c. What is the appropriate frequency of disinfecting and flushing aircraft water systems?

d. Should aircraft that obtain all of their water from another public water system be classified as a "consecutive" public water system that can obtain reduced monitoring requirements under EPA's regulations (40 CFR 141.29)?

e. How should EPA address aircraft water from foreign sources?

f. What should be done to address the low disinfectant residual levels in the drinking water found on a high percentage of aircraft?
