SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) is preparing and issuing Interim Staff Guidance (ISG) documents for fuel cycle facilities. These ISG documents provide clarifying guidance to the NRC staff when reviewing licensee integrated safety analyses, license applications or amendment requests or other related licensing activities for fuel cycle facilities under subpart H of 10 CFR part 70. The NRC is soliciting public comments on two ISG Draft documents (ISG-01 and -04) which will be considered in the final versions or subsequent revisions. ISG-03 has been issued and is provided for information.

II. Summary

The purpose of this notice is to provide the public an opportunity to review and comment on the Interim Staff Guidance documents for fuel cycle facilities. Draft Interim Staff Guidance-01, Version 02, provides guidance to NRC staff relative to methods for qualitative evaluation of likelihood in the context of a review of a license application or amendment request under 10 CFR part 70, subpart H. ISG-01, Version 02, has been generally revised based on NRC staff and public comments on the initial version. Interim Staff Guidance-03, Revision 0 has been approved and issued and provides guidance to NRC staff relative to relationships between 10 CFR part 70, subpart H, nuclear criticality safety performance requirements and the double contingency principle. Draft Interim Staff Guidance-04, Version 0 provides guidance to NRC staff relative to baseline design criteria for new facilities and new processes at existing facilities.
