

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Part 484

[CMS-1301-P]

RIN 0938-AN44

Medicare Program; Home Health Prospective Payment System Rule Update for Calendar Year 2006

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would set forth an update to the 60-day national episode rates and the national per-visit amounts under the Medicare prospective payment system for home health agencies. We are also proposing to implement the revised area labor market Metropolitan Statistical Area designations for calendar year 2006.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on September 6, 2005.

ADDRESSES: In commenting, please refer to file code CMS-1301-P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of three ways (no duplicates, please):

1. *Electronically.* You may submit electronic comments on specific issues in this regulation to <http://www.cms.hhs.gov/regulations/ecomments>. (Attachments should be in Microsoft Word, WordPerfect, or Excel; however, we prefer Microsoft Word.)

2. *By mail.* You may mail written comments (one original and two copies) to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-1301-P, P.O. Box 8016, Baltimore, MD 21244-8016.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments (one original and two copies) before the close of the comment period to one of the following addresses. If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786-7195 in advance to schedule your arrival with one of our staff members.

Hubert H. Humphrey Building, Room 445-G, 200 Independence Avenue, SW., Washington, DC 20201; or 7500 Security Boulevard, Baltimore, MD 21244-1850.

(Because access to the interior of the HHH Building is not readily available to persons without Federal Government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT:

Randy Thronset, (410) 786-0131.
Sharon Ventura, (410) 786-1985.

SUPPLEMENTARY INFORMATION:

Submitting Comments: We welcome comments from the public on all issues set forth in this rule to assist us in fully considering issues and developing policies. You can assist us by referencing the file code CMS-1301-P and the specific "issue identifier" that precedes the section on which you choose to comment.

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. CMS posts all electronic comments received before the close of the comment period on its public Web site as soon as possible after they have been received. Hard copy comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1-800-743-3951.

I. Background

[If you choose to comment on issues in this section, please include the caption "BACKGROUND" at the beginning of your comments.]

A. Statutory Background

The Balanced Budget Act of 1997 (BBA) (Pub. L. 105-33), enacted on August 5, 1997, significantly changed the way Medicare pays for Medicare home health services. Until the implementation of a home health

prospective payment system (HH PPS) on October 1, 2000, home health agencies (HHAs) received payment under a cost-based reimbursement system. Section 4603 of the BBA governed the development of the HH PPS.

Section 4603(a) of the BBA provides the authority for the development of a PPS for all Medicare-covered home health services provided under a plan of care that were paid on a reasonable cost basis by adding section 1895, entitled "Prospective Payment For Home Health Services," to the Social Security Act (the Act).

Section 1895(b)(1) of the Act requires the Secretary to establish a PPS for all costs of home health services paid under Medicare.

Section 1895(b)(3)(A) of the Act requires that (1) the computation of a standard prospective payment amount include all costs of home health services covered and paid for on a reasonable cost basis and be initially based on the most recent audited cost report data available to the Secretary, and (2) the prospective payment amounts be standardized to eliminate the effects of case-mix and wage levels among HHAs.

Section 1895(b)(3)(B) of the Act addresses the annual update to the standard prospective payment amounts by the home health applicable increase percentage as specified in the statute.

Section 1895(b)(4) of the Act governs the payment computation. Sections 1895(b)(4)(A)(i) and (b)(4)(A)(ii) of the Act require the standard prospective payment amount to be adjusted for case-mix and geographic differences in wage levels. Section 1895(b)(4)(B) of the Act requires the establishment of an appropriate case-mix adjustment factor that explains a significant amount of the variation in cost among different units of services. Similarly, section 1895(b)(4)(C) of the Act requires the establishment of wage adjustment factors that reflect the relative level of wages and wage-related costs applicable to the furnishing of home health services in a geographic area compared to the national average applicable level. These wage-adjustment factors may be the factors used by the Secretary for the different area wage levels for purposes of section 1886(d)(3)(E) of the Act.

Section 1895(b)(5) of the Act gives the Secretary the option to grant additions or adjustments to the payment amount otherwise made in the case of outliers because of unusual variations in the type or amount of medically necessary care. Total outlier payments in a given fiscal year cannot exceed 5 percent of total payments projected or estimated.

On December 8, 2003, the Congress enacted the Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003 (Pub. L. 108-173). This legislation affected how we make updates to HH payment rates.

Section 701 of the MMA changed the yearly update cycle of the HH PPS rates from that of a fiscal year to a calendar year update cycle for 2004 and any subsequent year. Generally, section 701(a) of the MMA changed the references in the statute to refer to the calendar year for 2004 and any subsequent year. The changes resulted in updates to the HH PPS rates described as "fiscal year" updates for 2002 and 2003 and as "calendar year" updates for 2004 and any subsequent year (section 1895(b)(3)(B)(i) of the Act). Beginning on January 1, 2005, HH PPS will now be updated on a calendar year update cycle.

In addition to changing the update cycle for HH PPS rates, section 701 of the MMA made adjustments to the home health applicable increase percentage for 2004, 2005, and 2006. Specifically, section 701(a)(2)(D) of the MMA left unchanged the home health market basket update for the last calendar year quarter of 2003 and the first calendar year quarter of 2004 (section 1895(b)(3)(B)(ii)(II) of the Act). Furthermore, section 701(b)(4) of the MMA set the home health applicable percentage increase for the last 3 quarters of 2004 as the home health market basket (3.1 percent) minus 0.8 percentage point (section 1895(b)(3)(B)(ii)(III) of the Act). We implemented this provision through Pub. 100-20, One Time Notification, Transmittal 59, issued February 20, 2004. Section 701(b)(4) of the MMA also provided that updates for CY 2005 and CY 2006 will equal the applicable home health market basket percentage increase minus 0.8 percentage point. Lastly, section 701(b)(3) of the MMA revised the statute to provide that HH PPS rates for CY 2007 and any subsequent year will be updated by that year's home health market basket percentage increase (section 1895(b)(3)(B)(ii)(IV) of the Act).

B. Updates

On July 3, 2000, we published a final rule (65 FR 41128) in the **Federal Register** to implement the HH PPS legislation. That final rule established requirements for the new PPS for HHAs as required by section 4603 of the BBA, and as subsequently amended by section 5101 of the Omnibus Consolidated and Emergency Supplemental Appropriations Act (OCESAA) for Fiscal Year 1999 (Pub. L.

105-277), enacted on October 21, 1998; and by sections 302, 305, and 306 of the Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act (BBRA) of 1999 (Pub. L. 106-113), enacted on November 29, 1999. The requirements include the implementation of a PPS for HHAs, consolidated billing requirements, and a number of other related changes. The PPS described in that rule replaced the retrospective reasonable-cost-based system that was used by Medicare for the payment of home health services under Part A and Part B.

On October 22, 2004, we published a final rule (69 FR 62124), which set forth an update to the 60-day national episode rates and the national per-visit amounts under the Medicare prospective payment system for home health agencies. As part of that final rule, we rebased and revised the home health market basket to ensure it continues to adequately reflect the price changes of efficiently providing home health services. In addition, we revised the fixed dollar loss ratio, which is used in the calculation of outlier payments. That final rule was also the first update of the HH PPS rates on a calendar year update cycle. HH PPS was moved to a calendar year update cycle as a result of the MMA.

C. System for Payment of Home Health Services

Generally, Medicare makes payment under the HH PPS on the basis of a national standardized 60-day episode payment, adjusted for case mix and wage index. For episodes with four or fewer visits, Medicare pays on the basis of a national per-visit amount by discipline, referred to as a low utilization payment adjustment (LUPA). Medicare also adjusts the 60-day episode payment for certain intervening events that give rise to a partial episode payment adjustment (PEP adjustment) or a significant change in condition adjustment (SCIC). For certain cases that exceed a specific cost threshold, an outlier adjustment may also be available. For a complete and full description of the HH PPS as required by the BBA and as amended by OCESAA and BBRA, see the July 3, 2000 HH PPS final rule (65 FR 41128).

II. Provisions of the Proposed Regulations

[If you choose to comment on issues in this section, please include the caption "PROVISIONS OF THE PROPOSED REGULATIONS" at the beginning of your comments.]

A. National Standardized 60-Day Episode Rate

Medicare HH PPS has been effective since October 1, 2000. As set forth in the final rule published July 3, 2000 in the **Federal Register** (65 FR 41128), the unit of payment under Medicare HH PPS is a national standardized 60-day episode rate. As set forth in 42 CFR 484.220, we adjust the national standardized 60-day episode rate by a case mix grouping and a wage index value based on the site of service for the beneficiary. The proposed CY 2006 HH PPS rates use the same case-mix methodology and application of the wage index adjustment to the labor portion of the HH PPS rates as set forth in the July 3, 2000 final rule. In the October 22, 2004 final rule, we rebased and revised the home health market basket, resulting in a labor related share of 76.775 percent and a non-labor portion of 23.225 percent (69 FR 62126). We multiply the national 60-day episode rate by the patient's applicable case-mix weight. We divide the case-mix adjusted amount into a labor and non-labor portion. We multiply the labor portion by the applicable wage index based on the site of service of the beneficiary. As the home health market basket was rebased and revised last year, we are not proposing to rebase it for CY 2006.

As required by section 1895(b)(3)(B) of the Act, we have updated the HH PPS rates annually in a separate **Federal Register** document. Section 484.225 sets forth the specific percentage update for fiscal years 2001 through 2008. As amended by section 701 of the MMA, § 484.225(f) sets the CY 2006 unadjusted national prospective 60-day episode payment rate equal to the rate from the previous calendar year (CY 2005), increased by the applicable home health market basket minus 0.8 percentage point.

For CY 2006, we are proposing to use again the design and case-mix methodology described in section III.G of the HH PPS July 3, 2000 final rule (65 FR 41192 through 41203). For CY 2006, we are proposing to base the wage index adjustment to the labor portion of the PPS rates on the most recent pre-floor and pre-reclassified hospital wage index as discussed in section II.D of this proposed rule (not including any reclassifications under section 1886(d)(8)(B)) of the Act.

As discussed in the July 3, 2000 HH PPS final rule, for episodes with four or fewer visits, Medicare pays the national per-visit amount by discipline, referred to as a LUPA. We update the national per-visit amounts by discipline annually by the applicable home health market

basket percentage. We adjust the national per-visit amount by the appropriate wage index based on the site of service for the beneficiary as set forth in § 484.230. We propose to adjust the labor portion of the updated national per-visit amounts by discipline used to calculate the LUPA by the most recent pre-floor and pre-reclassified hospital wage index, as discussed in section II.D of this proposed rule.

Medicare pays the 60-day case-mix and wage-adjusted episode payment on a split percentage payment approach. The split percentage payment approach includes an initial percentage payment and a final percentage payment as set forth in § 484.205(b)(1) and (b)(2). We may base the initial percentage payment on the submission of a request for anticipated payment and the final percentage payment on the submission of the claim for the episode, as discussed in § 409.43. The claim for the episode that the HHA submits for the final percentage payment determines the total payment amount for the episode and whether we make an applicable adjustment to the 60-day

case-mix and wage-adjusted episode payment. The end date of the 60-day episode as reported on the claim determines the rate level at which Medicare will pay the claim for the fiscal period.

We may also adjust the 60-day case-mix and wage-adjusted episode payment based on the information submitted on the claim to reflect the following:

- A low utilization payment provided on a per-visit basis as set forth in § 484.205(c) and § 484.230.
- A partial episode payment adjustment as set forth in § 484.205(d) and § 484.235.
- A significant change in condition adjustment as set forth in § 484.205(e) and § 484.237.
- An outlier payment as set forth in § 484.205(f) and § 484.240.

This proposed rule reflects the proposed updated CY 2006 rates that would be effective January 1, 2006.

B. Proposed CY 2006 Update to the Home Health Market Basket Index

Section 1895(b)(3)(B) of the Act, as amended by section 701 of the MMA,

requires for CY 2006 that the standard prospective payment amounts be increased by a factor equal to the applicable home health market basket update minus 0.8 percentage point.

• *Proposed CY 2006 Adjustments*

In calculating the annual update for the CY 2006 60-day episode rates, we are proposing to first look at the CY 2005 rates as a starting point. The CY 2005 national 60-day episode rate, as published in the **Federal Register** (69 FR 62124) is \$2,264.28.

In order to calculate the CY 2006 national 60-day episode rate, we are proposing to multiply the CY 2005 national 60-day episode rate (\$2,264.28) by the proposed estimated home health market basket update of 3.3 percent for CY 2006 minus 0.8 percentage point.

We would increase the CY 2005 60-day episode payment rate by the proposed estimated home health market basket update (3.3 percent) minus 0.8 percentage point (\$2,264.28 × 2.5 percent) to yield the proposed updated CY 2006 national 60-day episode rate (\$2,320.89) (see Table 1 below).

TABLE 1.—PROPOSED NATIONAL 60-DAY EPISODE AMOUNTS UPDATED BY THE PROPOSED ESTIMATED HOME HEALTH MARKET BASKET UPDATE FOR CY 2006, MINUS 0.8 PERCENTAGE POINT, BEFORE CASE-MIX ADJUSTMENT, WAGE INDEX ADJUSTMENT BASED ON THE SITE OF SERVICE FOR THE BENEFICIARY OR APPLICABLE PAYMENT ADJUSTMENT

| Total prospective payment amount per 60-day episode for CY 2005 | Multiply by the proposed estimated home health market basket update (3.3 percent) minus 0.8 percentage point | Proposed CY 2006 updated national 60-day episode rate |
|---|--|---|
| \$2,264.28 | 1.025 | \$2,320.89 |

National Per-visit Amounts Used to Pay LUPAs and Compute Imputed Costs Used in Outlier Calculations

As discussed previously in this proposed rule, the policies governing the LUPAs and outlier calculations set forth in the July 3, 2000 HH PPS final

rule will continue during CY 2006. In calculating the annual update for the CY 2006 national per-visit amounts we use to pay LUPAs and to compute the imputed costs in outlier calculations, we are proposing to look again at the CY 2005 rates as a starting point. We then

are proposing to multiply those amounts by the proposed estimated home health market basket update minus 0.8 percentage point for CY 2006 to yield the updated per-visit amounts for each home health discipline for CY 2006 (see Table 2 below).

TABLE 2.—PROPOSED NATIONAL PER-VISIT AMOUNTS FOR LUPAs AND OUTLIER CALCULATIONS UPDATED BY THE PROPOSED ESTIMATED HOME HEALTH MARKET BASKET UPDATE FOR CY 2006, MINUS 0.8 PERCENTAGE POINT, BEFORE WAGE INDEX ADJUSTMENT BASED ON THE SITE OF SERVICE FOR THE BENEFICIARY

| Home health discipline type | Final per-visit amount per 60-day episode for CY 2005 for LUPAs | Multiply by the proposed estimated home health market basket (3.3 percent) minus 0.8 percentage point | Proposed per-visit payment amount per discipline for CY 2006 for LUPAs |
|-----------------------------|---|---|--|
| Home Health Aide | \$44.76 | 1.025 | \$45.88 |
| Medical Social Services | 158.45 | 1.025 | 162.41 |
| Occupational Therapy | 108.81 | 1.025 | 111.53 |
| Physical Therapy | 108.08 | 1.025 | 110.78 |
| Skilled Nursing | 98.85 | 1.025 | 101.32 |
| Speech-Language Pathology | 117.44 | 1.025 | 120.38 |

C. Outliers and the Fixed Dollar Loss Ratio

Outlier payments are payments made in addition to regular 60-day case-mix and wage-adjusted episode payments for episodes that incur unusually large costs due to patient home health care needs. Outlier payments are made for episodes for which the estimated cost exceeds a threshold amount. The episode's estimated cost is the sum of the national wage-adjusted per-visit payment amounts for all visits delivered during the episode. The outlier threshold for each case-mix group, PEP adjustment, or total SCIC adjustment is defined as the 60-day episode payment amount, PEP adjustment, or total SCIC adjustment for that group plus a fixed dollar loss amount. Both components of the outlier threshold are wage-adjusted.

The wage-adjusted fixed dollar loss (FDL) amount represents the amount of loss that an agency must bear before an episode becomes eligible for outlier payments. The FDL is computed by multiplying the wage-adjusted 60-day episode payment amount by the fixed dollar loss ratio, which is a proportion expressed in terms of the national standardized episode payment amount. The outlier payment is defined to be a proportion of the wage-adjusted estimated costs beyond the wage-adjusted threshold. The proportion of additional costs paid as outlier payments is referred to as the loss-sharing ratio.

Section 1895(b)(5) of the Act requires that estimated total outlier payments are no more than 5 percent of total estimated HH PPS payments. In response to the concerns about potential financial losses that might result from unusually expensive cases expressed in comments to the October 28, 1999 proposed rule (64 FR 58133), the July 2000 final rule set the target for estimated outlier payments at the 5 percent level. The fixed dollar loss ratio and the loss-sharing ratio were then selected so that estimated total outlier payments would meet the 5 percent target.

For a given level of outlier payments, there is a trade-off between the values selected for the fixed dollar loss ratio and the loss-sharing ratio. A high fixed dollar loss ratio reduces the number of episodes that can receive outlier payments, but makes it possible to select a higher loss-sharing ratio and, therefore, increase outlier payments for outlier episodes. Alternatively, a lower fixed dollar loss ratio means that more episodes can qualify for outlier payments, but outlier payments per episode must be lower. As a result of

public comments on the October 28, 1999 proposed rule, in our July 2000 final rule, we made the decision to attempt to cover a relatively high proportion of the costs of outlier cases for the most expensive episodes that would qualify for outlier payments within the 5 percent constraint.

In the July 2000 final rule, we chose a value of 0.80 for the loss-sharing ratio, which preserves incentives for agencies to attempt to provide care efficiently for outlier cases. A loss-sharing ratio of 0.80 was also consistent with the loss-sharing ratios used in other Medicare PPS outlier policies. Furthermore, we estimated the value of the fixed dollar loss ratio that would yield estimated total outlier payments that were 5 percent of total home health PPS payments. The resulting value for the fixed dollar loss ratio, for the July 2000 final rule, was 1.13.

Our CY 2005 update to the HH PPS rates (69 FR 62124) changed the fixed dollar loss ratio from the original 1.13 to 0.70 to allow more home health episodes to qualify for outlier payments and to better meet the estimated 5 percent target of outlier payments to total HH PPS payments. We stated in that CY 2005 update that we planned to continue to monitor the outlier expenditures on a yearly basis and to make adjustments as necessary (69 FR 62129). To do so, we planned on using the best Medicare data available at the time of publication. For the CY 2005 update, we used CY 2003 home health claims data. At this time, we do not have sufficient data to propose any update to the FDL ratio for the CY 2006 update to the HH PPS rates. However, depending on the availability of more recent data at the time of publication of the HH PPS rate update for CY 2006 final rule, we may, if necessary, implement an update to the FDL ratio for the CY 2006 update to the HH PPS rates. If so, we plan on using the same methodology performed in updating to the current FDL ratio described in the June 2, 2004 proposed rule using any more recent available data.

D. Hospital Wage Index

1. Revised OMB Definition for Geographical Statistical Areas

Sections 1895(b)(4)(A)(ii) and (b)(4)(C) of the Act require the Secretary to establish area wage adjustment factors that reflect the relative level of wages and wage-related costs applicable to the furnishing of home health services and to provide appropriate adjustments to the episode payment amounts under HH PPS to account for area wage differences. We apply the appropriate

wage index value to the labor portion (76.775 percent; see (60 FR 62126)) of the HH PPS rates based on the geographic area in which the beneficiary received home health services as discussed in section II. A of this proposed rule. Generally, we determine each HHA's labor market area based on definitions of Metropolitan Statistical Areas (MSAs) issued by the Office of Management and Budget (OMB).

We acknowledged in our October 22, 2004 final rule that, on June 6, 2003, the OMB issued an OMB Bulletin (No. 03-04) announcing revised definitions for Metropolitan Statistical Areas (MSAs), new definitions for Micropolitan Statistical Areas and Combined Statistical Areas, and guidance on using the statistical definitions. A copy of the Bulletin may be obtained at the following Internet address: <http://www.whitehouse.gov/omb/bulletins/b03-04.html>. At that time, we did not propose to apply these new definitions known as Core-Based Statistical Areas (CBSAs). After further analysis, we are proposing to use the OMB-revised definitions to adjust the proposed CY 2006 HH PPS payment rates. The Hospital Inpatient PPS (IPPS) is applying these revised definitions as discussed in the August 11, 2004 IPPS final rule (68 FR 49207).

a. Background. As discussed previously and set forth in the July 3, 2000 final rule, the statute provides that the wage adjustment factors may be the factors used by the Secretary for purposes of section 1886(d)(3)(E) of the Act for hospital wage adjustment factors. Again, as discussed in the July 3, 2000 final rule, we are proposing to use the pre-floor and pre-reclassified hospital wage index data to adjust the labor portion of the HH PPS rates based on the geographic area in which the beneficiary receives the home health services. We believe the use of the pre-floor and pre-reclassified hospital wage index data results in the appropriate adjustment to the labor portion of the costs as required by statute. For this proposed CY 2006 update to the home health payment rates, we propose to continue to use the most recent pre-floor and pre-reclassified hospital wage index available at the time of publication. See Addenda A and B of this proposed rule, respectively, for the proposed rural and urban hospital wage indices using the new MSA designations. For HH PPS rates addressed in this proposed rule, we are using preliminary 2006 pre-floor and pre-reclassified hospital wage index data. We will incorporate updated hospital wage index data for the 2006 pre-floor and pre-reclassified hospital wage index to be used in the final rule

for the CY 2006 HH PPS update (not including any reclassifications under section 1886(d)(8)(B) of the Act).

As implemented under the HH PPS in the July 3, 2000 HH PPS final rule, each HHA's labor market is determined based on definitions of MSAs issued by OMB. In general, an urban area is defined as an MSA or New England County Metropolitan Area (NECMA) as defined by OMB. Under § 412.62(f)(1)(iii), a rural area is defined as any area outside of the urban area. The urban and rural area geographic classifications are defined in § 412.62(f)(1)(ii) and (f)(1)(iii), respectively, and have been used under HH PPS since it was implemented.

Under the HH PPS, the wage index value used is based upon the location of the beneficiary's home. As has been our longstanding practice, any area not included in an MSA (urban area) is considered to be nonurban (§ 412.64(b)(1)(ii)(C)) and receives the statewide rural wage index value (see, for example (65 FR 41173)).

Currently, the MSA definitions are used under other prospective payment systems such as the inpatient rehabilitation facility PPS (IRF PPS), the inpatient psychiatric facility PPS (IPF PPS), the skilled nursing facility PPS (SNF PPS), and Medicare payment for hospice care. In the August 11, 2004 IPPS final rule (69 FR 49206 through 49034), revised labor market area definitions were adopted under § 412.64(b), which were effective October 1, 2004 for acute care hospitals. The new standards, CBSAs, were announced by OMB in late 2000 and are discussed in greater detail below.

As indicated above, we are proposing to implement the designations and definitions published by OMB. Details can be found in the June 6, 2003 OMB Bulletin (No. 03-04). In this proposed rule, we will address the new OMB definitions and their application to the home health wage index used by HH PPS. We are also proposing to revise § 484.202 (Definitions) to reflect those new designations and definitions. As we use the hospital inpatient wage data as the basis for determining the wage index used by HH PPS, we are generally adopting the same approach as taken by the hospital inpatient prospective payment system (IPPS). The changes in the hospital wage index based on the new OMB definitions are discussed in the inpatient prospective payment system (IPPS) proposed rule published in the **Federal Register** on May 18, 2004 (69 FR 28196) as well as in the IPPS final rule published on August 11, 2004 (69 FR 48916).

b. *Current Labor Market Areas Based on MSAs.* As noted above, we currently define labor market areas based on the definitions of Metropolitan Statistical Areas (MSAs), Primary MSAs (PMSAs), and New England County Metropolitan Areas (NECMAs) issued by the OMB. The OMB also designates Consolidated MSAs (CMSAs). A CMSA is a metropolitan area with a population of one million or more, comprising two or more PMSAs (identified by their separate economic and social character). For the purposes of the wage index, we use the PMSAs rather than the CMSAs because they allow a more precise breakdown of labor costs. If a metropolitan area is not designated as part of a PMSA, we use the applicable MSA. These different designations use counties as the building blocks upon which they are based. Hospitals are assigned to either an MSA, PMSA, or NECMA based on whether the county in which the hospital is located is part of that area. All of the counties in a State outside a designated MSA, PMSA, or NECMA are designated rural. For the purposes of calculating the wage index, we combine all of the counties in a State outside a designated MSA, PMSA, or NECMA together to calculate the statewide rural wage index for each state.

c. *Core-Based Statistical Areas.* The OMB reviews its Metropolitan Area (MA) definitions preceding each decennial census. As discussed in the August 11, 2004 IPPS final rule (69 FR 49207), in the Fall of 1998, the OMB chartered the Metropolitan Area Standards Review Committee to examine the MA standards and develop recommendations for possible changes to those standards. Three notices related to the review of the standards, providing an opportunity for public comment on the recommendations of the Committee, were published in the **Federal Register** on the following dates: December 21, 1998 (63 FR 70526); October 20, 1999 (64 FR 56628); and August 22, 2000 (65 FR 51060).

In the December 27, 2000 **Federal Register** (65 FR 82228 through 82238), OMB announced its new standards. In that notice, the OMB defines a Core-Based Statistical Area (CBSA), beginning in 2003, as "a geographic entity associated with at least one core of 10,000 or more population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties." The standards designate and define two categories of CBSAs: Metropolitan Statistical Areas (MSAs) and Micropolitan Statistical Areas (65 FR 82235).

According to the OMB, MSAs are based on urbanized areas of 50,000 or more population, and Micropolitan Statistical Areas (referred to in further discussion as Micropolitan Areas) are based on urban clusters of at least 10,000 population but less than 50,000 population. Counties that do not fall within CBSAs (either MSAs or Micropolitan Areas) are deemed "Outside CBSAs." In the past, the OMB defined MSAs around areas with a minimum core population of 50,000, and smaller areas were "Outside MSAs."

On June 6, 2003, OMB announced the new CBSAs, comprised of MSAs and the new Micropolitan Areas based on Census 2000 data. (A copy of the announcement may be obtained at the following Internet address: <http://www.whitehouse.gov/omb/bulletins/fy04/b04-03.html>.) The new CBSA designations recognize 49 new (urban) MSAs and 565 new Micropolitan Areas, and revise the composition of many of the existing (urban) MSAs. There are 1,090 counties in MSAs under these new CBSA designations compared with 848 counties in the previous MSAs. Of these 1,090 counties, 737 are in the same MSA as they were before the changes, 65 are in different MSAs, and 288 were not previously designated to any MSA. There are 674 counties in Micropolitan Areas. Of these, 41 were previously in an MSA, while 633 were not previously designated to an MSA. There are five counties that previously were designated to a MSA but are no longer designated to either an MSA or a new Micropolitan Area: Carter County, KY; St. James Parish, LA; Kane County, UT; Culpeper County, VA; and King George County, VA. For a more detailed discussion of the new CBSAs, refer to the August 11, 2004 IPPS final rule (69 FR 49026 through 49034).

d. *Proposed Revision to the HH PPS Labor Market Areas.* In its June 6, 2003 announcement, OMB cautioned that these new definitions "should not be used to develop and implement Federal, State, and local nonstatistical programs and policies without full consideration of the effects of using these definitions for such purposes. These areas should not serve as a general-purpose geographic framework for nonstatistical activities, and they may or may not be suitable for use in program funding formulas."

In the HH PPS update for CY 2005 proposed rule (69 FR 31260, June 2, 2004), we noted that the recently published IPPS proposed rule for FY 2005 had discussed some of the issues associated with using these new definitions, and had invited public

comment on them. Accordingly, we decided to defer proposing any new labor market definitions in the home health context at that time, in order to allow the public sufficient time and opportunity to consider and provide comments on this issue. In that HH PPS proposed rule, we also invited all interested parties to provide input on this issue in the specific context of the HH PPS. We believe that sufficient time has now elapsed for interested parties to consider and react to the new OMB definitions and, accordingly, we are now proposing to make the changes discussed below.

We have continued to use MSAs to define labor market areas for purposes of the wage index. For the HH PPS, the statute states that the Secretary shall establish area wage adjustment factors that reflect the relative level of wages and wage-related costs applicable to the furnishing of home health services in a geographic area compared to the national average applicable level. We believe MSAs are a reasonable and appropriate proxy for developing geographic areas for purposes of adjusting for wage differences in HH PPS and for many of the same reasons stated in the various IPPS rules over the years where this issue has been exhaustively examined. We also note that MSAs have been used to define labor market areas for purposes of the wage index for many of the other Medicare payment systems (for example, IRF PPS, SNF PPS, hospice, and IPF PPS).

First, historically, Medicare prospective payment systems have used MA definitions developed by OMB. For example, in discussing the adoption of the MSA designation for the IPPS area labor adjustment, the IPPS proposed rule for FY 1985 (49 FR 27426, July 3, 1984) stated:

[i]n administering a national payment system, we must have a national classification system built on clear, objective standards. Otherwise the program becomes increasingly difficult to administer because the distinction between rural and urban hospitals is blurred. We believe that the MSA system is the only one that currently meets the requirements for use as a classification system in a national payment program. The MSA classification system is a statistical standard developed for use by Federal agencies in the production, analysis, and publication of data on metropolitan areas. The standards have been developed with the aim of producing definitions that will be as consistent as possible for all MSAs nationwide.

In addition, in numerous instances, the Congress has recognized that the areas developed by OMB may be used for differentiating among geographic

areas for Medicare payment purposes. For example, in the IPPS statutory sections, the Congress defines an "urban area" as "an area within a Metropolitan Statistical Area (as defined by the Office of Management and Budget) or within such similar area as the Secretary has recognized." Section 1886(d)(2)(D) of the Act. Similarly, in the sections of the statute governing the guidelines to be used by the Medicare Geographic Classification Review Board for purposes of reclassification, the Congress directed the Secretary to create guidelines for "determining whether the county in which the hospital is located should be treated as being a part of a particular [MSA]." Section 1886(d)(10)(A), (D)(i)(II) of the Act. Thus, the Congress has accepted and ratified the use of MSAs as an inherently rational manner of dividing labor-market areas for purposes of Medicare payments.

The process used by OMB to develop the MSAs creates geographic areas upon characteristics that we believe also generally reflect the characteristics of unified labor market areas. For example, the CBSAs reflect a core population plus an adjacent territory that reflects a high degree of social and economic integration. This integration is measured by commuting ties, thus demonstrating that these areas may draw workers from the same general areas. In addition, the most recent CBSAs reflect the most up-to-date information. OMB reviews its MA definitions preceding each decennial census to reflect recent population changes and the CBSAs are based on the Census 2000 data. Finally, in the context of the IPPS, we have reviewed alternative methods for determining geographic areas for purposes of the wage index, and in each case, have decided to retain the OMB designations rather than replace these designations with alternatives.

Because we believe that we have broad authority to create labor market areas, and because we also believe that OMB's latest MA designations accurately reflect the local economies and wage levels of the areas in which hospitals are currently located, we are proposing to adopt the revised labor market area designations based on OMB's CBSA designations.

Furthermore, when we implemented the wage index adjustment at § 484.210 under the HH PPS in the July 3, 2000 HH PPS final rule (65 FR 41213), we stated that an appropriate wage index was to be used to adjust for area wage differences. We also explained that in the adjustment to the national prospective 60-day episode payment rate, we have to account for the

geographic differences in wage levels using an appropriate wage index based on the site of service of the beneficiary (65 FR 41213). Because we believe that OMB's CBSA designations based on Census 2000 data reflect the most recent available geographic classifications (MA definitions), as noted above we are proposing to revise the labor market area definitions used under the HH PPS. Specifically, we are proposing to revise the HH PPS labor market definitions based on OMB's new CBSA designations (as discussed in greater detail below), effective for HH PPS services occurring on or after January 1, 2006.

We note that OMB's new CBSA designations are the same labor market area definitions implemented under the IPPS at § 412.64(b), which were effective for those hospitals beginning October 1, 2004, as discussed in the August 11, 2004 IPPS final rule (69 FR 49026 through 49034). The similarity between the IPPS and the HH PPS includes the adoption in the initial implementation of the HH PPS of the same labor market area definitions under the HH PPS that existed under the IPPS at that time, as well as the use of acute care hospitals' wage data in calculating the HH PPS wage index. Therefore, we believe that proposing to revise the HH PPS labor market area definitions based on OMB's CBSA designations is consistent with our historical practice of generally modeling HH PPS wage index policy after IPPS wage index policy.

Below, we discuss the composition of the proposed HH PPS labor market areas based on OMB's new CBSA designations.

(1) *New England County Metropolitan Areas*. NECMAs are currently used to define labor market areas in New England, because they are county-based designations rather than the 1990 MSA definitions for New England, which used minor civil divisions such as cities and towns. Under the new CBSA definition, OMB has now defined the MSAs and Micropolitan Areas in New England on the basis of counties. OMB also established New England City and Town Areas, which are similar to the previous New England MSAs. Therefore, to maintain consistency among all labor market areas and to maintain these areas on the basis of counties, under the HH PPS, we are proposing to use the county-based areas for all MSAs in the nation, including those in New England. Census 2000 has now defined the New England area based on counties, creating a city- and town-based system as an alternative. We believe that adopting county-based labor market areas for the entire country,

except those in New England, would lead to inconsistencies in our designations. Adopting county-based labor market areas for the entire country provides consistency and stability in Medicare program payment because all the labor market areas throughout the country including New England, would be defined using the same system (that is, counties) rather than different systems in different areas of the county, thus minimizing programmatic complexity.

In addition, we have consistently employed a county-based system for New England for precisely that reason: to maintain consistency with the labor market definitions used throughout the country. We note that this is consistent with the implementation of the CBSA designations under the IPPS for New England (see August 11, 2004 (69 FR 49028)). Accordingly, under the HH PPS we are proposing to use the New England MSAs as determined under the proposed new CBSA-based labor market area definitions in defining the proposed revised HH PPS labor market areas.

(2) *Metropolitan Divisions.* Under OMB's new CBSA designations, a Metropolitan Division is a county or group of counties within a CBSA that contains a core population of at least 2.5 million, representing an employment center, plus adjacent counties associated with the main county or counties through commuting lines. A county qualifies as a main county if 65 percent or more of its employed residents work within the county and the ratio of the number of jobs located in the county to the number of employed residents is at least 0.75. A county qualifies as a secondary county if 50 percent or more, but less than 65 percent, of its employed residents work within the county and the ratio of the number of jobs located in the county to the number of employed residents is at least 0.75. After all the main and secondary counties are identified and grouped, each additional county that already has qualified for inclusion in the MSA falls within the Metropolitan Division associated with the main/secondary county or counties with which the county at issue has the highest employment interchange measure. Counties in a Metropolitan Division must be contiguous (65 FR 82236). Metropolitan Divisions have been implemented under IPPS (69 FR 49029).

As noted above, in the past, OMB designated CMSAs as Metropolitan Areas with a population of one million or more and comprised of two or more PMSAs. Under the HH PPS, we currently use the PMSAs rather than

CMSAs to define labor market areas because they comprise a smaller geographic area with potentially varying labor costs due to different local economies. We believe that CMSAs may be too large an area to accurately reflect the local labor costs of all of the individual hospitals included in that relatively "large" area. Similarly, we believe that Metropolitan Divisions under the CBSA designations may be too large an area to accurately reflect the local labor costs of all of the individual hospitals included in that relatively "large" area. Further, Metropolitan Divisions represent the closest approximation to PMSAs and, therefore, would most accurately maintain our current structuring of the HH PPS labor market areas. Therefore, as implemented under the IPPS (69 FR 49029), we are proposing to use the Metropolitan Divisions where applicable (as described below) under the proposed new CBSA-based labor market area definitions.

In addition to being comparable to the organization of the labor market areas under current MSA designations, we believe that proposing to use Metropolitan Divisions where applicable (as described below) under the HH PPS would result in a more accurate adjustment for the variation in local labor market areas. Specifically, if we recognize the relatively "larger" CBSA that comprises two or more Metropolitan Divisions as an independent labor market area for purposes of the wage index, it would be too large and would include the data from too many hospitals to compute a wage index that would accurately reflect the various local labor costs of all of the individual hospitals included in that relatively "large" CBSA. By proposing to recognize Metropolitan Divisions where applicable (as described below) under the proposed new CBSA-based labor market area definitions under the HH PPS, we believe that the local labor costs would be more accurately reflected, thereby resulting in a wage index adjustment that better reflects the variation in the local labor costs of the local economies served by HHAs in those relatively "smaller" areas.

Under CBSA definitions, there are 11 MSAs containing Metropolitan Divisions: Boston; Chicago; Dallas; Detroit; Los Angeles; Miami; New York; Philadelphia; San Francisco; Seattle; and Washington, D.C. Although these MSAs were also CMSAs under the prior definitions, in some cases their areas have been significantly altered.

Under the current HH PPS MSA designations, Boston was a single NECMA. Under the proposed CBSA-

based labor market area designations, it would be comprised of 4 Metropolitan Divisions. Los Angeles would go from 4 PMSAs under the current HH PPS MSA designations to 2 Metropolitan Divisions under the proposed CBSA-based labor market area designations. The New York CMSA would go from 15 PMSAs under the current HH PPS MSA designations to only 4 Metropolitan Divisions under the proposed CBSA-based labor market area designations. Five PMSAs in Connecticut under the current HH PPS MSA designations would become separate MSAs under the proposed CBSA-based labor market area designations. The number of PMSAs in New Jersey, under the current HH PPS MSA designations would go from 5 to 2, with the consolidation of 2 New Jersey PMSAs (Bergen-Passaic and Jersey City) into the New York-Wayne-White Plains, NY-NJ Division, under the proposed CBSA-based labor market area designations. In San Francisco, under the proposed CBSA-based labor market area designations, there are only 2 Divisions. Currently, there are 6 PMSAs, some of which are now separate MSAs under the current HH PPS labor market area designations.

Under the current HH PPS labor market area designations, Cincinnati, Cleveland, Denver, Houston, Milwaukee, Portland, Sacramento, and San Juan are all designated as CMSAs, but would no longer be designated as CMSAs under the proposed CBSA-based labor market area designations. As noted previously, the population threshold to be designated a CMSA under the current HH PPS labor market area designations is one million. In most of these cases, counties currently in a PMSA would become a separate, independent MSA under the proposed CBSA-based labor market area designations, leaving only the MSA for the core area under the proposed CBSA-based labor market area designations.

(3) *Micropolitan Areas.* Under OMB's new CBSA designations, Micropolitan Areas are essentially a third area definition comprised primarily of what are currently designated as rural areas, but also include some or all of areas that are currently designated as an urban MSA. As discussed in the August 11, 2004 IPPS final rule (69 FR 49029–49032), how these areas are treated would have significant impact on the calculation and application of the hospital wage index. Specifically, whether or not Micropolitan Areas are included as part of the respective statewide rural wage indices would affect the value of the statewide rural wage index of any State that contains a Micropolitan area. A hospital's

classification as urban or rural affects which hospitals' wage data are included in the statewide rural wage index. As discussed in section II.D.1.b of this proposed rule, all counties in a State outside a designated urban area are combined to calculate the statewide rural wage index for each State.

Micropolitan Areas included as part of the statewide rural labor market area would result in an increase to the statewide rural wage index because hospitals located in those Micropolitan Areas typically have higher labor costs than other rural hospitals in the State. Alternatively, as discussed in greater detail below, if Micropolitan Areas were recognized as independent labor market areas, because there would be so few hospitals in those areas to complete a wage index, the wage indices for those areas would become relatively unstable as they would change considerably from year to year.

Currently, we use MSAs to define urban labor market areas and group all the hospitals in counties within each State that are not assigned to an MSA into a statewide rural labor market area. Therefore, we used the terms "urban" and "rural" wage indices in the past for ease of reference. However, the introduction of Micropolitan Areas by OMB potentially complicates this terminology because these areas include many hospitals that are currently included in the statewide rural labor market areas. Thus, the term "rural" is now used to describe hospitals in counties that are not assigned to either MSA or Micropolitan areas.

We are proposing to treat Micropolitan Areas as rural labor market areas under the HH PPS for the reasons outlined below. That is, counties that are assigned to a Micropolitan area under the CBSA designations would be treated the same as other "rural" counties that are not assigned to either an MSA (Metropolitan Area) or a Micropolitan Area. Therefore, in determining the applicable HH PPS wage index (based on IPPS hospital wage index data, as discussed in greater detail below in section II.D. of this preamble), we propose that the wage index for an HHA servicing a home health beneficiary in a Micropolitan Area under the OMB's CBSA designations would be classified as "rural" and would be assigned the statewide rural wage index for that State.

In the August 11, 2004 IPPS final rule, (69 FR 49029 through 49032), we discussed the impact of treating Micropolitan areas as part of the statewide rural labor market area instead of treating Micropolitan Areas as

independent labor market areas for hospitals paid under IPPS. As discussed in greater detail in that same final rule, Micropolitan Areas encompass smaller populations than MSAs and tend to include fewer hospitals per Micropolitan Area.

As Micropolitan Areas tend to include fewer hospitals, recognizing Micropolitan Areas as independent labor market areas would generally increase the potential for dramatic shifts in those areas' wage indices from one year to the next because a single hospital (or group of hospitals) could have a disproportionate effect on the wage index of the area. Dramatic shifts in an area's wage index from year to year are problematic because they result in the instability of payment levels from year to year, which makes fiscal planning difficult. Therefore, in order to minimize the potential instability in payment levels from year to year, we believe it would be appropriate to treat Micropolitan Areas as part of the statewide rural labor market area under HH PPS.

Consistent with the treatment of these areas under the IPPS, we are proposing that Micropolitan Areas be considered a part of the statewide rural labor market area. Accordingly, we are proposing that the HH PPS statewide rural wage index would be determined using acute-care IPPS hospital wage data from hospitals located in non-MSA areas and that the statewide rural wage index would be assigned to home health episodes of care for beneficiaries being served in those areas.

We are proposing to adopt OMB's new labor market designations for CY 2006, effective January 1, 2006. In adopting the CBSA designations, we identified some geographic areas where there were no hospitals, and thus no hospital wage index data on which to base the calculation of the CY 2006 HH PPS proposed wage index. In addressing this situation, we are proposing approaches that we believe serve as proxies for hospital wage data and will provide an appropriate standard that accounts for area wage differences.

The first situation involves rural locations in Massachusetts and Puerto Rico. Under the proposed labor market areas, there are no rural hospitals in those locations. Because there is no reasonable proxy for more recent rural data within those areas, we are proposing to use last year's wage index value for rural Massachusetts and rural Puerto Rico.

The second situation has to do with the urban areas of Hinesville, GA (CBSA 25980) and Mansfield, OH (CBSA 31900). Under the proposed new labor

market areas, there are no urban hospitals within those areas. We propose to use all of the urban areas within the State to serve as a reasonable proxy for the urban areas without specific hospital wage index data in determining the HH PPS wage index. Therefore, in this proposed rule, we calculated the urban wage index value for purposes of the wage index for these areas without urban hospital data as the average wage index for all urban areas within the State. We could not apply a similar averaging in rural areas because in the rural areas noted above, there is no rural hospital data available for averaging on a state-wide basis. We solicit comments on these approaches to calculating the wage index values for areas without hospitals for CY 2006 and subsequent years.

(4) *Implementation of the Proposed Revised Labor Market Designation.* When the revised labor market areas based on OMB's new CBSA designations were adopted under the IPPS beginning on October 1, 2004, a transition to the new designations was established due to the scope and magnitude of the change, in order to mitigate the resulting adverse impact on certain hospitals. As discussed in the August 11, 2004 IPPS final rule (69 FR 49032), during FY 2005, a blend of wage indices is calculated for those acute care IPPS hospitals experiencing a drop in their wage indices because of the adoption of the new labor market areas. Also, as described in that same final rule (69 FR 49032), under the IPPS, hospitals that previously had been located in an urban MSA but became rural under the new CBSA definitions are assigned the wage index value of the urban area to which they belonged previously, for 3 years (FYs 2005 through 2007).

Unlike IPPS and some of the other payment systems where each entity uses a single MSA, HHAs may use various wage indices to compute their payments based upon the location of the beneficiary. Therefore, we do not believe that in the aggregate, HHAs would be impacted negatively by the new CBSA designations. While we understand that there are CBSAs that decrease based upon the new definitions, there are those that would be positively affected. For example, many counties that have been included in the rural definitions under the MSA designations are now designated as urban areas under the CBSA and would generally receive an increase in their wage index. We believe that adjustments made to CBSAs because of negative impact would necessitate adjustments to CBSAs that are

positively impacted. Variability and changes in wage indices both positively and negatively have occurred under the MSA designations and occur as a result of geographic differences. As a result, we propose to adopt the CBSA definitions and resulting wage indices without transitions. The impact of CBSA designations is discussed in section V.B of this proposed rule. In estimating the impact of our proposal, we computed the projected expenditures for FY 2006 using geographic areas based upon existing MSAs as well as for areas using the new CBSA designations. Our impact analysis used the proposed CY 2006 payment rates and all of the CY 2003 claims files. In the final rule, we will use the best available home health data for CY 2004 in determining the potential impact of any change to the MSA designations. We also note that, in the past, the OMB has announced MSA changes on an annual basis due to population changes, and we have not proposed to transition these changes. Therefore, we do not propose transitioning the implementation of the new MSA designations.

We also note that section 505 of the MMA established new section 1886(d)(13) of the Act. The new section 1886(d)(13) requires that the Secretary establish a process to make adjustments to the hospital wage index based on commuting patterns of hospital employees. We believe that this requirement for an "out-commuting" or "out-migration" adjustment applies specifically to the Hospital Inpatient Prospective Payment System. Therefore, we will not be establishing such an adjustment for HH PPS.

As stated previously, we believe that OMB's latest labor market designations more accurately reflect the local economics and wage levels of the areas in which hospitals are currently located. We believe that OMB's CBSA designations based on Census 2000 data reflect the most recent available geographic classifications (MA definitions) and as a result reflect the relative hospital wage levels in the geographic area. As stated previously, since HHAs compete for the same staff as hospitals in any geographic area, we believe the hospital wage index used by HH PPS reflects the wages that are paid by HHAs.

To reflect our proposal to use the new OMB labor market areas for purposes of the HH PPS wage index, we are proposing to add, in § 484.202 (Definitions), the following definitions for rural and urban:

Rural area means, with respect to home health episodes ending on or after

January 1, 2006, an area defined in § 412.64(b)(1)(ii)(C).

Urban area means, with respect to home health episodes ending on or after January 1, 2006, an area defined in § 412.64(b)(1)(ii)(A) and (B).

To facilitate an understanding of the proposed policies related to the proposed changes in the wage index as discussed in section V.B of this proposed rule, in addendum C, we are providing a listing of each Social Security Administration State and county location code, State and county name, existing MSA-based labor market area designation, MSA-based wage index value, CBSA-based labor market area, and the proposed CBSA-based wage index value.

III. Collection of Information Requirements

This document does not impose information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 35).

IV. Response to Comments

Because of the large number of public comments we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the **DATES** section of this preamble, and, when we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

V. Regulatory Impact Analysis

[If you choose to comment on issues in this section, please include the caption "REGULATORY IMPACT" at the beginning of your comments.]

A. Overall Impact

We have examined the impacts of this rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96-354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4), and Executive Order 13132.

Executive Order 12866 (as amended by Executive Order 13258, which merely reassigns responsibility of duties) directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic,

environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects (\$100 million or more in any 1 year). The update set forth in this proposed rule would apply to Medicare payments under HH PPS in CY 2006. Accordingly, the following analysis describes the impact in CY 2006 only. We estimate that there would be an additional \$330 million in CY 2006 expenditures attributable to the CY 2006 proposed estimated home health market basket update (3.3 percent) minus 0.8 percentage point, for a CY 2006 update of 2.5 percent.

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and government agencies. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of \$6 million to \$29 million in any 1 year. For purposes of the RFA, approximately 75 percent of HHAs are considered small businesses according to the Small Business Administration's size standards with total revenues of \$11.5 million or less in any 1 year. Individuals and States are not included in the definition of a small entity. As stated above, this proposed rule would provide an update to all HHAs for CY 2006 as required by statute. This proposed rule would have a significant positive effect upon small entities.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 100 beds. We have determined that this proposed rule would not have a significant economic impact on the operations of a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule that may result in expenditure in any 1 year by State, local, or tribal governments, in the aggregate, or by the private sector, of \$110 million. We believe this proposed rule would not mandate expenditures in that amount.

Executive Order 13132 establishes certain requirements that an agency

must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. We have reviewed this rule under the threshold criteria of Executive Order 13132, Federalism. We have determined that this proposed rule would not have substantial direct effects on the rights, roles, and responsibilities of States.

B. Anticipated Effects

This proposed rule would update the HH PPS rates contained in the CY 2005 final rule (69 FR 62124, October 22, 2004). The impact analysis of this proposed rule presents the projected effects of the proposed change from MSA to CBSA designations in determining the wage index used to calculate the HH PPS rates for CY 2006. We estimate the effects by estimating payments while holding all other payment variables constant. We use the best data available, but we do not attempt to predict behavioral responses to these changes, and we do not make adjustments for future changes in such variables as days or case-mix.

This analysis incorporates the latest estimates of growth in service use and payments under the Medicare home health benefit, based on the latest available Medicare claims from 2003. We note that certain events may combine to limit the scope or accuracy of our impact analysis, because such an analysis is future-oriented and, thus, susceptible to forecasting errors due to other changes in the forecasted impact time period. Some examples of such possible events are newly-legislated general Medicare program funding changes by the Congress, or changes specifically related to HHAs. In addition, changes to the Medicare program may continue to be made as a result of the BBA, the BBRA, the BIPA, the MMA, or new statutory provisions. Although these changes may not be specific to the HH PPS, the nature of the Medicare program is such that the changes may interact, and the complexity of the interaction of these changes could make it difficult to

predict accurately the full scope of the impact upon HHAs.

Our discussions for this proposed rule will focus on the impact of changes in the wage index, most notably the adoption of the CBSA designations. The impacts are shown in Table 3 below. The breakdown of the various impacts displayed in the table follows.

The rows display the estimated effect of the proposed changes on different categories. The first row of figures represents the estimated effects on all facilities. The next 2 rows show the effect on urban and rural facilities. This is followed, in the next 4 rows, by impacts on urban and rural facilities based on whether they are a hospital-based or freestanding facility. The next 20 rows show the effect on urban and rural facilities based on the census region in which they are located.

The first column shows the breakdown of all HHAs by urban or rural status, hospital-based or freestanding status, and census region.

The second column in the table shows the number of facilities in the impact database. A facility is considered urban if it is located in an MSA and, conversely, rural if it is not located in an MSA.

The third column of the table shows the effect of the proposed annual update to the wage index. This represents the effect of using the most recent wage data available to determine the proposed estimated home health market basket update. The total impact of this change is zero percent; however, there are distributional effects of the change.

The fourth column of the table reflects the impact of using the new OMB geographic designations based on CBSAs, compared to using the MSA designations. Specifically, the effect of using the CBSA-designated wage index values versus MSA-designated wage index values in determining payment for facilities in rural areas is, on average, an increase of 0.7 percent. On the other hand, facilities in an urban area do slightly worse, showing an average decrease of 0.1 percent. Rural HHAs, by region, generally do better using the CBSA-determined wage index (ranging from an increase of 0.1 percent to 2.2 percent), except for facilities in the Middle Atlantic and the Mountain

regions where payments are estimated to decrease by 0.5 percent. The impact on urban HHAs, by region, is generally moderate using the CBSA determined wage index (ranging from no impact to a -0.8 percent decrease), except for facilities in the Middle Atlantic region, whose payments are estimated to increase slightly by 0.3 percent. By type of facility, the impact on rural facilities using the CBSA-determined wage index is positive, with payments to freestanding facilities estimated to increase by 0.8 percent and payments to hospital-based facilities estimated to increase by 0.7 percent. Conversely, hospital-based urban facilities are estimated to experience no impact while freestanding urban facilities are estimated to see a decrease in payments by 0.2 percent.

The fifth column of the table shows the effect of all of the changes on the CY 2006 payments. The update of 2.5 percentage points (market basket increase of 3.3 percent minus 0.8 percentage point, as mandated by the MMA) is constant for all providers and, though not shown individually, is included in this column. It is projected that total aggregate payments would increase by 2.5 percent; assuming facilities do not change their care delivery and billing practices in response.

As can be seen from this table, the combined effects of all of the changes would vary by specific types of providers and by location. For example, HHAs in rural New England show the largest estimated increase in payment at 5.7 percent, while HHAs in the urban West North Central and East North Central regions show the smallest increase in payments at 1.5 percent. Rural HHAs do somewhat better than urban HHAs, seeing an estimated increase in payments of 3.5 percent and 2.3 percent, respectively. Amongst the different type of facility categories, freestanding rural HHAs do best, with an estimated increase in payments of 3.7 percent. Hospital-based rural HHAs are next with an estimated increase in payments of 3.3 percent with hospital-based urban and freestanding HHAs with estimated increases of 2.4 percent and 2.2 percent, respectively.

TABLE 3.—PROJECTED IMPACT OF CY 2006 UPDATE TO THE HH PPS FINAL COLUMN INCLUDES UPDATE OF 2.5 PERCENT URBAN/RURAL DEFINED AS MSA/NON-MSA

| | Number of facilities | Updated wage data | MSA to CBSA | Total CY 2006 change |
|-------------|----------------------|-------------------|-------------|----------------------|
| Total | 6,890 | 0.0 | 0.0 | 2.5 |
| Urban | 4,602 | -0.1 | -0.1 | 2.3 |
| Rural | 2,288 | 0.3 | 0.7 | 3.5 |

TABLE 3.—PROJECTED IMPACT OF CY 2006 UPDATE TO THE HH PPS FINAL COLUMN INCLUDES UPDATE OF 2.5 PERCENT URBAN/RURAL DEFINED AS MSA/NON-MSA—Continued

| | Number of facilities | Updated wage data | MSA to CBSA | Total CY 2006 change |

C. Conclusion

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

List of Subjects in 42 CFR Part 484

Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services proposes to amend 42 CFR chapter IV as set forth below:

PART 484—HOME HEALTH SERVICES

1. The authority citation for part 484 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395(hh)).

Subpart E—Prospective Payment System for Home Health Agencies

2. In § 484.202, the definitions for “Rural area” and “Urban area” are added in alphabetical order to read as follows:

§ 484.202 Definitions.

* * * * *

Rural area means, with respect to home health episodes ending on or after January 1, 2006, an area defined in § 412.64(b)(1)(ii)(C) of this chapter.

Urban area means, with respect to home health episodes ending on or after January 1, 2006, an area defined in § 412.64(b)(1)(ii)(A) and (B) of this chapter.

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: May 12, 2005.

Mark B. McClellan,

Administrator, Centers for Medicare & Medicaid Services.

Approved: June 21, 2005.

Michael O. Leavitt,

Secretary.

Note: The following addenda will not be published in the Code of Federal Regulations.

¹ All counties within the State are classified as urban, with the exception of Massachusetts and Puerto Rico. Massachusetts and Puerto Rico have areas designated as rural, however, no short-term, acute care hospitals are located in the area(s) for FY 2006. Because more recent data is not available for those areas, we are proposing to use last year's wage index value.
