## NUCLEAR REGULATORY COMMISSION

### Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

**AGENCY:** U.S. Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of the OMB review of information collection and solicitation of public comment.

**SUMMARY:** The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a current valid OMB control number.

1. *Type of submission, new, revision, or extension:* Revision.

2. *The title of the information collection:* 10 CFR part 32—Specific Domestic Licenses to Manufacture or Transfer Certain Items Containing Byproduct Material.

3. *The form number if applicable:* NRC Form 653, 653A, and 653B, “Transfers of Industrial Devices Report.”

4. *How often the collection is required:* There is a one-time submittal of information to receive a license. Renewal applications are submitted every 10 years. In addition, recordkeeping must be performed on an on-going basis, and reports of transfer of byproduct material must be reported every 5 years, and in a few cases, every year.

5. *Who will be required or asked to report:* All specific licensees who manufacture or initially transfer items containing byproduct material for sale or distribution to general licensees or persons exempt from licensing.

6. *An estimate of the number of responses:* 4147 (650 responses + 275 recordkeepers for NRC licensees and 2522 responses + 700 recordkeepers for Agreement State licensees).

7. *The estimated number of annual respondents:* 975 (275 NRC licensees and 700 Agreement State licensees).

8. *An estimate of the number of hours needed annually to complete the requirement or request:* 135,741 (36,623 hours for NRC licensees [5,225 hours reporting, or an average of 8 hours per response + 31,398 hours recordkeeping, or 114 hours per recordkeeper] and 99,118 hours for Agreement State licensees [20,863 hours reporting, or an average of 8.3 hours per response + 78,255 hours recordkeeping, or an average of 112 hours per recordkeeper]).

9. *An indication of whether Section 3507(d), Pub. L. 104-13 applies:* Not applicable.

10. Abstract: 10 CFR part 32 establishes requirements for specific licenses for the introduction of byproduct material into products or materials and transfer of the products or materials to general licensees or persons exempt from licensing. It also prescribes requirements governing holders of the specific licenses. Some of the requirements are for information which must be submitted in an application for a specific license, records which must be kept, reports which must be submitted, and information which must be forwarded to general licensees and persons exempt from licensing. In addition, 10 CFR part 32 prescribes requirements for the issuance of certificates of registration (concerning radiation safety information about a product) to manufacturers or initial transferors of sealed sources and devices. Submission or retention of the information is mandatory for persons subject to the 10 CFR part 32 requirements. The information is used by NRC to make licensing and other regulatory determinations concerning the use of radioactive byproduct material in products and devices.
