Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of

information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Cross-Site Accountability Assessment of the Residential Treatment for Pregnant and Postpartum Women and Their Minor Children Program (PPW)—New

The Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment (CSAT), has funded the Cross-Site Accountability Assessment of the Residential Treatment for Pregnant and Postpartum Women and Their Minor Children Program (PPW). In addition to assessing project activities, the purpose of the PPW is to expand the availability of comprehensive, high quality residential treatment services for pregnant and postpartum women who suffer from alcohol and other drug use problems, and for their infants and children impacted by the perinatal and environmental effects of maternal substance use and abuse.

Section 508 [290bb-1] (o) of the Public Health Service Act mandates the evaluation and dissemination of findings of residential treatment programs for pregnant and postpartum women. This cross-site accountability assessment will assess project activities implemented for these services.

With input from multiple experts in the field of women and children's treatment programs, the projects selected, by consensus, a common core of data collection instruments that will be used for program and treatment planning, local evaluations, and for this cross-site accountability evaluation. For mothers, five different interview instruments will be used: (1) Child Data Collection Tool, Part 1 (personal background) and Part 2 (infant and child background); (2) Child Well-Being Scale #24 (brief observation of mother/child interaction), (3) Ferrans and Powers Quality of Life Index; (4) BASIS 32 (behavioral health assessment); and (5) Allen's Barriers to Treatment. For children of all ages, program staff will collect information from observation, interview, and records review.

Children's data collection tools include: (1) Child Well-Being Scales (all children), (2) Denver Developmental Screening Inventory II (ages 1m-6y), (3) Middle Childhood Developmental Assessment Guide (ages 7-10), (4) Adolescent Development Assessment Guide (ages 11-17), and (5) the CRAFFT substance abuse screening instrument (ages 14-17). Additional records review will be conducted by program staff on all program participants at discharge.
