SUPPLEMENTARY INFORMATION:

Background

The Codex Alimentarius Commission (Codex) was established in 1962 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Codex is the major international standard-setting organization for protecting the health and economic interests of consumers and encouraging fair international trade in food. Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to ensure that the world's food supply is sound, wholesome, free from adulteration, and correctly labeled. In the United States, USDA, FDA, and the Environmental Protection Agency (EPA) manage and carry out U.S. Codex activities.

The Codex Ad Hoc Intergovernmental Task Force on Foods Derived from Biotechnology develops standards, guidelines, and recommendations for foods derived from modern biotechnology or for traits introduced into foods by modern biotechnology. The standards, guidelines, and recommendations are developed on the basis of scientific evidence and risk analysis, having regard, where

appropriate, for other legitimate factors relevant to the health of consumers and the promotion of fair practices in the food trade.
