[Docket No. RM01-12-000]

Order Terminating Proceeding

Issued July 19, 2005.

Before Commissioners: Joseph T. Kelliher, Chairman; Nora Mead Brownell, and Suedeen G. Kelly. Remedying Undue Discrimination through Open Access Transmission Service and Standard Electricity Market Design; Order Terminating Proceeding.

1. In 2002, the Commission issued the Standard Market Design (SMD) Notice of Proposed Rulemaking (NOPR) in this proceeding.¹ For the reasons given below, we are exercising our discretion to terminate this proceeding.

Background

2. On July 31, 2002, the Commission issued a NOPR proposing to remedy remaining undue discrimination and establish a standardized transmission service and wholesale electric market design to provide a level playing field for all entities seeking to participate in wholesale electric markets, while recognizing certain regional variations. The Commission explained that it was proposing to provide new choices through a flexible transmission service and an open and transparent spot market design that would provide the right pricing signals for investment in transmission and generation facilities. The Commission also explained that it was proposing regulatory backstops to protect customers against the exercise of market power when structures do not support a competitive market, *i.e.*, market monitoring and market power mitigation. The Commission further proposed to exercise jurisdiction over the transmission component of bundled retail transactions and to require all transmission owners and operators that had not yet joined a regional transmission organization (RTO) to contract with an independent entity to operate their transmission facilities.

¹ Remedying Undue Discrimination through Open Access Transmission Service and Standard Electricity Market Design, Notice of Proposed Rulemaking, 67 Fed. Reg. 55,452 (Aug. 29, 2002), FERC Stats. & Regs. ¶ 32,563 (2002).
