[Docket No. 50-244]

R.E. Ginna Nuclear Power Plant, LLC, R.E. Ginna Nuclear Power Plant; Notice of Receipt and Availability for Comment of Request Regarding Release of Part of Site for Unrestricted Use

AGENCY: U.S. Nuclear Regulatory
 Commission.

ACTION: Notice of receipt and
 availability for comment.

DATES: Comments must be provided in
 writing by August 10, 2005.

FOR FURTHER INFORMATION CONTACT:

Patrick D. Milano, Senior Project
 Manager, Section 1, Project Directorate
 I, Division of Licensing Project
 Management, Office of Nuclear Reactor
 Regulation, U.S. Nuclear Regulatory
 Commission, Washington, DC 20555.
 Telephone: 301-415-1457; fax no.: 301-
 415-2102; e-mail: pdm@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission
 (NRC) has received, by letter dated May
 20, 2005, an application filed by R. E.
 Ginna Nuclear Power Plant, LLC (Ginna
 LLC) requesting the release of a part of
 the site for unrestricted use at its R. E.
 Ginna Nuclear Power Plant (Ginna
 Plant), located in Wayne County, New
 York. An NRC administrative review,
 documented in a letter to Ginna LLC
 dated June 29, 2005, found the request
 acceptable to begin a technical review.
 Before approving the proposed partial
 site release, the NRC will need to
 determine that the licensee has met the
 criteria set forth in Section 50.83,
 "Release of part of a power reactor
 facility or site for unrestricted use," of
 Part 50 of Title 10 of the Code of Federal
 Regulations (10 CFR 50.83). The tract of
 land proposed for release consists of
 two adjacent parcels, comprising a total
 of approximately 15 acres located along
 the western edge of the Ginna Plant site
 boundary, and is entirely outside of the
 Exclusion Area. The release of the part
 of the site would allow Ginna LLC to
 convey the tract of land under a
 Purchase and Sale Contract dated
 September 10, 2002, that was assumed
 from the former licensee of the Ginna
 Plant. Pursuant to this contract
 agreement, the land would be sold to a
 real estate developer for the purpose of
 developing the land for residential use.
 No physical changes to the Ginna Plant
 facility or operational changes are being
 proposed in the application.

The NRC will approve an application
 for partial release of a non-impacted
 area, if it determines that the licensee
 has adequately evaluated the effect of
 releasing the property and has
 adequately justified the classification of
 any release areas as non-impacted.

II. Opportunity To Provide Comments

The NRC is providing notice to
 individuals in the vicinity of the facility
 that the NRC is in receipt of this request,
 and will accept written comments
 concerning this proposal by August 10,
 2005. The comments must be submitted
 to the Secretary, U.S. Nuclear
 Regulatory Commission, Washington,
 DC 20555-0001, Attention: Rulemakings
 and Adjudications Staff, and should cite

the publication date and page number of this **Federal Register** notice.

Furthermore, before acting upon this request for approval submitted in accordance with 10 CFR 50.83, the NRC will schedule and conduct in the near future a public meeting in the vicinity of the Ginna Plant for the purpose of obtaining public comments on the proposed release of the part of the site. The NRC will consider and, if appropriate, respond to these written and verbal comments, but such comments will not otherwise constitute part of the decisional record. Comments received after public meeting will be considered if practicable to do so, but only those comments received on or before the public meeting can be assured consideration.

III. Further Information

Documents related to this action, including the application for approval and supporting documentation, are available for public inspection at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Southern Nuclear Operating Company (SNC); Notice of Withdrawal of Application for Amendment to Renewed Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of SNC (the licensee) to withdraw its application dated July 20, 2004, for a proposed amendment to Renewed Facility Operating License Nos. DPR-57 and NPF-5 for the Edwin I. Hatch Nuclear Plant, Units 1 and 2, respectively, located in Appling County, Georgia.

The proposed amendment would have revised the Administrative Controls Section 5.3.1 of the technical specifications and replaced the specific designation for the Health Physics Superintendent with a reference to the senior individual in charge of Health Physics, and to add flexibility to the qualification requirements for the unit staff positions.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on September 28, 2004 (69 FR 57993). However, by letter dated June 27, 2005, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated July 20, 2004, and the licensee's letter dated June 27, 2005, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. NUCLEAR REGULATORY COMMISSION

[Docket No. 50-259]

Tennessee Valley Authority; Browns Ferry Nuclear Plant, Unit 1; Notice of Consideration of Issuance of Amendment to Facility Operating License and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-33, issued to Tennessee Valley Authority (the licensee), for operation of the Browns Ferry Nuclear Plant (BFN), Unit 1, located in Limestone County, Alabama.

The proposed amendment would change the BFN, Unit 1, operating license to increase the maximum authorized power level from 3293 megawatts thermal (MWT) to 3952 MWT. This change represents an increase of approximately 20 percent above the current maximum authorized power level. The proposed amendment would also change the BFN, Unit 1, licensing bases and any associated Technical Specifications for containment overpressure, the maximum ultimate heat sink temperature, and the upper bound peak cladding temperature.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

Within 60 days after the date of publication of this notice, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for
