DEPARTMENT OF HOMELAND SECURITY

Bureau of Customs and Border Protection

Notice of Cancellation of Customs Broker License Due to Death of the License Holder

AGENCY: Bureau of Customs and Border Protection, U.S. Department of Homeland Security.

ACTION: General notice.

SUMMARY: Notice is hereby given that, pursuant to title 19 of the Code of Federal Regulations § 111.51(a), the following individual Customs broker licenses and any and all permits have been cancelled due to the death of the broker:

Name	License No.	Port Name
Rufus B. Lee	2825	Mobile.
Walter M. Cline	06284	Tampa.
Peter D. Alberdi	06272	Tampa

Dated: August 12, 2005.

Jayson P. Ahern,

Assistant Commissioner, Office of Field Operations.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Federal Emergency Management Agency, Emergency Preparedness and Response Directorate, U.S. Department of Homeland Security
ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed revised information collections. In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c) (2) (A)), this notice seeks comments concerning the Elevation Certificate and the Floodproofing Certificate. The Elevation Certificate is required by the NFIP to certify the elevations of the buildings to determine the proper flood insurance rate. It can also be used by communities to document to what height new buildings and substantial improvements in Special Flood Hazard Areas were elevated so that communities can verify building compliance including the lowest floor determination.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP) regulations require the elevation or floodproofing of new or substantially improved structures in designated

Special Flood Hazard Areas. As part of the agreement for making flood insurance available in a community, the NFIP requires the community to adopt a floodplain management ordinance containing minimum NFIP requirements intended to reduce future flood losses. One such requirement is that the community require that buildings be elevated to or above the base flood elevation and, obtain the elevation of the lowest floor (including basement) of all new and substantially improved structures, and maintain a record of all such information. These data should be generated and retained as part of the community's permit records. The Elevation Certificate is one convenient way for a community to document building compliance; however, it is not a prescribed form. The Floodproofing Certificate may similarly be used to establish the floodproofed design elevation in those instances when floodproofing of non-residential structures is permitted.

The Elevation Certificate and Floodproofing Certificate are used in conjunction with the application in order to properly rate Post-FIRM structures in Special Flood Hazard Areas (44 CFR 61.7, 61.8) for flood insurance. Post-FIRM are those buildings constructed after publication of the Flood Insurance Rate Map (FIRM). In addition, the Elevation Certificate is needed for Pre-FIRM structures being rated under Post-FIRM flood insurance rules. The standardized format of the Elevation Certificate (FEMA Forms 81-31) and Floodproofing Certificate for Non-Residential Structures (FEMA Forms 81-65) provide community officials with needed data in order to verify building elevation information and determine compliance with the community's floodplain management ordinance.

Collection of Information

Title: Post Construction Elevation Certificate/Floodproofing Certificate.

Type of Information Collection: Revision of a currently approved collection.

OMB Number: 1660-0008.

Form Numbers: FEMA Form 81-31, Elevation Certificate, and FEMA Form 81-65, Flood Proofing Certificate.

Abstract: The Elevation Certificate and Floodproofing Certificate are used in conjunction with the application for flood insurance. The certificates are required for proper rating of post Flood Insurance Rate Map (FIRM) structures, which are buildings constructed after the publication of the FIRM, for flood insurance in Special Flood Hazard Areas. In addition, the Elevation Certificate is needed for pre-FIRM structures being rated under post-FIRM flood insurance rules. The certificates provide community officials and others standardized documents to readily record needed building elevation information.

The certificates are supplied to insurance agents, community officials, surveyors, engineers, architects, and NFIP policyholders/applicants. Surveyors, engineers, and architects complete the Elevation Certificate. Engineers and architects complete the Floodproofing Certificate. Community officials are provided the building elevation information required to document and determine compliance with the community's floodplain management ordinance. NFIP policyholders/applicants provide the appropriate certificate to insurance agents. The certificate is then used in conjunction with the flood insurance application so that the building can be properly rated for flood insurance.

Affected Public: Individuals or households, business or other for-profit, not-for-profit institutions, farms, and State, local or tribal governments.

Estimated Total Annual Burden Hours:

ANNUAL BURDEN HOURS

Project/Activity (Survey, Form(s), Focus Group, etc.)	No. of Respondents (A)	Frequency of Responses (B)	Burden Hours Per Respondent (C)	Annual Responses (AxB)	Total Annual Burden Hours (AxBxC)
Elevation Certificate, FEMA Form 81-31 and Instructions.	48,300	One per structure	3.50 hours	48,300	169,050
Floodproofing Certificate, FEMA Form 81-65	130	One per structure	3.25 hours	130	423
Web-based Training Module (Surveyors Video, Surveyors Guide for EC, and Bldg. Diagrams and Photo).	48,300	One per structure	0.25 hour	48,300	12,075
Total	48,430	48,430	181,548
