Environmental Statement; Notice of Availability

AGENCY: Natural Resources Conservation Service, USDA.

ACTION: Notice of availability.

SUMMARY: The Natural Resources Conservation Service (NRCS), has prepared an Environmental Assessment in compliance with the National Environmental Policy Act (NEPA), as amended, the implementing regulations for NEPA (40 CFR parts 1500-1508), and NRCS policy. The St. George and Washington Canal Washington Fields Pipeline Project is a federally assisted action authorized as a Congressional Earmark under the Consolidated Appropriations Act, 2004. The Environmental Assessment was developed in coordination with the Washington County Water Conservancy District and the Bureau of Land Management. Upon review of the Environmental Assessment, the State Conservationist for NRCS, Utah, made a Finding of No Significant Impact (FONSI) and the determination was made that no environmental impact statement is required to support the project. Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Regulations (40 CFR part 1500); and the Natural Resources Conservation Service Regulations (7 CFR part 650); the Natural Resources Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the St. George and Washington Canal Washington Fields Pipeline Project. Written comments regarding this action may be submitted to: Sylvia Gillen, State Conservationist, USDA/NRCS, Wallace F. Bennett Federal Building, 125 South State Street, Room 4402, Salt Lake City, UT 84138-1100. Comments must be received no later than 30 days after this notice is published.

EFFECTIVE DATE: July 27, 2005.

FOR FURTHER INFORMATION CONTACT:

Sylvia Gillen, State Conservationist, Natural Resources Conservation Service, Wallace F. Bennett Federal Building, 125 South State Street, Room 4402, Salt Lake City, Utah 84138-1100; telephone (801) 524-4550.

SUPPLEMENTARY INFORMATION: The Environmental Assessment of this federally assisted action documents that the project will not cause significant local, regional, state, or national impacts on the human environment. The findings of Sylvia Gillen, State Conservationist, indicate that the preparation and review of an environmental impact statement is not needed for this project.

The objectives of the proposed project are:

- To decrease the amount of water loss from the canal caused through seepage.
- To decrease the potential liability associated with the canal washing out and the resulting flooding.
- To increase public safety by piping the canal.

The proposed action is to replace the St. George and Washington Canal with a buried pipeline. The existing concrete canal lining would be removed and a pipeline would be placed in the existing trench. Approximately 9 miles of pipeline would be welded together and then lifted and placed into the canal alignment.

Copies of the FONSI and Environmental Assessment are available by request from Sylvia Gillen, Utah State Conservationist. Basic data developed during the environmental evaluation are on file and may be reviewed by contacting Sylvia Gillen, Utah State Conservationist. Requests may be submitted to: Sylvia Gillen, State Conservationist, Natural Resources Conservation Service, Wallace F.
