

tugboats (HTSUS 8901.90), double-hulled liquid barges (HTSUS 8901.20) and articulating tug barges for domestic and international customers. Foreign components that would be used at the shipyard (up to 30% of total purchases) include: diesel engines (HTSUS 8408.10), stern tubes (8483.30), reduction gears (8483.40), shaft grounding systems and seals (8483.90), generators (8501.62, 8501.63), overflow alarms (8531.90), tank washing machines (8537.10), valve remote operators (8537.10), tank gauging systems (8537.10), and ACCU automation/steering systems (8537.10) (duty rates: 1.3 4.5%). The request indicates that Senesco will not admit any foreign-origin steel mill products to the zone for use in FTZ manufacturing activity.

FTZ procedures would exempt Senesco from Customs duty payments on the foreign components used in export activity. On its domestic sales, the company would be able to choose the duty rate that applies to finished oceangoing vessels (duty free) for the foreign-origin components noted above. Duties would be deferred or reduced on foreign production equipment admitted by Senesco to the zone until which time it becomes operational. The manufacturing activity conducted under FTZ procedures would be subject to the "standard shipyard restriction" applicable to foreign-origin steel mill products (e.g., angles, pipe, plate), which requires that full Customs duties be paid on such items.

SUPPLEMENTARY INFORMATION:

Background

At the request of interested parties, the Department of Commerce (the Department) initiated administrative reviews of the antidumping duty orders on antifriction bearings and parts thereof from France, Germany, Italy, Japan, Singapore, and the United Kingdom for the period May 1, 2003, through April 30, 2004. See *Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part*, 69 FR 39409 (June 30, 2004). The

preliminary results of reviews are currently due no later than April 1, 2005. See *Antifriction Bearings and Parts Thereof From France, Germany, Italy, Japan, Singapore, and the United Kingdom: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Reviews*, 70 FR 3676 (January 26, 2005).

Extension of Time Limit for Preliminary Results of Reviews

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department to make a preliminary determination within 245 days after the last day of the anniversary month of an order for which a review is requested and a final determination within 120 days after the date on which the preliminary determination is published. If it is not practicable to complete the review within these time periods, section 751(a)(3)(A) of the Act allows the Department to extend the time limit for the preliminary determination to a

maximum of 365 days after the last day of the anniversary month.

We determine that it is not practicable to complete the preliminary results of these reviews within the original time limit because of the number of companies involved in these reviews, the complex issues surrounding the model-match methodology, and the additional time we need to conduct verifications. Therefore, we are extending the time period for issuing the preliminary results of these reviews by an additional 26 days, until April 27, 2005, which is 331 days after the last day of the anniversary month of the order.

This notice is published in accordance with section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2).

Dated: March 29, 2005.

Barbara E. Tillman,

Acting Deputy Assistant Secretary for Import Administration.
