

required to adhere to SSA rules concerning safeguards, access and use of the data.

RETENTION AND DISPOSAL:

Misuse data and contact information about misusers (payees) will be populated into RP/MRCS via a flat file produced by the Office of Systems from the Representative Payee System (RPS) using the criteria specified by section 205(j) of the Social Security Act. This flat file will also contain current beneficiary contact data from the Master Beneficiary Record and/or the Supplemental Security Income Record.

Once the data is loaded into RP/MRCS, field offices will develop the status of repayment of each misuse event and post resolution information. Management information regarding cases pending and cleared will be collected and reported, as will information about case resolution.

Data collected during the course of an RP/MCRS action is stored in a database on the Dallas Regional Office's Windows servers. Only a limited number of new records (those that were not recorded on RPS) will be added to the database. RP/MRCS will cover only misuse events related to the closed period of January 1, 1995, through the initial population of the database from SSA's Representative Payee System in April 2004.

Records in the system will be retained for 12 months after the final data are posted and then they will be archived.

[Docket No. NHTSA 2003-14467; Notice 2]

Michelin North America, Inc., Grant of Application for Decision That a Noncompliance Is Inconsequential to Motor Vehicle Safety

Michelin North America, Inc., (MNA) has determined that approximately 504 size P225/55R17 BFGoodrich Comp T/A VR4 tires do not meet the labeling requirements mandated by Federal Motor Vehicle Safety Standard (FMVSS) No. 109, "New Pneumatic Tires."

Pursuant to 49 U.S.C. 30118(d) and 30120(h), MNA has petitioned for a determination that this noncompliance is inconsequential to motor vehicle safety and has filed an appropriate report pursuant to 49 CFR Part 573, "Defect and Noncompliance Reports." Notice of receipt of the application was published, with a 30-day comment period, on February 27, 2003, in the **Federal Register** (68 FR 9113). NHTSA received no comment on this application.

FMVSS No. 109 (S4.3(e)) requires that each tire shall have permanently molded into or onto both sidewalls the actual number of plies in the sidewall, and the actual number of plies in the tread area if different.

The noncompliance with S4.3 (e) relates to the sidewall markings. MNA's Ardmore, Oklahoma plant produced approximately 504 tires with incorrect markings during the period from October 3, 2002, through October 5, 2002. The noncompliant tires were marked: "Tread Plies: 1 Polyester + 2 Steel + 1 Nylon, Sidewall Plies: 1 Polyester." The correct marking required by FMVSS No. 109 is as follows: "Tread Plies: 2 Polyester + 2 Steel + 1 Nylon, Sidewall Plies: 2 Polyester."
