

entire input may not be reflective of actual prices.

These concerns, along with a general effort by the Department to examine its long-standing policies, have prompted the Department to review its practice concerning the use of prices paid by a respondent to market economy input suppliers. The appendix to this notice describes two broad approaches for revising the Department's practice in this area. The first approach would use market economy prices for inputs, but would limit their use to the valuation of the imported portion of the input only. Under the second approach, the Department would continue to use market economy import prices to value an entire input if it found the quantity of imports to be meaningful, but would apply certain criteria for determining what constitutes a "meaningful" amount. We invite comment on these and any other options regarding the Department's practice concerning market economy inputs in NME antidumping cases.

Comments

Persons wishing to comment should file a signed original and six copies of each set of comments by the date specified above. The Department will consider all comments received before the close of the comment period. Comments received after the end of the comment period will be considered, if possible, but their consideration cannot be assured. The Department will not accept comments accompanied by a request that a part or all of the material be treated confidentially because of its business proprietary nature or for any other reason. The Department will return such comments and materials to the persons submitting the comments and will not consider them in the development of any changes to its practice. All comments responding to this notice will be a matter of public record and will be available for public inspection and copying at Import Administration's Central Records Unit, Room B-099, between the hours of 8:30 a.m. and 5 p.m. on business days. The Department requires that comments be submitted in written form. The Department recommends submission of comments in electronic form to accompany the required paper copies. Comments filed in electronic form should be submitted either by e-mail to the webmaster below, or on CD-ROM, as comments submitted on diskettes are likely to be damaged by postal radiation treatment.

Comments received in electronic form will be made available to the public in Portable Document Format (PDF) on the

Internet at the Import Administration Web site at the following address: <http://ia.ita.doc.gov/>.

Any questions concerning file formatting, document conversion, access on the Internet, or other electronic filing issues should be addressed to Andrew Lee Beller, Import Administration Webmaster, at (202) 482-0866, email address: webmaster-support@ita.doc.gov.

Dated: May 19, 2005.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Appendix

(1) Is it appropriate for the Department to change its regulations and end its long-standing practice of using market economy import prices to value an entire input? For example, should the Department use market economy import prices to value only the portion of the input that was imported, and use surrogate country prices to value the remainder of the input?

(2) Assuming the Department continues its long-standing practice of using market economy import prices to value an entire input, what should the threshold be for the share or volume of a given input sourced from market economy suppliers to qualify as "meaningful" in order for the import price to be used to value all of the input?

(3) Please provide any additional views on any other matter pertaining to the Department's practice concerning the use of market economy import prices.
