

demonstrating capacity and competency, and other guidance to laboratories that are interested in participating in the Lab QA Program, are provided at [http://www.epa.gov/safewater/lt2/cla\\_final.html](http://www.epa.gov/safewater/lt2/cla_final.html).

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA is soliciting comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

**Burden Statement:** The burden estimate for the Lab QA Program information collection includes all the burden hours and costs required for gathering information, and developing and maintaining records associated with the Lab QA Program. The annual public reporting and record keeping burden for this collection of information is estimated for a total of 65 respondents. For each respondent, an average of 19 hours is estimated per response, with 3.3 responses per year, for a total of 3,980 hours at a cost of \$166,393. The average cost per response is estimated at \$776 per response. The proposed frequency of responses is three times a year for analysis and reporting of PT samples and once every three years for the on-site evaluation. This estimate assumes that laboratories participating in the Lab QA program have the necessary equipment needed to conduct the analyses. Therefore, there are no start-up costs. The estimated total annual capital costs is \$0.00. The estimated Operation and Maintenance (O&M) costs is \$108,504.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a

Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.
