

Transmittal No. 05-10**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act****Annex
Item No. vii****(vii) Sensitivity of Technology:**

1. The Guided Bomb Unit (GBU-28) is a special weapon that was developed for penetrating hardened facilities located deep underground. The GBU-28 is a 5,000-pound laser-guided conventional munition. The GBU-28 bomb body (BLU-113) weighs 4,637 pounds, contains 630 pounds of high explosives, is 14.5 inches in diameter and almost 19 feet long. It is fitted with a derivative of the GBU-27 Laser Guided Bomb guidance kit and airfoil group. The GBU-28 is classified Secret.

2. Weapon accuracy is dependent upon target illumination with a laser designator and precision guidance of the munitions to a spot of laser energy reflected from the target.

3. A weapon system operator uses a laser target illuminator and then guides the munitions to the spot of reflected energy reflected from the target. Elements in the overall guidance bomb unit that are essential for successful employment include the following five sections: explosive, penetration warhead, guidance control unit, fuze and fin stabilizer.

4. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
