SUPPLEMENTARY INFORMATION: The Fish and Wildlife Service is the Federal agency with the primary responsibility for managing migratory birds. Our authority is based on the Migratory Bird Treaty Act (MBTA) (16 U.S.C. 703 *et seq.*), which implements conventions with Great Britain (for Canada), Mexico, Japan, and the Soviet Union (Russia). Raptors (birds of prey) are afforded Federal protection by the 1972 amendment to the Convention for the Protection of Migratory Birds and Game Animals, February 7, 1936, United States—Mexico, as amended; the Convention between the United States and Japan for the Protection of Migratory Birds in Danger of Extinction and Their Environment, September 19, 1974; and the Convention Between the United States of America and the Union of Soviet Socialist Republics (Russia) Concerning the Conservation of Migratory Birds and Their Environment, November 26, 1976.

The taking and possession of raptors are strictly prohibited except as permitted under regulations implementing the MBTA. Activities with migratory birds are prohibited unless specifically authorized by regulation. Regulations governing the issuance of permits for migratory birds are authorized by the MBTA and subsequent regulations. They are in title 50, Code of Federal Regulations, parts 10, 13, 21, and 22. Raptors also may be protected by State and tribal regulations.

We plan to prepare an updated environmental assessment (EA) of the activities of falconry (covered in 50 CFR 21.28 and 21.29) and raptor propagation (50 CFR 21.30). We seek suggestions for issues and alternatives to be considered in the EA.

There also may be circumstances in which we would withhold from the record a respondent's identity, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment.
