The Proposal

This notice proposes to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing a Class E airspace area extending upward from 700 feet above the surface at Gardner Municipal Airport, KS. A Class E airspace area overlies Gardner Municipal Airport, KS, however, its purpose and description are relative to Olathe, New Century Aircenter, KS and does not fully enclose the NDB or

GPS-D Instrument Approach Procedures to Gardner Municipal Airport, KS. This proposal would correct this discrepancy by establishing a Class E airspace area extending upward from 700 feet above the surface within a 6.4-mile radius of Gardner Municipal Airport, KS excluding that airspace within the Olathe, New Century Aircenter, KS Class D airspace. This will define airspace of appropriate dimensions to protect aircraft departing and executing instrument approach procedures to Gardner Municipal Airport and bring the airspace area into compliance with FAA directives. The area would be depicted on appropriate aeronautical charts.

Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9M, dated August 30, 2004, and effective September 16, 2004, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

This proposed rulemaking is promulgated under the authority described in subtitle VII, part A, subpart I, section 40103. Under that section, the FAA is charged with prescribing regulations to assign to use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This proposed regulation is within the scope of that authority since it would contain aircraft executing

instrument approach procedures to Gardner Municipal Airport.
