SUPPLEMENTARY INFORMATION: The proposal Federal actions is to plan and construct a drainage system for the San Luis Unit. This proposed action would meet the needs of the San Luis Unit for

drainage service, fulfill the requirements of the February 2000 Court Order, and be completed under the authority of Public Law 86-488. The Draft EIS evaluates seven action alternatives in addition to a No Action alternative: In-Valley Disposal, In-Valley Groundwater Quality Land Retirement, In-Valley Water Needs Land Retirement, In-Valley Drainage Impaired Area Land Retirement, Ocean Disposal, Delta-Chippis Island Disposal, and Delta-Carquinez Strait Disposal. All of the alternatives would include common elements: On-farm and in-district actions, drainwater collection systems, regional reuse facilities, the Firebaugh sumps, and land retirement of at least 44,106 acres. In addition to the common elements, the action alternatives (except Ocean Disposal) involve varying levels of drainwater treatment (by reverse osmosis and/or biological selenium treatment) and/or additional land retirement. Reclamation has not identified an agency preferred action alternative and the environmentally preferred alternative in the Draft EIS. Reclamation has identified the resources to be evaluated in the Draft EIS to include surface water resources, groundwater resources, biological resources, selenium bioaccumulation, geology and seismicity, energy resources, air resources, agricultural production and economics, land use and soil resources, recreational resources, cultural resources, aesthetics, regional economics, and social issues and environmental justice. Reclamation has determined that the action alternatives were unlikely to affect traffic and transportation, noise, utilities and public services, and Indian Trust Assets.
