**II. Did EPA Approve the Application?**

The Agency approved the applications after considering all required data on risks associated with the proposed use of (Z)-6-Heneicosen-11-one, Harpin $\alpha\beta$  Protein, and *Alternaria destruens* strain 059, and information on social, economic, and

environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemicals and their patterns of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of (Z)-6-Heneicosen-11-one, Harpino $\beta$  Protein, and *Alternaria destruens* strain 059 when made in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.
