SUPPLEMENTARY INFORMATION:
Title: State-Federal Brucellosis Eradication Program.

OMB Number: 0579-0047.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) is responsible for, among other things, administering regulations intended to prevent the spread of brucellosis and other animal diseases within the United States.

Brucellosis is a contagious disease that primarily affects cattle, bison, and swine. It causes the loss of young through spontaneous abortion or birth of weak offspring, reduced milk production, and infertility. The continued presence of brucellosis in a herd seriously threatens the health of other animals. Brucellosis has caused devastating losses to farmers in the United States over the last century.

The State-Federal Brucellosis Eradication Program, which is a national program, is working toward eliminating this serious disease of livestock. The program is conducted under the various States' authorities supplemented by Federal authorities regulating interstate movement of affected animals. Effective screening programs and extensive epidemiological investigations are required to locate infection and to eradicate the disease.

Conducting effective brucellosis screening programs and epidemiological investigations requires the use of many information collection activities, such as applications for tags or tattoos, epidemiology report forms, monthly reports of brucellosis eradication and program surveillance activities, reports of brucellosis reactors slaughtered, and
