The nature of the information collection is described as well as its expected burden. The **Federal Register** notice with a 60-day comment period soliciting comments on the following collection of information was published on May 5, 2005, and comments were due by July 5, 2005. One comment was received by MARAD opposing and objecting to any waivers of any kind being extended due to terrorist concerns. MARAD is required to and requested comments specifically about whether this information collection is necessary for proper performance of the functions of the agency and will have practical utility, accuracy of the burden estimates, ways to minimize this burden, and ways to enhance the quality, utility, and clarity of the information to be collected. Because this comment does not address this information collection, MARAD will not address the respondent's comments in this action.

Congress expressed concern with unskilled pipeline personnel in the Pipeline Safety and Reauthorization Act of 1988 (Pub. L. 100-561). This act authorized the Secretary of Transportation to require all individuals responsible for the operation and maintenance of pipeline facilities to be properly qualified to safely perform their tasks. The operator qualification requirements are described in the pipeline safety regulations at 49 CFR Part 192, subpart N and 49 CFR Part 195, subpart G. PHMSA/Office of Pipeline Safety (OPS) seeks to extend an existing collection of information for Operator Qualification of Pipeline Personnel. PHMSA/OPS published the initial notice requesting public comment on April 18, 2002 (67 FR 19312-13).

This information collection supports the DOT strategic goal of safety by reducing the number of fatalities, injuries, and amount of property damage.

As used in this notice, "information collection" includes all work related to preparing and disseminating information related to this recordkeeping requirement including completing paperwork, gathering information and conducting telephone calls.

Underwater pipelines are being abandoned at an increasing rate as older facilities reach the end of their useful life. This trend is expected to continue. In 1992, Congress responded to this issue by amending the Pipeline Safety Act (49 U.S.C. 60108(c)(6)(B)). The amendment directs the Secretary of Transportation to require operators of an offshore pipeline facility, or a pipeline crossing navigable waters, to report the abandonment to the Secretary of Transportation in a way that specifies whether the facility has been abandoned properly according to applicable Federal and State requirements. PHMSA's regulations for abandonment reporting can be found at Title 49 CFR 192.727 and 195.402.
