

USDA with regard to quantity of leaf tobacco in all forms in the United States and Puerto, owned by or in the possession of dealers, manufacturers, growers' cooperative associations, and others with the exception of the original growers of the tobacco. The information furnished under the provisions of this Act shall be used only for statistical purposes for which it is supplied.

Need and Use of the Information: The basic purpose of the information collection is to ascertain the total supply of unmanufactured tobacco available to domestic manufacturers and to calculate the amount consumed in manufactured tobacco products. This data is also used for the calculation of production quotas for individual types of tobacco and for price support calculations. Without the information USDA would not be able to disseminate marketing information as directed and authorized in the Act.

Description of Respondents: Business or other for-profit.

Number of Respondents: 76.

Frequency of Responses: Reporting: quarterly.

Total Burden Hours: 278.

Ruth Brown,

Departmental Information Collection Clearance Officer.

United States Standards for Grades of Cucumbers

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice; withdrawal.

SUMMARY: The Agricultural Marketing Service (AMS) is withdrawing the notice soliciting comments on its proposal to amend the voluntary United States Standards for Grades of Cucumbers. After reviewing and considering the comments received, the Agency has decided not to proceed with this action.

EFFECTIVE DATE: March 11, 2005.

FOR FURTHER INFORMATION CONTACT: David Priester, Standardization Section, Fresh Products Branch, Fruit and Vegetable Programs, Agricultural Marketing Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 1661 South Building, STOP 0240, Washington, DC 20250-0240, Fax (202) 720-8871 or call (202) 720-2185; e-mail

David.Priester@usda.gov. The United States Standards for Grades of Cucumbers are available either through the address cited above or by accessing the Fresh Products Branch Web site at <http://www.ams.usda.gov/standards/stanfjfv.htm>.

Background

At a 2003 meeting with the Fruit and Vegetable Industry Advisory Committee, AMS was asked to review all the fresh fruit and vegetable grade standards for usefulness in serving the industry. AMS had identified the United States Standards for Grades of Cucumbers for a possible revision. The United States Standards for Grades of Cucumbers were last amended March 1, 1958.

On June 25, 2004, a notice requesting comments on the possible revision of the standards by incorporating industry terms as well as other changes was published in the **Federal Register** (69 FR 35572) with the comment period ending August 24, 2004.

Three comments were received during the official period for comment. One comment from a consumer did not support revising the standard. One comment from an industry member supported the inclusion of industry terms. The commenter stated, "I feel we should have two categories for Super Selects: #1 criteria being a 66-76 count and a #2 criteria being a 56-65 count." However, another industry member commented, "That the terms Super Select, Select, Small, Large and Plain are commonly used by the industry to convey the desired size, quality and condition of cucumbers but that the criteria for these terms are not consistently defined. This commenter noted that the meaning is often interpreted differently by various trading partners." This industry member further stated, "* * * that wholesale receivers and the greater produce industry would be better served if current trading practices were supported by a system of U.S. grade standards that establish reasonable parameters for size, consistency of size within packs and provide more meaningful definitions for quality and condition." However, the commenter did not include those definitions.

While some members of the industry agree that a consistency of size and specific count ranges would promote orderly marketing, different segments within the industry are divided over the meanings of industry terms. In view of the lack of any substantial consensus as to whether the proposed inclusion of industry terms would meet the needs of the entire industry, the notice is being withdrawn. The withdrawal of this

notice will provide industry representatives with an opportunity for further discussions in the areas of mutual concern.

After reviewing and considering the comments received, the Agency has decided not to proceed with the action. Therefore, the notice published June 25, 2004 (69 FR 35572), is withdrawn.

Authority: 7 U.S.C. 1621-1627.

Dated: March 7, 2005.

Kenneth C. Clayton,

Acting Administrator.

[Docket Number FV-04-311]

United States Standards for Grades of Kale

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice; request for public comment.

SUMMARY: The Agricultural Marketing Service (AMS) of the Department of Agriculture (USDA) is soliciting comments on its proposal to revise the United States Standards for Grades of Kale. This action is being taken at the request of the Fruit and Vegetable Industry Advisory Committee, which asked AMS to review the grade standards for possible revision. AMS is proposing to revise the standards to allow percentages to be determined by count rather than weight. AMS is also proposing to revise the application of tolerances for packages which contain less than 15 specimens. Additionally, based on a request from an industry group, the North American Perishable Agriculture Receivers (NAPAR), AMS is proposing to allow the standards to be used for kale leaves and bunches of leaves in addition to kale plants. The proposed revision would bring the standards for kale in line with current marketing practices, thereby improving the usefulness in serving the industry.

DATES: Comments must be received by May 10, 2005.

ADDRESSES: Interested persons are invited to submit written comments to the Standardization Section, Fresh Products Branch, Fruit and Vegetable Programs, Agricultural Marketing Service, U.S. Department of Agriculture, 1400 Independence Ave. SW., Room 1661, South Building, Stop 0240, Washington, DC 20250-0240; Fax (202)

720-8871, E-mail
 FPB.DocketClerk@usda.gov.

Comments should make reference to the dates and page number of this issue of the **Federal Register** and will be made available for public inspection in the above office during regular business hours. The United States Standards for Grades of Kale are available either through the address cited above or by accessing the Fresh Products Branch Web site at <http://www.ams.usda.gov/standards/stanfrfv.htm>.

FOR FURTHER INFORMATION CONTACT:

David L. Priester, at the above address or call (202) 720-2185; E-mail
 David.Priester@usda.gov.

SUPPLEMENTARY INFORMATION: Section 203(c) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627), as amended, directs and authorizes the Secretary of Agriculture "to develop and improve standards of quality, condition, quantity, grade and packaging and recommend and demonstrate such standards in order to encourage uniformity and consistency in commercial practices * * *" AMS is committed to carrying out this authority in a manner that facilitates the marketing of agricultural commodities and makes copies of official standards available upon request. The United States Standards for Grades of Fruits and Vegetables not connected with Federal Marketing Orders or U.S. Import Requirements no longer appear in the Code of Federal Regulations, but are maintained by USDA/AMS/Fruit and Vegetable Programs.

AMS is proposing to revise the voluntary U.S. Standards for Grades of Kale using procedures that appear in Part 36 Title 7 of the Code of Federal Regulations (7 CFR Part 36). These standards were last revised in 1934.

Background

Prior to undertaking research and other work associated with revision of the grade standards, AMS published a notice in the **Federal Register** (69 FR 58879) on October 1, 2004, soliciting comments on the possible revision to the United States Standards for Grades of Kale.

In response to our request for comments, AMS received one comment from an industry group, NAPAR. The comment was in favor of the proposed revision.

The proposed revision will allow percentages to be determined by count rather than weight. AMS is also proposing to revise the application of tolerances for packages which contain less than 15 specimens. This change will allow double the tolerances

specified, and that at least one defective specimen may be permitted in any sample, as long as the average for the entire lot is within the tolerance specified for the grade.

AMS also received a request from NAPAR to allow the standards to be used for kale leaves and bunched kale leaves in addition to kale plants. Currently the standards only apply to kale plants. This proposal will bring the standards for kale in line with current marketing practices, thereby, improving the usefulness of the standards in serving the industry.

The official grade of a lot of kale covered by these standards is determined by the procedures set forth in the Regulations Governing Inspection, Certification, and Standards of Fresh Fruits, Vegetables and Other Products (Sec. 51.1 to 51.61).

This notice provides for a 60-day comment period for interested parties to comment on changes to the standard.

Authority: 7 U.S.C. 1621-1627.

Dated: March 7, 2005.

Kenneth C. Clayton,

Acting Administrator.

[Docket Number FV-04-304]

United States Standards for Grades of Mangos

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice; request for public comment.

SUMMARY: The Agricultural Marketing Service (AMS) of the Department of Agriculture (USDA) is soliciting comments on the proposed voluntary U.S. Standards for Grades of Mangos. Members of the Fruit and Vegetable Industry Advisory Committee, the Fresh Produce Association of the Americas and other members of the mango industry have requested this action to be taken. The proposed standards would provide industry with a common language and uniform basis for trading, thus promoting orderly and efficient marketing of mangos.

DATES: Comments must be received by May 10, 2005.

ADDRESSES: Interested persons are invited to submit written comments to the Standardization Section, Fresh Products Branch, Fruit and Vegetable Programs, Agricultural Marketing

Service, U.S. Department of Agriculture, 1400 Independence Ave., SW., Room 1661, South Building, Stop 0240, Washington, DC 20250-0240, fax (202) 720-8871, e-mail

FPB.DocketClerk@usda.gov. Comments should make reference to the dates and page number of this issue of the **Federal Register** and will be made available for public inspection in the above office during regular business hours and on the Internet.

The draft of the United States Standards for Grades of Mangos is available by accessing AMS's home page on the Internet at: <http://www.ams.usda.gov/fv/fpbdoctlist.htm>.

FOR FURTHER INFORMATION CONTACT:

David L. Priester, at the above address or call (202) 720-2185, e-mail
 David.Priester@usda.gov.

SUPPLEMENTARY INFORMATION: Section 203(c) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627), as amended, directs and authorizes the Secretary of Agriculture "to develop and improve standards of quality, condition, quantity, grade and packaging and recommend and demonstrate such standards in order to encourage uniformity and consistency in commercial practices * * *." AMS is committed to carrying out this authority in a manner that facilitates the marketing of agricultural commodities and makes copies of official standards available upon request. The United States Standards for Grades of Fruits and Vegetables not connected with Federal Marketing Orders or U.S. Import Requirements, no longer appear in the Code of Federal Regulations, but are maintained by the USDA/AMS/Fruit and Vegetable Programs.

AMS is proposing to establish voluntary U.S. Standards for Grades of Mangos using the procedures that appear in part 36 title 7 of the Code of Federal Regulations (7 CFR part 36).

Background

On December 16, 2003, AMS published a notice in the **Federal Register** (68 FR 69984) soliciting comments for the possible development of U.S. Standards for Grades of Mangos. AMS received seven comments, one from a foreign government agency, two from trade organizations, three from importers, and one from growers and exporters. All of these comments supported the creation of U.S. standards.

Based on those comments, AMS has developed proposed grade standards for mangos. These standards contain sections pertaining to grades, sizes,
