See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (<http://www.ferc.gov>) under the "eFiling" link.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. k. *Description of Project:* Verdant intends to deploy, for study purposes, a temporary (18-month), underwater kinetic hydropower array that would be located near New York City in the East River. l. *Petition for Declaratory Intent:* Verdant Power asked that it be allowed to install and operate the facilities listed above, and to deliver power from the project into the facilities of Consolidated Edison New York, for a test period of 18 months, without a license under Part I of the Federal Power Act. The 18-month deployment would provide information about project operation and identify potential effects on environment resources in the East River as part of Verdant Power's effort in preparing a license application for a fully-developed project. Such a project would consist of a series of "free-flowing" bi-directional submersible turbines totaling between 5 and 10 MW that would convert mechanical power from the tidal currents of the East River into electrical power without constructing a dam, reservoir, penstock, or powerhouse.
