SUPPLEMENTARY INFORMATION: The National Wildlife Refuge System Improvement Act of 1997 requires that all lands within the National Wildlife Refuge System (NWRS) are to be managed in accordance with an approved CCP. The CCP guides management decisions and identifies refuge goals, long-range objectives, and strategies for achieving refuge purposes. Each refuge in the NWRS has specific purposes for which it was established. Those purposes are used to develop and prioritize management goals and objectives within the NWRS mission and to guide which public uses will occur on a given refuge.

The planning process will consider many elements including wildlife and habitat management, habitat protection and acquisition, wilderness preservation, public recreational activities, and cultural resource protection. Public input into the planning process is essential. The planning process is a way for the Service and the public to evaluate refuge management goals and objectives for the best possible conservation efforts of this important wildlife habitat. Concurrently, this process is also providing for wildlife-dependent recreation opportunities that are compatible with each refuge's establishing purposes and the mission of the NWRS.

Bosque del Apache National Wildlife Refuge is located in Socorro County, New Mexico, and encompasses 57,191 acres along the Rio Grande near Socorro, New Mexico. The heart of the Refuge is about 12,900 acres of moist bottomlands of which 3,800 acres are active floodplain of the Rio Grande and 9,100 acres are areas where water is diverted to create extensive wetlands, farmlands, and riparian forests. The rest of the Refuge is made up of arid foothills and mesas. Most of these desert lands are preserved as wilderness areas. The CCP will provide other agencies and the public with a clear understanding of the desired conditions for the Refuge and how the Service will implement management strategies for the conservation and development of these natural resources.

The Service, through this notice of intent, formally begins the comprehensive conservation planning process for Bosque del Apache National Wildlife Refuge. The Service requests input on any and all issues concerning management or public recreation. Comments regarding the protection of threatened and/or endangered species, migratory birds, native species, and their habitats are encouraged. The Service is equally interested in receiving public input in the following areas:

- What makes this Refuge special for you?
- What Refuge projects or activities interest you most?
- What problems or issues do you see affecting management or public use of the Refuge?
