BILLING CODE 6210-01-S

GENERAL SERVICES ADMINISTRATION

Office of Governmentwide Policy; Governmentwide Relocation Advisory Board; Charter Renewal

AGENCY: Office of Governmentwide Policy, GSA.

ACTION: Notice of charter renewal.

SUMMARY: The Administrator of General Services has renewed the charter for the Governmentwide Relocation Advisory Board (Board) (see 69 FR 34676, June 22, 2004), extending it to December 31, 2005. The Board is used to obtain advice and recommendations on a wide range of relocation management issues. The Board's first priority is to review the current policies promulgated through the Federal Travel Regulation (FTR) for relocation allowances.

FOR FURTHER INFORMATION CONTACT: Patrick O'Grady, Room G-219, GSA Building, Washington, DC 20405, (202) 208-4493, or by email at patrick.ogrady@gsa.gov.

SUPPLEMENTARY INFORMATION: This notice is published in accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), and advises of the renewal of the GSA Governmentwide Relocation Advisory Board (Board). The Administrator of General Services has determined that the renewal of the Board is necessary and in the public interest.

ADDRESSES: You may request a copy of the charter by contacting Patrick O'Grady at patrick.ogrady@gsa.gov, by phone at (202)208-4493; or by FAX at (202)501-0349.

Dated: July 12, 2005

Becky Rhodes,

Deputy Associate Administrator.

BILLING CODE 6820-14-S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Toxicology Program (NTP); Center for the Evaluation of Risks to Human Reproduction (CERHR); Announcement of the Availability of the Expert Panel Report on Styrene; Request for Public Comment

AGENCY: National Institute for Environmental Health Sciences (NIEHS); National Institutes of Health (NIH).

ACTION: Announcement of report availability and request for comment.

SUMMARY: The CERHR announces the availability of the expert panel report on styrene on July 18, 2005 from the CERHR Web site (<http://cerhr.niehs.nih.gov>) or in print from the CERHR (see **ADDRESSES** below). The expert panel report is an evaluation of the reproductive and developmental toxicity of styrene conducted by a 13-member expert panel composed of scientists from the federal government, universities, and private organizations. The CERHR invites the submission of public comments on this expert panel report (see **SUPPLEMENTARY INFORMATION** below). The CERHR previously solicited public comment on the draft version of this expert panel report (**Federal Register** Vol. 70, No. 45 pp. 11680-11681). Public deliberations by the panel took place on June 1-3, 2005, at the Holiday Inn Old Town Select Alexandria, Virginia to review and revise the draft expert panel report and reach conclusions regarding whether exposure to styrene is a hazard to human development or reproduction. The expert panel also identified data gaps and research needs.

DATES: The final expert panel report on styrene will be available for public comment on July 18, 2005. Written public comments on this report should be received by September 1, 2005.

ADDRESSES: Comments on the expert panel report and any other correspondence should be sent to Dr. Michael D. Shelby, CERHR Director, NIEHS, P.O. Box 12233, MD EC-32, Research Triangle Park, NC 27709 (mail), (919) 316-4511 (fax), or shelby@niehs.nih.gov (e-mail). Courier address: CERHR, 79 T.W. Alexander Drive, Building 4401, Room 103, Research Triangle Park, NC 27709.

SUPPLEMENTARY INFORMATION:

Background

The National Toxicology Program (NTP) Center for the Evaluation of Risks to Human Reproduction (CERHR) convened an expert panel on June 1-3,

2005. The purpose of this meeting was to evaluate the scientific evidence regarding the potential reproductive and/or developmental toxicities associated with exposure to styrene. Styrene (ethenylbenzene; CAS RN: 100-42-5) is a high production volume chemical used in the production of polystyrene resins and as a co-polymer with acrylonitrile and 1,3-butadiene. Styrene is found in items such as foam cups, dental fillings, matrices for ion exchange filters, construction materials, and boats. It is also used in protective coatings, reinforced glass fiber, agricultural products, and as a food additive. The public can be exposed to styrene by ingesting food or drink that has been in contact with styrene polymers or through inhalation of polluted air and cigarette smoke. CERHR selected styrene for expert panel evaluation because of: (1) Public concern about styrene exposure and (2) recently available exposure studies.

Following receipt of public comments on the styrene final expert panel report, CERHR staff will prepare an NTP-CERHR monograph on this chemical. NTP-CERHR monographs are divided into four major sections: (1) The NTP Brief which provides the NTP's interpretation of the potential for the chemical to cause adverse reproductive and/or developmental effects in exposed humans, (2) a roster of expert panel members, (3) the final expert panel report, and (4) any public comments received on that report. The NTP Brief is based on the expert panel report, public comments on that report, and any new information that became available after the expert panel meeting.

Request for Comments

The CERHR invites written public comments on the styrene expert panel report. Written comments should be sent to Dr. Michael Shelby at the address provided above. Persons submitting written comments are asked to include their name and contact information (affiliation, mailing address, telephone and facsimile numbers, e-mail, and sponsoring organization, if any). Any comments received will be posted on the CERHR Web site and be included in the NTP CERHR monograph on this chemical. All public comments will be considered by the NTP during preparation of the NTP Brief described above under "Background."

Background Information on the CERHR

The NTP established the NTP CERHR in June 1998 [**Federal Register**, December 14, 1998 (Vol. 63, No. 239, pp. 68782)]. The CERHR is a publicly accessible resource for information

about adverse reproductive and/or developmental health effects associated with exposure to environmental and/or occupational exposures. Expert panels conduct scientific evaluations of agents selected by the CERHR in public forums.

The CERHR invites the nomination of agents for review or scientists for its expert registry. Information about CERHR and the nomination process can be obtained from its Web site (<http://cerhr.niehs.nih.gov>) or by contacting Dr. Shelby (see **ADDRESSES** above). The CERHR selects chemicals for evaluation based upon several factors including production volume, potential for human exposure from use and occurrence in the environment, extent of public concern, and extent of data from reproductive and developmental toxicity studies.

CERHR follows a formal, multi-step process for review and evaluation of selected chemicals. The formal evaluation process was published in the **Federal Register** notice July 16, 2001 (Vol. 66, No. 136, pp 37047–37048) and is available on the CERHR Web site under “About CERHR” or in printed copy from the CERHR.

Dated: July 6, 2005.

David A. Schwartz,

Director, National Institute of Environmental Health Sciences and the National Toxicology Program.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–05–05CO]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on

proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404–371–5983 and send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS–D74, Atlanta, GA 30333 or send an e-mail to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

The Centers for Disease Control and Prevention’s Consumer Response Services Center (CDC–INFO) Evaluation—New—National Center for Health Marketing (NCHM), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC is launching an integrated “one face to the public” approach across all communication channels to handle inquiries concerning a broad spectrum of public health topics. The overall objective is to ensure consistent, timely, reliable health information for dissemination to a variety of consumers (public, health professionals, researchers, etc.) and to address variations in inquiry volumes related to public health emergencies, news events, and dynamic, shifting public health priorities. The CDC has integrated over

40 hotlines into one Consumer Response Services Center—CDC–INFO. CDC–INFO has an exceptionally wide scope because content currently divided between over 40 hotlines handling nearly 2,000,000 telephone contacts annually will be consolidated under CDC–INFO. All CDC hotlines will be consolidated in one center beginning in February 2005, with all CDC program areas transitioning into CDC–INFO through a phased approach during the next three years. CDC–INFO itself will be operational for at least the next seven years.

The primary objectives of the national evaluation are to (1) Proactively evaluate customer interactions and service effectiveness by employing assessment measures and data collection mechanisms to support performance management, gathering insights and understandings for improving service levels, and implementing effective measures to meet customer satisfaction goals; (2) develop an ongoing understanding of customer requirements and satisfaction trends to achieve best of practice quality standards and to provide qualitative assessments, quantitative data, and cost factors to drive improvement and reinforce operational objectives; (3) measure CDC–INFO contractor service performance to assist in determining whether performance incentives have been achieved; and (4) to collect data in order to address public concern and response to emergencies, outbreaks, and media events.

Sample size, respondent burden, and intrusiveness have been minimized to be consistent with national evaluation objectives. Procedures will be employed to safeguard the privacy and confidentiality of participants. Pilot tests assisted in controlling burden and ensuring the user-relevance of questions. The following table shows the estimated annualized burden for data collection. There are no respondent costs other than the amount of time required to respond to the survey.

ESTIMATE OF ANNUALIZED BURDEN TABLE

Data collection instrument	Number of respondents	Responses /respondent	Average burden/re-sponse (in hrs)	Average annual burden hours
Satisfaction survey (callers)	35,000	1	3/60	1,750
Satisfaction survey (e-mail inquiries)	336	1	3/60	17
Follow up survey	7,000	1	7/60	817
Key informant survey	5,000	1	7/60	583
Postcard survey	5,000	1	1/60	83
Special event survey	35,000	1	5/60	2,917
