NUCLEAR REGULATORY COMMISSION

[Docket No. 040-08778]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment for Molycorp, Inc.'s Facility in Washington, PA

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

FOR FURTHER INFORMATION CONTACT: Tom McLaughlin, Project Manager, Decommissioning Directorate, Division of Waste Management and Environmental Protection, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; Telephone: (301) 415-5869; fax number: (301) 415-5398; e-mail: tgm@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of a license amendment to Molycorp, Inc. (Molycorp or licensee) for Materials License No. SMB-1393, to authorize an alternate decommissioning schedule for its facility in Washington, Pennsylvania. NRC has prepared an Environmental Assessment (EA) in support of this action in accordance with the requirements of 10 CFR Part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this Notice.

II. EA Summary

The purpose of this proposed action is to allow the licensee to decommission its facility in a phased approach which will take longer than the two year period identified in the approved

decommissioning plan (DP).

97Following an extensive supplemental characterization study, Molycorp found that there is a large volume of contaminated material in the subsurface. Molycorp will excavate the contaminated soils and transport them off-site to an NRC approved facility. Molycorp's proposed alternate decommissioning schedule shows that all decommissioning activities will be completed by the end of 2007. Molycorp's request is contained in a letter to NRC dated October 22, 2004.

An earlier, and more extensive, Environmental Assessment (EA) was prepared for License Amendment No. 5, in support of the NRC staff evaluation of Molycorp's final DP. The NRC staff determined that all steps in the proposed decommissioning could be accomplished in compliance with the NRC public and occupational dose limits, effluent release limits, and residual radioactive material limits. In addition, the staff concluded that approval of the decommissioning of the Molycorp Washington, PA, facility in accordance with the commitments in NRC license SMB-1393 and the final DP would not result in a significant adverse impact on the environment. The proposed action does not change the impacts analyzed in detail in the EA prepared for License Amendment No. 5.

If the NRC approves the license amendment, the authorization will be documented in an amendment to NRC License No. SMB-1393. However, before approving the proposed amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation Report in addition to the EA.

III. Finding of No Significant Impact

The staff has prepared the EA (summarized above) in support of Molycorp's proposed alternate decommissioning schedule. The NRC staff has concluded that there will be no adverse environmental impacts associated with granting Molycorp an alternate decommissioning schedule. The impacts associated with this proposed action do not differ significantly from the impacts evaluated in the EA for approval of the DP in License Amendment No. 5. On the basis of the EA, the NRC has concluded that the environmental impacts from the action are expected to be insignificant and has determined not to prepare an environmental impact statement for the action.
