This filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-free at (866) 208-3676, or for TTY, contact (202) 502-8659.

Any questions concerning this request may be directed to Kathy D. Fort, Manager of Certificates and Tariffs, Texas Gas Transmission, LLC, P.O. Box 20008, Owensboro, Kentucky 42304, or call (270) 688-6825.

Texas Gas states that Well 17041 has been operational as a storage well since May 1, 1980, drilled through an underground coal mine. On this basis, Texas Gas has determined that the risks associated with the continued operation of Well 17041 are too great. Texas gas proposes to plug and abandon Well 17041 to address the inherent safety concerns. Texas Gas points out that lateral lines associated with Well 17041 would be abandoned pursuant to Texas Gas's Blanket certificate. Texas Gas asserts that the operational capabilities of the Graham Lake Storage field would not be affected by the abandonment.
