I. Executive Summary

The Department of Commerce (DoC)
Demonstration Project utilizes many
features similar to those implemented
by the National Institute of Standards
and Technology (NIST) demonstration
project in 1988. The DoC Demonstration
Project supports several key objectives:
To simplify the classification system for
greater flexibility in classifying work
and paying employees; to establish a
performance management and rewards
system for improving individual and
organizational performance; and to
improve recruitment and retention to
attract highly qualified candidates. The
project is designed to test whether the
interventions of the NIST project, which
is now a permanent alternative
personnel system, could be successful
in other DoC environments. The current
participating organizations include the
Office of the Chief Financial Officer and
Assistant Secretary for Administration
(CFO/ASA), the Technology
Administration, the Bureau of Economic
Analysis, the Institute for
Telecommunication Sciences, and three
units of the National Oceanic and
Atmospheric Administration: Office of
Oceanic and Atmospheric Research,
National Marine Fisheries Service, and

the National Environmental Satellite,
Data, and Information Service.

II. Basis for Project Plan Modification

(1) Employees of two bargaining units
within the Office of the Chief Financial
Officer and Assistant Secretary for
Administration (CFO/ASA) have
requested participation in the DoC
Demonstration Project. The Washington
Printing and Graphic Communications
Union (WPGC), Local 1-C of the
Graphic Communications International
Union, AFL-CIO, has requested
inclusion. This unit consists of all
employees engaged in printing and
production work, in the Publications
and Graphics Division, Office of
Administrative Services (OAS), located
in Washington, DC. The American
Federation of Government Employees,
Local 2186, AFL-CIO, has requested
inclusion. This unit consists of Police
Officers and Security Guards in the
Office of Security (OSY), located in
Boulder, Colorado. Appropriate
consultations have been conducted with
officials of both locals, and all
employees have received a specific
briefing on the demonstration project.
Management will also notify the
employee organizations representing
these employees and provide all
employees with a copy of this **Federal
Register** notice upon publication.

(2) The Space Environment Center
(SEC) currently consists of 50
employees who are participating in the
project whose duty location is Boulder,
Colorado. The SEC is an organizational
component of the Office of Atmospheric
Research (OAR), which is a component
of the National Oceanic and
Atmospheric Administration (NOAA).
In order to improve organizational
efficiency, NOAA realigned the SEC
from OAR to the National Weather
Service (NWS), another organizational
component of NOAA. The duty location
of these employees remains Boulder,
Colorado. Appropriate consultations
with the National Weather Service
Employees Organization (NWSEO) were
conducted. All employees of the Space
Environment Center have received a
specific briefing on this realignment of
the demonstration project. Management
also notified the employee organizations
representing these employees and will
provide all employees with a copy of
this **Federal Register** notice upon
publication.

No other organizational components
of NWS are participating in the project.
The SEC remains a separate and distinct
organization consisting solely of
employees participating in the project.
