**Title:** NESHP for Marine Tank Vessel Loading Operations (Renewal).

**Abstract:** This information collection request addresses Clean Air Act information collection requirements in standards published at 40 CFR part 63, subpart Y, which have mandatory recordkeeping and reporting requirements. The information collected under these requirements concern compliance with emissions standards relating to loading of marine tank vessels with petroleum and gasoline. Records collected under the National Emission Standards for Hazardous Air Pollutants (NESHP) must be retained by the owner or operator for at least five years, so that the records can be shown to inspectors when requested. In general, the required collections consist of emissions data and other information deemed not to be private (40 CFR 63.15).

Delegated states and EPA Regional Offices use the information collected under these requirements to determine compliance with the NESHP. In the absence of such information collection requirements, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.
