SUPPLEMENTARY INFORMATION:

I. Abstract

The National Marine Fisheries Service proposes to conduct a survey to collect socio-economic data to strengthen the management, protection, and conservation of existing and proposed Marine Protected Areas (MPAs) in the U.S. Caribbean (Puerto Rico and U.S. Virgin Islands). MPAs are any area of the marine environment that has been reserved by Federal, State, territorial, tribal, or local laws or regulations to provide lasting protection for part or all of the natural and cultural resources therein. The survey intends to collect demographic, cultural, and economic information from communities that are dependent on the estuarine and marine resources for their livelihood. The proposed data collection is necessary to develop science-based criteria and protocols to identify and evaluate the economic impacts of management decisions. The information will be used to protect the sustainable use of estuarine and marine ecosystems for present and future generations. The information collected will also be used to satisfy legal mandates under Executive Order 13158, the Magnuson-Stevens Fishery Conservation Act, the National Marine Sanctuaries Act, the National Wildlife Refuge Administration Act, the Coastal Zone Management Act, the National Environmental Policy Act, and other pertinent statutes.

II. Method of Collection
