DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

February 10, 2005.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Pub. L. 104-13. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), OIRA_Submission@OMB.EOP.GOV or fax (202) 395-5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250-7602. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling (202) 720-8681.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Animal Plant and Health Inspection Service

Title: Swine Health Protection.
OMB Control Number: 0579-0065.
Summary of Collection: Title 21, U.S.C. authorizes the Secretary and the Animal and Plant Health Inspection Service (APHIS) to prevent, control and

eliminate domestic diseases, as well as to take actions to prevent and manage exotic diseases such as hog cholera, foot-and-mouth disease, and other foreign diseases. Disease prevention is the most effective method for maintaining a healthy animal population and enhancing APHIS ability to compete in the world market of animals and the trade of animal products. Because of serious threat to the U.S. swine industry, Congress passed Pub. L. 96-468 "Swine Health Protection Act" on October 17, 1980. This law requires USDA to ensure that all garbage is treated prior to its being fed to swine that are intended for interstate or foreign commerce or that substantially affect such commerce. Garbage is one of the primary media through which numerous infections or communicable diseases of swine are transmitted. The Act and the regulations will allow only operators of garbage treatment facilities, which meet certain specification to utilize garbage for swine feeding. APHIS will use various forms to collect information.

Need and Use of the Information: APHIS collects information from persons desiring to obtain a permit (license) to operate a facility to treat garbage. Prior to issuance of a license, an inspection will be made of the facility by an authorized representative to determine if it meets all requirements of the regulations. Periodic inspections will be made to determine if licenses are meeting the standards for operation of their approved facilities. Upon receipt of the information from the Public Health Officials, the information is used by Federal or State animal health personnel to determine whether the waste collector is feeding garbage to swine, whether it is being treated, and whether the feeder is licensed or needs to be licensed.

Description of Respondents: Farms; business or other for profit.

Number of Respondents: 347.

Frequency of Responses: Recordkeeping; reporting: on occasion.

Total Burden Hours: 1,493.

Ruth Brown,

Departmental Information Collection Clearance Officer.

SUPPLEMENTARY INFORMATION:

Background

The Codex Alimentarius Commission (Codex) was established in 1962 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Codex is the major international standard-setting organization for protecting the health and economic interests of consumers and encouraging fair international trade in food. Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to ensure that the world's food supply is sound, wholesome, free from adulteration, and correctly labeled. In the United States, USDA, FDA, and the Environmental Protection Agency (EPA) manage and carry out U.S. Codex activities.

The Codex ad hoc Intergovernmental Task Force on Foods Derived from Biotechnology develops standards, guidelines and recommendations for foods derived from modern biotechnology or for traits introduced into foods by modern biotechnology, on the basis of scientific evidence and risk analysis, having regard, where appropriate, to other legitimate factors relevant to the health of consumers and the promotion of fair practices in the food trade.

Public Meeting

At the March 3, 2005 public meeting, attendees will have the opportunity to pose questions and offer comments on work to be undertaken by the Codex ad hoc Task Force on Foods Derived from Biotechnology. Written comments may be offered at the meeting or sent to Dr. Bernice Slutsky (See **ADDRESSES**). Written comments should state that they relate to activities of the proposed ad hoc Codex Intergovernmental Task
