Electronic Access

As has been the case since October 1, 2004, applicants can access, download and submit electronic grant applications for NOAA Programs through the Grants.gov website at <http://www.grants.gov>. These announcements will also be available at the NOAA web site <http://www.ofa.noaa.gov/amd/%SOLINDEX.HTML> or by contacting the program official identified below. However, applicants without internet access may still submit hard copies of their applications. The closing dates for applications filed through Grants.gov are the same as for the paper submissions noted in this announcement. For applicants filing through Grants.gov, NOAA strongly recommends that you do not wait until the application deadline date to begin the application process.

Getting started with Grants.gov is easy. Go to www.Grants.gov. There are two key features on the site: Find Grant Opportunities and Apply for Grants. Everything else on the site is designed to support these two features and your

use of them. While you can begin searching for grant opportunities for which you would like to apply immediately, it is recommended that you complete the remaining Get Started steps sooner rather than later, so that when you find an opportunity for which you would like to apply, you are ready to go.

Get Started Step 1 B Find Grant Opportunity for Which You Would Like to Apply

Start your search for Federal government-wide grant opportunities and register to receive automatic email notifications of new grant opportunities or any modifications to grant opportunities as they are posted to the site by clicking the Find Grant Opportunities tab at the top of the page.

Get Started Step 2 B Register with Central Contractor Registry (CCR)

Your organization will also need to be registered with Central Contractor Registry. You can register with them online. This will take about 30 minutes. You should receive your CCR registration within 3 business days. Important: You must have a DUNS number from Dun & Bradstreet before you register with CCR. Many organizations already have a DUNS number. To determine if your organization already has a DUNS number or to obtain a DUNS number, contact Dun & Bradstreet at 1-866-705-5711. This will take about 10 minutes and is free of charge. Be sure to complete the Marketing Partner ID (MPIN) and Electronic Business Primary Point of Contact fields during the CCR registration process. These are mandatory fields that are required when submitting grant applications through Grants.gov.

Get Started Step 3 B Register with the Credential Provider

You must register with a Credential Provider to receive a username and password. This will be required to securely submit your grant application.

Get Started Step 4 B Register with Grants.gov

The final step in the Get Started process is to register with Grants.gov. This will be required to submit grant applications on behalf of your organization. After you have completed the registration process, you will receive email notification confirming that you are able to submit applications through Grants.gov.

Get Started Step 5 B Log on to Grants.gov

After you have registered with Grants.gov, you can log on to Grants.gov to verify if you have registered successfully, to check application status, and to update information in your applicant profile, such as your name, telephone number, email address, and title. In the future, you will have the ability to determine if you are authorized to submit applications through Grants.gov on behalf of your organization.

NOAA Project Competitions

National Marine Fisheries Service (NMFS)

1. 2005 Atlantic Sea Scallop Research Set-Aside Program

SUMMARY DESCRIPTION: For fishing year 2005 (March 1, 2005 - February 28, 2006), the New England Fishery Management Council (Council) has set aside portions of the total allowable catch (TAC) and Days-at-Sea (DAS) allowance in the sea scallop fishery to be used for sea scallop research endeavors under a research set-aside (RSA) program. The RSA program provides a mechanism to fund research and compensate vessel owners through the sale of fish harvested under the research quota. Vessels participating in an approved research project may be authorized by the Northeast Regional Administrator, NMFS, to harvest and to land species in excess of any imposed trip limit or during fishery closures. Landings from such trips would be sold to generate funds that would help defray the costs associated with research projects. No Federal funds would be provided for research under this notification.

FUNDING AVAILABILITY: No Federal funds are provided for research under this notification, but rather the opportunity to fish and sell the catch to generate income. The Federal Government's contribution to the project will be a Letter of Authorization (LOA) that will provide special fishing privileges in response to sea scallop research applications selected to participate in this program. In the past, 2-5 awards have been issued. During the 2004 fishing year, the income generated ranged from \$64,140 to \$200,460 with an average of \$131,990.

National Environmental Policy Act (NEPA)

NOAA must analyze the potential environmental impacts, as required by the National Environmental Policy Act (NEPA), for applicant projects or applications which are seeking NOAA federal funding opportunities, including special fishing privileges. Detailed information on NOAA compliance with NEPA can be found at the following NOAA NEPA website: <http://www.nepa.noaa.gov>, including our NOAA Administrative Order 216-6 for NEPA, http://www.nepa.noaa.gov/NAO216_6_TOC.pdf, and the Council on Environmental Quality implementation regulations, http://ceq.eh.doe.gov/nepa/regs/ceq/toc_ceq.htm.

Consequently, as part of an applicant's package, and under their description of their program activities, applicants are required to provide detailed information on the activities to be conducted, locations, sites, species and habitat to be affected, possible construction activities, and any environmental concerns that may exist (e.g., the use and disposal of hazardous or toxic chemicals, introduction of non-indigenous species, impacts to endangered and threatened species, aquaculture projects, and impacts to coral reef systems). In addition to providing specific information that will serve as the basis for any required impact analyses, applicants may also be requested to assist NOAA in drafting of an environmental assessment, if NOAA determines an assessment is required. Applicants will also be required to cooperate with NOAA in identifying and implementing feasible measures to reduce or avoid any identified adverse environmental impacts of their application. The failure to do so shall be grounds for the denial of an application.
