

material license and release its Henrietta Street and Jasper Street facilities for unrestricted use. On April 24, 1958, the Atomic Energy Commission authorized the licensee to conduct the radiological operations. The primary radioactive materials used at Henrietta Street and Jasper Street facilities were H-3, C-14, P-32, P-33, S-35, and I-125. On January 26, 2005, the licensee submitted a license amendment request to amend its license to release its Henrietta Street and Jasper Street facilities for unrestricted use. The licensee has conducted surveys of the facility and provided information to the NRC to demonstrate that the site meets the license termination criteria in 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use."

The staff has examined the licensee's request and the information provided in support of its request, including the surveys performed to demonstrate compliance with the release criteria. Based on its review, the staff has determined that there are no additional remediation activities necessary to complete the proposed action and a Finding of No Significant Impact is appropriate.

III. Finding of No Significant Impact

The staff has prepared an EA in support of the proposed action. The staff has found that the environmental impacts from the proposed action are bounded by the impacts evaluated in the "Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Facilities" (NUREG-1496). On the basis of the EA, the NRC concluded that there are no significant environmental impacts from the proposed amendment and determined not to prepare an environmental impact statement.
