

in producer surplus mirrors that of fleet contraction exhibited recently (1.15 percent), the resultant estimates of producer surplus are approximately \$450,000 to \$720,000 by 2010, and \$484,000 to \$775,000 by 2015. Each alternative would also continue to provide for market-based compensation for vessels that exit the fishery, and the permit market would continue to provide an economically rational basis for regulating the entry of vessels into the commercial Gulf reef fish fishery and allocating access to fishery resources among competing users in the commercial fisheries.

Although the final rule would imply a more permanent system than the alternatives, the system established under any alternative could be suspended at any time through appropriate regulatory action. Adopting an indefinite duration, however, eliminates the need for action at specific intervals to continue the system, thereby eliminating the costs associated with the additional regulatory process. The administrative and development cost of the current action is estimated to be \$200,000. This cost includes all administrative costs associated with development, review, and implementation of this rule, including Council meetings, public hearings, travel, staff, and printing. Further, the final rule may better address the Council's purpose of providing stability in the commercial and recreational fisheries for Gulf reef fish, preventing speculative entry into the commercial fisheries, and achieving OY. The status quo alternative would not achieve the Council's objectives.

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as "small entity compliance guides." As part of this rulemaking process, NMFS prepared a fishery bulletin, which also serves as a small entity compliance guide. The fishery bulletin will be sent to all vessel permit holders for the Gulf reef fish fishery.
