Affected entities: Entities potentially affected by this action are establishments primarily engaged in all types of electroplating, electroless plating, metal spraying, anodizing, coloring, and finishing of metals and formed products for the trade. Also potentially affected by this action are establishments which perform these types of activities, on their own account, on purchased metals or formed

products. The standard industrial classification (SIC) code for this industry is primarily 3471, Electroplating, Plating, Polishing, Anodizing, and Coloring; the North American Industry Classification System (NAICS) code is 332813, Electroplating, Plating, Polishing, Anodizing, and Coloring.

Title: Information Request for National Emission Standards for Hazardous Air Pollutants (NESHAP) from Plating and Polishing Operations.

Abstract: The proposed ICR will collect information and data from 930 existing plating and polishing facilities. Facilities will be requested to complete a simple paper questionnaire on general facility information (location, description, processes, electroplating finishes applied, technical contact), hazardous air pollutant (HAP) emissions and permit data, permit conditions, emission tests data, processes and equipment, HAP-containing material data, local ventilation system information, and HAP emission control/reduction measures. The questionnaire may be completed from readily available information; no additional emission testing or monitoring will be required.

The EPA will use the collected information and data to evaluate the need for area source NESHAP required under section 112(k) of the Clean Air Act (CAA) for the Plating and Polishing Area Source Category. If the area source NESHAP are developed, the collected information will be used to evaluate the types of provisions needed to limit HAP emissions from plating and polishing operations and to estimate the impacts of regulatory options.

This collection of information is mandatory under section 114 of the CAA (42 U.S.C 7414). All information submitted to EPA pursuant to this ICR for which a claim of confidentiality is made is safeguarded according to Agency policies in 40 CFR part 2, subpart B. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the

proposed collection of information, including the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The projected cost and hour burden for this one-time collection is \$720,000 and 11,400 hours. This burden is based on an estimated 930 likely respondents and an average annual respondent burden of 12 hours at a cost of \$770 per facility. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: July 20, 2005.

Director, Emission Standards Division, Office of Air Quality Planning and Standards.
