

The Exchange also proposed a technical change to an example noted in Exchange Rule 1080(c)(iv)(A) to reflect decimal pricing.

III. Discussion and Commission Findings

The Commission has reviewed carefully the proposed rule change, as amended, and finds that it is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.⁸ In particular, the Commission finds that the proposed rule change is consistent with section 6(b)(5) of the Act,⁹ which requires that the rules of an exchange be designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national securities system, and, in general, protect investors and the public interest.

The Commission believes that the proposal automating the execution of certain market orders that currently are handled manually by the specialist will provide more efficient and immediate executions.¹⁰ In addition, the Commission believes that the three-second order exposure feature for inbound limit orders when the Exchange's disseminated price is not the NBBO, along with the automatic execution of unexecuted contracts up to the Exchange's disseminated size when the Exchange's disseminated price becomes the NBBO and the automatic routing through Linkage of unexecuted contracts when the Exchange's disseminated price is not the NBBO, will provide an effective means for avoiding trade-throughs. The Commission further believes that it is consistent with the Act for the Exchange to cancel automatically broker-dealer marketable limit orders in instances where the Exchange's disseminated quote is not the NBBO.

Finally, the Commission believes that the automated handling of market orders to sell when the bid price is zero should also provide more efficient executions of such orders.

⁸In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁹ 15 U.S.C. 78f(b)(5).

¹⁰The Commission notes that the proposed rule change does not alter the Exchange's rules on priority or trade allocation. According to the Exchange, orders that are executed automatically on the Phlx are allocated to participants on parity in accordance with the allocation algorithm set forth in Exchange Rule 1014(g)(vii). Telephone conversation between Richard S. Rudolph, Vice President and Counsel, Exchange, and Nancy J. Sanow, Assistant Director, Division of Market Regulation, Commission, on April 11, 2005.

The Exchange has requested accelerated approval of the proposed rule change. The Commission notes that a portion of the proposed rule change is similar to rules previously approved by the Commission for another exchange.¹¹ The Commission also notes that the Exchange's proposed rule change was subject to the full comment period, with no comments received, and accelerated approval of the proposed rule change, by increasing the automation of order handling, should help facilitate more efficient and immediate executions of transactions on the Exchange.

Accordingly, the Commission finds good cause, pursuant to section 19(b)(2) of the Act¹² for approving the proposed rule change, as amended, prior to the thirtieth day after the date of publication of notice thereof in the **Federal Register**.

IV. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act,¹³ that the proposed rule change (SR-Phlx 005-03), as amended, be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.¹⁴
