OSHA's recognition of NSF, or any NRTL, for a particular test standard is limited to equipment or materials (*i.e.*, products) for which OSHA standards require third party testing and certification before use in the workplace. Consequently, an NRTL's scope of recognition excludes any product(s) falling within the scope of a test standard for which OSHA has no NRTL testing and certification requirements.

Many UL test standards also are approved as American National Standards by the American National Standards Institute (ANSI). However, for convenience, we use the designation of the standards developing organization for the standard as opposed to the ANSI designation. Under our procedures, any NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard. You may contact ANSI to find out whether or not a test standard is currently ANSI-approved.

Programs and Procedures

The renewal would include NSF's continued use of supplemental programs 2, 4, 5, 8, and 9, two of which

are being added to NSF's scope in this current notice.

Program 2: Acceptance of testing data from independent organizations, other than NRTLs.

Program 4: Acceptance of witnessed testing data.

Program 5: Acceptance of testing data from non-independent organizations.

Program 8: Acceptance of product evaluations from organizations that function as part of the International Electrical Commission Certification Body (IEC-CB) Scheme.

Program 9: Acceptance of services other than testing or evaluation performed by subcontractors or agents.

OSHA developed these programs to limit how an NRTL may perform certain aspects of its work and to permit the activities covered under a program only when the NRTL meets certain criteria. In this sense, they are special conditions that the Agency places on an NRTL's recognition. OSHA does not consider these programs in determining whether an NRTL meets the requirements for recognition under 29 CFR 1910.7. However, these programs help to define the scope of that recognition.

Preliminary Finding on the Renewal

NSF has submitted an acceptable request for renewal of its recognition as an NRTL. Our review of the application file, the on-site review reports, and other pertinent documents, indicates that NSF can meet the requirements, as prescribed by 29 CFR 1910.7, for the renewal of the one site and the test standards and programs listed above. This preliminary finding does not constitute an interim or temporary approval of the application.

OSHA welcomes public comments, in sufficient detail, as to whether NSF has met the requirements of 29 CFR 1910.7 for the renewal of its recognition as a Nationally Recognized Testing Laboratory. Your comments should consist of pertinent written documents and exhibits. To consider a comment, OSHA must receive it at the address provided above (*see ADDRESSES*), no later than the last date for comments (*see DATES* above). Should you need more time to comment, OSHA must receive your written request for extension at the address provided above no later than the last date for comments. You must include your reason(s) for any request for extension. OSHA will limit any extension to 30 days, unless the requester justifies a longer period. We may deny a request for extension if it is frivolous or otherwise unwarranted. You may obtain or review copies of NSF's requests, the on-site review report, other exhibits, and all submitted

comments, as received, by contacting the Docket Office, Room N2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. You should refer to Docket No. NRTL2-98, the permanent record of public information on NSF's recognition.

The NRTL Program staff will review all timely comments and, after resolution of issues raised by these comments, will recommend whether to grant NSF's renewal request. The Assistant Secretary will make the final decision on granting the renewal and, in making this decision, may undertake other proceedings that are prescribed in Appendix A to 29 CFR Section 1910.7. OSHA will publish a public notice of this final decision in the **Federal Register**.

Interim Approval Subject to Review

Intertek Testing Services NA, Inc. (ITSNA), applied for expansion of its recognition, which OSHA approved on November 4, 2003 (68 FR 62479). One of the test standards (*See Exhibit 43 in Docket No. NRTL1-89*) that NSF requested was NFPA 72, Installation, Maintenance, and Use of Protective Signaling Systems. ITSNA has the necessary testing capability, but the standard was inadvertently excluded from the expansion. Therefore, OSHA is expanding the recognition of ITSNA to include this standard, but the Agency will provide interested parties an opportunity to comment since this standard was excluded in the notices that we published for the expansion. Comments submitted by interested parties must be received no later than March 15, 2005 at the address listed above. If we receive comments, OSHA will determine whether additional procedures are necessary.

Signed at Washington, DC this 18th day of February, 2005.

Jonathan L. Snare,

Acting Assistant Secretary.

BILLING CODE 4510-26-P

NUCLEAR REGULATORY COMMISSION

[Docket Number 030-19478]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment for Maxim Technologies, Inc., St. Louis, MO

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

FOR FURTHER INFORMATION CONTACT: Dr. Peter J. Lee, Division of Nuclear Materials Safety, U.S. Nuclear Regulatory Commission, Region III, 2443 Warrenville Road, Lisle, Illinois 60532-4352; telephone (630) 829-9870; or by e-mail at pjl2@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to terminate Material License No. 24-17152-02 issued to Maxim Technologies, Inc. (the licensee). The license amendment will approve the licensee's St. Louis, Missouri facility for unrestricted use.

The NRC staff prepared an Environmental Assessment in support of this license action in accordance with the requirements of Title 10, Code of Federal Regulations Part 51, "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions." Based on the Environmental Assessment, the NRC concluded that a Finding of No Significant Impact is appropriate. The amendment will be issued following the publication of this Notice.

II. EA Summary

The purpose of the proposed amendment is to terminate the licensee's byproduct material license and release its St. Louis, Missouri facility for unrestricted use. On October 14, 1983, the NRC authorized the licensee to conduct radiochemical analysis of environmental samples at the facility located at 12161 Lackland Road, St. Louis, Missouri. On April 17, 1989, the NRC authorized the unrestricted release of the 12161 Lackland Road, St. Louis, Missouri facility for unrestricted use and approved the licensee's current facility located at 1908 Innerbelt Business Center Drive, St. Louis, Missouri. On November 17, 2004, Maxim Technologies, Inc. submitted a license amendment requesting termination of its license and requesting release of its facility for unrestricted use. The licensee conducted surveys of the facility and provided information to the NRC to demonstrate that the site meets the license termination criteria in 10 CFR part 20, subpart E, "Radiological Criteria for License Termination," for unrestricted release. The NRC staff examined the licensee's request and the information provided in support of its request, including the surveys performed to demonstrate compliance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use," to ensure

that the NRC's decision is protective of the public health and safety and the environment.

III. Finding of No Significant Impact

On the basis of the Environmental Assessment, NRC concluded that there are no significant environmental impacts from the proposed amendment and determined not to prepare an environmental impact statement.

IV. Further Information

Documents related to this action, including the application for amendment and supporting documentation, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents. The ADAMS accession numbers for the documents related to this notice are: ML043240226 for the November 17, 2004, amendment request, and ML050460378 for the Environmental Assessment summarized above. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC's Public Document Room (PDR) Reference staff at 1-800-397-4209, 301-415-4737, or by e-mail to pdr@nrc.gov.

These documents may also be viewed electronically on the public computers located at the NRC's PDR, O 1 F21, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852. The PDR reproduction contractor will copy documents for a fee.

Dated at Lisle, Illinois, this 15th day of February 2005.

For the Nuclear Regulatory Commission.

Jamnes L. Cameron,

Chief, Decommissioning Branch, Division of Nuclear Materials Safety, Region III.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on the Medical Uses of Isotopes: Meeting Notice

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of meeting.

SUMMARY: The U.S. Nuclear Regulatory Commission will convene a meeting of the Advisory Committee on the Medical Uses of Isotopes (ACMUI) on April 20 and 21, 2005. A sample of agenda items

to be discussed during the public sessions includes: (1) Status of Rulemaking: Pt. 35 Training and Experience; (2) Status and Update: Redefining Medical Events; (3) Case Experience in Using I-125 Seeds as Markers; (4) FDA Radiation Dose Limits for Human Research Subjects Using Certain Radiolabeled Drugs, and (5) Establishing Guidance on Exceeding Dose Limits for Members of the Public who would serve as Caregivers to Persons undergoing Radiopharmaceutical Therapy. To review the agenda, see <http://www.nrc.gov/reading-rm/doc-collections/acmui/agenda/> or contact arm@nrc.gov. Furthermore, the ACMUI will brief the Commission regarding its activities, on April 20, 2005.

Purpose: Discuss issues related to 10 CFR 35, Medical Use of Byproduct Material.

Dates and Times for Public Meetings: April 20, 2005, from 8 a.m. to 5 p.m.; and April 21, 2005, from 10 a.m. to 5 p.m.

Address for Public Meetings: Bethesda North Marriott Hotel & Conference Center, 5701 Marinelli Road, North Bethesda, MD 20852. The precise room number where the meeting will be held will be announced in reader boards located throughout the hotel.

Date and Time for Closed Session Meeting: April 21, 2005, from 8 a.m. to 10 a.m. This session will be closed so that NRC staff can brief the ACMUI on sensitive information regarding protective security measures, and so that the ACMUI can discuss internal personnel matters.

Address for Closed Session Meeting: Bethesda North Marriott Hotel & Conference Center, 5701 Marinelli Road, North Bethesda, MD 20852. The precise room number where the meeting will be held will be announced in reader boards located throughout the hotel.

Date and Time for Commission Briefing: April 20, 2005, from 9:30 a.m. to 11:30 a.m.

Address for Commission Briefing: U.S. Nuclear Regulatory Commission, One White Flint North Building, Commissioners' Hearing Room 1G16, 11555 Rockville Pike, Rockville, MD, 20852-2738.

FOR FURTHER INFORMATION CONTACT: Angela R. McIntosh, telephone (301) 415-5030; e-mail arm@nrc.gov of the Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Conduct of the Meeting

Leon S. Malmud, M.D., will chair the meeting. Dr. Malmud will conduct the
