SUPPLEMENTARY INFORMATION:

I. Abstract

The Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*) imposed prohibitions against the taking of endangered species. Section 10 of the ESA allows permits authorizing the taking of endangered species for research/enhancement purposes. The corresponding regulations established procedures for persons to apply for such permits. In addition, the regulations set forth specific reporting requirements for such permit holders.

The regulations contain two sets of information collections: (1) Applications for research/enhancement permits, and (2) reporting requirements for permits issued.

The required information is used to evaluate the impacts of the proposed activity on endangered species, to make the determinations required by the ESA prior to issuing a permit, and to establish appropriate permit conditions. To issue permits under ESA section 10(a)(1)(A), the National Marine Fisheries Service (NMFS) must determine that (1) such exceptions were applied for in good faith, (2) if granted and exercised will not operate to the disadvantage of such endangered species, and (3) will be consistent with the purposes and policy set forth in section 2 of the ESA.

The currently approved application and reporting requirements are being revised to apply only to Pacific salmon and steelhead, as requirements regarding other species are being addressed in a separate information collection. Clarification of some of the narrative will also be provided, based on previous applicants' responses and submitted applications and reports.

II. Method of Collection

Respondents have a choice of either electronic or paper forms. Methods of submittal include e-mail of electronic forms, and mail and facsimile transmission of paper forms.

I. Abstract

Native Americans are allowed to conduct certain aboriginal subsistence whaling in accordance with the provisions of the International Whaling Commission (IWC). In order to respond to obligations under the International Convention for the Regulation of Whaling, and the IWC, captains participating in these operations must submit certain information to the

relevant Native American whaling organization about strikes on and catch of whales. Anyone retrieving a dead whale is also required to report. Captains must place a distinctive permanent identification mark on any harpoon, lance, or explosive dart used, and must also provide information on the mark and self-identification information. The relevant Native American whaling organization receives the reports, compiles them, and submits the information to NOAA.

The information is used to monitor the hunt and to ensure that quotas are not exceeded. The information is also provided to the International Whaling Commission, which uses it to monitor compliance with its requirements.

II. Method of Collection

Reports may be made by phone or fax. Information on equipment marks must be made in writing. No form is used.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Marine Fisheries Service (NMFS) Northeast Region manages Northeast (NE) multispecies and herring fisheries of the Exclusive Economic Zone (EEZ) of the Northeastern United States through the NE Multispecies and Herring Fishery Management Plans (FMPs). The New England Fishery Management Council prepared the FMPs pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson Act). The regulations implementing the FMPs are specified under 50 CFR 648.80 and 648.200

The recordkeeping and reporting requirements at § 648.80(d)(9) and (e)(8) form the basis for this collection of information. NMFS Northeast Region requests information from Category 1 herring vessel owners/operators in order to facilitate enforcement of haddock possession limits and monitor the bycatch of haddock in the herring fishery. The failure to collect information on Category 1 herring vessel activity or collecting it less frequently could undermine efforts to facilitate enforcement. This information is important in determining the impact of herring vessel operations on groundfish fishing mortality. The information is a prior notification of landing submitted through a vessel monitoring system (VMS). The cost of operation and installation of the VMS for Category 1 herring vessels is accounted for under OMB Control Number 0648-0404. This information, upon receipt, results in an increasingly more efficient and accurate database for management and monitoring of fisheries of the Northeastern U.S. EEZ.

II. Method of Collection

Information is collected electronically through the vessel's VMS.
