Narrowbanding for Private Land Mobile Radio Service

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document specifies the procedures by which forty Private Land Mobile Radio (PLMR) channels, which are located in frequency bands that are allocated primarily for Federal use, are

to transition to narrower, more spectrally efficient channels in a process commonly known as “narrowbanding.” We take this action because the National Telecommunications and Information Administration (NTIA) has adopted a more rapid narrowbanding schedule in the 150.05–150.8 MHz, the 162.0125–173.2 MHz and 173.4–174 MHz (162–174 MHz), and the 406.1–420 MHz bands (collectively, the Federal bands) than the Commission has required for its licensees.

DATES: Effective May 27, 2005.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission’s *Report and Order*, ET Docket No. 04–243, FCC 05–69, adopted on March 10, 2005, and released on March 11, 2005. Summary of the Report and Order

1. The Commission amended parts 2 and 90 of its rules to revise our transition plan for primary and secondary PLMR operations in certain Federal bands. The Commission concluded that these actions will provide for an orderly transition from wideband (25 kHz channels) to narrowband (12.5 kHz channels) operations, increase spectrum efficiency, maintain compatibility with Federal operations, permit PLMR licensees to operate using existing equipment with greater confidence that their critical operations will not be suddenly required to cease transmissions, and significantly reduce the probability that wideband PLMR operations will interfere with new Federal operations. Specifically, the Commission narrowbanded 25 Hydrological and Meteorological (Hydro) channels, nine Forest Firefighting and Conservation channels (two of these channels are available to conservation agencies, while all nine are available for firefighting use), two Public Safety channels, three medical
