

application of 30 CFR 75.1100-2(e)(2) (Quantity and location of firefighting equipment) to its Cherry Tree Mine (MSHA I.D. No. 36-09224) located in Clearfield County, Pennsylvania. The petitioner requests a modification of the existing standard to permit the use of an alternative method of compliance for firefighting equipment at temporary electrical installations. The petitioner proposes to use two (2) fire extinguishers or one fire extinguisher of twice the required capacity at all temporary electrical installations in lieu of one fire extinguisher and 240 pounds of rock dust. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

5. FMC Corporation

[Docket No. M-2005-001-M]

FMC Corporation, Box 872, Green River, Wyoming 82935 has filed a petition to modify the application of 30 CFR 57.22305 (Approved equipment (III mines)) to its FMC Trona Mine (MSHA I.D. No. 48-00152) located in Sweetwater County, Wyoming. The petitioner requests a modification of the existing standard to permit the use of a portable Leica DISTO laser distance meter in by the last open bread or face areas of the mine. The petitioner requests the use of an alternative method so that the equipment in areas covered by 30 CFR 57.22305 can be used safely. The petitioner states that examinations for methane in the mine atmosphere will be conducted prior to utilizing the laser distance meter and at a minimum every ten minutes during use; employees will complete a training form and will be instructed in the requirements for using the equipment; and that the equipment will not be operated in 1.0% or more methane. The petitioner asserts that the safety of the miners will not be reduced because ergonomic safety will be increased since the surveys will be better able to determine mining distances to the face that cannot safely be measured due to the roof being unbolted.
