Background and Purpose

As we stated in the original notice and request for public comments (69 FR 63979, Nov. 3, 2004), the City of Fall River, Massachusetts, has petitioned the Coast Guard to promulgate regulations establishing thermal and vapor dispersion exclusion zone requirements for liquefied natural gas (LNG) spills on water. The City asks that these

regulations be similar to Department of Transportation regulations for LNG spills on land, contained in 49 CFR 193.2057 (Thermal radiation protection) and 193.2059 (Flammable vapor-gas dispersion protection).

In our original notice, we provided a public comment period that ended February 1, 2005. Near the end of that comment period, we received a letter from the Attorney General of Rhode Island that read in part: " * * I wish to emphasize that my office is waiting for the completion of a Threat Analysis * * *. I am formally requesting that the public comment period in this docket remain open for an additional sixty (60) days to allow for consideration of [that] report." In response to that request, on March 10, 2005, the Coast Guard published the notice reopening the comment period (70 FR 11912).

The Coast Guard has since been informed that the report, "LNG Facilities in Urban Areas" was not released until May 9, 2005—the day the docket was scheduled to close. On May 24, 2005, the report was filed in the docket: Clark Report, Item 76 in docket USCG-2005-19615.

The Coast Guard was requested to reopen the comment period again, so that the report may be reviewed and comments on it may be submitted to the docket. In response to this request, the Coast Guard is reopening the comment period.

The public is invited to review the referenced report and other material contained in the docket and to submit relevant comments by August 22, 2005. The Coast Guard will consider the City's petition, any comments received from the public, and other information to determine whether or not to initiate the requested rulemaking.

Dated: June 13, 2005.

Howard L. Hime,

Acting Director of Standards, Marine Safety, Security & Environmental Protection.
