FDA approved prescription drug components (that is, no reimbursement is available for compounded products containing only products that are not approved by the FDA, or otherwise described under sections 1927(k)(2)(A)(ii) and (A)(iii) of the Act, or only over-the-counter products), these usually account for the most significant drug costs and, accordingly, current commercial practice often limits reimbursement to the most expensive component only. In addition, the labor costs associated with mixing a compounded drug product that contains at least one FDA approved prescription drug component can be included in dispensing fees (as defined in § 423.100 of our final rule).

Comment: Two commenters suggested covering medical foods under the Part D benefit because medical foods contain vitamins and nutrition that are beneficial to beneficiaries with certain diseases such as End Stage Renal Disease (ESRD). Another commenter asked that we cover parenteral nutrition therapy.

Response: It is not clear what the commenter meant by ''medical foods.'' If ''medical foods'' refers to products that are vitamins and mineral products, these are excluded from the definition of Part D drugs and are not a covered Part D benefit. In addition, enteral nutrients are not regulated as drugs by the FDA and are therefore not covered under Part D.

On the other hand, parenteral nutrition frequently contains primary components such as amino acids, nitrogen products, and dextrose mixtures that are regulated by the FDA as drugs and therefore meets the definition of a Part D drug if prescribed for a medically accepted indication and not otherwise excluded under section 1860D–2(e)(2) of the Act. Vitamins and minerals added to parenteral nutrition are not be considered Part D drugs, and costs associated with these vitamins or minerals cannot be paid for under Part D.

Part D plans would only need to include parenteral nutrition coverage for reasonable and necessary medically accepted indications that are not covered under Parts A or B. These situations would likely involve long-term care facility or home infusion patients who do not qualify for Part B coverage under the prosthetic benefit provision for permanent dysfunction of the alimentary tract. This could include temporary situations in which patients are unable to swallow or absorb nutrients from the alimentary tract, either for physical or cognitive reasons. We are currently unable to estimate the potential impact of such coverage on Part D expenditures. However, Part D plans will need to establish appropriate policies and procedures in order to limit Part D coverage of parenteral nutrition to patients with medically accepted indications that are not otherwise covered by Parts A or B. In addition, we note that Part D plans are not responsible for the costs of supplies and equipment related to parenteral nutrition therapy.

Comment: One commenter suggested additional supplies to consider for Part D coverage: spacers and aerochambers for administration of inhalation products, devices for administration of eye drops, and flushing supplies (for example, saline and heparin for home infusion therapy).

Response: Section 1860D–2(e)(1) of the Act provides us with authority to deem medical supplies to be Part D drugs to the extent they are associated with the injection of insulin. Thus, the supplies mentioned by this commenter cannot be covered under Part D, as they are not associated with the injection of insulin. We clarify that although heparin is a Part D drug, a heparin flush is not used to treat a patient for a medically accepted indication, but rather to dissolve possible blood clots around an infusion line. Therefore, heparin's use in this instance is not therapeutic but is, instead, necessary to make durable medical equipment work. It would therefore not be a Part D drug when used in a heparin flush.

Comment: One commenter recommended that Part D drugs should include liquid, chewable, transdermal and other special dosage forms and delivery mechanisms to accommodate swallowing limitations and intravenous medications, such as antibiotics.

Response: The definition of a Part D drug at section 1860D–2(e) of the Act places no limitations on drug dosage forms and delivery mechanisms provided that a drug or biological product is not otherwise excluded by the statute. We expect Part D plans to provide an adequate benefit that includes coverage of special dosage forms and delivery mechanisms to fit the needs of all their enrollees.

Comment: Several commenters supported our proposed framework for Part D coverage wrapping around Part B coverage at the individual level. However, other commenters recommended that drugs currently covered under Part B be excluded from coverage under Part D until the mandated study on the transitioning of Part B prescription drug coverage into Part D is released. Another commenter recommended that individual drugs be paid by either Part B or Part D in all circumstances.

Response: The statutory definition of the term ''covered Part D drug'' would, under section 1860D–2(e)(2)(B) of the Act, exclude any drug for which, as dispensed and administered to an individual, payment would be available under Parts A or B of Medicare for that individual (even though a deductible may apply). By including the language ''as so prescribed and dispensed or administered,'' section 1860D–2(e)(2)(B) of the Act makes a distinction between what would be paid for under Part D as opposed to Part B. This language indicates that the Congress was aware that some drugs could qualify for payment under Part B in some circumstances and Part D in others, depending on the way those drugs are dispensed or administered. Given the statutory definition of the term ''covered Part D drug'', we cannot preclude drugs that may be covered under Part B under some circumstances (for example, when they are furnished ''incident to'' a physician's service), but that are not covered under Part B under other circumstances, from being covered under Part D under such other circumstances (for example, because they are self-administered by the patient at home). Such a policy would require statutory changes by the Congress. The various issues raised by the drugs covered under Part B for the administration of the Part D drug benefit will be addressed in our report mandated by section 1860D–42(c) of the Act.

Comment: We solicited comments concerning any drugs that may require special guidance with regard to their coverage under Part D, and any gaps that may exist in the combined ''Part D & B'' coverage package. A number of commenters requested that we further clarify the relationship between drugs covered under Medicare Part B and drugs that will be covered under Part D. These commenters would like us to clarify how Part D plans can recognize Part B covered drugs since no universal list exists, Part B coverage differs by patient and situation, and Part B coverage policies differ regionally. They raise concerns about appropriately limiting coverage of drugs under Part D while achieving our goal of wrapping around Medicare Part B to the greatest extent possible.

Response: We acknowledge that there are numerous complexities involved in the distinction between drugs covered

under Parts B and D, as well as with wrapping around existing drug coverage under Part B. Nevertheless, section 1860D–2(e)(2)(B) of the Act states that Part D plans must exclude any drug that would otherwise be considered a Part D drug for which, as so prescribed and dispensed or administered to that individual, payment would be available under Parts A or B (even though a deductible may apply). Furthermore, we believe that the language ''as so prescribed and dispensed or administered'' indicates the Congress's awareness that the determination regarding whether a particular drug is covered under Part B or Part D could differ on a case-by-case basis.

Despite the complexities, we believe Part D plans can best wrap around existing Part B coverage under Part D by understanding the scope of the definition of covered Part D drug, becoming familiar with the general categories of Part B covered drugs, and planning for potential Part B interactions that are likely to be encountered in specific settings with regard to some of these categories.

Part D drugs are not limited to typical outpatient prescription drugs. The definition includes injectable prescription drugs (for example, intramuscular, intravenous, and infusible drugs, as well as vaccines). Some Part D plans may lack experience with covering the drugs under an outpatient prescription drug benefit program because they are more commonly covered under commercial medical benefits, as opposed to commercial prescription drug benefits.

The implementation of the Part D benefit does not alter coverage or associated rules for drugs currently covered under Part B. Part B covers drugs in a variety of settings. In almost all of these settings the question of whether coverage should be provided under Part D will not arise since the drugs are being provided in the context of a service or procedure. For a limited number of categories, however, pharmacists and infusion providers will have to determine whether to bill Part B or Part D, and Part D sponsors will need to confirm whether Part D is being billed correctly. In some cases, this determination can be made on the basis of the drug. For example, in the case of oral anti-cancer drugs, there is a list of drugs covered under Part B based on certain statutory criteria. All other oral anti-cancer drugs will be covered under Part D, provided they otherwise meet the definition of a Part D drug. In other cases, the pharmacist or infusion provider would need information about the member in order to bill appropriately. For example, in the case of drugs used in immunosuppressive therapy, Part B should be billed in the case of a beneficiary whose transplant has been covered by Medicare. Part D should make payment in all other instances. We will provide more information and guidance on the relation between Part B and Part D coverage in separate guidance to Part D plans.

Based upon the definition of the term ''Part D drug'' and the general categories of coverage under Part B, we believe that Part D plans could implement utilization management strategies to identify potential Part B drug coverage overlap for individuals and verify appropriate coverage accordingly. For example, if a Part D beneficiary were filling a retail prescription for an antiemetic, prior authorization could be used to ensure that the drug is not covered by Part B. Similarly, prior authorization could be used to flag drugs dispensed via home infusion that are covered under the Part B durable medical equipment policy. Plans will need to ensure that they do not cover any drugs which, as prescribed and dispensed or administered, are covered under Part B in a specific region under its local medical review policy (LMRP).

We clarify that MA organizations must follow fee-for-service coverage rules as provided in section 1852(a)(1) of the Act in determining whether to pay for a drug under its Part A/Part B or Part D benefits. Payment for injectable drugs that Medicare considers to be usually not self-administered should be paid under the Part A or Part B benefits if provided in a physician's office, and under Part D if dispensed by a network pharmacy. Even if an MA plan offers coverage under Part D of an injectable drug that Medicare considers to be usually not self-administered (for example, Avonex) the plan cannot deny coverage of this drug under its Part A or Part B benefits when furnished in a physician's office.

Comment: Several commenters noted that excluding Part B drugs from coverage under Part D regardless of whether the consumer is enrolled in Part B is seriously detrimental to consumers who enroll in Part B but who cannot effectuate their enrollment for many months due to the Part B enrollment timeframes. Consumers without Part B coverage, but who intend to enroll, could enroll in Part D in April of 2006 but would not be able to gain coverage for Part B drugs until 15 months later (enrollment in January effective in July). These commenters argue that we should make an exception for beneficiaries in this predicament such that their Part D plans could cover Part B drugs. This is especially important for full-benefit dual eligible individuals in this situation, since they would be unable to fall back on Medicaid to obtain coverage for Part B-covered medications. They recommend that Part D plans be required to cover Part B medications for a consumer for up to 15 months (the maximum amount of time it could take to effectuate an enrollment under Part B).

Response: Section 1860D–2(e)(2)(B) of the Act specifies that a drug prescribed to a Part D eligible individual that would otherwise qualify as a Part D drug cannot be considered a covered Part D drug if payment for such drug ''... is available (or would be available but for the application of a deductible) under part A or B for that individual.'' We interpreted this to mean that if payment could be available under Part A or Part B to the individual for such drug, then it will not be covered under Part D. Thus, for all Part D eligible individuals, drugs covered under Parts A and B are available if they choose to pay the appropriate premiums.

This will be the case even if a beneficiary has Part A, but not Part B, or vice versa, since, as we explain in subpart F of this preamble and at § 423.265(c) of the Act, Part D sponsors must offer a uniform benefit package in order to carry out the Congress's intent in section 1860D–13(a)(1)(F) of the Act. If Part B covered drugs were included in the Part D benefit package only for those enrollees without Part B, but not for others, it would not be possible for Part D sponsors to offer uniform benefit packages for a uniform premium to all enrollees. In addition, we believe that payment for a drug under Part A or B is available to any individual who could sign up for Parts A or B, regardless of whether they actually enrolled or are waiting to be enrolled, as these commenters describe. All individuals who are entitled to premium-free Part A are eligible to enroll in Part B. This includes individuals who are entitled to Part A based on age, disability, and ESRD. All individuals who are entitled to Part B only are age 65 or older and, in almost all instances, not eligible for premium-free Part A. However, they are eligible to buy into Part A for a premium.

Comment: Some commenters recommended that we introduce more consistent coverage rules by adopting national standards rather than relying on local carriers for coverage and payment decisions.

Response: Policies with regard to coverage of infusible drugs covered as DME supplies are uniform across the

country. Some differences do exist between carriers with regard to which injectable drugs will be covered under Part B ''incident to'' a physician service. These differences in coverage in a physician's office setting, however, should not impact whether a Part D plan will cover a prescription for an injectable drug presented at a participating pharmacy. The statute does not exclude ''all drugs'' covered under Medicare, but rather, drugs when Medicare coverage under Part B is available ''as so prescribed and dispensed or administered.''

Comment: One commenter asked about the interface between the hospice benefit and Part D, specifically whether we anticipated that Part D would account for or impact the delivery of hospice drugs.

Response: As provided in section 1861(dd)(1) of the Act, the hospice benefit covers all medications related to a beneficiary's terminal illness. There is no change in Medicare coverage of these drugs. However, all other medications provided to the beneficiary are currently paid for either out-of-pocket or by private insurance. These drugs could now be covered by Part D plans on either a primary or secondary basis depending on the presence or nature of other insurance. Given the life expectancy of beneficiaries receiving hospice benefits, we do not expect this to be a large expense for Part D plans.

b. Dispensing Fees

The MMA does not define the term ''dispensing fee,'' although the terms ''dispensing fee'' and ''dispense'' appear several times throughout the MMA. Because the statute is ambiguous on the meaning of ''dispensing fee,'' in the proposed rule we did not propose a specific definition of ''dispensing fee,'' but instead offered three different options we believed would be reasonable, permissible definitions of the term and invited comments on which option would be most appropriate under Part D.

- Option 1: The dispensing fee will include only those activities related to the transfer of possession of the covered Part D drug from the pharmacy to the beneficiary, including charges associated with mixing drugs, delivery, and overhead. The dispensing fee will not include any activities beyond the point of sale (that is, pharmacy follow-up phone calls) or any activities for entities other than the pharmacy.
- Option 2: The dispensing fee will include the activities included in Option 1, but in addition will include amounts for the supplies and equipment necessary for the drugs to be provided in a State in which they can be effectively administered.
- Option 3: The dispensing fee will include the activities in Option 2, but in addition will include activities associated with ensuring proper ongoing administration of the drugs, such as the professional services of skilled nursing visits and ongoing monitoring by a clinical pharmacist.

We also requested comments regarding any implications for our proposed options for defining dispensing fees vis-à-vis the administration of other drugs (for example, vaccines and injectable long-acting antipsychotic drugs).

Comment: The majority of commenters favored Option 1 claiming that this definition is consistent with current industry practice regarding dispensing fees. Several said that professional services involved in providing medications should more appropriately be covered under Parts A and B, and another commenter opined that Options 2 and 3 were burdensome for Part D sponsors. Another commenter expressed concern that what is currently covered under Part B should not be shifted to Part D through the dispensing fees. Other commenters stated that, although they supported Option 1, they believed that the definition proposed for Option 1 was too narrow. One commenter suggested that pharmacists are required to provide patient counseling for Medicaid patients under OBRA 1990 and that they should be reimbursed for those efforts. They also felt that the definition of what it means to dispense a drug should be clarified. One commenter argued that supplies, equipment and professional services needed to deliver a drug should be covered under ancillary fees negotiated between pharmacies and Part D plans and should not be included in dispensing fees. Another commenter pointed out that requiring PBMs to pay for professional services, as contemplated under Option 3, would require them to renegotiate tens of thousands of contracts with the pharmacies in their networks.

Several commenters supported Option 2. One commenter focused on medication packaging and the need to cover packaging specifically designed for the cognitively impaired or those with physical impairments.

Other commenters favored adoption of Option 3. Some of these commenters argued that the Congress meant for home infusion to be covered and that failure to pay for the supplies, equipment and services involved in delivering home infusion drugs was tantamount to failure to cover the drug itself. Since Part D specifically covers those drugs, (antibiotics, pain management, chemotherapy, parenteral nutrition, immune globulin and other infused drugs) they argued that we must require that dispensing fees cover the resources needed to deliver them. Other commenters argued that new treatment modalities were allowing patients to remain at home, a cost-effective setting, to receive their medications, and that some patients might not be able to receive their medications at home should the definition of dispensing fee fail to cover the service, equipment, and supplies needed to deliver the medications in the home setting. One commenter specifically noted the need to cover supplies and services surrounding infusion of long-term anti-psychotic medications in community mental health centers. Two commenters focused on the need to pay for physician services involved in home infusion of certain drugs given that many infections and adverse events take place in this setting. Direct physician supervision of these services is required to mitigate these potential problems.

Other commenters argued for Part D plan flexibility in establishing dispensing fees that would be appropriate for the setting and medication at issue, allowing each Part D plan to define dispensing fee. One commenter thought that Part D plans should be allowed to use tiered dispensing fees to encourage the use of generic drugs. One commenter indicated that point of sale systems in place today already support multiple variations of dispensing fees based on drug or amount of effort required to prepare or administer medication and such systems could handle the multiple variations for the drug benefit. Another commenter specified that the transmission standard should be the National Council of Prescription Drug Program's Telecommunication Standard Version 5.1.

Response: We agree with the majority of commenters that Option 1—including only those activities related to the transfer of possession of the covered Part D drug from the pharmacy to the beneficiary, including charges associated with mixing drugs, delivery, and overhead is the most appropriate definition of the term ''dispensing fees'' for Part D, and we have included a definition of dispensing fees in § 423.100 of our final rule consistent with Option 1.

Although we recognize that Options 2 or 3 would eliminate current gaps in coverage relative to home infused drugs, such approaches would also extend the definition of dispensing fee beyond the

mere transfer of possession of the drug, and certainly beyond what we believe to have been Congressional intent regarding the scope of an outpatient drug benefit. The inclusion of professional services in the definition of dispensing fees is also problematic given the potential for double billing with regard to some of the skilled nursing costs associated with home infusion. In many cases, these skilled nursing costs are separately billable to Part A, Medicaid, or supplemental insurance, and we are concerned about Part D supplanting these other sources of payment.

We believe Option 1 represents the best reading of the statute, since it will limit dispensing fees to a transfer of possession of the drug and will not include any fees associated with administering the drug. We also note that where the Congress wished for us to include the cost of supplies under Part D, it specifically directed us to do so (for example, by requiring that the supplies associated with the injection of insulin be included in the definition of the term Part D drug).

Even though some commenters suggest that the supplies, equipment, and services associated with Options 2 and 3 could be paid for through a separate fee or additional compensation to home infusion and other providers, we caution that such separate administrative fees would not be allowed under Part D. Other than medication therapy management programs, as described in section 1860D–4(c)(2) of the Act, we do not expect medical or clinical services to be included in administrative fees. Please refer to the subpart G preamble discussion of the types of costs that Part D plans may include as administrative costs in their bids. Thus, the costs for professional services associated with home infusion could not be included in the premium bid. In addition, professional services, including those associated with home infusion, may not be included in Part D plan supplemental coverage, given that section 1860D–2(a)(2) of the Act defines supplemental coverage as consisting of: (1) a reduction in the deductible, coinsurance percentage, initial coverage limit, or any combination thereof; or (2) coverage of drugs that are excluded from the definition of a ''Part D drug'' because of the application of section 1927(d)(2) or (3) of the Act.

Provided that Part D plans include only those activities allowed under our definition of dispensing fees in the dispensing fees negotiated with network pharmacies and offer standard contracting terms and conditions to all pharmacies, we note that Part D plans have the flexibility to vary the actual dispensing fee paid to pharmacies. For example, Part D plans may need to increase the dispensing fees paid to rural or long-term care pharmacies in order to obtain their participation in networks and meet the pharmacy access standards.

As detailed elsewhere in this preamble, Part D plans will be required to ensure adequate access to home infusion services as part of their pharmacy network access standards. Thus, enrollees will have access to home infusion services, though they may have to pay for supplies, equipment, and professional services out-of-pocket particularly if they are enrolled in a Part D plan and have no source of supplemental coverage.

As we noted in the proposed rule, our definition of dispensing fees under Part D will not carry over to Part B of the Medicare program. Section 1842(o)(2) of the Act gives the Secretary discretionary authority to pay a dispensing fee to a licensed pharmacy that furnishes certain covered Part B drugs and biologicals to Medicare beneficiaries. While the term ''dispensing fee'' is not defined in section 1842(o)(2) of the Act, the considerations under Medicare Part B, a more comprehensive health insurance product that has separate payment mechanisms for durable medical equipment and professional services, are different from those under Part D.

Comment: Some commenters did not support a particular option for defining the term ''dispensing fees,'' but were more concerned about including certain activities in the definition of dispensing fees (for example, staff, equipment, automation, facilities overhead, time inputting information into a computer, resolving problems with PBMs and prescribing practitioners, counseling the patient, waste disposal, turning the medication over to the patient, particularly when it involved home delivery, and actually packaging the medications). Many of these commenters noted that pharmacists merit a small profit and that dispensing fees should not be specifically designed simply to meet costs. Others felt that terms used in the proposed options were too vague. Specifically, they wanted the meaning of dispensing to be defined to include the costs they outlined. They also wanted to account for the level of complexity and include clear definitions of reconstituting, mixing and compounding drugs, which they believe involve very different equipment, skill and time resources.

Response: We have defined the term ''dispensing fees'' in § 423.100 of our final rule to include reasonable pharmacy costs associated with ensuring that possession of the appropriate covered Part D drug is transferred to a Part D enrollee. We specify that reasonable pharmacy costs may include costs associated with a pharmacist's time in checking the computer for information about an individual's coverage, performing quality assurance activities consistent with § 423.153(c)(2) of our final rule, measurement or mixing of the covered Part D drug, filling the container, physically providing the completed prescription to the Part D enrollee, delivery costs, special packaging costs, and overhead costs associated with maintaining the facility and equipment necessary to operate the pharmacy. We clarify that in using the term ''reasonable'' pharmacy costs, our intent is to convey that such costs be appropriate for the typical beneficiary in that pharmacy setting. We believe that our definition clarifies commenters' concerns about the inclusion of some overhead costs, time spent inputting information into a computer and resolving problems with PBMs and prescribing practitioners, transferring the medication to the patient, and special packaging costs.

We clarify that reasonable delivery costs include only those costs appropriate for the typical beneficiary in a particular pharmacy setting. Thus, while it would be appropriate for Part D plans to reimburse long-term care, mail-order, and home infusion pharmacies for home delivery costs via the dispensing fee, this would not be the case for retail pharmacies (where the term ''delivery'' would be limited to the transfer of a covered Part D drug from the pharmacist to the patient at the point of sale) because the typical retail customer does not require home delivery. While retail pharmacies may offer home delivery services, Part D plans may not reimburse those pharmacies for these costs, and the delivery cost must be borne by the beneficiary.

As concerns patient counseling, dispensing fees for covered Part D drugs may include pharmacy costs associated with quality assurance activities consistent with § 423.153(c)(2) of our final rule. Section 423.153(c)(1) of our final rule requires Part D plans to represent that pharmacists in their network pharmacies comply with minimum standards for pharmacy practice established by the States. Since almost all States have established requirements for pharmacy practice

related to counseling, we believe that the offer of counseling that pharmacists currently provide their customers will continue consistent with current pharmacy practice in compliance with State requirements. .Any pharmacist counseling activities in addition to those established by the States will have to be negotiated and paid for separately under Part D plans' medication therapy management programs (discussed in greater detail elsewhere in this preamble).

As provided in section 1860D–11(i) of the Act, we cannot intervene in negotiations between pharmacies and Part D plans. Thus, the extent to which Part D plans reimburse pharmacies for their entire dispensing costs (or even in excess of their dispensing costs) will depend on the outcome of those negotiations. In addition, we clarify that we expect Part D plans and pharmacies to account for pharmacy profit as part of negotiated prices—either as part of overhead costs accounted for in dispensing fees or in the reimbursement rates for ingredient costs negotiated with pharmacies.

We clarify that we interpret the term ''mixing'' as used in our definition of the term ''dispensing fees'' to encompass reconstituting and compounding of covered Part D drugs. Further, we note that Part D plans have the flexibility to pay differential dispensing fees to pharmacies based on higher labor costs—for example, for a compounded product relative to a non-compounded covered Part D drug. Plans could also used differential dispensing fees to encourage the use of generics over brand-name drugs as appropriate.

Comment: Another commenter wanted dispensing fees for non-profit entities to reflect their preferred acquisition costs, arguing that without this, Part D would be assisting tax-exempt non-profit competitors of small business pharmacies.

Response: As mentioned previously, we have defined the term ''dispensing fees'' in § 423.100 of our final rule to include pharmacy costs associated with ensuring that possession of the appropriate covered Part D drug is transferred to a Part D enrollee. Plans may wish to consider non-profit entities' preferred acquisition costs in the ingredient cost reimbursement negotiated with those entities as part of negotiated prices on covered Part D drugs. However, it is unclear to us why dispensing fees should vary among non-profit and for-profit pharmacies based on differences in acquisition costs.

Comment: Several commenters emphasized the need to provide dispensing fees tailored to long term care pharmacies. They focused on the need to reimburse long-term care pharmacists for 24-hour care, the specialized packaging that is required, emergency preparation and delivery of medications, and the distinct type of medications typically prepared and delivered.

Response: The definition of dispensing fee in § 423.100 of our final rule encompasses some of the services—for example, specialized packaging, delivery, and preparation of medications (not including the actual administration of those medications)—typically provided by long-term care pharmacies. Additional long-term care pharmacy services could be reimbursed via medication therapy management programs established by Part D plans for institutionalized Part D enrollees.

Comment: Some commenters emphasized the need for the dispensing fee to cover all of the costs involved in providing a medication.

Response: As provided in section 1860D–11(i) of the Act, we cannot intervene in negotiations between pharmacies and Part D plans. Thus, the extent to which Part D plans reimburse pharmacies for their entire dispensing costs will depend on the outcome of those negotiations. Given Part D plans' need to secure a network of providers that meets our access standards, we believe that Part D plans will have every incentive to adequately reimburse pharmacies via dispensing fees for the costs involved with providing covered Part D drugs to Part D enrollees.

c. Long-Term Care Facility

We requested comments regarding the definition of the term long-term care facility in § 423.100 of our proposed rule, which we interpreted to mean a skilled nursing facility (as defined in section 1819(a) of the Act), or a nursing facility (as defined in section 1919(a) of the Act). We were particularly interested to explore whether we should include in the definition facilities other than skilled nursing and nursing facilities—particularly intermediate care facilities for the mentally retarded (ICFs/MR), described in § 440.150, and other types of facilities in which full-benefit dual eligible individuals may reside and which may exclusively contract with long-term care pharmacies in a manner similar to current practice in skilled nursing and nursing facilities.

Comment: We received a number of comments urging us to expand the definition of the term ''long-term care facility'' in the proposed rule. Some of the suggested additions include ICFs/MR; assisted living facilities; other facilities recognized by State law as eligible for payment under Sections 1915(c) (Home and Community Based waivers), 1616(e), and 1115 of the Act; group homes for the developmentally disabled; and other forms of congregate living arrangements regulated by the States. Some commenters suggested that many of these facilities operate under exclusive contracts with long-term care pharmacies. Other commenters urged us not to make the presence of exclusive contracts with long-term care pharmacies the only criterion for defining congregate living arrangements as long-term care facilities, as these beneficiaries could benefit significantly from subsidies for low-income institutionalized Part D enrollees.

Response: We have expanded the definition of the term ''long-term care facility'' in § 423.100 of our final rule to encompass not only skilled nursing facilities, as defined in section 1819(a) of the Act, but also any medical institution or nursing facility for which payment is made for institutionalized individuals under Medicaid, as defined in section 1902(q)(1)(B) of the Act. We note that we have eliminated the reference to nursing facilities as defined in section 1919(a) of the Act, as such facilities are captured as nursing facilities for which payment is made for institutionalized individuals under Medicaid. Such an expansion would include ICFs/MR and inpatient psychiatric hospitals along with skilled nursing and nursing facilities in the definition of a long-term care facility, provided those facilities meet the requirements of a medical institution that receives Medicaid payments for institutionalized individuals under section 1902(q)(1)(B) of the Act. We do not believe that the definition of term long-term care facility should be expanded to include other facilities recognized by State law but not by Medicare or Medicaid, regardless of whether some of these facilities contract on an exclusive basis with long-term care pharmacies. Furthermore, we do not believe that our definitions of terms associated with institutionalized Part D enrollees should conflict. Our revised definition of the term ''long-term care facility'' is consistent with the definition of ''institutionalized'' in subpart P of this rule and will allow for residents of a number of institutional settings to benefit from the special rules for access to covered Part D drugs established for residents of long-term care facilities. 2. Requirements Related to Qualified Prescription Drug Coverage (§ 423.104)

Under section 1860D–11(e)(2)(A) of the Act, we may approve as Part D sponsors only those entities proposing to offer qualified prescription drug

coverage in accordance with our requirements. As provided in section 1860D–2(a)(1) of the Act, qualified prescription drug coverage may consist of either standard prescription drug coverage or alternative prescription drug coverage.

a. Standard Prescription Drug Coverage

As provided under section 1860D–2(b) of the Act, ''standard prescription drug coverage'' consists of coverage of covered Part D drugs subject to an annual deductible; 25 percent coinsurance (or an actuarially equivalent structure) up to an initial coverage limit; and catastrophic coverage after an individual incurs out-of-pocket expenses above a certain threshold. In 2006, the annual deductible will be $250, the initial coverage limit will be $2,250, and the out-of-pocket threshold will be $3,600.

Once a Part D enrollee reached the annual out-of-pocket threshold, in 2006, his or her nominal cost-sharing will be equal to the greater of: (1) 5 percent coinsurance; or (2) a copayment of $2 for a generic drug or a preferred multiple source drug and $5 for any other drug, or an actuarially equivalent structure. (See Table C–1 for a summary version of standard prescription drug coverage benefits for 2006.)

Section 1860D–2(b) of the Act provides that, beginning in 2007, the annual deductible, initial coverage limit, out-of-pocket threshold, and beneficiary cost-sharing after the out-of-pocket threshold is met are to be adjusted annually. In accordance with section 1860D–2(b)(6) of the Act, these amounts will be increased over the previous year's amounts by the annual percentage increase in average per capita aggregate expenditures for Part D drugs for the 12-month period ending in July of the previous year. We requested comments regarding the methods and data sources we might use to determine the annual percentage increase in the first several years of the Part D program.

TABLE C–1
STANDARD PRESCRIPTION DRUG COVERAGE BENEFITS FOR 2006

	Cost-Sharing Percentage	Beneficiary Out-of-Pocket Costs	Plan Payment Percentage	Plan Payment
Annual Deductible ($0-$250 in spending on covered Part D drugs)	100 percent	$250	0 percent	$0
Initial Benefit ($250.01-$2,250 in spending on covered Part D drugs)	25 percent[1]	$500[2]	75 percent[1]	$1,500
No coverage of costs ($2,250.01-$5,100[3] in spending on covered Part D drugs)	100 percent	$2,850[3]	0 percent	$0
Catastrophic Coverage (after the enrollee has incurred out-of-pocket costs on covered Part D drugs greater than $3,600; this is generally equivalent to $5100[3] in covered Part D drug spending)	The greater of: (1) 5 percent; or (2) $2 for a generic or preferred multiple source drug/$5 for other drugs.[1]	—	95 percent	—

[1] Entities have the option of substituting a cost-sharing structure that is actuarially equivalent.
[2] $500 is the maximum out-of-pocket costs if coverage is based on 25 percent coinsurance. Under an actuarially equivalent cost-sharing structure, the maximum out-of-pocket costs and the maximum plan payment for any Part D enrollee could be higher or lower.
[3] This figure may, in fact, be higher to the extent that a Part D enrollee is reimbursed for out-of-pocket costs for covered Part D drugs covered under his or her plan by a group health plan, insurance or otherwise, or other third party arrangement.

In our proposed rule, we interpreted the provisions of section 1860D 2(b) of the Act to provide for two distinct types of standard prescription drug coverage-''defined standard coverage'' and ''actuarially equivalent standard coverage.'' Section 1860D–2(b)(2)(A)(ii) of the Act provides that Part D sponsors offering actuarially equivalent standard prescription drug coverage will be permitted to substitute cost-sharing requirements (including tiered structures tied to Part D plan formularies and particular pharmacies in a Part D plan's network) for costs above the annual deductible and up to the initial coverage limit, provided that those alternative cost-sharing requirements are actuarially equivalent to an average expected coinsurance of 25 percent for costs above the annual deductible and up to the initial coverage limit. Alternative cost-sharing arrangements under actuarially equivalent standard coverage could include reducing cost-sharing to $0 for generic or preferred covered Part D drugs, as provided under section 1860D–2(b)(5) of the Act, as long as the cost-sharing structure is actuarially equivalent to an average expected coinsurance of 25 percent for costs above the annual deductible and up to the initial coverage limit.

Based on our interpretation of section 1860D–2(b)(5) of the Act, we also proposed allowing Part D plans offering actuarially equivalent standard coverage to establish cost-sharing of an amount that is actuarially equivalent to the expected cost-sharing above the out-of-pocket threshold. We proposed requiring that any alternative cost-sharing structure for costs in the catastrophic range (whether under actuarially equivalent standard coverage or enhanced alternative coverage) be actuarially equivalent to standard prescription drug coverage's structure of the greater of 5 percent coinsurance or $2/$5 copayments. We noted that any such alternative cost-sharing arrangements would be reviewed, along with the rest of a Part D plan's benefit design, to ensure that they do not discourage enrollment by certain Part D eligible individuals.

Except as otherwise provided below, the final rule adopts the criteria for standard prescription drug coverage set

forth in § 423.104(e) of the proposed rule.

Comment: Several commenters felt that the benefit structure established in our proposed regulations was too complex and should be simplified to minimize beneficiary confusion.

Response: We do not have the statutory authority to simplify the benefit further, as suggested by this commenter. The MMA provides private plans with a great deal of flexibility to vary their benefit structures consistent with Congressional intent to ensure that Medicare beneficiaries have choices regarding outpatient prescription drug coverage under Part D that fit their particular needs and minimize beneficiary and Medicare costs.

Comment: One commenter asked how cross-licensed drugs will be classified as generics or as brands for the purpose of cost-sharing. The commenter also asks what the co-payments would be for multiple source drugs that are ordered ''dispensed as written.''

Response: The amount of cost-sharing, and any variations in cost-sharing based on brands, generics, or other classifications will be determined by Part D plans.

Comment: Two commenters suggested alternative data sources to use in determining the annual percentage increase in the first several years of the Part D program. The first commenter recommended two data sources to use for years 2007 and 2008—the annual estimates of prescription drug expenditures in the CMS National Health Accounts data (based on census data and sample surveys of private retail pharmacy sales) and employer retiree health plan data (released by Pharmacy Benefit Managers and benefit consulting firms). Either of these sources of data could be used as a starting point, but should be adjusted to account for any difference in trend for Medicare-eligible individuals compared to the overall prescription trend. In addition, the trend in Part D will likely differ from the overall prescription drug trend due to the large volume negotiating power which could control the trend or allow manufacturers leeway to raise drug prices. FEHBP experience may be useful in accounting for such large volume influences in Part D. This commenter also suggested using our Office of the Actuary (OACT) procedure in place for Medicare Advantage to make coverage limit adjustments the following year for over- or under-stated trends. The commenter also noted that the Medicare Current Beneficiary Survey (MCBS) and the Medicare 5 percent sample are not available in a timely enough fashion to be useful data sources.

Another commenter recommended that we use the OACT spending growth projections that will underlie the Fiscal Year (FY) 2007 President's Budget Medicare baseline that will be published in February 2006. We could use the March 2006 OACT Medicare baseline estimates as a reference check on the OACT projections. OACT and the Congressional Budget Office (CBO) are preferred because they use the latest available empirical data based on MCBS, these data are the basis for the Medicare Trustees' Reports, and the data are widely accepted. In addition, this commenter recommended that OACT use the Consumer Price Index for Prescription Drugs and Medical Supplies (CPI-PD), issued in a timely fashion by the Bureau of Labor Statistics (BLS), as the basis for projecting the price inflation component of per capita Part D spending growth. This commenter thought that utilization growth should be based primarily on the analysis of the latest available MCBS data.

Response: We appreciate the ideas suggested by the commenters and will take these recommendations into consideration as we develop our strategy for determining the annual percentage increase in the first several years of the Part D drug benefit program. We will provide further detail regarding the sources of data to be used and how the annual percentage increase will be determined via operational guidance to Part D sponsors prior to the deadline for bid submissions.

b. Incurred Costs/TrOOP Limit

According to section 1860D–2(b)(4)(C) of the Act, beneficiary costs for Part D drugs are only considered incurred (for purposes of applicability toward beneficiary spending against the annual out-of-pocket limit) if they are incurred—

(1) Against any annual deductible, any applicable cost-sharing for costs above the annual deductible and up to the initial coverage limit, and any applicable cost-sharing for costs above the initial coverage limit and up to the out-of-pocket threshold;

(2) By the Part D enrollee (or by another person on behalf of that individual); paid on behalf of a low-income individual under the Part D subsidy provisions described in § 423.782 of the proposed rule; or paid on behalf of the enrollee under a SPAP defined in § 423.454 of the proposed rule; and

(3) On covered Part D drugs (in other words, Part D drugs that are either included in a Part D plan's formulary or treated as being included in a Part D plan's formulary as a result of a coverage determination, redetermination, or appeal under § 423.566, § 423.580, § 423.600, § 423.610, § 423.620, and § 423.630 of our final rule).

We also proposed that beneficiary costs incurred under the following circumstances count as incurred costs (with Part D plans explicitly accounting for such price differentials in the actuarial valuation of their coinsurance in their bids): (1) any differential between a network retail pharmacy's negotiated price and a network mail-order pharmacy's negotiated price for an extended (for example, 90-day) supply of a covered Part D drug purchased at a retail pharmacy; and (2) any differential between an out-of-network pharmacy's usual and customary price for a covered Part D drug purchased in accordance with the out-of-network access rules and the plan allowance for that covered Part D drug. As further explained below, because we have clarified that the differential for a 90-day supply dispensed at a retail network pharmacy will generally be a differential in cost-sharing and not negotiated price (in other words, the difference in cost sharing for the 90-day supply between the retail and mail-order network pharmacies), we have modified the definition of incurred costs in § 423.100.

Section 1860D–2(b)(4)(C)(ii) of the Act provides that any costs for which a Part D individual is reimbursed by insurance or otherwise, a group health plan, or another third-party payment arrangement do not count toward incurred costs; only costs paid by a Part D enrollee, or on behalf of a Part D enrollee by another person, will count as incurred, or TrOOP costs. This provision thus creates a distinction between all enrollee out-of-pocket expenditures and those that are counted as TrOOP expenditures.

Except as otherwise provided below, the final rule adopts the rules applicable to incurred costs set forth in § 423.100 of our proposed rule.

Comment: Several commenters urged us to count all beneficiary spending on Part D drugs whether on a Part D plan's formulary or not toward TrOOP.

Response: Section 1860D–2(b)(4)(C)(i) of the Act specifically excludes from the definition of the term ''incurred costs'' those costs incurred for Part D drugs that are not included (or treated as being included on a formulary as a result of a coverage determination, redetermination, appeal, or exception) on a Part D plan's formulary. Therefore, we do not have the statutory authority to permit the payments to count toward a Part D enrollees' TrOOP limit.

Comment: Many commenters supported our proposal that beneficiary costs incurred as a result of any differential between a network retail pharmacy's negotiated price and a network mail-order pharmacy's negotiated price for an extended (for example, 90-day) supply of a covered Part D drug purchased at a retail pharmacy count as an incurred costs for the purposes of TrOOP. Only one commenter opposed allowing such differentials to count toward TrOOP.

Many commenters supported our proposal that beneficiary costs incurred as a result of any differential between an out-of-network pharmacy's usual and customary price for a covered Part D drug purchased in accordance with the out-of-network access rules and the plan allowance for that covered Part D drug count as an incurred costs for the purposes of TrOOP. Only one commenter specifically opposed our proposal, stating that if the differential were allowed to count toward TrOOP, the use of retail pharmacies would not be cost-neutral to Part D plans because individuals who use retail pharmacies would reach the out-of-pocket limit sooner.

Response: We agree with the majority of commenters that it is appropriate to allow beneficiary payment differentials to count toward TrOOP in cases in which a beneficiary accesses a covered Part D drug consistent with the out-of-network policy in § 423.124(a) of our final rule.

Section 423.120(a)(6) of our proposed rule provided that a Part D enrollee who obtained a 90-day supply of a covered Part D drug at a network pharmacy that is a retail pharmacy rather than a network mail-order pharmacy would be required to pay for any differential in the negotiated price for the covered Part D drug. However, consistent with section 1860D–4(b)(1)(D) of the Act, which requires that the Part D enrollee pay for ''any differential in charge'' when accessing a 90-day supply of a covered Part D drug at a network retail pharmacy instead of a network mail-order pharmacy, we have clarified in § 423.120(b)(10) of our final rule that the beneficiary is not responsible for the difference in negotiated price but, rather, for any higher cost-sharing associated with purchasing the drug at a retail pharmacy rather that a mail-order pharmacy. Any such difference in cost-sharing would therefore automatically count toward a beneficiary's TrOOP expenditures, since the covered Part D drug in question is being purchased at a network pharmacy.

Comment: Several commenters asked us to define the term ''person'' such that a family member can pay for enrollees' cost-sharing on their behalf.

Response: Section 1860D–2(B)(4)(C)(ii) of the Act specifically mentions a family member as an example of a person who may pay cost-sharing on behalf of a beneficiary. We clarify that our proposed rule defined the term ''person'' to include a ''natural person.'' Such a definition of the term ''person'' thus permits other individuals, such as family members, to pay for covered Part D drug cost-sharing on behalf of Part D enrollees. We have therefore retained this definition of the term ''person'' in § 423.100 of our final rule.

Comments: Several commenters supported our proposed definition of the term ''person,'' which would allow financial assistance for beneficiary cost-sharing rendered by ''bona fide'' charities to count toward enrollee's out-of-pocket threshold. Some commenters requested that we clarify what constitutes a ''bona fide'' charity. Another commenter objected to Part D plan member financial assistance programs being treated differently from third-party charities for purposes of TrOOP.

Response: Our broad definition of the term ''person'' captures not only ''bona fide'' charities, but other charitable organizations as well. We note that any arrangement in accordance to which a charitable organization pays a Medicare beneficiary's cost-sharing obligations must comply with all applicable fraud and abuse laws, including, where applicable, the anti-kickback statute at section 1128B(b) of the Act, as well as the civil monetary penalty provision prohibiting inducements to beneficiaries at section 1128A(a)(5) of the Act. Thus, even if a charity is not a bona fide charity for purposes of Federal fraud and abuse law, any drug payments it makes on behalf of Part D enrollees would count toward TrOOP unless otherwise excluded as payments by a group health plan, insurance or otherwise, or similar third party arrangement. Charities that are established, maintained, or otherwise controlled by an employer or union will likely fall under our definition of ''group health plan,'' and any benefits supplementing Part D benefits that they provide will therefore be excluded from TrOOP on this basis.

Comment: We noted in the proposed rule that we were considering whether assistance in paying enrollees' out-of-pocket cost-sharing obligations provided through prescription drug patient assistance programs sponsored by pharmaceutical manufacturers would be allowed under Federal fraud and abuse laws, including the anti-kickback statute, section 1128B(b) of the Act, as well as the civil monetary penalty provision at Section 1128A(a)(5) of the Act.

We received a number of comments requesting clarification regarding whether assistance in paying enrollees' out-of-pocket cost-sharing obligations provided through pharmaceutical manufacturer-sponsored patient assistance programs (PAPs) would be permissible under Federal fraud and abuse laws and request that we work with the OIG to develop guidelines. Some commenters believe that financial assistance and product donations provided by PAPs should be allowed to count toward beneficiaries' TrOOP expenditures. Some of these commenters recommended that product donations be counted as incurred costs and valued at the price beneficiaries would have paid at a network pharmacy (the negotiated price). One commenter recommended that we allow manufacturers to provide funds to Part D plans so that Part D plans can apply appropriate criteria and make payments on behalf of manufacturers. Another commenter cautions us that without a change in the current interpretation of Federal fraud and abuse laws preventing PAPs from providing cost-sharing assistance, many low-income beneficiaries may avoid filling scripts, resort to splitting pills, and interrupt critical drug therapy.

Response: Regardless of whether a manufacturer patient assistance program is a bona fide charity for the purpose of Federal fraud and abuse laws, any drug payments it makes on behalf of Part D enrollees would count toward TrOOP unless these organizations qualify as group health plans, insurance or otherwise, or similar third-party payment arrangements. However, any arrangements pursuant to which a charitable organization pays a Medicare beneficiary's cost-sharing obligations must comply with Federal fraud and abuse laws, where applicable, including the anti-kickback statute at section 1128(b) of the Act, as well as the civil monetary penalty provision prohibiting inducements to beneficiaries at section 1128A(a)(5) of the Act.

A related issue although it is not mentioned in the proposed rule is whether pharmacies can waive or reduce Part D cost-sharing obligations given Federal fraud and abuse laws and, if they can, whether such waived or reduced cost-sharing should count toward a beneficiary's TrOOP limit. Although we did not receive comments on this matter, we would like to clarify our policy. Under the new exception to

the anti-kickback statute added by section 101(e) of the MMA, pharmacies are permitted to waive or reduce cost-sharing amounts provided they do so in an unadvertised, non-routine manner after determining that the beneficiary is financially needy or after failing to collect the cost-sharing amount despite reasonable efforts, as set forth in section 1128A(i)(6)(a) of the Act. In addition, a pharmacy may waive or reduce a beneficiary's Part D cost-sharing without regard to these standards for beneficiaries enrolled in a Part D plan eligible for the low-income subsidy under section 1860D–14 of the Act, provided the pharmacy has not advertised that the waivers or reductions of cost-sharing are available. Depending on the circumstances, pharmacies that waive or reduce cost-sharing amounts for covered Part D drugs without following the requirements of the pharmacy waiver safe harbor could be subject to civil monetary penalties and exclusion from participating in Federal health care programs, as well as criminal fines and imprisonment under the anti-kickback statute.

We will allow waivers or reductions of Part D cost-sharing by pharmacies to count toward TrOOP. Not allowing such waived or reduced cost-sharing to count toward TrOOP would make it more burdensome for Part D plans given the need to track down whether cost-sharing was actually incurred by a beneficiary rather than a pharmacy. Moreover, we believe this option is consistent both with the definition of ''person'' in the proposed rule (making waiver or reduction of cost-sharing applicable toward an enrollee's incurred costs), and with Congressional intent in amending the anti-kickback statute to provide for a pharmacy waiver safe harbor.

Comment: Several commenters asked that coverage supplementing the benefits available under Part D coverage provided by various government programs be allowed to count as incurred costs for purposes of TrOOP. These government insurers and programs included Medicaid (using State-only funds), Medicaid Section 1115 ''Pharmacy Plus'' waiver programs, Federally qualified health centers (FQHCs), the Department of Veterans Affairs health care program, and local or State indigent drug programs.

In addition, a substantial number of commenters urged us to allow coverage that supplements the benefits available under Part D coverage that is provided by AIDS Drug Assistance Programs (ADAPs) funded under the Ryan White CARE Act to count as incurred costs. These commenters argued that ADAPs are an integral component of the safety net for HIV/AIDS patients because they fill coverage gaps in public and private insurance for critical HIV/AIDS drug treatments. They argue that if ADAP supplemental coverage payments do not count as incurred costs, ADAPs will have little incentive to coordinate coverage with Part D plans, particularly if Part D plans impose user fees on ADAPs. Many of these commenters also urged us to define ADAPs as SPAPs so that their supplemental coverage will be considered incurred costs for the purposes of TrOOP.

Several commenters also objected to the inclusion of IHS and Indian Tribes and Tribal organizations, and urban Indian organizations (collectively I/T/U) facilities in the definition of ''insurance or otherwise'' in § 423.100 of our proposed rule. Since IHS beneficiaries—by custom and regulation—may not be charged any cost-sharing, I/T/U facilities must provide supplemental coverage for all cost-sharing that would have been assessed by a Part D plan. For this reason, the commenters argue, our proposed regulations essentially ensure that most IHS beneficiaries will never incur costs above the out-of-pocket threshold and thus subject AI/AN enrollees and the I/T/U pharmacies that serve them to severe financial penalties in comparison to non-AI/ANs and non-I/T/U pharmacies. I/T/U facilities will have to continue to use their limited appropriated funds to pay the prescription drug costs of AI/AN beneficiaries. Commenters further argue that the proposed exclusion of financial assistance for cost-sharing provided by I/T/U facilities is not required by the statute and is simply an interpretation of the term ''insurance or otherwise.'' Given the Federal government's obligation to provide health services to AI-ANs based on the government-to-government relationship between the United States and Tribes, these commenters argue that IHS and tribal health programs are not ''insurance or otherwise,'' but instead ''persons'' given that I/T/U facilities are the functional equivalent of ''family members.'' We were also asked to clarify why supplemental coverage of deductible costs counts toward a beneficiary's deductible limit, but supplemental coverage of cost sharing above the deductible and initial coverage limit, does not count toward TrOOP.

Response: Section 1860D–24(a)(1) of the Act extends the coordination of benefits provisions required for SPAPs to entities providing other prescription drug coverage—including Medicaid programs, Section 1115 waiver demonstrations, group health plans, Federal Employee Health Benefits Program (FEHBP), military coverage (including TRICARE), and ''such other health benefit plans or programs that provide coverage or financial assistance for the purchase or provision of prescription drug coverage on behalf of Part D eligible individuals as the Secretary may specify.'' Section 1860D–24(b) of the Act defines includes among these entities providing other prescription drug coverage some government payers, which when coupled with section 1860D–24(a)(2) of the Act, which specifically applies the TrOOP provisions at 1860D–2(b)(4)(D) of the Act to Rx plans suggests that the Congress intended for the term ''insurance or otherwise'' to include government benefit plans or programs that provide health care or pay the cost of covered Part D drugs. Although section 1860D–24(b) of the Act does not list all the government health care programs we consider to be ''insurance or otherwise,'' in the absence of a meaningful distinction between those entities specifically listed in section 1860D–24(b)—Medicaid, SPAPs, TRICARE, and FEHBP—and other government health care programs, allowing payments from such other programs to count toward TrOOP would be arbitrary. Further, in giving the Secretary the authority to identify other entities providing other prescription drug coverage under section 1860D–24(b)(5) of the Act, the Congress contemplated that its list of entities providing other prescription drug coverage was not exhaustive.

For additional clarification of this issue, we have split the definition of ''insurance or otherwise,'' in our proposed rule into two separate definitions—''insurance'' and ''or otherwise''—in our final rule. The term insurance (at § 423.100 of our final rule) refers to a health plan that provides, or pays the cost of covered Part D drugs, including, but not limited to health insurance coverage, a MA plan, and a PACE organization. We note that our definition of ''insurance'' does not modify the definition of ''health plan'' at 45 CFR 160.103 of the HIPAA Administrative Simplification Regulations, or any interpretation thereof issued by the Department of Health and Human Services.

We believe that the phrase ''or otherwise'' refers to government-funded health programs. We have defined the term ''government-funded health programs'' at § 423.100 of our final rule to mean any program established, maintained, or funded—in whole or in part—by the Federal government, the

governments of States or political subdivisions of States, or any agency or instrumentality of these governments which uses public funds in whole or in part to provide to, or pay on behalf of, an individual the cost of Part D drugs. Thus, insurance or otherwise encompasses not just traditional health insurance coverage that is not considered a group health plan, but also government programs and entities (including the Department of Veterans Affairs (VA), IHS, Federally Qualified Health Centers (FQHCs), Department of Labor (DOL) Federal Workers' Compensation Program), government insurers (including Medicaid, Medicaid 1115 demonstrations, and the State Children's Health Insurance Program (SCHIP)), and government-sponsored funds (including black lung benefits, Ryan White CARE Act funds, and State special funds that assist certain individuals with their medical costs, such as a special fund for AIDS patients).

We believe we have defined these terms consistent with the Congress's intent of reducing incentives for current employers, other insurers, and government programs to reduce their current levels of coverage. Because costs for covered Part D drugs paid by insurance or otherwise on behalf of a Part D enrollee do not, as previously discussed, count as incurred costs, any coverage that supplements the benefits available under Part D coverage that are provided to beneficiaries by Medicaid, Medicaid Section 1115 ''Pharmacy Plus'' waiver programs, the VA health care program, the IHS, ADAP programs, and local or State indigent drug programs would not count as an incurred cost for purposes of TrOOP. We note, however, that to the extent that a State provides assistance with covered Part D costs to Part D enrollees with State-only funds and meets the requirements of a State Pharmaceutical Assistance Program as specified in § 423.464(e)(1), such assistance does count as an incurred cost as provided by section 1860D–2(b)(4)(C)(ii) of the Act. However, if an entity providing for or paying the cost of drugs receives a government grant none of which is used to pay for drugs (for example, a low-income housing grant)—such an entity is not considered a government-funded program. On the other hand, if an entity pays for drugs using a mix of private and public funds, the entity is considered a government-funded health program, and all of its drug spending is excluded from TrOOP.

As mentioned above, Pharmacy Plus program costs, including State spending, cannot be counted towards TrOOP because Pharmacy Plus programs are funded under Medicaid and therefore do not qualify as SPAPs. For this reason, we believe that, generally, States will be better off and will realize savings if they restructure their prescription drug programs as SPAPs, rather than continuing their Pharmacy Plus programs. Their savings could be used in a variety of ways, such as directly paying for their enrollees' Part D premiums, wrapping around the Part D benefit by paying for the required cost-sharing, or paying Part D plans for supplemental benefits.

According to IHS estimates, we anticipate that a large proportion of AI/ANs will be eligible for low-income subsidies under Part D, which should significantly limit the financial impact on I/T/U facilities. For those AI/ANs not eligible for the low-income subsidies and enrolled in a Part D plan, the IHS will still obtain some benefit from Part D coverage because I/T/U facilities participating in Part D plan networks will be reimbursed for 75 percent of spending (on average) between the deductible and the initial coverage limit. Moreover, AI/AN enrollees will experience no difference in the way they obtain their prescription drugs to the extent that they use I/T/U pharmacies or IHS-contracted pharmacies.

ADAPs cannot be considered SPAPs because these programs receive Federal funding. As discussed in subpart J, we have interpreted section 1860D–23(b) of the Act, which requires SPAPs to be State programs that provide financial assistance for the purchase of provision of prescription drugs, to mean that an SPAP must provide such assistance with State funds. Therefore, the definition of the term SPAP excludes any program in which program funding is from Federal grants, awards, contracts, entitlement programs, or other Federal sources of funding (though we clarify that this does not exclude some Federal administrative funding or incidental Federal monies). Since ADAPs receive Federal funding, they cannot be defined as SPAPs under § 423.454 of our final rule. However, according to HRSA estimates, we anticipate that a substantial majority of ADAP enrollees will qualify for low-income subsidies. For those ADAP enrollees who do not receive a full or partial subsidy, we estimate that the Part D benefit would pay 75 percent, on average, of an enrollee's covered Part D drug expenditures between the deductible and initial coverage limit. To ensure coordination of benefits for the HIV/AIDS and population, as well as to eliminate any barriers to enrolling in Part D benefits, the ADAP program may wish to pay for their beneficiaries' premiums to eliminate any barriers to Part D benefits.

Per several commenters' request, we also wish to clarify that section 1860D–2(b)(4)(C) of the Act defines the term ''incurred costs'' only for the out-of-pocket threshold. Thus, the fact that coverage that supplements the benefits available under Part D coverage that is provided by certain entities is excluded from the definition of incurred costs for purposes of TrOOP has no bearing on counting that supplemental coverage against the deductible. In other words, ADAPs, IHS, and other programs providing coverage that supplements the benefits provided under Part D may subsidize costs incurred against a Part D enrollee's deductible for those patients unable to afford these costs. The provision of the supplemental coverage will not affect an enrollee's ability to satisfy the deductible and therefore qualify for reduced cost-sharing between the deductible and the initial coverage limit. In addition, these entities are not precluded from paying for a Part D enrollee's cost-sharing above the out-of-pocket threshold once a beneficiary has accumulated incurred costs in excess of the out-of-pocket threshold.

Comment: We requested comments regarding the treatment of health savings account (HSAs), flexible savings arrangements (FSAs), health reimbursement arrangements (HRAs), and medical savings accounts (MSAs) vis-à-vis our definitions of ''group health plan,'' ''insurance or otherwise,'' and ''third party payment arrangements.'' Many commenters suggested that HSAs, FSAs, MSAs, and HRAs be excluded from our proposed definition of ''group health plan'' such that any distributions used by Part D enrollees to pay out-of-pocket costs associated with cost-sharing for covered Part D drugs are allowed to count as incurred costs. These commenters agreed that these funds are analogous to beneficiaries' bank accounts. Some of these commenters asked that we specify that payment of out-of-pocket expenses via these accounts count toward TrOOP only when such accounts are bona fide arrangements set up in accordance with IRS rules and guidance, such funds are not limited to paying prescription drug expenses, and individuals have control over how the funds from these accounts are utilized. One commenter notes that any exemption of HSAs, FSAs, MSAs, and HRAs from our definition of ''group health plan'' should be written carefully to avoid circumvention of Medicare Secondary Payer (MSP) laws. Another

commenter noted that from Part D plans' perspective, it makes the most sense administratively and operationally to allow funds from these accounts to count toward incurred costs because it will be difficult for them to identify and differentiate between different sources of enrollee funds and carve out the payments from TrOOP calculations. One commenter noted that HRAs present a more difficult case, since they are by definition employer-funded only. However, this commenter noted that, from an administrative perspective, it may be difficult to distinguish between HRAs and other types of personal health savings vehicles.

In contrast, several commenters disagreed that HSAs and similar accounts should be exempted from our definition of ''group health plan.'' Some of these commenters believed that contributions from one type of employer-sponsored benefit should not receive differential treatment than other types, particularly when contributions from employer-sponsored group health coverage are not being counted as incurred costs. One commenter thought that we had no statutory authority to create a special rule to exempt HSAs from our definition of ''group health plan.'' This commenter was concerned about non-employer sponsored HSAs, that these funds are not like bank accounts given the tax breaks associated with them, that allowing these funds to count toward TrOOP discriminates against retirees with employer-sponsored drug coverage, and that we would create a substantial windfall and unjustified double taxpayer subsidy.

Response: We agree with the majority of the commenters that HSAs, FSAs, and MSAs are essentially analogous to a beneficiary's bank account, and that distributions from these personal health savings vehicles should count as incurred costs for the purposes of the out-of-pocket threshold. However, as one commenter noted, we believe that HRAs are fundamentally different from these personal health saving vehicles because they are required to be solely employer-funded. Although employers are permitted to contribute funds to HSAs, FSA, and MSAs and may administer the benefits associated with these accounts, employees are not foreclosed from contributing to these vehicles as they are under HRAs. Excluding FSAs, MSAs, and HSAs from the definitions of ''insurance'' and ''group health plan'' for purposes of calculation of TrOOP expenditures will further our objective of encouraging beneficiaries to set aside their own money for drug expenses by allowing those funds to count toward enrollees' TrOOP expenditures. In order to clarify that distributions from HSAs, FSAs, and MSAs can be counted toward a Part D enrollee's incurred costs, we have revised the definitions in § 423.100 of our final rule accordingly and added a definition of ''personal health savings vehicles'' that is limited to HSAs, FSAs, and Archer MSAs.

We note that the term ''group health plan'' is used in reference to TrOOP, creditable coverage, and the retiree subsidy in our final rule, but that we do not define the term uniformly in our final rule. Section 1860D–22(c) of the Act explicitly defines ''group health plan'' to include ERISA plans, which may include an FSA, MSA, and, in limited circumstances, an HSA. The reference to ''group health plan'' under the creditable coverage provisions in section 1860D–13(b)(4)(C) of the Act states that a group health plan includes a qualified retiree prescription drug plan as defined under section 1860D–22 of the Act, which is in turn based on the definition of ''group health plan'' under section 1860D–22(C) of the Act and thus may include an MSA or, in limited circumstances, an FSA or HSA. In contrast, the TrOOP provisions simply refer to a ''group health plan,'' without specifying what this term may include. Given that the statutory references to ''group health plan'' under the TrOOP and creditable coverage provisions use different language, and that the policies underlying these issues are different, we have adopted two different definitions of the term ''group health plan'': one with regard to the TrOOP provisions, and another with regard to the remaining provisions of Part D, including the creditable coverage and the retiree subsidy provisions. While the Congress specifically enumerated two types of coverage to be considered group health plans with regard to creditable coverage, the TrOOP provisions do not.

We also note that the definition of a ''group health plan'' used to implement the Part D drug benefit will differ from the definition of ''group health plan'' used by the Medicare Secondary Payer (MSP) program for recovery of Medicare payments. While both of our Part D definitions of ''group health plan'' are based on the ''ERISA'' definition set forth at 29 U.S.C. 1167(1), the MSP definition is taken from the Internal Revenue Service (IRS) definition of ''group health plan'' at 26 U.S.C. 5000(b)(1). Therefore, the definitions of ''group health plan'' in § 423.100 and § 423.4 of our final rule do not permit circumvention of the MSP laws since they will not apply in the MSP context.

b. Alternative Prescription Drug Coverage

Section 1860D–2(c) of the Act provides that a Part D sponsor may offer an alternative prescription drug benefit design, provided that the Part D sponsor applies for and receives our approval for the proposed alternative. In order to receive approval to offer an alternative prescription drug benefit design, a Part D sponsor will have to meet the requirements related to actuarial equivalence described in section 1860D–2(c)(1) of the Act, and must use defined standard coverage (and not actuarially equivalent standard coverage) as a fixed point of comparison.

- Basic Alternative Coverage

Beyond the required parameters for alternative coverage discussed above, we interpreted the provisions of section 1860D–2(c) of the Act, together with section 1860D–2(a)(1) of the Act, as providing for two forms of alternative coverage—either ''basic alternative coverage'' or ''enhanced alternative coverage.'' Basic alternative coverage refers to alternative coverage that is actuarially equivalent to defined standard prescription drug coverage. Enhanced alternative coverage refers to alternative coverage that exceeds defined standard coverage by offering supplemental benefits.

Within the parameters for alternative prescription drug coverage described above, a Part D sponsor with a basic alternative prescription drug benefit design can theoretically—by combining features such as a reduction in the deductible, changes in cost-sharing, and a modification of the initial coverage limit—still maintain an actuarial value of coverage equal to defined standard prescription drug coverage.

- Enhanced Alternative Coverage

Section 423.104(f) of our proposed rule permitted Part D sponsors to provide qualified prescription drug coverage that includes supplemental benefits. We referred to any Part D benefit package that includes supplemental benefits as ''enhanced alternative coverage.''

Enhanced alternative coverage includes basic prescription drug coverage and supplemental benefits. The requirements for the supplemental benefits that may be included in enhanced alternative coverage are found in section 1860D–2(a)(2) of the Act. These supplemental benefits will supplement basic prescription drug coverage, providing for a package of benefits that exceeds the actuarial value of defined standard coverage. Supplemental benefits can consist of:

+ Reductions in cost-sharing that increase the actuarial value of the coverage beyond that of defined standard coverage; or

+ Coverage of drugs that are specifically excluded from the definition of Part D drugs under section 1860D–2(e)(2)(A) of the Act and § 423.100 of our proposed rule.

Under section 1860D–2(a)(2)(B) of the Act, a PDP sponsor would not be permitted to offer a prescription drug plan that provided enhanced alternative coverage in a particular service area unless it also offers a prescription drug plan that provides only basic prescription drug coverage (which we defined as either standard prescription drug coverage or basic alternative coverage, with access to negotiated prices) in that same area.

Similarly, as provided under section 1860D–21(a)(1)(A) of the Act, beginning on January 1, 2006, an MA organization cannot offer an MA coordinated care plan in a service area unless that plan, or another MA plan offered by the same organization in the same service area, includes required prescription drug coverage. As defined in § 423.100 of our proposed rule, required prescription drug coverage, for the purposes of an MA organization offering an MA-PD plan, included either: (1) basic prescription drug coverage; or (2) enhanced alternative coverage, provided there is no MA monthly supplemental beneficiary premium applied under the MA-PD plan. The enhanced alternative coverage could be provided without a monthly supplemental beneficiary premium only if a MA-PD plan applied a credit against the otherwise applicable premium of rebate dollars available under section 1854(b)(1)(C) of the Act.

Rebate dollars represent the dollars available for supplemental (and other) benefits when an MA plan's risk-adjusted non-drug bid is under the risk-adjusted non-drug monthly benchmark amount. In other words, to the extent that an MA-PD plan chooses to provide enhanced alternative coverage for no additional premium through the application of rebate dollars, the enhanced alternative coverage would constitute required coverage for the purposes of meeting the requirement in section 1860D–21(a)(1)(A) of the Act.

As provided under section 1860D–21(a)(1)(B)(i) of the Act, an MA organization could not offer prescription drug coverage (other than that required under Parts A and B of Medicare) to enrollees of a medical savings account (MSA) plan. Under section 1860D–21(a)(1)(B)(ii) of the Act, an MA organization also could not offer prescription drug coverage (other than that required under Parts A and B of Medicare) under another type of MA plan—including a private fee-for-service plan—unless the drug coverage it provided under that MA plan consisted of qualified prescription drug coverage and met our requirements regarding required prescription drug coverage.

Given changes in § 417.440(b) of our final rule (described in subpart T), we clarify in our final rule the requirements associated with the offering of enhanced alternative coverage by cost plans. As provided in § 423.104(f)(4)(i) of our final rule, a cost plan that elects to offer qualified prescription drug coverage under Part D may offer enhanced alternative coverage only as an optional supplemental benefit (under § 417.440(b)(2)(ii)), and only if the cost plan also offers basic prescription drug coverage.

As provided in § 423.104(f)(4)(ii) of our final rule, a cost plan that elects to offer Part D coverage as an optional supplemental benefit (under § 417.440(b)(2)(ii)) may only do so if the coverage it offers consists of qualified prescription drug coverage. However, a cost plan that does not offer qualified prescription drug coverage may provide prescription drug coverage that is not qualified prescription drug coverage, and the requirements of Part D do not apply to the coverage.

Except as otherwise provided below, the final rule adopts the rules of alternative coverage set forth in § 423.104(f) and § 423.104(g) of our proposed rule.

Comment: One commenter recommended that we issue regulations encouraging basic alternative coverage including optional drugs because it will offer beneficiaries a more comprehensive benefit package.

Response: We do not have the statutory authority to allow basic alternative coverage to include drugs that are statutorily excluded from the definition of Part D drugs. Coverage of drugs otherwise excluded from the definition of Part D drug under section 1860D–2(e)(2)(A) of the Act is considered a supplemental benefit as provided under section 1860D–2(a)(2) of the Act. As specified in § 423.100 of our proposed and final rules, basic alternative coverage must be actuarially equivalent to defined standard coverage and cannot include any supplemental benefits. The only way that Part D plans may provide supplemental benefits, to include coverage of drugs excluded from the definition of Part D drugs under section 1860–D(2)(e)(2)(A) of the Act, is by providing enhanced alternative coverage.

Comment: One commenter sought clarification as to whether alternative coverage would be subject to the same kind of out-of-pocket cost limits and coverage thresholds instituted under standard prescription drug coverage.

Response: In accordance with section 1860D–2(b)(A)(i)(I) of the Act, Part D plans offering enhanced alternative coverage may only reduce certain cost-sharing specifically, a reduction in the deductible, a reduction in the coinsurance percentage or copayments applicable to covered Part D drugs obtained between the annual deductible, and the initial coverage limit, or an increase in the initial coverage limit. Section 1860D–2(A)(i) does not permit Part D plans to offer enhanced alternative drug coverage consisting of a reduction of the out-of-pocket threshold under § 423.104(d)(5)(iii) of our final rule. Section 1860D–2(c)(3) of the Act also requires that Part D plans offering alternative prescription drug coverage provide the same protection against high out-of-pocket expenditures as defined standard coverage. Thus, enhanced alternative coverage may fill in some of the coverage gaps in defined standard coverage, but it cannot affect the true out-of-pocket threshold described in § 423.104(d)(5)(B)(iii) of our final rule, which will be $3,600 in 2006. In other words, beneficiaries must still incur $3,600 (in 2006) in true out-of-pocket expenses before they can benefit from the Medicare catastrophic coverage cost-sharing amounts (the greater of 5 percent coinsurance or $2/$5 copayments), and before Part D plans are eligible to receive reinsurance subsidies from Medicare. As with actuarially equivalent standard coverage, Part D plans can provide an actuarially equivalent version of the coverage provided after the true out-of-pocket threshold is met. In addition, enhanced alternative coverage can improve this coverage.

Comment: Several commenters opposed the provisions of § 423.104(f) of our proposed rule and recommended that the final rule exclude provisions for enhanced alternative coverage. These commenters argue that this section exceeds the statutory authority supplied to the Secretary under the MMA and that allowing such Part D plans to be offered would make it impossible to make a valid comparison between Part D plans, thus making it more difficult for beneficiaries to choose a Part D plan.

Response: We disagree with these commenters. Section 1860D–2(a)(2) of the Act provides that qualified prescription drug coverage may include supplemental prescription drug

coverage consisting of: (1) reductions in cost-sharing (for example, a reduction in the deductible, a reduction in the coinsurance percentage or copayments applicable to covered Part D drugs obtained between the annual deductible and the initial coverage limit, or an increase in the initial coverage limit), provided these reductions in cost-sharing increase the actuarial value of the benefits provided above the actuarial value of basic prescription drug coverage; or (2) coverage of drugs that are specifically excluded as Part D drugs under section 1860D–2(e)(2)(A) of the Act. ''Enhanced alternative coverage'' is simply our term for qualified prescription drug coverage that includes these supplemental benefits specifically permitted by the statute. We understand commenters' concerns about beneficiaries' ability to compare Part D plan features given the benefit flexibility design accorded to Part D plans under the MMA and will work to ensure that our comparative information is as standardized and user friendly as possible.

c. Negotiated Prices

Section 1860D–2(d)(1) of the Act requires that a Part D sponsor provide beneficiaries with access to negotiated prices for covered Part D drugs. As required by section 1860D–2(d)(1)(B) of the Act, negotiated prices will have to take into account negotiated price concessions for covered Part D drugs such as discounts, direct or indirect subsidies, rebates, and direct or indirect remunerations, and would include any applicable dispensing fees. Access to negotiated prices will be provided even when no benefits would otherwise be payable on behalf of an enrollee due to the application of a deductible, the initial coverage limit, or other cost-sharing.

As required under section 1860D–2(d)(1)(C) of the Act, prices negotiated with manufacturers for covered Part D drugs by either (1) a Part D plan, or (2) a qualified retiree prescription drug plan for covered Part D drugs provided on behalf of Part D eligible individuals will not be taken into account in making best price determinations under the Medicaid program.

Section § 423.104(h)(3) of our proposed rule required that Part D sponsors disclose to us all aggregate negotiated price concessions including discounts, direct or indirect subsidies, and direct or indirect remunerations, they obtain from each pharmaceutical manufacturer that are passed through to the Medicare program in the form of lower subsidies or to beneficiaries in the form of: (1) lower monthly beneficiary premiums; or (2) lower covered Part D drug prices at the point of sale.

As provided under section 1860D–2(d)(2) of the Act, information on negotiated prices reported to us for the purposes of ascertaining the level of pass-through will be protected under the confidentiality provisions applicable to Medicaid pricing data under section 1927(b)(3)(D) of the Act. However, that these confidentiality protections did not preclude audit and evaluation of negotiated price concession information by the HHS OIG.

As provided under section 1860D–2(d)(3) of the Act and codified in § 423.104(h)(4) of our proposed rule, we are authorized to conduct periodic audits either directly or through contracts with other organizations of the financial statements and records of Part D sponsors pertaining to the Part D plans they offer. As required in section 1860D–2(d)(3) of the Act, this auditing will be performed with the ultimate goal of protecting the Medicare program against fraud and abuse, as well as ensuring proper disclosures and accounting under Part D.

Except as otherwise provided below, the final rule adopts the rules for negotiated prices set forth in § 423.104(h) of our proposed rule.

Comment: Some commenters believed that the phrase ''take into account'' in our definition of negotiated prices is not strong enough, and that we should establish minimum requirements for the proportion of total negotiated price concessions passed through to beneficiaries. Suggestions ranged from a majority (75 to 80 percent) to 100 percent of negotiated price concessions.

Response: Section 1860D–2(d)(1)(B) of the Act specifically requires that negotiated prices ''shall take into account negotiated price concessions, such as discounts, direct or indirect subsidies, rebates, and direct or indirect remunerations.'' Had the Congress intended that all negotiated price concessions be passed through to beneficiaries, they would have used a phrase other than ''take into account'' in the definition of the term ''negotiated prices.''

In addition, section 1860D–2(d)(2) of the Act specifically requires that Part D plans disclose to us aggregate negotiated price concessions that are passed through to enrollees and to us through lower subsidies, lower monthly premiums, and lower prices through pharmacies and other dispensers. In requiring Part D plans to disclose to us the extent to which they pass through negotiated price concessions to enrollees and to us, section 1860D–2(d)(2) of the Act anticipates that Part D plans might not pass through all negotiated price concessions. Therefore, we interpret the definition of the term negotiated prices in section 1860D–2(d)(1)(B) of the Act as requiring Part D plans to pass on to enrollees some, but not necessarily all, of these price concessions and have clarified this interpretation in our definition of the term ''negotiated prices'' in § 423.100 of our final rule. We believe that market competition will encourage Part D plans to pass through to enrollees a high percentage of the negotiated price concessions they obtain in the form of negotiated prices at the point of sale. Establishing minimum threshold levels for the pass-through of negotiated price concessions would have the effect of undercutting market competition, as Part D plans might cluster their negotiated prices around that threshold.

Comment: Some commenters recommended that we clarify how price concessions will be passed through to the pharmacy and to the beneficiaries. Some of these commenters specifically asked us to ensure that Part D plans, not pharmacists, bear the costs of discounts.

Response: The Part D benefit was established by the MMA as a market-based model under which marketplace competition ensures that enrollees receive low prices for prescription drugs. Given this market-based approach envisioned by the Congress, we are wary of regulating negotiations between private parties particularly regarding the specifics of price negotiations so as to ensure that enrollees receive competitive prices on their covered Part D drugs. We note, as well, that pharmacies are not required to contract with Part D plans. To the extent that pharmacies believe that the discounts they are being asked to offer are too high, they can refuse to participate in Part D plan pharmacy networks. Given our pharmacy access standards at § 423.120(a)(1), we expect that pharmacies will have some leverage vis-à-vis the payment provisions in Part D plan contracts.

Comment: Two commenters stated that they considered our requirement that pharmacies pass through negotiated prices during coverage gaps and for non-covered formulary drugs to be price controls.

Response: Section 1860D–2(d)(1) of the Act requires, as implemented under § 423.104(g)(1) of our final rule, that a Part D sponsor provide enrollees with access to negotiated prices for covered Part D drugs even when no benefits would otherwise be payable on behalf of an enrollee due to the application of a deductible, the initial coverage limit, or other cost-sharing. We interpret the

reference to the lack of payable benefits due to the application of the initial coverage limit as referring to that portion of covered Part D drug expenditures between the initial coverage limit and the threshold for catastrophic coverage. In that expenditure range, a beneficiary enrolled in standard prescription drug coverage would be responsible for 100 percent cost-sharing. These are still covered Part D drugs, and enrollees should be able to benefit from negotiated prices during the coverage gap.

We clarify that negotiated prices do not have to be made available for non-covered Part D drugs. However, as we stated in the preamble to our proposed rule, we are interpreting the phrase ''or other cost-sharing'' as a reference to Part D plan designs that include, as part of their formulary design, access to negotiated prices on certain drugs but at a tier within their formulary in which the Part D plan would pay no benefits and the enrollee would be responsible for 100 percent cost-sharing (in other words, a negotiated price would be available and the drug would be on the Part D plan's formulary, but the beneficiary would always be responsible for 100 percent of the drug's negotiated price). These drugs would therefore be formulary drugs and would have to be offered at negotiated prices. As stated elsewhere in this preamble, however, we note that we will review formulary design as part of our benefit package review to ensure that Part D plans do not establish formulary structures (including tiered cost-sharing) that substantially discourage enrollment by certain beneficiaries. To the extent that Part D plans propose using certain cost-sharing tiers (including, but not limited to, 100 percent cost-sharing tiers) in a discriminatory fashion, they would not be allowed.

In addition, we clarify that we interpret the requirement that negotiated prices always be provided to mean that uniform negotiated prices must be available to beneficiaries for a particular drug when purchased from the same pharmacy. In other words, the negotiated price for a particular drug will be the same, at a particular pharmacy, regardless of whether a beneficiary's drug spending is between $0 and the deductible, between the deductible and initial coverage limit, between the initial coverage limit and the out-of-pocket threshold, or in excess of the out-of-pocket threshold. We believe that non-uniform negotiated prices would discourage enrollment by certain Part D eligible individuals in violation of section 1860D–11(e)(2)(D)(i) of the Act and, therefore, plans will not be able to apply differential negotiated prices to any drug purchased from a given pharmacy.

Comment: Other commenters recommended that the definition of the term ''negotiated price'' reflect the price to the Part D plan net of any rebates, discounts, or other price concessions paid to the Part D plan for a covered Part D drug prescription obtained from either a retail or mail-order pharmacy. Some commenters asked that price concessions not be allowed to artificially lower the cost of mail order prescriptions.

Response: Part D sponsors will negotiate prices with pharmacies and manufacturers, and we assume based on current market practices that negotiated prices will vary within a retail pharmacy network, as well as between retail and mail-order pharmacies. How a Part D sponsor nets out negotiated price concessions in its negotiated prices is at the discretion of the Part D sponsor, but we expect that competition will create incentives for Part D sponsors to offer reasonable negotiated prices. Ultimately, however, these pricing issues are between a Part D sponsor and the network pharmacies and manufacturers with whom the Part D plan negotiates price concessions.

Comment: Some commenters recommended that Part D plans be required to reimburse pharmacies to recover costs of purchasing, handling, and dispensing products to beneficiaries.

Response: As provided elsewhere in this preamble, negotiated prices will include any dispensing fees for covered Part D drugs related to the transfer of possession of the covered Part D drug from the pharmacy to the beneficiary, including charges associated with mixing drugs, delivery, and overhead. As provided in section 1860D–11(i) of the Act, we cannot intervene in negotiations between pharmacies and Part D plans. Thus, the extent to which Part D plans reimburse pharmacies for their entire dispensing costs will depend on the outcome of those negotiations.

Comment: Two commenters noted that our definition of the term ''negotiated prices'' appears to envision network model Part D plans, but that MA organizations and cost plans that own and operate their own pharmacies do not negotiate reimbursement rates with contract pharmacies. One commenter recommended that negotiated prices for such MA organizations and cost plans be defined as the prescription charge established by the organization, and that such charge include the acquisition cost of the drug, dispensing, operational, capital, overhead, and margin costs. The commenter suggested that, in determining whether Part D plans' negotiated prices meet the standard of section 1860D–2(d)(1)(B) of the Act, we could either compare an MA organization's negotiated prices to negotiated prices of network model Part D plans in the same market or, alternatively, require the MA organization to demonstrate how it takes price discounts it receives from manufacturers into account in its pricing methodology or formula. Another commenter suggested that we permit such MA organizations to establish a pricing methodology that reflects a good faith effort to reflect prices analogous to those that would be negotiated by an MA organization with third party pharmacy providers, and that we consult with affected MA organizations in establishing this policy.

Response: We clarify that our definition of the term ''negotiated prices'' in § 423.100 of the final rule requires that ''discounts, direct or indirect subsidies, rebates, other price concessions, and direct or indirect remunerations'' be taken into account in establishing covered Part D drug negotiated prices. Plans do not have to take into account pharmacy discounts to the extent that no such discounts exist. Moreover, we note that our definition of the term ''dispensing fees'' in § 423.100 of the final rule indicates that, in the case of pharmacies owned and operated by a health plan, dispensing fees are understood to be the equivalent of all reasonable pharmacy costs included in the definition (those related to the transfer of possession of a covered Part D drug to a Part D plan enrollee), including the salaries of pharmacists and other pharmacy workers as well of the costs associated with maintaining the pharmacy facility and equipment necessary to operate the pharmacy. For purposes of evaluating the validity of a Part D plan's bid, including its negotiated prices for covered Part D drugs, we will request and evaluate disaggregated negotiated price concession data only to the extent that such detail is necessary in order to justify actuarial assumptions or as part of an audit.

Comment: One commenter asked that we define the meaning of the terms ''direct or indirect subsidies'' and ''direct or indirect remunerations.'' Another commenter suggested that negotiated price concessions reported to us should include formulary placement incentives, market share movement incentives, administrative fees paid to

Part D plans, and direct and indirect forms of remuneration. One commenter asked that we provide clarification on how rebates will be calculated, reflected in negotiated prices, and reported to us.

Response: We note that Part D plans may fulfill the requirements of section 1860D–2(d)(2) of the Act through the data submission requirements discussed in further detail in subpart G. In other words, we should be able to determine the proportion of total aggregate price concessions passed through to either the Medicare program or to enrollees based on the cost data Part D plans will be required to submit to us. Although all negotiated price concessions be they direct or indirect subsidies, direct or indirect remunerations, rebates, or discounts must be reported to us, as provided in § 423.104(g)(3) of our final rule, we will require that Part D plans break out any fair market value administrative fees pharmaceutical manufacturers may pay Part D sponsors. The use of the term indirect with direct is meant to be all-inclusive. In other words, we clarify that this means any and all subsidies or remunerations. We will specify in operational guidance the format and frequency of these reports, as well as what constitutes direct or direct subsidies, direct or indirect remunerations, rebates, and discounts.

Comment: We received a number of comments regarding our aggregate negotiated price concession disclosure requirements. Several commenters asked us to clarify that only aggregate price concessions passed through to us and to enrollees will be reported to us, rather than the amount or proportion of total price concessions obtained by a Part D plan. Other commenters thought that Part D plans should be required to disclose all price concessions, not just the proportion passed through to Part D enrollees. A number of other commenters asked that we require the disclosure of negotiated price concession by drug.

Response: We clarify that, as provided under section 1860D–2(d)(2) of the Act, and specified in § 423.104(g)(3) of our final rule, we will require that all aggregate negotiated price concession data and not just the proportion passed through to beneficiaries be reported to us for purposes of Part D plan bids. However, as explained in subpart G, it may be necessary for us to receive disaggregated negotiated price concession data from Part D plans in order to ensure accurate payment to Part D plans. We will provide further information regarding negotiated price concession reporting in separate guidance.

Comment: Several commenters recommended that Part D plans share all negotiated price concession data reporting with SPAPs.

Response: Since nothing in the MMA addresses disclosure of negotiated price information to SPAPs, FOIA rules apply. FOIA applies to requests for data from States. FOIA Exemption 4 protects certain confidential commercial information that is submitted to a Federal agency. Determinations about the applicability of FOIA Exemption 4 to a Part D plan's pricing data would be made on a case-by-case basis depending on whether the submitter of the data could demonstrate that disclosure of this information would likely cause substantial competitive harm to the submitter's competitive position. If FOIA Exemption 4 is found to protect submitted price information, we cannot disclose this information to States because to do so would violate the Trade Secrets Act (18 U.S.C. 1905).

Comment: One commenter stated the ''best price'' provision undermined the original intent of section 1927 (c)(1)(C) of the Act and would have a negative financial impact on the Medicaid prescription drug program.

Response: We believe the Congress intended that there be no Federal barriers to Part D sponsors negotiating the lowest prices possible for their plan members. If negotiated prices counted towards ''best price,'' this could create a disincentive for manufacturers to offer discounts. Further, the purpose of ''best price'' exemptions in section 1927(c)(1)(C) of the Act is to ensure that manufacturers offer Medicaid programs strong rebates that are market-driven, without penalizing the manufacturers indirectly for the discounts they offer by law under other Federal drug programs. Exempting negotiated prices under the new Medicare prescription drug benefit is consistent with that purpose. The issue of effects on Medicaid best price is discussed in the impact analysis.

Comment: One commenter asked for further guidance regarding the ''best price'' exemption, stating that Part D providers should be able to negotiate simultaneously for commercial prices, which would count toward ''best price,'' and for Medicare/qualified retiree prices, which would not count toward ''Best Price.''

Response: Under section 1860D–11(i) of the Act, we have no authority to regulate price concessions between manufacturers and Part D plans. Consequently, we cannot prohibit or require Part D plans from negotiating simultaneously for commercial prices, which would be included in the calculation of the Medicaid drug rebate best price, and Medicare prices, which would not be included in the calculation of the Medicaid drug rebate best price. If Part D plans wish to simultaneously negotiate their commercial and Medicare prices, they are free to do so.

Comment: One commenter suggested that we recommend to the Congress alternatives to the existing ''best price'' rebate formula. The commenter recommended a flat rebate formula to generate savings for State Medicaid programs, while eliminating the negative impact of the ''best price'' formula on the prescription drug market generally.

Response: This regulation does not address the best price provisions of the Medicaid drug rebate statute as we do not have the statutory authority under Title I of the MMA to modify the Medicaid rebate program.

3. Establishment of Prescription Drug Plan Service Areas (§ 423.112)

Section 1860D–11(a)(2) of the Act provides us with the authority to establish PDP regions, and such PDP regions must be established in a manner that is consistent with the establishment of MA regions. Section 1860D–11(a)(2)(B) of the Act stipulates that PDP regions must be, to the extent practicable, consistent with MA regions as established under section 1858(a)(2) the Act. However, we may establish PDP regions that vary from MA regions if we determine that access to Part D benefits would be improved by establishing different regions. Section 1860D–11(a)(2)(C) of the Act stipulates that we designate a separate PDP region (or regions) for the U.S. territories.

Except as otherwise provided below, the final rule adopts the requirements related to the establishment of prescription drug plan service areas set forth in § 423.112 of the proposed rule.

Comment: We received a number of comments on the establishment of PDP regions both in response to the provisions of our proposed rule and as follow-up to a public meeting held in Chicago on July 21, 2004. The majority of commenters favored establishing 50 State-based regions or, more generally, a larger number of smaller regions—close to that of State-level regions. Issues identified in support of 50 State-based regions included the large assumption of risk associated with the establishment of larger regions; insufficient time for Part D plans to negotiate and develop networks, or to renegotiate providers' contracts and form partnerships; potential difficulties in meeting State licensure and solvency requirements; and greater ease in terms of

coordination between Part D plans and SPAPs in providing coverage that supplements the benefits available under Part D coverage. Several commenters recommended an intermediate number of regions between the 10 and 50 regions authorized by the MMA. One commenter cautioned us to develop an appropriate number of regions in order to ensure that beneficiaries particularly those in rural areas have meaningful access to Part D choices. Yet another commenter recommended that we align PDP and MA regions in order to preclude beneficiary confusion by MA enrollees as they try to understand their options during the initial enrollment period for Part D coverage.

Several other commenters specifically recommended that a standalone region be created for Puerto Rico separate from the 50 States and any of the other U.S. territories. These commenters believe it is necessary for Puerto Rico to be placed in its own PDP region because a multi-state PDP region for Puerto Rico would compromise the viability of Part D on the island. They argue that Puerto Rico-based plans have years of experience working with the local Medicare population and its distinct linguistic and cultural traditions and will be disadvantaged when competing with U.S. companies to build provider networks outside Puerto Rico. Some commenters also thought that combining Puerto Rico and another State or States (for example, Florida or New York) will drive up premiums for Puerto Rican enrollees. On the other hand, one commenter argued that a standalone region for Puerto Rico would isolate it, and preferred to stay in the New York region under the MA and PDP programs.

Response: We conducted a market survey and analysis, including an examination of current insurance markets as required in the MMA. Key factors in the survey and analysis included payment rates; eligible population size per region; PPO market penetration; current existence of PPOs, MA plans, or other commercial plans; and presence of PPO providers and primary care providers. Additional factors were also considered, including solvency and licensing requirements, as well as capacity issues. In response to the lack of specificity regarding the PDP regions in our proposed rule, we conducted extensive outreach in order to obtain public input prior to the publication of our final rule. On December 6, 2004, we announced the establishment of 26 MA regions and 34 PDP regions. For maps and fact sheets on the on the regions, please see *http://www.cms.hhs.gov/medicarereform/mmaregions/*.

4. Access to Covered Part D Drugs (§ 423.120)

a. Pharmacy Access Standards

As required by section 1860D–4(b)(1)(C) of the Act, Part D plans must secure the participation in their pharmacy networks of a sufficient number of pharmacies that dispense drugs directly to patients (other than by mail order) to ensure convenient access to covered Part D drugs by Part D plan enrollees. To achieve that goal, we are authorized to establish access rules that are no less favorable to enrollees than rules for convenient access established in the statement of work solicitation (#MDA906–03–R–0002) by the Department of Defense (DOD) on March 13, 2003, for purposes of the TRICARE Retail Pharmacy program. Consistent with the TRICARE standards, our proposed rule required that Part D plans establish pharmacy networks in which:

- In urban areas, at least 90 percent of Medicare beneficiaries in the Part D plan's service area, on average, live within 2 miles of a retail pharmacy participating in the plan's network;
- In suburban areas, at least 90 percent of Medicare beneficiaries in the Part D plan's service areas, on average, live within 5 miles of a retail pharmacy participating in the prescription drug plan's or MA-PD plan's network; and
- In rural areas, at least 70 percent of Medicare beneficiaries in the Part D plan's service area, on average, live within 15 miles of a retail pharmacy participating in the plan's network.

As provided under section 1860D–21(c)(3) of the Act and codified in § 423.120(a)(3)(i) of our proposed rule, we are authorized to waive the pharmacy access standards in § 423.120(a)(1) in the case of an MA-PD plan or cost plan that provides access (other than via mail order) to qualified prescription drug coverage through pharmacies owned and operated by the MA organization that offers the plan or the cost plan. However, in order for the pharmacy access standards to be waived, the MA-PD plan or cost plan in question is required to have a pharmacy network that, per our determination, provides comparable pharmacy access to its enrollees as provided under § 422.112.

Similarly, section 1860D 21(d)(2) of the Act provides that if a private fee-for-service MA plan offering qualified prescription drug coverage provides coverage for drugs, including covered Part D drugs, purchased from all pharmacies regardless of whether they are network pharmacies under contract with the MA plan, and provided that beneficiaries are not charged any cost-sharing above and beyond what they will be charged under standard prescription drug coverage—the pharmacy access requirements will also be waived.

As provided under section 1860D–4(b)(1)(A) of the Act, Part D sponsors will be required to permit the participation in their Part D plan networks of any pharmacy that was willing to accept the plan's terms and conditions. Based on section 1860D–4(b)(1)(B) of the Act, our proposed rule clarified that a Part D sponsor will have the option of reducing cost-sharing for its enrolled beneficiaries below the level that would otherwise apply for covered Part D drugs dispensed through network pharmacies. We interpreted this provision as permitting Part D sponsors from varying cost-sharing not only based on type of drug or formulary tier, but also on a particular pharmacy's status within the Part D plan's pharmacy network-in essence authorizing distinctions between ''preferred'' and ''non-preferred'' pharmacies.

As stipulated under section 1860D–4(b)(1)(E) of the Act and § 423.120(a)(4)(ii) of our proposed rule, pharmacies could not be required to accept insurance risk as a condition of participation in a Part D sponsor's pharmacy network. We defined ''insurance risk'' in relation to a network pharmacy as referring to risk of the type commonly assumed only by insurers licensed by a State, but not including payment variations designed to reflect performance-based measures of activities within the control of a pharmacy, such as formulary compliance and generic drug substitutions, or elements potentially in the control of the pharmacy (for example, labor costs, and productivity).

Section 1860D–4(b)(1)(D) of the Act requires Part D sponsors to allow their enrollees to receive benefits at a network retail pharmacy instead of a network mail-order pharmacy, if they so choose. Consistent with the statute, our proposed rule allowed Part D plan enrollees who choose to obtain an extended supply of a covered Part D drug through a network retail pharmacy to be responsible for any differential between the network retail pharmacy's and the network mail-order pharmacy's negotiated price for that covered Part D drug. We sought comments on our proposal that this price differential be counted as an incurred cost against the annual out-of-pocket threshold and note that, as discussed elsewhere in this preamble, we have modified the level

playing field provision at § 423.120(b)(10) of our final rule to clarify that an enrollee will be responsible for any higher cost-sharing (and not a differential in negotiated price) associated with purchasing a 90-day supply of a covered Part D drug at a network retail pharmacy, as well as our definition of incurred costs at § 423.100 of the final rule.

Except as otherwise provided below, the final rule adopts the access standards set forth in § 423.120(a) of the proposed rule.

Comment: In our proposed rule, we interpreted the TRICARE access standards such that a prescription drug plan or regional MA-PD plan would have been required to meet or exceed the access standards across each region in which it operates, and a local MA-PD plan would have to meet or exceed the access standards in its local service area.

Some commenters supported this application of the TRICARE access standards in our proposed rules (regional for prescription drug plans and MA-PD plans). A number of commenters expressed concerns about the adequacy of our proposed application of the access standards and urged us to apply the standards at the local (zip-code) level. A number of other commenters urged us to apply the TRICARE standards at the State level. Several other commenters recommended that Part D plans meet the access standards at the broadest geographic area served by the plan (for example, regional, multi-regional, or national).

Response: Although section 1860D–4(b)(1)(C)(ii) of the Act directs us to adopt access standards no less favorable to enrollees than those set forth in the March 13, 2003, statement of work solicitation (#MDA906–03–R–0002) of the Department of Defense under the TRICARE Retail Pharmacy Program, we note that the statement of work does not specify the geographic level at which to apply the TRICARE standard. We therefore believe that we have discretion to apply the TRICARE standards at the geographic level we believe to be most appropriate.

Although we considered applying the TRICARE standard at the local (zip code or county) level for Part D plans, we believe such application would make it impossible for Part D plans to meet the standards particularly the rural standard—in some parts of the country. On the other hand, we believe that application of the access standards at the broader, regional level would not adequately ensure convenient access for beneficiaries given the potential for Part D plans to ''average out'' the access standards across many urban, suburban, and rural areas in a region—thus meeting the access standards in the aggregate but potentially leaving certain parts of a region without convenient access to retail pharmacies.

We agree with commenters who proposed a State-level application of the TRICARE pharmacy access standards for regional MA-PD plans and prescription drug plans, and have made changes to § 423.120(a)(1) accordingly such that a prescription drug plan or regional MA-PD plan will have to meet or exceed the access standards across urban, suburban, and rural areas, respectively, in each State in which it operates, a local-MA-PD plan would have to meet or exceed the access standards across urban, suburban, and rural areas, respectively, in each service area (including multi-county service areas) in which it operates, and a cost plan would have to meet or exceed the access standards across urban, suburban, and rural areas, respectively, in each geographic area in which it operates. In other words, a prescription drug plan or regional MA-PD that operates in a multi-region or national service area could not meet the access standards proposed in § 423.120(a)(1) by applying them across the entire geographic area serviced by the plan; instead, it would have to meet the standards in each State of its multi-region or national service area. We believe that such an interpretation is a reasonable compromise between application at the local level and application at the regional or national level, and maximizes Part D plan flexibility while ensuring convenient access to network pharmacies for Part D enrollees.

Comment: Some commenters expressed concern that TRICARE's rural access standard was insufficient to provide convenient access to network pharmacies in rural areas and urged us to adopt a more adequate definition of rural. Others argued for an exceptions process for remote, isolated areas in which it is simply not feasible to establish pharmacy networks that comply with our requirements.

Response: We are aware of the difficulties faced by rural beneficiaries in accessing medical care. We believe that TRICARE's definition of ''rural'' is adequate and have not modified it in our final rule (though we will monitor the access standards over time to ensure they continue to provide convenient access to all beneficiaries). Furthermore, we believe access in rural areas will be improved given our revised interpretation of the access standards, whereby we will evaluate access at the State (and not the regional) level. However, we are aware—based on our experience implementing the Medicare Prescription Drug Discount Card and Transitional Assistance Program—that there are likely to be several States in which meeting the rural access standard will be impossible or impracticable given the lack of infrastructure. We expect to establish an exceptions process, which we will outline in operational guidance to Part D plans that will account for any problem areas and mitigate any disincentives plans may have to avoid doing business in parts of the country in which meeting the pharmacy access standards would be a challenge.

In addition, and as explained elsewhere in this preamble, and codified in § 423.120(a)(2) of our final rule, we will allow Part D plans to count certain non-retail pharmacies—specifically, I/T/U, Federally Qualified Health Center (FQHC), and Rural Health Center (RHC) pharmacies—toward the pharmacy access requirements in § 423.120(a)(1) of our final rule. We believe this policy will help ensure convenient access in rural areas.

Comment: Several commenters asked that we ensure that national Part D plans are created. These commenters thought that national Part D plans would be of benefit to beneficiaries who travel regularly or who reside in more than one State in a given year (for example, ''snowbirds''), and urged that the ramifications of choosing a local MA-PD plan or a regional Part D plan be made clear to beneficiaries who may not realize the implications of such limited geographic access when they select Part D plan coverage.

Response: Although a Part D sponsor may offer a Part D plan in more than one PDP or MA region, it is not required to do so. Therefore, we cannot require national Part D plans, though we certainly recognize the benefits of such plans for some beneficiaries given the limited applicability of our out-of-network access policy. We note that our pharmacy access standards would not in any way preclude Part D sponsors from contracting with pharmacies outside their Part D plans' service areas, provided that the plans meet the pharmacy access requirements within their service areas. Such a feature would be of particular use to beneficiaries who spend significant amounts of time outside their Part D plan's service area (for example, snowbirds) and could make a particular Part D plan that offered such benefits more attractive to beneficiaries who travel regularly. National Part D plans are also of interest to employers who have retirees living throughout the country, and the

employer group waiver authority discussed in subpart J could facilitate these employer-only national Part D plans. We also note that, as part of our information dissemination requirements in § 423.128(b) of the final rule, Part D plans will be required to inform beneficiaries about the plan's service area, as well as the locations of network pharmacies.

Comment: Several commenters asked us to make allowances for ''snowbirds,'' stating that our regulations should allow Part D sponsors to offer ''visitor/traveler'' benefits available under the MA program. One commenter specifically suggested the application of the MA requirements, which allow an organization to provide such benefits to an individual who is temporarily out of the area for up to 12 months. A few commenters stated that we should require prescription drug Part D plans to offer visitor/traveler benefits. One commenter suggested, however, that we allow exceptions for regional Part D plans and those with out-of-network services. One commenter suggested that we consider allowing Part D plans to offer ''travel'' networks without requiring them to contract in those regions, suggesting that this could be an interim approach pending evaluation of the cost/payment experience for both Part D plans and us.

Response: We appreciate the feedback provided by the commenters on applying a visitor/traveler benefit to prescription drug plans as has been provided to the MA program. We do not have the authority to establish a visitor/traveler benefit. However, as noted above, our pharmacy access standards would not in any way preclude Part D sponsors from contracting with pharmacies outside their plans' service areas, provided that plans meet the pharmacy access requirements within their service areas, and such access is not provided outside the United States.

Comment: We interpreted the access requirements in section 1860D–4(b)(1)(C) of the Act as requiring Part D plans to count only retail pharmacies as part of their networks for the purpose of meeting the access standards, and we proposed defining a retail pharmacy as any licensed pharmacy from which covered Part D enrollees could purchase a covered Part D drug without being required to receive medical services from a provider or institution affiliated with that pharmacy. We also requested comment regarding whether we should allow Part D plans to count pharmacies that are operated by the Indian Health Service, Indian tribes and tribal organizations, and urban Indian organizations (I/T/U pharmacies) toward their network access requirements when the pharmacies are under contract with the Part D plan, and it would be impossible or impracticable for the plan to meet the access standard in rural areas of its service area without the inclusion of some or all of these pharmacies. In addition, we solicited comments on permissible ways to ensure enrollee access to FQHC and rural pharmacies, since these pharmacies could potentially provide access to covered Part D drugs in remote, rural areas.

Several commenters support counting only retail pharmacies towards Part D plans' access requirements. Other commenters supported allowing I/T/U pharmacies to count toward Part D plans' pharmacy access requirements to the extent that we do not require Part D plans to offer I/T/U pharmacies a standard contract, at a minimum.

Response: We agree that, in most cases, only retail pharmacies, which we define in § 423.100 of our final rule as any licensed pharmacy from which covered Part D enrollees could purchase a covered Part D drug without being required to receive medical services from a provider or institution affiliated with that pharmacy, should count toward our pharmacy access standards. Examples of non-retail pharmacies include I/T/U, FQHC, Rural Health Center (RHC), and hospital and other provider-based pharmacies, as well as Part D-owned and operated pharmacies that serve only plan members.

However, as explained elsewhere in this preamble, we are concerned about access to pharmacies in rural and underserved areas. As one way of addressing this concern, § 423.120(a)(2) of our final rule allows Part D plans to count certain non-retail pharmacies—specifically, I/T/U, FQHC, and RHC pharmacies toward the pharmacy access requirements in § 423.120(a)(1) of our final rule.

FQHCs and RHCs face many of the same barriers to inclusion in commercial plan networks as do I/T/U pharmacies, which we discuss in greater detail elsewhere in this preamble. Beneficiaries served by FQHCs and RHCs are often served in those settings because of their financial and geographic circumstances. We believe that allowing Part D plans to count these pharmacies toward their access requirements will incentivize plans to make an extra effort to solicit and include these pharmacies in their networks. As the number of these pharmacies is limited and, with the exception of I/T/U pharmacies, can generally offer services to a broad-based population, we do not believe that this exception will have a significant impact on convenient access to pharmacies in rural areas for the general population. However, we intend to review Part D plans' proposed pharmacy networks to ensure that their inclusion of I/T/U, FQHC, and RHC pharmacies does not substitute for the inclusion in Part D plan networks of retail pharmacies. We also note that this policy should not be interpreted as requiring broader access to I/T/U, FQHC, and RHC pharmacies than is currently permissible.

Comment: Several commenters expressed concern about the inclusion of rural and FQHC pharmacies in Part D plan networks, with some advocating for requiring plans to contract in some cases, under preferential contracting terms and conditions with these pharmacies. Other commenters opposed requiring Part D plans to contract with specific kinds of pharmacies, asserting that the any willing pharmacy and pharmacy network access requirements are sufficient to ensure an adequate pharmacy network for all beneficiaries. One commenter asked that, to the extent we require Part D plans to contract with certain pharmacies, plans would only be required to offer standard terms and conditions.

Response: With the exception of I/T/U pharmacies, we will not require Part D plans to contract with non-retail pharmacies including FQHC or rural pharmacies. We believe our access standards for rural areas and the Statewide application of access rules generally will ensure adequate access in rural areas. However, as discussed elsewhere in this preamble, we will allow Part D plans to count I/T/U, FQHC, and RHC pharmacies toward their access requirements as an incentive for Part D plans to contract with these pharmacies, which are critical providers in underserved areas.

Comment: One commenter believes we should mandate that Part D plans solicit inner city and rural pharmacies that meet the Small Business Administration's small business standard for participation in their pharmacy networks and should give them access to any terms that the Part D plan offers to a subset of pharmacies.

Response: We believe the pharmacy access standards, as well as their application at the State level, in § 423.120(a)(1) of our final rule, will ensure adequate access to covered Part D drugs for all Part D enrollees in urban, suburban, and rural areas. Given the standards, pharmacies' bargaining power will be strengthened in underserved areas. Ultimately, however, it is at Part D plans' discretion how they will establish pharmacy networks—

including the offering of contracting terms and conditions that are different than standard contracting terms and conditions and the establishment of preferred pharmacies provided they meet our pharmacy access standards, non-discrimination provisions, and other applicable requirements under Part D. We believe that the type of market intervention requested by the commenter is contrary to the Congress's intent that we not interfere in the private negotiations between Part D plans and pharmacies. We will therefore not mandate that Part D plans solicit inner city and rural retail pharmacies or that they automatically deem them preferred pharmacies within their networks.

Comment: We sought public comments regarding whether we should consider using the authority in section 1860D–4(b)(1)(C) of the Act to require that Part D plans contract with a sufficient number of home infusion pharmacies in their service area to provide reasonable access for Part D enrollees.

Several commenters supported requiring Part D plans to contract with a sufficient number of home infusion pharmacies in their service areas to ensure adequate access for beneficiaries. One commenter noted that this requirement would result in savings for the Medicare program by reducing expenditures under Parts A and B. In addition, these pharmacies allow beneficiaries to safely receive their medications at home by providing training and skilled support so beneficiaries can avoid the inconvenience of hospitals, clinics, and doctor visits. One commenter urged us to expand our proposed requirement to include all specialty pharmacies, not just home infusion pharmacies.

Other commenters recommended not mandating Part D plans to contract with these non-retail pharmacies but rather encourage participation because it would reduce negotiating leverage of plans with these pharmacies.

One commenter urged that home infusion pharmacies should not be counted toward network TRICARE standards.

Response: We agree with commenters who believe that we should use our authority under section 1860D–4(b)(1)(C) of the Act to require Part D plans to provide adequate access to home infusion pharmacies. Given coverage of home infusion drugs under Part D, we do not believe it is an option for Part D plans not to include at least some home infusion pharmacies in their networks in order to provide enrollees with meaningful access to those drugs. This is particularly a concern with regard to prescription drug plans which, unlike other Part D plans, do not benefit from reduced medical costs associated with home infusion and may therefore have little incentive to contract with home infusion pharmacies. Therefore, we have added a new provision to our final regulations at § 423.120(a)(4) which requires Part D plans to demonstrate to us that they provide adequate access to home infusion pharmacies consistent with CMS operational guidance to Part D plans. We expect that Part D plans will demonstrate adequate access based in part on the number of enrollees in their service areas and the geographic distribution and capacity of home infusion pharmacies in those service areas. We have not included specialty pharmacies that do not provide home infusion services in this requirement however, as it is unclear whether beneficiaries will need routine access to such pharmacies or would not be adequately served through our out-of-network access rules. We clarify, that we have made a distinction between specialty pharmacies and long-term care pharmacies. We note that home infusion pharmacies will not count toward Part D plans' pharmacy access requirements because they are not retail pharmacies.

Comment: We requested comments regarding the advantages and disadvantages of using the authority provided under section 1860D–4(b)(1)(C)(iv) of the Act to require Part D plans to approach some or all long-term care pharmacies in their service areas with at least the same terms available under their standard pharmacy contracts, or, alternatively, to not require (but strongly encourage) Part D sponsors to negotiate with and include long-term care pharmacies in their Part D plans' pharmacy networks. In addition, we requested comments regarding how to balance convenient access to long-term care pharmacies with appropriate payment to long-term care pharmacies under the provisions of the MMA.

Some commenters were adamant that the current one-to-one relationship between the long-term care pharmacies and nursing homes be preserved, as it is critical to ensuring safety and convenient access to drugs for Medicare beneficiaries residing in nursing homes. One commenter suggested that Part D plans should also provide standardized long-term care pharmacy contracts that recognize long-term care pharmacies' essential role.

Some commenters recommended that the final regulation require Part D plans to contract with any willing long-term care pharmacy. A number of commenters would prefer that we do not require Part D plans to contract with any particular non-retail pharmacies (including long-term care pharmacies) because both our access standards and the any willing pharmacy requirement adequately address our objective of ensuring access to Part D drugs for all enrollees. One commenter notes that Part D plans will need to include long-term care pharmacies in their networks to meet access standards, and that this will encourage Part D plans to contract with long-term care pharmacies. Another believes that we struck a balance with the option for long-term care pharmacies to provide benefits in- or out-of-network because it gives long-term care pharmacies and Part D plans the appropriate negotiating flexibility to reach mutually satisfactory arrangements for providing services to long-term care residents. Also, one commenter points out that some long-term care pharmacies would not be able to meet all the operational standards necessary to participate in Part D, and Part D plans would have to negotiate special reimbursement rates with these pharmacies. Some commenters believe that we should promote appropriate payment methodologies (for example, via dispensing fees or separate fee schedules to pay for specialized services) that would enable all long-term care pharmacies to join networks and provide a meaningful benefit. Another variation suggested was that a Part D plan should be required to include at least one long-term care pharmacy in its network and to contract with any long-term care pharmacy that agrees to the Part D plan's standard contract.

One commenter reasoned that there should be a balance in the contracting requirement; for example, long-term care pharmacies that service X percent of beneficiaries should also be required to contract with at least one Part D plan. But, without this balance, the commenter felt the Part D plans and long-term care pharmacies should be strongly encouraged to contract with each other. A few commenters believed that we should encourage, but not require, Part D plans to contract with long-term care pharmacies and that we should explicitly state in regulation that long-term care residents can access long-term care pharmacies as out-of-network providers when those pharmacies do not contract with particular Part D plans. Other commenters believe that it is sufficient to require that long-term care pharmacies be offered standard

contracting terms and conditions by Part D plans.

Response: Section 1860D–4(b)(1)(C)(iv) of the Act provides that, in establishing rules for convenient access to network pharmacies, we may include standards with respect to access to long-term care pharmacies for Part D enrollees who reside in long-term care facilities. For a variety of reasons, including the quality aspects of Federal nursing home regulations, it is generally the case that long-term care facilities have chosen to contract with a single long-term care pharmacy. Given this state of affairs, our proposed rule assumed that Part D enrollees residing in a long-term care facility could not reasonably be expected to access their Part D drugs at another pharmacy if their facility's long-term care pharmacy is not part of their Part D plan's network. In the proposed rule, we proposed that enrollees residing in long-term care facilities whose contracted long-term care pharmacies did not participate in their Part D plans' networks could continue to use those long-term care pharmacies consistent with our proposed out-of-network access policy. However, given the narrow statutory authority to establish out-of-network access rules provided by section 1860D–4(b)(1)(C)(iii) of the Act, we do not believe as discussed in greater detail elsewhere in this preamble that access to out-of-network pharmacies on a routine basis can be justified. Thus, beneficiaries residing in long-term care facilities that do not contract with a pharmacy included in their Part D plan network will not be able to access covered Part D drugs at the out-of-network long-term care pharmacy through the out-of-network access rules in § 423.124 of our final rule.

However, it is important to note that we will provide a SEP for prescription drug plan enrollment and disenrollment for beneficiaries entering in, living in, or leaving an institution. In addition, individuals enrolled in an MA-PD plan have an unlimited open enrollment period for institutionalized individuals (OEPI). While MA organizations may choose individually, at the plan level, whether or not to be open for enrollments during this period, they must always accept disenrollments.

Given the risk associated with institutionalized beneficiaries, relying on the market alone to ensure that Part D plans include a sufficient number of long-term care pharmacies in their networks may not be sufficient. We note that relying on the pharmacy access standards in § 423.120(a)(1) of our final rule will also not ensure sufficient access to long-term care pharmacies, since many of these pharmacies are not retail pharmacies and therefore would not count toward those requirements. Absent a contracting mandate, Part D plans may view contracting with long-term care pharmacies given the risk associated with institutionalized beneficiaries as too risky. To the extent that we require Part D plans to solicit long-term care pharmacies in their service areas to join their networks, plans may be forced to negotiate preferential contracting terms and conditions (relative to the terms they would offer any other pharmacy willing to participate in its network) for long-term care pharmacy-specific specialized packaging and services with a number of long-term care pharmacies in order to meet our requirement. In addition, although the statute includes an ''any willing pharmacy'' requirement, even if we require Part D plans to contract with any long-term care pharmacy in a service area, we cannot compel long-term care pharmacies to accept the plans' terms and conditions.

We believe it is essential to inject competition into the long-term care pharmacy market while preserving the relationships and levels of service that long-term care facilities now enjoy vis-à-vis their contracted long-term care pharmacies. To that end, we have used our authority under section 1860D–4(b)(1)(C)(iv) of the Act to require, in § 423.120(a)(5) of our final rule, that Part D plans offer standard contracting terms and conditions, including performance and service criteria for long-term care pharmacies that we will specify in operational guidance to all long-term care pharmacies in their service areas. In other words, we are establishing an ''any willing pharmacy'' requirement specifically for long-term care pharmacies, coupled with a requirement that Part D plans develop standard contracting terms and conditions for long-term care pharmacies, such that any pharmacy in a service area could become an eligible long-term care pharmacy by certifying that it meets certain performance and service criteria for providing pharmacy services to long-term care facilities. These criteria would be incorporated into a Part D plan's standard contracting terms and conditions for long-term care pharmacies. We will provide further detail regarding these criteria in operational guidance, but we expect that they will address access to urgent and emergency medications on a 24/7 basis, standardized prescribing systems, and the availability of one of several standard delivery packaging and delivery systems for routine medications. We expect to review the reasonableness of Part D plans' standard contracting terms and conditions for long-term care pharmacies. We note that entities other than current long-term care pharmacies (for example, retail pharmacies) could become an eligible long-term care pharmacy by meeting these standards of practice, so long as they also meet specific State law requirements, if any, for such entities. Plans in a region would be required to contract with any willing long-term care pharmacy in that region, provided those pharmacies were able to reach agreement with Part D plans on all standard contract terms and conditions including payment rates.

As provided in § 423.120(a)(5) of our final rule, we will require Part D plans to demonstrate that they have contracts with a sufficient number of long-term care pharmacies to ensure convenient access to prescription drugs for institutionalized beneficiaries within the service area. We will provide more detailed information in CMS guidance regarding what constitutes convenient access, but we expect that Part D plans will demonstrate convenient access based in part on the number of enrollees in their service areas and the geographic distribution, capacity, and contracting relationships with long-term care facilities of long-term care pharmacies in those service areas.

We expect that each long-term care facility will select one or more eligible network pharmacies to provide a Part D plan's long-term care drug benefits to all of its residents enrolled in a Part D plan. In order to minimize the number of pharmacy suppliers and maintain patient safety, long-term care facilities will likely select long-term care pharmacies that meet Part D standards and participate in the largest number of Part D plan long-term care networks. To maintain convenient access and minimize out-of-pocket expenses, Part D plan enrollees would obtain Part D benefits from the eligible long-term care pharmacy selected by the facility. The SEP and OEPI available to institutionalized beneficiaries, which will provide beneficiaries with the ability to change Part D plans to the extent that their current Part D plan does not include their facility's long-term care pharmacy in its network, will further incentivize long-term care pharmacies to participate in as many Part D plan long-term care networks as possible.

All long-term care pharmacies in a region will have to negotiate terms and conditions with as many Part D plans as possible or risk losing this business to

another more competitive long-term care pharmacy. This competition will preserve the one-to-one long-term care pharmacy long-term care facility relationship favored by so many commenters, but will require a negotiation between the long-term care pharmacy and the Part D plan to maintain that relationship. Given our rules for access to Part D drugs for institutionalized Part D enrollees, all Part D products and services would be removed from existing long-term care pharmacy contracts because payments for drugs for dual eligible individuals under Medicaid will become obsolete. This will likely necessitate the renegotiation of existing long-term care facility/long-term care pharmacy contracts. Separating the cost of the drug and dispensing fee from other long-term care pharmacy specialized services (for example, drug administration) may provide for more appropriate negotiation of these services and costs between long-term care facilities and pharmacies. We note that Part D plan payments under medication therapy management programs, described in further detail elsewhere in this preamble, may represent an additional revenue stream to long-term care pharmacy services for some of the special services provided by these pharmacies but not reimbursed through dispensing fees.

We believe that our long-term care pharmacy access rules will align incentives to accomplish several goals, including ensuring that long-term care pharmacies come to the table in good faith; negotiation of more competitive pricing than currently exists in the long-term care pharmacy market; and allowing for the one long-term care facility-one long-term care pharmacy relationship to remain intact, to the extent that long-term care facilities would like to keep it that way.

Comment: Two commenters favored the carve-out of beneficiaries in long-term care facilities through the establishment of a separate PDP region in which plans could bid, at risk, to serve this population.

Response: We understand that, given the institutionalized population's special needs, a carve-out of this population may seem logical. However, given the risk associated with institutionalized beneficiaries, we believe that carving out such a high-risk population would result in significant adverse selection and could result in unsustainable beneficiary premiums for the institutionalized population. In addition, our research related to risk adjustment is still in progress, and until that research is completed, we cannot be certain as to whether our risk adjustment model could adequately mitigate the risk inherent in this population under the highly unique circumstances of a plan serving only a carved-out institutionalized population. Consequently, particularly in the first few years after the implementation of the Part D program, we wonder whether potential Part D sponsors would be willing to serve a carved-out institutionalized population and therefore ensure access to Part D drugs for Part D enrollees residing in long-term care facilities. We are also concerned that beneficiaries entering and leaving long-term care facilities will be forced to change Part D plans to the extent that institutionalized beneficiaries are carved out into a separate PDP region. For these reasons, we will not create a separate PDP region for institutionalized beneficiaries and, as discussed above, will ensure convenient access to covered Part D drug in long-term care facilities as provided in § 423.120(a)(5) of our final rule.

Comment: We requested comments regarding whether we should use our authority under section 1860D–4(b)(1)(C)(iv) of the Act to require-or, instead, strongly encourage-that Part D sponsors approach any I/T/U pharmacies in their Part D plan service areas with at least the same terms available under the plan's standard pharmacy contracting terms and conditions.

Some commenters believe that we must use our authority under section 1860D–4(b)(1)(iv) of the Act to require Part D plans to contract with I/T/U pharmacies because, without this requirement, private plans will have little or no financial incentive to contract given the uniqueness of both the AI/AN population and I/T/U pharmacies. Simply encouraging contracts will not work because of the uniqueness and remoteness of I/T/U facilities and the perceived cost and time to contract with these pharmacies. These commenters urge us to require, in regulation, that Part D plans contract with I/T/U pharmacies using specific contract provisions. They urge us to consider one of several approaches to ensuring that I/T/U pharmacies experience no reduction in revenue as a result of the transition from Medicaid to Medicare Part D: supplemental payments from Part D plans or the Federal government to supplement the difference between the amount paid by the Part D plan and the amount the I/T/U pharmacy would have received under Medicaid, a carve-out of AI/AN enrollees for Part D plans willing to serve only those beneficiaries through I/T/U pharmacies, and an exemption of dual eligibles from Part D (with continued prescription drug coverage under Medicaid).

Response: There are currently 235 I/T/U pharmacies serving 107,000 senior and disabled AI/ANs in 27 States. In some areas, I/T/U pharmacies may be the only facilities capable of providing medication therapy management services to certain AI/AN beneficiaries due to language and cultural barriers. It is our understanding that I/T/U pharmacies are not currently well integrated in commercial pharmacy networks. We agree with the commenters who believe that—in the absence of a contracting requirement—Part D plans may make assumptions regarding the administrative costs (whether real or perceived) of contracting with I/T/U pharmacies and may not actively solicit the inclusion of these pharmacies in their networks. The lack of I/T/U pharmacies in Part D plan networks would render enrollment in Part D of little use to AI/AN beneficiaries who rely primarily on I/T/U facilities for their health care. For this reason, we have added a provision to our final regulations, at § 423.120(a)(6), requiring that Part D plans offer contracts to all I/T/U pharmacies in their service areas.

However, we recognize that contracting with I/T/U pharmacies is potentially more complex than contracting with retail pharmacies given that there are a number of provisions in the standard contracts of commercial health plans that would likely need to be modified or deleted given statutory or regulatory restrictions to which I/T/U pharmacies are subject, as well as the particular circumstances of I/T/U pharmacies (for example, I/T/U pharmacies purchase drugs off the Federal Supply Schedule (FSS) or through the 340B program; can only serve AI/ANs; may have less experience than retail pharmacies, or none at all, with point-of-sale technology; are not typically well integrated into commercial pharmacy networks; generally stock a more limited range of drugs than would be required under a Part D formulary; and always waive co-pays). Thus, standard contracting terms and conditions will not be sufficient for Part D plans to obtain the participation of I/T/U pharmacies in their networks. We are therefore requiring Part D plans to include a special addendum to their standard contracting terms and conditions in order to account for these differences. We will work with major stakeholders to develop a model special addendum that will take the special

circumstances of I/T/U pharmacies into account. As provided in § 423.120(a)(6) of our final rule, we will require Part D plans to demonstrate that they have contracts with a sufficient number of I/T/U pharmacies to ensure convenient access to prescription drugs for AI/AN enrollees within the service area. We expect to review the reasonableness of Part D plans' standard contracting terms and conditions for I/T/U pharmacies.

While we understand the Indian Health Service's concerns regarding reductions in revenue resulting from the transition of drug coverage from Medicaid to Medicare, we clarify that we do not have the statutory authority to require supplemental payments from Part D plans or the Federal government to supplement the difference between the amount paid by the Part D plan and the amount the I/T/U pharmacy would have received under Medicaid; a carve-out of AI/AN enrollees for Part D plans willing to serve only those beneficiaries through I/T/U pharmacies; or an exemption of dual eligibles from Part D (with continued prescription drug coverage under Medicaid). As we develop the model special addendum for I/T/U contracts, we will consider how, within our statutory authority, we might ensure that I/T/U pharmacies do not experience significant revenue losses as a result of the transitioning of drug coverage from Medicaid to Part D for dual eligible AI/ANs.

Comment: Several commenters noted that many small I/T/U pharmacies and dispensaries carry a limited stock of drugs, and that an exemption from formulary requirements (and the ability to use permissible substitutes) is necessary in order to accommodate the fact. In addition, these commenters note that another factor in whether I/T/U pharmacies will stock a particular drug is whether it is available from the Federal Supply Schedule or 340B program, which are the principal sources of drugs purchased by I/T/U pharmacies. Thus, a Part D plan may choose one particular cholesterol-lowering agent on its formulary because it is able to negotiate a greater discount for that particular Part D drug. However, I/T/U pharmacies may be able to access a different medication for a similar, or perhaps lower, price and therefore include that drug on its formulary.

Response: We are aware that most Tribes and Tribal Organizations (operating under health programs pursuant to contracts under the Indian Self-Determination Education and Assistance Act, Public Law 93–638) and all IHS facilities use the Department of Veterans Affairs Pharmaceutical Prime Vendor (PPV) for purchasing their pharmaceuticals. By ordering through the PPV, IHS and Tribes (but not Urban programs) are able to access FSS Contract, National Standardization Contract, and Blanket Purchasing Agreement pricing for pharmaceuticals. In addition to FSS pricing, Tribes and Urban programs that have been designated as Federally Qualified Health Centers (FQHCs) and have been approved by the Health Resources and Services Administration (HRSA) are eligible for HRSA 340B drug pricing. Since I/T/U facilities have access to different pricing than commercial health plans, their formulary selections reflect the drugs for which this pricing is available. As previously mentioned, we are requiring Part D plans to include a special addendum to their standard contracting terms and conditions in order to account for the differences between retail and I/T/U pharmacies and therefore facilitate contracting with these pharmacies. We will work with major stakeholders to develop a model special addendum that will take the special circumstances of I/T/U pharmacies into account, including the limited stocking of drugs at these facilities.

Comment: Several commenters said that the any willing pharmacy rule should apply to mail order as well as retail pharmacies, and that Part D plans should not be able to exclusively use a plan-owned mail order facility.

Response: We agree that the any willing pharmacy requirement at section 1860D–4(b)(1)(A) of the Act applies to all pharmacies—including non-retail pharmacies such as mail-order pharmacies—notwithstanding a Part D plan's ability to designate certain of its network pharmacies as preferred pharmacies with lower cost-sharing, or to negotiate terms better than those in its standard terms and conditions with certain pharmacies. We clarify that a Part D plan could have standard terms and conditions for retail pharmacies and a second, separate set of standard terms and conditions for mail order pharmacies in light of those pharmacies' different characteristics. For example, a plan's contracting terms and conditions for mail-order pharmacies could reflect the full cost of adding another mail-order vendor, as well as the differential costs of strong data controls involved with having multiple network mail-order pharmacies.

Comment: One commenter said it was not clear how the any willing pharmacy rule applies to facilities that are owned and operated by a Part D plan. The commenter said such plans should be permitted to maintain a limited network of contract pharmacies for purposes of meeting the access standard in order to maximize cost savings.

Response: We agree with this commenter that the any willing pharmacy requirement makes little sense in the context of Part D plans that own and operate their own pharmacies particularly since the pharmacy access rules in § 423.120(a)(1) of our final rule will be waived for MA-PD plans and cost plans that can demonstrate comparable pharmacy access under § 422.112. As provided in § 423.458(b) of our final rule, we may waive any Part D provision as applied to an MA-PD plan if it duplicates, or is in conflict with, provisions otherwise applicable to the MA organization or MA-PD plan under Part C of Medicare, or if waiver of a Part D provision is necessary in order to improve coordination of benefits under Part D with those offered under Part C. Similarly, § 423.458(d) provides that we may waive any Part D provision as applied to a cost plan if it duplicates, or is in conflict with, provisions otherwise applicable to the cost plan under section 1876 of the Act, or if waiver of a Part D provision is necessary in order to improve coordination of benefits under Part D with those offered by the cost plans. We will consider waiving this requirement for Part D plans that own and operate their own pharmacies to the extent that they request such waiver as provided in § 423.458(b)(2) and § 423.458(d) of our final rule.

Comment: We sought comment on whether, in order to guarantee that any pharmacy willing to meet a Part D sponsor's contracting terms and conditions could participate in a Part D plan's pharmacy network, we should require that a Part D sponsor make available to all pharmacies a standard contract for participation in their Part D plans' networks.

A number of commenters thought that Part D plans should be required to have a standard or model contract for use with all pharmacies. Other comments said that we should not require a standard contract. Alternatively, several commenters said that even with a standard contract, Part D plans should have maximum flexibility to vary their contracting terms and conditions in order to reflect local conditions. Some questioned whether we should try to evaluate whether pharmacy contract terms are ''reasonable and relevant,'' as proposed in subpart K of our proposed rule.

Response: We concur with the majority of commenters on this issue and will require, under § 423.505(b)(18) of our final rule that Part D plans offer pharmacies reasonable and relevant

standard terms and conditions for network participation. We do not intend to define ''reasonable and relevant'' in order to provide Part D plans with maximum flexibility to structure their standard terms and conditions.

However, it is unreasonable to assume—the any willing pharmacist requirement notwithstanding—that a Part D plan could establish a network using a uniform set of terms and conditions throughout a service area because it will likely need to modify contracting terms and conditions to ensure access to certain pharmacies (for example, rural and long-term care pharmacies). We clarify that standard terms and conditions particularly for payment terms may vary to accommodate geographic areas or types of pharmacies) and that this is acceptable, provided that all similarly situated pharmacies are offered the same standard terms and conditions. Thus, for example, provided Part D plans offer all mail-order pharmacies in a particular area with the same standard terms and conditions, they may offer separate standard terms and conditions to mail-order pharmacies. With standard terms and conditions as a ''floor'' of minimum requirements that all similarly situated pharmacies must abide by, Part D plans may modify some of their standard terms and conditions to encourage participation by particular pharmacies.

Comment: Many commenters disagreed with our interpretation of the ''any willing pharmacy'' provision, specifically with allowing Part D plans to construct networks of preferred and non-preferred pharmacies that have different requirements for beneficiary cost sharing. These commenters argued that allowing preferred networks undermines the any willing pharmacy rule and runs counter to Congressional intent. Many said that allowing Part D plans to steer beneficiaries to preferred pharmacies would impede pharmacy access and disrupt existing relationships between pharmacists and patients. Some argued that our interpretation would disadvantage small, independent, and rural pharmacies. Others said that a designation of ''non-preferred'' would carry a negative connotation about the pharmacy's quality of service.

Several other commenters concurred with the any willing pharmacy policy in our proposed rule. One commenter said that State any willing pharmacy laws should be expressly preempted, while another commenter said we should clarify that State any willing provider laws continue to apply to Part D plans' non-Medicare business. One commenter asked us to clarify the extent to which we will allow Part D plans to vary their cost sharing for preferred networks.

Response: We believe that we have correctly interpreted the two related provisions in sections 1860D–4(b)(1)(A) and (B) of the Act, which require Part D plans to allow any willing pharmacy to participate in their pharmacy networks, while also allowing Part D plans to reduce cost-sharing differentially for network pharmacies. General principles of statutory interpretation require us to reconcile two seemingly conflicting statutory provisions whenever possible, rather than allowing one provision to effectively nullify the other provision. Consequently, when a statutory provision may reasonably be interpreted in two ways, we have an obligation to adopt the interpretation that gives full effect to competing provisions of the statute. We believe that our policy of permitting cost-sharing discounts for preferred pharmacies, as codified in § 423.120(a)(9), strikes an appropriate balance between the need for broad pharmacy access and the need for Part D plans to have appropriate contracting tools to lower costs.

We note, however, that while these within network distinctions are allowed, the statute also requires that such tiered cost-sharing arrangements in no way increase our payments to Part D sponsors. Therefore, tiered cost-sharing arrangements based on within-network distinctions could be included in Part D plans' benefits subject to the same actuarial tests that apply to formulary-based tiered cost-sharing structures. Thus, a reduction in cost sharing for preferred pharmacies in a Part D plan network could be offered through higher cost sharing for non-preferred pharmacies (or as alternative prescription drug coverage). We also note that differential cost-sharing in the context of preferred and non-preferred pharmacies does not raise the cost-sharing obligation of low-income subsidy eligible enrollees above the levels specified in sections 1860D–14(a)(1) and (2) of the Act.

We recognize the possibility that Part D plans could effectively limit access in portions of their service areas by using the flexibility provided in § 423.120(a)(9) of our final rule to create a within-network subset of preferred pharmacies. In other words, in designing its network, a Part D plan could establish a differential between cost-sharing at preferred versus non-preferred pharmacies—while still meeting the access standards in § 423.120(a)(1) of our proposed rule—that is so significant as to discourage enrollees in certain areas (rural areas or inner cities, for example) from enrolling in that Part D plan. We emphasize that such a network design has the potential to substantially discourage enrollment by certain Part D enrollees, and that we have the authority under section 1860D–11(e)(2)(D) of the Act to disallow benefit designs that are discriminatory. We clarify that State any willing pharmacist laws would be preempted as applicable to plans' Part D business. This is consistent with section 1860D–12(g) of the Act, which extends the State preemption provisions under section 1856(b)(3) of the Act to Part D plans.

Comment: Several commenters thought that Part D plans should only be allowed to have differential cost sharing for preferred pharmacies if they exceed the TRICARE access standard.

Response: We see no statutory basis for such a rule. Moreover, it would be difficult to construct and operationalize such a policy.

Comment: Several commenters wrote that special needs enrollees should be exempted from higher cost sharing at non-preferred pharmacies.

Response: We see no statutory basis for such a rule, and we believe that Part D plans will provide sufficient access for all Part D enrollees under our access standards in § 423.120(a)(1). As noted in our proposed rule, we will use the authority provided under section 1860D–11(e)(2)(D) of the Act to review, as part of the bid negotiation process, how Part D plan networks make preferred and non-preferred distinctions among their network pharmacies and disallow them if such proposed network designs would substantially discourage enrollment by certain beneficiaries in any part of a Part D plan's service area. We believe that special needs enrollees will be sufficiently protected by this review. To the extent that special needs enrollees are also eligible for low-income subsidies, as indicated above, differential cost-sharing based on preferred pharmacy status does not raise the cost-sharing obligation of low-income subsidy eligible enrollees above the levels specified in the Act.

Comment: Several commenters suggested that the TRICARE access standards be applied to Part D plans' ''preferred'' networks rather than its general network. Several other commenters concurred with the regulation as drafted in the proposed rule.

Response: Section 1860D–4(b)(1)(B) of the Act clarifies that a Part D sponsor has the option of reducing cost-sharing for covered Part D drugs dispensed through network pharmacies below the level that would have otherwise applied. Because the statute provides

that such distinctions can be made within a network, we do not believe that only preferred pharmacies constitute a Part D plan's network for the purposes of meeting the access standards in § 423.120(a)(1) of our final rule. Rather, both preferred and non-preferred pharmacies form part of a Part D plan network, and plans may count both of these types of network pharmacies toward their access standards.

Comment: Several commenters recommended that beneficiaries be able to get an extended supply of drugs, greater than a 30-day supply, from network retail pharmacies and mail-order pharmacies.

Response: We clarify that section 1860D–4(b)(1)(D) of the Act, and § 423.120(a)(10) of our final rule, require Part D plans to permit enrollees to receive extended supplies (for example, 90-day supplies) of covered Part D drugs through a network retail pharmacy.

Comment: Some commenters noted that our proposed regulations would unfairly allow Part D plans to charge beneficiaries more when they obtain their prescriptions at a community pharmacy than when they use mail order. One commenter notes that seniors benefit from face-to-face interaction with a pharmacist more than other age groups, which would be precluded under mail order and would limit enrollees' ability to use the pharmacy and pharmacist of their choice.

Many commenters recommended that we specifically prohibit Part D plans from using economic incentives for beneficiaries to use mail order that could create significant differences in cost sharing for mail order versus retail pharmacy prescription, or that plans make such difference minimal. One commenter recommended that Part D plans use the same average wholesale price (AWP) basis to determine the reimbursement rate for mail order and retail pharmacies. Another commenter noted that there is substantial evidence that seniors, particularly low-income seniors, are victims of theft from their mailboxes, undermining the financial incentive of mail order. This commenter recommended that we allow beneficiaries to pay the mail order price at a retail pharmacy when they can demonstrate their mailbox is not secure.

Response: As provided in section 1860D–11(i) of the Act, we have no authority to interfere with the negotiations between Part D plans and pharmacies and therefore cannot mandate that Part D plans negotiate the same, or similar, reimbursement rates with all pharmacies. Provided Part D plans offer all pharmacies standard terms and conditions, they may modify their contracting terms—including payment provisions as necessary, as long as all similarly situated pharmacies are subject to the same minimum terms and conditions. Moreover, section 1860D–4(b)(1)(B) of the Act provides Part D plans with the authority to designate some network pharmacies, including mail-order pharmacies, as preferred pharmacies offering plan enrollees lower cost sharing.

Comment: One commenter noted that MA organizations that own and operate their own pharmacies usually have internal systems for providing prescription services by mail that are fully integrated with the overall pharmacy operation. As a result, it is difficult to provide an incentive to beneficiaries to use less costly mail services. The commenter said we should permit these organizations to establish differential benefit levels for mail delivery as opposed to in-facility pickup.

Response: As noted above, Part D plans have the flexibility to establish different cost-sharing requirements for the pharmacies in their networks consistent with section 1860D–4(b)(1)(B) of the Act. Accordingly, Part D plans have the flexibility to establish differential cost-sharing requirements for mail delivery and in-facility pickup.

Comment: One commenter recommended that we require Part D plans to contract with pharmacies that offer home delivery service, noting that same-day or next day need for medications makes mail-order an impracticable option.

Response: We do not believe there is a compelling rationale to require Part D plans to contract with pharmacies that offer home delivery service. As discussed elsewhere in this preamble, we have defined the term ''dispensing fees'' in § 423.100 of our final rule to include reasonable pharmacy costs, including delivery costs, associated with ensuring that possession of the appropriate covered Part D drug is transferred to a Part D enrollee. We clarify that reasonable delivery costs include only those costs appropriate for the typical beneficiary in a particular pharmacy setting. Thus, while it would be appropriate for Part D plans to reimburse long-term care, mail-order, and home infusion pharmacies for home delivery costs via the dispensing fee, this would not be the case for retail pharmacies (where the term ''delivery'' would be limited to the transfer of a covered Part D drug from the pharmacist to the patient at the point of sale) because the typical retail customer does not require home delivery. While retail pharmacies may offer home delivery services, Part D plans may not reimburse those pharmacies for these costs, and the delivery cost must be borne by the beneficiary.

Comment: Two commenters expressed their support for our interpretation of the term ''insurance risk'' and asked that we include in our regulations a statement that the prohibition against the assumption of risk by Part D plans' network pharmacies not preclude performance-based measures of activities within the control of a pharmacy (for example, formulary compliance and generic drug substitution).

Response: We clarify that our definition of the term ''insurance risk'' in § 423.4 of the final rule specifically excludes ''payment variations designed to reflect performance-based measures of activities within the control of a pharmacy, such as formulary compliance and generic drug substitutions.''

b. Formulary Requirements

1. P&T Committee Requirements

To the extent that a Part D sponsor uses a formulary to provide qualified prescription drug coverage to Part D enrollees, it will be required to meet the requirements of section 1860D–4(b)(3)(A) of the Act to use a pharmaceutical and therapeutic (P&T) committee to develop and review that formulary.

The majority of members comprising the P&T committee will be required to be practicing physicians or practicing pharmacists. In addition, at least one practicing pharmacist and one practicing physician member will have to be experts in the care of elderly and disabled individuals. Section § 423.120(b)(1)(ii) of the proposed rule also provided that at least one practicing pharmacist and one practicing physician members on a Part D plan's P&T committee be independent experts.

When developing and reviewing the formulary, the P&T committee will be required, in accordance with section 1860D–4(b)(3)(B) of the Act, to base clinical decisions on the strength of scientific evidence and standards of practice, including assessing peer-reviewed medical literature. Section § 423.120(b)(1)(viii) of our proposed rule required that any decisions made by the P&T committee regarding development or revision of a Part D plan's formulary be documented in writing.

Except as otherwise provided below, the final rule adopts the requirements related to P&T committees set forth in § 423.120(b)(1) of our proposed rule.

Comment: Many commenters thought that P&T committee decisions regarding

a Part D plan's formulary should be binding on a plan. Other commenters thought that P&T committee recommendations should be advisory, and not binding. Several others believed that only clinical decisions should be binding on the Part D plan and that the ultimate responsibility for overall formulary design should reside with the plan and ultimately involved business leaders and technical experts. One commenter stated that it was not likely that a P&T committee comprised of non-employee clinicians would be able to make coverage determination in the Part D plan's and enrollees' best interests, particularly since many benefit design decisions have a financial, as well as a clinical, component.

Response: We agree with commenters who sought to draw a distinction between clinical and overall formulary design issues. We believe that the function of a P&T committee is to provide expertise on clinical issues, and not financial or benefit design issues. We interpret the requirement in section 1860D–4(b)(3)(A) of the Act and § 423.120(b)(1) of our final rule that Part D plan formularies be developed and reviewed by a P&T committee to mean that committee recommendations regarding which drugs are placed on a plan's formulary be binding on the Part D plan. Although § 423.120(b)(vi) and (b)(vii) of our final rule envision a role for the P&T committee in reviewing policies that guide exceptions and other utilization management processes including drug utilization review, generic substitution, quantity limits, and therapeutic interchange and in evaluating and analyzing treatment protocols and procedures related to the Part D plan's formulary at least annually, P&T committee recommendations in these areas should be considered advisory and not binding. We clarify, for example, that while the P&T committee may be involved in providing clinical recommendations regarding the placement of a particular Part D drug on a formulary cost-sharing tier, the ultimate decision on such formulary design issues is the Part D plan's, and that decision weighs both clinical and non-clinical factors. Thus, a P&T committee's role in formulary cost-sharing tiers, while important, would be advisory and not binding.

Comment: Many commenters recommended that we strengthen the statutory requirement in section 1860D–4(b)(3)(A)(ii) of the Act and require that more than just one practicing physician and one practicing pharmacist are independent and free of conflict. Suggestions for new requirements included that all, a majority, two-thirds, one-half, 40 percent, and at least four (at least two practicing physicians and two practicing pharmacists) members of a Part D plan's P&T committee be independent and free of conflict in order to ensure that formulary development is in line with beneficiary and not plan or pharmaceutical manufacturer interests. One commenter supported our current requirement requiring that at least one practicing physician and one practicing pharmacist on the committee be independent and free of conflict

Response: We appreciate commenters' suggestions and agree that maintaining the impartiality and objectivity of P&T committee members is an important goal. We have retained the proposed rule requirement that at least one practicing pharmacist and one practicing physician on the P&T committee be independent and free of conflict—in § 423.120(b)(1)(ii) of our final rule, though Part D plans should view this requirement as a floor which we encourage them to exceed. To balance concerns about conflicts of interest with regard to P&T committee members, and as proposed in the draft benefit design review criteria we recently issued for public comment, we would require all P&T committee members to sign a conflict of interest statement revealing economic or other relationships with entities that could influence pharmaceutical decisions, and to disclose such conflicts to other committee members. If P&T committee discussions center around a drug that presents a conflict of interest issue for a particular committee member, he or she would recuse himself or herself from any discussions or votes associated with that drug. We believe this requirement is necessary to ensure that the P&T committee's clinical decisions regarding development and review of the formulary are based on the strength of scientific evidence and standards of practice, safety and efficacy considerations, and other such appropriate information and considerations in accordance with section 1860D–4(b)(3)(B) of the Act. In addition, this requirement is consistent with best practices in pharmacy benefit management, and we expect that Part D plans will implement disclosure of conflicts and recusal procedures consistent with standard industry practice.

Comment: Many commenters requested clarification regarding our definition of the term ''independent and free of conflict'' with respect to a Part D sponsor and a Part D plan. Several commenters asked to clarify that our regulations regarding independence and freedom from conflict not preclude individuals from serving on a P&T committee simply because they are members of a Part D plan's provider network.

Response: In our proposed rule, we interpreted the language at section 1860D–4(b)(3)(A)(ii) of the Act requiring certain members of the P&T committee to be ''independent and free of conflict'' to mean that such P&T committee members could have no stake, financial or otherwise, in formulary determinations. We believe this interpretation is still appropriate, but clarify that we believe a P&T committee member not to be free of conflict of interest if he or she has any direct or indirect financial interest in any entity—including Part D plans and pharmaceutical manufacturers—that would benefit from decisions regarding plan formularies.

Thus, Part D plan network providers may be considered to be independent and free of conflict, provided they are not plan employees or contract workers and do not otherwise have any conflicts of interests that would compromise their independence. In cases of staff model HMOs, panel providers may be determined to be independent and free of conflict to the extent that any remuneration received from a Part D plan is limited to his or her clinical responsibilities for the care of plan enrollees.

Comment: In our proposed rule, we interpreted the language at section 1860D–4(b)(3)(A)(ii) of the Act requiring certain members of the P&T committee to be ''independent and free of conflict'' to mean that such P&T committee members would be required to be independent and free of conflict not only with respect to a Part D sponsor and its Part D plan, but also for pharmaceutical manufacturers. Some commenters supported such a requirement. A few commenters opposed such a requirement, however, claiming that our interpretation imposes a more stringent requirement than is permitted under the MMA. A number of other commenters cautioned us that our interpretation could exclude a significant number of individuals who are engaged in pharmaceutical and clinical research funded by pharmaceutical manufacturers.

Response: Section 1860D–4(b)(3)(A)(ii)(I) of the Act requires that at least one practicing physician and at least one practicing pharmacist on a Part D plan's P&T committee be independent and free of conflict only with respect to a Part D sponsor and its Part D plan. However, given the requirement in section 1860D–4(b)(3)(B) of the Act that

the P&T committee base clinical decisions on the strength of scientific evidence and standards of practice, and taking into account therapeutic advantages in terms of safety and efficacy, we believe it is necessary for those committee members who are ''independent and free of conflict'' to be so with respect to pharmaceutical manufacturers as well. We agree that P&T committee members could have certain non-employee relationships with pharmaceutical manufacturers (for example, consulting, advisory, or research relationships) and still be considered independent and free of conflict, provided those relationships do not constitute significant sources of their income and they do not otherwise have any conflicts of interests that would compromise their independence. As already mentioned, our draft benefit review criteria (recently issued for public comment) would require all P&T committee members to sign a conflict of interest statement revealing economic or other relationships with entities that could influence pharmaceutical decisions. This requirement is consistent with best practices in pharmacy benefit management, and we expect that it will be met consistent with industry standards for conflict of interest disclosures.

Comment: Several commenters supported requiring that a plurality of P&T committee members be experts in the care of elderly and disabled patients. Some commenters recommended that use of the certified geriatric pharmacist credential would be an appropriate way to ensure that at least one pharmacist on the P&T committee has expertise in care of the elderly. One commenter opposed requiring that at least one practicing physician and one practicing pharmacist be experts in the care of elderly and disabled patients. Another commenter thought that at least one member of Part D plans' P&T committees should be a State Medicaid representative.

Response: As provided in § 423.120(b)(1)(iii) of our final rule, we are retaining the requirement that at least one practicing physician and one practicing pharmacist on a P&T committee have expertise in the care of elderly or disabled persons, though plans should view this requirement as a floor which they can certainly exceed. As proposed in the draft benefit design review criteria we recently issued for public comment, we would require P&T committee members to represent various clinical specialties. This requirement is consistent with best practices in pharmacy benefit management and will ensure that appropriate expertise—including in the areas of care of disabled and elderly populations—is included on Part D plans' P&T committees and that their clinical decisions are based on the strength of scientific evidence and standards of practice, and safety and efficacy considerations. We expect that P&T committee members will represent a mix of clinical specialties in order to ensure that P&T committees have the breadth of expertise necessary to adequately evaluate scientific evidence, standards of practice, and other information.

Comment: A number of commenters suggested that we should require that P&T committees include experts in certain clinical specialties (for example, nephrology, oncology, rheumatology, dermatology, mental health, long-term care, and many others) or, at the very least, that such experts serve as consultants to P&T committees.

Response: We agree that P&T committee members should represent various clinical specialties in order to provide the depth of expertise needed to develop an adequate formulary and utilization management processes for the Medicare population. As proposed in the draft benefit design review criteria we recently issued for public comment, we would require P&T committee members to represent various clinical specialties. This requirement is consistent with best practices in pharmacy benefit management. In addition, we note that, since committee members must base clinical decisions on the strength of scientific evidence and standards of practice, it is not essential that every specialty be represented—either as a P&T committee member or as a consultant. For some issues, the use of peer-reviewed medical literature—including randomized clinical trials, pharmacoeconomic studies, outcomes research data, and other such information—may be sufficient.

Comment: We received a number of comments regarding our requirements for the basis of clinical decisions by Part D plan P&T committees. One commenter supported our characterization of the appropriate role of quality and cost considerations in Part D plan formulary development. Some commenters emphasized that cost considerations should be secondary to clinical issues in formulary development and review. One commenter suggested segregating cost and clinical reviews to preserve objectivity. Several commenters specifically suggested that we require Part D plan P&T committees to use classes of data that are included in the Academy of Managed Care Pharmacy (AMCP) format for Formulary Submissions—including clinical trials, health outcomes studies, and economic and budget impact models—as well as clinical guidelines issued by medical specialty societies. Several other commenters encouraged us to require Part D plans to consider data addressing total health care costs, if available, rather than pharmacy costs, in any cost considerations used for clinical decision-making.

Response: As required in section 1860D–4(b)(3)(B) of the Act, P&T committees will be required to base clinical decisions on the strength of scientific evidence and standards of practice, including assessing peer-reviewed medical literature (for example, randomized clinical trials, pharmacoeconomic studies, outcomes research data, and other such information as the committee determines appropriate). In addition, a P&T committee must take into account whether including a particular Part D drug on the Part D plan's formulary (or on a particular formulary tier) has any therapeutic advantages in terms of safety and efficacy. Where applicable, therapeutic advantage should be considered in relation to the interaction of a drug therapy regimen and the use of other health care services.

We agree with commenters who urged that Part D plans consider data addressing total health care costs, if available, rather than pharmacy costs, in any cost considerations used for clinical decision-making. Since Part D sponsors have discretion with regard to the actual information their P&T committees use, we cannot mandate that all Part D plans use pharmacoeconomic studies, for example. However, in our subsequent guidance we intend to make clear that to the extent that the Part D plan considers costs in making its decision, it will take into account total health care costs rather than just drug costs. For example, to the extent that a particular drug has been shown to be more effective in preventing the need for hospital care or better at controlling acute flare-ups requiring the use of other services, we expect P&T committees to take these things into account in their determinations of drug efficacy. Given these requirements for evidence-based decision-making, it is our expectation that committee members will balance any relevant cost considerations with clinical considerations.

Comment: Some commenters supported a role for P&T committees in designing formulary tiers and any other clinical program implemented to encourage the use of preferred drugs. One commenter supported such a role,

provided that P&T committees are not required to be engaged in other benefit design issues.

However, several commenters believed that P&T committees should have no involvement in the development of utilization management programs including development of cost-containment tools, medication therapy management programs, and quality assurance programs, as well as more specific benefit design issues such as the development of cost-sharing tiers and should instead be limited to providing Part D plans with clinical recommendations on formularies. Other commenters thought that we should provide Part D plans with flexibility to determine how utilization management programs are designed and administered.

Response: We believe that the requirement in section 1860D–3(c)(1) of the Act that Part D sponsors establish an appropriate cost-effective drug utilization management program supports a role for P&T committees in the development of formulary management practices and policies—including prior authorization, step therapy, generic substitution, quantity limits, and other drug utilization management activities that affect access to covered Part D drugs. Furthermore, section 1860D–4(b)(3)(F) of the Act and § 423.120(b)(1)(vii) of our final rule require Part D plans to periodically evaluate and analyze treatment protocols and procedures. Clinical input is critical in the development of these policies in order to ensure that formulary management decisions balance economic and clinical factors to achieve appropriate, safe, and cost-effective policies. The review by P&T committees of Part D plan policies that guide exceptions and other utilization management processes is not only an important component in ensuring that plans adopt appropriate utilization management activities consistent with the statutory requirements, but also is consistent with best practices in pharmacy management policy. However, as previously stated, we believe that the primary function of a P&T committee is to provide clinical and not financial or benefit design—expertise.

Comment: Some commenters suggested that P&T committees review formularies regularly, with some suggesting a quarterly review and others an annual review

Response: As proposed in the draft benefit design review criteria we recently issued for public comment, we expect that P&T committees will meet on a regular basis, but not less frequently than on a quarterly basis. This standard is consistent with best practices in pharmacy management policy.

Comment: One commenter urged us to specify minimum timeframes for periodic evaluation of Part D plan treatment protocols and formulary-related procedures under § 423.120(b)(4) of our proposed rule. A number of commenters recommended that protocol reviews be conducted on an ongoing basis at least quarterly, whereas some specified that such reviews be conducted at least annually.

Response: As specified in § 423.120(b)(1)(vii) of our final rule, Part D plan P&T committees will be required to evaluate and analyze treatment protocols and procedures related to the plan's formulary at least annually.

Comment: A number of commenters also asked us to require that P&T committees have processes for making formulary revisions between regularly scheduled meetings when new clinical information becomes available or the FDA approves new medications.

Response: As proposed in the draft benefit design review criteria we recently issued for public comment, we expect that P&T committees will review new Part D drugs, or drugs for which new clinical information is made available by the Food and Drug Administration, within 90 days of the availability of new information. This will allow for appropriate formulary changes to be made with all due speed and ensure that a Part D plan's formulary is based on the most recently available scientific evidence, standards of practice, and drugs' relative therapeutic advantages in terms of safety and efficacy. However, we expect that drugs pulled from the market by the FDA or manufacturers will be removed from Part D plan formularies immediately.

Comment: Many commenters suggested additional requirements for ensuring P&T committee accountability, including requiring Part D plans to have a P&T committee regardless of whether they have a formulary or not; including a patient advocate on the committee to represent interests of patients; developing an oversight mechanism similar to local Medicare carrier advisory committees; requiring P&T committee meetings to be held publicly in order for consumers and stakeholders to have an opportunity to hear committee deliberations; requiring Part D plans to include a charge ensuring that the interests of beneficiaries are protected by their benefit design decisions; requiring thorough documentation of the rationale for P&T committee decisions; and requiring P&T committee decisions to be issued to the public upon request within a reasonable period of time.

Response: These requirements are not consistent with standard practice in pharmacy benefit management. We believe that our requirements in § 423.120(b)(1) of the final rule, as well as our formulary review which will consider the structure and utilization of an organizations P&T committee will sufficiently ensure that P&T committees function as a forum for evidence-based formulary review. As an added safeguard, and as provided in § 423.120(b)(1)(viii) of our final rule, we will require Part D plan P&T committees to document in writing the basis of their decisions regarding formulary development and revision and utilization management activities.

2. Plan Formularies

As provided under section 1860D–4(b)(3)(C)(ii) of the Act, we requested that the U.S. Pharmacopoeia (USP) develop a model set of guidelines that consists of a list of drug categories and classes that may be used by Part D sponsors to develop formularies for their qualified prescription drug coverage, including their therapeutic categories and classes. For more information about the USP model guidelines and the model guidelines themselves, please consult *http://www.usp.org/drugInformation/mmg/*.

Section 1860D–4(b)(3)(C) of the Act provides, and § 423.120(b)(2) of our proposed rule required, the inclusion of drugs in each therapeutic category and class of Part D drugs in a Part D plan's formulary, although not necessarily all drugs within such categories and classes. As discussed in the proposed rule, we interpreted this provision to require coverage of at least two Part D drugs within each therapeutic category and class of Part D drugs, unless only one Part D drug existed in a particular therapeutic category and class of Part D drugs.

We sought comments on ways to balance Part D plans' flexibility to use utilization management mechanisms to maximize covered Part D drug discounts and lower enrollee premiums with the needs of certain special populations of Part D enrollees, including Part D enrollees residing in long-term care facilities.

In accordance with section 1860D–4(b)(3)(C)(iii) of the Act, Part D sponsors cannot change therapeutic categories and classes in a formulary other than at the beginning of a Part D plan year, except as we would permit to take into account new therapeutic uses and

newly approved Part D drugs. Section 423.120(b)(4) of our proposed rule specified that, in accordance with section 1860D–4(b)(3)(F) of the Act, Part D sponsors will periodically be required to evaluate and analyze treatment protocols and procedures related to their formularies to ensure that their Part D plan members were receiving the best possible care for conditions related to their use of covered Part D drugs.

In addition, section 1860D–4(b)(3)(E) of the Act requires that Part D sponsors provide ''appropriate notice'' to us, affected enrollees, authorized prescribers, pharmacists, and pharmacies regarding any decision to either: (1) remove a drug from its formulary; or (2) make any change in the preferred or tiered cost-sharing status of a drug. Section 423.120(b)(5) of our proposed rule implemented this requirement by defining appropriate notice as at least 30 days prior to such change taking effect during a given contract year.

As provided under § 423.120(b)(6) of our proposed rule, we proposed that Part D sponsors be prohibited from removing a covered Part D drug or from changing the preferred or tiered cost-sharing status of a covered Part D drug between the beginning of the annual coordinated election period described in § 423.38(b) and 30 days subsequent to the beginning of the contract year associated with that annual coordinated election period.

Each Part D sponsor will also be required to establish policies and procedures to educate and inform health care providers and enrollees about its formulary, according to the provisions of section 1860D–4(b)(3)(D) of the Act. As required under section 1860D–4(b)(3) of the Act, the requirements regarding the development and application of formularies discussed in this preamble section may be met by a Part D sponsor directly, or through contracts or other arrangements between a Part D sponsor and another entity or entities.

Except as otherwise provided below, the final rule adopts the rules for Part D plan formularies set forth in § 423.120(b) of the proposed rule.

Comment: We received a significant number of comments that directly and indirectly relate to the USP draft model guidelines issued for public comment in August 2004. In general, the USP related comments can be grouped into two categories. On one side, many comments claim that the current draft model guidelines lack the necessary detail to ensure that beneficiaries will have access to a comprehensive drug benefit, often citing specific examples of medications that are necessary for the treatment of the most frail and vulnerable populations and could be excluded from Part D plan formularies that comply with the model guidelines.

On the other hand, many comments recommended that the USP model guidelines allow Part D plans the flexibility they need to develop clinically sound formularies that offer a prescription drug benefit at the lowest possible cost. Most of these commenters believe that the draft model guidelines, while in need of some specific modifications, are closer to reasonable than unreasonable. However, these commenters claim that the minimum ''drugs'' requirements for each category and class could significantly increase benefit costs if the categories and classes increase to a level of detail that interferes with Part D plans' ability to negotiate with manufacturers.

Response: We believe that the USP model guidelines identify a reasonable number of categories and classes that balance the need for a comprehensive Part D benefit with the need to allow Part D plans flexibility to develop their own formularies and manage costs. These model guidelines will provide us with a useful, standard format as a starting point for our review of Part D plan benefit packages, since we expect many plans will adopt the model guidelines as the basis for their formulary classifications and submissions.

The model guidelines, while important in creating a template for a formulary classification system, are not the only determinant of an adequate formulary. Plans will be required to include the types of drugs most commonly needed by Part D enrollees, as recognized in national treatment guidelines, in their formularies. Regardless of whether a Part D plan chooses to use the model guidelines or not, we will review the drugs chosen to populate plan formularies under our authority in section 1860D–11(e)(2)(D) of the Act to ensure that plan benefit design does not discourage enrollment by certain classes of Part D eligible individuals. However, formulary structure—including tiered cost-sharing structures -utilization management processes, P&T committee utilization and structure, and exceptions and appeals processes are just as important in ensuring a comprehensive benefit, and we intend to review these benefit design features as part of our comprehensive benefit package review. We discuss our benefit design review criteria in greater detail elsewhere in this preamble.

Comment: Several commenters disagreed with our interpretation of the statutory term ''drugs'' as requiring coverage of at least two Part D drugs within each therapeutic category and class of Part D drugs (unless only one Part D drug existed in a particular therapeutic category and class of Part D drugs), arguing that such an interpretation was too expansive, and requiring coverage of too many drugs in too many categories would diminish Part D plans' negotiating leverage. These commenters provided examples of drug categories for which a blanket requirement of two drugs is not appropriate, and an exception should be granted. One commenter recommended that we should allow an exception from this rule for categories and classes that only include two drugs, and allow enrollees to obtain the non-formulary drug in such categories via the exceptions process only.

In contrast, several commenters believed that requiring Part D plans to include two drugs in each therapeutic category and class of Part D drugs was not sufficient to ensure enrollee access to necessary medications. They were concerned that for some categories—including cancer treatments, rare diseases, mental illness, chronic pain, and other conditions—requiring only two drugs per drug category and class would be inadequate for Part D plans in terms of the statutory requirement that plan design not discourage enrollment.

Several commenters urged us to clarify that this minimum two-drug requirement must be met through drugs or biologicals offered on an unrestricted basis (for example, not subject to utilization management processes, such as prior authorization or step therapy, non-preferred cost-sharing tiers, or other such restrictions on access to necessary therapies), with some specifically urging us to impose restrictions on step therapy by Part D plans. Some asked us to specify that the two drugs must be distinct chemical entities. One commenter recommended that we do not allow any Part B-covered drugs to count toward the two-drug-per-category requirement.

Response: Section 1860D–4(b)(3)(C) of the Act requires that Part D plans' formularies include ''drugs within each therapeutic category and class of Part D drugs, although not necessarily all drugs within such categories and classes.'' We believe that our interpretation of ''drugs'' as ''at least two drugs'' is consistent with Congressional intent, and that it strikes an appropriate balance between providing Part D plans with the necessary leverage to negotiate with manufacturers for significant

discounts on covered Part D drugs and ensuring sufficient drug choice for beneficiaries. We have therefore retained the two-drug minimum requirement in § 423.120(b)(2)(i) of our final rule.

However, we recognize that Part D categories and classes may exist for which there are only two Part D drugs, and that including both of those drugs on a formulary may be problematic if the two drugs are vastly different in their clinical effectiveness. Given that section 1860D–4(b)(3)(C) of the Act requires that Part D plan formularies include ''drugs within each therapeutic category and class of Part D drugs, although not necessarily all drugs within such categories and classes,'' we will allow plans to request exceptions to the requirement in § 423.120(b)(2)(i) of our final rule to the extent they can demonstrate that there are only two Part D drugs available for a particular Part D drug category or class and that one of those drugs is clinically superior to the other. We have incorporated this provision at § 423.120(b)(2)(ii) of our final rule.

In response to comments that our proposed requirement is insufficient to provide adequate access to medically necessary treatments for Part D enrollees, we clarify that we will require Part D plans to adopt policies that ensure that beneficiaries have reasonable access to medically necessary drugs. Although Part D plans will not be required to include every Part D drug on their formularies, we will—as codified in § 423.120(b)(2)(iii) of our final rule—require that plans include adequate access to the types of drugs most commonly needed by Part D enrollees, as recognized in national treatment guidelines, on plan formularies. We are establishing this requirement consistent with section 1860D–11(d)(2)(B) of the Act, which provides us with authority similar to that provided to the Director of the Office of Personnel Management for setting ''reasonable minimum standards'' for health benefits plans. We are looking to existing national standards to inform our review at the drug level, and Part D plans will be expected to accommodate national guidelines and offer complete treatment options for a variety of medical conditions, including (but not limited to) asthma, diabetes, depression, lipid disorders, hypertension, and HIV. This is necessary in order to ensure that Part D plans do not substantially discourage enrollment by certain Part D eligible individuals based on exclusions of certain classes of drugs from their formularies. In addition to examining specific drugs on Part D plan formularies, and as discussed in greater detail elsewhere in this preamble, we will review other aspects of plan benefit designs—including tiered cost-sharing formulary structures, P&T committee structure and utilization, utilization management policies and processes, and exceptions and appeals processes—to ensure that Part D plans generally meet the requirements under Part D, including the provision of an adequate benefit.

We do not agree with comments asking that the two-drug requirement be met through drugs offered on an unrestricted basis. We recognize that Part D plans may establish utilization management processes in such a way as to substantially discourage enrollment by certain beneficiaries. On the other hand, utilization management restrictions may be entirely appropriate for specific drugs or categories of drugs. Furthermore, the statute specifically allows plans to utilize tiered cost-sharing structures provided they meet certain actuarial equivalence tests. As previously mentioned, part of our benefit design review will focus not only on the specific drugs included on a Part D plan's formulary, but also on a plan's utilization management policies and procedures, to ensure that plans do not discriminate against certain enrollees.

In addition, while drugs covered under Part B cannot be covered under Part D, as provided in section 1860D–2(e)(2)(B) of the Act, this exception to Part D coverage is limited to the drugs ''as so prescribed and administered'' under Part B. Thus, the fact that a beneficiary can have a particular drug covered under Part B ''incident to'' a physician service or as part of a hospital outpatient procedure does not mean that a prescription for the same drug should be denied by a Part D plan. We will provide more guidance on this issue, but we clarify that the number of drugs that may be denied coverage under Part D on the basis of the drug itself is limited. One category of drugs that can clearly never be covered under Part D is the list of oral cancer drugs covered under Part B. Such drugs and limited number of others may not be counted toward the two-drug minimum.

Finally, we clarify that our two-drug minimum requirement must be met through the provision of two chemically distinct drugs. In other words, Part D plans may not include two dosage forms or strengths of the same drug, or a brand-name drug and a generic equivalent, in a particular category or class and meet the requirement in § 423.120(b)(2)(i) of our final rule.

Comment: One commenter recommended that Part D plans' formularies include a wide variety of available dosage forms to the extent that was feasible. Another commenter asked us to clarify that we would not allow Part D plans to count different dosages of the same active ingredient as two separate drugs for the purposes of our two drug requirement. A third commenter asked us to clarify that it is acceptable for Part D plans to favor some dosages over others on their formularies.

Response: We stated in our proposed rule that it was our expectation that the drugs included in each therapeutic category or class would include a variety of strengths and dosage forms, and we stand by that expectation in our final rule. However, we clarify that Part D plans will not have to provide equal access to all strengths and dosage forms of a particular Part D drug, although beneficiaries will have the right to pursue coverage of additional strengths and dosage forms through the appeals process. We have clarified in § 423.120(b)(2)(i) of our final rule that Part D plans must include two chemically distinct Part D drugs in each therapeutic category and class of drugs, with different strengths and doses available for each of those drugs. Thus, Part D plans may not meet this requirement by only including two or more different dosages of the same Part D drug in a particular drug category or class.

Comment: Many commenters were concerned that our regulations will create barriers to physicians prescribing the best medication for their patients, including off-label uses of medications, which are common for many conditions and are the norm for some conditions. In actuality, off-label use is critically important and may be the mainstay of medical practice for successfully managing certain conditions, such as mental illnesses, chronic pain, chronic heart failure, arthritis, Parkinson's, HIV/AIDS and dementia. The FDA recognizes that ''off-label use of drugs by prescribers is often appropriate and may represent the standard of practice.'' A number of commenters opposed our position that the USP model guidelines should not be required to include classes of drugs if there is no FDA approved drug with an on-label indication for each class, even though there are FDA-approved drugs with commonly accepted off-label uses that would fall within a class. One commenter noted that any action taken by us regarding off-label use of medications would have a ripple effect on other public and private programs.

Some commenters requested that we clarify the formulary requirements in our final rule to require Part D plans to cover medically accepted off-label use of prescription drugs. They believe this is consistent with Congressional intent and past practice under the Medicare and Medicaid programs. In addition, one commenter is concerned that by assigning a drug to a specific class for formulary purposes, a Part D plan may not cover it for other medically accepted indications. One commenter suggested formularies should be required to include off-label uses for drugs for the prevention and treatment recommended in clinical guidelines issued by government agencies and medical societies, whether on-label or off-label. Another commenter said that off-label use must be accessible through a Part D plan's exceptions process for non-formulary drugs.

Response: We recognize the value of off label prescribing, particularly with regard to certain medical conditions. As mentioned in the proposed rule, we expect that the model categories and classes developed by USP will be defined so that each includes at least one drug that is approved by the FDA for the indication(s) in the category or class. That is, no category or class will be created for which there is no FDA approved drug and which would therefore have to include a drug based on its ''off label'' indication. We expect Part D plans using alternative drug classification systems to include at least one drug that is approved by the FDA for the indication(s) in each drug category or class. However, this would not preclude physicians and other prescribers from prescribing drugs for off label indications, provided the drug is prescribed for a ''medically accepted indication,'' as defined in section 1927(k)(6) of the Act. Further, we clarify that the USP model guidelines would not preclude Part D sponsors from assigning an FDA approved drug to a category or class based on an off label use for that drug, provided the FDA has not made a determination that the drug is unsafe for that use.

We do not have the authority to require that Part D plans cover the off-label use of certain Part D drugs. However, as discussed in greater detail elsewhere in this preamble, we will thoroughly evaluate plan benefit design to ensure that Part D plans provide an adequate benefit and do not discriminate against certain classes of Part D enrollees—including a review of plan utilization management policies and processes, formulary structure, and plan exceptions and appeals processes. We believe that these safeguards will ensure Part D enrollee access to Part D drugs dispensed for medically appropriate off label indications.

Comment: Multiple commenters were concerned that it is inappropriate for physicians to be given the new burden to ''document and justify'' off-label use in their Part D enrollees' clinical records due to the administrative burden and the interference with the practice of medicine by physicians. Many commenters mentioned that the FDA has recognized the right of physicians to use approved drugs and devices as they believe appropriate and never suggested there is a need to document such use. One commenter noted this documentation requirement is unprecedented and steps beyond well-established boundaries by inserting us into an individual physician's professional decision-making. If documentation is required, one commenter asked us to clarify what constitutes sufficient documentation.

One commenter, however, noted the need for documentation on prescriptions for off label use to enable pharmacists to conduct drug utilization review. Another commenter recommended regular reviews by us and by P&T committees through drug utilization and provider interviews as is customary in commercial plans.

Many commenters urged us to mandate that Part D plans give deference and flexibility to physicians when making coverage determinations since a patient's physician has clinical expertise and intimate knowledge of patients' medical needs. One commenter suggested that we specify that Part D plans may not prohibit providers from prescribing drugs for discretionary use if such use is supported by one or more standard reference compendia or by one or more scientific studies published in peer-reviewed medical journals or by generally accepted standards of clinical care. One commenter suggested that MMA regulations should restrict the ability of Part D plans to limit physician prescribing for off-label purposes unless there is objective medical evidence that such prescribing is inefficacious or harmful to the individual patient.

Commenters noted that onerous administrative hurdles associated with medically necessary off-label use could result in barriers to patient access to essential therapies. Without specific guidance, Part D plans could simply minimize financial risk through delay tactics disguised as Federal documentation requirements. One commenter recommended that at a minimum, we should clarify that there is nothing to prevent a Part D plan from covering an off-label use that does not meet the statutory definition of ''medically accepted indication'' if, based on expert advice, the plan determines that such use is appropriate. Multiple commenters suggested that the final rule guidance for Part D drugs should be at least as flexible as the current coverage policies for drugs covered under Medicare Part B. Under Part B, the definition of a ''medically accepted indication'' includes indications published in peer-reviewed literature; current Part B coverage policy regarding off-label drug use is also consistent with these norms.

Response: By stating in the proposed rule preamble that we strongly encouraged physicians and other prescribers to clearly document and justify off-label use in their Part D enrollees' clinical records, we did not intend to establish a new documentation requirement for prescribers. We agree with commenters that physicians must have sufficient latitude to prescribe drugs as necessary based on their patients' particular medical needs and consistent with medical standards of practice, and our statement should not be interpreted as imposing new and onerous reporting requirements on prescribers. As previously mentioned, we will thoroughly review plan benefit designs to ensure that Part D plans meet all applicable requirements under Part D including the provision of an adequate benefit. We expect that onerous documentation requirements for off-label prescribing could potentially be cause for finding that a Part D plan's proposed benefit structure does not meet Part D requirements.

We note that a drug is considered to be a Part D drug only if prescribed for a ''medically accepted indication'' as defined under section 1927(k)(6) of the Act. Drugs may not be covered under Part D even if they are not prescribed for a medically accepted indication. Coverage for other than a medically accepted indication is not permitted under the statute, since such drugs would not be considered Part D drugs. Plans have the flexibility to decide how to monitor whether a drug is prescribed for a medically accepted indication, as well as to determine whether the statutory definition of ''medically accepted indication'' is met with regard to the particular use of a drug.

Comment: We received numerous comments regarding our authority under section 1860D–11(e)(2)(D)(i) of the Act to review Part D plan benefit designs including any formulary or tiered formulary structure to ensure that plans do not discriminate against certain Part

D eligible individuals. Many commenters urged us to use this authority to thoroughly, comprehensively, and judiciously review Part D plan design and benefits including formulary structure to prevent discriminatory practices. Some of these commenters were adamant that such a review not be limited only to the particular drugs included on a formulary list, but also to tiered cost-sharing (including the use of 100 percent cost-sharing tiers), and utilization management requirements (for example, appeals, prior authorization, and step therapy requirements).

Several other comments cautioned us not to be overly prescriptive in our formulary review criteria and avoid unintentionally limiting the ability of Part D plans to manage the costs of the Part D benefit. One commenter suggested that our formulary review standards should provide substantial deference to P&T committees including on cost-sharing, step-therapy, and prior authorization processes, and that we should not establish our own requirements in these areas.

Other commenters asked that greater specificity regarding our criteria for formulary review, as well as practices that would be considered discriminatory, be provided either in regulation or in separate guidance, or both. Several commenters urged us to use defined performance metrics to make formulary discrimination assessments. Several commenters encouraged us to establish a flexible and readily accessible process for dialogue with a variety of stakeholders to create appropriate formulary review criteria, and one commenter urged us to actually involve States in the review process.

Several commenters thought our formulary review process should be performed annually and that contract renewal should be contingent upon passing our review. Others thought that Part D plan formularies should be reviewed more often given plans' ability to make formulary changes mid-year.

Response: We will comprehensively review Part D plans' proposed benefit structure to ensure that they generally comply with all applicable standards under Part D. We intend to conduct a reasonable review, providing guidelines that Part D plans can use in building formularies and structuring their bids. We recently shared with the public a first draft of our benefit package review criteria and, based on public comments received on that document, will finalize and make available publicly our final review criteria in early 2005.

Consistent with the authority provided under section 1860D–11(e)(2)(D)(i) of the Act, we will review Part D plan formularies to ensure that plans do not discriminate against certain classes of Part D eligible individuals by adopting a benefit design (including any formulary or tiered formulary structure) that would substantially discourage enrollment by certain beneficiaries. Nothing in the statute would foreclose us from concluding that a Part D plan's formulary substantially discourages enrollment even if the plan's classes and categories are considered non-discriminatory (for example, because the plan uses the USP model guidelines to structure its formulary). Although Part D plans will not be required to include every Part D drug on their formularies, we will require Part D plans to offer an adequate benefit. For example, we have the discretion to find that failure to include a specific drug would substantially discourage enrollment by beneficiaries with a condition that may only be treated by that drug. We are looking to existing national standards to inform our review at the drug level, and Part D plans will be expected to accommodate these national guidelines.

We believe that other aspects of Part D plan benefit design including formulary structure (including tiered cost-sharing structures), the structure and utilization of a plan's P&T committee, a plan's utilization management policies and procedures (for example, prior authorization, step therapy, and generic substitution), and a plan's exceptions and appeals processes are as important as a plan's formulary list of drugs in ensuring that beneficiaries are offered an adequate benefit that generally complies with all applicable standards under Part D. Therefore, we intend to review these plan features as part of our comprehensive review of Part D plan benefit designs.

We will review tiered cost-sharing arrangements to ascertain that the cost sharing associated with certain drugs or classes of drugs does not discourage enrollment by certain beneficiaries for example, those with certain diseases or medical conditions. We will also review a Part D plan's P&T committee structure and processes to ensure that plans comply with the requirements of section 1860D–4(b)(3)(B) of the Act, which creates standards designed to ensure impartial, clinically-based decision-making by P&T committees.

A Part D plan's utilization management policies and processes must ensure that beneficiaries have continuous, timely, and appropriate access to Part D drugs, and that such policies are structured on evidence-based criteria that are reviewed by a Part D plan's P&T committee. Section 1860D–4(c)(1)(A) of the Act requires Part D plans to establish cost-effective drug utilization management programs (including incentives to reduce costs when medically appropriate). Our review of plan utilization management policies and processes will ensure that those policies and processes are medically appropriate and do not discriminate against certain beneficiaries.

We clarify that a non-formulary drug is not necessarily a non-covered Part D drug. The MMA provides for an exceptions process whereby enrollees and prescribers can request Part D coverage at more favorable cost sharing than for non-preferred drugs, as well as access to non-formulary drugs at formulary cost-sharing levels. As discussed elsewhere in this preamble, we interpret section 1860D–4(h)(2) of the Act as requiring Part D plans to cover a non-formulary drug on appeal when, upon review, a physician determination of medical necessity is upheld. Thus, while Part D plans are not required to approve a non-formulary Part D drug in the first instance at the point of sale, plans are required to provide access to Part D drugs, both formulary and non-formulary, on appeal, where there is a legitimate medical need. We will review Part D plans' exceptions and appeals processes to ensure that evidence-based criteria are used to ensure medically appropriate access to all Part D drugs, including those drugs that are not favorably placed on a plan's formulary or not on the formulary at all.

Section 1860D–11(d)(2)(B) of the Act provides us with authority similar to that provided to the Director of the Office of Personnel Management with respect to health benefits plans; this includes setting ''reasonable minimum standards'' for plans. As we finalize our guidelines, we will look to existing national standards and guidelines, such as those established by the Utilization Review Accreditation Commission (URAC), the National Committee for Quality Assurance (NCQA), the American Society of Health Systems Pharmacists (ASHP), and the Academy of Managed Care Pharmacy (AMCP) to develop a framework for formulary management. The principles embodied in these standards and guidelines represent commercial best practice, and we believe Part D enrollees should be granted the same rights and protections under their Part D plan as generally

available to those enrolled in commercial plans.

Comment: Many commenters supported establishing rules for special treatment, to include alternative or open formularies and other special provisions and exemptions, for certain classes of enrollees. Commenters suggested a number of classes of beneficiaries that we may want to consider ''special populations'' for the purpose of offering such special rules, including dual eligibles, institutionalized beneficiaries, individuals with certain diseases or medical conditions, and minority populations. Other commenters opposed any requirement that special populations be subject to special rules. Instead, they argued that we should provide Part D plans the flexibility to manage and design benefits consistent with their enrollees' needs. They felt that prescriptive guidance was not necessary and that our review for discrimination should be sufficient to ensure adequate access to all medically necessary drugs.

Response: We share commenters' concerns about access to all medically necessary Part D drugs by vulnerable Part D enrollees. However, after much consideration, we disagree with commenters who advocated for specific requirements in regulation that would create special rules applicable only to certain classes of Part D enrollees. We believe commenters' concerns regarding access to Part D drugs for vulnerable populations will be addressed via our review of Part D plan benefit packages.

As discussed in great detail elsewhere in this preamble, we will comprehensively review Part D plans' proposed benefit structure to ensure that they generally comply with all applicable standards under Part D—including the provision of a benefit that provides for adequate coverage of the types of drugs most commonly needed by Part D enrollees, as recognized in national treatment guidelines. We intend to conduct a reasonable review, providing guidelines that Part D plans can use in building formularies and structuring their bids. We recently shared with the public a first draft of our benefit package review criteria and, based on public comments received on that document, will finalize and make available publicly our final review criteria in early 2005.

Comment: A number of commenters urged us to place strict limits on Part D plans' ability to remove drugs or increase the cost sharing associated with certain formulary drugs mid-year. One commenter suggested we allow for changes only at the beginning of a contract year so that changes are announced to current and prospective enrollees prior to the open enrollment period and Part D plans are able to market their new formulary for the upcoming plan year. Another commenter recommended that we allow formulary changes only from October 1st to November 14th of a given year.

Several commenters suggested that Part D plans be required to provide justification for any decision to remove a drug from the formulary. Another commenter stated that Part D plans should be required to document any decision to remove a drug from the formulary based on detailed scientific and clinical evidence. This commenter noted that reasons for discontinuing coverage could include new clinical evidence that a drug is unsafe, contraindicated for particular indications, or a manufacturer's withdrawal from the market. Other commenters noted that Part D plans should only be allowed to remove drugs from their formulary when new information about a drug's safety becomes available.

Response: The goal of the MMA was to encourage private sector organizations who meet the law's requirements to offer a range of Part D plan options for Medicare beneficiaries by providing flexibility in plan design and management. This flexibility is modeled after the way consumers in the private sector receive drug benefits. Although the statute requires us to limit changes in the therapeutic categories and classes of a Part D plan's formulary to the beginning of each plan year (except as we permit to take into account new therapeutic uses and newly approved Part D drugs), it does not give us similar authority to preclude mid-year changes to a Part D plan's formulary list. However, as provided in section 1860D–4(b)(3)(E) of the Act, codified in § 423.120(b)(5) of our final rule, and discussed in greater detail elsewhere in this preamble, Part D plans must provide appropriate notice to affected enrollees, among others, prior to removing a drug from their formulary or changing the preferred or tier status of a formulary drug. Such notice will provide beneficiaries with ample time to transition to a covered Part D drug that meets the enrollee's needs, or to request a coverage exception.

Comment: We received a number of comments urging us to consider requirements related to the ''grandfathering,'' on the same terms as previously available, of covered Part D drugs that are either removed from Part D plan formularies, or whose cost-sharing tier or preferred status changes, mid-year. One commenter stated that patients with chronic diseases who are stabilized by a plan-covered drug at the beginning of the year should not experience a higher copayment or be denied coverage of a drug based on a formulary change.

Other commenters thought the grandfathering should apply more broadly. Some commenters said that Part D plans should be required to grandfather a drug for anyone taking the medication prior to its removal from their formulary (unless removed due to FDA safety concerns). One commenter recommended that we require Part D plans to grandfather coverage of chronic medications until the next open enrollment period. Other commenters noted that, if we do not include rules placing strict limits on formulary changes during the year, Part D plans should be required to continue coverage of the discontinued drug for the remainder of year, at the same price, for all individuals taking the drug as part of an ongoing treatment regimen. One commenter suggested that Part D plans be required to provide patients with a 72-hour supply of a drug if it has been removed from the formulary. However, some commenters also clarified that such a requirement should not be meant to prohibit a Part D plan from asking physicians to voluntarily switch patients to less costly drugs through a therapeutic substitution initiative.

Response: Although the MMA does not preclude mid-year formulary changes by Part D plans, it does require that plans provide appropriate advance notice to affected enrollees of any removal of a covered Part D drug from a formulary, or any change in the preferred or tiered cost-sharing status of a covered Part D drug. As detailed elsewhere in this preamble, we have interpreted ''appropriate notice'' to mean at least 60 days prior to such change taking effect. We believe that 60 days, which is consistent with National Association of Insurance Commissioners (NAIC) model guidelines, provides affected enrollees with ample time to either switch to a therapeutically appropriate alternative medication, or obtain a redetermination by the Part D plan, reconsideration by the independent review entity, and request an administrative law judge hearing before the change becomes effective. To the extent that Part D plans do not provide such 60-day advance notice, they will be required to provide such notice and a 60-day supply of the drug at the same terms covered previously when affected enrollees request refills of their prescriptions. Once notice is provided, enrollees will have a 60-day window to either switch to a

therapeutically appropriate alternative medication, or obtain a redetermination by the Part D plan, reconsideration by the independent review entity, and request an administrative law judge hearing before the 60-day supply is exhausted.

Comment: A number of commenters voiced support for some kind of transition period for beneficiaries, particularly full-benefit dual eligibles, transitioning to Medicare Part D from other drug coverage. These commenters argue that, under Medicaid, many beneficiaries—especially those with certain conditions (HIV/AIDS and mental illness, for example, as well as those residing in long-term care facilities)—may experience relatively unfettered access to medically necessary drugs. This may not be the case when these enrollees transition their drug coverage from Medicaid to Part D, since different Part D plans will have different formularies, cost-sharing tiers, and utilization management requirements. Commenters are concerned that vulnerable beneficiaries may elect, or may be auto-enrolled in, a Part D plan that does not cover the drugs these beneficiaries need. More generally, several commenters noted that many beneficiaries—and not just those who are considered vulnerable or special populations—could face a significant loss of continuity of care if Part D plans' formularies are substantively different from each other or from commercial plans. They advocate for an additional coverage clause for patients transitioning into or changing Part D plans in order to avoid disruptions in care.

Response: We agree with commenters that Part D plans should have processes in place to transition current enrollees from their old coverage to their new Part D plan coverage, particularly in cases where new enrollees are currently taking Part D drugs that are not included on the Part D plan's formulary at the time of enrollment. However, we envision that the need for such a transition period will be limited for several reasons.

In reviewing a Part D plan's benefit package, we have the discretion to find that failure to include a specific drug on the formulary would substantially discourage enrollment by beneficiaries with a condition that may only be treated with that drug. For example, we expect that ensuring that beneficiaries with certain conditions, such as HIV/AIDS, are not as a group substantially discouraged from enrolling in a Part D plan will require that all or substantially all drugs in a particular therapeutic class be covered. In addition, in our review of plan benefit packages and our general oversight to ensure that Part D plans comply with all applicable requirements, we will examine not only the inclusion of particular drugs on a formulary, but also the structure and utilization of a plan's P&T committee, formulary structure (including tiered cost-sharing structures), a plan's utilization management policies and procedures (for example, prior authorization, step therapy, and generic substitution), and exceptions and appeals processes and how such processes guide access to both formulary and non-formulary drugs. Given such a review of the overall benefit package, we would expect that the majority of transition concerns vis-à-vis special populations will be obviated prior to beneficiary enrollment, as Part D plans will know our benefit package review criteria in advance of the bidding process. In addition, and as described in detail elsewhere in the section of this preamble discussing exceptions and appeals, we are adopting a substantive rule requiring coverage of non-formulary drugs on appeal provided that a medical necessity determination is upheld upon review.

To address the needs of new Part D plan enrollees who are transitioning to Part D from other prescription drug coverage, and whose current drug therapies may not be included in their Part D plan's formulary despite the safeguards noted above, we are requiring—in § 423.120(b)(3) of our final rule—that Part D plans establish an appropriate transition process for new enrollees which we would review as part of our benefit package review process. Section 1860D–11(d)(2)(B) of the Act provides us with authority similar to that provided to the Director of the Office of Personnel Management (OPM) with respect to health benefits plans; as provided in 5 U.S.C. 8902(e), this includes the authority to ''prescribe reasonable minimum standards for health benefits plans.'' It is our understanding that OPM, in its contract negotiations with FEHBP plans, requires a transition policy. Furthermore, many commercial plans include transition processes for new enrollees. Failure to appropriately transition certain beneficiaries could result in aggravation of certain medical conditions including, in some cases, hospitalization which could ultimately increase costs to Medicare under Parts A and B. Thus, requiring Part D plans to establish appropriate transition policies for new enrollees appears to be consistent with our authority to prescribe reasonable minimum standards for Part D plans.

We believe that a requirement for an appropriate transition process for new enrollees prescribed Part D drugs that are not on the Part D plan's formulary appropriately balances the protection of certain vulnerable populations with flexibility for Part D plans to develop a transition process that dovetails with plans' specific benefit designs. We will provide additional guidance regarding transition process requirements as part of our benefit package review criteria. However, we expect that a Part D plan's transition process would address procedures for medical review of non-formulary drug requests and, when appropriate, a process for switching new Part D plan enrollees to therapeutically appropriate formulary alternatives failing an affirmative medical necessity determination. Such a policy should also focus on particularly vulnerable populations, including dual eligibles and individuals with certain medical conditions (for example, enrollees with HIV/AIDS, mental illness, and those with other cognitive disorders).

Comment: Some commenters requested that we establish a standard process for making formulary changes that Part D plans are required to follow, including standard policies and procedures for communicating changes to beneficiaries, pharmacists, and physicians. Another commenter suggested that we develop a standard formulary change form.

Response: As provided in section 1860D–4(b)(3)(E) of the Act, and codified in § 423.120(b)(5)(i) of our final rule, we will require that Part D plans provide appropriate notice regarding any removal of a covered Part D drug from their formulary or any change in the preferred or tiered cost-sharing status of a drug to affected enrollees and other parties. We believe that Part D plans should have the flexibility to develop formulary change notices that meet their particular needs, provided they include the information elements we specify at § 423.120(b)(5)(ii) of our final rule and discussed in greater detail elsewhere in this preamble.

Comment: One commenter suggested that notice not be required when the enrollees' cost sharing is being reduced. This commenter also suggested that notice not be required when generic competitors have dropped out of the market, leaving only one supplier, and the generic drug as a result becomes effectively treated as a single-source ''brand name'' drug. Another commenter noted that the requirement for written notice should extend beyond changes in covered medication and should also be sent when the Part D plan changes procedures for accessing a

particular medicine. Some commenters suggested we define ''appropriate notice'' differently for the expansion of a formulary versus the removal of a drug from the formulary to be consistent with the private market.

Response: Section 1860D–4(b)(3)(E) of the Act requires Part D plans to provide notice before making ''any change in the preferred or tiered cost-sharing status of a drug.'' Plans must therefore provide notice regarding any cost-sharing changes be they increases or reductions, consistent with the requirements of § 423.120(b)(5) of our final rule. The previously cited statutory language limits the provision of notice of formulary changes to the removal of a drug from a formulary or any change in the preferred or tier status of a drug, meaning that Part D plans will not be required to provide notice regarding a change in utilization management processes associated with a particular drug. However, we encourage Part D plans to do so to the extent practicable. We agree with the commenter who asks that we make a distinction between drugs added to and removed from a formulary. As provided in § 423.120(b)(5)(i) of our final rule, Part D plans will only be required to provide advance notice of formulary changes to affected beneficiaries when drugs are removed from a formulary; at their option, Part D plans may also wish to notify enrollees of new additions to their formularies.

Comment: Some commenters support the 30-day notice provision in our proposed regulation. Other comments specifically noted that there should be exceptions to the 30-day requirement in cases where there has been an FDA directive to remove a drug from the market.

However, many commenters were concerned that the 30-day notice provision in the proposed regulation would not provide the adequate time frame for enrollees to make the necessary changes in their drug treatment and ensure continuity of care particularly for enrollees with chronic conditions. Many commenters suggested a 90-day notice requirement. Several commenters suggested that beneficiaries be notified directly in writing at least 60 days before any change, and one commenter noted that NAIC model regulations for drug benefit changes require a 60-day notice.

Response: We appreciate the feedback on our interpretation of ''appropriate notice'' in the proposed rule as consisting of advance notice of at least 30 days. To ensure that Part D enrollees are provided with sufficient time either to switch to a therapeutically appropriate alternative medication, or obtain a redetermination by the Part D plan, reconsideration by the independent review entity, and request an administrative law judge hearing, we have defined appropriate notice as at least 60 days in § 423.120(b)(5)(i)(A) of our final rule. In addition to affording enrollees more time to manage the consequences of mid-year formulary changes, a 60-day requirement is consistent with the NAIC model guidelines for drug benefit changes. As provided in § 423.120(b)(5)(i)(B) of our final rule, Part D plans also have the option to the extent that they are not able to provide a 60-day advance notice to provide the notice and provide 60 days' coverage of the Part D drug, under the same terms as previously available under the Part D plan, at the time the enrollee fills his or her prescription. Once notice is provided, enrollees will have a 60-day window to either switch to a therapeutically appropriate alternative medication, or obtain a redetermination by the Part D plan, reconsideration by the independent review entity, and request an administrative law judge hearing before the 60-day supply is exhausted.

We note that, in order for the requirement regarding plan changes during the beginning of a contract year in § 423.120(b)(6) of our final rule to be consistent with the 60-day advance notice requirement in § 423.120(b)(5)(i)(A) of the final rule, we have changed the requirement in the proposed rule such that a Part D sponsor may not remove a covered Part D drug from its Part D plan's formulary, or make any change in the preferred or tiered cost-sharing status of a covered Part D drug on its plan's formulary, between the beginning of the annual coordinated election period and 60 days after the beginning of the contract year associated with that AEP. As previously mentioned, we had proposed a period of 30 days in § 423.120(b)(6) of our proposed rule.

We note that, in cases in which the FDA requires the removal of a covered Part D drugs from the market or a manufacturer pulls the drug from the market for safety reasons, 60-day advance notice will not be required, as provided in § 423.120(b)(5)(iii) of our final rule. However, Part D plans will be required to provide notice to affected enrollees (as well as to SPAPs, entities providing other prescription drug coverage, authorized prescribers, network pharmacies, pharmacists, and us) about the removal of a such a covered Part D drug from their formularies as quickly as possible after the drug is actually removed from the formulary. This notification must comply with our notification requirements in § 423.120(b)(5)(ii)(A) through (b)(5)(ii)(D).

Comment: Some commenters asked for clarification on what is considered as ''appropriate notice''. Many commenters urged us to require Part D plans provide notice in writing and mail directly to each enrollee who is affected by the change. The commenters noted that without specifying that the notice must be provided in writing, Part D plans may believe they satisfy requirement by posting this information on their plan websites. Several commenters noted that website notification is inadequate. One commenter asked that Part D plans be allowed to give notice electronically if the enrollee opts for that communication method.

Another commenter asked that Part D plans, primarily MA plans, receive more flexibility in giving notice to enrollees. One commenter noted that Part D plans should be allowed to convey certain types of formulary changes through pre- and post-enrollment materials such as sales brochures, enrollment forms, evidence of coverage, or summaries of benefits.

Response: We agree that Part D plans must provide any formulary change notice in writing, and deliver it directly to affected enrollees. This requirement is reflected in § 423.120(b)(5)(i)(A) of our final rule. As provided in § 423.128(d)(2)(iii) of the final rule, Part D sponsors must also provide this notice to all current and prospective Part D enrollees via their plan websites. However, we agree with commenters who assert that website notification, on its own, is an inadequate means of providing specific information to the enrollees who most need it. Website notification will simply be an additional way in which Part D plans may provide notice of formulary changes to affected enrollees. We therefore require Part D plans to provide this notice directly to affected beneficiaries. As an alternative to providing this notice to affected beneficiaries via U.S. mail, to the extent that plan enrollees affirmatively elect to receive such notice electronically rather than in writing, via U.S. mail, Part D plans may provide notice electronically only.

We do not believe that the formulary change notice requirements should apply any differently to MA-PD plans (or to cost plans offering qualified prescription drug coverage) than they do to prescription drug plans. In order to ensure that enrollees receive and process information about formulary changes in a timely way, we believe that

a notice of formulary changes is the most efficient way to do so, and that other materials (including pre- and post-enrollment materials such as sales brochures, enrollment forms, evidence of coverage, or summaries of benefits) are not the most appropriate mechanisms to convey such information.

Comment: Many commenters recommended requiring Part D plans to include information about enrollees' rights to request an appeal or exception with their formulary change notification. One commenter urged that if the notice of the change in formulary involves the addition of a medication, the notice should also explain how the medication will be classed, if the Part D plan uses a tiered co-pay system or step therapy system. The notice should also indicate expected cost to the beneficiary. If a medication is being removed from the formulary, the notice should indicate what medication is available for individuals who were prescribed the medication being removed.

Response: In response to the helpful public comments received on what ''appropriate notice'' of formulary changes should comprise, § 423.120(b)(5)(ii) of our final rule requires that Part D plans include the following information on their formulary changes notices: (1) the name of the affected covered Part D drug; (2) whether the plan is removing such covered Part D drug from the formulary, or changing its preferred or tiered cost-sharing status; (3) the reason why the plan is removing such covered Part D drug from the formulary, or changing its preferred or tiered cost-sharing status; (4) alternative drugs in the same therapeutic category or class or cost-sharing tier and expected cost-sharing for those drugs; and (5) the means by which enrollees may obtain a coverage determination under § 423.566 or exception under § 423.578 of our final rule. These required information elements will provide enrollees with the information they need to request an independent review or to switch to an alternative formulary drug.

Comment: Several commenters noted that advance notice of formulary changes should only be required for enrollees currently using a particular drug, per our proposal in our notice of proposed rulemaking. One commenter asked that our interpretation of the term ''affected enrollee'' be further expanded to include an enrollee who has been dispensed a drug that has been removed, or whose status has changed, within the last 90 days. Other commenters urged us to require Part D plans to provide all enrollees (not just those taking the affected drug) with advance notice of formulary changes.

Response: We interpret the statutory term ''affected enrollee'' as referring to a Part D enrollee who is currently taking a covered Part D drug that is either being removed from a Part D plan's formulary, or whose preferred or tiered cost-sharing status is changing. In other words, Part D plans will not be required to notify all enrollees regarding formulary changes during a contract year only those directly affected by changes with respect to a particular covered Part D drug. This will minimize Part D plan administrative costs while getting information to those individuals who need it. We have incorporated this definition of the term ''affected enrollee'' in § 423.100 of our final rule.

Comment: Several commenters recommended that Part D plans notify prescribers, pharmacists and pharmacies through information posted on plans' websites or through routine communication to prescribers and pharmacists rather than contacting all prescribers and pharmacies directly. More than one commenter stated that sending a mailed notification to all beneficiaries, affected physicians, and pharmacists would be an enormous undertaking and expense. This commenter believes that it is appropriate to mail notifications to those taking the medication and provide it electronically to physicians, pharmacists, and other beneficiaries via the Part D plan website and upon request.

Response: We agree with commenters that we should provide greater flexibility in terms of the mechanism by which they provide notice to parties other than affected enrollees to whom they are required to provide advance notice of formulary changes (including authorized prescribers, pharmacists, pharmacies, and us). As provided in § 423.120(b)(5)(i) of our final rule, we do not specify that written notice is required to be provided to these parties. Thus, Part D plans can determine the most effective means by which to communicate formulary change information to these parties, including electronic means.

Comment: Several commenters suggested Part D plans also notify SPAPs, State retiree plans, and State Medicaid programs of formulary changes, and another commenter suggested State Medicaid offices as well.

Response: Section 1860D–4(b)(3)(E) of the Act requires that ''appropriate notice'' of formulary changes be made specifically to the Secretary, affected enrollees, physicians, pharmacies, and pharmacists. However, we expect Part D plans to coordinate with SPAPs and other plans providing benefits that supplement the benefits available under Part D coverage to Part D enrollees. Provision of formulary change information to these health plans and programs will be important in ensuring effective coordination. Given that section 1860D–24(a)(2)(F) of the Act provides us with flexibility to establish coordination of benefits requirements regarding other administrative processes not specified in section 1860D–24(a)(2) of the Act, we believe it is reasonable to require Part D plans to notify SPAPs and other health plans and programs (as defined in § 423.454(f)(1) of our final rule) regarding formulary deletions or changes to the tiered cost-sharing status of a drug. We have incorporated this requirement into § 423.120(b)(5) of our final rule.

Comment: One commenter recommended that Part D sponsors should include in their formulary notice to us a certification that they are still meeting the statutory formulary requirements.

Response: We note that, notwithstanding any formulary changes Part D plans make mid-year, plans will still be required to meet all the formulary requirements in § 423.120(b) of our final rule, and we will review all formulary changes to ensure that this is the case.

c. Use of Standardized Technology

In accordance with the requirements of section 1860D 4(b)(2)(A) of the Act, Part D sponsors must issue (and reissue, as appropriate) a card or other technology that enrollees could use to access negotiated prices for covered part D drugs. Section 1860D–4(b)(2)(B)(i) of the Act mandates that we develop, adopt, or recognize standards relating to a standardized format for a card or other technology for accessing negotiated prices to covered Part D drugs. Section 1860D 4(b)(2)(B)(ii) of the Act requires us to consult with the National Council for Prescription Drug Programs (NCPDP) and other standard setting organizations, as appropriate, to develop these standards.

Except as otherwise provided below, the final rule adopts the rules regarding use of standardized technology set forth in § 423.120(c) of the proposed rule.

Comment: A number of commenters support our using a standardized identification card using NCPDP standards. These commenters note that a standardized card using the NCPDP format will create increased efficiencies such as reduced waiting times for dispensing medications that will benefit pharmacy providers and beneficiaries. A

few commenters suggested that we provide MA organizations with the flexibility to integrate their drug card with their medical benefits card rather than issuing a separate card if the MA organization chooses to do so and others requested clarification that MA organizations could issue a single card for both their medical and drug benefits. One commenter expressed concern about using an identification number other than the beneficiaries' Medicare Identification Number because this number is familiar and known by the beneficiaries. In certain situations, if the card were lost or stolen, beneficiaries could easily remember their drug card number.

Response: As provided under section 1860D 4(b)(2)(B)(ii) of the Act, we will consult with the National Council for Prescription Drug Programs (NCPDP) and other standard setting organizations, as appropriate, to develop these standards. Given that NCPDP is recognized as the industry standard for current prescription drug programs, and we relied on its standards in developing requirements for discount card sponsors' cards under the Medicare Prescription Drug Discount Card and Transitional Assistance Program, we expect to base our card standards on NCPDP's ''Pharmacy ID Card Standard.'' This standard is based on the American National Standards Institute ANSI INCITS 284–1997 standard titled *Identification Card—Health Care Identification Cards*, which may be ordered through the Internet at *http://www.ansi.org*. We will provide further operational guidance regarding our standards for a card (or other technology) to entities wishing to become Part D sponsors in time for these entities to use the standards (and have their cards approved for use by us) beginning January 1, 2006. We understand that Part D sponsors would like flexibility to integrate their medical and drug benefit cards and will provide Part D sponsors with that flexibility consistent with our approach under the Medicare Prescription Drug Discount Card and Transitional Assistance Program. It is our intent, however, that these standards require that Part D plans use something other than an enrollee's social security number (SSN) as an identifier on their cards given rising concern over the increasing number of cases regarding identity fraud using an individual SSNs and privacy concerns. We understand that this number is the most familiar and known to the beneficiaries but we will work to make the drug card identification number and process easy and convenient for beneficiaries.

5. Special Rules for Out-of-Network Access to Covered Part D Drugs at Pharmacies (§ 423.124)

Section 1860D–4(b)(1)(C)(iii) of the Act requires us to establish pharmacy access standards that include rules for adequate emergency access to covered Part D drugs by Part D enrollees. Given the inherent difficulties in establishing emergency access standards for covered Part D drugs, we proposed to meet the requirements of section 1860D 4(b)(1)(C)(iii) of the Act by establishing a broader out-of-network access requirement. We proposed requiring that Part D sponsors ensure that their enrollees had adequate access to drugs dispensed at out-of-network pharmacies when they could not reasonably be expected to obtain covered Part D drugs at a network pharmacy. In the proposed rule, we stated that we expected out-of-network access to be guaranteed under at least the following four scenarios:

- In cases in which a Part D enrollee meets all of the following: is traveling outside his or her Part D plan's service area; runs out of or loses his or her covered Part D drug(s) or becomes ill and needs a covered Part D drug; and cannot access a network pharmacy;
- In cases in which a Part D enrollee cannot obtain a covered Part D drug in a timely manner within his or her service area because, for example, there is no network pharmacy within a reasonable driving distance that provides 24-hour-a-day/7-day-per-week service;
- In cases in which a Part D enrollee resides in a long-term care facility and the contracted long-term care pharmacy does not participate in his or her Part D plan's pharmacy network; and
- In cases in which a Part D enrollee must fill a prescription for a covered Part D drug, and that particular covered Part D drug (for example, an orphan drug or other specialty pharmaceutical typically shipped directly from manufacturers or special vendors) is not regularly stocked at accessible network retail or mail-order pharmacies. Both the enrollee and his or her Part D plan would have been financially responsible for covered Part D drugs obtained at an out-of-network pharmacy as described. In the proposed rule, we specified that such cost-sharing would have been applied relative to the plan allowance for that covered Part D drug. We requested comments on how to further define the term ''plan allowance.''

In addition to this cost-sharing, and as provided under proposed § 423.124(b)(2), the enrollee would have been responsible for any difference in price between the out-of-network pharmacy's usual and customary (U&C) price and the plan allowance for that covered Part D drug. We requested public comments regarding our definition of usual and customary price. We also sought comments regarding our proposal that the price differential between out-of-network pharmacies' U&C costs and the plan allowance be counted as an incurred cost against the out-of-pocket threshold consistent with the definition of ''incurred cost'' in § 423.100 of the proposed rule. Finally, we requested general comments regarding our proposed payment rules for covered Part D drugs obtained at out-of-network pharmacies when enrollees cannot reasonably obtain those drugs at a network pharmacy.

Except as otherwise provided below, the final rule adopts the out-of-network access rules set forth in § 423.124 of the proposed rule.

Comment: Many commenters generally supported our proposed out-of-network pharmacy proposal and said beneficiaries—particularly those in rural areas—should not be penalized for going out-of-network when necessary. However, some commenters felt the proposal's list of situations in which access to out-of-network pharmacies would be allowed was overly broad and recommended limiting such access to emergency situations only. Some commenters expressed support for plans having the discretion to establish out-of-network access requirements, but not being given a specific list of requirements. Some expressed concern that the message to beneficiaries might be that they can go to out-of-network pharmacies at will, resulting in increased costs.

A number of commenters stated that as proposed, allowing access to out-of-network pharmacies is impractical because these pharmacies cannot determine if beneficiaries have met their deductibles, are in the coverage gap, or the amount their Part D plan would pay had they gone to a participating pharmacy. Out-of-network pharmacies do not have access to data needed to calculate payment rates other than their own usual and customary price. These commenters asked that we clarify that out-of-network pharmacies may charge beneficiaries their usual and customary price that beneficiaries must be responsible for submitting claims for out-of-network medications they purchase to their Part D plans, and that plans must accept claims submitted to them by beneficiaries once such a purchase is made. One commenter recommended Part D plans be given

time to retroactively modify claims databases to accommodate paper claims tracking, suggesting that we minimize these requirements and be specific in the timeline under which these modifications are required (for example, 60 days).

Some commenters stated that the proposal is inadequate for emergency situations and should require Part D plans to cover a temporary supply of drugs. One commenter recommended that we require Part D plans to establish a mechanism to guarantee payment for at least a 72-hour supply of any medically necessary, covered Part D drug obtained out-of-network. One commenter disagreed with the proposal entirely, stating that if the TRICARE access standards were met by a Part D plan, this should be a sufficient guarantee of adequate network access.

Response: We expect that, given our pharmacy access standards, Part D enrollees will have adequate access to network pharmacies. However, section 1860D–4(b)(1)(C)(iii) of the Act requires us to establish pharmacy access standards that include rules for adequate emergency access to covered Part D drugs by Part D enrollees. Given the inherent difficulties in establishing what constitutes an ''emergency,'' we believe it is most appropriate to establish a broader out-of-network access requirement. Section 423.124(a)(1) of our final rule clarifies that Part D plans are required to ensure that their enrollees have adequate access to drugs dispensed at out-of-network pharmacies when they cannot reasonably be expected to obtain covered Part D drugs at a network pharmacy. Provided that such access to out-of-network pharmacies is not routine, we expect that Part D plans would guarantee out-of-network access in cases in which an enrollee: (1) is traveling outside his or her plan's service area, runs out of or loses his or her covered Part D drugs or becomes ill and needs a covered Part D drug, and cannot access a network pharmacy; (2) cannot obtain a covered Part D drug in a timely manner within his or her service area because, for example, there is no network pharmacy within a reasonable driving distance that provides 24/7 service; (3) must fill a prescription for a covered Part D drug, and that particular drug (for example, an orphan drug or other specialty pharmaceutical) is not regularly stocked at accessible network retail or mail-order pharmacies;; and (4) is provided covered Part D drugs dispensed by an out-of-network institution-based pharmacy while a patient is in an emergency department, provider-based clinic, outpatient surgery, or other outpatient setting. We are not incorporating these scenarios into our final regulations but will closely monitor out-of-network access to ensure that Part D plans are adequately meeting beneficiaries' out-of-network access needs. In addition, plans must provide coverage of drugs in physician's offices in cases in which a beneficiary is administered a vaccine covered by Part D (or another covered Part D drug that is appropriately dispensed and administered in a physician's office).

We understand commenters' concerns that routine access to out-of-network pharmacies could undermine a Part D plan's ability to achieve cost-savings for both beneficiaries and the Medicare program. For this reason, we would like to clarify that § 423.124(c) of our final rules requires Part D plans to establish reasonable rules to ensure that enrollees use out-of-network pharmacies in an appropriate manner—provided they ensure adequate access to out-of-network pharmacies on a non-routine basis when enrollees cannot reasonably access network pharmacies. For example, Part D plans may wish to limit the amount of covered Part D drugs dispensed at an out-of-network pharmacy, require that a beneficiary purchase maintenance medications via mail-order for extended out-of-area travel, or require a plan notification or authorization process for individuals who fill their prescriptions at out-of-network pharmacies. Plans will be required to disseminate information to enrollees about their out-of-network access policies as provided in § 423.128(b)(6) of our final rule.

We wish to clarify that enrollees obtaining covered Part D drugs at out-of-network pharmacies, which by virtue of not being under contract with an enrollee's Part D plan will not have access to the data needed to calculate Part D plan payment rates, will have to pay the pharmacy's U&C price at the point-of-sale, submit a paper claim to their Part D plan, and wait for reimbursement from the plan. Out-of-network pharmacies will therefore be made whole, relative to their U&C price for a covered Part D drug, at the point of sale.

Comment: One commenter stated that patients in emergency departments, provider-based clinics, outpatient surgery, or under observation are often administered drugs (self-administered drugs or insulin, for example) under physician order for medically necessary conditions. These drugs are not covered under Part A or Part B and are billed to patients as a patient liability. For safety and quality of care reasons, patients often cannot bring their own medications into hospitals or outpatient settings when they are being treated for other conditions. This commenter asked for clarification regarding whether Part D plans will cover self-administered prescription drugs dispensed by hospital pharmacies; if so, how beneficiaries will avail themselves of their Part D benefits; and, if not, whether hospitals will have to provide drug coding and other detail on billing statements for beneficiaries so they can submit those statements to their Part D plans for reimbursement.

Response: As provided elsewhere in this preamble, Part D plans may include institutional pharmacies, including hospital-based pharmacies, in their networks, although these pharmacies will not count toward the access requirements Part D plans must meet under § 423.120(a)(1) of our final rule. To the extent hospital pharmacies are included in Part D plan networks, Part D enrollees who are furnished covered Part D drugs by those pharmacies, the situations noted by the commenter will not be an issue. However, we recognize that enrollees who are provided covered Part D drugs by hospital and other institution—based pharmacies under the circumstances described by this commenter cannot reasonably be expected to obtain needed covered Part D drugs at a network pharmacy. We therefore clarify that we expect that Part D plans guarantee out-of-network access to covered Part D drugs in cases in which an enrollee is provided covered Part D drugs dispensed by an out-of-network institution-based pharmacy while a patient in an emergency department, provider-based clinic, outpatient surgery, or other outpatient setting.

Comment: Two commenters recommended that Part D plan enrollees who live in different States during the year should be allowed access to out-of-network pharmacies, as with the other four instances we proposed. One commenter further argued that restricting pharmacy access to mail order during long absences from or trips out of a Part D plan's service area violates the prohibition on exclusive use of mail order pharmacies.

Response: The statutory authority for our proposed out-of-network access policy derives from the requirement, in section 1860D–4(b)(1)(C)(iii) of the Act, that our network access rules include provisions for adequate emergency access for Part D enrollees. Given that narrow statutory authority, we do not believe that access to out-of-network pharmacies on a routine basis can be justified under our out-of-network

access rules. Through our educational efforts, we will encourage enrollees who live in different States during a year (snowbirds, for example) to enroll in national or regional Part D plans that will provide coverage in multiple areas, or in Part D plans that include out-of-area pharmacies in their networks. However, to the extent that a beneficiary is enrolled in a Part D plan that does not provide such access, plans may not allow routine out-of-network access consistent with § 423.124(a)(2) of our final rule.

Comment: Two commenters emphasized the need to allow out-of-network access for specialty medications, such as orphan drugs, that are not typically stocked in a retail pharmacy. Their argument was echoed by commenters who emphasized the need to allow for out-of-network access to home infusion therapy.

Response: We expect that Part D plans will provide out-of-network access to specialty pharmacies in cases in which specialty medications, such as orphan drugs, are not available at a network pharmacy, as this is a case in which enrollees could not reasonably be expected to access their medications at a network pharmacy. However, given that out-of-network access to covered Part D drugs may not be provided routinely, consistent with § 423.124(a)(2) of our final rule, Part D cannot not provide access to out-of-network access to a specialty pharmacy on an ongoing basis. As discussed elsewhere in this preamble, our final rule requires that Part D plans provide adequate access to home infusion pharmacies. We established this access requirement to mitigate the need for routine out-of-network access to home infusion drugs. However, in cases in which an enrollee cannot reasonably access a home infusion pharmacy in his or her Part D plan's network, we expect that plans will provide access to an out-of-network home infusion pharmacy consistent with § 423.124(a) of our final rule.

Comment: Some commenters stated that the final rule should clarify that beneficiaries residing in a long-term care facility should be allowed access to long term care pharmacies as out-of-network pharmacies, should the pharmacy contracting with the long-term care facility in which they reside not participate with their chosen Part D plan. Another commenter thought that our proposed policy vis-à-vis beneficiaries residing in long-term care facilities is inappropriate given that our authority for establishing such requirements is based on emergency access only.

Response: As noted previously, we agree with the commenter who questioned our authority for allowing access to out-of-network long-term care pharmacies on a routine basis. The statutory authority for our proposed out-of-network access policy derives from the requirement, in section 1860D–4(b)(1)(C)(iii) of the Act, that our network access rules include provisions for adequate emergency access for Part D enrollees. Given that narrow statutory authority, we do not believe that access to out-of-network pharmacies on a routine basis including in cases where a beneficiary resides in a long-term care facility whose contracted long-term care pharmacy is not in his or her Part D plan's network can be justified under our out-of-network access rules.

Comment: One commenter said that physician offices should be considered out-of-network pharmacies insofar as they supply covered Part D drugs.

Response: We note that vaccines (and other covered Part D drugs that are appropriately dispensed and administered in a physician's office) administered in a physician's office will be covered under our out-of-network access rules at § 423.124(a)(2) of our final rule, since Part D plan networks are defined as pharmacy networks only. A scenario under which a Part D enrollee must obtain a Part D-covered vaccine in a physician's office constitutes a situation in which out-of-network access would be permitted because a beneficiary could not reasonably be expected to obtain that vaccine at a network pharmacy. We expect that the application of this requirement will be limited to vaccines and a handful of drugs (for example, some injectable long-acting anti-psychotics) that are appropriately dispensed and administered in a physician's office and are not covered under Part B, and that plans may establish utilization management policies and procedures to ensure that out-of-network coverage is limited to such covered Part D drugs. Enrollees will be required to self-pay the physician for the cost of the vaccine (or other covered Part D drug appropriately dispensed and administered in a physician's office) and submit a paper claim for reimbursement by their Part D plan.

Comment: Commenters generally recommended the beneficiary pay the difference between the network price applicable to that beneficiary and the maximum price charged to any Part D plan with which the pharmacy participates. However, they argue, determining that amount would be difficult because out-of-network pharmacies do not have access to the data necessary to calculate that amount. Some commenters specified that beneficiaries purchasing drugs from an out-of-network pharmacy in an emergency situation should not be charged anything more than the network amount. Several commenters urged us to exempt low-income beneficiaries from any differential costs incurred for visiting an out-of-network pharmacy. One noted that we should monitor usage of out-of-network pharmacies by low-income beneficiaries.

Response: As provided in § 423.124(b) of our final rule, if a Part D plan offers coverage other than defined standard coverage, it may require enrollees to not only be responsible for any cost-sharing, including a deductible, that would have otherwise applied had the covered Part D drug been purchased at a network pharmacy, but also any differential between the out-of-network pharmacy's (or provider's) usual and customary (U&C) price and the enrollee's cost-sharing. However, given the cost-sharing requirements for defined standard coverage in § 423.104(d)(2)(A) of our final rule, under which the cost-sharing between the deductible and initial coverage limit must be 25 percent of the actual cost of a drug at the point of sale, Part D plans offering defined standard coverage may not offer such an out-of-network differential. Instead, a Part D plan offering defined standard coverage must simply require its enrollees to pay any deductible or cost-sharing, relative to the out-of-network pharmacy's (or provider's) usual and customary price. The Part D plan will pay the difference between the out-of-network pharmacy's (or provider's) U&C price and the enrollee's cost-sharing.

In either case, enrollees will likely be required to pay more for a covered Part D drug purchased out-of-network than one purchased at a network pharmacy, though, as explained below, any such differential will count toward an enrollee's TrOOP limit. In order to curb unnecessary out-of-network use and preserve Part D plans' ability to achieve cost-savings based on network pharmacy use, we believe it is appropriate that beneficiaries pay more for out-of-network access to covered Part D drugs.

As explained below, we will pay any out-of-network differential for appropriate non-routine use of out-of-network pharmacies (or providers) for full and other subsidy-eligible individuals as part of our low-income subsidy under subpart P of the final rule.

Comment: Some commenters asked us to clarify whether subsidy eligible

individuals who reside in long-term care facilities will have to pay any out-of-network differentials when obtaining drugs from an out-of-network long-term care pharmacy. Many recommended that we pay the out-of-network differential for institutionalized enrollees who are subsidy eligible.

Response: We agree that for full and other subsidy-eligible individuals—whether they are institutionalized or not—we should pay any out-of-network differential for appropriate non-routine use of out-of-network pharmacies. As provided in § 423.104(d)(2) of our final rule, we define enrollee cost sharing in relation to the total cost of the drug to the Part D plan and the beneficiary (actual costs). Therefore, in cases where the total payment is not limited by the plan allowable because a drug is obtained out-of-network, the cost sharing can be defined as the total paid by beneficiary, or in the case of a subsidy eligible individual, as the total cost sharing paid by both the beneficiary and by us. This approach reconciles the need to charge the OON differential and to hold the subsidy eligible individual liable for only the statutorily allowed copayment amounts ($1/$3, $2/$5, or $0 in the case of institutionalized full subsidy individuals who are full-benefit dual eligible individuals).

Comment: A few commenters argued that enrollees accessing covered Part D drugs at out-of-network FQHC, rural and I/T/U pharmacies should also be exempt from any out-of-network differentials.

Response: We do not believe there exists a compelling rationale to exempt beneficiaries who access their drugs at FQHC, rural, or I/T/U pharmacies. However, to the extent such individuals qualify as full or partial subsidy eligible individuals, they will be responsible only for the cost-sharing amounts required in subpart P.

Comment: Comments on the definition of ''U&C price'' fell into three groups. Some commenters felt that the U&C price should be defined as that amount charged to cash paying customers, excluding sales tax. Others argued that the U&C price should be the amount typically charged to senior groups or other cash customers who are directly given some sort of discount as an inducement to make a purchase from a given supplier. A third group of commenters felt that the U&C price should be the maximum the pharmacy charges any customer covered by a Part D plan. Several commenters noted that we should not allow pharmacies to manipulate their U&C prices and should check them periodically to be sure they were less than or equal to the average wholesale price.

Response: We appreciate commenters' suggestions. We believe our proposed definition of the term ''usual and customary price'' the price that a pharmacy (or provider) charges a customer who does not have any form of prescription drug coverage is adequate and are retaining it in § 423.100 of our final rule. We note, in response to several commenters' suggestions, that we do not have the authority to require out-of-network pharmacies to accept a particular price (for example, the maximum price a pharmacy charges any of its customers enrolled in Part D plans) as their U&C price. We believe that Part D plans, not CMS, should be responsible for monitoring of U&C prices for covered Part D drugs at out-of-network pharmacies, since, given that any price differential paid by a beneficiary would count toward the TrOOP threshold, they ultimately have a vested interest in limiting the costs associated with out-of-network use.

Comment: With regard to the definition of ''plan allowance,'' several commenters recommended that it be defined as ''the lowest of contractual discounts offered in a standard contract or U&C price.'' One commenter recommended defining the term in CMS guidance to permit consultation with affected parties. One commenter pressed for Part D plan flexibility so that they could ensure the lowest prices for their members.

Response: We have retained our proposed definition of ''plan allowance'' in § 423.100 of our final rule in order to provide Part D plans with maximum flexibility to establish the most appropriate plan allowance for drugs obtained out-of-network.

Comment: One commenter asked for clarification of the appeals process relating to adverse coverage decisions for out-of-network drugs.

Response: As provided under § 423.566(b)(1) of our final rule, a Part D plan's failure to pay for a covered Part D drug furnished by an out-of-network pharmacy is an action that is a coverage determination.

Comment: Another commenter wanted to be sure that out-of-network pharmacies did not advertise their services as Medicare covered so that beneficiaries would not be confused.

Response: We believe that beneficiaries should always receive accurate and clear information about their pharmacy benefits, and we believe pharmacies must ensure that out-of-network beneficiaries are not misled. However, we have no authority under the MMA to regulate pharmacies' marketing activities. Marketing activities of pharmacies may implicate other Federal or State laws, however, including, but not limited to, consumer protection laws. Pharmacies may also be subject to sanction under section 1140 of the Social Security Act if they misrepresent an affiliation with, or endorsement by the Medicare program.

6. Dissemination of Plan Information (§ 423.128)

Our proposed rule established beneficiary protection requirements concerning the dissemination of Part D information by Part D sponsors to enrollees in, and individuals eligible to enroll in, a Part D plan. Part D information disseminated by Part D sponsors to current or prospective Part D enrollees will constitute marketing materials and must be approved by us.

With the exception of the drug-specific information dissemination requirements, many of the proposed requirements duplicated information dissemination requirements contained in § 422.111 of our proposed MA rule that are applicable to all MA plans, including MA-PD plans. We proposed applying the requirements of section 1860D–4(a) of the Act to other Part D plans to ensure that all Part D eligible enrollees have access to comparable drug-specific information about Part D plans.

a. Content of Plan Description

Proposed § 423.128(a) and (b) complied with the stipulation in section 1860D–4(a)(1) of the Act that requirements for the dissemination of Part D information be similar to the information dissemination requirements for MA organizations under section 1852(c)(1) of the Act and as interpreted in § 422.111(b).

In order to ensure that individuals who are either eligible for, or enrolled in, a Part D plan receive the information they need to make informed choices about their Part D coverage options, Part D sponsors would be required to disclose, to each enrollee in a Part D plan offering qualified prescription drug coverage, a detailed description of that plan. This description must be provided in a clear, accurate, and standardized form at the time of enrollment and annually, at a minimum, after enrollment. The information provided will be similar to the information MA plans must disclose to their enrollees.

Except as otherwise provided below, the final rule adopts the requirements pertaining to plan content description set forth in § 423.128(b) of the proposed rule.

Comment: One commenter sought clarification regarding what we mean by ''standardized'' in our requirement that

Part D plans provide information to enrollees in a ''clear, accurate, and standardized form.''

Response: We expect Part D plans to provide information about their benefit packages in a manner that is consistent with marketing guidelines that we will make available to plans.

Comment: Several commenters requested that we allow Part D plans the flexibility to make plan information available through the Internet. For the convenience of beneficiaries as well as to control costs, these commenters recommend that we encourage the use of more efficient information distribution channels (for example, Internet and email) to disseminate detailed Part D plan information and thus limit the distribution of paper materials to situations in which that makes sense. Another commenter recommended that we clarify that, with the express consent of the enrollee, Part D plans may waive enrollees' right to request and receive any required information in writing and allow for the enrollee to obtain that information via a plan website or email.

Response: We agree that some beneficiaries may prefer to receive Part D plan information electronically and that the provision of plan information through electronic means has the potential to significantly reduce Part D plans' costs. However, a number of Medicare beneficiaries still do not have access to the Internet or prefer to receive their information in written formats. We have modified § 423.128(a) of our final rule to note that we may specify the manner in which plan information must be disseminated to beneficiaries. We clarify that information disseminated by Part D plans as part of a plan description under § 423.128(b), as well as information disclosed upon enrollee request under § 423.128(c), must be provided in a written format and delivered to beneficiaries via U.S. mail unless a beneficiary explicitly consents—by actively opting in—to receive information electronically or via telephone rather than by mail. The electronic provision of Part D plan information should simply be one additional mechanism for Part D plans to communicate with enrollees and potential enrollees.

Comment: One commenter recommended that Part D plans provide information regarding any prior authorization processes required for certain drugs as part of their information dissemination efforts regarding formularies.

Response: We agree with this commenter and have modified that language at § 423.128(b)(4) to clarify that Part D plans must disclose information about any utilization management procedures they may use as part of the formulary information they must disseminate to beneficiaries.

Comment: One commenter recommended that Part D plans be required to provide a list of pharmacies in their networks since the proposed rule requires information only about the types of pharmacies in plans' networks.

Response: We believe the commenter misinterpreted the provision at § 423.128(b)(5) of our proposed rule. This provision, which we have retained in our final rule, requires Part D sponsors to disseminate information about ''the number, mix, and distribution (addresses) of network pharmacies.'' We believe that requiring Part D plans to disseminate information about the addresses of network pharmacy at which an enrollee may reasonably be expected to obtain covered Part D drugs is, in fact, tantamount to requiring plans to provide a list of network pharmacies serving enrollees' service areas. We therefore clarify that Part D plans will be expected to provide enrollees with a list of network pharmacies, including addresses, as well as information about the number and mix of network pharmacies available.

Comment: One commenter requested greater detail regarding the contents of the description of quality assurance policies and procedures that Part D plans must provide under § 423.128(b)(8) of our proposed rule. Another commenter states that, as written, the provision requiring Part D plans to describe their quality assurance policies and procedures did not indicate a clear CMS-directed oversight and enforcement structure. This commenter argues that compliance monitoring and enforcement would at best be indirect, leaving us reliant on the results of deemed status arrangements as set forth in our proposed § 423.165.

Response: We expect plans to provide descriptions of their policies and procedures for concurrent drug utilization review, retrospective drug utilization review, and internal medication error identification and reduction systems. We also expect plans to provide descriptions of their medication therapy management programs, including information describing which enrollees are eligible for such services. With respect to CMS-directed oversight and enforcement, we have added reporting requirements to § 423.153(c) and § 423.153(d) of our final rule, and we will specify the details of these reporting requirements in separate guidance.

Comment: One commenter was concerned that the transition of full-benefit dual eligible individuals from Medicaid to Medicare Part D on January 1, 2006 will likely lead full-benefit dual eligible individuals to contact Medicaid agencies for more information regarding their new pharmacy benefits. This commenter recommended that we require Part D plans to include information in their enrollee materials that clarifies that State Medicaid agencies are no longer the primary providers of pharmacy benefits and cannot answer questions about the Medicare benefit, except as pertains to limited supplemental coverage that Medicaid may provide.

Response: Our education and outreach efforts will ensure that beneficiaries receive detailed information regarding their transition from Medicaid to Medicare for prescription drug coverage. Therefore, we do not believe it is necessary to require Part D plans to include this information in their materials.

b. Disclosure of Information upon Request

In addition, in accordance with section 1860D–4(a)(2) of the Act, the proposed rule at § 423.128(c) provided that a beneficiary who is eligible to enroll in a Part D sponsor's Part D plan will have the right to obtain, upon request, more detailed plan information. Except as otherwise provided below, the final rule adopts the standards set forth in § 423.128(c) of the proposed rule.

Comment: A number of commenters are supportive of the provision in the proposed rule that required Part D plans to make available information about how to obtain information about the formulary, but thought that this requirement was insufficient given that beneficiaries will need precise and detailed formulary information to make informed choices about enrollment. These commenters recommend requiring Part D plan descriptions to include a detailed formulary listing not only the drugs on the formulary, but also any formulary tiers and corresponding copayment amounts.

Response: We agree that it will be critically important for Part D enrollees and prospective enrollees to have access to complete formulary information in order to make the best possible Part D plan selection for their particular medical and prescription drug needs. For this reason, we have modified the formulary information requirements under § 423.128(b)(4) such that Part D plans will be required to include not only information about the manner in which the formulary functions (including tiering structures and any

utilization management procedures used), a process for obtaining an exception to a Part D plan's tiered cost-sharing structure or formulary, and a description of how an enrollee may obtain additional information on the formulary, but also an actual list of drugs included on the Part D plan's formulary. For each drug, this list must indicate any cost-sharing tier information applicable to that drug and whether utilization management programs apply.

Comment: Several commenters urged us to expand the requirement that Part D plans disclose, upon request, information about the number of disputes and their disposition in the aggregate to include exceptions. Another commenter noted that we appeared to have made a mistake in terms of our references to the provisions on grievances and reconsiderations in § 423.128(c)(3) of our proposed rule.

Response: We agree with these commenters. We have corrected the reference errors in § 423.128(c)(3) of our final rule and have expanded this requirement such that Part D plans must disclose, upon request, information about the number of exceptions and their disposition in the aggregate. We did not originally include a reference to exceptions in our proposed because section 1852(C)(2) of the Act, on which the requirements in our proposed § 423.128 were based, did not envision an exceptions process for the MA program.

Comment: Several commenters noted that § 423.128(c)(1)(iii) of our proposed rule required Part D plans to inform enrollees about the potential for contract termination, but only upon request. However, these commenters felt strongly that this information needed to be included in all plan descriptions and marketing materials, and not just if requested by an enrollee or prospective enrollee, particularly in light of previous experience with volatility in the Medicare+Choice market.

Response: We agree with these commenters and have moved the requirement that Part D plans disclose information about the potential for contract termination upon request only, to § 423.128(b)(10), under which plans will be required to disclose this information as part of the plan description provided at the time of enrollment and at least annually thereafter.

c. Provision of Specific Information

As required under section 1860D–4(a)(3) of the Act and proposed at § 423.128(d) of our proposed rule, Part D sponsors will be required to have in place a mechanism for providing, on a timely basis, specific information to current and prospective enrollees upon request. Such mechanisms will include:

- A toll-free customer call center;
- An Internet website; and
- Responses in writing upon beneficiary request.

As proposed at § 423.128(d)(1)(i) and (d)(1)(ii), Part D plans' customer call centers will be required to be open during usual business hours and provide customer telephone service, including to pharmacists, in accordance with standard business practices. We strongly recommended, however, that Part D plans provide some sort of 24-hour-a-day/7 day-a-week access to their toll-free customer call centers in order to provide timely responses to time-sensitive questions. In addition, we proposed requiring that Part D plans maintain websites as one means of disseminating information to current and prospective Part D enrollees that would include the detailed plan description information described in § 423.128(b) of our proposed rule. Finally, Part D plans would be required to respond to beneficiary requests for specific information in writing, upon request. This requirement was codified in § 423.128(d)(3) of our proposed rule.

Except as otherwise provided below, the final rule adopts the specific information disclosure standards set forth in § 423.128(d) of the proposed rule.

Comment: Several commenters recommended against requiring a 24-hour/7-day-a-week call center because of the high costs associated with operating a call center during off-hours. These commenters support operating a call center during normal business hours as required in the proposed regulations. One commenter suggested Part D plans consider developing a website and IVR system that allows beneficiaries to access their accounts to determine their TrOOP balance.

Other commenters recommended requiring Part D plans to operate 24/7 call centers, stating that the need for prescription drugs may arise outside of normal business hours and would necessitate timely assistance and resolution of coverage issues. These commenters noted that the implications of delayed access are potentially very serious. One commenter stated that advice hotlines should be available 24-hour/7-days a week to assist enrollees and pharmacies in understanding Part D plan formularies. Another commenter urged requiring extended service hours especially during the initial enrollment period and also ensuring that language specialists are available.

Response: We have retained our proposed requirement (in § 423.128(d)(1) of our final rule) that Part D plans maintain a toll-free customer call center that is open during usual business hours and provides customer telephone service, including to pharmacists, in accordance with standard business practices. However, Part D plans should view this requirement as a floor which they can exceed—particularly at times such as annual open enrollment periods. Access to bilingual customer service representatives may also be appropriate in certain parts of the country. Given the need for Part D plans to provide timely information on certain time-sensitive issues, however, we strongly recommend that Part D plans also provide access to 24/7 clinical advice hotlines as is customary for many health plans.

Comment: One commenter recommended that we require formulary updates to plans' websites only when actual changes are made, but no more than once per month.

Response: We agree with this commenter. We recognize the need for formulary information to be kept as current as possible to allow enrollees and prospective enrollees to make the best possible decisions regarding coverage of their particular Part D drugs. However, P&T committees typically meet quarterly, and we expect that most formulary changes recommended by a P&T committee will be implemented following regular committee meetings. We have therefore changed the requirement in § 423.128(d)(2)(ii) of our proposed rule, which required weekly updates of formulary information on Part D plan websites, to require monthly updates instead. This requirement is codified at § 423.128(d)(2)(ii) of our final rule.

Comment: One commenter asked us to clarify that formulary information will be made available through means other than plan websites.

Response: As previously stated, enrollees and prospective enrollees will be able to obtain specific Part D plan information, including formulary information, upon request via telephone and in writing. In addition, we have revised our final rule at § 423.128(b)(4) to require Part D plans to provide enrollees with an actual list of drugs included on the plan's formulary.

Comment: One commenter requested clarification that our requirement that formulary information be posted on a Part D plan website be limited to including only a list of formulary drugs and not the full range of clinical information associated with those drugs.

Response: Plans will only be required to include a list of drugs included on their formularies—and not the clinical information associated with those drugs—under our information dissemination requirements.

d. Claims Information

In accordance with the requirements of section 1860D-(4)(a)(4) of the Act, § 423.128(e) of the proposed rule required Part D sponsors to furnish to enrollees who receive covered Part D drugs an explanation of benefits (EOB). EOBs will be required to be written in a form easily understandable to beneficiaries. In § 423.128(e)(6) of our proposed rule, we proposed that an EOB be provided at least monthly for those utilizing their prescription drug benefits in a given month.

We also proposed in § 423.128(e)(1)-(5) that Part D plans' EOBs include:

- A listing of the item or service for which payment was made, as well as the amount of such payment for each item or service;
- A notice of the individual's right to request an itemized statement;
- Information regarding the cumulative, year-to-date amount of benefits provided relative to the deductible, the initial coverage limit, and the annual out-of-pocket threshold for that year;
- A beneficiary's cumulative, year-to-date total of incurred costs (to the extent practicable); and
- Information about any applicable formulary changes.

Except as otherwise provided below, the final rule adopts the EOB standards set forth in § 423.128(e) of the proposed rule.

Comment: Some commenters supported the requirement to mail enrollees an EOB each month that the drug benefits are provided, as stated in the proposed regulations. Some commenters recommended dissemination of the EOBs quarterly and upon request of the enrollees rather than monthly when prescription drug benefits are provided.

Several commenters urged us to allow Part D plans the flexibility to provide an EOB to enrollees through means other than mail, such via a plan website, electronically through email, or by telephone inquiry. One commenter noted that it is not current practice for health plans to mail enrollees an EOB monthly and that this would raise administrative costs. Some commenters expressed their objection to providing an EOB at pharmacies, stating this would be far beyond pharmacies' technological capabilities, and that provision of the EOB via mail or electronically should be plans' responsibility.

Some commenters expressed that the EOBs should also include information about appeals right and processes, information about formulary information and plan terminations, and information regarding whether the deductible and out-of-pocket thresholds have been met. Another commenter stated that the EOB should be modified to be applicable to beneficiaries who are subsidy eligible individuals due to the differences in the deductibles and cumulative spending limits for these individuals.

Response: We appreciate commenters' feedback regarding our proposed EOB requirements. As provided in § 423.128(e)(6) of our final rule, we are retaining our proposed requirement that an EOB be provided at least monthly for those enrollees utilizing their prescription drug benefits in a given month. This requirement is consistent with our policy regarding the Medicare Summary Notice, which is provided monthly for beneficiaries with Part A or Part B utilization.

We believe it is most appropriate for enrollees to receive a written EOB, via U.S. mail, and have provided for this under § 423.128(e) of our final rule. Plans may offer additional mechanisms for the provision of such information—for example, via a website or call center. Plans may provide the EOB through alternative means electronically via email, for example only to the extent that enrollees affirmatively elect to receive their EOBs in such a manner. In the preamble, we suggested that Part D plans might explore provision of EOBs at the point-of-sale, but that statement was in no way intended to impose a requirement on pharmacies to provide Part D plan information in the absence of the technological capacity to do so.

We do not believe that the EOB is the most appropriate mechanism for provision of information about appeals rights and processes or information about plan terminations; this information will be provided through other mechanisms. We clarify, however, that EOBs will be required to include information regarding the cumulative, year-to-date amount of benefits provided relative to the deductible, the initial coverage limit, and the annual out-of-pocket threshold for that year, as well as information about any upcoming formulary changes. For low-income beneficiaries, the information about the cumulative, year-to-date total of incurred costs provided by the Part D plan in the EOB will include CMS subsidy amounts that count toward incurred costs.

7. Public Disclosure of Pharmaceutical Prices for Equivalent Drugs (§ 423.132)

Under section 1860D–4(k)(1) of the Act, Part D sponsors will be required to ensure that pharmacies inform enrollees of any differential between the price of a covered Part D drug to an enrollee and the price of the lowest priced generic version of that drug and available under the Part D plan at that pharmacy. As stipulated in our proposed rule, this information will have to be provided at the time the plan enrollee purchases the drug, or in the case of drugs purchased by mail order, at the time of delivery of that drug. Disclosure of this information will not be necessary, however, if the particular covered Part D drug purchased by an enrollee was the lowest-priced generic version of that drug available at a particular pharmacy.

As provided under section 1860D–4(k)(2)(B) of the Act, we are permitted to waive the requirement that information on differential prices between a covered Part D drug and generic equivalent covered Part D drugs be made available to Part D plan enrollees at the point of sale (or at the time of delivery of a drug purchased through a mail-order pharmacy). Accordingly, we proposed waiving the requirement that information on lowest-priced generic drug equivalents be provided to enrollees for covered Part D drugs purchased by Part D plan enrollees when those covered Part D drugs are purchased at:

- Any pharmacy, when the individual is enrolled in an MA private fee-for-service plan that offers qualified prescription drug coverage and provides plan enrollees with access to covered Part D drugs dispensed at all pharmacies, without regard to whether they are contracted network pharmacies, and does not charge additional cost-sharing for access to covered Part D drugs dispensed at all pharmacies;
- Out-of-network pharmacies;
- I/T/U network pharmacies; and
- Network pharmacies located in any of the U.S. territories (American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the Virgin Islands). We requested comments on the appropriateness of the circumstances we proposed for waiver of the requirements in § 423.132(c) of our proposed rule, as well as any additional circumstances we may wish to consider.

We also proposed waiving the requirement that information on differential prices between a covered Part D drug and generic equivalent covered Part D drugs be made available to Part D plan enrollees at the point of

sale when Part D plan enrollees obtain covered Part D drugs in long-term care pharmacies. We requested comments regarding appropriate standards with regard to the timing of disclosure of generic price differentials to institutionalized Part D enrollees.

Except as otherwise provided below, the final rule adopts the standards for public disclosure of pharmaceutical prices for equivalent drugs set forth in § 423.132 of the proposed rule.

Comment: One commenter was concerned about the administrative burden the disclosure requirement would impose at the community pharmacy level and believed it was essential for us to develop appropriate guidance to minimize potential problems. The commenter noted that the administrative burden required to calculate cost-sharing differences should cause us to consider compliance with the requirements to be impracticable in all pharmacy settings because while many community pharmacies' prescription processing systems currently compare retail prices for brand-name and generic medications, the systems are not equipped to compare the discount price calculated by a Part D plan with the potential discount price by a plan for a generic drug. According to this commenter, obtaining this discounted generic price would require the pharmacy to process and submit a second prescription transaction for the generic, and then require the pharmacy to calculate the difference between the two prescriptions; the need to compare the enrollee's cost-sharing under the two scenarios would add more challenges. Other commenters assured us that this requirement is not burdensome for retail pharmacies.

Response: As provided in section 1860D–4(k) of the Act, Part D plans must provide that each pharmacy in their networks with the exceptions that we note in § 423.132(c) of our final rule complies with the requirement to disclose to beneficiaries information about less expensive therapeutically equivalent and bioequivalent covered Part D drugs. Given this statutory requirement, we cannot waive it wholesale for all community pharmacies. We do not expect this requirement will be burdensome for community pharmacists since, given that, under § 423.132(b) of our final rule, we are requiring disclosure of generic differential information after a claim has been adjudicated and for informational purposes only. We clarify that we do not expect pharmacies to become involved in substituting a generic equivalent in order for Part D plans to comply with the disclosure requirement in § 423.132(a) of our final rule. We expect that Part D plans will work with their network pharmacies to operationalize this requirement, but we do not expect that it will be burdensome to the pharmacy industry given the prevalence of generic substitution and information programs established by private plans in the market today.

Comment: One commenter asked that we define ''lowest price'' as determined by the Part D plan at the point of sale. Another commenter asked that we clarify that ''price'' is defined as what the enrollee would pay at the pharmacy subject to the applicable cost sharing. Two commenters recommended that pricing comparison should be between the brand name drug and the Maximum Allowable Cost (MAC) established by the Part D plan for the generic equivalent to the branded drug. Another commenter suggested allowing an estimated price differential between brand and non-MAC generics to be made available to enrollees rather than the exact cost differential between the price of a covered Part D drug and the lowest priced generic version because of the technical limitations of plans (for example, plans do not have a record of generics in stock at all network pharmacies). This commenter claims that, otherwise, this requirement would involve enormous administrative efforts and costs for Part D plans. This commenter suggested a reasonable alternative would be allowing plans to utilize historical dispensing patterns and costs to have available relative price information in the form of an estimate of the price differential transmitted to pharmacies in the electronic claim response when a prescription is filled, and that Part D plans would contractually require pharmacies to share this information at the point-of-sale.

Response: Under section 1860D–4(k) of the Act, Part D plans must provide that each pharmacy in their networks complies with the requirement to disclose to beneficiaries information about less expensive therapeutically equivalent and bioequivalent covered Part D drugs. Specifically, Part D plans must provide information about the differential between the price of the covered Part D drug to the enrollee (factoring in any applicable cost-sharing) and the price of the lowest-priced therapeutically equivalent and bioequivalent drug available at that pharmacy. We expect that Part D plans will work with their network pharmacies to operationalize this requirement in the most efficient way possible, and in a manner that complies with our requirements under § 423.132 of our final rule.

Comment: One commenter recommended that disclosure of the generic drug price be the lowest priced generic available at that pharmacy because most pharmacies do not carry multiple generic drug options for the same generic entity.

Response: We agree with the commenter and clarify that § 423.132(a) requires pharmacies to disclose the differential between the price of a covered Part D drug and the price of the lowest-priced generic version of that drug available at that pharmacy, consistent with section 1860D–4(k)(1) of the Act.

Comment: One commenter recommended only requiring pharmacists to inform patients of price differentials if they are dispensing a high cost version of a ''multiple source'' drug that is available at that pharmacy. This commenter noted that in many cases these off-patent innovator brands, also known as ''multiple source'' drugs, are less costly than their generic counterparts (for example, some brand name version antibiotics are often equal or lower in price than their generic counterparts). Without this technical correction, these drugs may not be considered by some Part D plans as generics and the pharmacists would not inform the beneficiary that these lower cost ''multiple source'' drugs are available. Another commenter stated that generics should be further defined to include ''multiple source'' brand name drugs.

Response: Section 1860D–4(k) of the Act requires that each pharmacy that ''dispenses a covered Part D drug shall inform an enrollee of any differential between the price of the drug to the enrollee and the price of the lowest priced generic covered part D drug under the plan that is therapeutically equivalent and bioequivalent and available at such pharmacy.'' While we appreciate the commenter's point that off-patent innovator drugs may also be available to enrollees at low prices, and that this information should be disclosed at the point of sale, the statute very specifically applies the requirement to the lowest priced generic covered Part D drug available at that pharmacy. Our definition of ''generic drug'' at § 423.4 of the final rule does not encompass an off-patent innovator drug, however. In addition, given that section 1860D–2(b)(4)(A)(i)(I) of the Act specifically distinguishes between a ''generic drug'' and a ''preferred drug that is a multiple source drug,'' we do not believe it is appropriate to define a generic drug to include a ''multiple

source'' brand-name version of a drug. However, nothing in the statute would prohibit Part D plans from requiring their network pharmacies to provide pricing information about lower priced off-patent innovator drugs, and we encourage Part D plans to do so in the interest of ensuring Part D enrollees get the best prices available for their covered Part D drugs.

Comment: One commenter concerned with the burden on pharmacies to disclose pricing information stated that the disclosure requirement should be limited to cases in which an enrollee asks for this information at the pharmacy.

Response: As provided in section 1860D–4(k) of the Act, Part D plans must require network pharmacies, except for those which we have specifically exempted from the requirement, to disclose information about price differentials. We cannot limit this requirement to circumstances in which an enrollee specifically asks for the information. Furthermore, we believe such disclosure will provide enrollees—many of whom may not know that less expensive generic equivalents are available—with valuable information that will save money for beneficiaries, Part D plans, and Medicare.

Comment: One commenter recommended disclosure only when a brand name drug is prescribed and the prescriber has not stated ''Do Not Substitute.''

Response: As provided in section 1860D–4(k) of the Act, Part D plans must require network pharmacies, except for those which we have specifically exempted from the requirement, to disclose information about price differentials. We cannot limit this requirement to circumstances in which a prescriber has written a prescription for a brand name drug and has not specifically stated that the pharmacy must not substitute the brand name drug for a generic drug. We believe such disclosure will provide enrollees many of whom may not know that less expensive generic equivalents are available with valuable information that will save money for beneficiaries, Part D plans, and Medicare.

Comment: Two commenters suggested that we clarify that the lowest price generic version that is ''therapeutically equivalent and bioequivalent'' is an AB-rated generic equivalent, as AB rated drugs have been proved to be bioequivalent (rather than presumed to be bioequivalent). Another commenter suggested that we limit disclosure requirements to products with ''A'' code, as specified in the FDA Orange Book.

Response: We agree with these commenters and clarify that the disclosure requirement in § 423.132(a) of our final rule applies only with respect to AB-rated alternatives that are therapeutically equivalent and bioequivalent to the covered Part D drug in question.

Comment: A number of commenters recommended requiring mail-order pharmacies to provide price differentials before the prescription is filled and delivered rather than at the time of delivery. The commenters noted that notification by the time of delivery may be too late for beneficiaries to receive possible savings, especially since mail-order pharmacies provide a 90-day supply and generally have lower dispensing rates than retail pharmacies.

Response: We do not believe it is practicable to require a mail-order pharmacy to contact an enrollee with price differential information prior to filling and delivering their prescription. We believe such a requirement will delay the delivery of needed drugs and could potentially compromise beneficiaries' privacy given attempts by mail-order pharmacies to contact plan enrollees. In addition, such a requirement would be inconsistent with the requirement for retail pharmacies in § 423.132(b) of our final rule, which does not require that Part D plans provide price differential information before the drug is purchased. We have therefore retained our requirement, in § 423.132(b) of our final rule, that disclosure must occur at the time of delivery of the drug when a drug is dispensed by a mail-order pharmacy.

Comment: One commenter recommended that we not waive the public disclosure requirement for private fee-for-service plans offering qualified prescription drug coverage because there are many opportunities for generic savings that might not be realized in the absence of this requirement.

Response: Section 1860D–12(d)(2) of the Act specifically requires us to waive the public disclosure requirement for private fee-for-service MA plans that offer qualified prescription drug coverage and provide plan enrollees with access without charging additional cost-sharing for covered Part D drugs dispensed at all pharmacies.

Commenter: One commenter strongly urged that we waive the public disclosure requirement for I/T/U pharmacies because these pharmacies bear beneficiaries' out-of-pocket costs for covered Part D drugs, obviating the need for AI/AN Part D enrollees obtaining covered Part D drugs at these pharmacies to have this price comparison information.

Response: As provided both in our proposed rule and in our final rule at § 423.132(c)(3), we will waive the public disclosure requirement for I/T/U pharmacies.

Comment: One commenter requested that MA-PD plans be allowed to request a waiver of the public disclosure requirement.

Response: As provided in § 423.132(c)(5), we will consider waiving the public disclosure requirement under circumstances other than those specified in § 423.132(c)(1)-(4) to the extent that we deem such compliance to be impossible or impracticable. MA-PD plans seeking a waiver of the public disclosure requirement for any of their network pharmacies will therefore have to demonstrate to us that compliance with the public disclosure requirement in § 423.132(a) is impossible or impracticable. In addition we note that, as provided in section 1860D–21(c), we will waive any Part D requirement for an MA-PD plan that conflicts with or duplicates a requirement under Part C, or the waiver of which is necessary to promote coordination between benefits provided under Parts C and D.

Comment: Another commenter suggested that we specifically waive the disclosure requirement for MA-PD plans that own and operate their own pharmacies because these pharmacies may carry only one version of any particular generic drug at any one time (except when transitioning from one manufacturer's product to another).

Response: We do not believe the commenter has provided us with sufficient information to determine that the public disclosure requirement is impossible or impracticable for Part D plans that own and operate their own pharmacies and should therefore be waived in regulation. However, we note that MA-PD plans may also wish to consider seeking a waiver of the public disclosure requirement if, as provided in section 1860D–21(c) of the Act, they can demonstrate that this requirement conflicts with or duplicates a requirement under Part C, or that such waiver is necessary to promote coordination between benefits provided under Parts C and D.

Comment: Several commenters supported the applicability of disclosure requirements to long-term care pharmacies because many long-term care facility residents and their families would be interested to know if additional savings are possible. Two commenters opposed requiring price

disclosure at long-term care pharmacies because most long-term care beneficiaries do not have a choice regarding long-term care pharmacies and will likely qualify for low-income subsidies for institutionalized Part D enrollees who are full-benefit dual eligible individuals (which means they will have no out-of-pocket costs for covered Part D drugs). Thus, this information will have little effect on the drugs used by this population and will increase administrative burden for long-term care pharmacies.

Response: We agree with commenters who thought long-term care residents and their families would be interested to know if additional covered Part D drug savings are possible through the use of generic drugs, particularly since not all long-term care patients will qualify as full subsidy eligible individuals. We are therefore retaining the requirement we proposed at § 423.132(d)(1) of our proposed rule, but clarify—in § 423.132(d)(1) of our final rule—that long-term care pharmacies will have to provide information about differential price information required under § 423.132(a) of our final rule to Part D plans, which will, in turn, provide that information to their institutionalized enrollees via the explanation of benefits required under § 423.128(e) of our final rule.

8. Privacy, Confidentiality, and Accuracy of Enrollee Records (§ 423.136)

To the extent that the prescription drug plan offered by a PDP sponsor maintains medical records or other health information regarding Part D enrollees, § 423.136 of our proposed rule required the PDP sponsor to meet the same requirements regarding confidentiality and accuracy of enrollee records as MA organizations offering MA plans must currently meet under 42 CFR 422.118, according to the stipulations of section 1860D 4(i) of the Act. We clarify that the requirements of § 423.136 do not apply to PACE organizations and cost plans offering qualified prescription drug coverage, since these plans are subject to similar requirements under § 460.200(e) and § 460.210, and § 417.486, respectively.

PDP sponsors will be required to—

- Abide by all Federal and State laws regarding confidentiality and disclosure of medical records or other health and enrollment information, including the Health Insurance Portability and Accountability Act (HIPAA) of 1996 and the privacy rule promulgated under HIPAA;
- Ensure that medical information is released only in accordance with applicable Federal or State law;
- Maintain the records and information in an accurate and timely manner; and
- Ensure timely access by enrollees to records and information pertaining to them.

Prescription drug plans will be covered entities under the HIPAA Privacy Rule because they meet the definition of ''health plan,'' as defined in 45 CFR 160.103. The HHS Office for Civil Rights (OCR) is responsible for implementing and enforcing the HIPAA Privacy Rule. OCR has authority to investigate complaints, to conduct compliance reviews, and to impose civil money penalties for HIPAA Privacy Rule violations. Thus, any violations by PDP sponsor for its obligations under the Privacy Rule as a covered entity are subject to such enforcement by OCR. OCR maintains a website with frequently asked questions and other compliance guidance at *http://hhs.gov/ocr/hipaa*.

Comment: One commenter thought that we should detail the confidentiality and disclosure requirements set forth in § 423.136 of our proposed rule in the final rule, instead of simply referencing the requirements in § 422.118. This commenter believes that because of the importance of privacy protections, it is necessary that required protections are reiterated in our final rule and that PDP sponsors adequately understand their responsibilities to safeguard the health information of Medicare beneficiaries. Without privacy safeguards built directly in the regulation, beneficiaries could be vulnerable to another amendment.

Response: We agree with this commenter and have incorporated the provisions of § 422.118 directly into § 423.136 of our final rule rather than only referencing the provisions of § 422.118.

Comment: One commenter recommends that we make privacy provisions stronger for PDP sponsors, not only reiterating the protections under § 422.118, but also including specific rules regarding uses and disclosures of beneficiary information that both incorporate the provisions of important laws (such as the notice and authorization provisions of the HIPAA privacy rule) and strengthen the provisions of those laws to better protect the health information of Medicare beneficiaries.

Response: The requirements in § 423.136 of our final rule make clear that PDP sponsors must abide by all Federal and State laws regarding confidentiality and disclosure of medical records, or other health and enrollment information. This obligation includes compliance with the provisions of the HIPAA privacy rule and its specific rules regarding uses and disclosures of beneficiary information. Because section 1860d–4(i) of the Act stipulates that the privacy provisions under section 1852(h) apply to prescription drug plans in the ''same'' manner as they apply to MA plans under Medicare Part C, we do not have the statutory authority to expand upon those provisions as the commenter suggests.

Comment: One commenter recommends that we permit MA organizations and PDP sponsors to prevent pharmacies in their networks and out-of-network pharmacies from releasing prescriber data to third parties. Some MA organizations are concerned that providing data to drug manufacturers will have the negative effect of assisting manufacturers in targeting their marketing of unnecessary, expensive drugs in a more effective manner.

Response: Pharmacies that engage in electronic transactions are covered entities under HIPAA and are thus required to comply with the HIPAA Privacy Rule. As provided in 45 CFR 164.508, such pharmacies, as covered entities, would be prohibited from releasing individually identifiable health information to drug manufacturers for the purpose of the manufacturers' marketing unless a patient specifically authorizes the disclosure of his or her information for this purpose. However, the Privacy Rule protects patient information only, and is therefore not implicated regarding the sharing of information about prescribers.

D. Cost Control and Quality Improvement Requirements for Part D Plans

1. Overview (Scope) (§ 423.150)

Subpart D of part 423 implements provisions included in sections 1860D 4(c), 1860D–4(d), 1860D–4(e), 1860D–4(j), and 1860D–21(d)(3) of the Act and sections 102(b) and 109 of Title I of the MMA. This subpart sets forth the requirements related to the following:

- Drug utilization management programs, Quality assurance measures and systems, and Medication Therapy Management programs (MTMP) for Part D sponsors;
- Consumer satisfaction surveys of Part D plans;
- Electronic prescription program;

- Quality Improvement Organization (QIO) activities;
- Compliance deemed on the basis of accreditation;
- Accreditation organizations;
- Procedures for the approval of accreditation as a basis for deeming compliance.

Below we summarize the proposed provisions and respond to comments. (For a detailed discussion of our proposals, please refer to the proposed rule (69 FR 46666)).

2. Drug Utilization Management, Quality Assurance, and Medication Therapy Management Programs (MTMPs) (§ 423.153)

Proposed § 423.153(a) required each Part D sponsor to establish a drug utilization management program, quality assurance measures and systems, and a MTMP.

We combined these requirements into one section of the regulation because each of these requirements will impact the quality and cost of care provided to beneficiaries. We stated that our intent was to ensure that the prescription drug benefit was provided using state of the art cost management and quality assurance systems. We stated that we also understood the overlapping nature of these requirements and that provisions under one requirement might complement another requirement.

We also explained in the proposed rule that although these requirements were similar in their underlying goals, they could also be quite different, and that while we understood that some members of the industry use various quality assurance measures and systems for controlling utilization and reducing medication errors, less information was available regarding MTMPs.

After receiving many comments on our proposals, our final policy, generally stated, is that cost control and quality improvement requirements describe minimum standards for drug utilization management, quality assurance, and MTMP so as to provide plans with flexibility to develop, implement, and update their programs and systems to reflect changing best practices and to continue to provide beneficiaries with the best quality prescription drug benefit at the lowest possible cost. We expect plans to continuously monitor their programs and processes, identify opportunities for improvement, and develop improvement plans and strategies.

As we stated in the proposed rule, we believe that the different program and system requirements in this subpart frequently overlap and therefore, plans need flexibility to coordinate among the different requirements. Moreover, flexibility is required to ensure that plans can support forthcoming electronic prescribing standards that we envision will dramatically affect the utilization management and quality assurance landscape. Nevertheless, despite the lack of specificity in our requirements, we expect plans to continually pursue innovative improvements for their programs and systems, and maximize technological advances when appropriate.

Ultimately, the evaluation of these programs and systems needs to be based upon their impact on therapeutic outcomes. As part of our commitment to improving therapeutic outcomes through the Medicare Prescription Drug Benefit, we intend to work with industry and other stakeholders to develop a comprehensive strategy for evaluating plan performance that collectively considers multiple standards and services affecting the cost and quality of drug therapy. As industry practices evolve, including the expected expansion of electronic prescribing, we believe meaningful performance measures can be identified that will validate best practices and provide benchmarks that will spur further program and system improvements. Accordingly, we will work with industry to identify new standards for quality and performance that could eventually become plan requirements. Our goal is to ensure that the Medicare Prescription Drug Benefit will always provide beneficiaries with the highest quality prescription drug benefits at the lowest possible cost.

In addition to our efforts to work with industry and stakeholders to develop future performance measures and standards for Part D plans, we also intend to implement a plan for utilizing Medicare prescription drug data to improve the evidence on risks, benefits, and overall costs of drug therapies for the chronically ill and other Medicare beneficiaries. This plan will be developed through a public process and implemented in a manner that preserves the confidentiality of beneficiary information.

a. Drug Utilization Management

Proposed § 423.153(b) provided flexibility to Part D sponsors in their design of drug utilization management, and included minimum requirements for drug utilization management programs. These requirements were: (1) that plans maintain a program that includes incentives to reduce costs where medically appropriate; and (2) that plans maintain policies and systems to assist in preventing over-utilization and under-utilization of prescribed medications. The proposed rule also stated that Part D sponsors must inform enrollees of program requirements, such as those involving allowable refill timeframes, in order to prevent unintended interruption in drug therapy.

In addition, the proposed rule contained a discussion about whether drug utilization management techniques should be under the direction and oversight of a P&T Committee to ensure an appropriate balance between clinical efficacy and cost effectiveness. The discussion on P&T Committees and their oversight of drug utilization management is contained in subpart C of this final rule.

We invited comments on whether there are industry standards for drug utilization management and whether we should adopt any of these standards.

Comment: We received numerous comments on our proposed standards, with several commenters supporting the flexibility we proposed and stating that there are no current, widely-accepted standards in the area of drug utilization management. Others supported additional detail in the regulations and suggested that we should further specify drug utilization management program standards. Some expressed concern that plans could use drug utilization management programs to restrict utilization inappropriately. In addition, several commenters recommended that we require plans to focus equally on over-utilization and under-utilization to ensure appropriate utilization by enrollees and to monitor plan performance in these areas.

Response: Based on a literature review by Booz-Allen-Hamilton[3], and the public comments received on this topic, we are not adopting further specifications for drug utilization management requirements in the final rule. While drug utilization management is common practice, plans appropriately employ a number of different approaches (for example, formularies, step therapy, tiered cost sharing, prior authorization) and different combinations of those approaches, and therefore, while we will consider additional standards in the future, we are adopting the flexibility we proposed in the proposed rule. As we stated in the proposed rule, we believe the competitive bidding and premium setting processes, combined with the requirements for transparency and information availability, will provide powerful incentives for plans to

[3] Booz-Allen-Hamilton. Final Report for Technical Support for the Implementation of Part D. September 15, 2004.

innovate and adopt the best techniques available.

Nevertheless, our requirement for inclusion of incentives to reduce costs when medically appropriate must be interpreted broadly to mean that all drug utilization management techniques must be medically appropriate, and § 423.153(b) requires the utilization management program established by plans to be ''reasonable and appropriate.'' As outlined in the formulary guidance that will follow this final rule, we will review plans' drug utilization management requirements to ensure that beneficiaries are given appropriate access to medically necessary drugs in a timely manner. In order to ensure that plans appropriately employ drug utilization management techniques, and to develop or adopt further drug utilization management performance measures, we agree with commenters who recommended we track plan performance in this area. Therefore, we are adding a reporting requirement at § 423.153(b)(3) and we will specify the information that we will require in separate guidance.

Comment: One commenter stated that there are no standard measures for drug utilization management and recommended that we investigate using HEDIS (Health plan Employer Data and Information Set) measures as well as a number of other specific measures. Another commenter suggested that we use total health care costs as a measure.

Response: As discussed in the previous response, we intend to develop or adopt further drug utilization management performance measures in the future. While we agree that no universally accepted performance measures currently exist, and are therefore not prepared to specify further requirements in regulation, we also understand that there are some performance measures being utilized today and that these could provide valuable information. We intend to evaluate existing measures, such as HEDIS, and could include these or similar performance measures in our formulary guidance or drug utilization management reporting guidelines that will follow publication of this rule. In general, we expect drug utilization management programs to ensure that beneficiaries have appropriate access to medically necessary drugs in a timely manner.

b. Quality Assurance

As with the proposed regulations for drug utilization management programs, the proposed rule for quality assurance measures and systems provided minimum standards for quality assurance measures and systems, while for the most part giving plans flexibility to design such measures and systems. Proposed § 423.153(c) required Part D sponsors to include quality assurance measures and systems for: (1) reducing medication errors; (2) reducing adverse drug interactions; and, (3) improving medication use. It also proposed to require plans to establish requirements for: (1) drug utilization review (DUR); (2) patient counseling; and, (3) patient information record-keeping.

In the proposed rule, we stated that the DUR, patient counseling and patient information record-keeping requirements would generally need to comply with section 4401 of the Omnibus Reconciliation Act of 1990 as codified in § 456.705 and section 1927(g)(2)(A) of the Act, and we stated that we were considering such specific requirements for the final rule. Although those regulations were written specifically for the Medicaid population, we stated that we understood that they describe currently accepted standards for contemporary pharmacy practice, and our intent was to require plans to continue to comply with contemporary standards. We solicited comment on whether the Medicaid standards were in fact industry standards, whether they are appropriate standards for part D, and if they are, how they should be adapted for use in Part D. We also stated our understanding that some members of industry use additional quality assurance measures and systems. We invited comments on whether there were additional industry standards that we might adopt. Furthermore, we proposed that Part D sponsors will be required to have systems and measures established to ensure that network pharmacy providers are complying with the plans' quality assurance requirements. We requested comments on the costs and challenges associated with these systems and measures.

Comment: Most commenters agreed that the relevant parts of OBRA 90 for DUR, patient counseling and patient information record-keeping describe widely accepted standards for pharmacy practice. While no other suggestions for widely accepted standards of pharmacy practice were offered, one commenter indicated that these requirements will not adequately cover appropriate standards for home infusion pharmacies, which the commenter recommended should also require patient interviews and clinical assessments. Alternatively, several commenters recommended that we defer to State laws and State board of pharmacy regulations regarding pharmacy practice standards instead of creating a redundant Federal standard for pharmacy practice.

Response: The overwhelming majority of comments confirmed our understanding that the relevant parts of OBRA90 for DUR, patient counseling, and patient information record-keeping generally describe widely accepted standards of pharmacy practice for both Medicaid and Non-Medicaid patients. We find that almost all of the State boards of pharmacy have adopted regulations for pharmacy practice that, at a minimum, generally reflect these relevant parts of the OBRA 90 requirements. However, upon reconsideration, since our intent was to ensure that plans provided access to network providers that are required to comply with contemporary pharmacy practice standards, and not to create a new Federal standard for pharmacy practice, we agree with commenters that recommended that we defer to existing authority for regulating pharmacy practice. In fact, this is consistent with the Department of Health and Human Service's (HHS) general position of deferring to States for regulating the practice of pharmacy. Therefore, our requirement at § 423.153(c)(1) in the final rule states that plans must provide us with representation that their network providers are required to comply with minimum standards for pharmacy practice established by the States.

While we understand that additional quality standards might apply to specific pharmacy practice-settings such as home infusion pharmacy, specialty pharmacy and long-term care pharmacy practice, we are not prepared to adopt additional, practice-setting specific Federal standards at this time. We believe that current pharmacy practice standards established by the States, whether or not a State has additional standards for specific pharmacy practice-settings, still provide applicable minimum standards for all pharmacy practice-settings. Nevertheless, we encourage plans and their network pharmacy providers to establish and agree upon additional quality assurance standards as necessary, including those required for accreditation by recognized accrediting organizations.

Comment: Several commenters stated that concurrent and retrospective drug utilization review (DUR) systems illustrate successful examples of industry practices that help prevent inappropriate drug therapy. Concurrent DUR systems are used to identify potential inappropriate drug therapy before a patient receives a prescription while retrospective DUR systems can

often identify patterns of potential inappropriate prescribing and drug utilization based upon drug claim history.

Response: Based upon these comments as well as similar information provided in the Booz-Allen-Hamilton report, we agree that concurrent and retrospective DUR must be components of the quality assurance systems and measures to be implemented by Part D plans. Accordingly, we have specified requirements for concurrent and retrospective DUR systems, policies, and procedures at § 423.153(c)(2) and § 423.153(c)(3), respectively.

In the proposed rule, we stated that elements we viewed as desirable for quality assurance systems were: (1) electronic prescribing; (2) clinical decision support systems; (3) educational interventions; (4) bar codes; (5) adverse event reporting systems; and, (6) provider and patient education.

While we did not expect Part D plans to adopt all of these elements, we stated that we expected substantial innovation and rapid development of improved quality assurance systems in the new competitive and transparent market being created by the new Part D benefit.

We invited comments on which, if any, elements of a quality assurance system should be contained in our program requirements. We were particularly interested in best practices in quality assurance, costs and benefits associated with each element, the challenges involved in implementing quality assurance measures and systems, types of data useful for reducing medication errors, associated costs and challenges with collecting this data, and how these data could best be communicated to providers and beneficiaries to improve medication use.

We noted that the MMA does not define or explain the term ''medication error.'' Nevertheless, we stated that we believe a common definition was important. Therefore, we cited the following definition as one that we might use initially in interpretive guidance, which was previously adopted by the FDA in its proposed rule requiring bar codes on human drug products:

''Any preventable event that may cause or lead to inappropriate medication use or patient harm while the medication is in the control of the healthcare professional, patient, or consumer. Such events may be related to professional practice; healthcare products, procedures, and systems, including prescribing; order communication; product labeling, packaging, and nomenclature; compounding; dispensing; distribution; administration; education; monitoring; and use.'' (See 68 FR 12500 (March 14, 2003)).

We indicated that in the future we may require quality measures that include error reports and stated that we could use this information to evaluate plans. In addition, we indicated that we may publish this information for enrollees to use when comparing and choosing their individual plans. Therefore, we invited specific comments on how we could evaluate Part D plans based on the types of quality assurance measures and systems they have in place, on this proposed definition of ''medication error'', on how error rates can be used to compare and evaluate plans, and on how such information could best be provided to beneficiaries to assist them in making their choices among plans.

Comment: A number of commenters recommended we include all elements discussed in the proposed rule including decision support, electronic prescribing, bar codes, adverse event reports, and provider and patient education. Most of them recommended that we require adverse event and medication error tracking systems. However, many commenters recommended that these tracking systems be used internally and that reports not be sent to CMS or made public. These commenters argued that there is too much inconsistency in the definitions used in the field and that an external reporting requirement would actually be counter productive for quality improvement. While several commenters generally thought our proposed definition for ''medication error'' was accurate, these same commenters stated that such a definition would need to be narrowed to prove useful for consistent reporting among the plans.

Response: As to all the elements that we listed in the preamble, we agree with the many industry organizations that there are no well accepted industry standards to make these mandatory requirements. The Booz-Allen-Hamilton report[4] supports this finding. We continue to believe that these are desirable goals and have found that many organizations are already using them. We expect that electronic prescribing will greatly increase the availability of clinical decision support. We intend to work with various stakeholders to further develop these and other quality assurance systems enhancements.

We agree with commenters that there are inconsistencies associated with the reporting of adverse events and medication errors. Moreover, we are not convinced, based upon many of the comments received, that an external reporting requirement for medication errors, even if we provided a more specific and narrow definition of ''medication error'', will lead to improved quality of care. Therefore, instead of requiring plans to report medication errors to us, we require plans to implement internal medication error identification and reduction systems, and we have added this requirement at § 423.153(c)(4). We are also requiring plans to provide us with information concerning their quality assurance measures and systems, in accordance with guidelines published by us. In addition, we encourage plans to utilize the FDA Medwatch form for reporting adverse events, as well as educating prescribers and pharmacy providers about its availability. Finally, although we will not require external medication error reporting at this time, we maintain that our proposed definition of ''medication error'' can still serve as appropriate guidance for internal medication error identification and reduction systems.

c. Medication Therapy Management Programs (MTMPs)

Proposed § 423.153(d) required Part D sponsors to establish an MTMP described in section 1860D–4(c)(2) of the Act that is designed to optimize therapeutic outcomes for targeted beneficiaries by improving medication use and reducing adverse drug events, including adverse drug interactions, that may be furnished by a pharmacist, and that may distinguish between services in ambulatory and institutional settings. We stated that MTMPs may include elements designed to promote (for targeted beneficiaries):

- Enhanced enrollee understanding—through beneficiary education counseling, and other means that promotes the appropriate use of medications and reduces the risk of potentially adverse events associated with the use of medications.
- Increased enrollee adherence to prescription medication regimens (for example, through medication refill reminders, special packaging, compliance programs, and other appropriate means).
- Detection of adverse drug events and patterns of over-use and under-use of prescription drugs.

We proposed that in order to promote these elements and optimize therapeutic outcomes for targeted beneficiaries, we envision MTMPs potentially spanning a range of services, from simple to complex. In addition to those mentioned in the statute, services could include, but may not be limited to, performing patient health status

[4] Ibid.

assessments, formulating prescription drug treatment plans, managing high cost specialty medications, evaluating and monitoring patient response to drug therapy, providing education and training, coordinating medication therapy with other care management services, and participating in State-permitted collaborative drug therapy management.

We specifically sought comment on MTMP best practices, essential components of successful MTMPs, appropriate MTMP providers, service level requirements, quality assurance requirements for MTMPs, information on effective MTMP services that could be publicized and used by beneficiaries, and other effective steps to make valuable, proven MTMP services available to beneficiaries.

Comment: Numerous commenters recommended that we specifically define a minimum package of services that all plans must offer for MTMPs, because plans will not have the economic incentives to offer adequate MTMP services otherwise, or because different plans will offer such different services that the quality of services provided will vary significantly. Although comments suggested a wide variety of possible MTMP services, common elements identified in several best practice examples provided in the comments included: (1) Initial assessment/patient interview; (2) Development of a drug plan identifying goals for therapy; and, (3) Monitoring and evaluation of therapy. Nevertheless, a number of commenters recommended that we maintain the level of specificity contained in the proposed rule. These commenters stated that no widely accepted MTMP standards exist and plans need flexibility to develop and implement MTMPs that can best meet the needs of their specific patient populations and therefore, achieve the best outcomes.

Response: After reviewing extensive comments and conducting additional research, we believe that insufficient standards and performance measures exist to support further specification for MTMP services and service level requirements, and therefore we are adopting the flexibility proposed in the proposed rule. Although best practice examples identified some common elements, neither the Booz-Allen-Hamilton report, nor any comments submitted to us, showed that these MTMPs reflected widely accepted standards of practice. In fact, until the Pharmacist Provider Coalition's recent publication of their definition of MTMP, no widely agreed upon definition of MTMP existed, let alone standards and measures. While we understand the concern with potential disincentives for part D plans to develop robust MTMPs, we are not adopting additional regulatory requirements at this time because it us unclear which specific, additional requirements would enhance MTMPs, and ultimately improve therapeutic outcomes for part D beneficiaries.

We continue to believe that MTMPs can and must offer appropriate services for targeted beneficiaries. However, we are concerned that further premature regulatory requirements at this time might not only fail to improve MTMPs, but could negatively impact their development. Requiring a universal set of minimum services and service levels, without fully understanding how they could effectively be implemented on a much larger platform than illustrated in best practice examples, could result in MTMPs becoming perfunctory services offered just to satisfy regulatory requirements as opposed to patient focused services aimed at improving therapeutic outcomes. For example, several of the best practice examples stressed the importance of collaboration with prescribers to ensure that MTMP is successful. However, simply requiring specific services and service delivery mechanisms will not do anything to ensure successful collaboration. Therefore, we believe that at the outset of the Medicare Prescription Drug Benefit, plans must have maximum flexibility to develop MTMPs that can achieve the statutory goal of improving therapeutic outcomes.

Notwithstanding the lack of current MTMP standards and performance measures, we believe that MTMP must evolve and become a cornerstone of the Medicare Prescription Drug Benefit. With an understanding that the introduction of MTMP requirements can significantly impact the current practice of pharmacy, we intend to utilize the Medicare Prescription Drug Benefit as a platform for driving the quality improvement of prescription drug therapy. We require plans to report details on their respective MTMPs, and we intend to collaborate further with industry to develop measures that can be used to evaluate programs and establish appropriate standards. Our goal is to evaluate MTMPs within the context of an overall strategy that evaluates not only MTMP, but also other quality of care programs, standards, and services, such as drug utilization management, drug utilization review, chronic care improvement programs, and the role of QIOs. In so doing, we believe that we will identify best practices that will evolve into industry practice standards and could eventually be adopted as our standards.

Comment: Several commenters recommended that we require plans to allow beneficiaries to receive MTMP services from their network/non-network provider of choice. In addition, several commenters recommend that we require plans to offer MTMPs that favor face-to-face consultations over other forms of intervention.

Response: Consistent with our overall approach to MTMPs, at this time we believe plans need the discretion to decide on which methods and which providers are best for providing MTMP services available under their specific MTMP. We assume that such providers will include some network pharmacy providers, but plans are not obligated to use any specific providers as long as those providing services for the plan are qualified to provide such services. Furthermore, although we indicated in the proposed rule that we believe pharmacists will be the primary providers of these services, and that we believe beneficiary choice and on-going beneficiary-provider relationships should play a role in determining the appropriate providers, we recognize that such determinations must be made in the context of the specific, overall program design. Moreover, while we understand that face-to-face consultations can offer advantages over other methods of service delivery, it is still but one component of a successful MTMP. Successful MTMPs will need to consider and coordinate not only the method of communication and the providers of services, but also other components such as the content of the service, the qualifications of the providers, the identification of targeted beneficiaries, and the documentation requirements associated with services performed. Because plans are responsible for designing the programs to improve therapeutic outcomes, plans will be in position to make the determinations that will maximize overall MTMP effectiveness, taking into account all factors that influence successful MTMP.

In addition, while section1860D–4(b)(1)(C)(iii) of the Act requires us to establish pharmacy access standards that include rules for adequate emergency access to covered part D drugs, we do not believe the same authority applies to out of network access for MTMP services. Unlike situations when patients face an urgent need for covered Part D drugs but do not have access to a network provider, we do not believe this urgent need rationale reasonably applies to MTMP. In addition, the Congress clearly knows

how to require out-of-network access and did so specifically for Part D drugs in emergency situations. Accordingly, we can not require plans to offer MTMP services through out-of-network pharmacies.

Comment: One commenter noted that MTMP services will fall under the consideration of State boards of pharmacy and how States have defined the practice of pharmacy and scope of services which pharmacists are legally able to provide to patients. Therefore, this commenter requested that we work with States and their boards of pharmacy to prevent conflicts between MTMP under the Medicare Prescription Drug Benefit and State definitions of pharmacy practice and scope of allowable pharmacist activities.

Response: Generally, unless there is a conflict with Federal law, we will defer to State laws and regulations pertaining to the practice of pharmacy. We do not believe our current MTMP requirements pose any conflicts with State laws and therefore, plans need to develop MTMPs that comply with State laws and regulations.

Comment: Several commenters recommended that we clarify that providers can offer MTMP to non-targeted beneficiaries and bill the beneficiaries for these services.

Response: We agree that providers can offer MTMP services to non-targeted beneficiaries because MTMP in these circumstances is not part of the Medicare Prescription Drug Benefit. Providers need to notify beneficiaries receiving these services that the services are not offered as part of the Medicare Prescription Drug Benefit and therefore, the beneficiary is responsible for all of the cost of the MTMP.

Similarly, if plans choose to offer MTMP to non-targeted beneficiaries, beneficiaries must be notified that they are responsible for 100 percent of the cost. Moreover, the costs for these services fall entirely outside the Part D cost sharing structure and do not count for purposes of tracking beneficiaries' total costs, out-of-pocket costs, or for purposes of reinsurance and risk sharing with Medicare.

Comment: Several commenters recommended that we prohibit plans from implementing MTMPs as a utilization management tool geared towards shifting market share as opposed to improving therapeutic outcomes.

Response: We agree that MTMPs are more than utilization management programs focused on shifting market-share. Part D plans must implement MTMPs designed to optimize therapeutic outcomes by improving medication use and reducing the risk of adverse drug events, including adverse drug interactions. Plan sponsors will need to coordinate their MTMPs and utilization management strategies to improve therapeutic outcomes at the lowest possible costs.

In the proposed rule, we proposed that MTMP fees be treated as administrative fees and incorporated into the premium, rather than being billed to the beneficiary on a case-by-case basis. We noted that while section 1860D–4(c)(2)(E) of the Act specifies that the time and resources necessary to implement the MTMPs must be taken into account when establishing fees, it does not specify how these fees should be paid. We stated our belief that fees associated with provision of MTMP services are separate and distinct from dispensing fees discussed in § 423.100. Although section 1860D–4(c)(2)(E) of the Act states that Part D sponsors must disclose to the Secretary the amount of ''any such management or dispensing fees'', it merely governs disclosure and does not require that MTMP be included in the dispensing fee (indeed the Act distinguishes management fees from dispensing fees that are part of individual prescriptions).

Comment: Most commenters agreed with our interpretation that MTMP should be considered an administrative cost as opposed to a benefit, thereby preventing direct beneficiary cost sharing for MTMP services.

Response: We agree that direct beneficiary cost sharing for MTMP services could negatively impact targeted beneficiary participation and therefore, our final policy is to consider MTMP as an administrative cost (included in the plan bid), incident to appropriate drug therapy, and not an additional benefit.

Comment: Many commenters recommended that we include reporting requirements in the final regulation, specifying, for example, that plans provide detailed policies and procedures for implementing their MTMPs and associated performance measures for evaluating the impact on therapeutic outcomes.

Response: We agree with these commenters that we must include a reporting requirement for MTMPs. As we work with industry and other stakeholders to improve the therapeutic outcomes by optimizing prescription drug therapy, we will need detailed information about each MTMP. Therefore, we are adding a reporting requirement at § 423.153(d)(6) and we will specify the information that we will require in separate guidance.

Comment: Several commenters suggested that we specifically involve QIOs with the collecting and analyzing of data from MTMPs and establish a mechanism for QIOs to secure information from medical claims to identify targets.

Response: We believe that QIOs could play a significant role with MTMPs and this will be reflected in our contracts with the QIOs. Specific technical assistance could include collecting and analyzing MTMP data.

Comment: Several commenters responded to our request for incentives that would help drive the creation and evolution of significant MTMPs by suggesting pay-for-performance incentives and minimum renewal criteria, both based upon mutually agreed upon thresholds of patient care.

Response: We have a more complete discussion of pay-for-performance in the quality improvement section of the preamble to the final Title II rule. We are conducting several demonstrations to test this approach and we are very interested in studying this direction for plans. Plans are free to develop such arrangements with their providers, and we encourage them to do so. Such arrangements have existed for a number of years in the Medicare Advantage program. Plans will need to be mindful of any restrictions imposed by the anti-kickback statute, and those needing further clarification may want to use the OIG's advisory opinion process to obtain guidance relating to specific transactions and arrangements.

Comment: CMS should clarify that MTMP services are voluntary and that targeted beneficiaries are under no obligation to participate with programs in order to receive prescription drug benefits.

Response: We agree that beneficiaries must not be obligated to participate in MTMPs. While we hope that beneficiaries will participate to improve their therapeutic outcomes, beneficiaries must not be denied access to prescription drugs based upon failure to participate in MTMPs.

Comment: One commenter recommended that we require Part D plans to separate MTMP services agreements with providers from standard network provider contracts to reduce potential conflict of interest.

Response: Since we do not know who will be providing MTMP services, it is premature for us to require specific terms and conditions for such contracts. While MTMP service providers will likely include some network pharmacy providers, Part D plans will need to specify, in their applications, their approach to determining MTMP fees

which accounts for the time and resources necessary to perform the services. In addition, plans need to comply with any restrictions imposed by the anti-kickback statute.

Comment: One commenter recommended that we change the language at § 423.153(d)(1)(i) from ''must assure'' to ''must have processes in place so that.''

Response: Upon review of the proposed language, we agree that § 423.153(d)(1)(i) must be changed. We have changed ''must assure'' to ''is designed to ensure.'' We believe this language does not impact the intent but better reflects what is required of MTMPs.

Section 1860D–4(c)(2)(A)(ii) of the Act describes targeted beneficiaries as Part D individuals who: (1) have multiple chronic diseases (such as diabetes, asthma, hypertension, hyperlipidemia, and congestive heart failure); (2) are taking multiple covered part D drugs; and (3) are identified as likely to incur annual costs for covered Part D drugs that exceed a level specified by the Secretary, and we codified this requirement at proposed § 423.153(d)(2).

We invited comment on further defining ''multiple chronic diseases'' and ''multiple covered Part D drugs,'' and whether we should add further specifications or leave such determinations to the plans. Furthermore, we invited comment on whether we should set the cost threshold for determining targeted beneficiaries or if this determination could also be left up to the plans. Generally, we invited comment on disease, drug and cost issues that we should consider in further refining the definition of targeted beneficiary.

Comment: Many commenters recommended that we specify which chronic diseases, the number of chronic diseases, and the number of covered part D drugs that will qualify a beneficiary for MTMP services. Moreover, several commenters suggested that specific patient populations, such as beneficiaries in long term care, should automatically be considered eligible for MTMP services in all plans. Alternatively, many commenters suggested that such determinations are best left to the individual plans for designing their plan specific MTMPs.

Response: At this time, we believe these determinations must be left to the plans. Although we are not adding further specific requirements for chronic disease and multiple drugs, we do recommend that plans take notice of the statutory examples of chronic diseases when developing MTMPs. We plan to monitor the programs developed by the plans to learn from them as to whether or not further guidance is desirable.

Comment: Many commenters provided recommendations on the level of annual costs for Part D drugs likely to be incurred by a beneficiary that should be used as a threshold for MTMP eligibility. Some commenters argued that any cost threshold is inappropriate because it does not indicate those that could benefit from MTMP and in fact, could exclude beneficiaries that would benefit most. Others recommended various cost thresholds including specific dollar amounts and percentage based thresholds (for example, top 5 percent). Most comments suggested that we should make this determination and not delegate it to the plans.

Response: Despite our discussion in the proposed rule about leaving this determination to the plans, we do not believe we have the authority to delegate the cost threshold determination to plans and therefore, we will set a cost threshold. While cost might not the be best proxy for identifying patients that could benefit most from MTMP, the statute requires us to set a threshold and our goal is to identify a manageable target population so that plans offer truly valuable services to beneficiaries that will benefit from such services. Factors we will consider include typical costs associated with the most common chronic diseases and co-morbidities for Medicare beneficiaries, the relationship between cost and the number of medications a beneficiary is taking, the impact specific cost thresholds have on the size of the target population, and the alignment of incentives for providing MTMP services within the standard part D benefit structure. We intend to provide the specific cost threshold in separate guidance.

Comment: Several commenters recommended that we should require plans to allow providers and beneficiaries (self-referral) to identify appropriate MTMP targets in addition to plans utilizing system edits to identify eligible MTMP targets.

Response: The identification of targeted beneficiaries will be determined by individual plan policies. Therefore, plans will decide if and how providers and beneficiaries can participate with identifying targets. Once again, we believe that successful MTMPs must be coordinated and that plans need to develop appropriate mechanisms for notifying and identifying targeted beneficiaries that are eligible for MTMP services.

Section 1860D–4(c)(2)(C) of the Act requires Part D sponsors to develop their MTMPs in cooperation with licensed and practicing pharmacists and physicians, and we codified this requirement at § 423.153(d)(3).

Comment: Several commenters recommended that we specify that practicing pharmacists and physicians must be licensed in the United States.

Response: Part D sponsors must comply with State licensure requirements for pharmacy practice, and therefore, we believe further specific licensure requirements are not warranted.

Section 1860D–4(c)(2)(D) of the Act requires us to establish guidelines for the coordination of MTMPs with chronic care improvement programs established under section 1807 of the Act for targeted beneficiaries, and we codified this requirement at § 423.153(d)(4).

The Chronic Care Improvement Program (CCIP) is a new program established by section 721 of the MMA, which added a new section, section 1807, to the Act. The new section 1807 creates a method for us to assist beneficiaries with multiple chronic conditions in managing their care. The program is targeted only to beneficiaries in original fee-for-service Medicare not beneficiaries enrolled in MA plans.

We invited comment on how services provided through CCIP could be effectively coordinated with MTMP services provided by PDPs. We also sought comment on how to integrate MTMP services and financial incentives into the CCIP under section 721 of the Act.

Comment: Several commenters recommended that we share CCIP enrollment information with PDPs so that these individuals will be excluded from MTMP services. In addition, several other commenters recommended that we require PDPs to share their drug data with CCIPs.

Response: We agree that Part D plans need to share drug data with CCIPs and have specified this requirement in our regulation text at § 423.153(d)(4). CCIPs need this valuable data in order to provide the comprehensive care management that is intended under the CCIP. However, plans must determine, in conjunction with CCIPs, whether or not it is desirable to offer MTMP services to persons participating in CCIPs. We note that in sharing the data, both the CCIP and the Part D sponsor will need to abide by the HIPAA privacy rules including transmitting only the minimum data necessary. We strongly encourage Part D plans to consult with their privacy counsel to ensure that the

transmission of data complied with all aspects of the HIPAA privacy rules.

In the proposed rule we also discussed the requirement in section 1860D–4(c)(2)(E) of the Act specifying that the time and resources necessary to implement MTMP be taken into account when establishing fees for pharmacists or others providing MTMP services under the plan. We stated that to implement this section, in evaluating the administrative component of a Part D plan's bid, we will ask a Part D sponsor to disclose the fees it pays to pharmacists or others, including an explanation of those fees attributable to MTMP services. The fee information provided to us under this authority will be protected under the confidentiality provisions of section 1927(b)(3)(D) of the Act. Under those provisions, we are prohibited from disclosing the specific fees in a manner that links the fees to the particular pharmacy or other provider providing the MTMP services except to the extent necessary to administer the Part D program, to permit the Comptroller General to review the information, or to permit the Director of the CBO to review the information. If we were to discover situations in which plans systematically did not pay the fees described in their applications-and, if those errors were not corrected upon notification, we might, at our discretion, employ the broad ranges of intermediate sanctions or termination provisions available under subparts K and O of the regulations.

We stated, however, that while we expected to perform the due diligence described above through application review and potentially following up on any complaints, we did not believe we have the authority to mandate that Part D sponsors pay pharmacists or other providers a certain amount for MTMP services. We also stated that we will not adjudicate any specific disputes between Part D and pharmacists or other providers regarding the specific fees due for MTMP services.

Comment: Many commenters recommended that we provide further requirements for MTMP fees, including establishing a fee schedule, identifying a particular documentation and billing mechanism, and requiring plans to reimburse for MTMP services provided by out of network providers.

Response: These details are up to the plans and their arrangements with pharmacists and other providers. We do not believe the MMA provides us with the authority to establish fee schedules or interfere with the contracts between plans and providers. While we are familiar with the recommendation and accompanying efforts to pursue a CPT coding mechanism for MTMP services, which would provide for common billing and documentation procedures, the American Medical Association's (AMA) Current Procedural Terminology (CPT) Editorial Panel will make that determination and it does not directly involve us. Therefore, in the final rule, we are adopting our proposed policy to require sponsors to discuss their MTMP fees in their applications, but neither to mandate any specific MTMP fees nor become involved in payment disputes regarding MTMP between pharmacies and sponsors.

Section 423.153(e) in the proposed rule discussed fraud, waste and abuse programs required by section 1860D–4(c)(1)(D) of the Act. In an effort to consolidate, the requirements and preamble discussion pertaining to fraud, waste and abuse programs, we moved § 423.504(b)(4)(vi)(H) to subpart K, and included as a component of a Part D sponsor's general compliance plan.

d. Exception for Private Fee for Service Plans

Proposed § 423.153(f) implemented section 1860D–21(d)(3) of the Act by exempting private fee for-service MA plans that offer qualified prescription drug coverage from the requirement to establish a drug utilization management program and a MTMP; however, these private fee-for-service MA plans are still required to establish quality assurance measures and systems and a program to control fraud, waste and abuse as described in § 423.153(c) and § 423.504(b)(4)(vi)(H), respectively.

We did not receive any comments on these provisions and they have been adopted in the final rule at § 423.153(e).

3. Consumer Satisfaction Surveys (§ 423.156)

As proposed under § 423.156, we will conduct consumer satisfaction surveys of enrollees of Part D plans in order to provide comparative information about qualified prescription drug coverage to enrollees as part of our information dissemination efforts. Section 1860D 4(d) of the Act specifies that these surveys be conducted in a manner similar to how they are conducted under § 422.152(b) for MA plans by using the Consumer Assessment of Health Plans (CAHPs).

In the proposed rule, we stated that we believed a CAHPs-like instrument (or perhaps a modification of CAHPs for MA organizations offering MA-PD plans) will most likely be the vehicle used to collect this information. In addition, we stated that we anticipated working with the Agency for Healthcare Research and Quality (AHRQ) to develop a survey measuring the experience of beneficiaries with their qualified prescription drug coverage, a sampling strategy, and an implementation strategy. We also indicated that we will provide further information regarding this survey as it is developed.

Comment: Commenters had several suggestions and questions regarding the design and implementation of the survey, including the following: CMS and CAHPs should provide draft models of the survey instruments to the Part D plans for input prior to final draft and distribution; CAHPs/AHRQ should differentiate satisfaction with the benefit versus the service provided by the network pharmacy; if all plans are actuarially equivalent as approved by CMS, how will we differentiate consumer satisfaction; the first surveys should be conducted starting in 2006 with the results available before the fall open season; consumers must be included in the survey design process; and, surveys should be sent and the results analyzed by CMS, prior to the annual May notification to plans about whether or not their contracts will be renewed.

Response: We plan to have a public comment process in the development of the survey, and solicit input from key stakeholders. We expect that consumers will be included in the design process through focus groups, cognitive interviews and testing of the instrument. The purpose of the satisfaction survey is to provide information in a timely manner for purposes of beneficiary plan choice which occurs during the fall of the year. We are still determining the timing for survey administration. One major constraint is pilot testing of the survey cannot begin until early in 2006.

Since the purpose of the survey is to help consumers choose among the plan options, during the development process we will try our best to focus on things that may vary across plans versus satisfaction with the overall benefit. Although the plans are actuarially equivalent, there will be differences in formularies, customer service, informational materials, etc.

Comment: Additional comments focused on the fact that fully integrated MA organizations, unlike other MA organizations and PDP sponsors, own and operate their own pharmacies. As a result, survey instruments may be confusing to beneficiaries enrolled in these organizations if the instrument is designed only for network model plans. In addition, to the extent that survey instruments do not reflect satisfaction ratings with retail pharmacies under contract to network model plans, comparisons between network plans

and integrated organizations will be unlikely to result in apples-to-apples comparisons. In addition, consumer satisfaction ratings in health care are notoriously suspect to regional variation. In reporting satisfaction levels, we should attempt to adjust for these variations.

Response: We agree that making appropriate comparisons and adjustments will be essential to take into account certain factors that may impact satisfaction but are not under the control of the Part D plans. In the development work, we will be exploring what are the appropriate adjusters for this survey.

4. Electronic Prescription Program (§ 423.159)

Section 1860D–4(e) of the Act contains provisions for electronic prescription programs. The statute contains specific provisions on when voluntary initial standards may be adopted (not later than September 1, 2005), and when final standards must be published (not later than April 1, 2008) and then effective (not later than 1 year after the date of promulgation of final standards).

While we included a fairly long discussion of electronic prescribing in the proposed rule, shortly we will issue another proposed rule devoted to the standards that will be used for electronic prescribing and have reserved § 423.159(a) and § 423.159(b) of this final rule for such electronic prescribing standards. Therefore, the proposals we made for such standards are not being addressed in this final rule. Moreover, comments received in response to such proposals may be considered in the electronic prescribing-specific proposed rule. In addition, commenters who wish to provide additional comments on electronic prescribing will be permitted to do so after publication of the electronic prescribing proposed rule.

One standard we are finalizing is the requirement that Part D sponsors have the capacity to support electronic prescribing, once final standards are in effect, including any standards that are established before the drug benefit begins in 2006. We proposed such language at § 423.159(a) of the proposed rule. Since Part D sponsors will in fact have to support electronic prescribing, once standards are in place, we have modified the language in § 423.159(c) to make clear that Part D sponsors must not just have the capacity to support electronic prescribing but will actually have to support it. We received no comments on this proposal and are adopting it at § 423.159(c).

We also proposed at § 423.159(b) to allow an MA-PD plan to provide a separate or differential payment to a participating physician who prescribes covered Part D drugs in accordance with electronic prescription standards. (Note that this provision only applies to MA-PD plans and not to PDPs) Section 102(b) of the MMA makes it clear that this differential payment may occur when a participating physician prescribes drugs in accordance with an electronic prescription program that meets standards established under section 1860D–4(e) of the Act. We solicited comments on the differential payments provision described in § 423.159(b) of the proposed rule as it relates to the application of various legal authorities including ''the physician self-referral prohibition at § 1877 of the Act'' and the Federal anti-kickback provisions at section 1128B(b) of the Act. In order to facilitate electronic prescribing by a Part D sponsor, we also invited public comment on additional steps to spur adoption of electronic prescribing, overcome implementation challenges, and improve Medicare operations.

Comment: Many commenters supported the provision of a separate or differential payment to a participating physician that prescribes covered Part D drugs in accordance with electronic prescription standards.

Response: We agree that participating physicians have a substantial role in electronic prescribing and will have upfront and on-going costs of implementation. For this reason, the regulation permits an MA organization offering an MA-PD to provide a separate or differential payment to a participating physician that prescribes covered Part D drugs in accordance with electronic prescription standards, including both voluntary standards promulgated by HHS and final standards established by HHS once final standards are effective.

Comment: Many commenters also encouraged us to allow MA-PD plans to make similar incentive payments to participating pharmacies and pharmacists.

Response: We agree that pharmacies and pharmacists have a substantial role in electronic prescribing and will have upfront and on-going costs of implementation. The MMA statute provided for such incentives directly to physicians; however MA plans could in compliance with the Federal anti-kickback and Stark self-referral statutes offer incentives to pharmacies and pharmacists through individual plan contract agreements. HHS may consider this issue when developing the pilot programs.

Comment: One comment stated that differential payments should also be permissible by PDPs. While ''PDPs sponsors will not have network contracts with physicians in the way that MA organizations will, PDPs may have service contracts with physicians to provide MTMP services.'' The commenter noted that we have the authority to permit such payments under section 1860D–4(c)(1)(B) of the Act as part of a quality assurance program.

Response: We disagree. The MMA statute was specific in the use of incentives by MA-PD plans to participating physicians that prescribe covered Part D drugs in accordance with an electronic prescription program that meet the standards established under section 1860D–4(e) of the Act.

Comment: Many commenters expressed concern that separate or differential payments should not inappropriately influence physician prescribing behavior or restrict provider choice or decision making. Many also suggested that we provide guidance to plans to guarantee that such incentives do not impact prescribing judgment and that any incentives utilized in e-prescribing programs focus on rewarding improvements in patient safety and quality.

Response: We agree with the commenters that incentives must not inappropriately influence physician prescribing patterns. We will be providing guidance to plans on physician incentives.

Comment: Many commenters agreed that any differential payments provision must be in compliance with other Federal and State laws including the physician self-referral prohibition at section 1877 of the Act and the Federal anti-kickback provisions at section 1128B(b) of the Act. They urged the Secretary to consider extending the applicability of the safe harbor provisions beyond Part D programs and to include monetary and non-monetary remuneration.

Response: As outlined in the preamble in the proposed rule, we are sharing any comments regarding the anti-kickback statute with the OIG. Additionally, in response to comments we have added language at § 423.159(d) that such payments be subject to compliance with applicable Federal and State laws and regulations related to fraud and abuse.

In the proposed rule, we also sought comment on measures of MA-PD plan quality related to the use of electronic prescribing and other MA-PD quality

measures that reflect effective electronic prescribing systems.

We invited comments on the challenges and on possible Federal activities that will promote the effective use of electronic prescribing by providers, including publishing best practices, and making technical information on electronic prescribing products available. In addition, receptivity to the use of electronic prescribing by consumers is not well understood especially among the elderly and disadvantaged populations. We requested additional information on how those populations may view electronic prescribing and what steps may be taken to get them to use this modality and, thus, take advantage of the safety and quality benefits it offers.

We also invited comments on how to promote the use of electronic prescribing by providers, health plans and pharmacies and other entities involved in the provision and payment of health care to Medicare beneficiaries. Beyond the differential payments authorized in § 423.159, we invited comments on what incentives could be used to spur more widespread adoption, especially for early implementers. We also invited comments on what educational efforts or data analyses might be undertaken to help health practitioners understand, or empirically confirm, and ultimately realize, the benefits of electronic prescribing. Lastly, we sought public input on the ways electronic prescribing can further reduce costs to the Medicare program and promote quality of care to beneficiaries.

We received numerous comments in response to our requests.

Comment: HHS received universal support from all those who commented on § 423.159 regarding the establishment of electronic prescribing standards and its potential for improved quality of care through reduced medication errors, better therapeutic compliance and better process and cost efficiencies.

Response: We agree with the commenters that electronic prescribing has great potential to improve the health of Medicare beneficiaries and reduce medication errors.

Comment: Many commenters suggested that HHS should evaluate how electronic prescribing may improve patient compliance, clinical outcomes and patient safety and facilitate other electronic prescribing processes. Additionally commenters provided a variety of areas to focus educational efforts and data analyses.

Response: We agree with the commenters that MA-PD plan quality, related to electronic prescribing, must be evaluated to further promote quality of care for beneficiaries. We will take these suggested areas under consideration as we develop quality measures for MA-PD plans. Furthermore, for quality improvement purposes, we will make any plan information on electronic prescribing available to our QIOs either directly from the Part D plans or through us.

Comment: Many commenters stated that HHS should publish best practices and make technical information on electronic prescribing products available so that providers can make informed comparisons. Many agreed that these efforts will also spur effective adoption and use of electronic prescribing.

Response: HHS appreciates these thoughtful comments and will take them into consideration as we implement electronic prescribing.

Comment: A few commenters responded that electronic prescribing will result in procedural and behavioral changes by beneficiaries. They suggested that HHS work to ensure patients are aware of and comfortable with the new prescribing method and should disseminate information and educate enrollees on the changes resulting from electronic prescribing.

Response: We agree that electronic prescribing will result in procedural and behavioral changes in our beneficiaries. We will consider these suggestions as we work with the Part D sponsors on information dissemination and outreach.

Comment: One commenter stated that HHS should work with National Center for Vital and Health Statistics (NCVHS) to study the use of reduced malpractice insurance premiums as a financial incentive to promote the adoption of electronic prescribing.

Response: HHS will share this comment with the NCVHS.

Comment: Many commenters provided a variety of areas to focus educational efforts and data analyses to spur more widespread adoption.

Response: We will take these suggested areas for data analyses under consideration as we develop our educational efforts and quality improvement strategies by making such information on electronic prescribing available to our QIOs either directly from the Part D plans or through us.

Comment: Many commenters stated that developing standards for electronic prescribing will reduce costs to the Medicare program. Many commenters stated that the primary benefits of electronic prescribing are increased quality of care, reductions in the use of medical resources, and improved patient safety, specifically in the areas of reduced adverse events. Additionally, many stated that electronic prescribing improves the efficiency of processing prescriptions.

Response: We agree with the commenters that these electronic prescribing areas have great potential to reduce costs to the Medicare program.

5. Quality Improvement Organizations (QIO) Activities (§ 423.162)

Section 109 of the MMA expands the work of QIOs to include Part C and Part D. This provision explicitly covers the full range of Part C organizations. QIOs are required to offer providers, practitioners, and Part D sponsors quality improvement assistance pertaining to health care services, including those related to prescription drug therapy.

In the proposed rule, we stated the QIOs will need access to data from transactions between pharmacies and Part D plans. We offered examples of the types of data that would likely be required by QIOs and also discussed our role in potentially aggregating and distributing the data. Finally, we proposed that any information collected by the QIOs will be subject to confidentiality requirements in part 480 of our regulations. For purposes of applying these confidentiality regulations, we also proposed that Part D sponsors fall within the definition of health care facilities and that part 480 would apply in the same manner as that Part applies to institutions.

As the QIOs activities under Part D are developed within the 8th Scope of Work, and basic decisions are made about the collection, storage and use of Part D claims data, CMS will work with QIOs and Part D plans to develop a strategy to provide QIOs with data necessary to accomplish their task and safeguard patient confidentiality.

Comment: One commenter believes that PDPs may need additional data to identify enrollees to be targeted for MTMP services. They believe QIOs could provide that data to plans using information from medical claims submissions.

Response: QIOs cannot share with Part D plans beneficiary-specific identifiable data that it has acquired as part of its function as a QIO, but we could provide the data necessary to identify enrollees to be targeted for MTMP services to the Part D plans if appropriate. QIOs can provide other types of technical assistance to Part D plans.

Comment: One commenter recommends that serious evaluations be

designed to compare the effectiveness of different MTMP services, delivery, and payment methodologies. Another commenter wrote that QIOs could potentially perform a valuable role in collecting and analyzing the data to be made available to plans for use in establishing or revising their MTMP services.

Response: Once Title I has been implemented, we expect that outcome measures will be developed to allow the QIOs to assess the effectiveness of the MTMP services. We expect that both plans and pharmacies will be able to request technical assistance from QIOs to improve their MTMPs.

Comment: One commenter recommended that the last sentence of § 423.162(b) be deleted. [''PDP sponsors and MA plans offering MA-PD plans are required to provide specified information to CMS for distribution to the QIOs as well as directly to QIOs''] They support the voluntary nature in terms of whether a Part D plan must contract with a QIO. They are concerned about the submission of undefined information to CMS for passing through to QIOs as well as directly to QIOs regardless as to whether a Part D plan works with a QIO. In addition, it is unclear to which QIO such information will be provided, particularly since some drug plans may serve more than one State. Another commenter stated QIOs must have access to pharmacy and medical claims for quality improvement projects and oversight of the PDPs.

Response: We do not believe that the last sentence of § 423.162(b) must be deleted. QIOs need, and have the authority under section 1154 of the Act and section 109 of the MMA, to access specified data from the transactions between pharmacies and Part D plans providing the Part D benefit. However, the determination of what actual data, if any, that will be made available to QIOs will be made in subsequent guidance after QIOs activities under Part D are developed within the 8th Scope of Work, and basic decisions are made about the collection, storage and use of Part D claims data. We could provide specific data to QIOs to use for quality monitoring and extract these data from data already required by us for other administrative functions of the Title I program, thus not increasing the Part D plans' burden. We could also make data available to a QIO from plans that do not contract with the QIO but are directly related to the QIO's responsibilities as negotiated with us under its 8th scope of work. QIOs may also have access to additional data provided by plans working directly with a QIO.

Other QIO Activities

Comment: While PBMs have processes in place to monitor pharmacy dispensing and alert a pharmacy in cases where dispensing a medication may not be safe for a particular patient, it is critical the PBM or drug plan not be held accountable or responsible for activities that are beyond its control. Drug plans can be evaluated for having such process measures in place but should not be held accountable for problems outside their control, such as physician, pharmacist or manufacturer errors.

Response: We expect that the QIOs will work with physicians, pharmacists, and plans to improve the quality of beneficiaries' medication therapies. The QIOs' goal is to improve quality of care, not to assign blame. They can assist each of these players to design systems to facilitate the delivery of quality of care.

Comment: One commenter stated that QIOs should establish educational programs to assist drug plans and prescribers in the implementation of best practice guidelines through treatment algorithms.

Response: The QIOs' scope of work is being described in their contracts rather than in the regulation. The contracting mechanism allows flexibility to adjust the QIOs' tasks to be responsive for the need for quality improvement. The QIOs' activities will address quality improvement for both prescribers and plans.

Comment: The confidentiality of information collected by QIOs should be protected, as CMS has proposed.

Response: The QIOs will protect the confidentiality of the collected information, as specified in part 480. We have clarified § 423.162(c) in this final rule to make clear that the provisions of part 480 apply in the same manner as they apply to institutions.

Comment: There were several commenters who expressed concern regarding how QIOs will handle beneficiaries' complaints about the quality of care in Part D. The final rule in § 423.153(c) needs to state clearly that the QIOs will review quality of care complaints and lack of access complaints to requested services, as well as to clarify how this traditional QIO function will be carried out in the unique environment of Part D plans.

Response: Section 423.564(c), not § 423.153(c), states that QIOs must review enrollees' written complaints about the quality of services they have received under the Medicare program, as specified in section 1154(a)(14) of the Act. For any complaint submitted to a QIO, the Part D sponsor must cooperate with the QIO in resolving the complaint. For further discussion, please refer to the preamble to subpart M.

Comment: The final regulation should reflect the information contained in the summary of the 8th scope of work (SOW) for QIOs. The commenter added the regulation should specify that quality improvement projects will be performed by the QIO or by a third party (independent of the Part D plan) contracted by the QIO.

Response: This information is typically conveyed in the SOW of the contract between each QIO and us rather than in the regulation because a contract allows us the flexibility to modify the QIOs' activities without modifying the regulation. The contract is an effective way to ensure that these important tasks are accomplished.

Comment: Educational interventions are best done by QIOs or a third party independent of the Part D plan contracted by the QIO.

Response: QIOs will likely do educational interventions either with their own staff or with subcontractors, but we do not want to exclude other entities from also providing objective, evidence-based educational interventions.

Comment: Oversight of formulary decisions and subsequent review of Part D sponsors' formulary decisions could be key components necessary for QIO's to assess quality, especially in the dual-eligible long term care patients.

Response: We believe that decisions concerning which medications are on a plan's formulary are administrative decisions of the plan. These do not fall within the quality review functions of the QIO. The QIO will review beneficiary complaints that the plan's rules were not executed correctly. We will conduct reviews of plans' applications to ensure that formularies are not discriminatory, as well as review through program monitoring.

Comment: MA organizations delivering benefits through their owned and operated pharmacies are likely to rely on specialized pharmacy information systems that differ from the systems designed for PDP sponsors to communicate with their contract network pharmacies. As a result, it is possible that pharmacy data may be misinterpreted by a QIO. If QIOs will be using data from integrated MA organizations to assess quality, it will be important to work closely with the organizations to understand the data, or to develop more efficient methods to achieve the same result-an appropriate assessment of quality performance.

Response: We expect that QIOs will work cooperatively with plans. Because

QIOs work with identified organizations, they will have the opportunity to understand the context of the data they are analyzing.

Comment: One commenter suggests that QIOs examine the prescription drug claims submitted to the plan, specifically looking at the number of claims that are rejected and appealed.

Response: QIOs' activities focus on quality improvement. The number of claims rejected is an administrative function, and we do not expect the QIOs to be active in this area. It is likely the administrative performance of plans will be assessed by our program monitoring.

6. Treatment of Accreditation (§ 423.165, § 423.168, and § 423.171)

Section 1860D–4(j) of the Act requires that the provisions of section 1852(e)(4) of the Act relating to the treatment of accreditation will apply to Part D sponsors for:

- Access to covered Part D drugs including the pharmacy access requirements and the use of standardized technology and formulary requirements;
- Drug utilization management, Quality assurance, Medication Therapy Management, and a program to control fraud, waste and abuse as described in subpart K § 423.504(b)(4)(vi)(H);
- Confidentiality and accuracy of enrollee records.

Thus, the requirements in § 423.165, § 423.168, and § 423.171 are similar to the requirements found in § 422.156, § 422.157, and § 422.158 for the MA program, except for subject areas that are deemed.

Proposed § 423.165 provided the conditions under which a Part D sponsor may be deemed to meet our requirements permitted under paragraph (b) of that section. We stated that the first condition will be that the plan be fully accredited (and periodically reaccredited) by a private, national accreditation organization (AO) that we approve. The second condition will be that the plan be accredited using the standards that we approved for the purposes of assessing compliance with Medicare requirements.

Consistent with our approach in the MA program, in the proposed rule we proposed that we will analyze on a standard-by-standard basis whether an AO applies and enforces requirements that are no less stringent than those in part 423 for the standard at issue. We proposed that we will determine the scope of the AO's approval (and, thus, the extent to which Part D plans accredited by the organization are deemed to meet our requirements) based on a comparison of the AO's standards and its procedures for assessing compliance with our deemable requirements and our own decision-making standards. We stated that we will make those determinations on the basis of the application materials submitted by AOs seeking our approval in accordance with § 423.168. We also proposed to conduct surveys to validate the AO's enforcement on a standard-by-standard basis.

Proposed § 423.165(d) established the obligations of deemed Part D sponsors. A Part D sponsor will be required to submit to our surveys. We stated that the proposed surveys were intended to validate an AO's process and authorize the AO to release to us a copy of its most current accreditation survey, together with any information related to the survey that we may require (including corrective action plans and summaries of our unmet requirements). We stated that such activities will be part of our ongoing oversight strategy for ensuring that the AO applies and enforces its accreditation standards in a manner comparable to ours.

Proposed § 423.165(e) addressed removal of deemed status and proposed § 423.165(f) explained that we retain the authority to initiate enforcement action against any Part D sponsor that we determine, on the basis of our own survey or the results of the accreditation survey, no longer meets the Medicare requirements for which deemed status was granted. We stated that we expected the AO to have a system in place for enforcing compliance with our standards (such as sanctions for motivating correction of deficiencies), but we also stated that we could not delegate to the AO the authority to impose the intermediate sanctions established by section 1860D–12 of the Act or termination of the contract.

In the proposed rule, we acknowledged that deeming applies only to our enforcement of this regulation, and neither our enforcement of this regulation nor accreditation by an accrediting body undercuts the Office for Civil Rights enforcement of the HIPAA privacy rule.

Proposed § 423.168 discussed the three conditions for our approval of an AO if the organization applies and enforces standards for Part D sponsors that are at least as stringent as Medicare requirements and, if the organization complies with the application and reapplication procedures proposed in § 423.171.

Proposed § 423.168(c) established ongoing AO responsibilities. These responsibilities largely parallel those currently imposed upon accreditors under original Medicare. One exception was the proposed requirement that an AO notify us in writing within three days of identifying, for an accredited Part D sponsor, a deficiency that poses immediate jeopardy to the Part D sponsor's enrollees or to the general public.

Proposed § 423.168(d) established specific criteria and procedures for continuing oversight and for withdrawing approval of an AO. Oversight consists of equivalency review, validation review, and onsite observation.

In the proposed rule, we stated that we could withdraw our approval of an AO at any time if we determine that deeming based on accreditation no longer guarantees that the Part D plan meets the Medicare requirements, that failure to meet those requirements could jeopardize the health or safety of Medicare enrollees or constitute a significant hazard to the public health, or that the AO has failed to meet its obligations under § 423.165 through § 423.171.

Proposed § 423.171 addressed the procedures for approval of accreditation as a basis for deeming compliance. As mentioned, the process that we stated will be used to deem compliance with Part D requirements is virtually identical to the process that is being used for deeming compliance with fee-for-service requirements. One requirement proposed in § 423.171, and which also appeared in regulations governing MA plans at § 422.158(a)(11), but did not appear in regulations governing original Medicare, is the requirement that an AO applying for approval of deeming authority submit the name and address of each person with an ownership or control interest in the AO. We proposed that we will use this information to determine whether the AO is controlled by the organizations it accredits for the purposes of § 423.168. Section 423.171 further provided for reconsideration of adverse determinations of accreditation applications.

Comment: Several consumer groups oppose deeming because they believe it will diminish beneficiary protections. Several different types of organizations, such as pharmacy organizations, and others want to have input into the process, and asked who will be the AOs, how will they operate, and what standards will be used. They also commented that AOs will not be in place prior to the initiation of the program.

Response: Section 1860D–4(j) of Act provides for accreditation. We have

successfully administered accreditation programs in:

- Hospital settings, for example, JCAHCO;
- Home health, for example, JCAHCO, NLN; and
- Nursing homes and managed care, for example, NCQA, JCAHCO.

The advantages of AOs is that they eliminate duplication of efforts between us and AOs, since many private purchasers require AOs. Furthermore, it reduces the burden on government oversight.

AOs must demonstrate that their standards are at least as stringent as those in part 423 of our final regulations. Given that the regulations can only be finalized upon publication of this final rule, we agree with the commenters that AOs cannot be in place before the bids and contract applications for 2006 are due. Thus, at least in the first year of the program, applicants will have to determine on their own that they meet all of our standards. Once these rules are in effect, we can begin to consider applications for AOs; however, other program priorities will influence when we will be able to issue a public notice requesting applications. Currently, we do not believe that any AOs can meet our standards. Furthermore, it must be noted that in the Medicare Advantage program, it was several years before any AOs were accredited.

As to giving stakeholders a chance to comment, our regulation at § 423.168(b) provides that we publish a notice in the **Federal Register** whenever we are considering an AO's application. The public then has 30 days to comment.

We will be glad to meet with stakeholders to discuss these issues. The AOs must meet or exceed each of our standards. They can pass one or all standards, but will only be allowed to administer those standards for which they are approved.

The final rule has adopted the proposed rules on accreditation.

F. Submission of Bids and Monthly Beneficiary Premiums: Plan Approved

1. Overview

Subpart F will implement most of the provisions in sections 1860D–11 and 1860D–13 of the Act, as well as sections 1860D–12(b)(2)(on limitation on entities offering fallback plans), 1860D–15(c)(2)(on geographic adjustment of the national average monthly bid amount), 1860D–21(d) (on special rules for private fee-for-service (PFFS) plans), 1860D–21 (e)(3) (on cost contractors), and 1860D–21 (f)(3)(on PACE) of the Act. In this section we address submission, review, negotiation, and approval of bids for prescription drug plans and MA-PD plans; the calculation of the national average bid amount; and determination and collection of enrollee premiums. References to 42 CFR part 422 of our regulations are to the new MA rules. See Subpart T for additional information on PACE. Bidding is to be distinguished from the application process discussed in subpart K.

Although in this preamble we use the terminology, prescription drug plans and MA-PD plans, the regulations extend to all Part D sponsors (including PACE organizations and cost-based HMOs and CMPs) as these entities—just like PDP sponsors—will be required to submit bids for the prescription drug coverage they plan to offer. Therefore, we have changed the accompanying regulation text to use the terminology, ''Part D sponsor,'' throughout. We have also indicated in the regulation where separate rules would apply to fallback entities.

As discussed in subpart C, the statute provides a framework for the provision of subsidized prescription drug coverage. Within this framework, PDP sponsors and MA organizations have some flexibility to design coverage that is different from defined standard coverage to meet the needs of Part D-eligible Medicare beneficiaries. This framework plays a critical role in bid submissions, and the actuarial evaluation and approval of bids.

As part of our discussion we specify the actuarial equivalency tests plan sponsors will have to meet when offering coverage other than defined standard coverage. Please note that the coverage definitions are discussed in detail in subpart C of the preamble. In order to determine actuarial equivalency, plan sponsors will compare their plans to the defined standard coverage baseline to assess the various tests of actuarial equivalency that we discuss in detail in the sections below.

2. Requirements for Submission of Bids and Related Information

As provided under section 1860D–11(b) of the Act, each applicant to become a PDP sponsor or MA organization will be required to submit a bid for prescription drug coverage for each plan it intends to offer. Most bids will be expected to represent full risk plans, meaning that the prescription drug plan is not a limited risk plan or a fallback prescription drug plan, and is not asking for any modification of the statutory risk sharing arrangements. A bid from a full risk plan may be referred to as a full risk bid. PDP sponsors may choose to participate as limited risk plans, meaning that they provide basic prescription drug coverage and request a modification of risk level (as described in § 423.265(d)) in its bid submitted for the plan. A bid with a modified level of risk is referred to as a limited risk bid. This term does not include a fallback prescription drug plan. Bids will be due to us no later than the first Monday in June for each plan to be offered in the subsequent calendar year. This date stems from the requirement in section 1860D–11(b) of the Act that bid data from potential PDP sponsors be submitted at the same time and in a similar manner as the information described in section 1854(a)(6) of the Act for MA plans. Since section 1854(a)(1) of the Act requires initial data to be submitted on the first Monday of June of each year after 2004, we have also incorporated this date into our regulations. In the case of MA-PD plans, the prescription drug bid will be a component of the unified MA bid described in § 422.254(b)(1) with benefits beyond basic coverage (if any) incorporated into the supplemental benefits portion of the prescription drug benefit bid.

We are clarifying that this bid will represent the expected monthly average cost (including reasonable administrative costs) to be incurred by the plan applicant for qualified prescription drug coverage in the applicable area for a Part D eligible individual with a national average risk profile for the factors described in section 1860D 15(c)(1)(A) of the Act and in § 423.329(b)(1) of this rule. We plan to develop and publish the risk adjustment factors and identify the characteristics of an average individual no later than the date of the 45-day notice for the announcement of 2006 rates, which is February 18, 2005. Any modifications to these characteristics for subsequent years will be announced by the date of the annual 45-day notice. (For further discussion of prescription drug risk adjustment, see subpart G of this preamble.) In the August 2004 proposed rule we solicited comment on the nature of any additional information needed to prepare bids and suggestions for any other methods that the bid submission process could be structured to provide for later pricing data submission.

The costs represented in each plan bid must be those for which the plan will actually be responsible. Given the structure of qualified prescription drug coverage, these costs will not include payments made by the enrollee for deductible, coinsurance (including 100 percent coinsurance between the initial

coverage limit and the out of-pocket threshold), copayments, or payments for the difference between a plan's allowance and an out-of-network pharmacy's usual and customary charge (as discussed in § 423.124(b). It also does not include costs reimbursed by us through the reinsurance subsidy. However, we require the separate identification, calculation, and reporting of costs assumed to be reimbursed by us through reinsurance. For standard coverage, defined or actuarial equivalent, these costs will include the plan's share of costs above the deductible and up to the initial coverage limit, as well as the plan's share of costs above the annual out of pocket limit. If enhanced alternative coverage is provided, the plan costs for supplemental benefits will be distinguished from those for basic coverage. The costs attributable only to basic coverage, once approved, are known as the standardized bid amount.

In § 423.265(c) we will require that, with the exception of potential employer group waivers under section 1860D–22(b) of the Act and section 1857(i) of the Act, late enrollment penalties and low-income premium and cost sharing subsidies, the bid represents a uniform benefit package based upon a uniform level of premium and cost sharing among all beneficiaries enrolled in the plan. This means that all enrollees in a given PDP or MA-PD plan will be subject to the same cost sharing structure and will be charged the same premium for benefits the PDP sponsor or MA organization chose to offer.

We note that while benefits are required to be uniform for all enrollees under the drug benefit, this is not the case for enrollees under a prescription drug discount card program. To avoid any confusion between these related programs, we would like to make this distinction clear. Because of the limited low-income assistance under the card program, card sponsors have been permitted to negotiate lower prices for low-income members. Also, in some cases there may be reduced cost sharing sponsored by manufacturers for low-income members after the $600 in transitional assistance is used that does not apply to other card members. Under the Part D prescription drug program, however, both the negotiated prices and the benefit structure will be the same for all enrollees in a given PDP or MA PD plan. While the low-income subsidies will result in low-income beneficiaries' actual out of pocket costs being lower than for beneficiaries who do not qualify for this assistance, the benefit structure to which the subsidies apply is the same for all enrollees in a plan.

Comment: Two commenters suggested that we assist bidders by making accessible relevant drug utilization data from sources such as Tricare, PBMs, the National Association of Chain Drug Stores and current Medicare Advantage plans with drug benefits.

Response: We either does not have access to such data or does not have the authority for public release. Most of the data suggested by the commenters would be considered proprietary. There are other data sets that are being used to meet industry's requests that we share information from public data sets that could help potential drug plan bidders to better understand or estimate the eligible Medicare beneficiary population's utilization of prescription drugs. They include: 1) data for Federal retirees 65+, enrolled in the Federal Employee Health Benefit national Blue Cross Blue Shield plan; 2) data from the Medicare Current Beneficiary Survey; and 3) Medicaid Pharmacy Benefit Use and Reimbursement in 1999 Statistical Compendium. The latter is prepared from Medicaid Analytic eXtract (MAX) files for calendar year 1999. For more information, or to download these data see *http://www.cms.hhs.gov/pdps/default.asp*.

Comment: Several comments urged that bids be rejected from PDPs that are owned or financially controlled by a drug manufacturer or group of manufactures.

Response: We note the concern that many stakeholders have had over manufacturer acquisition of PBMs in the 1990's. However, the Federal Trade Commission's response by imposing restrictions on manufacturers acquiring PBMs (for example, offer open formularies, include drugs that compete with the parent company's products, etc) has generally led manufacturers to divest from PBMs, or to alter their behaviors in order to prevent antitrust enforcement actions (see Christopher Sroka's November, 2000 report ''Pharmacy benefit managers'' for the Congressional Research Service and Regina Johnson's 2002 piece ''PBMs: Ripe for regulation'' in Volume 57, Issue 2 of the Food and Drug Law Journal). Regardless of future industry activity in this area, the statute does not give us the authority to implement a ban as suggested by the commenters.

Comment: One commenter indicated that Part D plans are required to submit bids no later than the first Monday in June to be offered in the subsequent calendar year. This is not sufficient time for SPAPs that need to coordinate benefits. SPAPs will need to know by June of 2005 what plans will be qualified sponsors and operating in their States.

Response: Section 1854 of the Act amended by the MMA sets the bid submission date as no later than the first Monday of June. PDP sponsors and MA organizations with MA-PDs need the maximum amount of time to put together a bid. PDPs and MA-PDs will need to keep SPAPs informed in order to complete the bid process, so communication between these entities should not be an issue.

Comment: One commenter suggested that plans should be required to provide for coverage of services to residents of Long Term Care facilities that are required by OBRA 1987 and under OBRA 1990. They recommended that this be added to the included costs in § 423.265(b)(1) under submission of bids. The commenter went on to state that Part D plans should not be exempt from providing the same services required under Medicare Part A or Medicaid to nursing facility residents and recommended that we require plans to incorporate the costs of paying for such services into their bid submissions, and that plans state clearly how they intend to pay qualified pharmacists for providing such services.

Response: Part D plans are only obligated to pay the negotiated price for covered part D drugs, which consists of the ingredient cost of the drug and a ''dispensing fee'' and that take into account any discounts, direct or indirect subsidies, rebates or other price concessions received by the Part D plan). The fee will include only those activities related to the transfer of possession of the covered Part D drug from the pharmacy to the beneficiary, including charges associated with mixing drugs, delivery, and overhead. The dispensing fee will not include any activities beyond the point of sale (that is, pharmacy follow-up phone calls) or any activities for entities other than the pharmacy. The dispensing fee does not include any charges associated with administering the drug once the drug has already been transferred to the beneficiary. This means that the pharmaceutical services listed under 1819(b)(4)(A)(iii) are included within the negotiated prices for covered part D drugs only if the term ''dispensing fee'' as defined in § 423.100 captures such services.

Comment: Several commenters asked for guidance regarding the costs that we view as administrative.

Response: Administrative costs are not clinical services unless part of a Medication Therapy Management Program. Administrative costs include such costs as: 1) crossover fees paid to

obtain information from other payors in order to calculate TROOP (True Out-of-Pocket); 2) Medication Therapy Management Program expenses; 3) Marketing & Sales; 4) Direct Administration (for example, customer service, billing and claims administration); 5) Indirect Administration (for example, corporate services, such as accounting operations, actuarial, legal and human resources); 6) Net Cost of Private Reinsurance (that is, reinsurance premium less projected reinsurance recoveries); 7) Medicare User Fees; 8)Uncollected Enrollee Premium; and 9) return on investment. Additional guidance on administrative costs will be given with the release of the bid submission tool. Instructions for the tool will include more detail defining administrative costs and guidance on how they are to be indicated in the bid submission.

Comment: One comment urged us to modify the timeline to permit bidders to submit a bid for approval before June 6, 2005.

Response: While bids can be submitted before the first Monday in June (June 6 in 2005), they cannot be approved before that date because they are reviewed collectively.

Comment: Several commenters urged that the bid submission process use electronic methods and be parsimonious for data requirements.

Response: We agree with the commenters that electronic methods are preferable. Accordingly, bid submitters will upload an electronic Plan Benefit Package (PBP) and bid submission pricing tool to the Health Plan Management System (HPMS). The bid is to represent the expected monthly average cost to be incurred by a plan applicant providing qualified prescription drug coverage in an applicable area for a Part D eligible beneficiary with a national average risk profile. We are cognizant of plan burden and therefore required submission data will be limited to what is absolutely necessary for us to fulfill its bid review, payment, and negotiation obligations.

Comment: One commenter asked if plans will get the rebates from manufacturers for drugs covered by SPAP wrap around.

Response: CMS does not have the authority to dictate how manufacturers pay rebates to plans. However, we would expect that drugs covered by secondary payers would still be subject to rebates.

3. General CMS Guidelines for Actuarial Valuation of Prescription Drug Coverage

As directed by section 1860D–11(c) of the Act, we will develop processes and methods using generally accepted actuarial principles and methodologies for determining the actuarial valuation of prescription drug coverage. Although we plan to provide additional information in the future in the form of interpretive guidance on these processes, we intend on using the following processes and methods for calculating ''actuarial valuation'' and ''actuarial equivalence'' in the context of risk bids:

- Sponsors offering standard coverage with cost-sharing variants either to the 25 percent coinsurance (before the initial coverage limit) or the greater of 5 percent coinsurance or $2 generic/preferred/$5 any other drug (after the out-of-pocket threshold is met) will be required to demonstrate the actuarial equivalence of their variations.
- Sponsors offering basic or enhanced alternative prescription drug coverage will be required to demonstrate that—
  + The actuarial value of total or gross plan coverage of their alternative is at least equal to the actuarial value of total or gross coverage of the defined standard benefit.
  + The actuarial value of unsubsidized coverage of their alternative is at least equal to the actuarial value of the unsubsidized portion of defined standard coverage; and
  + The plan payout at the dollar value of the initial coverage limit under standard coverage, for individuals whose total spending exceeds that limit, is at least equal to that provided under defined standard coverage.
- All sponsors will determine the actuarial value of the defined standard benefit, either because it is—
  + Offered to the beneficiaries;
  + Used as a comparison for either of the following:
    - Standard coverage with actuarially equivalent cost-sharing variants.
    - Alternative coverage; or
  + Used to determine the basic component in enhanced alternative coverage.
- Sponsors that offer enhanced alternative coverage will also be required to determine the actuarial value of coverage beyond basic coverage.
- We will further specify in additional guidelines the data sources, methodologies, assumptions, and other techniques in accordance with generally accepted actuarial principles as either recommended or required in further guidance. We will also specify the data elements (including format) to be sent to us for evaluation. We will then evaluate the analysis and assumptions for compliance and reasonableness. For example, we will evaluate the source, size, and timeframe of data on which assumptions are based, the demographic characteristics of enrollees, the distribution of risk levels, the average costs in each cost-sharing tier, and the update factors used, among other considerations.
- We will also require the separate identification of administrative costs. Since the level of the bid will directly affect the premium paid by the beneficiary and the attractiveness of the plan, we expect that plans will have a strong incentive to keep administrative costs and return on investment at reasonable levels. Any review of administrative costs will likely focus primarily on outliers from the competitive range identified in the bids received. All proposals will contain a description of how certain costs are included in the calculations. Processes and methods for determining actuarial valuation will take into account the effect that providing actuarially equivalent standard coverage or alternative prescription drug coverage (rather than defined standard coverage) has on drug utilization. This includes utilization effects attributable to different benefit structures, such as from tiered cost sharing, as well as those attributable to supplemental benefits. The utilization effect of supplemental benefits on basic benefits will have to be loaded into the supplemental portion of the bid. In other words, since the existence of supplemental coverage will increase total average per capita spending, that increase over the average spending (if coverage were limited to basic coverage) will be included in the portion of the bid attributable to supplemental coverage. Section 1860D–11(c)(1)(D) of the Act specifies ''the use of generally accepted actuarial principles and methodologies.'' We are interpreting this to require that a qualified actuary certify the plan's actuarial valuation (which may be prepared by others under his or her direction or review). Actuarial certification will give better assurance that the actuarial values in the bid were prepared in conformance with actuarial standards and methodologies.
- Section 1860D–11(c)(3)(B) of the Act specifies that PDP sponsors or MA organizations offering MA-PD plans may use qualified independent actuaries in certifying the actuarial values in their bids. (The actuarial valuation may be prepared by others under the direction or review of a qualified actuary). We interpret this provision as requiring PDP sponsors and MA organizations that do

not employ qualified actuaries, to use outside actuaries in their processes. We proposed in the August proposed rule to specify that a qualified actuary is an individual who is a member of the American Academy of Actuaries because members of the Academy must meet not only educational and experience requirements, but also a code of professional conduct and standards of practice. These standards create a common ground for actuarial analysis. Furthermore, a member of the Academy is subject to its disciplinary action for violations of the code and standards. This same requirement is specified in the SCHIP legislation at section 2103(c)(4)(A) of the Act. Moreover, the National Association of Insurance Commissioners (NAIC) imposes significantly stricter requirements on actuaries preparing the financial statements of insurance companies.

Comment: Several commenters asked for flexibility in the actuarial standards. One commenter specifically asked for flexibility in the use of methods and actuarial assumptions by permitting the use of internal data or normative claims databases.

Response: Section 1860D–11(c)(1) of the Act instructs the Secretary to ''establish processes and methods for determining the actuarial valuation of prescription drug coverage including.the use of generally accepted actuarial principles and methodologies''. To the extent it is possible under this paradigm to be flexible, we will be. Use of internal data or normative claims databases is not only acceptable, but encouraged. We will however, review the assumptions and results of your analysis for reasonableness and appropriateness.

Comment: One commenter asserted that being a member of the American Academy of Actuaries should be a requirement, but should not be sufficient by itself.

Response: Our policy position is to require that an actuary have the skills and experience to perform the actuarial certification required. Accordingly, in § 423.265(c)(3) we state that a ''qualified actuary must certify the plan's actuarial valuation, and must be a member of the American Academy of Actuaries to be deemed qualified.'' By requiring membership in the American Academy of Actuaries we are both requiring a minimal standard, and providing an additional assurance that the actuary will be qualified. For the latter comment, the Code of Professional Conduct for Actuaries states ''an Actuary shall perform Actuarial Services only when the Actuary is qualified to do so on the basis of basic and continuing education and experience.''

Comment: Two commenters expressed that there could be problems with the proposal that the costs associated with any increased utilization in the Part D basic benefit arising from enhanced alternative coverage would be included in the supplemental benefit portion of the bid. They assert that the application of this policy as it applies to the Part D program could be problematic because in many instances an enrollee will have supplemental coverage arising from another source that would not be part of enhanced alternative coverage of the sponsor or organization. One commenter gave the example of a beneficiary who may elect basic prescription drug coverage under a PDP or MA-PD plan and may also receive coverage under an employer/union group plan that wraps around the Part D benefit. They argue that in this case, if no supplemental benefits were included in the MA-PD plan or PDP, there would be no way to take into account in the bid the impact of any increased utilization unless it can be reflected in the bid for the basic benefit. This problem could be greater for special needs plans serving dually eligible beneficiaries who are eligible for substantial subsidies under the Part D program. In this instance, if no supplemental benefits are included in the MA-PD or PDP plan, the only avenue for taking increased utilization the may result from the subsidy into account would be the bid for the basic benefit. However, this could result in a bid above the benchmark that would produce a premium higher than the low-income premium subsidy resulting in an increase in the premium obligation for dual eligible enrollees. This situation could threaten the viability of a special needs plan.

Response: Plan bids will take into account the anticipated impact of induced utilization due to the structure of the plan benefit, other insurance coverage, and the low income subsidy. The impact of induced utilization will be addressed directly in the bid for enhanced alternative coverage. Note that this is for Part D only and is different from what is discussed for Part C in the Title II regulation. There are three major mechanisms for adjusting payment to account for the utilization of the actual enrolled population in any given plan, these are risk adjustment, reinsurance, and risk corridors. One intention of risk adjustment is to take into account the utilization of dual eligibles and adjust payment appropriately for the level of utilization in this population. For all bids, the anticipated impact of other insurance coverage on the bid and its effect on reinsurance will be taken into account. Risk corridors will serve to decrease the exposure of plans where allowed costs exceed plan payments for the basic Part D benefit.

4. Determining Actuarial Equivalency for Variants of Standard Coverage and for Alternative Coverage.

When considering the specific requirements for actuarial equivalence and valuation in the Act, we are aware that there is no official definition of actuarial equivalence. Moreover, the concept of actuarial equivalence is applied in multiple contexts. We must address actuarial equivalence requirements regarding cost sharing, expected benefits, and bid submissions. Thus, we are using interpretive guidance to further explain the process and methodology for determining actuarial equivalence and valuation. The processes and methods for determining actuarial equivalence and valuation would be in keeping with generally accepted actuarial principles. We would require prospective PDP sponsors and MA organizations wishing to offer MA-PD plans to include all of the requirements discussed in the following sections in the information submitted with the bid, when applicable. The MMA contains some specific requirements for actuarial equivalence or valuation. These actuarial equivalence tests are discussed below.

a. Actuarial Equivalence as Applied to Actuarially Equivalent Standard Coverage-Cost-Sharing

As required in section 1860D–2(b)(2)(A) of the Act, standard prescription drug coverage must have ''coinsurance for costs above the annual deductible . . . and up to the initial coverage limit that is equal to 25 percent; or is actuarially equivalent . . . to an average expected payment of 25 percent of such costs.'' We interpret this to mean that sponsors would be required to demonstrate that the actuarial value of their alternative cost-sharing as a percent of the actuarial value of both cost-sharing and plan payments for claims up to the initial coverage limit is the same percentage as for 25 percent coinsurance under defined standard coverage. In calculating these percentages, sponsors would reflect the utilization impacts of the two structures, but hold constant formulary (drug list), drug pricing (except to the extent that the plan incorporated differential pricing and cost sharing based on participation

status within the plan's network), and the group whose utilization is modeled. This would allow plans to have variable co-payments or coinsurance, including tiered structures for preferred and non-preferred drugs, in the initial coverage interval as long as the actuarial equivalence test is met. As a simple example, a plan could have a tiered coinsurance benefit with coinsurance higher than 25 percent for brand name drugs and lower than 25 percent for generics. Some beneficiaries with expenses between the deductible and the initial coverage limit would be expected to pay more than 25 percent, and others to pay less, depending on their usage of brand versus generic drugs. Overall, however, the total coinsurance would have to be actuarially equivalent to an average of 25 percent for all beneficiaries with expenses in this interval, even if the total expenditures beneath the initial coverage limit ($2,250 in 2006) are lower than would be expected under defined standard coverage (due to increased use of generics, for example).

If sponsors wanted to provide a variant on defined standard cost sharing after the out-of-pocket threshold is met, an actuarial test similar to that described above for variants on the 25 percent coinsurance would apply. In this case, based on the group of individuals projected to exceed the out-of-pocket threshold, the sponsor would compute total cost sharing once the true out-of-pocket (TROOP) threshold has been met as a percentage of the sum of that cost sharing plus the comparable plan payout. This percentage would have to equal the percentage computed in the same manner using the defined standard benefit (that is, the greater of $2/$5 or 5 percent). We note that any variant in cost sharing could not lead to discrimination against certain beneficiaries, for example, by increasing the cost sharing of a drug used for a particular illness well above the cost sharing for other drugs.

b. Tests for Alternative Coverage

As required by section 1860D–2(c) of the Act, sponsors offering alternative coverage, that is, benefit structures different from standard coverage, must satisfy five tests (three of the five are actuarial equivalency tests). As discussed in subpart C, alternative coverage would include coverage actuarially equivalent to defined standard coverage (basic alternative coverage) or coverage that would include supplemental coverage (enhanced alternative coverage). All alternative coverage would have to meet all five of the coverage standards or tests discussed in section b.1–5 of this preamble. Tests one through three were established by the Congress to ensure that alternative coverage would be at least actuarially equivalent to standard coverage. Tests four and five are additional tests imposed by the Congress through section 1860D–2(c) of the Act.

(1) Test for Assuring at Least Equivalent Value of Total Coverage

As required in section 1860D–2(c)(1)(A) of the Act, a plan could offer alternative prescription drug coverage as long as the actuarial value of total or gross coverage is at least equal to total or gross coverage provided under standard coverage. Based on a typical distribution of enrollee utilization, the average plan payout (including costs reimbursed by Medicare through the reinsurance subsidy) would have to be at least equal to the sponsor's estimate of the payout under defined standard coverage (holding various factors constant as described above under section 4.a.).

Alternative benefit structures, such as a decrease in the deductible with an increase in coinsurance below the initial coverage limit, or a lower initial coverage limit with a corresponding decrease in coinsurance, or a lower initial coverage limit with a corresponding decrease in deductible, could be accommodated as basic alternative coverage as long as the actuarial value of this coverage equaled that of defined standard coverage. Alternative structures could not increase the deductible or provide less than the protection offered against high out-of-pocket expenditures described in section 1860D–2(b)(4) of the Act. To the extent that the alternative coverage exceeds the value of defined standard coverage, the plan would be offering enhanced alternative coverage, that is, alternative coverage that includes supplemental benefits (as discussed in subpart C).

(2) Test for Assuring Equivalent Unsubsidized Value of Coverage

In section 1860D–2(c)(1)(B) of Act, a plan could offer alternative coverage as long as the unsubsidized value of coverage (the value of the coverage exceeding subsidy payments) is at least equal to the sponsor's estimate of unsubsidized value under defined standard coverage (holding various factors constant as described above section 4.a.). We interpret the unsubsidized value of coverage to mean the value of the benefit attributable to the beneficiary share of the premium.

There is a basic question about how this test could be applied during the plan review and approval process. In order to determine the unsubsidized value of coverage, one would have to know the projected reinsurance payments, and the value of the direct subsidy. While the projected reinsurance payments would be known at the time of the submission (since the actuarial value of the benefit is reduced by projected reinsurance payments to produce the bid), the value of the direct subsidy would not be known (since it would require computing the national weighted average bid and bids have not yet been approved). In the face of this problem, one approach could be to remove reinsurance payments as estimated by the sponsor and to use an estimate of the direct subsidy that we would provide. For instance, in the first year we might provide the estimate used for budgeting purposes, and in subsequent years, an estimate based on prior years' actual experience updated for trend. Additional guidance will be released concerning this matter.

Comment: Two commenters suggested that we should waive the second test of actuarial equivalence because if a plan meets all of the other tests the second test would be redundant, and without knowing the true value of direct subsidy the second test would be difficult to conduct.

Response: The second actuarial equivalence test for alternative coverage ensures the equivalent unsubsidized value of coverage. As we are defining this test, the beneficiary premium for alternative coverage must be greater than or equal to the beneficiary premium for standard coverage. Since beneficiary premiums will not be determinable until after all bids have submitted and applied against the national average bid, we interpret the application of this provision to be that the total Part D bid for alternative coverage must be greater than or equal to the sponsor's bid for defined standard coverage. We note that the first test of actuarial equivalence guarantees that the total value (including reinsurance) of coverage for the basic alternative benefit must be equal to the total value of coverage of the standard benefit. The second test then precludes a basic alternative benefit structure that increases government reinsurance costs relative to define standard coverage. We note that the test imposes no additional burden beyond the first test (that is, if you constructed a bid and shown that you meet test #1, you would already have all the information available to show whether you meet test #2). Given that the program is just beginning and we have no practical experience to show that the second test adds no value beyond the first test, we see no basis for waiving this test at this time.

(3) Test for Assuring Standard Payment for Costs at Initial Coverage Limit

Under section 1860D–2(c)(1)(C) of the Act, sponsors are to determine the average payout ''for costs incurred that are equal to the initial coverage limit'' for ''an actuarially representative pattern of utilization.'' This projected payout is compared to a dollar amount that is equal to what defined standard coverage would pay for someone with costs equal to the initial coverage limit. Given the comparison, this raises the question of what represents ''an actuarially representative pattern of utilization.'' As with the other tests, we believe that it would be reasonable for plans to use either anticipated plan utilization or a typical utilization pattern based on the Medicare population. However, given the implicit comparison to payout under defined standard for someone with costs equal to the initial coverage limit, it would not be valid to include individuals with expenses below the value of the initial coverage limit. After excluding individuals with total expenses below the value of the initial coverage limit, the plan would compute the actuarial value of plan payout at the point where total expenses are equal to the initial coverage limit under standard coverage. Under this interpretation, a plan could offer alternative coverage as long as the coverage is designed to provide an actuarial value of plan payout that is equal to at least 75 percent of costs between the standard deductible and initial coverage limit ($1,500 in 2006). In other words, considering only plan enrollees with expected expenses greater than or equal to the dollar value of the standard initial coverage limit, the plan would have to demonstrate that the expected plan payout associated with expenses equal to that dollar value would be at least 75 percent of benefit costs between the deductible and initial coverage limit (75 percent of $2,000 per beneficiary in CY 2006) including taking into account their expected behavioral response to the different benefit structure. This test, combined with the prohibition on increasing the deductible under alternative coverage (described below), would ensure that the benefit below the dollar level of the standard initial coverage limit is always actuarially equivalent to standard coverage. As a result, it is not permissible to trade off benefits above the initial coverage limit for benefits below.

(4) Test for Assuring the Deductible Does not Exceed the Standard Deductible

In keeping with the requirements of section 1860D 2(c)(2) of the Act, alternative coverage could not be structured so that the deductible is any higher than what it is in standard coverage ($250 in 2006).

(5) Test for Assuring the Same Protection Against High Out of-Pocket Costs

As specified by section 1860D–2(c)(3) of the Act, any alternative coverage must provide ''the coverage'' specified for costs above the catastrophic limit in standard coverage. We interpret this to mean that both enhanced and basic alternative coverage would have to offer at least the coverage available above the catastrophic limit through defined standard coverage. We would apply this test in the same way that we do for standard coverage with a variant of cost sharing above the catastrophic limit. That is, examining the group of individuals the sponsor projects would exceed the out-of-pocket threshold, total cost sharing once TROOP has been met, as a percentage of the sum of such cost sharing plus comparable plan payout, must be less than or equal to the percentage computed using the defined standard benefit (that is, the greater of $2/$5 or 5 percent). Again, we note that any variant in cost sharing could not lead to discrimination against certain beneficiaries, for example, by increasing the cost sharing of a drug used for a particular illness well above the cost sharing for other drugs.

c. Value of Qualified Coverage

In accordance with section 1860D–11(b)(2)(B) of the Act, with the bid, each PDP sponsor and MA organization offering an MA-PD plan must submit the actuarial value of qualified coverage in the region for the Part D eligible individual with a national average risk profile for the factors described in section 1860D–15(c)(1)(A) of the Act. We interpret this to mean that the weighted average of the plan's expected risk-standardized costs will represent the plan's cost for the theoretical national average-risk Part D individual. Any increase in costs attributable to increased utilization as the result of enhanced alternative coverage must be excluded from this calculation. Any alternative coverage that does not include supplemental coverage would be, by definition, actuarially equivalent to standard coverage. Any utilization effect that supplemental coverage has on the basic benefit should be priced into the supplemental portion of the bid.

Comment: One commenter wants to ensure that they have the ability to establish flat copayments rather than the 25 percent coinsurance of the standard design. We should permit Part D providers to round flat copayments to the nearest $5 dollar level, as these are the benefit designs commonly offered in the market place.

Response: Any copayment structure must meet the test for either actuarially equivalent standard coverage or for alternative coverage. These tests are available to allow for flexibility in benefit design including use of copays rather than coinsurance. While we would anticipate that some rounding would be consistent with these tests, rounding to the nearest $5 dollar level may create too great a difference between rounded and unrounded values.

Comment: One commenter stated that the regulation text should allow for the value of any enhanced benefit design to reflect both the potential impact of utilization changes and mix shifts to less expensive drugs. Any test of benefit value should also take into account the impact of utilization management, which may increase utilization, but have a favorable impact on total costs.

Response: To the extent that a benefit design other than that of defined standard coverage will have a projected impact on the mix of drugs, this impact will be included in the pricing of that proposed design. We anticipate that utilization management will be held constant in the pricing of defined standard and the proposed design, as well as the population modeled; drug formulary; and drug pricing (except to the extent that the proposed design incorporates differential pricing and cost sharing based on participation status within the plan's network). These issues will be fully discussed in our guidance on ''processes and methods using generally accepted actuarial principles and methodologies''.

5. Information Included with the Bid

a. Bid Format

The exact format for the bid submission is detailed in separate CMS guidelines with the bid submission tool. Section 1860D–11(c)(1)(D) of the Act specifies ''the use of generally accepted actuarial principles and methodologies.'' We require that an actuary (a member of the American Academy of Actuaries) certify the actuarial valuation, which may be prepared by others under his or her direction or review. Actuarial certification would give better assurance that the actuarial values in the bid were prepared in conformance with actuarial standards and methodologies. Section 1860D 11(c)(3)(B) of the Act permits use of outside qualified independent actuaries. We expect that plans would use outside actuaries, especially if they did not have qualified in-house actuaries.

As provided in section 1860D 11(b)(3) of the Act, we have developed (see Draft PDP Bid Instructions and Pricing Tool *http://www.cms.hhs.gov/pdps/*) the bid submission format to facilitate the submission of bids for multiple regions and in all regions, and we have taken this into account in process development. This approach would need to ensure that separate bids were provided for each region in order to calculate the national average monthly bid amount and any geographic adjustment required. Our overall approach would be to increase our flexibility to develop appropriate methodologies in response to program changes, while minimizing burden, rather than codifying these processes in regulation. We believe that we would have the authority to develop these methodologies through interpretive guidance because our regulations state that sponsors provide the actuarial value of their plans in accordance with generally accepted actuarial principles and methodologies.

In most cases the information included with the bid would be sufficient for our review of the acceptability of a proposed plan based on actuarial principles and for negotiation of terms and conditions of an entity's participation in the provision of Part D benefits. However, we may require additional information during the review to support the assumptions and methods accompanying the bid. As provided in section 1860D–11(b)(2) of Act and § 423.265(d) of this rule, the information that would accompany the bid submission would, at a minimum, include the following:

- Information on the prescription drug coverage to be provided, including the structure of the benefit, including deductibles, coinsurance (including any tiers), initial (or subsequent) coverage limits at which coinsurance levels change, and out-of-pocket thresholds. This would also include the plan's formulary, utilization management techniques, and any drugs, or types of drugs, excluded from coverage, and all documents provided to beneficiaries explaining the benefit, including the Evidence of Coverage, and would be certified by an officer of the plan. We solicit comments on the best way to obtain clear information on what drugs are included in the formulary.
- The actuarial value of the qualified prescription drug coverage in the region for a beneficiary with a national average risk profile certified by a qualified actuary.
- The portion of the bid attributable to basic benefits.
- The portion of the bid attributable to supplemental benefits, if applicable.
- The actuarial basis for the portion of the bid attributable to basic coverage and to supplemental benefits, if applicable, certified by a qualified actuary.
- The assumptions regarding reinsurance subsidy payments.
- The assumptions regarding administrative expenses.
- The plan's service area and the plan's network of pharmacies serving that service area.
- (For PDP sponsors only) the level of risk assumed in the bid, including whether the sponsor requires a modification of risk level (see discussion below) and, if so, the extent of the modification. Although our procedures may subsequently seek this information, we may only review it to the extent that the initial submission of bids does not yield the statutory minimum number of full risk bidders in each region and area. Our goal in designing the bidding process will be to maximize the level of risk borne by contracting plans and to minimize the need for fallback plans; and
- Any other information that we would require.

Response to public comment

Comment: Several comments were received concerning privacy protections for information submitted during the bidding process. Two manufacturers urged adoption of the ''restriction on use of information'' standard in § 423.322(b) for bidding information. Moreover, they believe that the Trade Secrets Act (18 USC § 1905) should apply and be inserted into the regulation to cover manufacturer pricing information. Three additional comments were received suggesting that we should limit our requests concerning specific pricing and cost information. These commenters while not referring to the Trade Secrets Act, did seek protection of any information submitted. Additionally, one pharmacy benefits manager and one health insurer expressed concern that bidding information will not be protected from disclosure under the Freedom of Information Act (FOIA).

Response: We believe that information submitted with the bid that is used to pay plans (such as estimations of reinsurance or administrative costs) would be protected under § 423.322(b) and sections 1860D–15(d)(2)(B) and 1860D–15(f)(2) of the Act. These sections protect information that is submitted to us for the purposes of carrying out section 1860D–15 of the Act. Because the direct subsidy in section 1860D–15(a) of the Act is based upon the plan's standardized bid amount, we believe that the portion of the standardized bid which is used in calculating that subsidy would be protected. On the other hand, information submitted with the bid that is not used in calculating the direct subsidy (such as the structure of the formulary or the utilization management techniques to be used by the applicant) would not be protected under sections 1860D–15(d)(2)(B) and 1860D–15(f)(2) of the Act. However, bidders can always seek to protect their information under the Freedom of Information Act and label truly proprietary information ''confidential'' or ''proprietary.'' When information is so labeled, the bidder is required to explain the applicability of the FOIA exemption they are claiming. When there is a request for information that is designated by the submitter as confidential or that could reasonably be considered exempt under Exemption 4, the Department is required by its FOIA regulation at 45 C.F.R. § 5.65(d) and by Executive Order 12,600 to give the submitter notice before the information is disclosed. To determine whether the submitter's information is protected by Exemption 4, the submitter must show that- (1) disclosure of the information is likely to impair the government's ability to obtain necessary information in the future; (2) disclosure of the information is likely to cause substantial harm to the competitive position of the submitter; or (3) the records are considered valuable commodities in the marketplace which, once released through the FOIA, would result in a substantial loss of their market value. Consistent with our approach under the Part C program, we would not release information under the Part D program that would be considered proprietary in nature or that would tend to stifle the availability of discounts or rebates from pharmaceutical manufacturers negotiated by Part D plans.

Bidders may identify trade secrets and confidential business information (CBI) with their submission. However, if they have not we will give them another chance when a FOIA request has been made on their records. In this case we will notify the business submitters that we are in receipt of FOIA requests for their records. We will then provide the business submitters with instructions and ask them to identify any trade secret or CBI in order to justify our application of Exemption 4. We will then review their justifications and highlighted information against FOIA case law to see if we can support their requested redactions. Under Executive Order 12600, if the business submitters

disagree with our Exemption 4 analysis (which includes their justification) of their identified trade secret or CBI, they are provided the opportunity to seek a restraining order or injunction in Federal court prohibiting us from releasing their records under FOIA.

Comment: One commenter suggested that Pharmacy Benefit Managers be required to disclose all rebate arrangements with manufacturers.

Response: It is unclear to whom the commenter wants rebate disclosed to and in what context. The comment was made in reference to bidding and in this case information on rebates will generally be limited to the aggregate level. However, per § 423.272 more detailed information may be reviewed if necessary to ensure the reasonableness and appropriateness of the bid. Uniform requirements for detailed rebate information would unnecessarily increase the burden of the bidder. Detailed rebate information will be collected for reasons other than the bid.

b. Risk Adjustment of Supplemental Premium

The portion of the bid attributable to supplemental benefits (part of enhanced alternative coverage defined in § 423.104(g)) represents the supplemental premium for a beneficiary with a national average risk profile. The payment process provided in section 1860D–15 of the Act will only address risk adjustment of the basic portion of the bid, and there are no other provisions for risk adjusting the supplemental benefit portion of the bid. If not addressed, this would result in plans with average risk scores above 1.0 being under-compensated by enrollees for supplemental benefits, and plans with average risk scores below 1.0 being over-compensated, as illustrated below.

TABLE F–1
SUPPLEMENTAL PREMIUM RISK ADJUSTMENT

	Plan A	*Plan B*	*Plan C*
Plan Average Risk Profile	0.80	1.00	1.10
1.0 Supplemental Premium	100	100	100
Supplemental Premium if Risk-Adjusted	80	100	110
Over or (under) compensation	$20.00	$0.00	$(10.00)

Table F–1 illustrates the case of three equally efficient plans that each estimate the cost of the same supplemental benefits at $100. Plan B has an average risk profile, that is, the arithmetic average of the risk scores of all of its enrollees is equal to 1.0. Plan A and Plan C, however, have healthier and sicker than average risk pools, with enrollee risk scores averaging .80 and 1.10, respectively. Plan A only needs an average risk-adjusted premium of $80 to meet the revenue requirements of providing those supplemental benefits to its healthier enrollees, but would receive $20 more on average from enrollees if it collects the whole $100 unadjusted premium. In contrast, Plan C needs to collect $10 more than it would receive from the unadjusted (1.0) premium to fully fund the expected needs of its sicker enrollees. Consequently, we will require additional information on the projected risk profiles of projected enrollees for accurate valuation of the supplemental portion of the bid with the bid submission. We intend, through the negotiation process, to reach agreement on a supplemental premium based on the bid submission that would account for the risk profile of enrollees and, thus, meet the plan's revenue requirements. Our goal is to maintain a level playing field that would facilitate the fair competition envisioned in the MMA. Review and approval of this information is discussed in section F.3. of this preamble.

c. Modification of Risk in PDP Bids

As provided under section 1860D–11(b)(2)(E) of Act and in § 423.265(d)(4), PDP sponsors may request a modification of certain risk sharing arrangements provided under section 1860D–15(e) of the Act, thus, becoming a limited risk plan. Modification of risk could include an increase in the Federal percentage assumed in the risk corridors or a decrease in the size of the risk corridors. Any modification of risk will have to apply to all PDP plans offered by a PDP sponsor in a region.

Section 1860D–11(b)(2)(E)(i) of the Act states that modification of risk will not be available to MA-PD plans. Therefore, in discussing the possibility of including in the bid a request for a modification of risk, we include only PDP sponsors. Limited risk plans will only be accepted if the access requirements in section 1860D–3(a) of the Act could not otherwise be met through the approval of a sufficient number of full risk plans. These requirements call for at least two qualifying plans offered by different entities, one of which must be a stand-alone prescription drug plan. If other bidders meet these requirements, a bid from a limited risk plan could not be approved and might not be reviewed.

Comment: The proposed rule offers no guidance as to what we view as ''minimal risk.''

Response: While the statute allows ''limited risk'' arrangements to be accepted in order to ensure that the access requirements are met, such arrangements must provide for more than a ''de minimis'' level of risk. We would generally consider anything below 10 percent risk as ''de minimis''. Any proposal for a level of risk above the ''de minimis'' but less than the standard full risk contract will be considered if there was a need to accept a ''limited risk'' arrangement.''

Comment: One commenter suggested that we should allow PDPs who wish to enroll low income subsidy beneficiaries to apply for limited risk, but be treated as a full risk plan.

Response: While it is unclear what the commenter meant by being ''treated as a full risk plan,'' while being limited risk, full risk plans get priority and we will only approve limited risk plans when there are not a sufficient number

of full risk plans to meet the access requirements of section 1860D–3(a). Also, per section 1860D–11(f)(1), approval of a limited risk plan is conditioned on not being able to meet the access requirements but for the approval of such a limited risk plan. Thus, if there are sufficient full risk plans, we will not approve limited risk plans regardless of whether the PDP wishes to specifically enroll low income subsidy beneficiaries.

Comment: One commenter expressed confusion over how the low-income cost sharing amounts enter into the bid ''calculation'' since these amounts help to satisfy revenue needs already identified by the plans as part of the bid. The commenter went on to state that during the early years of the program it will be difficult for plans to estimate the number of low-income beneficiaries expected to enroll and the amounts that would be paid on their behalf. They requested that we recognize that these estimates are likely to be subject to error and include statement in the preamble to the final rules that a good faith standard will apply to these estimates.

Response: The commenter is correct that the low-income subsidy is not part of the bid since it represents a subsidy for enrollee cost-sharing liability rather than plan liability. We ask for PDP sponsors' or MA-PD plans' estimate of their low-income subsidy to assist us in determining an interim payment for this subsidy, which is separate from the direct and reinsurance subsidies. Their actual low-income subsidy payment will be based on the actual experience for this group. Estimates will be reviewed for reasonableness and appropriateness using ''generally accepted actuarial principles and methodologies'' as instructed by 1860D–11(c)(1)(D) of the Act.

Comment: One commenter urged that bids include information on how plans will coordinate with SPAPs for Part D wraparounds at the point of sale.

Response: Specific information elements included in the bid submission tool are not part of the regulatory text and will be released in separate additional guidance on the bidding process.

Comment: One commenter urged us to specify that bids must include information on specific drugs in each formulary tier and their corresponding co-pays, in addition to any prior authorization requirements.

Response: Specific details concerning the response fields will be released with the guidance materials accompanying the bid pricing tool and the Plan Benefit Package; however, formulary tiering structures and prior authorizations requirements will be information that we will review.

Comment: One comment stated that we should provide a sample actuarial pricing form that illustrates the type of information desired.

Response: Additional guidance on actuarial pricing will be made available in a timely manner.

6. Review and Negotiation of Bid and Approval of Plans

a. Authority to Review Bids

We will review the information filed by the PDP sponsor or MA organization in order to conduct negotiations on the terms and conditions proposed in the bid. In addition to general authority to negotiate terms and conditions of the proposed bid submitted and other terms and conditions of a proposed plan, the MMA grants use of the authority to negotiate bids and benefits ''similar to'' the statutory authority given the Office of Personnel Management (OPM) in negotiating health benefits plans under the FEHBP program. We believe that the Congress used ''similar to'' in the statute because of the differences between the two programs. For example, while the OPM authority applies to level of benefits, standard Part D drug coverage is defined. With regard to rates, in some cases the context for FEHBP negotiations is not applicable to Part D. For example, the rates for community-rated plans under FEHBP are related to the rate the entity provides to similarly sized groups, and there is no comparable concept in Part D. Arguably the degree of competition among plans, and price signaling through premium and benefits, might be significantly greater in Part D than in FEHBP. Although these differences do exist there are also similarities. OPM is concerned about trend factors used to establish the premium for experience-rated plans, and we will have similar concerns about the reasonableness of a sponsor's trend assumptions. OPM is concerned about cost-sharing changes proposed by plans, and we will have similar concerns with regard to supplemental benefits. OPM wants to maintain high member satisfaction and ensure top quality service by plans, and we will have similar interests.

Chapter 89 of title 5 USC gives OPM broad discretion to negotiate prices and levels of benefits. For example, 5 USC 8902(i) states that OPM may negotiate with carriers if it believes the rates charged do not ''reasonably and equitably'' reflect the cost of the benefits provided. In addition, OPM has broad authority to negotiate the level of benefits, including the ability to prescribe ''reasonable minimum standards for health benefits plans.'' (See 5 USC 8902(e).) Notwithstanding our broad negotiating authority and our negotiating authority ''similar to'' that of OPM, to the maximum extent feasible and consistent with the appropriate discharge of our responsibilities, we prefer to rely on competition rather than negotiation.

We note that the bid requirements will be negotiated and a denial of a contract based on a failure to come to an agreement on the bid will not be appealable under the administrative procedures for appealing a contract denial beginning with reconsideration in § 423.645. Only the application requirements, which are separate and distinct from bid negotiation, can be appealed as detailed in subpart N.

Comment: One commenter urged that we conduct a thorough review of Part D providers' estimates of reinsurance to ensure a ''level playing field.''

Response: We will review estimates of reinsurance. Per section 1860D–11(c)(1) of the Act ''an actuarial valuation of the reinsurance subsidy payments'' will be conducted. Moreover, section 1860D–11(d) and (e) require a review of the entire bid including the estimates of reinsurance. Additional detail for this review will be released in documentation supporting the bid submission process.

b. Bid and Benefit Package Review

We have the authority to negotiate in four broad areas: (1) administrative costs; (2) aggregate costs; (3) benefit structure; and, (4) plan management, if dissatisfied with some or all aspects of bid submissions. We will evaluate administrative costs for reasonableness in comparison to other bidders and in comparison to a PDP sponsor's other lines of business. We will examine aggregate costs to determine whether the revenue requirements for qualified prescription drug coverage are reasonable and equitable. We will be interested in steps that the sponsor is taking to control costs, such as through various programs to encourage use of generic drugs. We will examine and discuss any proposed benefit changes. Finally, we will discuss indicators and any identified issues with regard to plan management, such as customer service.

In addition to the negotiation process, we will ensure that bids and plan designs meet statutory and regulatory requirements. In general, we will examine bids to determine whether the bid meets the standard of providing qualified prescription drug coverage, as described in § 423.104(b) of this rule and in subpart C of this preamble. We will examine the actuarial analysis accompanying the bid to ensure that it

has been prepared in accordance with our actuarial guidelines and properly certified. We will examine bids to determine whether the revenue requirements for qualified prescription drug coverage are accurate and reasonable, and that the requirements relating to actuarial determinations are met. We note that section 1860D–11(e)(2)(c) of the Act requires that the portion of the bid attributable to basic prescription drug coverage must be supported by the actuarial basis and reasonably and equitably reflect revenue requirements for benefits provided under the plan, less the sum of the actuarial value of reinsurance payments. We will also review the structure of premiums, deductibles, copayments, and coinsurance charged to beneficiaries and other features of the benefit plan design to ensure that it is not discriminatory. We will review cost sharing both above and below the out-of-pocket threshold with regard to its impact on groups of beneficiaries. We will also look to see that there is no differential impact on groups of beneficiaries by geographical location within the plan's region or service area attributable to different levels of cost sharing between preferred and non-preferred network providers.

As required under section 1860D–11(e)(2)(D)(i) of the Act and in § 423.272(b)(2), the structure of the benefit design (including cost sharing provisions and formulary design) must not be discriminatory; that is, it must not discourage enrollment by any Part D eligible enrollee on the basis of health status, including medical condition (related to mental as well as physical illness), claims experience, receipt of health care, medical history, genetic information, evidence of insurability, and disability. In general, this means that we will review benefit plans for features that, when applied, have differential impacts on beneficiaries with particular medical conditions. Factors we will consider in determining whether a benefit structure is discriminatory include, but are not limited to: (1) the benefit design—including the initial coverage limit, the tiered cost-sharing, the use of categories and classes in a formulary, and the choice of drugs provided in each category. (For example, if the tiered cost-sharing for drugs used to treat HIV is much higher than the cost-sharing for other types of drugs, we will view this benefit structure to be discriminatory); (2) the use of any discriminatory limits such as 90-day limits or requirements for pre authorization; and (3) supplemental benefits such as supplemental coverage of drugs that will encourage a healthier population to join the PDP. As provided in section 1860D–11(e)(2)(D)(ii) of the Act, plans using formulary designs based on categories and classes that are consistent with the guidelines established by the U.S.P. as discussed in subpart C, will be recognized as satisfying the non-discrimination design related to formulary structure as it pertains to categories and classes. However, adopting the USP model categories and classes will not prohibit us from reviewing other aspects, including the use of any limits or tiers, as discussed above.

c. Approval of the Supplemental Premium

As provided under section 1860D–11(e)(2)(C)(ii) of the Act, we will determine that the portion of the bid attributable to supplemental benefits reasonably and equitably reflects the revenue requirements for that coverage under the plan. Unless the supplemental portion of the bid (which is paid by the enrollee in the form of the supplemental premium) is risk adjusted for the average level of risk among enrollees, plans with average risk scores above or below 1.0 will be over compensated or under compensated by enrollees for supplemental benefits. Therefore, on the basis of this authority, we will require additional information, consisting of estimates of the projected risk scores of the plan's enrollees in the subsequent year, to be submitted by each plan for purposes of negotiating the appropriate risk adjustment of the supplemental portion of the bid. We will review and negotiate that information, and will approve a uniform supplemental premium reflecting the average risk factor for the plan's expected enrollment.

d. Rebate Reallocation for MA-PD plans

The negotiation process for MA-PD plans could include the resubmission of modified benefit structures (other than changes in that portion of their supplemental benefits related to drugs) once we know the outcome of the national average monthly bid calculation and its impact on beneficiary premiums. Part D drug benefits, including benefits offered through supplemental Part D coverage) could not be changed during this process because any changes will have an impact on government reinsurance payments and, therefore, on the portion of the bid related to basic drug benefits. The MMA requires that all MA bid and benefit package submissions be provided to us no later than the first Monday in June. In the prescription drug program enrollee premiums must be based on a percentage of the national average monthly bid amount that can only be calculated once all bids have been received, if not actually approved. (While the enrollment weights are determined from the previous year's reference month, the bid amounts are not.) Therefore, the prescription drug portion of benefit packages submitted by MA-PD plans will be based on estimates of monthly beneficiary premiums. Some of these MA-PD plans will have allocated portions of their Part C rebates to buy-down of the Part D premium. Once the final national average monthly bid amount and the base beneficiary premium have been calculated, some of these rebate allocations in the bids could be either excessive or insufficient to achieve the desired premium level.

Excessive rebate allocation will result in a portion of the rebate that is not provided to the beneficiary as required by law, since a premium of less than zero is not permitted. Compliance with the statute will require a reallocation of the excessive portion of the rebate credit back to other allowed uses of the Part C rebate, that is, to supplemental benefits (including reduced cost sharing other than cost sharing for Part D drugs) or to credits to the Part B or supplemental premiums. On the other hand, insufficient rebate allocation may result in minimal premiums that may be seen as burdensome by plans, enrollees, and the financial institutions managing electronic funds transfer.

The statute does not address this situation, but section 1860D–11 of the Act does grant us broad authority to negotiate the terms and conditions of the proposed bids and benefit plans. Our regulatory approach will be to allow the negotiation process for MA-PD plans to include the resubmission of modified benefit structures once the outcome of the premium finalization process is known. MA PD plans will be able to redistribute their Part C rebates to correct for the difference between the projected and final national average monthly bid amounts and to achieve the previously proposed level of Part D premiums. Under no circumstances could plans submit modified bids.

For example, an MA-PD organization submitted its bid and benefit package based on the assumption that the levels of the national average monthly bid amount and its prescription drug standardized bid will result in a $35.00 monthly beneficiary premium for basic coverage, and that it will use $35.00 of its Part C rebate to completely buy down the Part D premium. If the national average monthly bid amount is determined to be higher than expected, the plan's bid will end up below the

benchmark and its base beneficiary premium will be adjusted by subtracting the difference between the bid and national average monthly bid amount. Therefore, the plan's monthly beneficiary premium will be less than the projected premium, for instance, $34.00, and the $35.00 amount allocated from the Part C rebate for Part D premium buy-down will be excessive. In that case, we will require the MA organization to amend its benefit package to reallocate the excessive $1.00 of the Part C rebate credit to additional supplemental benefits (other than for Part D drugs) or to Part B or supplemental premium credits. These adjustments will be mandatory in order to ensure that the entire amount of the rebate was provided to the beneficiary in some form.
