

authorized, the research will be authorized by this new permit and removed from Permit 1140. The purposes of the study are to (1) determine contaminant concentrations in fish, (2) understand bioaccumulation in juvenile salmon and determine site-specific factors, (3) analyze for the presence of physiological biomarkers, and (4) investigate the presence of indicators of exposure to environmental estrogens. The NWFSC would collect samples with seines or high speed rope trawls and is asking for authorization to handle juvenile fish and to intentionally kill some of them for pathogen prevalence and intensity, biochemical composition, histopathological attributes, and stomach content analyses.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the application, associated documents, and comments submitted to determine whether the application meets the requirements of section 10(a) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day comment period. NMFS will publish notice of its final action in the **Federal Register**.
