ELIGIBILITY AND ENROLLMENT DATA:

Selected electronic data elements extracted from DEERS regarding personal eligibility for and enrollment in various health care programs within the Department of Defense (DoD) and among DoD and other federal healthcare programs including those of the Department of Veterans Affairs (DVA), the Department of Health and Human Services (DHHS), and contracted health care provided through funding provided by one of these three Departments.

Electronic data regarding beneficiaries' interaction with the MHS including health care encounters, health care screenings and education, wellness and satisfaction surveys, and cost data relative to such healthcare interactions. Electronic data regarding Military Health System beneficiaries' interactions with the DVA or DHHS healthcare delivery programs where such programs effect benefits determinations between these Department-level programs, continuity of clinical care, or effect payment for care between Departmental programs inclusive of care provided by commercial entities under contract to these three Departments.

Electronic data regarding dental tests, pharmacy prescriptions and reports, data incorporating medical nutrition therapy and medical food management, data for young MHS beneficiaries eligible for services from the military medical departments covered by the Individuals with Disabilities Education Act (IDEA). Data collected within the system also allows beneficiaries to request an accounting of who was given access to their medical records prior to the date of request. It tracks disclosure types, treatment, payment and other Health Care Operations (TPO) versus non-TPO, captures key information about disclosures, processes complaints, processes and tracks requests for amendments to records, generates disclosure accounting and audit reports, retains history of disclosure accounting processing.

Electronic data used by the MHS for resource planning based on projections of actual health care needs rather than projections based on past demand.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Department Regulation; 10 U.S.C., Chapter 55; Pub.L. 104-91, Health Insurance Portability and Accountability Act of 1996; DoD 6025.18-R, DoD Health Information Privacy Regulation; 10 U.S.C. 1071-1085, Medical and Dental Care; 42 U.S.C. Chapter 117, Sections 11131-11152, Reporting of Information; 10 U.S.C. 1097a and 1097b, TRICARE Prime and TRICARE Program; 10 U.S.C. 1079, Contracts for Medical Care for Spouses and Children; 10 U.S.C. 1079a, Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); 10 U.S.C. 1086, Contracts for Health Benefits for Certain Members, Former Members, and Their Dependents; DoD Instruction 6015.23, Delivery of Healthcare at Military Treatment Facilities (MTFs); DoD 6010.8-R, CHAMPUS; 10 U.S.C. 1095, Collection from Third Party Payers Act; and E.O. 9397 (SSN).

PURPOSE(S):

Data collected within and maintained by the Military Health Information System supports benefits determination for MHS beneficiaries between DoD, DVA, and DHHS healthcare programs, provides the ability to support continuity of care across Federal programs including use of the data in the provision of care, ensures more efficient adjudication of claims and supports healthcare policy analysis and clinical research to improve the quality and efficiency of care within the MHS.

The electronic medical records portion of the system (EMR) addresses documenting and tracking environmental health readiness data located in arsenals, depots, and bases. Data collected and maintained is used to assess the medical and dental deployability of Service members for the purposes of pre- and post-deployment exams. This assists in recording health conditions before deployment and any changes during and after deployment.

Data collected and maintained in the EMR system is used to perform disease management and the prevention of exacerbations and complications using evidence-based practice guidelines and patient empowerment strategies. Data collected and maintained in the EMR system is used in proactive health intervention activities for the active duty and non-active duty beneficiary population. Data collected and

maintained is used to capture data on hearing loss and occupational exposures, to perform noise exposure surveillance and injury referrals to assess auditory readiness.

Data collected and maintained in the EMR system is used to establish individual longitudinal exposure records using pre-deployment exposure records. These records are used as a baseline against new exposures to facilitate post-deployment follow-up and workplace injury root-cause analysis in an effort to mitigate loss work time within the DoD.

Data collected within and maintained in the system is used for patient administration (including registration, admission, disposition and transfer); patient appointing and scheduling, delivery of managed care; workload and medical services accounting; and quality assurance.

Data collected will be provided to Special Oversight Boards created by applicable DoD authorities to investigate special circumstances and conditions resulting from a deployment of DoD personnel to a theater of operations.

Data collected and maintained in electronic and paper records is used to track victims of sexual assault crimes, and medical and other support services provided to them. Data collected and maintained is also used to capture demographics and perform trend analysis.
