

- Land Tenure Adjustments.

After gathering public comments, issues will be placed in one of three categories.

1. Issues to be resolved by the plan;
2. Issues resolved through policy or administrative action; or
3. Issues beyond the scope of this plan.

Rationale will be provided in the plan for each issue placed in category two or three. In addition to these major issues, a number of management questions and concerns will be addressed in the plan. The public is encouraged to help identify these questions and concerns during the scoping phase. An interdisciplinary approach will be used to develop the plan in order to consider the variety of issues and concerns identified. Disciplines involved in the planning process will include specialists with expertise in rangeland management, minerals and geology, outdoor recreation, archaeology, paleontology, wildlife, fisheries, wild horse & burro, weeds, lands and realty, hydrology, soils, engineering, fire, wilderness, hazardous materials, and social and economic. The BLM has identified some preliminary planning criteria to guide the development of the plan. The following planning criteria have been proposed to guide the development of the plan, to avoid unnecessary data collection and analyses, and to ensure the plan is tailored to issues. Other criteria may be identified during the public scoping process. Proposed planning criteria include the following:

- The plan will comply with all applicable laws, regulations and current policies.
- Broad-based public participation will be an integral part of the planning and EIS process.
- The plan will recognize valid existing rights.
- Areas with special designations as appropriate.
