Atlantic Highly Migratory Species; Environmental Assessment; Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; request for comments.

SUMMARY: NMFS announces the availability of an Environmental Assessment (EA) prepared pursuant to the National Environmental Policy Act to analyze the potential impacts associated with exempting six pelagic longline vessels from existing area closures and other regulations for the purpose of evaluating whether gear modifications and/or various fishing techniques can avoid/reduce bycatch and associated regulatory discards of juvenile highly migratory species (HMS) in the Gulf of Mexico, Florida East Coast, South Atlantic Bight, Mid-Atlantic Bight, and Northeast Coastal statistical areas of the Atlantic Ocean. The EA examines alternatives available to authorize activities otherwise prohibited by regulations for the conduct of scientific research and the investigation of bycatch, consistent with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), and other relevant Federal laws. NMFS is requesting comments on the alternatives outlined in the EA.

DATES: Written comments on this action must be received no later than 5 p.m., local time, on April 11, 2005.

ADDRESSES: Copies of the EA can be obtained by contacting Heather Stirratt (see **FOR FURTHER INFORMATION CONTACT**) or by viewing the document online at <http://www.nmfs.noaa.gov/sfa/hms/>.
