Title: Lower Colorado River Well Inventory.

OMB No.: OMB No. 1006-0014.

Abstract: The Secretary of the Interior is responsible for accounting for all diversions of mainstream Colorado River water along the lower Colorado River, and for assuring that all Colorado River water use is in accordance with a water use entitlement. This requires an inventory of wells and river pumps along the lower Colorado River, and the gathering of specific information concerning these wells.

Description of respondents: All diversions of mainstream Colorado River water along the lower Colorado River must be accounted for in accordance with a water use contract with the Secretary of the Interior for non-Indian water uses, or accounted for in compliance with a Secretarial reserved right or decreed water right for federal reservations. This will affect every well and river-pump owner and operator along the lower Colorado River in Arizona, California, and Nevada. Each diverter (including well pumpers) must be identified and their diversion locations and water use determined.

Frequency: These data will be collected only once for each well or river-pump owner or operator as long as changes in water use, or other changes that would impact contractual or administrative requirements, are not made.

Estimated completion time: An average of 20 minutes is required for Reclamation to interview individual well and river-pump owners or operators. Reclamation will use the information collected during these interviews to complete the information collection form.

Annual responses: 1,500.

Annual burden hours: 500 hours.

Dated: July 15, 2005.

Acting Area Manager.
