SUPPLEMENTARY INFORMATION:

Background

On March 11, 1967, the Indiana bat was listed as an endangered species following establishment of the Endangered Species Preservation Act on October 15, 1966 (Act). The gray bat was listed as an endangered species on April 28, 1976. Because of these listings, the bats are protected by the Act's prohibition against "take." The Act defines "take" to mean: to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in such conduct. "Harm" is further defined by regulation as any act that kills or injures wildlife including significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavior patterns, including breeding, foraging, or roosting (50 CFR 17.3). Of the numerous species of bats native to Indiana, the Indiana bat (*Myotis sodalis*) and the gray bat (*Myotis grisescens*) are the only two bat species that are designated as federally and state endangered.
